Village Bank and Trust Financial Corp. and Subsidiary Notes to Condensed Consolidated Financial Statements Three and Nine Months Ended September 30, 2012 and 2011 (Unaudited)

Note 1 - Principles of presentation

Village Bank and Trust Financial Corp. (the "Company") is the holding company of Village Bank (the "Bank"). The consolidated financial statements include the accounts of the Company, the Bank and the Bank's three wholly-owned subsidiaries, Village Bank Mortgage Company, Village Insurance Agency, Inc., and Village Financial Services Company. All material intercompany balances and transactions have been eliminated in consolidation.

In the opinion of management, the accompanying condensed consolidated financial statements of the Company have been prepared on the accrual basis in accordance with generally accepted accounting principles for interim financial information. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. However, all adjustments that are, in the opinion of management, necessary for a fair presentation have been included. The results of operations for the three and nine month periods ended September 30, 2012 are not necessarily indicative of the results to be expected for the full year ending December 31, 2012. The unaudited interim financial statements should be read in conjunction with the audited financial statements and notes to financial statements that are presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2011 as filed with the Securities and Exchange Commission.

Note 2 - Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the balance sheets and statements of income for the period. Actual results could differ significantly from those estimates. A material estimate that is particularly susceptible to significant change in the near term relates to the determination of the allowance for loan losses and the related provision.

Note 3 - Earnings (loss) per common share

The following table presents the basic and diluted earnings per share computations:

Edgar Filing: Village Bank & Trust Financial Corp. - Form 10-Q

	Three Months Ended September 30,			Nine Months Ended September 30,				
	2012		2011		2012		2011

					,		, ,	
Earnings (loss) per share - basic and diluted								
Earnings (loss) per share - basic	\$(0.14)	\$(1.29)	\$(2.85)	\$(1.31)
Effect of dilutive common stock options	-		-		-		-	-
•								
Earnings (loss) per share - diluted	\$(0.14)	\$(1.29)	\$(2.85)	\$(1.31)

Outstanding options and warrants to purchase common stock were considered in the computation of diluted earnings per share for the periods presented. Stock options for 266,530 shares of common stock were not included in computing diluted earnings per share for the three and nine months ended September 30, 2012 because their effects were anti-dilutive. Warrants for 499,029 shares of common stock were not included in computing earnings per share in 2012 and 2011 because their effects were also anti-dilutive.

Note 4 – Investment securities available for sale

At September 30, 2012 and December 31, 2011, all of our securities were classified as available-for-sale. The following table presents the composition of our investment portfolio at the dates indicated (dollars in thousands).

Management does not believe that any individual unrealized loss as of September 30, 2012 and December 31, 2011 is other than a temporary impairment. These unrealized losses are primarily attributable to changes in interest rates. As of September 30, 2012, management does not have the intent to sell any of the securities classified as available for sale and management believes that it is more likely than not that the Company will not have to sell any such securities before a recovery of cost.

Note 5 – Loans and allowance for loan losses

The following table presents the composition of our loan portfolio (excluding mortgage loans held for sale) at the dates indicated (dollars in thousands).

The Company assigns risk rating classifications to its loans. These risk ratings are divided into the following groups:

- Risk rated 1 to 4 loans are considered of sufficient quality to preclude an adverse rating. 1-4 assets generally are well protected by the current net worth and paying capacity of the obligor or by the value of the asset or underlying collateral;
 - Risk rated 5 loans are defined as having potential weaknesses that deserve management's close attention;
- Risk rated 6 loans are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any, and;
- Risk rated 7 loans have all the weaknesses inherent in substandard loans, with the added characteristics that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable.

The following tables provide information on the risk rating of loans at the dates indicated:

Loans are considered impaired when, based on current information and events it is probable the Company will be unable to collect all amounts due in accordance with the original contractual terms of the loan agreement, including scheduled principal and interest payments. Loans evaluated individually for impairment include non-performing loans, such as loans on non-accrual, loans past due by 90 days or more, restructured loans and other loans selected by management. The evaluations are based upon discounted expected cash flows or collateral valuations. If the evaluation shows that a loan is individually impaired then a specific reserve is established for the amount of impairment. Impairment is evaluated in total for smaller-balance loans of a similar nature and on an individual loan basis for other loans. If a loan is impaired, a specific valuation allowance is allocated, if necessary, so that the loan is reported net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from the collateral. Interest payments on impaired loans are typically applied to principal unless collectability of the principal amount is reasonably assured, in which case interest is recognized on a cash basis. Impaired loans, or portions thereof, are charged off when deemed uncollectible. September 30, 2012 and December 31, 2011 impaired loans are set forth in the following table.

Table of Contents

Included in impaired loans are loans classified as troubled debt restructurings (TDRs). A modification of a loan's terms constitutes a TDR if the creditor grants a concession to the borrower for economic or legal reasons related to the borrowers financial difficulties that it would not otherwise consider. For loans classified as impaired TDRs, the Company further evaluates the loans as performing or nonperforming. If, at the time of restructure, the loan is not considered nonaccrual, it will be classified as performing. TDRs originally classified as nonperforming are able to be reclassified as performing if, subsequent to restructure, they experience six months of payment performance according to the restricted terms. The following is a summary of performing and nonaccrual TDRs and the related specific valuation allowance by portfolio segment as of the dates indicated.

Note 7 – Trust preferred securities

During the first quarter of 2005, Southern Community Financial Capital Trust I, a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable securities. On February 24, 2005, \$5.2 million of Trust Preferred Capital Notes were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest (three-month LIBOR plus 2.15%) which adjusts, and is payable, quarterly. The interest rate at September 30, 2012 was 2.54%. The securities were redeemable at par beginning on March 15, 2010 and each quarter after such date until the securities mature on March 15, 2035. No amounts have been redeemed at September 30, 2012 and there are no plans to do so. The principal asset of the Trust is \$5.2 million of the Company's junior subordinated debt securities with like maturities and like interest rates to the Trust Preferred Capital Notes.

During the third quarter of 2007, Village Financial Statutory Trust II, a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable securities. On September 20, 2007, \$3.6 million of Trust Preferred Capital Notes were issued through a pooled underwriting. The securities have a five year fixed interest rate of 6.29% payable quarterly, converting after five years to a LIBOR-indexed floating rate of interest (three-month LIBOR plus 1.40%) which adjusts, and is also payable, quarterly. The securities may be redeemed at par at any time commencing in December 2012 until the securities mature in 2037. The principal asset of the Trust is \$3.6 million of the Company's junior subordinated debt securities with like maturities and like interest rates to the Trust Preferred Capital Notes.

The Trust Preferred Capital Notes may be included in Tier 1 capital for regulatory capital adequacy determination purposes up to 25% of Tier 1 capital after its inclusion. The portion of the Trust Preferred Capital Notes not considered as Tier 1 capital may be included in Tier 2 capital.

The obligations of the Company with respect to the issuance of the Trust Preferred Capital Notes constitute a full and unconditional guarantee by the Company of the Trust's obligations with respect to the Trust Preferred Capital Notes. Subject to certain exceptions and limitations, the Company may elect from time to time to defer interest payments on the junior subordinated debt securities, which would result in a deferral of distribution payments on the related Trust Preferred Capital Notes and require a deferral of common dividends. In consideration of our agreements with our regulators, which require regulatory approval to make interest payments on these securities, the Company has deferred an aggregate of \$558,600 in interest payments on the junior subordinated debt securities as of September 30, 2012. The Company has been deferring interest payments since June 2011. Although we elected to defer payment of the interest due, the amount has been accrued and is included in interest expense.

Note 8 – Stock incentive plan

The Company has a stock incentive plan which authorizes the issuance of up to 455,000 shares of common stock to assist the Company in recruiting and retaining key personnel.

The following table summarizes stock options outstanding under the stock incentive plan at the indicated dates:

			Ni	ne Months En	ded Septembe	er 30,		
		20)12		•	20)11	
		Weighted				Weighted		
		Average				Average		
			Fair				Fair

Options exercisable,

end of period 261,530 291,350

During the first quarter of 2009, we granted to certain officers 26,592 restricted shares of common stock with a weighted average fair market value of \$4.60 at the date of grant. These restricted stock awards

Table of Contents

had three-year graded vesting. Prior to vesting, these shares are subject to forfeiture to us without consideration upon termination of employment under certain circumstances. The remaining balance of restricted stock has been issued as of September 30, 2012. The total number of shares underlying non-vested restricted stock and performance share awards was 6,271 at September 30, 2011.

The fair value of the stock is calculated under the same methodology as stock options and the expense is recognized over the vesting period. Unamortized stock-based compensation related to nonvested share based compensation arrangements granted under the Incentive Plan as of September 30, 2012 and 2011 was \$2,734 and \$35,960 respectively. The time based unamortized compensation of \$2,734 is expected to be recognized over a weighted average period of 2.83 years.

Stock-based compensation expense was \$6,506 and \$88,835 for the nine months ended September 30, 2012 and 2011, respectively.

Note 9 – Fair Value

The fair value of an asset or liability is the price that would be received to sell that asset or paid to transfer that liability in an orderly transaction between market participants. A fair value measurement assumes that the transaction to sell the asset or transfer the liability occurs in the principal market for the asset or liability or, in the absence of a principal market, the most advantageous market for the asset or liability. The price in the principal (or most advantageous) market used to measure the fair value of the asset or liability shall not be adjusted for transaction costs. An orderly transaction is a transaction that assumes exposure to the market for a period prior to the measurement date to allow for marketing activities that are usual and customary for transaction involving such assets and liabilities; it is not a forced transaction. Market participants are buyers and sellers in the principal market that are independent, knowledgeable, able to transact and willing to transact.

FASB Codification Topic 820: Fair Value Measurements and Disclosures establishes a hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair values hierarch is as follows:

Level 1 Inputs — Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2 Inputs — Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 Inputs- Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The Company used the following methods to determine the fair value of each type of financial instrument:

Securities: Fair values for securities available-for-sale are obtained from an independent pricing service. The prices are not adjusted. The independent pricing service uses industry-standard models to price U.S. Government agency obligations and mortgage backed securities that consider various assumptions, including time value, yield curves, volatility factors, prepayment speeds, default rates, loss severity, current market and contractual prices for the underlying financial instruments, as well as other relevant economic measures. Securities of obligations of state and political subdivisions are valued using a type of matrix, or grid, pricing in which securities are benchmarked against the treasury rate based on credit rating. Substantially all assumptions used by the independent pricing service are observable in the marketplace, can be derived from observable data, or are supported by observable levels at which

transactions are executed in the marketplace (Levels 1 and 2).

Impaired loans: The fair values of impaired loans are measured for impairment using the fair value of the collateral for collateral-dependent loans on a nonrecurring basis. Collateral may be in the form of real estate or business assets including equipment, inventory and accounts receivable. The vast majority of the Company's collateral is real estate. The value of real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the property is more than two years old, then a Level 3 valuation is considered to measure the fair value. The value of business equipment is based upon an outside appraisal if deemed significant using observable market data. Likewise, values for inventory and account receivables collateral are based on financial statement balances or aging reports (Level 3). Any fair value adjustments are recorded in the period incurred as provision for loan losses on the Consolidated Statements of Income.

Real Estate Owned: Real estate owned assets are adjusted to fair value upon transfer of the loans to foreclosed assets. Subsequently, real estate owned assets are carried at net realizable value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the foreclosed asset as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the foreclosed asset as nonrecurring level 3.

Assets and liabilities measured at fair value under Topic 820 on a recurring and non-recurring basis are summarized below for the indicated dates:

Fair Value Measurement

Secured	\$ 2,119	Flow	(3)	10%-20	%
		Appraisal (1) or	Appraisal Adjustments		
		Internal	Liquidation Expenses		
Real Estate Owned	\$ 2,444	Valuation (2)	(3)	7%-30	%

⁽¹⁾ Fair Value is generally determined through independent appraisals of the underlying collateral, which generally included various level 3 inputs which are not identifiable

The following table presents the changes in the Level 3 fair value category for the nine months ended September 30, 2012.

⁽²⁾ Internal valuations may be conducted to determine Fair Value for assets with nominal carrying balances

⁽³⁾ Appraisals may be adjusted by management for qualitative factors such as economic conditions and estimated liquidation expenses

In general, fair value of securities is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon market prices determined by an outside, independent entity that primarily uses as inputs, observable market-based parameters. Fair value of loans held for sale is based upon internally developed models that primarily use as inputs, observable market-based parameters. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments may include amounts to reflect counterparty credit quality, among other things, as well as unobservable parameters. Any such valuation adjustments are applied consistently over time. The Company valuation methodologies may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. While management believes the Company's valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Company's monthly and or quarter valuation process.

Cash and cash equivalents – The carrying amount of cash and cash equivalents approximates fair value.

Investment securities – The fair value of investment securities available-for-sale is estimated based on bid quotations received from independent pricing services for similar assets. The carrying amount of other investments approximates fair value.

Loans – For variable rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. For all other loans, fair values are calculated by discounting the contractual cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loans, or by using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same

remaining maturities.

Deposits – The fair value of deposits with no stated maturity, such as demand, interest checking and money market, and savings accounts, is equal to the amount payable on demand at year-end. The fair value of certificates of deposit is based on the discounted value of contractual cash flows using the rates currently offered for deposits of similar remaining maturities.

Borrowings – The fair value of borrowings is based on the discounted value of contractual cash flows using the rates currently offered for borrowings of similar remaining maturities

Accrued interest – The carrying amounts of accrued interest receivable and payable approximate fair value.

The following table presents the estimated fair value of our financial instruments at the indicated dates:

Note 10 – Capital Purchase Program

On May 1, 2009, as part of the Capital Purchase Program established by the U.S. Department of the Treasury (the "Treasury") under the Emergency Economic Stabilization Act of 2008 ("EESA"), the Company entered into a Letter

Agreement and Securities Purchase Agreement—Standard Terms (collectively, the "Purchase Agreement") with the Treasury, pursuant to which the Company sold (i) 14,738 shares of the Company's Fixed Rate Cumulative Perpetual Preferred Stock, Series A, par value \$4.00 per share, having a liquidation preference of \$1,000 per share (the "Preferred Stock") and (ii) a warrant (the "Warrant") to purchase 499,029 shares of the Company's common stock at an initial exercise price of \$4.43 per share, subject to certain anti-dilution and other adjustments, for an aggregate purchase price of \$14,738,000 in cash. The fair value of the preferred stock was estimated using discounted cash flow methodology at an assumed market equivalent rate of 13%, with 20 quarterly payments over a five year period. The fair value of the warrant was estimated using the Black-Scholes option pricing model, with assumptions of 25% volatility, a risk-free rate of 2.03%, a yield of

6.162% and an estimated life of 5 years. The value attributed to the warrant is being accreted as a discount on the preferred stock using the effective interest rate method over five years.

The Preferred Stock qualifies as Tier 1 capital and pays cumulative dividends at a rate of 5% per annum until May 1, 2014, and thereafter at a rate of 9% per annum. The Preferred Stock is generally non-voting, other than on certain matters that could adversely affect the Preferred Stock.

In consideration of our agreements with our regulators, which require regulatory approval to make dividend payments on our preferred stock, the Company notified the U.S. Treasury in May 2011 that the Company was going to defer the payment of the quarterly cash dividend of \$184,225 due on May 16, 2011, and subsequent quarterly payments, on the Preferred Stock. The total arrearage on such preferred stock as of September 30, 2012 was \$1,166,758. In June 2012 as a result of the unpaid dividends, Treasury requested that an observer appointed by Treasury be allowed to attend the Company's meetings of its board of directors.

The Bank is subject to various regulatory capital requirements administered by the federal and state banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possible additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Bank's financial statements. Under the capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of the Bank's assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors. See further discussion of capital requirements under Capital Resources in Management's Discussion and Analysis of Financial Condition and Results of Operations following.

Note 11 – Commitments and contingencies

Off-balance-sheet risk – The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financial needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. These instruments involve, to varying degrees, elements of credit and interest-rate risk in excess of the amounts recognized in the financial statements. The contract amounts of these instruments reflect the extent of involvement that the Company has in particular classes of instruments.

The Company's exposure to credit loss in the event of non-performance by the other party to the financial instrument for commitments to extend credit, and to potential credit loss associated with letters of credit issued, is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for loans and other such on-balance sheet instruments.

The Company had outstanding the following approximate off-balance-sheet financial instruments whose contract amounts represent credit risk at the dates indicated:

	Se	eptember 30, 2012	D	ecember 31, 2011
Undisbursed credit lines Commitments to extend	\$	34,947,000	\$	40,661,000
or originate credit Standby letter of credit		35,834,000 2,774,000		18,214,000 3,719,000
	\$	73,555,000	\$	62,594,000

Total commitments to extend credit

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require the payment of a fee. Historically, many commitments expire without being drawn upon; therefore, the total commitment amounts shown in the above table are not necessarily indicative of future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, as deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the customer. Collateral held varies but may include personal or income-producing commercial real estate, accounts receivable, inventory and equipment.

Concentrations of credit risk – All of the Company's loans, commitments to extend credit, and standby letters of credit have been granted to customers in the Company's market area. Although the Company is building a diversified loan portfolio, a substantial portion of its clients' ability to honor contracts is reliant upon the economic stability of the Richmond, Virginia area, including the real estate markets in the area. The concentrations of credit by type of loan are set forth in Note 5. The distribution of commitments to extend credit approximates the distribution of loans outstanding.

Consent Order – In February 2012, the Bank entered into a Stipulation and Consent to the Issuance of a Consent Order ("Consent Agreement") with the Federal Deposit Insurance Corporation and the Virginia Bureau of Financial Institutions (the "Supervisory Authorities"), and the Supervisory Authorities have issued the related Consent Order (the "Order") effective February 3, 2012. The description of the Consent Agreement and the Order is set forth below:

Management. The Order required that the Bank have and retain qualified management, including at a minimum a chief executive officer, senior lending officer and chief operating officer, with qualifications and experience commensurate with their assigned duties and responsibilities within 90 days from the effective date of the order. Within 30 days of the effective date of the Order, the Bank was required to retain a bank consultant to develop a written analysis and assessment of the Bank's management and staffing needs for the purpose of providing qualified management for the Bank. Within 30 days from receipt of the consultant's management report, the Bank must formulate a written management plan that incorporates the findings of the management report, a plan of action in response to each recommendation contained in the management report, and a timeframe for completing each action.

Capital Requirements. Within 90 days from the effective date of the Order and during the life of the Order, the Bank must have Tier 1 capital equal to or greater than 8 percent of its total assets, and total risk-based capital equal to or greater than 11 percent of the Bank's total risk-weighted assets. Within 90 days from the effective date of the Order, the Bank was required to submit a written capital plan to the Supervisory Authorities. The capital plan must include a contingency plan in the event that the Bank fails to maintain the minimum capital ratios required in the Order, submit a capital plan that is acceptable to the Supervisory Authorities, or implement or adhere to the capital plan.

Charge-offs. The Order requires the Bank to eliminate from its books, by charge-off or collection, all assets or portions of assets classified "Loss" and 50 percent of those classified "Doubtful". If an asset is classified "Doubtful", the Bank may, in the alternative, charge off the amount that is considered uncollectible in accordance with the Bank's written analysis of loan or lease impairment. The Order also prevents the Bank from extending, directly or indirectly, any additional credit to, or for the benefit of, any borrower who has a loan or other extension of credit from the Bank that has been charged off or classified, on whole or in part, "loss" or "doubtful" and is uncollected. The Bank may not extend, directly or indirectly, any additional credit to any borrower who has a loan or other extension of credit from the Bank that has been classified "substandard." These limitations do not apply if the Bank's failure to extend further credit to a particular borrower would be detrimental to the best interests of the Bank.

Asset Growth. While the Order is in effect, the Bank must notify the Supervisory Authorities at least 60 days prior to undertaking asset growth that exceeds 10% or more per year or initiating material changes in asset or liability composition. The Bank's asset growth cannot result in noncompliance with the capital maintenance provisions of the Order unless the Bank receives prior written approval from the Supervisory Authorities.

Restriction on Dividends and Other Payments. While the Order is in effect, the Bank cannot declare or pay dividends, pay bonuses, or pay any form of payment outside the ordinary course of business resulting in a reduction of capital without the prior written approval of the Supervisory Authorities. In addition, the Bank cannot make any distributions of interest, principal, or other sums on subordinated debentures without prior written approval of the Supervisory Authorities.

Brokered Deposits. The Order provides that the Bank may not accept, renew, or roll over any brokered deposits unless it is in compliance with the requirements of the FDIC regulations governing brokered deposits. These regulations prohibit undercapitalized institutions from accepting, renewing, or rolling over any brokered deposits and also prohibit undercapitalized institutions from soliciting deposits by offering an effective yield that exceeds by more than 75 basis points the prevailing effective yields on insured deposits of comparable maturity in the institution's market area. An "adequately capitalized" institution may not accept, renew, or roll over brokered deposits unless it has applied for and been granted a waiver by the FDIC.

Written Plans and Other Material Terms. Under the terms of the Order, the Bank is required to prepare and submit the following written plans or reports to the FDIC and the Commissioner:

- \cdot Plan to improve liquidity, contingency funding, interest rate risk, and asset liability management
- · Plan to reduce assets of \$250,000 or greater classified "doubtful" and "substandard"
- \cdot Revised lending and collection policy to provide effective guidance and control over the Bank's lending and credit administration functions
- · Effective internal loan review and grading system
- · Policy for managing the Bank's other real estate
- · Business/strategic plan covering the overall operation of the Bank
- \cdot Plan and comprehensive budget for all categories of income and expense for the year 2012
- · Policy and procedures for managing interest rate risk
- · Assessment of the Bank's information technology function

Under the Order, the Bank's board of directors has agreed to increase its participation in the affairs of the Bank, including assuming full responsibility for the approval of policies and objectives for the supervision of all of the Bank's activities. The Bank must also establish a board committee to monitor and coordinate compliance with the Order.

The Order will remain in effect until modified or terminated by the Supervisory Authorities.

While subject to the Consent Order, we expect that our management and board of directors will be required to focus considerable time and attention on taking corrective actions to comply with the terms. In addition, certain provisions of the Consent Order described above could adversely impact the Company's businesses and results of operations.

Written Agreement – In June 2012, the Company entered into a written agreement ("Written Agreement") with the Federal Reserve Bank of Richmond ("Reserve Bank"). Under the terms of the Written Agreement, the Company agreed to develop and submit to the Reserve Bank for approval within the time periods specified therein written plans to maintain sufficient capital and correct any violations of section 23A of the Federal Reserve Act and Regulation W. In addition, the Company will submit a written statement of its planned sources and uses of cash for debt service, operation expenses, and other purposes.

The Company also has agreed that it will not, without prior regulatory approval:

- pay or declare any dividends;
- take any other form of payment representing a reduction in Bank's capital;
- make any distributions of interest, principal or other sums on subordinated debentures or trust preferred securities;
 - incur, increase or guarantee any debt;
 - purchase or deem any shares of its stock.

Since entering into the Order and the Written Agreement, the Company has taken the following steps, among other things, to comply with their terms:

- The board of directors has established two committees that meet at least monthly. The Regulatory Oversight Committee to monitor and coordinate compliance with the Order and the Written Agreement and any other related regulatory matters that may arise, and the Asset Quality Committee to oversee management's progress in reducing the Bank's classified assets.
- The board of directors retained a bank consultant that developed a written analysis and assessment of the Bank's management and staffing needs for the purpose of providing qualified management for the Bank. Based on the results of this written analysis and assessment, the Bank formulated a written management plan that incorporates the findings of the management report, a plan of action in response to each recommendation contained in the management report, and a timeframe for completing each action which was submitted to the Supervisory Authorities.
- We have established a Problem Assets Group headed by a newly hired member of senior management with extensive experience with problem loan workouts which has developed a plan to reduce our nonperforming assets. This group has also established a plan to manage foreclosed real estate.
- We have revised our lending and collection policy to provide effective guidance and control over the Bank's lending and credit administration functions. This policy was also revised to provide for an effective internal loan review and grading system.
- We have prepared a comprehensive budget and strategic plan covering the overall operation of the Bank which has been submitted to the Supervisory Authorities.
- Prepared and submitted a plan to correct any violations of section 23A of the Federal Reserve Act and Regulation W to the Reserve Bank.

In June 2012 the Treasury asked to allow an observer at the Company's meetings of its board of directors. The observer started attending board meetings in August 2012. The Treasury has the contractual right to nominate up to two members to the board of directors upon the Company's sixth missed dividend payment. The Company has deferred six dividend payments as of September 30, 2012. However, Treasury has not indicated that it will nominate two directors to the board of directors.

Note 12 – Income Taxes

The net deferred tax asset is included in other assets on the balance sheet. Accounting Standards Codification Topic 740, Income Taxes, requires that companies assess whether a valuation allowance should be established against their deferred tax assets based on the consideration of all available evidence using a "more likely than not" standard. Management considers both positive and negative evidence and analyzes changes in near-term market conditions as well as other factors which may impact future operating results. In making such judgments, significant weight is given to evidence that can be objectively verified. The deferred tax assets are analyzed quarterly for changes affecting realization. Management determined that as of September 30, 2012, the objective negative evidence represented by the Company's recent losses outweighed the more subjective positive evidence and, as a result, recognized a valuation allowance for all of the net deferred tax asset of approximately \$10,513,000.

Note 13 – Recent accounting pronouncements

In May 2011, the FASB issued ASU No. 2011-04, "Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs." The Company adopted ASU 2011-04, which generally aligns the principles of fair value measurements with International Financial Reporting Standards (IFRSs), in its consolidated financial statements in the first quarter 2012. The provisions of ASU 2011-04 clarify the application of existing fair value measurement requirements, and expand the disclosure requirements for fair value measurements. The increased provisions of ASU 2011-04 did not have a material effect on the Company's financial condition and results of operations.

In June 2011, The FASB issued ASU No. 2011-05, Presentation of Comprehensive Income, Topic 220. This ASU eliminates the option of presenting the components of other comprehensive income (OCI) as part of the statement of changes in stockholders' equity. The ASU instead permits an entity to present the total of comprehensive income, the components of net income, and the components of OCI either in a single continuous statement of comprehensive income or in two separate but consecutive statements. With either format, the entity is required to present each component of net income along with total net income, each component of OCI along with the total for OCI, and a total amount for comprehensive income. Also, the ASU requires entities to present, for either format, reclassification adjustments for items that are reclassified from OCI to net income in the statement(s) where the components of net income and the components of OCI are presented. This ASU is to be applied retrospectively. The Company adopted ASU-2011-05 in the first quarter of 2012. The provisions of ASU 22011-05 did not have a material effect on the Company's financial condition and results of operations.

ITEM 2 - MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Caution about forward-looking statements

In addition to historical information, this report may contain forward-looking statements. For this purpose, any statement, that is not a statement of historical fact may be deemed to be a forward-looking statement. These forward-looking statements may include statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy and financial and other goals. Forward-looking statements often use words such as "believes," "expects," "plans," "may," "will," "should," "projects," "contemplates," "anticipates," "forecas other words of similar meaning. You can also identify them by the fact that they do not relate strictly to historical or current facts. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, and actual results could differ materially from historical results or those anticipated by such statements.

There are many factors that could have a material adverse effect on the operations and future prospects of the Company including, but not limited to:

- the inability of the Bank to comply with the requirements of agreements with its regulators;
- the inability to reduce nonperforming assets consisting of nonaccrual loans and foreclosed real estate;
 - our inability to improve our regulatory capital position;
- the risks of changes in interest rates on levels, composition and costs of deposits, loan demand, and the values and liquidity of loan collateral, securities, and interest sensitive assets and liabilities;
 - changes in assumptions underlying the establishment of allowances for loan losses, and other estimates;
- changes in market conditions, specifically declines in the residential and commercial real estate market, volatility and disruption of the capital and credit markets, soundness of other financial institutions we do business with;
 - risks inherent in making loans such as repayment risks and fluctuating collateral values;
- changes in operations of Village Bank Mortgage Corporation as a result of the activity in the residential real estate market;
- legislative and regulatory changes, including the Dodd-Frank Act Wall Street Reform and Consumer Protection Act and other changes in banking, securities, and tax laws and regulations and their application by our regulators, and changes in scope and cost of FDIC insurance and other coverages;
- exposure to repurchase loans sold to investors for which borrowers failed to provide full and accurate information on or related to their loan application or for which appraisals have not been acceptable or when the loan was not underwritten in accordance with the loan program specified by the loan investor;
 - the effects of future economic, business and market conditions;
 - governmental monetary and fiscal policies;
 - changes in accounting policies, rules and practices;
 - maintaining capital levels adequate to remain well capitalized;
 - reliance on our management team, including our ability to attract and retain key personnel;
 - competition with other banks and financial institutions, and companies outside of the banking industry, including those companies that have substantially greater access to capital and other resources;
 - demand, development and acceptance of new products and services;
 - problems with technology utilized by us;
 - changing trends in customer profiles and behavior; and
 - other factors described from time to time in our reports filed with the SEC.

Table of Contents

These risks and uncertainties should be considered in evaluating the forward-looking statements contained herein, and readers are cautioned not to place undue reliance on such statements. Any forward-looking statement speaks only as of the date on which it is made, and the Company undertakes no obligation to update any forward-looking statement to reflect events or circumstances after the date on which it is made. In addition, past results of operations are not necessarily indicative of future results.

General

The Company's primary source of earnings is net interest income, and its principal market risk exposure is interest rate risk. The Company is not able to predict market interest rate fluctuations and its asset/liability management strategy may not prevent interest rate changes from having a material adverse effect on the Company's results of operations and financial condition.

Although we endeavor to minimize the credit risk inherent in the Company's loan portfolio, we must necessarily make various assumptions and judgments about the collectability of the loan portfolio based on our experience and evaluation of economic conditions. If such assumptions or judgments prove to be incorrect, the current allowance for loan losses may not be sufficient to cover loan losses and additions to the allowance may be necessary, which would have a negative impact on net income. Over the last three years, the Company has recorded record provisions for loan losses due primarily to deteriorating quality of loans collateralized by real estate located in its principal market area.

There is intense competition in all areas in which the Company conducts its business. The Company competes with banks and other financial institutions, including savings and loan associations, savings banks, finance companies, and credit unions. Many of these competitors have substantially greater resources and lending limits and provide a wider array of banking services. To a limited extent, the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, consumer finance companies and insurance companies. Competition is based on a number of factors, including prices, interest rates, services, availability of products and geographic location.

Given current economic uncertainty as well as stress on our capital ratios resulting from operating losses, the Company has adopted a balance sheet reduction plan that focuses on the reduction of nonperforming assets and higher risk-weighted assets that will help increase capital ratios in three ways. First, the lower overall asset size affords the Company's capital reserves to support a smaller balance sheet. Second, the reduced risk profile of the Company's ensuing loan portfolio requires less capital support during times of economic stress. Third, a reduced infrastructure reduces general and administrative expenses, which in turn reduces the need for additional capital.

In light of the asset growth restriction in the Consent Order and the Company's current weakened financial position, the Company does not anticipate undertaking growth via acquisition or de novo branching during the foreseeable future.

The Company's short-term objective is to continue decreasing its balance sheet by loan and deposit attrition.

Results of operations

The following represents management's discussion and analysis of the financial condition of the Company at September 30, 2012 and December 31, 2011 and the results of operations for the Company for the three and nine months ended September 30, 2012 and 2011. This discussion should be read in conjunction with the Company's condensed consolidated financial statements and the notes thereto appearing elsewhere in this Quarterly Report.

Statement of Operations Analysis

Summary

For the three months ended September 30, 2012, the Company had a net loss of \$(367,000) and net loss available to common shareholders of \$(588,000), or \$(0.14) per fully diluted share, compared to a net loss of \$(5,245,000) and a net loss available to common shareholders of \$(5,467,000), or \$(1.29) per fully diluted share, for the same period in 2011. For the nine months ended September 30, 2012, the Company had a net loss totaling \$(11,504,000) and a net loss available to common shareholders of \$(12,131,000), or \$(2.85) per fully diluted share, compared to a net loss of \$(4,905,000) and a net loss available to common shareholders of \$(5,566,000), or \$(1.31) per share on a fully diluted share, for the same period in 2011.

The components of the changes in net income before payment of dividends are presented following:

	Three Months		Ni	ne Months	
		Ended		Ended	
	Se	ptember 30,	September 30,		
	•	2012	•	2012	
Decrease in net interest					
income	\$	(748,000)	\$	(1,950,000)	
Decrease in provision for					
loan losses		8,808,000		2,316,000	
Increase in noninterest					
income		1,431,000		2,805,000	
Increase in noninterest					
expense		(1,781,000)		(3,296,000)	
Increase in tax expense		(2,832,000)		(6,474,000)	
	\$	4,878,000	\$	(6,599,000)	

Our profitability continues to be negatively affected by the continued stress on our borrowers and real estate values from the recessionary economy. As a result, asset quality continues to be a concern and management is devoting substantial resources to problem asset resolution. While the provision for loan losses decreased in 2012 from 2011 levels, it remains significant at \$9,095,000 for the nine months ended September 30, 2012. Additionally, expenses related to foreclosed property, which are included in noninterest expense, increased significantly from \$1,211,878 in 2011 to \$3,520,971 in 2012. The provision for loan losses is discussed further under Asset quality and Provision for loan losses.

The decline in our net interest income is attributable to our plan to reduce our balance sheet and nonaccrual loans. Changes in our net interest income are more fully discussed under Net interest income.

Our mortgage company's pretax profit increased in the first nine months of 2012 compared to the same period of 2011 by \$1,074,000 due to the mortgage company closing \$224,722,000 in mortgage loans for the first three quarters of 2012 compared to \$164,680,000 for the same period in 2011.

Net interest income

Net interest income, which represents the difference between interest earned on interest-earning assets and interest incurred on interest-bearing liabilities, is the Company's primary source of earnings. Net interest income can be affected by changes in market interest rates as well as the level and composition of assets, liabilities and shareholder's equity. Net interest spread is the difference between the average rate earned on interest-earning assets and the average rate paid on interest-bearing liabilities. The net yield on interest-earning assets ("net interest margin") is calculated by dividing tax equivalent net interest income by average interest-earning assets. Generally, the net interest margin

Table of Contents

will exceed the net interest spread because a portion of interest earning assets are funded by various noninterest-bearing sources, principally noninterest-bearing deposits and shareholders' equity.

Net interest income for the third quarter of \$4,216,000 represents a decrease of \$(748,000), or 15%, compared to the third quarter of 2011, and a decrease of \$(135,000), or 3%, compared to the second quarter of 2012. Comparing the first nine months of 2012 to the same period in 2011, there was a decline in net interest income of \$(1,950,000), or 13%. The continued decline in our net interest income is a result of our asset reduction plan and loans placed on nonaccrual status.

Compared to the third quarter of 2011, average interest-earning assets for the third quarter of 2012 decreased by \$89,937,000, or 17%. This decrease in average interest-earning assets was due to decreases in average portfolio loans of \$55,131,000, average investment securities of \$24,135,000 and average federal funds sold of \$16,778,000, offset by an increase in average loans held for sale of \$6,107,000. Comparing average interest-earning assets for the nine months ended September 30, 2012 to the same period in 2011, there was a decline of \$64,676,000, or 12%. This decrease in average interest-earning assets was due to decreases in average portfolio loans of \$39,497,000, average investment securities of \$21,155,000 and average federal funds sold of \$9,723,000, offset by an increase in average loans held for sale of \$5,698,000. The primary reasons for the decline in our portfolio loans that are interest-earning were our strategic plan to reduce our balance sheet, loan charge-offs, and loans placed on nonaccrual status. The declines in investment securities and federal funds sold were part of our asset reduction plan. In addition to the decline in interest-earning assets, the average yield on interest-earning assets decreased to 4.97% for the third quarter of 2012 from 5.09% for the third quarter of 2011, and to 4.92% for the nine months of 2012 from 5.29% for the same period in 2011. These declines resulted in a decline in interest income from the third quarter of 2011 to the third quarter of 2012 of \$1,296,000, or 19%, and \$3,885,000, or 18%, for the comparative nine month periods.

Average interest-bearing liabilities for the third quarter of 2012 decreased by \$75,921,000, or 15%, compared to the third quarter of 2011, and by \$64,532,000, or 13%, for the comparative nine month periods. The decrease in interest-bearing liabilities was due primarily to declines in average deposits of \$64,894,000 and 59,791,000, respectively. The decrease in deposits was consistent with our balance sheet reduction plan as we repriced maturing time deposits at rates below market for noncore depositors. The average cost of interest-bearing liabilities for the three months ended September 30, 2012 decreased to 1.36% from 1.59% for the same period in 2011, and to 1.40% from 1.73% the comparative nine month periods. The principal reason for the decrease in liability costs was the maintenance of short-term interest rates by the Federal Reserve. The continuing low interest rates have allowed us to reduce our cost of funds as certificates of deposit and borrowings mature. See our discussion of interest rate sensitivity below for more information.

The Company's net interest margin is not a measurement under accounting principles generally accepted in the United States, but it is a common measure used by the financial services industry to determine how profitably earning assets are funded. Our net interest margin over the last several quarters is provided in the following table:

Quarter	Net
Ended	Interest
	Margin
September	3.63%
30, 2011	
December	3.38%
31, 2011	
March 31,	3.53%
2012	
June 30,	3.65%
2012	
September	3.70%
30, 2012	

The net interest margin declined during the fourth quarter of 2011 primarily as a result of increasing nonaccrual loans. Additionally our margin was compressed as our deposits generally do not reprice as quickly as our loans. The improvement in net interest margin during 2012 is a result of utilizing lower interest-earning assets, primarily federal funds sold, to fund a decrease in average interest-bearing liabilities of \$57,123,000, from \$480,888,000 for the fourth quarter of 2011 to \$423,765,000 for the third quarter of 2012. As a result, higher yielding average loans represented 89% of total average interest-bearing assets for the third quarter of 2012 as compared to 80% for the fourth quarter of 2011. However, given the continued depressed economy and the potential impact on interest income from new nonaccrual loans, no assurance can be provided that increases in the net interest margin will continue to occur.

The following tables illustrates average balances of total interest-earning assets and total interest-bearing liabilities for the periods indicated, showing the average distribution of assets, liabilities, shareholders' equity and related income, expense and corresponding weighted-average yields and rates. The average balances used in these tables and other statistical data were calculated using daily average balances. We had no tax exempt assets for the periods presented.
