	Forward-Looking Statements	

This Quarterly Report on Form 10-Q, including "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 2 of Part I of this report, contains forward-looking statements that involve risks, uncertainties and assumptions. If the risks or uncertainties ever materialize or the assumptions prove incorrect, the results of Hewlett-Packard Company and its consolidated subsidiaries ("HP") may differ materially from those expressed or implied by such forward-looking statements and assumptions. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including but not limited to any projections of revenue, margins, expenses, tax provisions, earnings, cash flows, benefit obligations, share repurchases, acquisition synergies, currency exchange rates or other financial items; any statements of the plans, strategies and objectives of management for future operations, including the execution of cost reduction programs and restructuring plans; any statements concerning expected development, performance or market share relating to products or services; any statements regarding future economic conditions or performance; any statements regarding pending investigations, claims or disputes; any statements of expectation or belief; and any statements of assumptions underlying any of the foregoing. Risks, uncertainties and assumptions include macroeconomic and geopolitical trends and events; the execution and performance of contracts by HP and its customers, suppliers and partners; the challenge of managing asset levels, including inventory; the difficulty of aligning expense levels with revenue changes; assumptions related to pension and other post-retirement costs; expectations and assumptions relating to the execution and timing of cost reduction programs and restructuring plans; the resolution of pending investigations, claims and disputes; and other risks that are described herein, including but not limited to the items discussed in "Factors that Could Affect Future Results" set forth in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Item 2 of Part I of this report, and that are otherwise described from time to time in HP's Securities and Exchange Commission reports, including HP's Annual Report on Form 10-K for the fiscal year ended October 31, 2009. HP assumes no obligation and does not intend to update these forward-looking statements.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements

(Unaudited)

Note 1: Basis of Presentation and Significant Accounting Policies

In the opinion of management, the accompanying Consolidated Condensed Financial Statements of Hewlett-Packard Company and its consolidated subsidiaries ("HP") contain all adjustments, including normal recurring adjustments, necessary to present fairly HP's financial position as of January 31, 2010, its results of operations and cash flows for the three months ended January 31, 2010 and January 31, 2009. The Consolidated Condensed Balance Sheet as of October 31, 2009 is derived from the October 31, 2009 audited consolidated financial statements. Certain reclassifications have been made to prior-period amounts in order to conform to the current period presentation.

The results of operations for the three months ended January 31, 2010 are not necessarily indicative of the results to be expected for the full year. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with "Risk Factors," "Legal Proceedings," "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Quantitative and Qualitative Disclosures About Market Risk" and the Consolidated Financial Statements and notes thereto included in Items 1A, 3, 7, 7A and 8, respectively, of the Hewlett-Packard Company Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

The preparation of financial statements in accordance with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the amounts reported in HP's Consolidated Condensed Financial Statements and accompanying notes. Actual results could differ materially from those estimates.

Accounting Pronouncements

The following disclosure on accounting pronouncements includes those that may apply to the historical financial statements.

In December 2007, the Financial Accounting Standards Board ("FASB") issued a new accounting standard related to noncontrolling interests. The standard establishes accounting and reporting standards for ownership interests in subsidiaries held by parties other than the parent, the amount of consolidated net income attributable to the parent and to the noncontrolling interests, changes in a parent's ownership interest, and the valuation of retained noncontrolling equity investments when a subsidiary is deconsolidated. The standard also establishes disclosure requirements that clearly identify and distinguish between the interests of the parent and the interests of the noncontrolling owners. In January 2010, the FASB issued Accounting Standards Update No. 2010-02, "Consolidation: Accounting and Reporting for Decreases in Ownership of a Subsidiary - a Scope Clarification." This update clarifies the scope of the decrease in ownership provisions and also requires expanded disclosures. HP adopted these standards in the first quarter of fiscal 2010 with retrospective application of the presentation and disclosure requirements. Noncontrolling interests of \$247 million at October 31, 2009 were reclassified from Other liabilities to Stockholders' equity in the Consolidated Condensed Balance Sheet as of October 31, 2009. Income attributable to noncontrolling interests was immaterial for the three months ended January 31, 2010 and January 31, 2009.

In June 2008, the FASB issued a new accounting standard that clarifies when instruments granted in share-based payment transactions should be included in computing earnings per share ("EPS"). Under the new standard, companies are required to include unvested share-based payment awards that contain non-forfeitable rights to receive dividends in their calculation of basic EPS and are required to

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 1: Basis of Presentation and Significant Accounting Policies (Continued)

calculate basic EPS using the "two-class method." The two-class method of computing EPS is an earnings allocation formula that determines EPS for each class of common stock and participating securities according to dividends declared (or accumulated) and participation rights in undistributed earnings. HP adopted this new accounting standard on a retrospective basis in the first quarter of fiscal 2010, and the adoption did not have a material impact on EPS.

In June 2009, the FASB issued a new accounting standard related to the consolidation of variable interest entities. It eliminates the quantitative approach previously required for determining the primary beneficiary of a variable interest entity and requires ongoing qualitative reassessments of whether an enterprise is the primary beneficiary of a variable interest entity. This new standard also requires additional disclosures about an enterprise's involvement in variable interest entities. HP will adopt this new accounting standard in the first quarter of fiscal 2011. HP is continuing to evaluate the impact the adoption of this standard will have on its consolidated condensed financial statements.

Note 2: Stock-Based Compensation

HP's stock-based compensation plans include incentive compensation plans and an employee stock purchase plan. Incentive compensation plans include principal option plans as well as various stock option plans assumed through acquisitions. Principal option plans include performance-based restricted units ("PRU"), stock options and restricted stock awards.

Total stock-based compensation expense before income taxes for the three months ended January 31, 2010 and 2009 was \$181 million and \$160 million, respectively. The resulting income tax benefit for the three months ended January 31, 2010 and 2009 was \$58 million and \$48 million, respectively.

Performance-based Restricted Units

In fiscal 2008, HP implemented a program that provides for the issuance of PRUs representing hypothetical shares of HP common stock that may be issued under the Hewlett-Packard Company 2004 Stock Incentive Plan.

Under the PRU program, a target number of units are awarded at the beginning of each three-year performance period. The number of shares released at the end of the performance period will range from zero to two times the target number depending on performance during the period. The performance metrics of the PRU program are (a) annual targets based on cash flow from operations as a percentage of revenue, and (b) an overall "modifier" based on Total Shareholder Return ("TSR") relative to the S&P 500 over the three-year performance period. TSR is calculated using the quarterly average performance of the S&P 500 during the three-year performance period.

As the cash flow goals are considered performance conditions, the expense for these awards, net of estimated forfeitures, is recorded over the three-year performance period based on the number of shares that are expected to be earned based on the achievement of the cash flow goals during the performance period.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 2: Stock-Based Compensation (Continued)

HP estimates the fair value of a target PRU share using the Monte Carlo simulation model, as the TSR modifier contains a market condition. The following weighted-average assumptions were used to determine the weighted-average fair values of the PRU awards:

	Three months ended January 31	
	2010	2009
Weighted-average fair value of grants per share	\$ 57.13 ⁽¹⁾	\$ 40.56 ⁽²⁾
Expected volatility ⁽³⁾	38%	35%
Risk-free interest rate	0.73%	1.34%
Dividend yield	0.64%	0.88%
Expected life in months	22	30

- (1) Reflects the weighted-average fair value for the third year of the three-year performance period applicable to PRUs granted in fiscal 2008, for the second year of the three-year performance period applicable to PRUs granted in fiscal 2009 and for the first year of the three-year performance period applicable to PRUs granted in the three months ended January 31, 2010. The estimated fair value of a target share for the third year for PRUs granted in fiscal 2009 and for the second and third years for PRUs granted in the three months ended January 31, 2010 will be determined on the measurement date applicable to those PRUs, which will be the date that the annual cash flow goals are approved for those PRUs, and the expense will be amortized over the remainder of the applicable three-year performance period.
- (2) Reflects the weighted-average fair value for the second year of the three-year performance period applicable to PRUs granted in fiscal 2008 and for the first year of the three-year performance period applicable to PRUs granted in the three months ended January 31, 2009.
- (3) HP uses historic volatility for PRU awards as implied volatility cannot be used when simulating multivariate prices for companies in the S&P 500.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 2: Stock-Based Compensation (Continued)

Outstanding PRUs as of January 31, 2010 and changes during the three months ended January 31, 2010 were as follows:

	Shares (in thousands)
Outstanding at October 31, 2009	24,723
Granted	7,278
Vested	
Change in units due to performance and market conditions	(1,313)
Forfeited	(438)
Outstanding at January 31, 2010	30,250
Outstanding PRUs assigned a fair value at January 31, 2010	21,198 ⁽¹⁾

(1)

Excludes target shares for the third year for PRUs granted in fiscal 2009 and for the second and third years for PRUs granted in the three months ended January 31, 2010 as the measurement date has not yet been established. The measurement date and related fair value for the excluded PRUs will be established when the annual cash flow goals are approved.

At January 31, 2010, there was \$608 million of unrecognized pre-tax stock-based compensation expense related to PRUs with an assigned fair value, which HP expects to recognize over the remaining weighted-average vesting period of 1.6 years.

Stock Options

HP estimated the weighted-average fair value of stock options using the Black-Scholes option pricing model with the following weighted-average assumptions:

	Three months ended January 31	
	2010	2009
Weighted-average fair value of grants per share	\$ 14.42	\$ 14.22
Implied volatility	30%	51%
Risk-free interest rate	2.34%	1.79%
Dividend yield	0.64%	0.95%
Expected life in months	62	60

9

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 2: Stock-Based Compensation (Continued)

Option activity as of January 31, 2010 and changes during the three months ended January 31, 2010 were as follows:

	Shares (in thousands)	Weighted- Average Exercise Price Per Share	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in millions)
Outstanding at October 31, 2009	233,214	\$ 33		
Granted	189	\$ 50		
Exercised	(35,621)	\$ 35		
Forfeited/cancelled/expired	(1,713)	\$ 47		
Outstanding at January 31, 2010	196,069	\$ 33	2.6	\$ 3,130
Vested and expected to vest at January 31, 2010	195,063	\$ 32	2.5	\$ 3,124
Exercisable at January 31, 2010	185,288	\$ 32	2.3	\$ 3,065

The aggregate intrinsic value in the table above represents the total pre-tax intrinsic value that option holders would have received had all option holders exercised their options on January 31, 2010. The aggregate intrinsic value is the difference between HP's closing stock price on the last trading day of the first quarter of fiscal 2010 and the exercise price, multiplied by the number of in-the-money options. Total intrinsic value of options exercised for the three months ended January 31, 2010 was \$548 million.

At January 31, 2010, there was \$136 million of unrecognized pre-tax stock-based compensation expense related to stock options, which HP expects to recognize over the remaining weighted-average vesting period of 1.5 years.

Restricted Stock Awards

Non-vested restricted stock awards as of January 31, 2010 and changes during the three months ended January 31, 2010 were as follows:

	Shares (in thousands)	Weighted- Average Grant Date Fair Value Per Share
Outstanding at October 31, 2009	6,864	\$ 44
Granted	686	\$ 50
Vested	(410)	\$ 41
Forfeited	(319)	\$ 43
Outstanding at January 31, 2010	6,821	\$ 45

At January 31, 2010, there was \$116 million of unrecognized pre-tax stock-based compensation expense related to non-vested restricted stock awards, which HP expects to recognize over the remaining weighted-average vesting period of 1.3 years.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 3: Net Earnings Per Share

HP calculates basic earnings per share using net earnings and the weighted-average number of shares outstanding during the reporting period. Diluted EPS includes any dilutive effect of outstanding stock options, PRUs, restricted stock units, and restricted stock.

The reconciliation of the numerators and denominators of the basic and diluted EPS calculations was as follows:

	Three months ended January 31	
	2010	2009
	In millions, except per share amounts	
Numerator:		
Net earnings ⁽¹⁾	\$ 2,250	\$ 1,856
Denominator:		
Weighted-average shares used to compute basic EPS	2,358	2,410
Dilutive effect of employee stock plans	69	54
Weighted-average shares used to compute diluted EPS	2,427	2,464
Net earnings per share:		
Basic	\$ 0.95	\$ 0.77
Diluted	\$ 0.93	\$ 0.75

(1) Net earnings available to participating securities were not significant for the first quarter of fiscal 2010 and 2009. HP considers restricted stock that provides the holder with a non-forfeitable right to receive dividends to be a participating security.

HP excludes options with exercise prices that are greater than the average market price from the calculation of diluted EPS because their effect would be anti-dilutive. In the first quarter of fiscal 2010 and 2009, HP excluded from the calculation of diluted EPS options to purchase 21 million shares and 107 million shares, respectively. HP also excluded from the calculation of diluted EPS options to purchase an additional 2 million shares and 1 million shares in the first quarter of fiscal 2010 and 2009, respectively, whose combined exercise price, unamortized fair value and excess tax benefits were greater in each of those periods than the average market price for HP's common stock because their effect would be anti-dilutive.

During the first quarter of fiscal 2010 and 2009, HP granted PRU awards representing at target approximately 7 million shares and 14 million shares, respectively. HP includes the shares underlying PRU awards in the calculation of diluted EPS when they become contingently issuable and excludes such shares when they are not contingently issuable. Accordingly, for the first quarter of fiscal 2010, HP has included 9 million shares underlying the PRU awards granted in fiscal 2009 and 2008 when calculating diluted EPS as those shares became contingently issuable upon the satisfaction of the cash flow from operations condition with respect to the first year of the three-year performance period applicable to the fiscal 2009 awards and the first and second years of the three-year performance period applicable to the fiscal 2008 awards. HP has excluded all other shares underlying the fiscal 2009 and 2008 PRU awards and all shares underlying the fiscal 2010 awards when calculating diluted EPS as those shares are not contingently issuable. For the first quarter of fiscal 2009, HP has included

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 3: Net Earnings Per Share (Continued)

2 million shares underlying the PRU awards granted in fiscal 2008 when calculating diluted EPS as those shares became contingently issuable upon the satisfaction of the cash flow from operations condition with respect to the first year of the three-year performance period applicable to the fiscal 2008 awards. HP has excluded all other shares underlying the fiscal 2008 PRU awards and all shares underlying the fiscal 2009 awards when calculating diluted EPS as those shares were not contingently issuable.

Note 4: Balance Sheet Details

Balance sheet details were as follows:

Accounts and Financing Receivables

	January 31, 2010	October 31, 2009
	In millions	
Accounts receivable	\$ 15,069	\$ 17,166
Allowance for doubtful accounts	(566)	(629)
	\$ 14,503	\$ 16,537
Financing receivables	\$ 2,811	\$ 2,723
Allowance for doubtful accounts	(46)	(48)
	\$ 2,765	\$ 2,675

HP has revolving trade receivables-based facilities permitting it to sell certain trade receivables to third parties on a non-recourse basis. The aggregate maximum capacity under these programs was \$538 million as of January 31, 2010. HP sold \$506 million of trade receivables during the first three months of fiscal 2010. As of January 31, 2010, HP had \$140 million available under these programs.

Inventory

	January 31, 2010	October 31, 2009

	21,251	20,944
Accumulated depreciation	(10,087)	(9,682)
	\$ 11,164	\$ 11,262

Note 5: Acquisitions

Pending acquisition in fiscal 2010

In November 2009, HP entered into a definitive agreement to acquire 3Com Corporation ("3Com"), a global enterprise provider of networking switching, routing and security solutions, at a price of \$7.90 per share in cash or an enterprise value of approximately \$2.7 billion. The acquisition has received clearance from U.S. and European Union regulatory authorities and the approval of 3Com's stockholders. The closing of the acquisition is subject to certain closing conditions, including obtaining requisite approvals on clearances under certain antitrust or competition laws. The transaction is expected to close in HP's second fiscal quarter of 2010.

Note 6: Goodwill and Purchased Intangible Assets

Goodwill

Goodwill allocated to HP's business segments as of January 31, 2010 and changes in the carrying amount of goodwill for the three months ended January 31, 2010 are as follows:

	Enterprise Storage and Services	HP Servers Software	Personal Systems Group	Imaging and Printing Group	HP Financial Services	Corporate Investments	Total	
	In millions							
Balance at October 31, 2009	\$ 16,829	\$ 5,005	\$ 6,140	\$ 2,487	\$ 2,460	\$ 144	\$ 44	\$ 33,109
Goodwill adjustments	(30)	(6)	(1)	(3)	(1)			(41)
Balance at January 31, 2010	\$ 16,799	\$ 4,999	\$ 6,139	\$ 2,484	\$ 2,459	\$ 144	\$ 44	\$ 33,068

During the three months ended January 31, 2010, HP recorded reductions to goodwill primarily for tax adjustments related to tax deductible stock-based awards for the acquisition of Compaq Computer Corporation for which the acquisition date was before the effective date of the new guidance for business combinations. HP also recorded reductions to goodwill for currency translation related to certain of Electronic Data Systems Corporation's ("EDS") foreign subsidiaries whose functional currency is not the U.S. dollar.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 6: Goodwill and Purchased Intangible Assets (Continued)

Purchased Intangible Assets

HP's purchased intangible assets associated with completed acquisitions are composed of:

	January 31, 2010			October 31, 2009		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
<i>In millions</i>						
Customer contracts, customer lists and distribution agreements	\$ 6,761	\$ (3,230)	\$ 3,531	\$ 6,763	\$ (3,034)	\$ 3,729
Developed and core technology and patents	4,169	(2,878)	1,291	4,171	(2,747)	1,424
Product trademarks	247	(225)	22	247	(222)	25
Total amortizable purchased intangible assets	11,177	(6,333)	4,844	11,181	(6,003)	5,178
Compaq trade name	1,422		1,422	1,422		1,422
Total purchased intangible assets	\$ 12,599	\$ (6,333)	\$ 6,266	\$ 12,603	\$ (6,003)	\$ 6,600

For the three months ended January 31, 2010, adjustments made to purchased intangibles relate primarily to currency translation on certain of EDS's foreign subsidiaries whose functional currency is not the U.S. dollar.

Estimated future amortization expense related to finite lived purchased intangible assets at January 31, 2010 is as follows:

Fiscal year:	In millions
2010 (remaining nine months)	\$ 976
2011	1,052
2012	854
2013	716
2014	464
Thereafter	782
Total	\$ 4,844

Note 7: Restructuring Charges

Fiscal 2009 Restructuring Plan

In May 2009, HP's management approved and initiated a restructuring plan to structurally change and improve the effectiveness of the Imaging and Printing Group ("IPG"), the Personal Systems Group ("PSG"), and Enterprise Storage and Servers ("ESS"). The total expected cost of the plan is \$303 million in severance-related costs associated with the planned elimination of approximately 5,000 positions. As of January 31, 2010, approximately 2,800 positions have been eliminated. HP expects the majority of the restructuring costs to be paid out by the fourth quarter of fiscal 2010. In future

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 7: Restructuring Charges (Continued)

quarters, HP expects to record an additional charge of approximately \$5 million related to severance costs associated with this plan.

Fiscal 2008 HP/EDS Restructuring Plan

In connection with the acquisition of EDS on August 26, 2008, HP's management approved and initiated a restructuring plan to streamline the combined company's services business and to better align the structure and efficiency of that business with HP's operating model. The restructuring plan is expected to be implemented over four years from the acquisition date and includes changes to the combined company's workforce as well as changes to corporate overhead functions such as real estate and IT.

The total expected cost of this restructuring plan is \$3.0 billion, consisting mainly of severance costs to eliminate approximately 25,000 positions, costs to vacate duplicative facilities and costs associated with early termination of certain contractual obligations. As of January 31, 2010, over 20,000 positions have been eliminated. HP expects the majority of the restructuring costs associated with severance to be paid out by the second quarter of fiscal 2010. In future quarters, HP expects to record an additional charge of approximately \$412 million related to the cost to vacate duplicative facilities and severance costs.

Approximately \$1.5 billion of the expected costs were associated with pre-acquisition EDS and were reflected in the purchase price of EDS. These costs are subject to change based on the actual costs incurred. The remaining costs are primarily associated with HP and were recorded as a restructuring charge.

Summary of Restructuring Plans

The adjustments to the accrued restructuring expenses related to all of HP's restructuring plans described above for the three months ended January 31, 2010 were as follows:

	Three months ended		Non-cash settlements and other adjustments		As of January 31, 2010		
	Balance, October 31, 2009	January 31, 2010 charges	Cash payments	Balance, January 31, 2010	Total costs and adjustments to date	Total expected costs and adjustments	
<i>Fiscal 2009 Plan</i>	\$ 248	\$ 1	\$ (45)	\$ (6)	\$ 198	\$ 298	\$ 303
<i>Fiscal 2008 HP/EDS Plan:</i>							
Severance	\$ 747	\$ 101	\$ (330)	\$ (24)	\$ 494	\$ 2,011	\$ 2,017
Infrastructure	419	29	(20)	(7)	421	529	935
Total severance and other restructuring activities	\$ 1,166	\$ 130	\$ (350)	\$ (31)	\$ 915	\$ 2,540	\$ 2,952
Total restructuring plans	\$ 1,414	\$ 131	\$ (395)	\$ (37)	\$ 1,113	\$ 2,838	\$ 3,255

At January 31, 2010 and October 31, 2009, HP had \$44 million and \$51 million, respectively, of restructuring liabilities associated with previous restructuring actions that are complete but have cash

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 7: Restructuring Charges (Continued)

payouts anticipated to occur through 2012. For the three months ended January 31, 2010, cash payouts of \$5 million and other adjustments of \$2 million were recorded against these liabilities.

At January 31, 2010 and October 31, 2009, HP included the long-term portion of the restructuring liability of \$258 million and \$356 million, respectively, in Other liabilities, and the short-term portion in Accrued restructuring in the accompanying Consolidated Condensed Balance Sheets.

Note 8: Fair Value

HP adopted the provisions related to the fair value of nonfinancial assets and nonfinancial liabilities in the first quarter of fiscal 2010 for the following major categories of nonfinancial items from the Consolidated Condensed Balance Sheet: Property, plant and equipment, Goodwill, Purchased intangible assets, Accrued restructuring and the asset retirement obligations within Other accrued liabilities and Other liabilities. The provisions of the accounting standard related to estimating fair value and related disclosures are applied to nonfinancial assets and nonfinancial liabilities whenever they are required to be measured at fair value, such as when accounting for a business combination, when evaluating and/or determining impairment, or in accordance with certain other accounting pronouncements. For the three months ended January 31, 2010, HP did not measure any nonfinancial assets and nonfinancial liabilities at fair value on a non-recurring basis. The adoption of these provisions did not have a material impact on the consolidated condensed financial statements of HP for the first quarter of fiscal 2010.

The standard relating to fair value measurements and disclosures codifies a new framework for measuring fair value and expands related disclosures. The framework requires fair value to be determined based on the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants.

Valuation techniques used by HP are based upon observable and unobservable inputs. Observable or market inputs reflect market data obtained from independent sources, while unobservable inputs reflect HP's assumptions about market participant assumptions based on best information available. Observable inputs are the preferred source of values. These two types of inputs create the following fair value hierarchy:

Level 1 Quoted prices (unadjusted) for identical instruments in active markets.

Level 2 Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Prices or valuations that require management inputs that are both significant to the fair value measurement and unobservable.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 8: Fair Value (Continued)

The following section describes the valuation methodologies HP uses to measure its financial assets and liabilities at fair value.

Cash Equivalents and Investments: HP holds time deposits, money market funds, commercial paper, other debt securities primarily consisting of corporate and foreign government notes and bonds, and common stock and equivalents. In general, and where applicable, HP uses quoted prices in active markets for identical assets to determine fair value. If quoted prices in active markets for identical assets are not available to determine fair value, HP uses quoted prices for similar assets and liabilities or inputs that are observable either directly or indirectly. If quoted prices for identical or similar assets are not available, HP uses internally developed valuation models, whose inputs include bid prices, and third party valuations utilizing underlying assets assumptions.

Derivative Instruments: As discussed in Note 9, HP mainly holds non-speculative forwards, swaps and options to hedge certain foreign currency and interest rate exposures. When active market quotes are not available, HP uses industry standard valuation models. Where applicable, these models project future cash flows and discount the future amounts to a present value using market-based observable inputs including interest rate curves, credit risk, foreign exchange rates, and forward and spot prices for currencies. In certain cases, market-based observable inputs are not available and, in those cases, HP uses management judgment to develop assumptions which are used to determine fair value.

The following table presents HP's assets and liabilities that are measured at fair value on a recurring basis:

	As of January 31, 2010				As of October 31, 2009				
	Fair Value Measured Using			Total Balance	Fair Value Measured Using			Total Balance	
	Level 1	Level 2	Level 3		Level 1	Level 2	Level 3		
In millions

The following table presents the changes in Level 3 instruments for the three months ended January 31, 2010 that are measured at fair value on a recurring basis. The majority of the Level 3

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 8: Fair Value (Continued)

balances consist of investment securities classified as available-for-sale with changes in fair value recorded in other comprehensive income ("OCI").

Three months ended January 31, 2010	Fair Value Measured Using Significant Unobservable Inputs (Level 3)		Total
	Other Debt Securities	Derivative Instruments	
	In millions		
Beginning balance at November 1, 2009	\$ 36	\$	\$ 36
Total losses (realized/unrealized):			
Included in earnings ⁽¹⁾	(1)		(1)
Included in OCI		(5)	(5)
Purchases, issuances, and settlements		2	2
Ending balance at January 31, 2010	\$ 35	\$ (3)	\$ 32
The amount of total losses for the period included in earnings attributable to the change in unrealized losses relating to assets still held as of January 31, 2010	\$ (1)	\$	\$ (1)

(1) Included in Interest and other, net in the accompanying Consolidated Condensed Statements of Earnings.

The changes in Level 3 instruments for the three months ended January 31, 2009 that were measured at fair value on a recurring basis resulted in a total loss of \$2 million. The loss for the period was included in earnings attributable to the change in unrealized losses relating to assets still held as of January 31, 2009.

HP measures certain assets including cost and equity method investments at fair value on a non-recurring basis. These assets are recognized at fair value when they are deemed to be other-than-temporarily impaired. In the three months ended January 31, 2010, HP did not record any impairment charge relating to these investments. In the three months ended January 31, 2009, HP recorded an impairment charge of \$5 million.

HP reviews the carrying values of the investments when events and circumstances warrant and considers all available evidence in evaluating when declines in fair value are other-than-temporary declines. HP determines fair values for investments in public companies using quoted market prices and records a charge to Interest and other, net when the change in fair values is determined to be other than temporary. HP carries equity investments in privately held companies at cost or at fair value when HP recognizes an other-than-temporary impairment charge.

HP monitors its investment portfolio for impairment on a periodic basis. In the event that the carrying value of an investment in debt securities exceeds its fair value and the decline in value is determined to be an other-than-temporary decline and (i) HP does not intend to sell the debt security, and (ii) when it is not more likely than not that HP will be required to sell the debt security prior to recovery of its amortized cost basis, HP records an impairment charge to Interest and other, net in the amount of the credit loss and the balance, if any, to other comprehensive income.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Other debt securities	404	51	(45)	410	419	49	(45)	423
Total debt securities	\$ 466	\$ 51	\$ (45)	\$ 472	\$ 474	\$ 49	\$ (45)	\$ 478
Equity securities in public companies	\$ 3	\$ 2	\$	\$ 5	\$ 3	\$ 2	\$	\$ 5
Total cash equivalents and investments	\$ 11,801	\$ 53	\$ (45)	\$ 11,809	\$ 10,997	\$ 51	\$ (45)	\$ 11,003

Cash equivalents consist of investments with original maturities of ninety days or less. Available-for-sale securities consist of short-term investments which mature within twelve months or less and long-term investments with maturities longer than twelve months. Investments include primarily time deposits, fixed-interest securities, and institutional bonds. As discussed in Note 8, HP estimated the fair values of its investments based on quoted market prices or pricing models using current market rates. These estimated fair values may not be representative of actual values that will be realized in the future.

The gross unrealized loss as of January 31, 2010 was due primarily to declines in certain debt securities and included \$31 million that has been in a continuous loss position for more than twelve months. The gross unrealized loss as of October 31, 2009 was due primarily to declines in certain debt securities and included \$20 million that had been in a continuous loss position for more than twelve months. HP does not intend to sell these debt securities, and it is not likely that HP will be required to sell these debt securities prior to the recovery of the amortized cost. In the three months ended January 31, 2010, HP did not recognize any impairment charge associated with debt securities. In the three months ended January 31, 2009, HP recognized an impairment charge of \$11 million representing credit losses associated with debt securities.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 9: Financial Instruments (Continued)

Contractual maturities of short-term and long-term investments in available-for-sale securities at January 31, 2010 were as follows:

	Available-for-Sale Securities	
	January 31, 2010	
	Cost	Estimated Fair Value
	In millions	
Due in less than one year	\$ 60	\$ 60
Due in 1-5 years	28	28
Due in more than five years	378	384
	\$ 466	\$ 472

There were no sales or maturities of available-for-sale and other securities for the three months ended January 31, 2010. Proceeds from sales and maturities of available-for-sale and other securities were \$46 million in the three months ended January 31, 2009. There were no gross realized gains or losses on these securities for both periods. The specific identification method is used to account for gains and losses on available-for-sale securities.

A summary of the carrying values and balance sheet classification of all short-term and long-term investments in debt and equity securities as of January 31, 2010 and October 31, 2009 was as follows:

	January 31, 2010	October 31, 2009
	In millions	
Time deposit	\$ 55	\$ 55
Available-for-sale debt securities	5	
Short-term investments	60	55
Time deposit	7	
Available-for-sale debt securities	405	423
Available-for-sale equity securities	5	5
Equity securities in privately-held companies	134	129
Other investments	13	13
Included in long-term financing receivables and other assets	564	570
Total investments	\$ 624	\$ 625

Equity securities in privately held companies include cost basis and equity method investments. Other investments include marketable trading securities held to generate returns that HP expects to offset changes in certain liabilities related to deferred compensation arrangements. HP includes gains or losses from changes in fair value of these securities, offset by losses or gains on the related liabilities, in Interest and other, net, in HP's Consolidated Condensed Statements of Earnings. The net losses associated with these securities were \$2 million and \$4 million for the three months ended January 31, 2010 and January 31, 2009, respectively.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 9: Financial Instruments (Continued)

Derivative Financial Instruments

HP is a global company that is exposed to foreign currency exchange rate fluctuations and interest rate changes in the normal course of its business. As part of its risk management strategy, HP uses derivative instruments, primarily forward contracts, option contracts, interest rate swaps, and total return swaps, to hedge certain foreign currency, interest rate and, to a lesser extent, equity exposures. HP's objective is to offset gains and losses resulting from these exposures with losses and gains on the derivative contracts used to hedge them, thereby reducing volatility of earnings or protecting fair values of assets and liabilities. HP does not have any leveraged derivatives. HP does not use derivative contracts for speculative purposes. HP designates its derivatives as fair value hedges, cash flow hedges or hedges of the foreign currency exposure of a net investment in a foreign operation ("net investment hedges"). Additionally, for derivatives not designated as hedging instruments, HP categorizes those economic hedges as other derivatives. HP recognizes all derivatives in the Consolidated Condensed Balance Sheets at fair value and reports them in Other current assets, Long-term financing receivables and other assets, Other accrued liabilities, or Other liabilities. HP classifies cash flows from the derivative programs as operating activities in the Consolidated Condensed Statements of Cash Flows.

As a result of the use of derivative instruments, HP is exposed to the risk that counterparties to derivative contracts will fail to meet their contractual obligations. To mitigate the counterparty credit risk, HP has a policy of only entering into contracts with carefully selected major financial institutions based upon their credit ratings and other factors, and HP maintains dollar and term limits that correspond to each institution's credit rating. HP's established policies and procedures for mitigating credit risk on principal transactions and short-term cash include reviewing and establishing limits for credit exposure and continually assessing the creditworthiness of counterparties. Master agreements with counterparties include master netting arrangements as further mitigation of credit exposure to counterparties. These arrangements permit HP to net amounts due from HP to a counterparty with amounts due to HP from a counterparty, which reduces the maximum loss from credit risk in the event of counterparty default.

Certain of HP's derivative instruments contain credit-risk-related contingent features, such as a provision whereby the counterparties to the derivative instruments could request collateralization on derivative instruments in net liability positions if HP's credit rating falls below investment grade. As of January 31, 2010, HP was not required to post any collateral, and HP did not have any derivative instruments with credit-risk-related contingent features that were in a significant net liability position.

Fair Value Hedges

HP enters into fair value hedges to reduce the exposure of its debt portfolio to interest rate risk. HP issues long-term debt in U.S. dollars based on market conditions at the time of financing. HP uses interest rate swaps to modify the market risk exposures in connection with the debt to achieve primarily U.S. dollar LIBOR-based floating interest expense. The swap transactions generally involve principal and interest obligations for U.S. dollar-denominated amounts. Alternatively, HP may choose not to swap fixed for floating interest payments or may terminate a previously executed swap if it believes a larger proportion of fixed-rate debt would be beneficial. When investing in fixed-rate instruments, HP may enter into interest rate swaps that convert the fixed interest returns into variable interest returns and would classify these swaps as fair value hedges. For derivative instruments that are designated and

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 9: Financial Instruments (Continued)

qualify as fair value hedges, HP recognizes the gain or loss on the derivative instrument, as well as the offsetting loss or gain on the hedged item, in Interest and other, net in the Consolidated Condensed Statements of Earnings in the current period.

Cash Flow Hedges

HP uses a combination of forward contracts and options designated as cash flow hedges to protect against the foreign currency exchange rate risks inherent in its forecasted net revenue and, to a lesser extent, cost of sales, operating expense, and intercompany lease loan denominated in currencies other than the U.S. dollar. HP's foreign currency cash flow hedges mature generally within six to twelve months. However, certain leasing revenue-related forward contracts and intercompany lease loan forward contracts extend for the duration of the lease term, which can be up to five years. For derivative instruments that are designated and qualify as cash flow hedges, HP initially records the effective portion of the gain or loss on the derivative instrument in accumulated other comprehensive income or loss as a separate component of stockholders' equity and subsequently reclassifies these amounts into earnings in the period during which the hedged transaction is recognized in earnings. HP reports the effective portion of cash flow hedges in the same financial statement line item as the changes in value of the hedged item. During the three months ended January 31, 2010, HP did not discontinue any cash flow hedge for which it was probable that a forecasted transaction would not occur.

Net Investment Hedges

HP uses forward contracts designated as net investment hedges to hedge net investments in certain foreign subsidiaries whose functional currency is the local currency. These derivative instruments are designated as net investment hedges and, as such, HP records the effective portion of the gain or loss on the derivative instrument together with changes in the hedged items in cumulative translation adjustment as a separate component of stockholders' equity.

Other Derivatives

Other derivatives not designated as hedging instruments consist primarily of forward contracts HP uses to hedge foreign currency balance sheet exposures. HP also uses total return swaps and, to a lesser extent, interest rate swaps, based on the equity and fixed income indices, to hedge its executive deferred compensation plan liability. For derivative instruments not designated as hedging instruments, HP recognizes changes in the fair values in earnings in the period of change. HP recognizes the gain or loss on foreign currency forward contracts used to hedge balance sheet exposures in Interest and other, net in the same period as the remeasurement gain and loss of the related foreign currency denominated assets and liabilities. HP recognizes the gain or loss on the total return swaps and interest rate swaps in Interest and other, net in the same period as the gain or loss from the change in market value of the executive deferred compensation plan liability.

Hedge Effectiveness

For interest rate swaps designated as fair value hedges, HP measures effectiveness by offsetting the change in fair value of the hedged debt with the change in fair value of the derivative. For foreign

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 9: Financial Instruments (Continued)

currency options and forward contracts designated as cash flow or net investment hedges, HP measures effectiveness by comparing the cumulative change in the hedge contract with the cumulative change in the hedged item, both of which are based on forward rates. HP recognizes any ineffective portion of the hedge, as well as amounts not included in the assessment of effectiveness, in the Consolidated Condensed Statements of Earnings. As of January 31, 2010, the portion of hedging instruments' gain or loss excluded from the assessment of effectiveness was not material for fair value, cash flow or net investment hedges. Hedge ineffectiveness for fair value, cash flow and net investment hedges was not material in the three months ended January 31, 2010.

Fair Value of Derivative Instruments in the Consolidated Condensed Balance Sheets

As discussed in Note 8, HP estimates the fair values of derivatives primarily based on pricing models using current market rates and records all derivatives on the balance sheet at fair value. The gross notional and fair value of derivative financial instruments in the Consolidated Condensed Balance Sheets were recorded as follows:

	As of January 31, 2010					As of October 31, 2009				
	Gross Notional ⁽¹⁾	Long-term Financing Receivables		Other		Gross Notional ⁽¹⁾	Long-term Financing Receivables		Other

(1) Amount of gain recognized in income on derivative represents a \$4 million gain related to the amount excluded from the assessment of hedge effectiveness in the three months ended January 31, 2010.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 9: Financial Instruments (Continued)

HP expects to reclassify a net accumulated other comprehensive gain of approximately \$182 million, net of taxes, to earnings in the next twelve months along with the earnings effects of the related forecasted transactions in association with cash flow hedges.

The before-tax effect of derivative instruments not designated as hedging instruments on the Consolidated Condensed Statements of Earnings for the three months ended January 31, 2010 was as follows:

	Gain (Loss) Recognized in Income on Derivative	Three months ended January 31, 2010
Location		In millions
Foreign exchange contracts	Interest and other, net	\$ 66
Total return contracts and other	Interest and other, net	(11)
Interest rate contracts	Interest and other, net	(1)
Total		\$ 54

Other Financial Instruments

For the balance of HP's financial instruments, accounts receivable, financing receivables, notes payable and short-term borrowings, accounts payable and other accrued liabilities, the carrying amounts approximate fair value due to their short maturities. The estimated fair value of HP's short- and long-term debt was approximately \$16.0 billion at January 31, 2010, compared to a carrying value of \$15.9 billion at that date. The estimated fair value of the debt is based primarily on quoted market prices, as well as borrowing rates currently available to HP for bank loans with similar terms and maturities.

Note 10: Financing Receivables and Operating Leases

Financing receivables represent sales-type and direct-financing leases resulting from the marketing of HP's and third-party products. These receivables typically have terms from two to five years and are usually collateralized by a security interest in the underlying assets. Financing receivables also include

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 10: Financing Receivables and Operating Leases (Continued)

billed receivables from operating leases. The components of net financing receivables, which are included in financing receivables and long-term financing receivables and other assets, were as follows:

	January 31, 2010	October 31, 2009
In millions		
Minimum lease payments receivable	\$ 6,541	\$ 6,413
Allowance for doubtful accounts	(102)	(108)
Unguaranteed residual value	238	244
Unearned income	(570)	(571)
Financing receivables, net	6,107	5,978
Less current portion	(2,765)	(2,675)
Amounts due after one year, net	\$ 3,342	\$ 3,303

Equipment leased to customers under operating leases was \$3.1 billion at January 31, 2010 and \$3.0 billion at October 31, 2009 and is included in machinery and equipment. Accumulated depreciation on equipment under lease was \$0.9 billion at January 31, 2010 and October 31, 2009.

Note 11: Guarantees*Guarantees and Indemnifications*

In the ordinary course of business, HP may provide certain clients with subsidiary performance guarantees and/or financial performance guarantees, which may be backed by standby letters of credit or surety bonds. In general, HP would be liable for the amounts of these guarantees in the event HP or HP's subsidiaries' nonperformance permits termination of the related contract by the client, the likelihood of which HP believes is remote. HP believes that the company is in compliance with the performance obligations under all material service contracts for which there is a performance guarantee.

HP has certain service contracts supported by client financing or securitization arrangements. Under specific circumstances involving nonperformance resulting in service contract termination or failure to comply with terms under the financing arrangement, HP would be required to acquire certain assets. HP considers the possibility of its failure to comply to be remote and the asset amounts involved to be immaterial.

In the ordinary course of business, HP enters into contractual arrangements under which HP may agree to indemnify the third party to such arrangement from any losses incurred relating to the services they perform on behalf of HP or for losses arising from certain events as defined within the particular contract, which may include, for example, litigation or claims relating to past performance. Such indemnification obligations may not be subject to maximum loss clauses. Historically, payments made related to these indemnifications have been immaterial.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 11: Guarantees (Continued)

Warranty

HP provides for the estimated cost of product warranties at the time it recognizes revenue. HP engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers; however, product warranty terms offered to customers, ongoing product failure rates, material usage and service delivery costs incurred in correcting a product failure, as well as specific product class failures outside of HP's baseline experience, affect the estimated warranty obligation. If actual product failure rates, repair rates or any other post sales support costs differ from these estimates, revisions to the estimated warranty liability would be required.

The changes in HP's aggregate product warranty liabilities for the three months ended January 31, 2010 were as follows:

	In millions
Product warranty liability at October 31, 2009	\$ 2,409
Accruals for warranties issued	758
Adjustments related to pre-existing warranties (including changes in estimates)	(23)
Settlements made (in cash or in kind)	(676)
Product warranty liability at January 31, 2010	\$ 2,468

Note 12: Borrowings

Notes Payable and Short-Term Borrowings

Notes payable and short-term borrowings, including the current portion of long-term debt, were as follows:

	January 31, 2010		October 31, 2009	
	Amount	Weighted-Average Interest Rate	Amount	Weighted-Average Interest Rate
	Outstanding	Rate	Outstanding	Rate
	In millions			
Current portion of long-term debt	\$ 1,113	0.8%	\$ 1,143	1.0%

HP may redeem some or all of the Global Notes set forth in the above table at any time at the redemption prices described in the prospectus supplements relating thereto. The Global Notes are senior unsecured debt.

HP registered the sale of up to \$3.0 billion of debt or global securities, common stock, preferred stock, depositary shares and warrants under a shelf registration statement filed with the Securities and Exchange Commission ("SEC") in March 2002 (the "2002 Shelf Registration Statement"). The 2002 Shelf Registration Statement expired on December 1, 2008, and, accordingly, HP is no longer able to issue any additional securities under this registration statement.

In May 2009, HP filed a shelf registration statement (the "2009 Shelf Registration Statement") with the SEC to enable the company to offer for sale, from time to time, in one or more offerings, an unspecified amount of debt securities, common stock, preferred stock, depositary shares and warrants. The 2009 Shelf Registration Statement replaced a similar registration statement filed in May 2006 that expired in May 2009.

In May 2008, HP's Board of Directors approved an increase in the capacity of HP's U.S. commercial paper program by \$10.0 billion to \$16.0 billion. HP's subsidiaries are authorized to issue up to an additional \$1.0 billion of commercial paper, of which \$500 million of capacity is currently available to be used by Hewlett-Packard International Bank PLC, a wholly-owned subsidiary of HP, for its Euro Commercial Paper/Certificate of Deposit Programme.

In October 2008, HP registered for the Commercial Paper Funding Facility ("CPFF") provided by the Federal Reserve Bank of New York. The CPFF program expired on February 1, 2010. HP had not issued any commercial paper under the CPFF program.

HP has a \$2.9 billion five-year credit facility expiring in May 2012. In February 2009, HP entered into a \$3.5 billion 364-day credit facility. The February credit facility expired in February 2010, at which time HP entered into a new \$3.5 billion 364-day credit facility maintaining the total amount available under its credit facilities at \$6.4 billion. Commitment fees, interest rates and other terms of borrowing under the credit facilities vary based on HP's external credit ratings. The credit facilities are senior unsecured committed borrowing arrangements primarily to support the issuance of U.S. commercial

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 12: Borrowings (Continued)

paper. HP's ability to have a U.S. commercial paper outstanding balance that exceeds the \$6.4 billion supported these credit facilities is subject to a number of factors, including liquidity conditions and business performance.

HP also maintains uncommitted lines of credit from a number of financial institutions that are available through various foreign subsidiaries. The amount available for use as of January 31, 2010 was approximately \$1.5 billion.

Included in Other, including capital lease obligations, are borrowings that are collateralized by certain financing receivable assets. As of January 31, 2010, the carrying value of the assets approximated the carrying value of the borrowings of \$22 million.

At January 31, 2010, HP was able to issue an unspecified amount of additional debt securities, common stock, preferred stock, depository shares and warrants under the 2009 Shelf Registration Statement. As of that date, HP also had up to approximately \$17.7 billion of available borrowing resources, including \$16.2 billion under its commercial paper programs, \$6.4 billion of which is supported by its credit facilities, and approximately \$1.5 billion under other programs.

Note 13: Income Taxes

Provision for Taxes

HP's effective tax rate was 19.8% and 18.0% for the three months ended January 31, 2010 and January 31, 2009, respectively. HP's effective tax rate increased due to a decline in the percentage of total earnings earned in lower-tax jurisdictions and a decline in its discrete tax benefits relative to pretax earnings. HP's effective tax rate generally differs from the U.S. federal statutory rate of 35% due to favorable tax rates associated with certain earnings from HP's operations in lower-tax jurisdictions throughout the world. HP has not provided U.S. taxes for all of such earnings because HP plans to reinvest some of those earnings indefinitely outside the United States.

In the three months ended January 31, 2010, HP recorded discrete items with a net tax benefit of \$92 million, decreasing the effective tax rate. These amounts included net tax benefits of \$54 million from restructuring and acquisition charges, a tax benefit of \$19 million from settlement of a tax audit matter, a net tax benefit of \$19 million from adjustments to prior year foreign income tax accruals and credits, and other miscellaneous discrete items.

In the three months ended January 31, 2009, HP recorded discrete items with a net tax benefit of \$91 million, decreasing the effective tax rate. These amounts included net tax benefits of \$63 million from restructuring and acquisition charges and other miscellaneous discrete items resulting in a net tax benefit of \$28 million.

During the first three months of fiscal 2010, the amount of gross unrecognized tax benefits remained at \$1.9 billion, of which up to \$940 million would affect HP's effective tax rate if realized. HP recognizes interest expense and penalties on unrecognized tax benefits within income tax expense. During the first three months of fiscal 2010, there was no material change in the amount of accrued net interest and penalties.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 13: Income Taxes (Continued)

HP engages in continuous discussion and negotiation with tax authorities regarding tax matters in the various jurisdictions. HP does not expect complete resolution of any Internal Revenue Service ("IRS") audit cycle within the next 12 months. However, it is reasonably possible that certain federal, foreign and state tax issues may be concluded in the next 12 months, including issues involving transfer pricing and other matters. Accordingly, HP believes it is reasonably possible that its existing unrecognized tax benefits may be reduced by an amount up to \$115 million within the next 12 months.

HP is subject to income tax in the United States and over sixty foreign countries and is subject to routine corporate income tax audits in many of these jurisdictions. In addition, HP is subject to numerous ongoing audits by state and foreign tax authorities. HP has received from the IRS Notices of Deficiency for its fiscal 1999, 2000, 2003, 2004 and 2005 tax years, and Revenue Agent's Reports ("RAR's") for its fiscal 2001 and 2002 tax years. The IRS began an audit of HP's 2006 and 2007 income tax returns in 2009. With respect to major foreign and state tax jurisdictions, HP is no longer subject to tax authority examinations for years prior to 1999. HP believes that adequate reserves have been provided for all open tax years.

The breakdown between current and long-term deferred tax assets and deferred tax liabilities was as follows:

	January 31, 2010	October 31, 2009
	In millions	
Current deferred tax assets	\$ 4,758	\$ 4,979
Current deferred tax liabilities	(23)	(83)
Long-term deferred tax assets	1,868	1,751
Long-term deferred tax liabilities	(4,287)	(4,230)
Total deferred tax assets net of deferred tax liabilities	\$ 2,316	\$ 2,417

Note 14: Stockholders' Equity*Share Repurchase Program*

HP's share repurchase program authorizes both open market and private repurchase transactions. In the first quarter of fiscal 2010, HP executed share repurchases of 53 million shares. Repurchases of 54 million shares were settled for \$2.7 billion in the first quarter of fiscal 2010, which included 3 million shares repurchased in transactions that were executed in fiscal 2009 but settled in the first quarter of fiscal 2010. HP had approximately 2 million shares repurchased in the first quarter of fiscal 2010 that will be settled in the second quarter of fiscal 2010. HP paid approximately \$1.2 billion in connection with repurchases of approximately 34 million shares during the three months ended January 31, 2009.

On November 19, 2009, HP's Board of Directors authorized an additional \$8.0 billion for future share repurchases. As of January 31, 2010, HP had remaining authorization of \$9.2 billion for future share repurchases.

Accumulated other comprehensive loss	\$ (2,944)	\$ (3,247)

Note 15: Retirement and Post-Retirement Benefit Plans

Modifications to Defined Contribution Plans

HP offers various defined contribution plans for U.S. and non-U.S. employees. As disclosed in our Consolidated Financial Statements for the fiscal year ended October 31, 2009, prior to April 1, 2009, HP matched employee contributions to the U.S. HP 401(k) Plan with cash contributions up to a maximum of 6% of eligible compensation for U.S. employees hired prior to August 1, 2008 and up to a maximum of 4% of eligible compensation for U.S. employees hired on or after August 1, 2008. Further,

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 15: Retirement and Post-Retirement Benefit Plans (Continued)

effective from January 1, 2009 through March 31, 2009, U.S. employees participating in the EDS 401(k) Plan were eligible for a 4% HP matching contribution on eligible compensation.

Effective April 1, 2009, HP matching contributions under both the U.S. HP 401(k) Plan and the EDS 401(k) Plan were changed to a quarterly, discretionary, performance-based match of up to a maximum of 4% of eligible compensation for all U.S. employees, which is determined each fiscal quarter based on business results. HP matching contributions vary from 0% to 100% of the maximum 4% match, based on such factors as quarterly earnings, market share growth, and performance relative to market and economic conditions. HP's matching contributions for the quarter ended January 31, 2010 was 100% of the maximum 4% match.

HP's net pension and post-retirement benefit costs were as follows:

	Three months ended January 31					
	U.S. Defined Benefit Plans		Non-U.S. Defined Benefit Plans		Post- Retirement Benefit Plans	
	2010	2009	2010	2009	2010	2009

Special termination benefits				1		
Net benefit (gain) cost	\$ (14)	\$ 8	\$ 114	\$ 84	\$ (8)	\$ (5)

Employer Contributions and Funding Policy

HP previously disclosed in its Consolidated Financial Statements for the fiscal year ended October 31, 2009 that it expected to contribute approximately \$745 million to its pension plans and approximately \$30 million to cover benefit payments to U.S. non-qualified plan participants. In addition, HP expected to pay approximately \$45 million to cover benefit claims for HP's post-retirement benefit plans. HP's funding policy is to contribute cash to its pension plans so that it meets at least the minimum contribution requirements, as established by local government, funding and taxing authorities.

As of January 31, 2010, HP has made \$152 million of contributions to its pension plans, paid \$4 million to cover benefit payments to U.S. non-qualified plan participants, and paid \$9 million to cover benefit claims under post-retirement benefit plans. HP presently anticipates making additional contributions of approximately \$594 million to its pension plans and approximately \$24 million to its U.S. non-qualified plan participants and expects to pay up to \$36 million to cover benefit claims under post-retirement benefit plans during the remainder of fiscal 2010. HP's pension and other

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 15: Retirement and Post-Retirement Benefit Plans (Continued)

post-retirement benefit costs and obligations are dependent on various assumptions. Differences between expected and actual returns on investments will be reflected as unrecognized gains or losses, and such gains or losses will be amortized and recorded in future periods. Poor financial performance of asset markets in any year could lead to increased contributions in certain countries and increased future pension plan expense. Asset gains or losses are determined at the measurement date and amortized over the remaining service life or life expectancy of plan participants. HP's next expected measurement date is October 31, 2010.

Note 16: Litigation and Contingencies

HP is involved in lawsuits, claims, investigations and proceedings, including those identified below, consisting of intellectual property, commercial, securities, employment, employee benefits and environmental matters that arise in the ordinary course of business. HP records a provision for a liability when management believes that it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. HP believes it has adequate provisions for any such matters. HP reviews these provisions at least quarterly and adjusts these provisions to reflect the impact of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case. Based on its experience, HP believes that any damage amounts claimed in the specific matters discussed below are not a meaningful indicator of HP's potential liability. Litigation is inherently unpredictable. However, HP believes that it has valid defenses with respect to legal matters pending against it. Nevertheless, it is possible that cash flows or results of operations could be materially affected in any particular period by the unfavorable resolution of one or more of these contingencies or because of the diversion of management's attention and the creation of significant expenses.

Litigation, Proceedings and Investigations

Copyright levies. As described below, proceedings are ongoing or have been concluded against HP in certain European Union ("EU") member countries, including litigation in Germany, seeking to impose levies upon equipment (such as multifunction devices ("MFDs"), personal computers ("PCs") and printers) and alleging that these devices enable producing private copies of copyrighted materials. The levies are generally based upon the number of products sold and the per-product amounts of the levies, which vary. Some EU member countries that do not yet have levies on digital devices are expected to implement similar legislation to enable them to extend existing levy schemes, while some other EU member countries are expected to limit the scope of levy schemes and applicability in the digital hardware environment. HP, other companies and various industry associations have opposed the extension of levies to the digital environment and have advocated alternative models of compensation to rights holders.

VerwertungsGesellschaft Wort ("VG Wort"), a collection agency representing certain copyright holders, instituted legal proceedings against HP in June 2001 in Germany relating to whether and to what extent German copyright levies for photocopiers should be imposed on MFDs. On July 6, 2005, the Court of Appeals in Stuttgart Germany ordered HP to pay VG Wort levies based on the published tariffs for photocopiers in Germany (which range from €38.35 to €613.56 per unit), plus interest, on MFDs sold in Germany up to December 2001, and the German Federal Supreme Court later affirmed

Note 16: Litigation and Contingencies (Continued)

that ruling on appeal. HP subsequently appealed the decision by filing a claim with the German Federal Constitutional Court, which declined to hear HP's appeal, thus concluding these proceedings. HP has made the payments required under the court ruling.

On September 26, 2005, VG Wort filed an additional lawsuit against HP in the Stuttgart Civil Court in Stuttgart, Germany seeking assurance of full payment of levies on MFD units sold in Germany between 1997 and 2001, as well as for MFDs sold from 2002 onwards. On March 25, 2009, the German Association for Information Technology, Telecommunications and New Media e.V. entered into a settlement agreement with VG Wort and Verwertungsgesellschaft Bild-Kunst, another collection agency representing copyright holders ("VG Bild-Kunst"), that provides for the payment of levies on MFDs sold from 2002 through 2007. The levies vary from approximately €13 to €307 per unit depending on the type of device, the date sold and the copy speed and are subject to reduction if VG Wort or VG Bild-Kunst grants more favorable rates in the future to parties within Germany that are not covered by the settlement. HP has acceded to the settlement and paid all amounts due thereunder.

In July 2004, VG Wort filed a separate lawsuit against HP in the Stuttgart Civil Court seeking levies on printers. On December 22, 2004, the court held that HP is liable for payments regarding all printers using ASCII code sold in Germany but did not determine the amount payable per unit. HP appealed this decision in January 2005 to the Stuttgart Court of Appeals. On May 11, 2005, the Stuttgart Court of Appeals issued a decision confirming that levies are due. On June 6, 2005, HP filed an appeal to the German Federal Supreme Court in Karlsruhe. On December 6, 2007, the German Federal Supreme Court issued a judgment that printers are not subject to levies under the existing law. The court issued a written decision on January 25, 2008, and VG Wort subsequently filed an application with the German Federal Supreme Court under Section 321a of the German Code of Civil Procedure contending that the court did not consider their arguments. On May 9, 2008, the German Federal Supreme Court denied VG Wort's application. In addition, VG Wort has appealed the decision by filing a claim with the German Federal Constitutional Court challenging the ruling that printers are not subject to levies. HP and the German Association for Information Technology, Telecommunications and New Media e.V. ("BITKOM") have responded to VG Wort's claim, and the parties are awaiting a decision by the court as to whether it will accept the claim for judicial review.

In September 2003, VG Wort filed a lawsuit against Fujitsu Siemens Computer GmbH ("FSC") in the Munich Civil Court in Munich, Germany seeking levies on PCs. This is an industry test case in Germany, and HP has agreed not to object to the delay if VG Wort sues HP for such levies on PCs following a final decision against FSC. On December 23, 2004, the Munich Civil Court held that PCs are subject to a levy and that FSC must pay €12 plus compound interest for each PC sold in Germany since March 2001. FSC appealed this decision in January 2005 to the Munich Court of Appeals. On December 15, 2005, the Munich Court of Appeals affirmed the Munich Civil Court decision. FSC filed an appeal with the German Federal Supreme Court in February 2006. On October 2, 2008, the German Federal Supreme Court issued a judgment that PCs were not photocopiers within the meaning of the German copyright law that was in effect until December 31, 2007 and, therefore, not subject to the levies on photocopiers established by that law. VG Wort has filed a claim with the German Federal Constitutional Court challenging that ruling. FSC and BITKOM have responded to VG Wort's claim, and the parties are awaiting a decision by the court as to whether it will accept the claim for judicial review.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 16: Litigation and Contingencies (Continued)

ZPU, a joint association of various German collection societies, instituted legal proceedings against HP in 2005 demanding reporting of every PC sold by HP in Germany from January 2002 through December 2005 and seeking a levy of €8.42 plus tax for each PC sold during that period. On December 23, 2009, the German industry association Bundesverband Computerhersteller ("BCH") entered into a settlement agreement with ZPU that provides for the payment of €3.15 per unit for PCs sold in Germany between 2002 and 2003 and €6.30 per units for PCs sold in Germany between 2005 and 2007. The settlement is only valid for those companies who are members of BCH and accede to the settlement and who also agree to pay a levy of €12.15 per unit for PCs without a built-in CD-R or DVD-R and €13.65 per unit for PCs with a built-in CD-R or DVD-R sold in Germany between 2008 and 2010. HP is a member of BCH and has acceded to the settlement.

Based on industry opposition to the extension of levies to digital products, HP's assessments of the merits of various proceedings and HP's estimates of the units impacted and levies, HP has accrued amounts that it believes are adequate to address the matters described above. However, the ultimate resolution of these matters and the associated financial impact on HP, including the number of units impacted, the amount of levies imposed and the ability of HP to recover such amounts through increased prices, remains uncertain.

Sky Subscribers Services Limited and British Sky Broadcasting Limited v. EDS and EDS Limited (UK) is a lawsuit filed on August 17, 2004 by Sky Subscribers Services Limited and British Sky Broadcasting Limited against Electronic Data Systems Corporation ("EDS"), a company that HP acquired in August 2008, and EDS Limited (UK) ("EDS UK"), one of EDS's subsidiaries, alleging deceit, negligent misrepresentation, negligent misstatement and breach of contract. The claims arose out of a customer relationship management project that was awarded to EDS in 2000, the principal objective of which was to develop a customer call center in Scotland. EDS's main role in the project was as systems integrator. On November 12, 2004, EDS and EDS UK filed their defense and counterclaim denying the claims and seeking damages for monies owed under the contract. The trial of this action commenced on October 15, 2007, and final arguments concluded on July 30, 2008. At trial, the plaintiffs claimed damages in excess of £700 million, and EDS and EDS UK counterclaimed for damages of approximately £5 million. On January 26, 2010, the court issued a decision finding EDS UK liable to the plaintiffs for deceit in one area of the claim, for negligent misrepresentation and negligent misstatement in another area of the claim, and for breach of contract. The court dismissed all of the plaintiffs' other claims. On March 1, 2010, the court ordered HP to make an interim payment to the plaintiffs of £70 million, which is in addition to an interim payment of £200 million that HP made voluntarily to the plaintiffs in February 2010. The court will issue a final quantification of damages at a later date. HP plans to seek leave from the court to appeal the decision.

Skold, et al. v. Intel Corporation and Hewlett-Packard Company is a lawsuit in which HP was joined on June 14, 2004 that is pending in state court in Santa Clara County, California. The lawsuit alleges that HP (along with Intel) misled the public by suppressing and concealing the alleged material fact that systems that use the Intel Pentium 4 processor are less powerful and slower than systems using the Intel Pentium III processor and processors made by a competitor of Intel. The plaintiffs seek unspecified damages, restitution, attorneys' fees and costs, and certification of a nationwide class. On February 27, 2009, the court denied with prejudice plaintiffs' motion for nationwide class certification for a third time. The plaintiffs have appealed the court's decision.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Note 16: Litigation and Contingencies (Continued)

Inkjet Printer Litigation. As described below, HP is involved in several lawsuits claiming breach of express and implied warranty, unjust enrichment, deceptive advertising and unfair business practices where the plaintiffs have alleged, among other things, that HP employed a "smart chip" in certain inkjet printing products in order to register ink depletion prematurely and to render the cartridge unusable through a built-in expiration date that is hidden, not documented in marketing materials to consumers, or both. The plaintiffs have also contended that consumers received false ink depletion warnings and that the smart chip limits the ability of consumers to use the cartridge to its full capacity or to choose competitive products.

A consolidated lawsuit captioned *In re HP Inkjet Printer Litigation* is pending in the United States District Court for the Northern District of California where the plaintiffs are seeking class certification, restitution, damages (including enhanced damages), injunctive relief, interest, costs, and attorneys' fees. On January 4, 2008, the court heard plaintiffs' motions for class certification and to add a class representative and HP's motion for summary judgment. On July 25, 2008, the court denied all three motions. On March 30, 2009, the plaintiffs filed a renewed motion for class certification. A hearing on the plaintiffs' motion for class certification is scheduled for April 9, 2010.

A lawsuit captioned *Blennis v. HP* was filed on January 17, 2007 in the United States District Court for the Northern District of California where the plaintiffs are seeking class certification, restitution, damages (including enhanced damages), injunctive relief, interest, costs, and attorneys' fees. A class certification hearing is scheduled for May 21, 2010.

Four class actions against HP and its subsidiary, Hewlett-Packard (Canada) Co., are pending in Canada, one commenced in British Columbia in February 2006, two commenced in Quebec in April 2006 and May 2006, respectively, and one commenced in Ontario in June 2006, where the plaintiffs are seeking class certification, restitution, declaratory relief, injunctive relief and unspecified statutory, compensatory and punitive damages. A class authorization hearing for one of the cases pending in Quebec was tentatively scheduled for December 10, 2009; that hearing has been postponed and no new date has been set by the court.

Baggett v. HP is a consumer class action filed against HP on June 6, 2007 in the United States District Court for the Central District of California alleging that HP employs a technology in its LaserJet color printers whereby the printing process shuts down prematurely, thus preventing customers from using the toner that is allegedly left in the cartridge. The plaintiffs also allege that HP fails to disclose to consumers that they will be unable to utilize the toner remaining in the cartridge after the printer shuts down. The complaint seeks certification of a nationwide class of purchasers of all HP LaserJet color printers and seeks unspecified damages, restitution, disgorgement, injunctive relief, attorneys' fees and costs. On September 29, 2009, the court granted HP's motion for summary judgment against the named plaintiff and denied plaintiff's motion for class certification as moot. On November 3, 2009, the court entered judgment against the named plaintiff. On November 17, 2009, plaintiff filed an appeal of the court's summary judgment ruling with the United States Court of Appeals for the Ninth Circuit.

Rich v. HP is a consumer class action filed against HP on May 22, 2006 in the United States District Court for the Northern District of California. The suit alleges that HP designed its color inkjet

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 16: Litigation and Contingencies (Continued)

printers to unnecessarily use color ink in addition to black ink when printing black and white images and text. The plaintiffs are seeking to certify a nationwide injunctive class and a California-only damages class. A class certification hearing is scheduled for May 7, 2010.

On December 27, 2001, Cornell University and the Cornell Research Foundation, Inc. filed a complaint, amended on September 6, 2002, against HP in United States District Court for the Northern District of New York alleging that HP's PA-RISC 8000 family of microprocessors, and servers and workstations incorporating those processors, infringe a patent assigned to Cornell Research Foundation, Inc. that describes a way of executing microprocessor instructions. The complaint sought declaratory and injunctive relief and unspecified damages. The patent at issue in this litigation, United States Patent No. 4,807,115, expired on February 21, 2006. Therefore, the plaintiffs are no longer entitled to seek injunctive relief against HP. This matter was tried between May 19 and May 30, 2008, and, on May 30, 2008, a jury returned a verdict in favor of the plaintiffs in the amount of \$184 million. On March 30, 2009, the trial court issued four post-trial decisions. The court denied several of HP's post-trial motions, but granted HP's motion to reduce the damages award. The court reduced the award to approximately \$53 million and subsequently entered judgment in favor of the plaintiffs in that amount. On April 10, 2009, HP filed a notice that it will appeal the judgment to the United States Court of Appeals for the Federal Circuit. On May 15, 2009, the court awarded approximately \$17 million in pre-judgment interest and approximately \$1 million in costs and subsequently entered an amended judgment reflecting those awards. On June 2, 2009, the court entered a final amended judgment reflecting the total amount of damages, pre-judgment interest and taxable costs. On June 4, 2009, HP filed an amended notice of appeal.

Fair Labor Standards Act Litigation. As described below, HP is involved in several lawsuits in which the plaintiffs are seeking unpaid overtime compensation and other damages based on allegations that various employees of EDS or HP have been misclassified as exempt employees under the Fair Labor Standards Act and/or in violation of the California Labor Code or other state laws:

Cunningham and Cunningham, et al. v. Electronic Data Systems Corporation is a purported collective action filed on May 10, 2006 in the U.S. District Court for the Southern District of New York claiming that current and former EDS employees involved in installing and/or maintaining computer software and hardware were misclassified as exempt employees. Two other purported collective actions, Steavens, et al. v. Electronic Data Systems Corporation, which was filed on October 23, 2007, and Azar v. Electronic Data Systems Corporation, which was filed on February 20, 2009, are also now pending in the same court alleging similar facts.

Heffelfinger, et al. v. Electronic Data Systems Corporation is a class action filed in November 2006 in California Superior Court claiming that certain EDS information technology workers in California were misclassified exempt employees. The case was subsequently transferred to the U.S. District Court for the Central District of California, which, on January 7, 2008, certified a class of information technology workers in California. On June 6, 2008, the court granted the defendant's motion for summary judgment. The plaintiffs subsequently filed an appeal with the U.S. Court of Appeals for the Ninth Circuit, which is pending. Two other purported class actions originally filed in California Superior Court, Karl bom, et al. v. Electronic Data Systems Corporation, which was filed on March 16, 2009, and George, et al. v. Electronic Data Systems Corporation, which was filed on April 2, 2009, allege similar facts. The Karl bom case is pending

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

(Unaudited)

Note 16: Litigation and Contingencies (Continued)

in the U.S. District Court for the Southern District of California, and the George case is pending in the U.S. District Court for the Southern District of New York.

The United States of America, ex rel. Norman Rille and Neal Roberts v. Hewlett-Packard Company, et al. In 2004, two private individuals filed a civil "qui tam" complaint under the False Claims Act in the United States District Court for the Eastern District of Arkansas containing generalized allegations that HP and several other companies participated in an industry-wide practice of using partnership and alliance programs to make improper payments and cause the submission of false claims in connection with contracts to provide products and services to the federal government. On April 12, 2007, the U.S. Department of Justice intervened in the *qui tam* action and filed a complaint against HP (and several other companies in separate actions) on behalf of the United States containing allegations that HP violated the False Claims Act and the Anti-Kickback Act of 1986 by providing millions of dollars in kickbacks to its alliance partners, including "influencer fees" and "new business opportunity rebates." The U.S. complaint further alleges that HP violated the False Claims Act and the Anti-Kickback Act, breached its federal government contracts, induced the federal government to make payments to HP that HP was not entitled to receive under those contracts, and was unjustly enriched by expressly or impliedly making false statements, records or certifications to the federal government that it complied with and would continue to comply with the Anti-Kickback Act and by submitting claims to the government that allegedly were inflated because they included the amounts of the influencer fees and new business opportunity rebates. The U.S. complaint seeks treble damages plus civil penalties in connection with the alleged violations of the False Claims Act, double damages plus civil penalties in connection with the alleged violations of the Anti-Kickback Act and disgorgement of profits earned in connection with the breach of contract and unjust enrichment claims.

Leak Investigation Proceedings. As described below, HP is or has been the subject of various governmental inquiries concerning the processes employed in an investigation into leaks of HP confidential information to members of the media that concluded in May 2006:

In August 2006, HP was informally contacted by the Attorney General of the State of California requesting information concerning the processes employed in the leak investigation. On December 7, 2006, HP announced that it entered into an agreement with the California Attorney General to resolve civil claims arising from the leak investigation, including a claim made by the California Attorney General in a Santa Clara County Superior Court action filed on December 7, 2006, that HP committed unfair business practices under California law in connection with the leak investigation. As a result of this agreement, which includes an injunction, the California Attorney General will not pursue civil claims against HP or its current and former directors, officers and employees. Under the terms of the agreement, HP paid a total of \$14.5 million and agreed to implement and maintain for five years a series of measures designed to ensure that HP's corporate investigations are conducted in accordance with California law and the company's high ethical standards. Of the \$14.5 million, \$13.5 million has been used to create a Privacy and Piracy Fund to assist California prosecutors in investigating and prosecuting consumer privacy and information piracy violations, \$650,000 was used to pay statutory damages and \$350,000 reimbursed the California Attorney General's office for its investigation costs. There was no finding of liability against HP as part of the settlement.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 16: Litigation and Contingencies (Continued)

Beginning in September 2006, HP received requests from the Committee on Energy and Commerce of the U.S. House of Representatives (the "Committee") for records and information concerning the leak investigation, securities transactions by HP officers and directors, including an August 25, 2006, securities transaction by Mark Hurd, HP's Chairman and Chief Executive Officer, and related matters. HP has responded to those requests. In addition, Mr. Hurd voluntarily gave testimony to the Committee regarding the leak investigation on September 28, 2006.

In September 2006, HP was informally contacted by the U.S. Attorney for the Northern District of California requesting similar information concerning the processes employed in the leak investigation. HP has responded to that request.

Beginning in September 2006, HP has received requests from the Division of Enforcement of the Securities and Exchange Commission for records and information and interviews with current and former HP directors and officers relating to the leak investigation, the resignation of Thomas J. Perkins from HP's Board of Directors, HP's May 22, 2006 and September 6, 2006 filings with the SEC on Form 8-K, stock repurchases by HP and securities transactions by its officers and directors that occurred between May 1 and October 1, 2006, and HP's policies, practices and approval of securities transactions. In May 2007, HP consented to the entry of an order by the SEC ordering HP to cease and desist from committing or causing violations of the public reporting requirements of the Securities Exchange Act of 1934, as amended. HP has been advised by the staff of the Division of Enforcement that the staff has completed its investigation and does not intend to recommend that any other SEC enforcement action be brought in connection with these matters.

In September 2006, HP received a request from the U.S. Federal Communications Commission for records and information relating to the processes employed in the leak investigation. HP has responded to that request.

In addition, four stockholder derivative lawsuits have been filed in California purportedly on behalf of HP stockholders seeking to recover damages for alleged breach of fiduciary duty and to require HP to improve its corporate governance and internal control procedures as a result of the activities of the leak investigation: *Staehr v. Dunn, et al.* was filed in Santa Clara County Superior Court on September 18, 2006; *Worsham v. Dunn, et al.* was filed in Santa Clara County Superior Court on September 14, 2006; *Tansey v. Dunn, et al.* was filed in Santa Clara County Superior Court on September 20, 2006; and *Hall v. Dunn, et al.* was filed in Santa Clara County Superior Court on September 25, 2006. On October 19, 2006, the Santa Clara County Superior Court consolidated the four California cases under the caption *In re Hewlett-Packard Company Derivative Litigation*. The consolidated complaint filed on November 19, 2006, also seeks to recover damages in connection with sales of HP stock alleged to have been made by certain current and former HP officers and directors while in possession of material non-public information. Two additional stockholder derivative lawsuits, *Pifko v. Babbio, et al.*, filed on September 19, 2006, and *Gross v. Babbio, et al.*, filed on November 21, 2006, were filed in Chancery Court, County of New Castle, Delaware; both seek to recover damages for alleged breaches of fiduciary duty and to obtain an order instructing the defendants to refrain from further breaches of fiduciary duty and to implement corrective measures that will prevent future occurrences of the alleged breaches of fiduciary duty. On January 24, 2007, the Delaware court

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 16: Litigation and Contingencies (Continued)

consolidated the two cases under the caption *In re Hewlett-Packard Company Derivative Litigation* and subsequently stayed the proceedings, as the parties had reached a tentative settlement. The HP Board of Directors appointed a Special Litigation Committee consisting of independent Board members authorized to investigate, review and evaluate the facts and circumstances asserted in these derivative matters and to determine how HP should proceed in these matters. On December 14, 2007, HP and the plaintiffs in the California and Delaware derivative actions entered into an agreement to settle those lawsuits. Under the terms of the settlement, HP agreed to continue certain corporate governance changes until December 31, 2012 and to pay the plaintiffs' attorneys' fees. The California court granted final approval to the settlement on March 11, 2008 and subsequently granted plaintiffs' counsel's fee application and dismissed the action. On June 12, 2008, the Delaware court granted final approval to the settlement and the plaintiffs' application for attorneys' fees and also dismissed the action. Because neither the dismissal of the California nor the Delaware derivative action was thereafter appealed, both cases are now concluded.

Environmental

HP is subject to various federal, state, local and foreign laws and regulations concerning environmental protection, including laws addressing the discharge of pollutants into the air and water, the management and disposal of hazardous substances and wastes, the cleanup of contaminated sites, the content of its products and the recycling, treatment and disposal of its products including batteries. In particular, HP faces increasing complexity in its product design and procurement operations as it adjusts to new and future requirements relating to the chemical and materials composition of its products, their safe use, the energy consumption associated with those products and product take-back legislation. HP could incur substantial costs, its products could be restricted from entering certain jurisdictions, and it could face other sanctions, if it were to violate or become liable under environmental laws or if its products become non-compliant with environmental laws. HP's potential exposure includes fines and civil or criminal sanctions, third-party property damage or personal injury claims and clean up costs. The amount and timing of costs under environmental laws are difficult to predict.

HP is party to, or otherwise involved in, proceedings brought by U.S. or state environmental agencies under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA"), known as "Superfund," or state laws similar to CERCLA. HP is also conducting environmental investigations or remediations at several current or former operating sites pursuant to administrative orders or consent agreements with state environmental agencies.

HP is also subject to legislation in an increasing number of jurisdictions that makes producers of electrical goods, including computers and printers, financially responsible for specified collection, recycling, treatment and disposal of past and future covered products (sometimes referred to as "product take-back legislation"). For example, the EU adopted the Waste Electrical and Electronic Equipment Directive in January 2003. That directive makes producers of electrical goods, including computers and printers, financially responsible for specified collection, recycling, treatment and disposal of past and future covered products. The EU member states were obliged to make producers participating in the market financially responsible for implementing these responsibilities.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 17: Segment Information

Description of Segments

HP is a leading global provider of products, technologies, software, solutions and services to individual consumers, small and medium sized businesses ("SMBs"), and large enterprises including customers in the government, health and education sectors. HP's offerings span personal computing and other access devices; imaging and printing-related products and services; enterprise information technology ("IT") infrastructure, including enterprise storage and server technology and networking products; software that optimizes business technology investments; financial services including leasing; and multi-vendor customer services, including technology support and maintenance, consulting and integration, information technology and business process outsourcing services and application services.

HP and its operations are organized into seven business segments for financial reporting purposes: Services, ESS, HP Software, PSG, IPG, HP Financial Services ("HPFS"), and Corporate Investments. HP's organizational structure is based on a number of factors that management uses to evaluate, view and run its business operations, which include, but are not limited to, customer base, homogeneity of products and technology. The business segments disclosed in the accompanying Consolidated Condensed Financial Statements are based on this organizational structure and information reviewed by HP's management to evaluate the business segment results. Services, ESS and HP Software are reported collectively as a broader HP Enterprise Business. In order to provide a supplementary view of HP's business, aggregated financial data for the HP Enterprise Business is presented herein.

HP has reclassified segment operating results for fiscal 2009 to conform to certain fiscal 2010 organizational realignments. None of the changes impacts HP's previously reported consolidated net revenue, earnings from operations, net earnings or net earnings per share. Future changes to this organizational structure may result in changes to the business segments disclosed.

A description of the types of products and services provided by each business segment follows.

HP Enterprise Business.

Each of the business segments within the HP Enterprise Business is described in detail below.

Services provides consulting, outsourcing and technology services across infrastructure, applications and business process domains. *Services* is divided into four main business units: infrastructure technology outsourcing, applications services, business process outsourcing and technology services. Infrastructure technology outsourcing delivers comprehensive services that encompass the data center and the workplace (desktop); network and communications; and security, compliance and business continuity. HP also offers a set of managed services, providing a cross-section of its broader infrastructure services for smaller discrete engagements. Applications services help clients revitalize and manage their applications assets through flexible, project-based, consulting services and longer-term outsourcing contracts. These full lifecycle services encompass application development, testing, modernization, system integration, maintenance and management. Business process outsourcing solutions include a broad array of enterprise shared services, customer relationship management services, financial process management services and administrative services. Technology services include consulting and support services, such as mission critical services, converged infrastructure services, networking

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 17: Segment Information (Continued)

services, data center transformation services and infrastructure services, as well as warranty support across HP's product lines.

Enterprise Storage and Servers provides storage and server products. The various server offerings range from entry-level servers to high-end scalable servers, including Superdome servers. Industry standard servers include primarily entry-level and mid-range ProLiant servers, which run primarily Windows⁽¹⁾, Linux and Novell operating systems and leverage Intel Corporation ("Intel") and Advanced Micro Devices ("AMD") processors. The business spans a range of product lines, including pedestal-tower servers, density-optimized rack servers and HP's BladeSystem family of server blades. Business critical systems include: Itanium⁽²⁾-based Integrity servers running on HP-UX, Windows®, Linux, OpenVMS and NonStop operating systems, including the high-end Superdome servers and fault-tolerant Integrity NonStop servers. Business critical systems also include the Reduced Instruction Set Computing ("RISC")-based servers with the HP 9000 line running on the HP-UX operating system, HP AlphaServers running on both Tru64 UNIX⁽³⁾ and OpenVMS, and MIPS-based NonStop servers. HP's StorageWorks offerings include entry-level, mid-range and high-end arrays, storage area networks ("SANs"), network attached storage ("NAS"), storage management software, and virtualization technologies, as well as tape drives, tape libraries and optical archival storage.

(1) Windows® is a registered trademark of Microsoft Corporation.

(2) Itanium® is a registered trademark of Intel Corporation.

(3) UNIX® is a registered trademark of The Open Group.

HP Software provides enterprise software and services. Enterprise IT management products and services, which are marketed as HP's business technology optimization (BTO) portfolio, help customers to manage IT infrastructure and services, operations, applications, and business processes and to automate data center operations and IT processes. Solutions are delivered in the form of traditional software licenses and, in some cases, via a software-as-a-service (SaaS) distribution model. Other software includes information management, business intelligence, and communications and media solutions. Our information management products and services automate the retention, management, search and segregation of information across the enterprise. Business intelligence solutions enable businesses to standardize on consistent data management schemes, connect and share data across the enterprise and apply analytics. Communications and media solutions enable service providers, media companies, and network equipment providers to create, deliver, and manage consumer and enterprise communications services.

HP's other business segments are described below.

Personal Systems Group provides commercial PCs, consumer PCs, workstations, handheld computing devices, calculators and other related accessories, software and services for the commercial and consumer markets. Commercial PCs are optimized for commercial uses, including enterprise and SMB customers, and for connectivity and manageability in networked environments. Commercial PCs include the HP Compaq, HP Pro, and HP Elite lines of business desktops and notebooks, as well as the Touchsmart PC, All in One PC, HP Mini-Note PC, HP

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 17: Segment Information (Continued)

Blade PCs, Retail POS systems, and HP Thin Clients. Consumer PCs are targeted at the home user and include the HP Pavilion and Compaq Presario series of multi media consumer desktops and notebooks, as well as the HP Pavilion Elite desktops, HP Envy Premium notebooks, Touchsmart PCs, All in One PC, HP and Compaq Mini notebooks, and the Media Smart Home Server. HP's Z series desktop workstations and HP Elitebook Mobile Workstations provide advanced graphics, computing, and large modeling capabilities, certified with applications in a wide range of industries and running both Windows® and Linux operating systems. PSG provides a series of HP iPAQ Pocket PC handheld computing devices that run on Windows® Mobile software. These products range from basic PDAs to advanced devices with voice and data capability.

Imaging and Printing Group provides consumer and commercial printer hardware, printing supplies, printing media and scanning devices. IPG is also focused on imaging solutions in the commercial markets. These solutions range from managed print services solutions to addressing new growth opportunities in commercial printing and capturing high-value pages in areas such as industrial applications, outdoor signage, and the graphic arts business. Inkjet and Web Solutions delivers HP's consumer and SMB inkjet solutions (hardware, supplies, media) and develops HP's retail and web businesses. It includes single function and all-in-one inkjet printers targeted toward consumers and SMBs as well as retail publishing solutions, Snapfish, and Logoworks. LaserJet and Enterprise Solutions delivers products and services to the enterprise segment. It includes LaserJet printers and supplies, multi-function printers, scanners, and enterprise software solutions such as Exstream Software and Web Jetadmin. Graphics solutions include large format printing (Designjet and Scitex), large format supplies, WebPress supplies, Indigo printing, specialty printing systems and inkjet high-speed production solutions. Printer supplies include LaserJet toner and inkjet printer cartridges and other printing-related media.

HP Financial Services supports and enhances HP's global product and services solutions, providing a broad range of value-added financial life-cycle management services. HPFS enables HP's worldwide customers to acquire complete IT solutions, including hardware, software and services. HPFS offers leasing, financing, utility programs, and asset recovery services, as well as financial asset management services, for large global and enterprise customers. HPFS also provides an array of specialized financial services to SMBs and educational and governmental entities. HPFS offers innovative, customized and flexible alternatives to balance unique customer cash flow, technology obsolescence and capacity needs.

Corporate Investments includes HP Labs and certain business incubation projects. Revenue in this segment is attributable to the sale of certain network infrastructure products, including Ethernet switch products that enhance computing and enterprise solutions sold under the brand "ProCurve Networking," as well as the sale of certain video collaboration products sold under the brand "Halo".

Segment Data

HP derives the results of the business segments directly from its internal management reporting system. The accounting policies HP uses to derive business segment results are substantially the same as those the consolidated company uses. Management measures the performance of each business

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements (Continued)

(Unaudited)

Note 17: Segment Information (Continued)

segment based on several metrics, including earnings from operations. Management uses these results, in part, to evaluate the performance of, and to assign resources to, each of the business segments. HP does not allocate to its business segments certain operating expenses, which it manages separately at the corporate level. These unallocated costs include primarily amortization of purchased intangible assets, stock-based compensation expense related to HP-granted employee stock options, PRUs and the employee stock purchase plan, certain acquisition-related charges and charges for purchased IPR&D, as well as certain corporate governance costs.

HP does not allocate to its business segments restructuring charges and any associated adjustments related to restructuring actions.

Selected operating results information for each business segment was as follows:

	Three months ended January 31			
	Net Revenue		Earnings (Loss) from Operations	
	2010	2009 ⁽¹⁾	2010	2009 ⁽¹⁾
	In millions			
Services	\$ 8,651	\$ 8,747	\$ 1,364	\$ 1,124
Enterprise Storage and Servers	4,391	3,949	552	406
HP Software	878	878	167	140
HP Enterprise Business	13,920	13,574	2,083	1,670
Personal Systems Group	10,584	8,792	530	436
Imaging and Printing Group	6,206	5,981	1,054	1,105
HP Financial Services	719	636	67	41
Corporate Investments	236	196	19	(19)
Segment total	\$ 31,665	\$ 29,179	\$ 3,753	\$ 3,233

(1) As a result of HP's adoption in fiscal 2009 of the revenue recognition standards related to multiple-deliverable revenue arrangements and revenue arrangements that included software, certain previously reported segment and business unit results have been restated. The adoption primarily impacted the Services, Enterprise Storage and Servers and Personal Systems Group financial reporting segments.

- (1) Certain fiscal 2010 organizational reclassifications have been reflected retroactively to provide improved visibility and comparability. For each of the quarters in fiscal year 2009, the reclassifications resulted in the transfer of revenue among the business units within the Services segment only. There was no impact to the previously reported segment financial results.
- (2) As a result of HP's adoption in fiscal 2009 of the revenue recognition standards related to multiple-deliverable revenue arrangements and revenue arrangements that included software, certain previously reported segment and business unit results have been restated. The adoption primarily impacted the Services, Enterprise Storage and Servers and Personal Systems Group financial reporting segments.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

HEWLETT-PACKARD COMPANY AND SUBSIDIARIES

**Management's Discussion and Analysis of
Financial Condition and Results of Operations**

The following discussion should be read in conjunction with the Consolidated Condensed Financial Statements and the related notes that appear elsewhere in this document.

OVERVIEW

We are a leading global provider of products, technologies, software, solutions and services to individual consumers, small- and medium-sized businesses, and large enterprises, including customers in the government, health and education sectors. Our offerings span:

multi-vendor customer services, including infrastructure technology and business process outsourcing, technology support and maintenance, application development and support services, and consulting and integration services;

enterprise information technology infrastructure, including enterprise storage and server technology, networking products and resources, and software that optimizes business technology investments;

personal computing and other access devices; and

imaging and printing-related products and services.

We have seven business segments for financial reporting purposes: Services, Enterprise Storage and Servers ("ESS"), HP Software, the Personal Systems Group ("PSG"), the Imaging and Printing Group ("IPG"), HP Financial Services ("HPFS"), and Corporate Investments. Services, ESS and HP Software are reported collectively as a broader HP Enterprise Business. While the HP Enterprise Business is not an operating segment, we sometimes provide financial data aggregating the segments within it in order to provide a supplementary view of our business.

Our strategy and operations are currently focused on the following initiatives:

Competitive Positioning

We are positioning our businesses to take advantage of important trends in the markets for our products and services. For example, we are aligning our printing business to capitalize on key market trends such as the shift from analog to digital printing and the growth in printable content by developing innovative products for consumers such as the first web-connected home printer, working to enable web and mobile printing, expanding our presence in high-usage annuity businesses including graphics and retail publishing printing, and growing our managed print services business. We are also positioning our enterprise business to capitalize on the trend towards converged infrastructure products that integrate storage, networking, servers and management software. In addition, we have developed IT management software offerings that seek to satisfy the increasing demand for virtualization management and increased automation.

Driving Operational Efficiency

We have implemented an ongoing program to optimize efficiency and reduce cost across the company. As part of those efforts, we are continuing to execute on our multi-year program to consolidate real estate locations worldwide to fewer core sites in order to reduce our IT spending and real estate costs. In addition, we are continuing to implement the restructuring plan announced in the

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

fourth quarter of fiscal 2008 to optimize the cost structure of our Services business and the restructuring plan announced in May 2009 to structurally change and improve the effectiveness of several of our product businesses. See Note 7 to the Consolidated Condensed Financial Statements in Item 1 for further discussion of these restructuring plans and the associated restructuring charges.

Investing for Growth

We are investing some of the savings derived from our efficiency initiatives for growth. For example, we are increasing our sales coverage to better address the market that we cover, including further expansion in emerging markets such as China, India and Brazil. We are creating innovative new products and developing new channels to connect with our customers, particularly in our PC business. In addition, we are expanding our portfolio of products and services that we can offer to our customers, both through acquisitions and through organic growth. A critical component of this strategy was our acquisition of Electronic Data Systems Corporation ("EDS") in August 2008, which has increased the size and breadth of our services business and enabled us to provide comprehensive IT product and services solutions to our customers.

In November 2009, we entered into a definitive agreement to acquire 3Com Corporation, a global enterprise provider of networking switching, routing and security solutions, at a price of \$7.90 per share in cash or an enterprise value of approximately \$2.7 billion. The acquisition has received clearance from U.S. and European Union regulatory authorities and the approval of 3Com's stockholders. The closing of the acquisition is subject to certain closing conditions, including obtaining requisite approvals on clearances under certain antitrust or competition laws. The transaction is expected to close in our second fiscal quarter of 2010.

Leveraging our Portfolio and Scale

We now offer one of the IT industry's broadest portfolios of products and services, and we are working to leverage that portfolio as a strategic advantage. For example, in our enterprise business, we are able to provide servers, storage and networking packaged with services that can be delivered to customers in the manner of their choosing, be it in-house, outsourced or as a service via the Internet. Our portfolio of management software completes the package by allowing our customers to manage their IT operations in an efficient and cost-effective manner. In addition, we are working to optimize our supply chain by eliminating complexity, reducing fixed costs, and leveraging our scale to ensure the availability of components at favorable prices even during shortages. We are also expanding our use of industry standard components in our enterprise products to further leverage our scale.

The following provides an overview of our key financial metrics in the first quarter of fiscal 2010 and demonstrates how our execution of these initiatives has translated into financial performance:

	HP Enterprise Business								
	HP	HP							
	Consolidated	Services	ESS	Software	Total	PSG	IPG	HPFS	
	In millions, except per share amounts								
Net revenue	\$ 31,177	\$ 8,651	\$ 4,391	\$ 878	\$ 13,920	\$ 10,584	\$ 6,206	\$ 719	
Year-over-year net revenue % increase (decrease)		8.2%	(1.1)%	11.2%		2.5%	20.4%	3.8%	13.1%
Earnings from operations	\$ 3,003	\$ 1,364	\$ 552	\$ 167	\$ 2,083	\$ 530	\$ 1,054	\$ 67	
Earnings from operations as a % of net revenue		9.6%	15.8%	12.6%	19.0%	15.0%	5.0%	17.0%	9.3%
Net earnings	\$ 2,250								
Net earnings per share									
Basic	\$ 0.95								
Diluted	\$ 0.93								

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

Cash and cash equivalents at January 31, 2010 totaled \$13.5 billion, an increase of \$0.2 billion from the October 31, 2009 balance of \$13.3 billion. The increase for the first three months of fiscal 2010 was due primarily to \$2.4 billion of cash provided from operations and \$1.3 billion of proceeds from the issuance of common stock under employee stock plans, which were partially offset by \$2.7 billion of cash used to repurchase common stock and \$0.7 billion net investment in property, plant and equipment.

We intend the discussion of our financial condition and results of operations that follows to provide information that will assist in understanding our Consolidated Condensed Financial Statements, the changes in certain key items in those financial statements from year to year, and the primary factors that accounted for those changes, as well as how certain accounting principles, policies and estimates affect our Consolidated Condensed Financial Statements.

The discussion of results of operations at the consolidated level is followed by a more detailed discussion of results of operations by segment.

For a further discussion of trends, uncertainties and other factors that could impact our operating results, see the section entitled "Factors That Could Affect Future Results."

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Management's Discussion and Analysis of Financial Condition and Results of Operations is based upon our Consolidated Condensed Financial Statements, which we have prepared in accordance with U.S. generally accepted accounting principles ("GAAP"). The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Management bases its estimates on historical experience and on various other assumptions that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Senior management has discussed the development, selection and disclosure of significant estimates with the Audit Committee of our Board of Directors. Actual results may differ from these estimates under different assumptions or conditions.

An accounting policy is deemed to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, if different estimates reasonably could have been used, or if changes in the estimate that are reasonably likely to occur could materially impact the financial statements. Management believes that there have been no significant changes during the three months ended January 31, 2010 to the items that we disclosed as our critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009.

ACCOUNTING PRONOUNCEMENTS

The following is a summary of certain accounting pronouncements with application to our consolidated financial statements in future periods.

In December 2007, the Financial Accounting Standards Board ("FASB") issued a new accounting standard related to business combinations that expands the definition of a "business" and a "business combination"; requires recognition of assets acquired, liabilities assumed, and contingent consideration at their fair value on the acquisition date with subsequent changes recognized in earnings; requires acquisition-related expenses and restructuring costs to be recognized separately from the business combination and expensed as incurred; requires in-process research and development to be capitalized at fair value as an indefinite-lived intangible asset; and requires that changes in accounting for deferred

tax asset valuation allowances and acquired income tax uncertainties after the measurement period be recognized as a component of provision for taxes. The standard also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. In November 2008, the FASB issued a new accounting standard related to defensive intangible assets. Defensive intangible assets are acquired intangible assets that the acquirer does not intend to actively use but intends to hold to prevent its competitors from obtaining access to them. Under this standard, defensive intangible assets must be initially recognized at fair value and amortized over the benefit period. In April 2009, the FASB issued an accounting standard which clarified the accounting for pre-acquisition contingencies. We adopted all of these standards in the first quarter of fiscal 2010, and there was no material impact on our consolidated condensed financial statements during or at the end of that period. The impact on future periods will depend on the size and nature of the business combinations completed in those periods.

In December 2008, the FASB issued a new accounting standard that requires additional disclosures about assets held in an employer's defined benefit pension or other postretirement plan. We will adopt this new accounting standard effective October 31, 2010. We will present the required disclosures in the prescribed format on a prospective basis upon adoption. This new standard will only affect the notes to our consolidated financial statements.

In June 2009, the FASB issued a new accounting standard related to the consolidation of variable interest entities. The standard eliminates the quantitative approach previously required for determining the primary beneficiary of a variable interest entity and requires ongoing qualitative reassessments of whether an enterprise is the primary beneficiary of a variable interest entity. This new standard also requires additional disclosures about an enterprise's involvement in variable interest entities. We will adopt this new accounting standard in the first quarter of fiscal 2011. We are continuing to evaluate the impact the adoption of this standard will have on our consolidated financial statements.

CONSTANT CURRENCY PRESENTATION

Revenue from our international operations has historically represented, and we expect will continue to represent, a majority of our overall net revenue. As a result, our revenue growth has been impacted, and we expect will continue to be impacted, by fluctuations in foreign currency exchange rates. In order to provide a framework for assessing how each of our business segments performed excluding the impact of foreign currency fluctuations, we present the year-over-year percentage change in revenue performance on a constant currency basis, which assumes no change in the exchange rate from the prior-year period. This constant currency disclosure is provided in addition to, and not as a substitute for, the year-over-year percentage change in revenue on an as-reported basis.

RESULTS OF OPERATIONS

Results of operations in dollars and as a percentage of net revenue were as follows:

	Three months ended January 31			
	2010		2009	
	In millions			
Net revenue	\$ 31,177	100.0%	\$ 28,807	100.0%
Cost of sales ⁽¹⁾	24,062	77.2%	22,073	76.6%
Gross profit	7,115	22.8%	6,734	23.4%
Research and development	681	2.2%	732	2.5%
Selling, general and administrative	2,932	9.4%	2,893	10.1%
Amortization of purchased intangible assets	330	1.1%	412	1.4%
In-process research and development charges			6	
Restructuring charges	131	0.4%	146	0.5%
Acquisition-related charges	38	0.1%	48	0.2%
Earnings from operations	3,003	9.6%	2,497	8.7%
Interest and other, net	(199)	(0.6)%	(232)	(0.8)%
Earnings before taxes	2,804	9.0%	2,265	7.9%
Provision for taxes	554	1.8%	409	1.5%
Net earnings	\$ 2,250	7.2%	\$ 1,856	6.4%

(1) Cost of products, cost of services and financing interest.

Net Revenue

The components of the weighted net revenue change from the prior-year period were as follows:

	Three months ended	
	January 31, 2010	
	Percentage Points	
Personal Systems Group	6.2	
Enterprise Storage and Servers	1.5	
Imaging and Printing Group	0.8	
HP Financial Services	0.3	
HP Software		
Services	(0.3)	
Corporate Investments/Other	(0.3)	
Total HP	8.2	

For the three months ended January 31, 2010, net revenue increased 8.2% from the prior-year period (5.4% on a constant currency basis). The PSG segment was the largest contributor to HP net revenue growth as a result of balanced growth across each of the PSG product categories with particular strength in consumer demand. U.S. net revenue increased 7.8% to \$10.9 billion for the first quarter of fiscal 2010 as compared to the prior-year period, while net revenue from outside of the United States increased 8.4% to \$20.3 billion.

The PSG net revenue increase for the three months ended January 31, 2010 was primarily the result of a recovering U.S. PC market, combined with continued strength in China and other emerging markets. PSG unit volumes and net revenue increased across all business units except in our handhells

business unit. Offsetting net revenue performance was a decline in average selling prices (ASPs) as a result of competitive pricing pressures.

ESS net revenue increased for the three months ended January 31, 2010 driven by volume growth in our industry standard servers ("ISS") business unit in part as a result of the latest generation of ISS products. Net revenue declined in the storage and business critical systems business units.

IPG net revenue increased for the three months ended January 31, 2010 in the commercial and consumer hardware business units and the supplies business unit. Both the consumer and commercial hardware business units experienced unit volume increases in response to improved printer market demand.

HPFS net revenue increased for the three months ended January 31, 2010 due primarily to portfolio growth and favorable currency movements, the effect of which was partially offset by lower levels of remarketing sales and buyout activities.

HP Software net revenue growth was flat for the three months ended January 31, 2010 due primarily to continued softness in enterprise spending. Revenue from licenses and support increased, the effect of which was offset by a decrease in services revenue.

The net revenue decrease in Services for the three months ended January 31, 2010 was due primarily to net revenue declines in the application services, technology services and business process outsourcing business units. Those declines were due primarily to weak market conditions, reduced demand for technology support services as a result of reduced sales of enterprise hardware in the prior-year period, and existing contract completion. Net revenue in infrastructure technology outsourcing increased due to favorable currency impacts and new business.

Net revenue in Corporate Investments and Other increased for the three months ended January 31, 2010, primarily resulting from increased sales of network infrastructure products.

Gross Margin

Total HP gross margin decreased by 0.6 percentage points for the three months ended January 31, 2010 as compared to the prior-year period. This decline was a result of strong growth in personal computer and printer hardware revenues that have lower gross margins, the effect of which was partially offset by cost improvements in services.

PSG gross margin declined for the three months ended January 31, 2010 primarily as a result of ASPs declining at a faster pace than component costs combined with a mix shift towards lower-end products.

For the three months ended January 31, 2010, IPG gross margin declined due primarily to the unfavorable impact of a mix shift from higher-margin supplies to lower-margin hardware products, the effect of which was partially offset by improvements in commercial hardware margins.

ESS gross margin decreased for the three months ended January 31, 2010 due primarily to product mix shifts, the effect of which was partially offset by the benefits from lower product unit costs and favorable currency impacts.

For the three months ended January 31, 2010, HP Software gross margin increased slightly due primarily to a stronger support revenue mix.

The gross margin in Corporate Investments and Other increased for the three months ended January 31, 2010 primarily as a result of lower product costs for our network infrastructure products.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

The gross margin in our Services segment increased for the three months ended January 31, 2010 due primarily to the continued focus on cost structure improvements, including delivery efficiencies and cost controls in our technology services business, and EDS-related acquisition synergies.

HPFS gross margin increased for the three months ended January 31, 2010 primarily as a result of higher portfolio margins due to favorable financing conditions and improved interest rates for rollover debts.

Operating Expenses

Research and Development

Total research and development ("R&D") expense decreased for the three months ended January 31, 2010 as compared to the prior-year period, due primarily to continued cost controls and efficiencies as we lowered structural costs. R&D expense as a percentage of net revenue decreased for ESS, HP Software, IPG, PSG and Corporate Investments, and increased for Services for the three months ended January 31, 2010.

Selling, General and Administrative

Selling, general and administrative ("SG&A") expense increased for the three months ended January 31, 2010 as compared to the prior-year period due primarily to higher field selling and marketing costs as a result of our investments in sales resources to improve revenue. SG&A expense as a percentage of net revenue decreased for each of our segments except for IPG for the three months ended January 31, 2010.

Amortization of Purchased Intangible Assets

The decrease in amortization expense for the three months ended January 31, 2010 as compared to the prior-year period was due primarily to certain intangible assets associated with prior acquisitions reaching the end of their amortization periods.

Restructuring Charges

Restructuring charges for the three months ended January 31, 2010 were \$131 million. These charges included \$130 million of severance and facility costs related to our fiscal 2008 restructuring plan and \$1 million of severance costs associated with our fiscal 2009 restructuring plan.

Restructuring charges for the three months ended January 31, 2009 were \$146 million, which included \$150 million for severance and facility costs related to the fiscal 2008 restructuring plan and a reduction of \$4 million related to adjustments to prior fiscal year plans.

In addition to restructuring charges, as part of our ongoing business operations we incurred workforce rebalancing charges for severance and related costs within certain business segments during the first quarter of fiscal 2010. Workforce rebalancing activities are considered part of normal operations as we continue to optimize our cost structure. Workforce rebalancing costs are included in our business segment results, and we expect to incur additional workforce rebalancing costs in the future.

Acquisition-related Charges

For the three months ended January 31, 2010 and 2009, we recorded acquisition-related charges of \$38 million and \$48 million, respectively, primarily for consulting and integration costs as well as retention bonuses associated with the EDS acquisition.

Interest and Other, Net

Interest and other, net improved by \$33 million for the three months ended January 31, 2010 as compared to the prior-year period. The improvement was driven primarily by lower currency losses on balance sheet remeasurement items and lower interest expenses due to lower average debt balances, the effect of which was partially offset by an increase to our litigation reserves and lower interest income as a result of lower interest rates.

Provision for Taxes

Our effective tax rate was 19.8% and 18.0% for the three months ended January 31, 2010 and January 31, 2009, respectively. Our effective tax rate increased due to a decline in the percentage of total earnings earned in lower-tax jurisdictions and a decline in our discrete tax benefits relative to pretax earnings. Our effective tax rate generally differs from the U.S. federal statutory rate of 35% due to favorable tax rates associated with certain earnings from our operations in lower-tax jurisdictions throughout the world. We have not provided U.S. taxes for all of such earnings because we plan to reinvest some of those earnings indefinitely outside the United States.

In the three months ended January 31, 2010, we recorded discrete items with a net tax benefit of \$92 million, decreasing the effective tax rate. These amounts included net tax benefits of \$54 million from restructuring and acquisition charges, a tax benefit of \$19 million from settlement of a tax audit matter, a net tax benefit of \$19 million from adjustments to prior year foreign income tax accruals and credits, and other miscellaneous discrete items.

In the three months ended January 31, 2009, we recorded discrete items with a net tax benefit of \$91 million, decreasing the effective tax rate. These amounts included net tax benefits of \$63 million from restructuring and acquisition charges and other miscellaneous discrete items resulting in a net tax benefit of \$28 million.

Segment Information

A description of the products and services for each segment can be found in Note 17 to the Consolidated Condensed Financial Statements. Future changes to this organizational structure may result in changes to the business segments disclosed.

HP Enterprise Business

Services, ESS and HP Software are reported collectively as a broader HP Enterprise Business. We describe the results of the business segments of the HP Enterprise Business in more detail below.

Services

At the beginning of fiscal 2010, we realigned our Services business units to better align them to our enhanced services portfolio and to future growth opportunities. As a result, the U.S. public sector business, previously part of the technology services business, was moved to the infrastructure technology outsourcing business. In addition, part of the hardware maintenance business that originally reported

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

into our infrastructure technology outsourcing business was moved into our technology services business in order to better leverage our integrated service structure.

	Three months ended January 31		
	2010	2009	% Increase (Decrease)
	In millions		
Net revenue	\$ 8,651	\$ 8,747	(1.1)%
Earnings from operations	\$ 1,364	\$ 1,124	21.4%
Earnings from operations as a % of net revenue	15.8%	12.9%	

The components of the weighted net revenue change as compared to the prior-year period by business unit were as follows:

	Three months ended January 31, 2010 Percentage Points
Application services	(1.4)
Technology services	(0.5)
Business process outsourcing	(0.2)
Infrastructure technology outsourcing	1.0
Total Services	(1.1)

Services net revenue decreased 1.1% (5.8% when adjusted for currency) for the three months ended January 31, 2010 as compared to the same period in fiscal 2009. The revenue decline was due primarily to weak market conditions and existing contract completion, the effect of which was partially offset by new client business. Net revenue in application services declined by 8% due primarily to market weakness and existing contract completion. Net revenue in technology services declined by 2% due primarily to reduced demand for technology support services as a result of reduced sales of enterprise hardware in the prior-year period and market weakness in the current-year period, the effect of which was partially offset by growth in consulting services and a favorable currency impact. Net revenue in business process outsourcing decreased by 3% due primarily to weak economic conditions in certain industries with key clients. Net revenue in infrastructure technology outsourcing increased by 2% due to favorable currency impacts and new business, the effect of which was partially offset by existing contract completion and contractual price reductions.

Services earnings from operations as a percentage of net revenue increased by 2.9 percentage points in the three months ended January 31, 2010 as compared to the same period in fiscal 2009. The operating margin increased due primarily to an increase in gross margin along with a decrease in operating expenses. The gross margin in our Services segment increased for the three months ended January 31, 2010, as compared to the same period in fiscal 2009 due primarily to continued focus on cost structure improvements, including delivery efficiencies and cost controls in our technology services business, and EDS-related acquisition synergies. Operating expense declined as a result of a continued focus on cost structure improvements from overall cost controls.

Enterprise Storage and Servers

	Three months ended January 31		
	2010	2009	% Increase
	In millions		
Net revenue	\$ 4,391	\$ 3,949	11.2%
Earnings from operations	\$ 552	\$ 406	36.0%
Earnings from operations as a % of net revenue	12.6%	10.3%	

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

The components of the weighted net revenue change as compared to the prior-year period by business unit were as follows:

Three months ended January 31, 2010	
Percentage Points	
Industry standard servers	15.8
Storage	(0.6)
Business critical systems	(4.0)
 Total ESS	 11.2

ESS net revenue increased 11.2% (7.8% when adjusted for currency) for the three months ended January 31, 2010 as compared to the same period in fiscal 2009. ISS net revenue increased 27% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009 driven primarily by strong unit volume coupled with increased average unit prices as a result of the performance of the latest generation of ISS products. Total ESS blades revenue increased 24% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009. Storage net revenue declined 3% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009 due to continued market weakness and a decline in tape and storage networking, the effect of which was partially offset by growth in entry-level storage and products related to our acquisition of Lefthand Networks. Business critical systems net revenue decreased 22% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009 due primarily to weaker market conditions, competitive pressures and the planned phase-out of the PA-RISC server line.

ESS earnings from operations as a percentage of net revenue increased by 2.3 percentage points for the three months ended January 31, 2010 as compared to the same period in fiscal 2009 due to a decrease in operating expenses as a percentage of net revenue resulting from operating leverage benefits from increased volume and cost controls. The favorable effect on operating margin from lower operating expenses as a percentage of net revenue was partially offset by a decline in gross margin in the first quarter of fiscal 2010 due primarily to product mix shifts, the effect of which was partially offset by the benefits from lower product unit costs and favorable currency impacts.

HP Software

	Three months ended January 31		
	2010	2009	% Increase
	In millions		
Net revenue	\$ 878	\$ 878	%
Earnings from operations	\$ 167	\$ 140	19.3%
Earnings from operations as a % of net revenue	19.0%	15.9%	

HP Software net revenue growth was flat (decreased 3.5% when adjusted for currency) for the three months ended January 31, 2010 as compared to the same period in fiscal 2009 due to continued softness in enterprise spending. Revenue from licenses and support increased, the effect of which was offset by a decrease in services revenue. Net revenue from business technology optimization decreased 1% for the first quarter of fiscal 2010 as compared to the prior-year period due to market demand weakness. Net revenue from other software increased 1% for the first quarter of fiscal 2010 from the corresponding prior-year period due to increased revenue for information management, the effect of which was partially offset by a decline in revenue from communication and media solutions. Revenue for business intelligence solutions was flat as compared to the prior-year period.

HP Software earnings from operations as a percentage of net revenue increased by 3.1 percentage points for the three months ended January 31, 2010 as compared to the same period in fiscal 2009. The

operating margin improvement was due primarily to a decrease in operating expenses as a percentage of net revenue coupled with a slight increase in gross margin resulting primarily from stronger support revenue mix. The decrease in operating expenses as a percentage of net revenue in the first quarter of fiscal 2010 was due primarily to lower field selling costs as a result of operational efficiencies and increasing sales productivity, as well as improved R&D costs driven by site consolidation synergies and alignment to lower cost regions.

Personal Systems Group

	Three months ended January 31		
	2010	2009	% Increase
	In millions		
Net revenue	\$ 10,584	\$ 8,792	20.4%
Earnings from operations	\$ 530	\$ 436	21.6%
Earnings from operations as a % of net revenue	5.0%	5.0%	

The components of the weighted net revenue change as compared to the prior-year period by business unit were as follows:

	Three months ended January 31, 2010 Percentage Points
Notebook PCs	13.8
Desktop PCs	6.1
Workstations	0.5
Other	0.4
Handhelds	(0.4)
Total PSG	20.4

PSG net revenue increased 20.4% (17.5% when adjusted for currency) for the three months ended January 31, 2010 as compared to the same period in fiscal 2009. The revenue increase was the result of a recovering U.S. PC market combined with continued strength in China and other emerging markets. PSG unit volume and net revenue increased across all business units except the handhelds business unit for the first quarter of fiscal 2010. The unit volume increase in notebook PCs was due in part to growth of the HP and Compaq mini notebooks. For the first quarter of fiscal 2010, net revenue for notebook PCs increased 25%, while net revenue for desktop PCs increased 16% from the prior-year period. Workstations revenue increased 13% while handhelds revenue declined 56% from the prior-year period. Net revenue for consumer clients increased 26% while net revenue for commercial clients increased 16% from the prior-year period. The net revenue increase in Other PSG was related primarily to increased sales of third-party options, support services and extended warranties. PSG net revenue was also impacted by ASP declines. ASPs in consumer clients declined 8% while ASPs in commercial clients increased slightly. ASPs declined from the prior-year period due primarily to a competitive pricing environment combined with a mix shift toward lower-end models. The ASP decline was offset slightly by an increase in the option and monitor attach rates.

PSG earnings from operations as a percentage of net revenue for the three months ended January 31, 2010 were 5.0%, which was consistent with the percentage reported in the prior-year period. PSG earnings from operations were impacted by a gross margin decline resulting from ASPs declining at a faster pace than component costs combined with a mix shift towards lower-end products, the effects of which were partially offset by lower supply chain and warranty costs and improvements in the option attach business. Offsetting the decline in gross margin was a decrease in operating expenses

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

as a percentage of net revenue primarily due to continued effective cost controls and operating leverage benefits from increased volume.

Imaging and Printing Group

	Three months ended January 31		
	2010	2009	% Increase (Decrease)
In millions			
Net revenue	\$ 6,206	\$ 5,981	3.8%
Earnings from operations	\$ 1,054	\$ 1,105	(4.6)%
Earnings from operations as a % of net revenue	17.0%	18.5%	

The components of the weighted net revenue change as compared to the prior-year period by business unit were as follows:

	Three months ended January 31, 2010
	Percentage Points
Consumer hardware	2.4
Commercial hardware	0.9
Supplies	0.5
 Total IPG	 3.8

IPG net revenue increased 3.8% (4.4% when adjusted for currency) for the three months ended January 31, 2010 as compared to the same period in fiscal 2009 reflecting an improvement in market conditions. Net revenue for consumer hardware increased 21% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009. The net revenue increase in consumer hardware was driven by unit volume growth of 18% in the first quarter of fiscal 2010 from the corresponding period in fiscal 2009. Net revenue for commercial hardware increased 4% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009. The net revenue increase in commercial hardware was driven primarily by unit volume growth of 11% in the first quarter of fiscal 2010 from the corresponding period in fiscal 2009. Supplies net revenue increased 1% in the first quarter of fiscal 2010 as compared to the same period in fiscal 2009.

IPG earnings from operations as a percentage of net revenue decreased by 1.5 percentage points for the three months ended January 31, 2010 as compared to the same period in fiscal 2009. The operating margin decline in the first quarter of fiscal 2010 was due primarily to a decrease in gross margin, the effect of which was partially offset by a slight decrease in operating expenses as a percentage of net revenue. The decline in gross margin in the first quarter of fiscal 2010 was due primarily to an unfavorable mix shift from higher-margin supplies towards lower-margin hardware products, the effect of which was partially offset by margin improvements primarily in commercial hardware. The slight decrease in operating expense as a percentage of net revenue in the first quarter of fiscal 2010 was due primarily to continued cost management.

HP Financial Services

	Three months ended January 31		
	2010	2009	% Increase
In millions			
Net revenue	\$ 719	\$ 636	13.1%
Earnings from operations	\$ 67	\$ 41	63.4%
Earnings from operations as a % of net revenue	9.3%	6.4%	

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

For the three months ended January 31, 2010, HPFS net revenue increased by 13.1% as compared to the same period in fiscal 2009. The net revenue increase was due primarily to portfolio growth combined with favorable currency movements, the effect of which was partially offset by lower levels of remarketing sales and buyout activities.

For the three months ended January 31, 2010, the 2.9 percentage point increase in earnings from operations as a percentage of net revenue was the result of a decrease in operating expenses as a percentage of net revenue and an increase in gross margin. The decrease in operating expenses as a percentage of net revenue was the result of continued cost controls while growing assets and revenue. The gross margin increase was due primarily to higher portfolio margins due to favorable financing conditions and improved interest rates for rollover debts, which was partially offset by lower margins associated with remarketing activity, buyout and end-of-lease activity.

Financing Originations

	Three months ended	
	January 31	
	2010	2009
	In millions	
Total financing originations	\$ 1,403	\$ 1,078

New financing originations, which represent the amounts of financing provided to customers for equipment and related software and services and include intercompany activity, increased 30% in the first quarter of fiscal 2010 compared to the same period in fiscal 2009. The increase was driven by higher financing associated with HP product sales resulting from improved integration and engagement with HP's sales efforts and a favorable currency impact.

Portfolio Assets and Ratios

HPFS maintains a strategy to generate a competitive return on equity by effectively leveraging its portfolio against the risks associated with interest rates and credit. The HPFS business model is asset-intensive and uses certain internal metrics to measure its performance against other financial services companies, including a segment balance sheet that is derived from our internal management reporting system. The accounting policies used to derive these amounts are substantially the same as those used by the consolidated company. However, certain intercompany loans and accounts that are reflected in the segment balances are eliminated in our Consolidated Condensed Financial Statements.

The portfolio assets and ratios derived from the segment balance sheet for HPFS were as follows:

	January 31,	October 31,
	2010	2009
	In millions	
Portfolio assets ⁽¹⁾	\$ 10,180	\$ 10,017
Allowance for doubtful accounts ⁽²⁾	102	108
Operating lease equipment reserve	65	71
Total reserves	167	179
Net portfolio assets	\$ 10,013	\$ 9,838
Reserve coverage	1.6%	1.8%
Debt to equity ratio ⁽³⁾	7.0x	7.0x

(1) Portfolio assets include gross financing receivables of approximately \$6.2 billion at January 31, 2010 and \$6.1 billion at October 31, 2009 and net equipment under operating leases of \$2.2 billion at

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

January 31, 2010 and October 31, 2009, as disclosed in Note 10 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference. Portfolio assets also include capitalized profit on intercompany equipment transactions of approximately \$700 million at January 31, 2010 and October 31, 2009 and intercompany leases of approximately \$1.1 billion at January 31, 2010 and \$1.0 billion at October 31, 2009, both of which are eliminated in consolidation.

- (2) Allowance for doubtful accounts includes both the short-term and the long-term portions of the allowance on financing receivables.
- (3) HPFS debt consists of intercompany equity that is treated as debt for segment reporting purposes, intercompany debt and debt issued directly by HPFS.

Net portfolio assets at January 31, 2010 increased 1.8% from October 31, 2009. The increase resulted from a favorable currency impact in the first quarter of fiscal 2010. The overall percentage of portfolio asset reserves decreased due primarily to the write-offs of customer accounts that had been reserved in prior periods.

For the three months ended January 31, 2010 and 2009, HPFS recorded write-offs, net of recoveries, of \$12 million and \$13 million, respectively.

Corporate Investments

	Three months ended January 31		
	2010	2009	% Increase (Decrease)
	In millions		
Net revenue	\$ 236	\$ 196	20.4%
Earnings (loss) from operations	\$ 19	\$ (19)	(200.0)%
Earnings (loss) from operations as a % of net revenue	8.1%	(9.7)%	

Net revenue in Corporate Investments relates primarily to network infrastructure products sold under the brand "ProCurve Networking." For the three months ended January 31, 2010, revenue from network infrastructure products increased 12.9% as compared to the same period in fiscal 2009, driven by improved market demand and continued investment in sales coverage.

Corporate Investments reported positive earnings from operations for the first three months of fiscal 2010 as compared to a loss from operations reported for the same period in fiscal 2009 due primarily to higher earnings from operations generated by network infrastructure products. Gross margin in Corporate Investments increased primarily as a result of lower product costs in the sale of network infrastructure products, the effect of which was partially offset by increased competitive pressure. The earnings from operations in Corporate Investments were offset by expenses carried in the segment associated with corporate development, global alliances and HP Labs; such expenses declined from the prior-year period.

LIQUIDITY AND CAPITAL RESOURCES

Our cash balances are held in numerous locations throughout the world, including substantial amounts held outside of the United States. Most of the amounts held outside of the United States could be repatriated to the United States but, under current law, would be subject to United States federal income taxes, less applicable foreign tax credits. Repatriation of some foreign balances is restricted by local laws. We have provided for the United States federal tax liability on these amounts for financial statement purposes, except for foreign earnings that are considered indefinitely reinvested outside of the United States. Repatriation could result in additional United States federal income tax payments in future years. Where local restrictions prevent an efficient intercompany transfer of funds,

our intent is that cash balances would remain outside of the United States and we would meet United States liquidity needs through ongoing cash flows, external borrowings, or both. We utilize a variety of tax planning and financing strategies in an effort to ensure that our worldwide cash is available in the locations in which it is needed.

FINANCIAL CONDITION (Sources and Uses of Cash)

	Three months ended	
	January 31	
	2010	2009
	In millions	
Net cash provided by operating activities	\$ 2,407	\$ 1,126
Net cash (used in) investing activities	(711)	(963)
Net cash (used in) provided by financing activities	(1,428)	873
Net increase in cash and cash equivalents	\$ 268	\$ 1,036

Operating Activities

Net cash provided by operating activities increased by approximately \$1.3 billion for the three months ended January 31, 2010 as compared to the corresponding period in fiscal 2009. The increase was due primarily to a decrease in utilization of cash resources for payment of operating liabilities such as accounts payable and other current liabilities along with an increase in net earnings, the impact of which was partially offset by a decline in generation of cash resources through the utilization of operating assets such as other current assets and inventory.

Our key working capital metrics are as follows:

	January 31, 2010	October 31, 2009
Days of sales outstanding in accounts receivable	42	48
Days of supply in inventory	25	23
Days of purchases outstanding in accounts payable.	(51)	(57)
Cash conversion cycle	16	14

Days of sales outstanding in accounts receivable ("DSO") is calculated by dividing ending accounts receivable, net of allowance for doubtful accounts, by a 90-day average net revenue.

Days of supply in inventory ("DOS") measures the average number of days from procurement to sale of our product. DOS is calculated by dividing ending inventory by a 90-day average cost of goods sold.

Days of purchases outstanding in accounts payable ("DPO") is calculated by dividing ending accounts payable by a 90-day average cost of goods sold.

Our working capital requirements depend upon our effective management of the cash conversion cycle, which represents effectively the number of days that elapse from the day we pay for the purchase of raw materials to the collection of cash from our customers. The cash conversion cycle is the sum of DSO and DOS less DPO.

The decrease in DSO was due primarily to lower accounts receivable at January 31, 2010 as a result of improved linearity across the quarter. The increase in DOS was due to higher inventory levels at January 31, 2010. The decrease in DPO was due primarily to the timing of supplier purchases and payments in the first quarter.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

Investing Activities

Net cash used in investing activities decreased by approximately \$0.3 billion for the three months ended January 31, 2010 as compared to the corresponding period in fiscal 2009 due primarily to higher cash payments made in connection with fiscal 2009 acquisitions.

Financing Activities

Net cash used in financing activities increased by approximately \$2.3 billion for the three months ended January 31, 2010 as compared to the corresponding period in fiscal 2009. The increase was due primarily to a decline in the issuance of debt and increased repurchases of our common stock, the impact of which was partially offset by the cash received through more issuances of common stock under employee stock plans.

For more information on our share repurchase programs, see Note 14 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

CAPITAL RESOURCES

Debt Levels

We maintain debt levels that we establish through consideration of a number of factors, including cash flow expectations, cash requirements for operations, investment plans (including acquisitions), share repurchase activities, overall cost of capital, and targeted capital structure. Outstanding borrowings increased to \$15.9 billion as of January 31, 2010 as compared to \$15.8 billion at October 31, 2009, bearing weighted average interest rates of 2.7% each at January 31, 2010 and October 31, 2009. During the first three months of fiscal 2010, we issued \$2.5 billion and repaid \$2.4 billion of commercial paper. As of January 31, 2010, we had \$22 million in total borrowings collateralized by certain financing receivable assets.

Our weighted-average interest rate reflects the average effective rate on our borrowings prevailing during the period; it factors in the impact of swapping some of our global notes with fixed interest rates for global notes with floating interest rates. For more information on our interest rate swaps, see Note 9 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

For more information on our borrowings, see Note 12 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

Available Borrowing Resources

At January 31, 2010, we had the following resources available to obtain short-term or long-term financings if we need additional liquidity:

	At January 31, 2010
	In millions
2009 Shelf Registration Statement ⁽¹⁾	Unspecified
Commercial paper programs ⁽¹⁾	16,200
Uncommitted lines of credit ⁽¹⁾	1,500
Revolving trade receivables-based facilities ⁽²⁾	140

(1) For more information on our available borrowings resources, see Note 12 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

(2) For more information on our revolving trade receivables-based facilities, see Note 4 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

Credit Ratings

Our credit risk is evaluated by three independent rating agencies based upon publicly available information as well as information obtained in our ongoing discussions with them. The ratings for the fiscal year ended October 31, 2010 were:

	For the three months ended January 31, 2010		
	Standard & Poor's	Moody's Investors	Fitch Ratings
	Ratings Services	Service	Services
Short-term debt ratings	A-1	Prime-1	F1
Long-term debt ratings	A	A2	A+

We do not have any rating downgrade triggers that would accelerate the maturity of a material amount of our debt. However, a downgrade in our credit rating would increase the cost of borrowings under our credit facilities. Also, a downgrade in our credit rating could limit our ability to issue commercial paper under our current programs. If this were to occur, we would seek alternative sources of funding, including drawdowns under our credit facilities or the issuance of notes under our existing shelf registration statements.

CONTRACTUAL AND OTHER OBLIGATIONS*Guarantees and Indemnifications*

For more information on liabilities that may arise from guarantees and indemnification, see Note 11 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

Litigation and Contingencies

For more information on liabilities that may arise from litigation and contingencies, see Note 16 to the Consolidated Condensed Financial Statements in Item 1, which is incorporated herein by reference.

Off-Balance Sheet Arrangements

As part of our ongoing business, we have not participated in transactions that generate material relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities ("SPEs"), which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes. As of January 31, 2010, we are not involved in any material unconsolidated SPEs.

FACTORS THAT COULD AFFECT FUTURE RESULTS

Because of the following factors, as well as other variables affecting our operating results, past financial performance may not be a reliable indicator of future performance, and historical trends should not be used to anticipate results or trends in future periods.

Competitive pressures could harm our revenue, gross margin and prospects.

We encounter aggressive competition from numerous and varied competitors in all areas of our business, and our competitors may target our key market segments. We compete primarily on the basis of technology, performance, price, quality, reliability, brand, reputation, distribution, range of products and services, ease of use of our products, account relationships, customer training, service and support, security, availability of application software, and Internet infrastructure offerings. If our products, services, support and cost structure do not enable us to compete successfully based on any of those criteria, our operations, results and prospects could be harmed.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

Unlike many of our competitors, we have a portfolio of businesses and must allocate resources across these businesses while competing with companies that specialize in one or more of these product lines. As a result, we may invest less in certain areas of our businesses than our competitors do, and these competitors may have greater financial, technical and marketing resources available to them than our businesses that compete against them. Industry consolidation also may affect competition by creating larger, more homogeneous and potentially stronger competitors in the markets in which we compete, and our competitors also may affect our business by entering into exclusive arrangements with existing or potential customers or suppliers.

We may have to continue to lower the prices of many of our products and services to stay competitive, while at the same time trying to maintain or improve revenue and gross margin. The markets in which we do business, particularly the personal computer and printing markets, are highly competitive, and we encounter aggressive price competition for all of our products and services from numerous companies globally. Over the past several years, price competition in the market for personal computers, printers and related products has been particularly intense as competitors have aggressively cut prices and lowered their product margins for these products. In addition, competitors in some of the markets in which we compete with a greater presence in lower-cost jurisdictions may be able to offer lower prices than we are able to offer. Our results of operations and financial condition may be adversely affected by these and other industry-wide pricing pressures.

Because our business model is based on providing innovative and high quality products, we may spend a proportionately greater amount on research and development than some of our competitors. If we cannot proportionately decrease our cost structure on a timely basis in response to competitive price pressures, our gross margin and, therefore, our profitability could be adversely affected. In addition, if our pricing and other factors are not sufficiently competitive, or if there is an adverse reaction to our product decisions, we may lose market share in certain areas, which could adversely affect our revenue and prospects.

Even if we are able to maintain or increase market share for a particular product, revenue could decline because the product is in a maturing industry. Revenue and margins also could decline due to increased competition from other types of products. For example, refill and remanufactured alternatives for some of HP's LaserJet toner and inkjet cartridges compete with HP's supplies business. In addition, other companies have developed and marketed new compatible cartridges for HP's LaserJet and inkjet products, particularly in jurisdictions outside of the United States where adequate intellectual property protection may not exist. HP expects competitive refill and remanufacturing and cloned cartridge activity to continue to pressure margins in IPG, which in turn has a significant impact on HP margins and profitability overall.

If we cannot continue to develop, manufacture and market products and services that meet customer requirements for innovation and quality, our revenue and gross margin may suffer.

The process of developing new high technology products and services and enhancing existing products and services is complex, costly and uncertain, and any failure by us to anticipate customers' changing needs and emerging technological trends accurately could significantly harm our market share and results of operations. We must make long-term investments, develop or obtain appropriate intellectual property and commit significant resources before knowing whether our predictions will accurately reflect customer demand for our products and services. After we develop a product, we must be able to manufacture appropriate volumes quickly and at low costs. To accomplish this, we must accurately forecast volumes, mixes of products and configurations that meet customer requirements, and we may not succeed at doing so at all or within a given product's life cycle. Any delay in the development, production or marketing of a new product could result in our not being among the first to market, which could further harm our competitive position.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

In the course of conducting our business, we must adequately address quality issues associated with our products and services, including defects in our engineering, design and manufacturing processes, as well as defects in third-party components included in our products. In order to address quality issues, we work extensively with our customers and suppliers and engage in product testing to determine the cause of the problem and to determine appropriate solutions. However, we may have limited ability to control quality issues, particularly with respect to faulty components manufactured by third parties. If we are unable to determine the cause, find an appropriate solution or offer a temporary fix (or "patch"), we may delay shipment to customers, which would delay revenue recognition and could adversely affect our revenue and reported results. Finding solutions to quality issues can be expensive and may result in additional warranty, replacement and other costs, adversely affecting our profits. If new or existing customers have difficulty operating our products, our operating margins could be adversely affected, and we could face possible claims if we fail to meet our customers' expectations. In addition, quality issues can impair our relationships with new or existing customers and adversely affect our brand and reputation, which could have a material adverse effect on our operating results.

Economic weakness and uncertainty could adversely affect our revenue, gross margin and expenses.

Our revenue and gross margin depend significantly on worldwide economic conditions and the demand for computing and imaging products and services in the markets in which we compete. Economic weakness and uncertainty have resulted, and may result in the future, in decreased revenue, gross margin, earnings or growth rates and difficulty managing inventory levels. Sustained uncertainty about current global economic conditions may result in our customers continuing to postpone spending, which could adversely affect demand for our products and services. Economic weakness and uncertainty also make it more difficult for us to make accurate forecasts of revenue, gross margin and expenses.

We also have experienced, and may experience in the future, gross margin declines in certain businesses, reflecting the effect of items such as competitive pricing pressures, inventory write downs and increases in component and manufacturing costs resulting from higher labor and material costs borne by our manufacturers and suppliers that, as a result of competitive pricing pressures or other factors, we are unable to pass on to our customers. In addition, our business may be disrupted if we are unable to obtain equipment, parts and components from our suppliers and our suppliers from their suppliers due to the insolvency of key suppliers or the inability of key suppliers to obtain credit.

Economic weakness and uncertainty could cause our expenses to vary materially from our expectations. Any renewed financial turmoil affecting the banking system and financial markets or any significant financial services institution failures could negatively impact our treasury operations, as the financial condition of such parties may deteriorate rapidly and without notice in times of market volatility and disruption. Poor financial performance of asset markets could lead to increased pension and post-retirement benefit expenses. Other income and expense could vary materially from expectations depending on changes in interest rates, borrowing costs, currency exchange rates, hedging expenses and the fair value of derivative instruments. Economic downturns also may lead to restructuring actions and associated expenses.

We depend on third-party suppliers, and our revenue and gross margin could suffer if we fail to manage suppliers properly.

Our operations depend on our ability to anticipate our needs for components, products and services and our suppliers' ability to deliver sufficient quantities of quality components, products and services at reasonable prices in time for us to meet critical schedules. Given the wide variety of systems, products and services that we offer, the large number of our suppliers and contract manufacturers that are dispersed across the globe, and the long lead times that are required to manufacture, assemble and deliver certain components and products, problems could arise in planning production and managing inventory levels that could seriously harm us. Other supplier problems that we could face include

component shortages, excess supply, risks related to the terms of our contracts with suppliers, risks associated with contingent workers, and risks related to our relationships with single source suppliers, as described below.

Shortages. Occasionally we may experience a shortage of, or a delay in receiving, certain components as a result of strong demand, capacity constraints, supplier financial weaknesses, inability of suppliers to borrow funds in the credit markets, disputes with suppliers (some of whom are also customers), disruptions in the operations of component suppliers, other problems experienced by suppliers or problems faced during the transition to new suppliers. In particular, our PC business relies heavily upon outsourced manufacturers ("OMs") to manufacture its products and is therefore dependent upon the continuing operations of those OMs to fulfill demand for our PC products. HP represents a substantial portion of the business of some of these OMs, and any changes to the nature or volume of business transacted by HP with a particular OM could adversely affect the operations and financial condition of the OM and lead to shortages or delays in receiving products from that OM. If shortages or delays persist, the price of these components may increase, we may be exposed to quality issues or the components may not be available at all. We may not be able to secure enough components at reasonable prices or of acceptable quality to build products or provide services in a timely manner in the quantities or according to the specifications needed. Accordingly, our revenue and gross margin could suffer as we could lose time-sensitive sales, incur additional freight costs or be unable to pass on price increases to our customers. If we cannot adequately address supply issues, we might have to reengineer some products or service offerings, resulting in further costs and delays.

Oversupply. In order to secure components for the provision of products or services, at times we may make advance payments to suppliers or enter into non-cancelable commitments with vendors. In addition, we may purchase components strategically in advance of demand to take advantage of favorable pricing or to address concerns about the availability of future components. If we fail to anticipate customer demand properly, a temporary oversupply could result in excess or obsolete components, which could adversely affect our gross margin.

Contractual terms. As a result of binding price or purchase commitments with vendors, we may be obligated to purchase components or services at prices that are higher than those available in the current market and be limited in our ability to respond to changing market conditions. In the event that we become committed to purchase components or services for prices in excess of the current market price, we may be at a disadvantage to competitors who have access to components or services at lower prices, and our gross margin could suffer. In addition, many of our competitors obtain products or components from the same OMs and suppliers that we utilize. Our competitors may obtain better pricing and other terms and more favorable allocations of products and components during periods of limited supply, and our ability to engage in relationships with certain OMs and suppliers could be limited. The practice employed by our PC business of purchasing product components and transferring those components to its OMs may create large supplier receivables with the OMs that, depending on the financial condition of the OMs, may have risk of uncollectability. In addition, certain of our OMs and suppliers may decide in the future to discontinue conducting business with us. Any of these actions by our competitors, OMs or suppliers could adversely affect our future operating results and financial condition.

Contingent workers. We also rely on third-party suppliers for the provision of contingent workers, and our failure to manage our use of such workers effectively could adversely affect our results of operations. We have been exposed to various legal claims relating to the status of contingent workers in the past and could face similar claims in the future. We may be subject to shortages, oversupply or fixed contractual terms relating to contingent workers, as described above. Our

ability to manage the size of, and costs associated with, the contingent workforce may be subject to additional constraints imposed by local laws.

Single source suppliers. Our use of single source suppliers for certain components could exacerbate our supplier issues. We obtain a significant number of components from single sources due to technology, availability, price, quality or other considerations. For example, we rely on Intel Corporation to provide us with a sufficient supply of processors for many of our PCs, workstations, handheld computing devices and servers, and some of those processors are customized for our products. New products that we introduce may utilize custom components obtained from only one source initially until we have evaluated whether there is a need for additional suppliers. Replacing a single source supplier could delay production of some products as replacement suppliers initially may be subject to capacity constraints or other output limitations. For some components, such as customized components and some of the processors that we obtain from Intel, alternative sources may not exist or those alternative sources may be unable to produce the quantities of those components necessary to satisfy our production requirements. In addition, we sometimes purchase components from single source suppliers under short-term agreements that contain favorable pricing and other terms but that may be unilaterally modified or terminated by the supplier with limited notice and with little or no penalty. The performance of such single source suppliers under those agreements (and the renewal or extension of those agreements upon similar terms) may affect the quality, quantity and price of components to HP. The loss of a single source supplier, the deterioration of our relationship with a single source supplier, or any unilateral modification to the contractual terms under which we are supplied components by a single source supplier could adversely affect our revenue and gross margins.

Business disruptions could seriously harm our future revenue and financial condition and increase our costs and expenses.

Our worldwide operations could be subject to earthquakes, power shortages, telecommunications failures, water shortages, tsunamis, floods, hurricanes, typhoons, fires, extreme weather conditions, medical epidemics or pandemics and other natural or manmade disasters or business interruptions, for which we are predominantly self-insured. The occurrence of any of these business disruptions could seriously harm our revenue and financial condition and increase our costs and expenses. Our corporate headquarters, and a portion of our research and development activities, are located in California, and other critical business operations and some of our suppliers are located in California and Asia, near major earthquake faults. In addition, all six of our worldwide IT data centers are located in the southern United States, making our operations more vulnerable to natural disasters or other business disruptions occurring in that geographical area. The manufacture of product components, the final assembly of our products and other critical operations are concentrated in certain geographic locations, including Shanghai, Singapore and India. We also rely on major logistics hubs primarily in Asia to manufacture and distribute our products and in the southwestern United States to import products into the Americas region. Our operations could be adversely affected if manufacturing, logistics or other operations in these locations are disrupted for any reason, including natural disasters, information technology system failures, military actions or economic, business, labor, environmental, public health, or political issues. The ultimate impact on us, our significant suppliers and our general infrastructure of being located near major earthquake faults and being consolidated in certain geographical areas is unknown, but our revenue, profitability and financial condition could suffer in the event of a major earthquake or other natural disaster.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

System security risks, data protection breaches and systems integration issues could disrupt our internal operations or information technology services provided to customers, and any such disruption could reduce our expected revenue, increase our expenses, damage our reputation and adversely affect our stock price.

Experienced computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions or cause shutdowns. Computer programmers and hackers also may be able to develop and deploy viruses, worms, and other malicious software programs that attack our products or otherwise exploit any security vulnerabilities of our products. In addition, sophisticated hardware and operating system software and applications that we produce or procure from third parties may contain defects in design or manufacture, including "bugs" and other problems that could unexpectedly interfere with the operation of the system. The costs to us to eliminate or alleviate security problems, bugs, viruses, worms, malicious software programs and security vulnerabilities could be significant, and the efforts to address these problems could result in interruptions, delays, cessation of service and loss of existing or potential customers that may impede our sales, manufacturing, distribution or other critical functions.

We manage and store various proprietary information and sensitive or confidential data relating to our business. In addition, our outsourcing services business routinely processes, stores and transmits large amounts of data for our clients, including sensitive and personally identifiable information. Breaches of our security measures or the accidental loss, inadvertent disclosure or unapproved dissemination of proprietary information or sensitive or confidential data about us or our clients, including the potential loss or disclosure of such information or data as a result of fraud, trickery or other forms of deception, could expose us, our customers or the individuals affected to a risk of loss or misuse of this information, result in litigation and potential liability for us, damage our brand and reputation or otherwise harm our business. We also could lose existing or potential customers for outsourcing services or other information technology solutions or incur significant expenses in connection with our customers' system failures or any actual or perceived security vulnerabilities in our products. In addition, the cost and operational consequences of implementing further data protection measures could be significant.

Portions of our IT infrastructure also may experience interruptions, delays or cessations of service or produce errors in connection with systems integration or migration work that takes place from time to time. We may not be successful in implementing new systems and transitioning data which could cause business disruptions and be more expensive, time consuming, disruptive and resource-intensive. Such disruptions could adversely impact our ability to fulfill orders and interrupt other processes. Delayed sales, lower margins or lost customers resulting from these disruptions have adversely affected in the past, and in the future could adversely affect, our financial results, stock price and reputation.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

The revenue and profitability of our operations have historically varied, which makes our future financial results less predictable.

Our revenue, gross margin and profit vary among our products and services, customer groups and geographic markets and therefore will likely be different in future periods than our current results. Our revenue depends on the overall demand for our products and services. Delays or reductions in IT spending could materially adversely affect demand for our products and services, which could result in a significant decline in revenues. Overall gross margins and profitability in any given period are dependent partially on the product, customer and geographic mix reflected in that period's net revenue. In particular, IPG and certain of its business units such as printer supplies contribute significantly to our gross margin and profitability. In addition, our services business has contributed significantly to our revenue and operating profit in recent periods. Competition, lawsuits, investigations and other risks affecting those businesses therefore may have a significant impact on our overall gross margin and profitability. Certain segments, and ESS in particular, have a higher fixed cost structure and more variation in gross margins across their business units and product portfolios than others and may therefore experience significant operating profit volatility on a quarterly basis. In addition, newer geographic markets may be relatively less profitable due to investments associated with entering those markets and local pricing pressures, and we may have difficulty establishing and maintaining the operating infrastructure necessary to support the high growth rate associated with some of those markets. Market trends, competitive pressures, commoditization of products, seasonal rebates, increased component or shipping costs, regulatory impacts and other factors may result in reductions in revenue or pressure on gross margins of certain segments in a given period, which may necessitate adjustments to our operations.

HP's stock price has historically fluctuated and may continue to fluctuate, which may make future prices of HP's stock difficult to predict.

HP's stock price, like that of other technology companies, can be volatile. Some of the factors that could affect our stock price are:

speculation in the press or investment community about, or actual changes in, our business, strategic position, market share, organizational structure, operations, financial condition, financial reporting and results, effectiveness of cost cutting efforts, value or liquidity of our investments, exposure to market volatility, prospects, business combination or investment transactions, or executive team;

the announcement of new products, services, technological innovations or acquisitions by HP or its competitors;

quarterly increases or decreases in revenue, gross margin, earnings or cash flow from operations, changes in estimates by the investment community or guidance provided by HP, and variations between actual and estimated financial results;

announcements of actual and anticipated financial results by HP's competitors and other companies in the IT industry; and

the timing and amount of share repurchases by HP.

General or industry specific market conditions or stock market performance or domestic or international macroeconomic and geopolitical factors unrelated to HP's performance also may affect the price of HP common stock. For these reasons, investors should not rely on recent trends to predict future stock prices, financial condition, results of operations or cash flows. In addition, following periods of volatility in a company's securities, securities class action litigation against a company is sometimes instituted. If instituted against HP, this type of litigation could result in substantial costs and the diversion of management time and resources.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

Our revenue, cost of sales, and expenses may suffer if we cannot continue to license or enforce the intellectual property rights on which our businesses depend or if third parties assert that we violate their intellectual property rights.

We rely upon patent, copyright, trademark and trade secret laws in the United States, similar laws in other countries, and agreements with our employees, customers, suppliers and other parties, to establish and maintain intellectual property rights in the technology and products we sell, provide or otherwise use in our operations. However, any of our direct or indirect intellectual property rights could be challenged, invalidated or circumvented, or such intellectual property rights may not be sufficient to permit us to take advantage of current market trends or otherwise to provide competitive advantages, either of which could result in costly product redesign efforts, discontinuance of certain product offerings or other competitive harm. Further, the laws of certain countries do not protect proprietary rights to the same extent as the laws of the United States. Therefore, in certain jurisdictions we may be unable to protect our proprietary technology adequately against unauthorized third-party copying or use; this too could adversely affect our competitive position.

Because of the rapid pace of technological change in the information technology industry, much of our business and many of our products rely on key technologies developed or licensed by third parties. We may not be able to obtain or continue to obtain licenses and technologies from these third parties at all or on reasonable terms, or such third parties may demand cross-licenses to our intellectual property. In addition, it is possible that as a consequence of a merger or acquisition, third parties may obtain licenses to some of our intellectual property rights or our business may be subject to certain restrictions that were not in place prior to the transaction. Consequently, we may lose a competitive advantage with respect to these intellectual property rights or we may be required to enter into costly arrangements in order to terminate or limit these rights.

Third parties also may claim that we or customers indemnified by us are infringing upon their intellectual property rights. For example, in recent years individuals and groups have begun purchasing intellectual property assets for the sole purpose of asserting claims of infringement and attempting to extract settlements from large companies such as HP. If we cannot or do not license the infringed technology at all or on reasonable terms, or substitute similar technology from another source, our operations could be adversely affected. Even if we believe that the claims are without merit, they can be time-consuming and costly to defend and may divert management's attention and resources away from our business. Claims of intellectual property infringement also might require us to redesign affected products, enter into costly settlement or license agreements, pay costly damage awards, or face a temporary or permanent injunction prohibiting us from importing, marketing or selling certain of our products. Even if we have an agreement to indemnify us against such costs, the indemnifying party may be unable to uphold its contractual obligations to us.

Finally, our results of operations and cash flows have been and could continue to be affected in certain periods and on an ongoing basis by the imposition, accrual and payment of copyright levies or similar fees. In certain countries (primarily in Europe), proceedings are ongoing or have been concluded against HP in which groups representing copyright owners sought to impose upon and collect from HP levies upon equipment (such as PCs, multifunction devices and printers) alleged to be copying devices under applicable laws. As discussed in Note 16 to the Consolidated Condensed Financial Statements, matters that have been concluded have resulted in the payment of per unit levies on certain MFDs and PCs sold in Germany. Other countries that have not imposed levies on these types of devices are expected to extend existing levy schemes, and countries that do not currently have levy schemes may decide to impose copyright levies on these types of devices. The total amount of the copyright levies will depend on the types of products determined to be subject to the levy, the number of units of those products sold during the period covered by the levy, and the per unit fee for each type of product, all of which are affected by several factors, including the outcome of ongoing litigation involving HP and other industry participants and possible action by the legislative bodies in the

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

applicable countries, and could be substantial. Consequently, the ultimate impact of these copyright levies or similar fees, and the ability of HP to recover such amounts through increased prices, remain uncertain.

Due to the international nature of our business, political or economic changes or other factors could harm our future revenue, costs and expenses and financial condition.

Sales outside the United States make up approximately 65% of our net revenue. In addition, an increasing portion of our business activity is being conducted in emerging markets, including Brazil, Russia, India and China. Our future revenue, gross margin, expenses and financial condition could suffer due to a variety of international factors, including:

ongoing instability or changes in a country's or region's economic or political conditions, including inflation, recession, interest rate fluctuations and actual or anticipated military or political conflicts;

longer accounts receivable cycles and financial instability among customers;

trade regulations and procedures and actions affecting production, pricing and marketing of products;

local labor conditions and regulations;

managing a geographically dispersed workforce;

changes in the regulatory or legal environment;

differing technology standards or customer requirements;

import, export or other business licensing requirements or requirements relating to making foreign direct investments, which could increase our cost of doing business in certain jurisdictions, prevent us from shipping products to particular countries or markets, affect our ability to obtain favorable terms for components, increase our operating costs or lead to penalties or restrictions;

difficulties associated with repatriating cash generated or held abroad in a tax-efficient manner and changes in tax laws; and

fluctuations in freight costs, limitations on shipping and receiving capacity, and other disruptions in the transportation and shipping infrastructure at important geographic points of exit and entry for our products and shipments.

The factors described above also could disrupt our product and component manufacturing and key suppliers located outside of the United States. For example, we rely on manufacturers in Taiwan for the production of notebook computers and other suppliers in Asia for product assembly and manufacture.

As approximately 65% of our sales are from countries outside of the United States, other currencies, particularly the euro, the British pound, Chinese Yuan Renminbi and the Japanese yen, can have an impact on HP's results (expressed in U.S. dollars). Currency variations also contribute to variations in sales of products and services in impacted jurisdictions. Accordingly, fluctuations in foreign currency rates, most notably the strengthening of the dollar against the euro, could have a material impact on our revenue growth in future periods. In addition, currency variations can adversely affect margins on sales of our products in countries outside of the United States and margins on sales of products that include components obtained from suppliers located outside of the United States. We use a combination of forward contracts and options designated as cash flow hedges to protect against foreign currency exchange rate risks. The effectiveness of our hedges depends on our ability to accurately forecast future cash flows, which is particularly difficult during periods of uncertain demand

for our products and services and highly volatile exchange rates. As a result, we could incur significant losses from our hedging activities if our forecasts are incorrect. In addition, our hedging activities may be ineffective or may not offset any or more than a portion of the adverse financial impact resulting from currency variations. Gains or losses associated with hedging activities also may impact our revenue and to a lesser extent our cost of sales and financial condition.

In many foreign countries, particularly in those with developing economies, it is common to engage in business practices that are prohibited by laws and regulations applicable to us, such as the Foreign Corrupt Practices Act. Although we implement policies and procedures designed to facilitate compliance with these laws, our employees, contractors and agents, as well as those companies to which we outsource certain of our business operations, may take actions in violation of our policies. Any such violation, even if prohibited by our policies, could have a material adverse effect on our business and reputation.

If we fail to manage the distribution of our products and services properly, our revenue, gross margin and profitability could suffer.

We use a variety of distribution methods to sell our products and services, including third-party resellers and distributors and both direct and indirect sales to both enterprise accounts and consumers. Successfully managing the interaction of our direct and indirect channel efforts to reach various potential customer segments for our products and services is a complex process. Moreover, since each distribution method has distinct risks and gross margins, our failure to implement the most advantageous balance in the delivery model for our products and services could adversely affect our revenue and gross margins and therefore our profitability. Other distribution risks are described below.

Our financial results could be materially adversely affected due to channel conflicts or if the financial conditions of our channel partners were to weaken.

Our future operating results may be adversely affected by any conflicts that might arise between our various sales channels, the loss or deterioration of any alliance or distribution arrangement or the loss of retail shelf space. Moreover, some of our wholesale and retail distributors may have insufficient financial resources and may not be able to withstand changes in business conditions, including economic weakness and industry consolidation. Many of our significant distributors operate on narrow product margins and have been negatively affected by business pressures. Considerable trade receivables that are not covered by collateral or credit insurance are outstanding with our distribution and retail channel partners. Revenue from indirect sales could suffer, and we could experience disruptions in distribution if our distributors' financial conditions, abilities to borrow funds in the credit markets or operations weaken.

Our inventory management is complex as we continue to sell a significant mix of products through distributors.

We must manage inventory effectively, particularly with respect to sales to distributors, which involves forecasting demand and pricing issues. Distributors may increase orders during periods of product shortages, cancel orders if their inventory is too high or delay orders in anticipation of new products. Distributors also may adjust their orders in response to the supply of our products and the products of our competitors and seasonal fluctuations in end-user demand. Our reliance upon indirect distribution methods may reduce visibility to demand and pricing issues, and therefore make forecasting more difficult. If we have excess or obsolete inventory, we may have to reduce our prices and write down inventory. Moreover, our use of indirect distribution channels may limit our willingness or ability to adjust prices quickly and otherwise to respond to pricing changes by competitors. We also may have limited ability to estimate future product rebate redemptions in order to price our products effectively.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

If we do not effectively manage our product and services transitions, our revenue may suffer.

Many of the industries in which we compete are characterized by rapid technological advances in hardware performance and software features and functionality; frequent introduction of new products; short product life cycles; and continual improvement in product price characteristics relative to product performance. Among the risks associated with the introduction of new products and services are delays in development or manufacturing, variations in costs, delays in customer purchases or reductions in price of existing products in anticipation of new introductions, difficulty in predicting customer demand for the new offerings and effectively managing inventory levels so that they are in line with anticipated demand, risks associated with customer qualification and evaluation of new products and the risk that new products may have quality or other defects or may not be supported adequately by application software. If we do not make an effective transition from existing products and services to future offerings, our revenue may decline.

Our revenue and gross margin also may suffer due to the timing of product or service introductions by our suppliers and competitors. This is especially challenging when a product has a short life cycle or a competitor introduces a new product just before our own product introduction. Furthermore, sales of our new products and services may replace sales, or result in discounting of some of our current offerings, offsetting the benefit of even a successful introduction. There also may be overlaps in the current products and services of HP and portfolios acquired through mergers and acquisitions that we must manage. In addition, it may be difficult to ensure performance of new customer contracts in accordance with our revenue, margin and cost estimates and to achieve operational efficiencies embedded in our estimates. Given the competitive nature of our industry, if any of these risks materializes, future demand for our products and services and our results of operations may suffer.

Our revenue and profitability could suffer if we do not manage the risks associated with our IT services business properly.

The size and significance of the IT services portion of our business has increased in recent periods. The risks that accompany that business differ from those of our other businesses and include the following:

The pricing and other terms of some of our IT services agreements, particularly our long-term IT outsourcing services agreements, require us to make estimates and assumptions at the time we enter into these contracts that could differ from actual results. Any increased or unexpected costs or unanticipated delays in connection with the performance of these engagements, including delays caused by factors outside our control, could make these agreements less profitable or unprofitable, which would have an adverse affect on the profit margin of our IT services business.

Some of our IT services agreements require significant investment in the early stages that is expected to be recovered through billings over the life of the agreement. These agreements often involve the construction of new IT systems and communications networks and the development and deployment of new technologies. Substantial performance risk exists in each agreement with these characteristics, and some or all elements of service delivery under these agreements are dependent upon successful completion of the development, construction and deployment phases. Any failure to perform satisfactorily under these agreements may expose us to legal liability, result in the loss of customers and harm our reputation, which could decrease the revenues and profitability of our IT services business.

Some of our outsourcing services agreements contain pricing provisions that permit a client to request a benchmark study by a mutually acceptable third-party. The benchmarking process typically compares the contractual price of our services against the price of similar services

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

offered by other specified providers in a peer comparison group, subject to agreed upon adjustment and normalization factors. Generally, if the benchmarking study shows that our pricing has a difference outside a specified range, and the difference is not due to the unique requirements of the client, then the parties will negotiate in good faith any appropriate adjustments to the pricing. This may result in the reduction of our rates for the benchmarked services performed after the implementation of those pricing adjustments, which could decrease the revenues and profitability of our IT services business.

If we fail to comply with our customer contracts or government contracting regulations, our revenue could suffer.

Our contracts with our customers may include unique and specialized performance requirements. In particular, our contracts with federal, state, provincial and local governmental customers are subject to various procurement regulations, contract provisions and other requirements relating to their formation, administration and performance. Any failure by us to comply with the specific provisions in our customer contracts or any violation of government contracting regulations could result in the imposition of various civil and criminal penalties, which may include termination of contracts, forfeiture of profits, suspension of payments and, in the case of our government contracts, fines and suspension from future government contracting. In addition, we are currently, and in the future may be, subject to *qui tam* litigation brought by private individuals on behalf of the government relating to our government contracts, which could include claims for up to treble damages. Further, any negative publicity related to our customer contracts or any proceedings surrounding them, regardless of its accuracy, may damage our business by affecting our ability to compete for new contracts. If our customer contracts are terminated, if we are suspended from government work, or if our ability to compete for new contracts is adversely affected, we could suffer a material reduction in expected revenue.

We make estimates and assumptions in connection with the preparation of HP's Consolidated Financial Statements, and any changes to those estimates and assumptions could have a material adverse effect on our results of operations.

In connection with the preparation of HP's Consolidated Financial Statements, we use certain estimates and assumptions based on historical experience and other factors. Our most critical accounting estimates are described in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in this report. In addition, as discussed in Note 16 to the Consolidated Condensed Financial Statements, we make certain estimates, including decisions related to provisions for legal proceedings and other contingencies. While we believe that these estimates and assumptions are reasonable under the circumstances, they are subject to significant uncertainties, some of which are beyond our control. Should any of these estimates and assumptions change or prove to have been incorrect, it could have a material adverse effect on our results of operations.

Unanticipated changes in HP's tax provisions, the adoption of a new U.S. tax legislation or exposure to additional income tax liabilities could affect our profitability.

We are subject to income taxes in the United States and numerous foreign jurisdictions. Our tax liabilities are affected by the amounts we charge for inventory, services, licenses, funding and other items in intercompany transactions. We are subject to ongoing tax audits in various jurisdictions. Tax authorities may disagree with our intercompany charges, cross-jurisdictional transfer pricing or other matters and assess additional taxes. We regularly assess the likely outcomes of these audits in order to determine the appropriateness of our tax provision. However, there can be no assurance that we will accurately predict the outcomes of these audits, and the amounts ultimately paid upon resolution of audits could be materially different from the amounts previously included in our income tax expense

and therefore could have a material impact on our tax provision, net income and cash flows. In addition, our effective tax rate in the future could be adversely affected by changes to our operating structure, changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, changes in tax laws and the discovery of new information in the course of our tax return preparation process. In particular, the carrying value of deferred tax assets, which are predominantly in the United States, is dependent on our ability to generate future taxable income in the United States. In addition, President Obama's administration has announced proposals for a new U.S. tax legislation that, if adopted, could adversely affect our tax rate. Any of these changes could affect our profitability.

Our sales cycle makes planning and inventory management difficult and future financial results less predictable.

In some of our segments, our quarterly sales often have reflected a pattern in which a disproportionate percentage of each quarter's total sales occur towards the end of such quarter. This uneven sales pattern makes prediction of revenue, earnings, cash flow from operations and working capital for each financial period difficult, increases the risk of unanticipated variations in quarterly results and financial condition and places pressure on our inventory management and logistics systems. If predicted demand is substantially greater than orders, there will be excess inventory. Alternatively, if orders substantially exceed predicted demand, we may not be able to fulfill all of the orders received in the last few weeks of each quarter. Other developments late in a quarter, such as a systems failure, component pricing movements, component shortages or global logistics disruptions, could adversely impact inventory levels and results of operations in a manner that is disproportionate to the number of days in the quarter affected.

We experience some seasonal trends in the sale of our products that also may produce variations in quarterly results and financial condition. For example, sales to governments (particularly sales to the United States government) are often stronger in the third calendar quarter, consumer sales are often stronger in the fourth calendar quarter, and many customers whose fiscal and calendar years are the same spend their remaining capital budget authorizations in the fourth calendar quarter prior to new budget constraints in the first calendar quarter of the following year. European sales are often weaker during the summer months. Demand during the spring and early summer also may be adversely impacted by market anticipation of seasonal trends. Moreover, to the extent that we introduce new products in anticipation of seasonal demand trends, our discounting of existing products may adversely affect our gross margin prior to or shortly after such product launches. Typically, our third fiscal quarter is our weakest and our fourth fiscal quarter is our strongest. Many of the factors that create and affect seasonal trends are beyond our control.

Any failure by us to execute on our strategy for operational efficiency successfully could result in total costs and expenses that are greater than expected.

We have adopted an operating framework that includes a disciplined focus on operational efficiency. As part of this framework, we have adopted several initiatives, including a multi-year program announced in 2006 to reduce real estate costs by consolidating several hundred HP real estate locations worldwide to fewer core sites, and a multi-year process of examining every function and every one of our businesses and functions in order to optimize efficiency and reduce cost. We have also implemented a workforce restructuring program in fiscal 2008 relating to our services business and a workforce restructuring program in fiscal 2009 relating to our product businesses.

Our ability to achieve the anticipated cost savings and other benefits from these initiatives within the expected time frame is subject to many estimates and assumptions, including estimates and assumptions regarding the cost of consolidating real estate locations, the amount of accelerated depreciation or asset impairment to be incurred when we vacate facilities or cease using equipment

before the end of their respective lease term or asset life, and the costs and timing of other activities in connection with these initiatives. These estimates and assumptions are subject to significant economic, competitive and other uncertainties, some of which are beyond our control. In addition, there are significant risks associated with our workforce restructuring programs, including potential delays in the implementation of those programs in highly regulated locations outside of the United States, particularly in Europe and Asia, decreases in employee morale, and the failure to meet operational targets due to the loss of employees. If these estimates and assumptions are incorrect, if we experience delays, or if other unforeseen events occur, our business and results of operations could be adversely affected.

In order to be successful, we must attract, retain and motivate key employees, and failure to do so could seriously harm us.

In order to be successful, we must attract, retain and motivate executives and other key employees, including those in managerial, technical, sales, marketing and IT support positions. Hiring and retaining qualified executives, engineers, skilled solutions providers in the IT support business and qualified sales representatives are critical to our future, and competition for experienced employees in the IT industry can be intense. The failure to hire executives and key employees or the loss of executives and key employees could have a significant impact on our operations.

Changes to our compensation and benefit programs could adversely affect our ability to attract and retain employees.

Like other companies, HP has implemented changes to its compensation programs intended to reduce fixed costs, create a high performance culture at all levels and provide an opportunity for employees to earn significant rewards if HP delivers strong financial results. These changes included reducing base pay for many employees; lowering the cap on matching contributions under the HP 401(k) Plan; making the funding of the HP 401(k) Plan matching contributions fully discretionary depending on quarterly business results; and eliminating the purchase price discount for shares purchased under the HP Share Ownership Plan, all of which were announced in February 2009. HP also has reduced the total number of share-based payment awards granted to employees and the number of employees who receive share-based payment awards. Due to these changes in our compensation programs, we may find it difficult to attract, retain and motivate employees, and any such difficulty could materially adversely affect our business. Moreover, any difficulty relating to obtaining stockholder approval of equity compensation plans could limit our ability to grant share-based payment awards to employees in the future.

Terrorist acts, conflicts and wars may seriously harm our business and revenue, costs and expenses and financial condition and stock price.

Terrorist acts, conflicts or wars (wherever located around the world) may cause damage or disruption to HP, our employees, facilities, partners, suppliers, distributors, resellers or customers. The potential for future attacks, the national and international responses to attacks or perceived threats to national security, and other actual or potential conflicts or wars, including the ongoing military operations in Iraq and Afghanistan have created many economic and political uncertainties. In addition, as a major multinational company with headquarters and significant operations located in the United States, actions against or by the United States may impact our business or employees. Although it is impossible to predict the occurrences or consequences of any such events, they could result in a decrease in demand for our products, make it difficult or impossible to deliver products to our customers or to receive components from our suppliers, create delays and inefficiencies in our supply chain and result in the need to impose employee travel restrictions. We are predominantly uninsured for losses and interruptions caused by terrorist acts, conflicts and wars.

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

Any failure by us to identify, manage, complete and integrate acquisitions, divestitures and other significant transactions successfully could harm our financial results, business and prospects, and the costs, expenses and other financial and operational effects associated with managing, completing and integrating acquisitions may result in financial results that are different than expected.

As part of our business strategy, we frequently acquire complementary companies or businesses, divest non-core businesses or assets, enter into strategic alliances and joint ventures and make investments to further our business (collectively, "business combination and investment transactions"). In order to pursue this strategy successfully, we must identify suitable candidates for and successfully complete business combination and investment transactions, some of which may be large and complex, and manage post-closing issues such as the integration of acquired companies or employees. We may not fully realize all of the anticipated benefits of any business combination and investment transaction, and the timeframe for achieving benefits of a business combination and investment transaction may depend partially upon the actions of employees, suppliers or other third parties. In addition, the pricing and other terms of our contracts for business combination and investment transactions require us to make estimates and assumptions at the time we enter into these contracts, and, during the course of our due diligence, we may not identify all of the factors necessary to estimate our costs accurately. Any increased or unexpected costs, unanticipated delays or failure to achieve contractual obligations could make these transactions less profitable or unprofitable. Moreover, if we fail to identify and successfully complete business combination and investment transactions that further our strategic objectives, we may be required to expend resources to develop products and technology internally, we may be at a competitive disadvantage or we may be adversely affected by negative market perceptions, any of which may have a material adverse effect on our revenue, gross margin and profitability.

Integration issues are complex, time-consuming and expensive and, without proper planning and implementation, could significantly disrupt our business. The challenges involved in integration include:

combining product offerings and entering into new markets in which we are not experienced;

convincing customers and distributors that the transaction will not diminish client service standards or business focus, preventing customers and distributors from deferring purchasing decisions or switching to other suppliers (which could result in our incurring additional obligations in order to address customer uncertainty), minimizing sales force attrition and coordinating sales, marketing and distribution efforts;

consolidating and rationalizing corporate IT infrastructure, which may include multiple legacy systems from various acquisitions and integrating software code;

minimizing the diversion of management attention from ongoing business concerns;

persuading employees that business cultures are compatible, maintaining employee morale and retaining key employees, engaging with employee works councils representing an acquired company's non-U.S. employees, integrating employees into HP, correctly estimating employee benefit costs and implementing restructuring programs;

coordinating and combining administrative, manufacturing, research and development and other operations, subsidiaries, facilities and relationships with third parties in accordance with local laws and other obligations while maintaining adequate standards, controls and procedures;

achieving savings from supply chain integration; and

managing integration issues shortly after or pending the completion of other independent transactions.

Managing business combination and investment transactions requires varying levels of management resources, which may divert our attention from other business operations. These business combination

and investment transactions also have resulted, and in the future may result, in significant costs and expenses and charges to earnings, including those related to severance pay, early retirement costs, employee benefit costs, asset impairment charges, charges from the elimination of duplicative facilities and contracts, in-process research and development charges, inventory adjustments, assumed litigation and other liabilities, legal, accounting and financial advisory fees, and required payments to executive officers and key employees under retention plans. Moreover, HP has incurred and will incur additional depreciation and amortization expense over the useful lives of certain assets acquired in connection with business combination and investment transactions, and, to the extent that the value of goodwill or intangible assets with indefinite lives acquired in connection with a business combination and investment transaction becomes impaired, we may be required to incur additional material charges relating to the impairment of those assets. In order to complete an acquisition, we may issue common stock, potentially creating dilution for existing stockholders. In addition, we may borrow to finance an acquisition, and the amount and terms of any potential future acquisition-related borrowings, as well as other factors, could affect our liquidity and financial condition and potentially our credit ratings. Any potential future downgrades in our credit rating associated with an acquisition could adversely affect our ability to borrow and cost of borrowing and result in more restrictive borrowing terms. In addition, HP's effective tax rate on an ongoing basis is uncertain, and business combination and investment transactions could impact our effective tax rate. We also may experience risks relating to the challenges and costs of closing a business combination and investment transaction and the risk that an announced business combination and investment transaction may not close. As a result, any completed, pending or future transactions may contribute to financial results that differ from the investment community's expectations in a given quarter.

Unforeseen environmental costs could impact our future net earnings.

We are subject to various federal, state, local and foreign laws and regulations concerning environmental protection, including laws addressing the discharge of pollutants into the air and water, the management and disposal of hazardous substances and wastes, the cleanup of contaminated sites, the content of our products and the recycling, treatment and disposal of our products including batteries. In particular, we face increasing complexity in our product design and procurement operations as we adjust to new and future requirements relating to the chemical and materials composition of our products, their safe use, the energy consumption associated with those products and product take-back legislation. We could incur substantial costs, our products could be restricted from entering certain jurisdictions, and we could face other sanctions, if we were to violate or become liable under environmental laws or if our products become non-compliant with environmental laws. Our potential exposure includes fines and civil or criminal sanctions, third-party property damage, personal injury claims and clean up costs. Further, liability under some environmental laws relating to contaminated sites can be imposed retroactively, on a joint and several basis, and without any finding of noncompliance or fault. The amount and timing of costs under environmental laws are difficult to predict.

Some anti-takeover provisions contained in our certificate of incorporation and bylaws, as well as provisions of Delaware law, could impair a takeover attempt.

We have provisions in our certificate of incorporation and bylaws, each of which could have the effect of rendering more difficult or discouraging an acquisition of HP deemed undesirable by our Board of Directors. These include provisions:

authorizing blank check preferred stock, which HP could issue with voting, liquidation, dividend and other rights superior to our common stock;

limiting the liability of, and providing indemnification to, HP's directors and officers;

Edgar Filing: HEWLETT PACKARD CO - Form 10-Q

specifying that HP stockholders may take action only at a duly called annual or special meeting of stockholders and otherwise in accordance with our bylaws and limiting the ability of our stockholders to call special meetings;

requiring advance notice of proposals by HP stockholders for business to be conducted at stockholder meetings and for nominations of candidates for election to our Board of Directors;

requiring a vote by the holders of two-thirds of HP's outstanding shares to amend certain bylaws relating to HP stockholder meetings, the Board of Directors and indemnification; and

controlling the procedures for conduct of HP Board and stockholder meetings and election, appointment and removal of HP directors.

These provisions, alone or together, could deter or delay hostile takeovers, proxy contests and changes in control or management of HP. As a Delaware corporation, HP also is subject to provisions of Delaware law, including Section 203 of the Delaware General Corporation Law, which prevents some stockholders from engaging in certain business combinations without approval of the holders of substantially all of HP's outstanding common stock.

Any provision of our certificate of incorporation or bylaws or Delaware law that has the effect of delaying or deterring a change in control of HP could limit the opportunity for our stockholders to receive a premium for their shares of HP common stock and also could affect the price that some investors are willing to pay for HP common stock.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

For quantitative and qualitative disclosures about market risk affecting HP, see "Quantitative and Qualitative Disclosures About Market Risk" in Item 7A of Part II of our Annual Report on Form 10-K for the fiscal year ended October 31, 2009, which is incorporated herein by reference. Our exposure to market risk has not changed materially since October 31, 2009.

Item 4. Controls and Procedures.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of the end of the period covered by this report (the "Evaluation Date"). Based on this evaluation, our principal executive officer and principal financial officer concluded as of the Evaluation Date that our disclosure controls and procedures were effective such that the information relating to HP, including our consolidated subsidiaries, required to be disclosed in our SEC reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to HP's management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of any changes in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during our most recently completed fiscal quarter. Based on that evaluation, our principal executive officer and principal financial officer concluded that there has not been any change in our internal control over financial reporting during that quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION**Item 1. Legal Proceedings.**

The information set forth above under Note 16 contained in the "Notes to Consolidated Condensed Financial Statements" is incorporated herein by reference.

Item 1A. Risk Factors.

A description of factors that could materially affect our business, financial condition or operating results is included under "Factors that Could Affect Future Results" in "Management's Discussion and Analysis of Financial Condition and Results of Operations," contained in Item 2 of Part I of this report. This description includes any material changes to the risk factor disclosure in Item 1A of Part I of our 2009 Annual Report on Form 10-K and is incorporated herein by reference.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**Recent Sales of Unregistered Securities**

There were no unregistered sales of equity securities during the period covered by this report.

Issuer Purchases of Equity Securities

Month #2				
(December 2009)	21,287	\$ 50.45	21,287	\$ 10,157,267
Month #3				
(January 2010)	17,621	\$ 51.96	17,621	\$ 9,241,778
Total	53,614	\$ 50.60	53,614	

HP repurchased shares in the first quarter of fiscal 2010 under an ongoing program to manage the dilution created by shares issued under employee stock plans as well as to repurchase shares opportunistically. This program, which does not have a specific expiration date, authorizes repurchases in the open market or in private transactions. All shares repurchased in the first quarter of fiscal 2010 were purchased in open market transactions.

On November 19, 2009, HP's Board of Directors authorized an additional \$8.0 billion for future share repurchases. As of January 31, 2010, HP had remaining authorization of \$9.2 billion for future share repurchases.

Item 6. Exhibits.

The Exhibit Index beginning on page 83 of this report sets forth a list of exhibits.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

*
Indicates management contract or compensatory plan, contract or arrangement.

Filed herewith.

Furnished herewith.

§
Furnished herewith. In accordance with Rule 406T of Regulation S-T, the information in these exhibits shall not be deemed to be "filed" for purposes of Section 18 of the Exchange Act, or otherwise subject to liability under that section, and shall not be incorporated by reference into any registration statement or other document filed under the Securities Act of 1933, as amended, except as expressly set forth by specific reference in such filing.

The registrant agrees to furnish to the Commission supplementally upon request a copy of (1) any instrument with respect to long-term debt not filed herewith as to which the total amount of securities authorized thereunder does not exceed 10 percent of the total assets of the registrant and its subsidiaries on a consolidated basis and (2) any omitted schedules to any material plan of acquisition, disposition or reorganization set forth above.
