ANZ organises for growth with personal customers

ANZ today announced Mr Brian Hartzler will become Group Managing Director Personal Banking, to head a new division, which clusters all of ANZ's specialised businesses primarily serving personal customers in Australia.

Mr Elmer Funke Kupper will become Group Managing Director Asia-Pacific and will oversee our diverse geographic activities across the Asia-Pacific region.

The divisional clusters are designed to accelerate organic growth and build market share. This is based on harnessing synergies between specialist businesses to broaden and deepen the offering to customers, while maintaining the integrity and vitality of ANZ's specialisation model.

The move completes a program of clustering specialist businesses around customer segments. ANZ's Institutional, Corporate and New Zealand businesses have already adopted this approach.

Personal. Businesses that primarily serve retail customers in Australia. It comprises Personal and Wealth Distribution, Mortgages, Credit Cards, Merchant Services, Banking Products and Rural Banking. Mr Brian Hartzler, formerly Managing Director Consumer Finance, will head the division. Mr Greg Camm, formerly Managing Director ANZ New Zealand, will become Managing Director Personal and Wealth Distribution, reporting to Mr Hartzler. He replaces Mr Satyendra Chelvendra (Chelvi), who is joining Group Development to focus on new retail growth

initiatives, reporting to Mr Peter Hawkins.

Institutional. Businesses that primarily serve major corporate and institutional customers. It comprises Institutional Banking, Trade and Transaction Services, Foreign Exchange, Capital Markets, and Corporate and Structured Finance. Institutional has responsibility for these segments worldwide, with direct responsibility for ANZ's activities in Europe and North America, and with matrix responsibility for businesses in New Zealand and Asia-Pacific. Mr Steve Targett has been appointed Group Managing Director Institutional and is in the process of joining ANZ from Lloyds TSB plc where he is an executive director.

Corporate. Businesses that serve corporate and small business customers in Australia. It comprises Corporate Banking and Business Banking, which now includes small to medium enterprises previously part of Personal Banking. Mr Graham Hodges becomes Group Managing Director Corporate, with this enhancement of his current responsibilities.

New Zealand. Businesses in New Zealand under Sir John Anderson, Managing Director of ANZ New Zealand, and Chief Executive of The National Bank of New Zealand.

Asia-Pacific. A new division that brings group level focus to ANZ's diverse and geographically spread businesses and customers across the region, headed by Mr Funke Kupper, who was previously Managing Director Personal Banking and Wealth Management Australia.

Australia and New Zealand Banking Group Limited ABN 11 005 357 522

These divisional executives will report to the Chief Executive Officer and the Chief Operating Officer, along with Esanda, ING Australia and Private Banking, a new high growth specialist business headed by Mr Michael Saadie, Managing Director Private Banking.

ANZ Chief Executive Officer Mr John McFarlane said: Our unique specialisation approach and culture have provided focus and vitality. ANZ is now a very different bank.

Retail banking has never been a traditional strength for ANZ, but we are beginning to show real progress and the retail businesses are performing well.

In recent years we have developed successful specialist consumer businesses in mortgages and cards. In retail banking, we have improved customer and staff satisfaction and advocacy. We now have some of the leading transaction and deposit products in the sector. Our approach to distribution has been innovative, and we have substantially invested in people, training, branch premises and telling systems.

However, we remain substantially under-represented in this segment, and now need to take it to the next level and advance our position across the personal segment as a whole, while leveraging the success we have had in selected segments such as Consumer Finance. We have already seen the clustering model work very successfully in our Institutional and Corporate divisions and in The National Bank of New Zealand.

We now have the foundation for the next step in our corporate evolution. Our new structure takes the strong foundation and energy of our specialist businesses and puts our customers first, Mr McFarlane said.

The changes are effective 1 May 2004.

**New issue announcement,
application for quotation of additional securities
and agreement**

Information or documents not available now must be given to ASX as soon as available. Information and documents given to ASX become ASX's property and may be made public.

Introduced 1/7/96. Origin: Appendix 5. Amended 1/7/98, 1/9/99, 1/7/2000, 30/9/2001, 11/3/2002.

Name of entity

AUSTRALIA AND NEW ZEALAND BANKING GROUP LIMITED

ABN

11 005 357 522

We (the entity) give ASX the following information.

Part 1 - All issues

You must complete the relevant sections (attach sheets if there is not enough space).

1	+Class of +securities issued or to be issued	Ordinary Shares
2	Number of +securities issued or to be issued (if known) or maximum number which may be issued	306,433
3	Principal terms of the +securities (eg, if options, exercise price and expiry date; if partly paid	306,433 Fully Paid Shares

+securities, the amount outstanding and due dates for payment; if
+convertible securities, the conversion price and dates for
conversion)

- 4 Do the +securities rank equally in all respects from the date of allotment with an existing +class of quoted +securities? Yes, pari passu with existing ordinary shares

If the additional securities do not rank equally, please state:

the date from which they do

the extent to which they participate for the next dividend, (in the case of a trust, distribution) or interest payment

the extent to which they do not rank equally, other than in relation to the next dividend, distribution or interest payment

+ See chapter 19 for defined terms.

5	Issue price or consideration	90 shares	at Nil consideration
		3,500 shares	at \$10.48 each
		5,000 shares	at \$11.09 each
		75,069 shares	at \$12.98 each
		57,750 shares	at \$13.91 each
		97,450 shares	at \$14.20 each
		6,250 shares	at \$14.61 each
		25,525 shares	at \$16.33 each
		949 shares	at \$17.34 each
		102 shares	at \$17.55 each
		1,039 shares	at \$17.60 each
		29,084 shares	at \$18.03 each
4,625 shares	at \$18.55 each		
6	Purpose of the issue (If issued as consideration for the acquisition of assets, clearly identify those assets)	306,433 shares issued on exercise of options.	
7	Dates of entering +securities into uncertificated holdings or despatch of certificates	2,625 shares	01 April 2004
		19,873 shares	05 April 2004
		6,407 shares	06 April 2004
		3,750 shares	07 April 2004
		750 shares	08 April 2004
		3,468 shares	13 April 2004
		13,328 shares	14 April 2004
		3,086 shares	16 April 2004
		1,465 shares	19 April 2004
		969 shares	20 April 2004
		10,625 shares	21 April 2004
		22,884 shares	22 April 2004
		9,300 shares	23 April 2004
		5,125 shares	26 April 2004
3,375 shares	27 April 2004		
66,174 shares	28 April 2004		
31,104 shares	29 April 2004		
102,125 shares	30 April 2004		
8	Number and +class of all +securities quoted on ASX (including the securities in clause 2 if applicable)	Number	+Class
		1,808,554,540	Ordinary fully paid
		10,000,000	2003 ANZ Stapled Exchangeable Preferred Securities
9	Number and +class of all +securities not quoted on ASX (including the securities in clause 2 if applicable)	Number	+Class
		37,325,537	Options on issue

	350,000	2003 Redeemable Preference Shares.
	750,000	2003 Redeemable Preference Shares (Series 2).
10	Dividend policy (in the case of a trust, distribution policy) on the increased capital (interests)	Same as existing fully paid ordinary shares.

Part 2 - Bonus issue or pro rata issue

11	Is security holder approval required?	
12	Is the issue renounceable or non-renounceable?	
13	Ratio in which the +securities will be offered	
14	+Class of +securities to which the offer relates	
15	+Record date to determine entitlements	
16	Will holdings on different registers (or subregisters) be aggregated for calculating entitlements?	
17	Policy for deciding entitlements in relation to fractions	
18	Names of countries in which the entity has +security holders who will not be sent new issue documents Note: Security holders must be told how their entitlements are to be dealt with. Cross reference: rule 7.7.	
19	Closing date for receipt of acceptances or renunciations	
20	Names of any underwriters	
21	Amount of any underwriting fee or commission	
22	Names of any brokers to the issue	
23	Fee or commission payable to the broker to the issue	
24	Amount of any handling fee payable to brokers who lodge acceptances or renunciations on behalf of +security holders	
25	If the issue is contingent on +security holders approval, the date of the meeting	
26	Date entitlement and acceptance form and prospectus or Product Disclosure Statement will be sent to persons entitled	

+ See chapter 19 for defined terms.

27 If the entity has issued options, and the terms entitle option holders to participate on exercise, the date on which notices will be sent to option holders

28 Date rights trading will begin (if applicable)

29 Date rights trading will end (if applicable)

30 How do *security holders sell their entitlements *in full* through a broker?

31 How do *security holders sell *part* of their entitlements through a broker and accept for the balance?

32 How do *security holders dispose of their entitlements (except by sale through a broker)?

33 +Despatch date

Part 3 - Quotation of securities

You need only complete this section if you are applying for quotation of securities

34 Type of securities
(tick one)

(a) Securities described in Part 1

(b) All other securities

Example: restricted securities at the end of the escrowed period, partly paid securities that become fully paid, employee incentive share securities when restriction ends, securities issued on expiry or conversion of convertible securities

Entities that have ticked box 34(a)

Additional securities forming a new class of securities

(If the additional securities do not form a new class, go to 43)

to indicate you are providing the [ILLEGIBLE] or documents

35 o If the +securities are +equity securities, the names of the 20 largest holders of the additional +securities, and the number and percentage of additional +securities held by those holders

36 o If the +securities are +equity securities, a distribution schedule of the additional +securities setting out the number of holders in the categories

1 - 1,000

1,001 - 5,000

5,001 - 10,000

10,001 - 100,000

100,001 and over

37 o A copy of any trust deed for the additional +securities

(now go to 43)

Entities that have ticked box 34(b)

38 Number of securities for which +quotation is sought

39 Class of +securities for which quotation is sought

40 Do the +securities rank equally in all respects from the date of allotment with an existing +class of quoted +securities?

If the additional securities do not rank equally, please state:

the date from which they do

the extent to which they participate for the next dividend, (in the case of a trust, distribution) or interest payment

the extent to which they do not rank equally, other than in relation to the next dividend, distribution or interest payment

41 Reason for request for quotation now

Example: In the case of restricted securities, end of restriction period

(if issued upon conversion of another security, clearly identify that other security)

		Number	+ Class
42	Number and +class of all +securities quoted on ASX (including the securities in clause 38) (now go to 43) All entities Fees		

43 Payment method (tick one)

Cheque attached

Electronic payment made

Note: Payment may be made electronically if Appendix 3B is given to ASX electronically at the same time.

ý Periodic payment as agreed with the home branch has been arranged

Note: Arrangements can be made for employee incentive schemes that involve frequent issues of securities.

Quotation agreement

+ See chapter 19 for defined terms.

1 +Quotation of our additional +securities is in ASX's absolute discretion. ASX may quote the +securities on any conditions it decides.

2 We warrant the following to ASX.

The issue of the +securities to be quoted complies with the law and is not for an illegal purpose.

There is no reason why those +securities should not be granted +quotation.

An offer of the +securities for sale within 12 months after their issue will not require disclosure under section 707(3) or section 1012C(6) of the Corporations Act.

Note: An entity may need to obtain appropriate warranties from subscribers for the securities in order to be able to give this warranty

Section 724 or section 1016E of the Corporations Act does not apply to any applications received by us in relation to any +securities to be quoted and that no-one has any right to return any +securities to be quoted under sections 737, 738 or 1016F of the Corporations Act at the time that we request that the +securities be quoted.

We warrant that if confirmation is required under section 1017F of the Corporations Act in relation to the +securities to be quoted, it has been provided at the time that we request that the +securities be quoted.

If we are a trust, we warrant that no person has the right to return the +securities to be quoted under section 1019B of the Corporations Act at the time that we request that the +securities be quoted.

3 We will indemnify ASX to the fullest extent permitted by law in respect of any claim, action or expense arising from or connected with any breach of the warranties in this agreement.

4 We give ASX the information and documents required by this form. If any information or document not available now, will give it to ASX before +quotation of the +securities begins. We acknowledge that

ASX is relying on the information and documents. We warrant that they are (will be) true and complete.

For Release: 10 May 2004

ANZ receives RBNZ agreement for amalgamation

ANZ today announced it had received written advice from the Reserve Bank of New Zealand confirming its forthcoming consent for legal amalgamation of ANZ New Zealand and The National Bank of New Zealand (NBNZ).

The Reserve Bank of New Zealand's formal consent involves the issue of a new banking license to ANZ National Bank Limited, which the Reserve Bank has advised will be provided on or just prior to legal amalgamation. Legal amalgamation, which is expected to occur at the end of June 2004, is a formal step required before integration of the two businesses can commence. ANZ's strategy remains to run the ANZ and NBNZ brands and branch networks separately.

The Reserve Bank of New Zealand's consent will be subject to a number of formal undertakings made by ANZ. These include:

Ensuring the primacy of the New Zealand board of directors in overseeing management of the bank and ensuring staff have primary responsibility to the New Zealand managing director and board of the bank.

Location and operation of the bank's domestic systems in New Zealand and with the New Zealand board having the practical ability to control the management and operation of domestic and other systems on a standalone basis in the event of a crisis.

ANZ Chief Executive Officer Mr John McFarlane said: "We have had a constructive dialogue with the Reserve Bank of New Zealand over recent months in order to meet both the regulator's requirements and our business needs.

Integration is on track. Last month, we confirmed revenue synergies have been upgraded while cost synergies are in line with those disclosed in the rights issue prospectus with newly identified cost synergies being offset by some increased processing costs in New Zealand.

We have an outstanding leadership team in New Zealand led by Sir John Anderson. Our integration plan delivers on our commitment for the New Zealand business to be managed and staffed locally and associated closely with the community in New Zealand, while at the same time having the benefits of being a close family member of the ANZ Group, Mr McFarlane said.

SECTION 1

ANZ 2004 Interim Results

3

ANZ Interim Results Summary

			v Mar 03		v Sept 03
NPAT					
Headline	\$	1,396m	^	22%	^ 16%
Excluding significant transactions	\$	1,312m	^	15%	^ 9%
Underlying(3)	\$	1,241m	^	10%	^ 4%
EPS					
		76.8 cents	^	11%	^ 5%
Cash EPS(1)		78.9 cents	^	11%	^ 5%
Dividend fully franked(2)		47 cents	^	11%	^ n/a

(1) EPS excluding significant transactions and goodwill amortisation

(2) March 03 dividend of 44c adjusted for bonus element of rights issue (@0.9597)

(3) Excludes significant items, NBNZ and adjusts base for TrUEPrS swap

ANZ now has a strong foundation

Successful specialist business model

Model now enhanced by clustering around customers;

Personal - Key driver of future growth

Institutional - A leading business with lower risk

Corporate - Strong organic growth

Risk reduced and sustainability improved

Credit concentrations almost to optimal levels

International risk exposure contained

Business mix now more domestic and sustainable

Trading risk modest

NBNZ acquisition brings New Zealand leadership

NBNZ acquisition cash EPS accretive

Two-phase implementation plan

Integration and cost synergies are on track

Revenue attrition better than expected

Customer numbers are now growing

SECTION 2

Strategy

ANZ systematically optimises variables to create value

After six years of risk reduction we are now approaching optimal levels

**excludes significant and abnormal items*

Average daily Value at Risk at 97.5% confidence interval

Our strategy is to grow sustainable earnings at low volatility

NZ makes our earnings less volatile

Although NZ alone is more volatile than group, diversification results in NZ creating lower overall volatility at a group level

Wealth management's susceptibility to globalisation and rapid fade likely to impact future returns

Wealth management earnings are more volatile than banking

Global scale base is important to develop systems, platforms, and brands

The ING JV delivers a sustainable position with scale, with low volatility to ANZ, particularly with equity risk hedged

**as measured by one standard deviation from mean half yearly profit growth (or exchange rate movement) over past 10 years*

Wealth management includes listed wealth management companies and WM operations of major banks, and excludes AV uplift and goodwill

We have transformed ANZ into a more sustainable, lower risk business

Reduction in risk and movement towards domestic consumer businesses > **Has significantly reduced earnings volatility** > **And has not had a material impact on earnings**

** Standard deviation in six monthly NPAT growth for ANZ, excluding abnormal/significant items*

Value of focus and specialisation

Specialisation and focus yields better return than generalisation from the perspective of individual challenges and tasks, as this Olympic example demonstrates

Average out-performance 23%

Event	The Specialists	The Generalists	Specialist Premium
100m	9.87 s	10.68 s	8%
110m Hurdle	13.00 s	14.48 s	10%
400m	42.84 s	46.71 s	8%
1500m	3 m 32.07 s	4 m 29.48 s	21%
Discus	69.3 m	43.66 m	59%
Shotput	21.29 m	15.11 m	41%
Long Jump	8.55 m	7.76 m	10%
High Jump	2.35 m	2.00 m	18%
Pole Vault	5.90 m	5.00 m	18%

Coherence already achieved in Institutional by clustering businesses

Businesses established as distinct units to unleash energy & innovation

In 2002, businesses brought together under Institutional

Very high levels of cross sell achieved, with deep engagement with the customer

Low reliance on trading income

as it has been in both our Corporate and New Zealand businesses

now our focus is on building coherence with personal customers

Retail not a traditional strength for ANZ. Creation of specialist businesses necessary:

brought focus to this area

unleashed energy and innovation

prevented smaller network constraining growth through third-party and specialist distribution

Product businesses have grown strongly and achieved scale

Businesses now have sufficient strength and momentum that synergies and growth are possible, but coherence against customer now vital

ANZ Group Structure 2004

ANZ Specialist Business Structure 2004

**Matrix*

ANZ has successfully mastered each stage from performance through to specialisation. Focus now on coherence, growth and sustainability

THE ANZ JOURNEY

A solid result with good foundation and prospects

We remain confident about our prospects for the year as a whole

Solid first half, clean result

Accretive New Zealand acquisition. Market leadership in all segments. Integration and synergies on track

Business mix inherently domestic, more sustainable

Economic environment positive with global upturn. Housing and consumer segments softer, institutional, corporate and SME stronger

Risk radically reduced towards optimal

ANZ's execution capability a strength

Businesses now clustered around customers for revenue enhancement with emphasis on growth

SECTION 3

NBNZ Update

A low risk approach to NBNZ integration

Phase one: quick wins

RBNZ approval expected early May

Legal amalgamation into ANZ National, targeted for 30 June 2004

Maintain both brands to enhance customer retention

Rapidly integrate activities that are not systems dependent

Idea sharing already begun for franchise growth

Phase two: full integration

Full plans already submitted to RBNZ. Discussions well progressed

Systems strategy:

Domestic NZ stand-alone

International Group systems

Common systems suite in both Australia and New Zealand

Full systems integration expected by end 2005

Net customer acquisition rebounding well

NBNZ Personal

acquisition of customers continues to rebound from 2003, and continues to be a net acquirer

ANZ Personal

net outflow continues, but at a much lower level in March compared to February 2004 and March 2003

NBNZ Business & Rural

net acquisitions remain positive, however down on year earlier levels

ANZ Business & Rural

net outflow continues but at a substantially reduced rate compared to twelve months prior

ANZ Corporate

maintains a net inflow

** 3 month moving average removes impact of monthly volatility*

Current integration plans project a positive outcome from 2006

Cost synergies in line with business case, however newly identified synergies offset by increased processing costs in NZ

Revenue attrition improved modestly on business case

Revenue synergies substantially upgraded from business case

Integration costs \$230m

~10% will be met by restructuring charge included in the calculation of goodwill

~10% relates to equipment that will be capitalised

~10%-15% relates to the cost of existing resources

**Synergies are based on percentage of 2007 benefits*

Integration timetable*

**selected business units*

SECTION 4

Results Review

A good underlying result, driven by strong income growth and improved credit quality

** Reflects StEPS being reinvested in AUD whereas TrUEPrS was invested in USD*

Reflects loss of earnings on TrUEPrS hedge

NBNZ acquisition and TrUEPrS-related significant transactions further increased profit

	NBNZ 4 months NZ\$m	NBNZ Pro Forma NZ\$m
NBNZ Earnings (NZD)*		
Interest	347	338
Non Interest	120	116
Operating Income	467	454
Expenses	(192)	(195)
Profit before debt provisions	275	259
Provisions	(31)	(30)

** excludes integration costs*

Strong balance sheet growth across most businesses

End of period lending assets grew by \$41.4b (25%) for the half. Excluding NBNZ, lending grew \$8.8b (5%)

Excluding NBNZ, growth was largely in Mortgages \$6.8b (10%) and Corporate \$1.7b (11%) for the half, reflecting favourable market conditions for both businesses

End of period deposits increased to \$128.4b (29%) for the half. Excluding NBNZ deposits volumes grew to \$104.9b (5%)

Strong growth was seen across the board, with Personal Banking & Wealth up \$1.7b (5.3%), Institutional up \$1.5b (5.8%), and Corporate up \$0.7b (5.5%)

**Other deposits include Esanda retail debentures*

partly offset by margin pressure, particularly in 2nd quarter

Mortgage margins were down 12bp over the half, driven principally by the cyclical impact of wholesale rates moving up ahead of the cash rate during the half

Average spread between Cash rate and rolling 30 day rate: Jun-03 6bp, Sep-03 6bp, Dec-03 8bp, Mar-04 21bp

Mortgage broker costs accounted for just 1.5bp of the 12bp mortgage margin decline

Growth in underlying non-interest income reflects volume growth

Expenses well controlled, providing scope for re-investment

Underlying operating expenses increased by 2.8% over the half. Key drivers were:

Operating costs were up 4% in Personal Banking as a result of increased staff training, the cost of rolling out the new telling platform, and increased depreciation resulting from further investment in technology and branch refurbishments

SME expenses up 8% over the half, reflecting substantial investment in this business as we expand the footprint

Volume related costs in the mortgages business drove expenses up 8% over the half

The cost to income ratio remains comfortably within our stated target range of mid 40 s .

Both the NBNZ acquisition and TrUEPrS redemption impacted the ratio in the half

The ratio was also impacted by investment in the franchise in the first half

**includes Acquisition, Funding & Integration Costs*

Doubtful Debts Provision reflects improved underlying portfolio

Standard ELP charge (as a % of average lending assets) has remained stable at 31bps (32bps September 2003)

inclusion of higher quality NBNZ portfolio reduces ELP rate by ~1bp

reduction in headline ELP charge due to 4bps reduction in ELP central adjustment

ELP top up is being unwound in line with the improved credit quality of the offshore lending book, driven by the de-risking strategy

31

SECTION 5

Business Performance

32

Our consumer and corporate businesses were the key driver of underlying profit growth, offsetting de-risking impact in IFS

Cluster		PCP Growth		Key Drivers
Consumer Businesses	\$	62m*	15%	<p>Personal Banking Australia up 13% due to growth in consumer deposits, lending and sales commissions</p> <p>Consumer Finance up 39%* due to strong customer growth and turnover in the merchant business</p> <p>ING JV up 18%</p>
				<i>*after adjusting for cards under accrual in 1H03</i>
Institutional Financial Services	\$	(4)m	↓ 1%	Fall in NPAT reflects de-risking within the lending portfolio and the impact of the appreciation of the AUD on USD earnings
Corporate	\$	16	12%	<p>Strong lending growth in both Corporate and SME driving profit</p> <p>Revenue offset by the cost of expanding the geographic footprint in SME franchise</p>
New Zealand Business	\$	136m	large	<p>Strong lending growth in NBNZ offset reduced volumes in Corporate & Institutional</p> <p>ANZ (NZ) down largely due to margin pressure and continued investment in the franchise</p>
Other	\$	(1)m		<p>11% growth in Esanda resulting from buoyant new car market and efficiency gains</p> <p>4% contractions in both Asia Pacific and Treasury driven by exchange and interest rate environments respectively</p>

We now have a strong position in the domestic consumer market

We now have a combined retail customer base across Australia & New Zealand of approximately 5.1m customers

We have a scale position

Following the NBNZ integration, all retail customers will be on a Hogan platform

Relative market shares indicate the capacity to derive profit from retail banking

Retail Market Share in Australia & New Zealand*

Edgar Filing: AUSTRALIA & NEW ZEALAND BANKING GROUP LTD - Form 6-K

** source: ANZ - weighted average of Australian and New Zealand market shares, based on Roy Morgan data in Australia (share of traditional banking) and ACNeilson data in NZ (share of main bank customers)*

Our Australian consumer businesses have improved their position

In 2002, we set out to revitalise our branch network, with the aim of growing our market share and our share of wallet

We have grown market share by more than each of our peers. Specialisation has helped with this.

We have grown our share of wallet, but remain well below peers. Clustering of consumer businesses will help grow share of wallet going forward

*traditional consumer banking is defined as transactions, deposits, personal/other loans, mortgages and credit cards, rolling 12 months. Peers include CBA, NAB, WBC

Personal Banking Australia: strong foundation delivering results

A continued commitment to investing in our franchise has seen strong growth in the half with NPAT up 8%. The result was built upon:

Strong revenue growth up 5% on the half driven by robust deposits growth up 5%, solid growth in Rural lending up 8%, and continued growth in our margin lending business up 39%.

Net interest margin increased 4bps following increases in the cash rate, but was partly offset by growth in lower margin deposits

Increase in non interest income reflecting 4% growth in sales and retention payments received from sale of ANZ products.

Expenses increased 4% largely due to our continued investment in the franchise, including:

Continued investment in sales training

The successful roll out of the new telling platform to the entire branch network

Ongoing commitment to branch refurbishments and improving the risk profile of our branch network.

Opening of four new branches in the half

The investment in our franchise is delivering results

**Peers include CBA, NAB, WBC*

Consumer Finance: interchange impact well managed; offset by growth initiatives

Strong profit growth, up 9% for the half driven by:

Well managed changes to credit card programs following Interchange Reform

Significant reduction in loyalty expense following the restructuring of our product suite

Customer attrition minimised; concentrated in high transacting customers

Leading loyalty product ANZ Frequent Flyer (AFF) - remains attractive

Majority (52%) of customers not impacted

Only Big 4 Bank still offering \$1 spend to earn 1 QFF point on standard and Gold VISA/MasterCards

New products/services Diners; Low Rate MasterCard - have been successful; on-line Personal loan approval

Strong growth in the merchant customer base with 6% increase in the half year

Increased merchant turnover over the Christmas period

Strong expense control: up 1% on prior half

Mortgages: strong volume growth more than offset by interest rate environment

NPAT reduced 7% for the half despite continued strong volume growth, key drivers included:

A 10% increase in mortgage volumes during the half resulting from record sales volumes being written through all key channels was offset by a 12 basis point reduction in margin due to higher funding costs following two interest rate increases.

Sales and retention commissions paid to personal Banking increased due to growth in sales through the branch network

Operating expenses increased 8% largely driven by volume growth, along with costs associated with the business investing for the future

In the half the Mortgages business has significantly improved customer and staff satisfaction, maintained product leadership in Cannex Awards (independent mortgage analysts), and continued to focus on channel diversity, including development of the ANZ Mortgage Solutions franchises

Cannex Product Awards March 2004

Margin impact on NPAT substantial

IFS: subdued result driven by focus upon de-risking

The IFS profit was adversely affected by revenue constraints imposed by the de-risking strategy, and the strength of the AUD affecting offshore earnings. Positive aspects of the result include:

Specific provision charge has decreased A\$32m (34%) to A\$62m for the half, reflecting the improving quality of the portfolio and AUD appreciation

Continued underlying cost discipline was evident across the business with operating expenses up 3% for the half, largely attributable to increased pension costs in the UK and increasing our FX and Capital Markets capabilities in the UK and Asia.

Maintained our leading domestic market position

IFS offshore lending reduced by 47% since September 2001. At March 2004 IFS offshore lending comprise ~ 3% of Group balance sheet

NPAT composition shifted towards less volatile and more sustainable earnings

**End of period NLA s*

Corporate: continued strong growth and investment in the business

Continued growth in Corporate NPAT with the half year result up 5%, key highlights include:

Corporate Banking Australia

4% revenue growth driven by growth in average lending volumes of 10%, coupled with solid growth in average deposit volumes of 8%

Wall St to Main St activity increased, with revenue from these deals up over 50% in the half

46% of total profit generated from Corporate customers is recorded in other business units results

Operating expenses were up 4% as we invested for growth, including increased frontline FTE

Net specific provisions down significantly from 2H03.

Small to Medium Enterprises Australia

7% revenue growth driven by 14% average lending growth, and 9% increase in average deposit volumes

Continued growth reflecting effective investment in the business and a focus on delivering a superior customer proposition, including;

expanding our geographic business footprint: frontline FTE up ~ 200 in last two years

more FTE committed to industry specialisation

effective use of 3rd party originated loans to ensure full capacity utilization of relationship teams and continuing introduction of quality customers to ANZ

Operating expenses up 8% reflecting the above mentioned investments and on-going business infrastructure

Sound credit quality, which is closely monitored

Strong, low risk lending growth

**Non accrual loans as % of net loans and advances*

Esanda: operational excellence and improved business economics, partly offset by margins pressure

Esanda's profit grew 3% for the half, key drivers and initiatives included;

Operational excellence and improved economics

Esanda has made substantial progress in improving the efficiency of its business

Expenses continue to be well managed, CTI down to 40%

Other operating income increased by 9% due mainly to changes in the fee structure for business lending

Our Australian debenture portfolio grew by 5% in 1H04, reaching \$7b

Signed an alliance with Pratt Water, allowing Esanda to provide funding for irrigators seeking to convert to water saving drip and sprinkler irrigation valued at \$10m per year for 10 years

Strong growth in the equipment leasing segment in particular in IT and mining equipment

Interest Margin

Net Interest Margin declined by 4 basis points due to run off of higher yielding loans during the half

Branding & Advertising

Esanda promoted as easy to deal with, progressive and forward thinking

New ad campaign launched in March 2004 to position Esanda = Car Finance

3 year sponsorship deal agreed with *Wheels Magazine* Car of The Year

Pacific & Personal Banking Asia: a strong franchise adversely affected by strengthening AUD

Solid underlying NPAT performance up 3% (pre exchange rates) reflective of our strength in the region:

ANZ holds either number 1 or 2 market position in all the Pacific markets in which we operate

The Pacific's income is dominated by our Fiji and PNG businesses.

Notwithstanding our dominant position growth opportunities remain in existing and new markets

Our centralised Pacific processing hub in Fiji, Quest, continues to develop its capacity and provision of services to the region.

The strengthening AUD reduced NPAT by \$A4m over the half, key drivers included:

Panin has strong momentum in Indonesia.

Solid growth in Personal Banking Asia due to strong focus on customers requiring Australia and New Zealand related transactions.

Strong NPAT growth in PNG due to increase in foreign exchange earnings

Fiji earnings adversely affected by the suspension of forward foreign exchange trading by the Reserve Bank of Fiji

ANZ New Zealand (ex NBNZ): result affected by inclusion of mortgage business, margin pressure and exchange rates

ANZ (NZ) result was adversely affected by reduced net interest income from mortgages business (mortgage business included for the first time which was previously reported in ANZ's specialist Mortgages business) and exchange rates.

As a result, NPAT was down 3% for the half, however excluding Mortgages, NPAT increased 1%

Personal - strong growth in deposit FUM offset by a decline in fee income, due partly to the removal of non-ANZ ATM fee for NBNZ customers, and lower punitive fee income. The half also saw continued re-investment in the franchise, with the opening of two branches and increased spend on brand image. This increased investment offset net interest income growth of 2% resulting in a flat profit for Personal in the half.

Mortgages after several halves of stable margins, an adverse yield curve in the current half resulted in a 13bp margin contraction in the mortgages business, more than offsetting the good volume growth.

Other solid performance principally from Corporate, driven largely by strong interest income from robust lending and deposit growth and growth in fee income

**includes Business, Rural and Corporate Banking*

ING JV benefits from markets upturn

NPAT increased 5% over the half driven by:

Higher fee income arising from growth in funds under management (FUM)

Higher capital investment earnings, up 7% due to strong equity markets and rising interest rates. These were partially offset by ANZ s capital hedge losses.

Costs remained flat due to tight expense control

INGA maintained its number four Retail FUM position as measured by ASSIRT

Most recent review of valuation model and assumptions performed by Ernst & Young at September 2003 confirmed current carrying value.

Valuation will be performed at least once a year and more often if there is a significant change in circumstances that is likely to impact the value

Current JV Valuation

	\$m
ANZ Contribution to JV	879
Equalisation payment	960
Unrecognised profit on sale of ANZ FM	(248)
Equity accounted profit since inception	100
Carrying value ay Mar-04	1,691

SECTION 6

Credit Quality

Quality of Consumer & SME portfolios again better than expected

Mortgage delinquencies (60 days) improved over the half

Delinquency for customers new to SME since September 2002 is in line with delinquency on legacy SME portfolio

Strong economic conditions and prudent credit practices have continued to see our Retail delinquency and loss rates remain very low

Delinquency for Mortgage products have flattened over the half

delinquencies on RILs and Broker introduced loans have remained in line with the wider portfolio

Australia's low unemployment rate should continue to help maintain the quality of the portfolio

TPMI third party mortgage introducers

O/O owner occupied

*Excludes NBNZ

Mortgages portfolio remains sound

Mortgages Portfolio continues to experience strong growth.

ANZ Lo Doc policy requires a maximum LVR of 60%, maximum loan size \$450k and is only available for standard residential and minimum credit standards.

Low exposure to Inner City residential mortgage lending

Inner City

Total Lending for inner city property at 3.7% of Australian Mortgages portfolio, with 2.1% for investment purposes. Tight policies to control emerging risks include:

valuations required on all new properties

rental income allowable in debt servicing calculation 60%

non-inclusion of negative gearing benefit in serviceability calculation for first time investors

inner city is broadly defined, and extends well beyond CBD

Exposure to Melbourne Docklands area ~0.06% of the Australian mortgages portfolio, or <2% of the inner city lending portfolio

Delinquencies

only 19 customers nationally with arrears >90 days

no delinquencies in the Melbourne Docklands book

Mortgages Australia

Location of inner city lending

OO Owner Occupied

RIL Residential Investment Loan

Offshore power exposure reducing, with markets showing signs of improvement

Total Limits Split by Geography

ANZ's exposure to offshore Power companies has reduced by 23% in the past six months, with the portfolio becoming increasingly Australasian-centric. Domestic markets will continue to be buoyed by traditional non-diversified, regulated, investor-owned businesses.

Furthermore, KMV Median Expected Default Frequencies indicate that offshore power markets are recovering. Credit quality erosion is now abating, with the liquidity crunch faced by merchant energy companies in 2002/03 from the backlog of debt rescheduling now largely alleviated.

US power exposures continue to reduce, although lagged credit effects continue to affect the portfolio

Total US Limits(1)

US: March 2004

Outstandings: \$0.6bn (70%)

Other Committed: \$0.2bn (25%)

Uncommitted: \$0.1bn (5%)

Customers

Investment Grade: 10

Non Accrual: 4

Total: 19

We continue to actively manage our exposure to the US Energy sector.

Over the past 18 months, exposure to the merchant energy sector and other non-core segments has reduced substantially through repayments, sell-downs and restructuring.

Whilst Non Accrual Loans have increased in the US portfolio as a result of the lagged credit effect, prudent management has resulted in a lower level of expected losses from the portfolio. Any further losses can be readily absorbed within existing ELP levels.

(1) Excludes Settlement Limits but includes Contingent and Market-Related products domiciled in the US.

The quality of the Telcos book continues to improve

Total Telcos Limits(1)

March 2004

Outstandings: \$1.69bn (49%)

Other Committed: \$1.01bn (29%)

Uncommitted: \$0.78bn (22%)

KMV Median Expected Default Frequency

Note:

(1) Excludes Settlement Limits but includes Contingent and Market-Related products.

Specific provisions down 27% on 2H03 no large single provisions

Specific Provisions

1H04 Specific Provisions by size

New Specific Provisions down 16% on 2H03

Geographic Specific Provisions

Specific Provisions by Source

Non-accrual loans to Loans & Advances less than half the level of two years ago

**New Non-Accrual Loans relatively
stable, default rate down**

**Non-Accrual Loans as a % of the
portfolio down to just 0.45%**

Existing and future problem loans are well provided for

The period 1998 through March 2004 has seen Group GP trend down to 98bps, consistent with the sustained de-risking of the Group lending book.

As at March 2004, gross non-accrual loans were 45bps of GLAs. Of this, 44% was covered by specific provisioning.

Group levels of general provisioning and specific provision cover compare favorably with Australian banking peer group.

Note:

(1). *As per most recent company financial reports for CBA, NAB and WBC*

Proactive reduction in volume of Top 10 client committed exposures

Implementation of credit management policies to diversify the loan book exposure, has resulted in reducing the client concentration risk, despite the inclusion of NBNZ exposures. This has been achieved through reducing the volume of Top 10 client committed lending.

Sustained management of client exposures has reduced the sensitivity of the capital base of Top 10 clients (to 68% of ACE in March 2004 from 75% of ACE September 2003).

Note:

(1). March 2004 derivative exposures were calculated using a Monte Carlo model to calculate ANZ's potential credit loss. The impact in moving to this methodology reduced the above ratio by 4.4 percentage points in comparison to ANZ's previous methodology.

Concentration risk addressed in business and corporate lending book through management cap on industry exposure

Management has reduced concentration risk in ANZ's business/corporate loan book by limiting industry exposure to 10% of ANZ Group GLAs

Increased diversification of business/corporate lending portfolio across industry segments since 1993 has been accompanied by reallocation of business/corporate lending capacity to retail lines of business

% of ANZ Group Lending Assets

(Australia and New Zealand)

RWA to Total Assets not an accurate measure of risk

RWA/Total Assets under the existing accord is a simplistic measure of risk

RWA/Total Assets is distorted by Life company assets not appearing within RWA

does not consider the default risk of individual lending assets, or security profile

peer banks have higher levels of on-balance sheet derivative revaluations and trading securities which reduce their ratios relative to ANZ

More relevant is the impact of Basel II, which takes a more sophisticated and granular approach

Based on QIS3 results, ANZ is likely to receive a benefit greater than peers, reflecting the underlying quality of our book

Notwithstanding this, APRA unlikely to allow significant capital reductions

(1). The reduction in RWAs using Advanced IRB outcomes (excluding operational risk) when compared with current accord capital requirements can be used as an indicator of the relative riskiness of a bank's assets.

(2). RWA calculations were performed using the capital functions used in QIS 3.0 These may change upon the finalisation of Basel II

**Information as at CBA 30/6/03, WBC 30/09/03, NAB 30/09/03*

SECTION 7

Other Financial Issues

Revenue Hedging

Tax Risk

Capital Position

Dividends

Outlook

Revenue hedging undertaken when appropriate

Revenue hedging only undertaken when currency is believed to be outside its normal trading range and inconsistent with their value

Revenue from FX hedges are reported as Interest Income within the Group Centre

	Notional Principal	Income from hedge	Unrealised gain/loss	Exchange Rate	Expiry date
March 2004					
USD Revenue Hedges	78	15	35	~0.55	September 2005
NZD Revenue Hedges	1,138	14	51	~1.09	September 2008
September 2003					
USD & GBP Revenue Hedges	151	12	37		
NZD Revenue Hedges	1,126	8	53		

Tax risk substantially lowered

Tax risk is an ongoing business risk

We have established a constructive working relationship with the ATO and the IRD

Some higher risk aspects of the operations of the multi-jurisdictional ANZ Investment Bank have been substantially wound back in recent years

NBNZ Structured Finance book will be substantially reduced, with the focus going forward on more sustainable business. NBNZ pre-acquisition tax risk is covered by an indemnity from Lloyds TSB

**Projected NPAT impact from
NBNZ Structured Finance book**

**Proportion of NZ 1H04 NPAT
from Structured Finance Deals***

* Geographic profit adjusted for goodwill and funding costs

Capital position remains strong, and towards the top end of our range

With the acquisition of NBNZ further reducing the risk in the balance sheet, the Group lowered its ACE target range by 50bpts in the half to 4.75% to 5.25%

Capital position is strong, but will be impacted by new APRA treatment of intangibles

this is likely to reduce ACE by approximately 20bp from June onwards

Drivers of ACE ratio

A record interim dividend

The record interim dividend of 47 cents per ordinary share represents an 11.1% increase on the 2003 interim dividend adjusting for the bonus element of the rights issue*

Policy is to increase dividend in line with cash earnings per share growth

Cash payout ratio is calculated against core cash earnings (defined as earnings after hybrid distributions, but before goodwill and significant items)

Expect to sustain full franking capacity for the foreseeable future, despite the lower percentage of Australian profits

*2003 interim dividend discounted by 0.9597 representing the dilution impact of the bonus element of the rights issue

Impact of unwinding TrUEPrS and issuing StEPS

	TrUEPrS	StEPS

SECTION 8

Issued Raised post Results

Is the margin decline driven by asset margin pressures?

Is the growth in trading income sustainable?

Is the balance sheet really lower risk? Why hasn't sub-investment grade lending fallen?

Performance of consumer banking

Margins very low asset margin compression

Material asset margin compression not evident, with only 2bp of the margin decline attributable to competition

Asset growth 2.6% greater than deposit growth

Shortfall is funded primarily by higher cost wholesale funding, which is the principal driver of the 5bp funding & mix impact

It is misleading to measure changes in yield on average lending assets against the cash rate, with 25% of assets repricing over terms of 2 months or greater

Repricing of Australian lending assets

Trading income represents a sustainable source of income

Growth in sub-investment grade lending largely reflects strong SME growth

**Change in sub-investment grade
lending**

Sub-investment grade lending has grown over the past 12 months, primarily reflecting growth in Corporate/SME

It is rare for SME lending to be investment grade, with only ~15% of the overall portfolio investment grade. However loss given default is low, with average security cover on the SME portfolio of 98%

Key drivers of Other growth were Esanda, where lending is secured by the asset being financed, and other areas which tend to be low risk, including Rural and the Pacific

In IFS, which has been the key focus of our de-risking strategy, sub-investment grade lending has fallen by \$1b over the past 12 months

The best measure of credit risk is the ELP rate, which is a function of expected default rate over the cycle and expected loss given default (which in turn is impacted by the level of security held)

Since March 02, the underlying ELP rate has fallen from 39bp to 31bp, reflecting the significant improvement in the quality of our portfolio

It should also be noted that the \$250m GP top up taken in March 02 has had zero impact on ongoing ELP charge

ANZ Australian consumer businesses* out performing peers

**Consumer NPAT growth
superior to peers (pcp)**

**Customer satisfaction at top of
major peer group**

**Deposit volume growth on
par with peers (pcp)**

**ANZ mortgage FUM growth
superior to peers (pcp)**

Source: Roy Morgan Research for the 12 months ended Feb 2004. Peer average includes Westpac only, CBA and NAB. Data based on rolling 12 month averages. Respondents hold transaction account at their nominated main financial institution. Satisfaction is defined as very or fairly satisfied. Can't says are included in the base.

**ANZ includes PBA, Consumer Finance and Mortgages, NPAT adjusted for cards under accrual*

WBC includes Consumer Distribution and Consumer Products

SGB includes Personal Customers (excludes BankSA)
