Western Asset Intermediate Muni Fund Inc.

Schedule of Investments (unaudited) (continued)

September 30, 2008

- (a) Income from this issue is considered a preference item for purposes of calculating the alternative minimum tax (AMT).
- (b) Bonds are escrowed to maturity by government securities and/or U.S. government agency securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (c) Pre-Refunded bonds are escrowed with U.S. government obligations and/or U.S. government agency securities and are considered by the manager to be triple-A rated even if issuer has not applied for new ratings.
- (d) Security is currently in default.
- (e) Variable rate security. Interest rate disclosed is that which is in effect at September 30, 2008.
- (f) Maturity date shown represents the mandatory tender date.
- (g) All or a portion of this security is held at the broker as collateral for open futures contracts.
- (h) Residual interest bonds coupon varies inversely with level of short-term tax-exempt interest rates.
- (i) Variable rate demand obligations have a demand feature under which the Fund can tender them back to the issuer on no more than 7 days notice. Date shown is the date of the next interest rate change.
- # Aggregate cost for federal income tax purposes is substantially the same.

Abbreviations used in this schedule:

ACA - American Capital Assurance - Insured Bonds
AMBAC - Ambac Assurance Corporation - Insured Bonds

Bond Ratings (unaudited)

The definitions of the applicable rating symbols are set forth below:

Standard & Poor s Ratings Service (Standard & Poor s) Ratings from AA to CCC may be modified by the addition of a plus (+) or minus () sign to show relative standings within the major rating categories.

AAA Bonds ra	ited AAA	have the highest rating assigned by Standard	d & Poor s. Capacity to pay interest and repay princ	cipal is
--------------	----------	--	--	----------

extremely strong.

AA Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in

a small degree.

A Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the

adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

BBB Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally

exhibit adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a

weakened capacity to pay interest and repay principal for bonds in this category than in higher rated categories.

BB, B, CCC,

Aa

CC and C Bonds rated BB, B, CCC, CC and C are regarded, on balance, as predominantly speculative with respect to capacity to pay interest and repay principal in accordance with the terms of the obligation. BB represents the lowest degree of speculation and

C the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are

outweighed by large uncertainties or major risk exposures to adverse conditions.

D Bonds rated D are in default and payment of interest and/or repayment of principal is in arrears.

Moody s Investors Service (Moody s) Numerical modifiers 1, 2 and 3 may be applied to each generic rating from Aa to Caa, where 1 is the highest and 3 the lowest ranking within its generic category.

Aaa Bonds rated Aaa are judged to be of the best quality. They carry the smallest degree of investment risk and are generally referred to as gilt edge. Interest payments are protected by a large or by an exceptionally stable margin and principal is secure. While the various protective elements are likely to change, such changes can be visualized as most unlikely to impair the

While the various protective elements are likely to change, such changes can be visualized as most unlikely to impair the fundamentally strong position of such issues.

Bonds rated Aa are judged to be of high quality by all standards. Together with the Aaa group they comprise what are generally known as high grade bonds. They are rated lower than the best bonds because margins of protection may not be as large as in Aaa securities or fluctuation of protective elements may be of greater amplitude or there may be other elements present which make the long-term risks appear somewhat larger than in Aaa securities.

A Bonds rated A possess many favorable investment attributes and are to be considered as upper medium grade obligations.

Factors giving security to principal and interest are considered adequate but elements may be present which suggest a

susceptibility to impairment some time in the future.

Baa Bonds rated Baa are considered as medium grade obligations, i.e., they are neither highly protected nor poorly secured. Interest payments and principal security appear adequate for the present but certain protective elements may be lacking or may be characteristically unreliable over any great length of time. Such bonds lack outstanding investment characteristics and in fact

have speculative characteristics as well.

Ba Bonds rated Ba are judged to have speculative elements; their future cannot be considered as well assured. Often the protection

of interest and principal payments may be very moderate and therefore

Bond Ratings (unaudited)(continued)

not well safeguarded during both good and bad times over the future. Uncertainty of

position characterizes bonds in this class.

Bonds rated B generally lack characteristics of desirable investments. Assurance of

interest and principal payments or of maintenance of other terms of the contract

over any long period of time may be small.

Bonds rated Caa are of poor standing. These may be in default, or present elements

of danger may exist with respect to principal or interest.

Bonds rated Ca represent obligations which are speculative in a high degree. Such

issues are often in default or have other marked short-comings.

Bonds rated C are the lowest class of bonds and issues so rated can be regarded as having extremely poor prospects of ever attaining any real investment standing.

Fitch Ratings Service (Fitch) Ratings from AA to CCC may be modified by the addition of a plus (+) or minus () sign to show relative standings within the major rating categories.

AAA Bonds rated AAA have the highest rating assigned by Fitch. Capacity to pay interest and repay principal is extremely strong.

AA Bonds rated AA have a very strong capacity to pay interest and repay principal and differ from the highest rated issues only in a

sman degree.

A Bonds rated A have a strong capacity to pay interest and repay principal although they are somewhat more susceptible to the

adverse effects of changes in circumstances and economic conditions than debt in higher rated categories.

BBB Bonds rated BBB are regarded as having an adequate capacity to pay interest and repay principal. Whereas they normally exhibit

adequate protection parameters, adverse economic conditions or changing circumstances are more likely to lead to a weakened

capacity to pay interest and repay principal for bonds in this category than in higher rated categories.

BB, B,

B

Caa

Ca

C

CCC

and CC Bonds rated BB, B, CCC and CC are regarded, on balance, as predominantly speculative with respect to capacity to pay interest

and repay principal in accordance with the terms of the obligation. BB represents a lower degree of speculation than B, and CC

the highest degree of speculation. While such bonds will likely have some quality and protective characteristics, these are

outweighed by large uncertainties or major risk exposures to adverse conditions.

NR Indicates that the bond is not rated by Standard & Poor s, Moody s or Fitch.

Short-Term Security Ratings (unaudited)

SP-1 Standard & Poor s highest rating indicating very strong or strong capacity to pay principal and interest; those issues determined

to possess overwhelming safety characteristics are denoted with a plus (+) sign.

A-1 Standard & Poor s highest commercial paper and variable-rate demand obligation (VRDO) rating indicating that the degree of

safety regarding timely payment is either overwhelming or very strong; those issues determined to possess overwhelming safety

characteristics are denoted with a plus (+) sign.

VMIG 1 Moody s highest rating for issues having a demand feature VRDO.

MIG1 Moody s highest rating for short-term municipal obligations.

P-1 Moody s highest rating for commercial paper and for VRDO prior to the advent of the VMIG 1 rating.

F1 Fitch s highest rating indicating the strongest capacity for timely payment of financial commitments; those issues determined to

possess overwhelming strong credit feature are denoted with a plus (+) sign.

Notes to Schedule of Investments (unaudited)
------------------------------------	------------

1. Organization and Significant Accounting Policies

Western Asset Intermediate Muni Fund Inc. (the Fund) was incorporated in Maryland on December 19, 1991 and is registered as a diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Board of Directors authorized 100 million shares of \$0.001 par value common stock. The Fund s investment objective is to provide common shareholders a high level of current income exempt from regular federal income taxes consistent with prudent investing.

The following are significant accounting policies consistently followed by the Fund and are in conformity with U.S. generally accepted accounting principles (GAAP).

(a) Financial Futures Contracts. The Fund may enter into financial futures contracts typically to hedge a portion of the portfolio. Upon entering into a financial futures contract, the Fund is required to deposit cash or securities as initial margin, equal in value to a certain percentage of the contract amount (initial margin deposit). Additional securities are also segregated up to the current market value of the financial futures contracts. Subsequent payments, known as variation margin, are made or received by the Fund each day, depending on the daily fluctuations in the value of the underlying financial instruments. For foreign currency denominated futures contracts, variation margins are not settled daily. The Fund recognizes an unrealized gain or loss equal to the fluctuation in the value. When the financial futures contracts are closed, a realized gain or loss is recognized equal to the difference between the proceeds from (or cost of) the closing transactions and the Fund s basis in the contracts.

The risks associated with entering into financial futures contracts include the possibility that a change in the value of the contract may not correlate with the changes in the value of the underlying financial instruments. In addition, investing in financial futures contracts involves the risk that the Fund could lose more than the initial margin deposit and subsequent payments required for a futures transaction. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

(b) Security Transactions. Security transactions are accounted for on a trade date basis.

2. Investment Valuation

Effective January 1, 2008, the Fund adopted Statement of Financial Accounting Standards No. 157 (FAS 157). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund s own assumptions in determining the fair value of investments)

Securities are valued at the mean between the last quoted bid and asked prices provided by an independent pricing service that are based on transactions in municipal obligations, quotations from municipal bond dealers, market transactions in comparable securities and various other relationships between securities. When prices are not readily available, or are determined not to reflect fair value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund s Board of Directors. Short-term obligations with maturities of 60 days or less are valued at amortized cost, which approximates fair value.

The following is a summary of the inputs used in valuing the Fund s assets carried at fair value:

	September 30, 2008	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments in Securities	\$169,744,371		\$169,744,371	
Other Financial Instruments*	247,653	\$247,653		
Total	\$169,992,024	\$247,653	\$169,744,371	

^{*} Other financial instruments include futures contracts.

Notes to Schedule of Investments (unaudited) (continued)

3. Investments

At September 30, 2008, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 2,709,974
Gross unrealized depreciation	(8,742,461)
Net unrealized depreciation	\$ (6,032,487)

At September 30, 2008, the Fund had the following open futures contracts:

	Number of Contracts	Expiration Date	Basis Value	Market Value	Unrealized Gain
Contracts to Sell:					
U.S. 10-Year Treasury Notes	345	12/08	\$39,793,278	\$39,545,625	\$247,653

4. Recent Accounting Pronouncement

In March 2008, the Financial Accounting Standards Board issued the Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (FAS 161). FAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. FAS 161 requires enhanced disclosures about the Funds derivative and hedging activities, including how such activities are accounted for and their effect on the Funds financial position, performance and cash flows. Management is currently evaluating the impact the adoption of FAS 161 will have on the Funds financial statements and related disclosures.

ITEM 2. CONTROLS AND PROCEDURES.

(a) The registrant s principal executive officer and principal financial officer have

concluded that the registrant s disclosure controls and procedures (as defined in Rule 30a- 3(c) under the Investment Company Act of 1940, as amended (the 1940 Act)) are effective as of a date within 90 days of the filing date of this report that includes the disclosure required by this paragraph, based on their evaluation of the disclosure controls and procedures required by Rule 30a-3(b) under the 1940 Act and

15d-15(b) under the Securities Exchange Act of 1934.

(b) There were no changes in the registrant s internal control over financial reporting (as

defined in Rule 30a-3(d) under the 1940 Act) that occurred during the registrant s last

fiscal quarter that have materially affected, or are likely to materially affect the

registrant s internal control over financial reporting.

ITEM 3. EXHIBITS.

Certifications pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are attached hereto.
