NR=Not Rated

- 
- Credit ratings given by the Standard & Poor's Division of The McGraw-Hill Companies, Inc. ( S&P ) and Moody's Investors Service, Inc. ( Moody's ) are unaudited.
  - Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration, normally to qualified institutional buyers. At March 31, 2009, these securities amounted to a value of \$19,806,513 or 15.5% of net assets.
  - + Step Bond The interest rate is as of March 31, 2009 and will reset at a future date.
  - ø Bond is currently in default.
  - \* Non-income producing security.
  - ^ Not readily marketable security; security is valued at fair value as determined in good faith by, or under the direction of, the Board of Directors.
  - # Variable rate obligations The interest rate is the rate as of March 31, 2009.

**Currency Abbreviations:**

EUR = Euro Currency

GBP = British Pound

USD = United States Dollar

**Security Valuation** The net asset value of the Fund is determined daily as of the close of regular trading on the New York Stock Exchange, Inc. (the Exchange ) on each day the Exchange is open for business. Debt securities with a remaining maturity greater than 60 days are valued in accordance with the price supplied by a pricing service, which may use a matrix, formula or other objective method that takes into consideration market indices, yield curves and other specific adjustments. Debt obligations that will mature in 60 days or less are valued on the basis of amortized cost, which approximates market value, unless it is determined that using this method would not represent fair value. Equity investments are valued at market value, which is generally determined using the closing price on the exchange or market on which the security is primarily traded at the time of valuation (the Valuation Time ). If no sales are reported, equity investments are generally valued at the most recent bid quotation as of the Valuation Time or at the lowest asked quotation in the case of a short sale of securities. Investments in mutual funds are valued at the mutual fund's closing net asset value per share on the day of valuation. Securities and other assets for which market quotations are not readily available, or whose values have been materially affected by events occurring before the Fund's Valuation Time but after the close of the securities' primary markets, are valued at fair value as determined in good faith by, or under the direction of, the Board of Directors under procedures established by the Board of Directors.

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements ( FAS 157 ), effective January 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive upon selling an

investment in a timely transaction to an independent buyer in the principal or most advantageous market of the investment. FAS 157 established a three-tier hierarchy to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, for example, the risk inherent in a particular valuation technique used to measure fair value including such a pricing model and/or the risk inherent in the inputs to the

valuation technique. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

- Level 1 quoted prices in active markets for identical investments
- Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used as of March 31, 2009 in valuing the Fund's investments carried at value:

Valuation Inputs	Investments in Securities	Other Financial Instruments*
Level 1 - Quoted Prices	\$ 148,878	\$ 55,228
Level 2 - Other Significant Observable Inputs	123,102,744	
Level 3 - Significant Unobservable Inputs	96,073	
<b>Total</b>	<b>\$ 123,347,695</b>	<b>\$ 55,228</b>

\* Other financial instruments include futures, forwards and swap contracts.

**Federal Income Tax Cost** At March 31, 2009, the identified cost for federal income tax purposes, as well as the gross unrealized appreciation from investments for those securities having an excess of value over cost, gross unrealized depreciation from investments for those securities having an excess of cost over value and the net unrealized depreciation from investments were \$189,655,606, \$385,757, \$(66,693,668) and \$(66,307,911), respectively.
