UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the Quarterly Period Ended May 4, 2012

THE TORO COMPANY

(Exact name of registrant as specified in its charter)

Delaware
(State of Incorporation)

1-8649
(Commission File Number)

41-0580470
(I.R.S. Employer Identification Number)

8111 Lyndale Avenue South
Bloomington, Minnesota 55420
Telephone number: (952) 888-8801

(Address, including zip code, and telephone number, including area code, of registrant's principal executive offices)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject

Edgar Filing: TORO CO - Form 10-Q

to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐
(Do not check if a smaller reporting company)

Smaller reporting company ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The number of shares of Common Stock outstanding as of May 30, 2012 was 29,479,893.

THE TORO COMPANY AND SUBSIDIARIES

Notes to Condensed Consolidated Financial Statements (Unaudited)

May 4, 2012

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and do not include all the information and notes required by U.S. generally accepted accounting principles (U.S. GAAP) for complete financial statements. Unless the context indicates otherwise, the terms company and Toro refer to The Toro Company and its consolidated subsidiaries. In the opinion of management, the unaudited condensed consolidated financial statements include all adjustments, consisting primarily of recurring accruals, considered necessary for a fair presentation of the financial position and results of operations. Certain amounts from prior periods financial statements have been reclassified to conform to this period's presentation. Since the company's business is seasonal, operating results for the six months ended May 4, 2012 cannot be annualized to determine the expected results for the fiscal year ending October 31, 2012. Additional factors that could cause the company's actual results to differ materially from its expected results, including any forward-looking statements made in this report, are described in the company's most recently filed Annual Report on Form 10-K (Item 1A. Risk Factors) and later in this report under Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations Forward-Looking Information.

The company's fiscal year ends on October 31, and quarterly results are reported based on three-month periods that generally end on the Friday closest to the quarter end. For comparative purposes, however, the company's second and third quarters always include exactly 13 weeks of results so that the quarter end date for these two quarters is not necessarily the Friday closest to the quarter end.

For further information, refer to the consolidated financial statements and notes included in the company's Annual Report on Form 10-K for the fiscal year ended October 31, 2011. The policies described in that report are used for preparing quarterly reports.

Accounting Policies

In preparing the consolidated financial statements in conformity with U.S. GAAP, management must make decisions that impact the reported amounts of assets, liabilities, revenues, expenses, and the related disclosures, including disclosures of contingent assets and liabilities. Such decisions include the selection of the appropriate accounting principles to be applied and the assumptions on which to base accounting estimates. Estimates are used in determining, among other items, sales promotions and incentives accruals, inventory valuation, warranty reserves, earnout liabilities, allowance for doubtful accounts, pension and postretirement accruals, self-insurance accruals, and useful lives for tangible and intangible assets. These estimates and assumptions are based on management's best estimates and judgments at the time they are made. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors that management believes to be reasonable under the circumstances, including the current economic environment. Management adjusts such estimates and assumptions when facts and circumstances dictate. A number of these factors are discussed in the company's Annual Report on Form 10-K (Item 1A. Risk Factors) for the fiscal year ended October 31, 2011, which may increase the uncertainty inherent in such estimates and assumptions. As future events and their effects cannot be determined with certainty, actual amounts could differ significantly from those estimated at the time the consolidated financial statements are prepared. Changes in those estimates will be reflected in the consolidated financial statements in future

periods.

New Accounting Pronouncement Adopted

In May 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS*. The amendments result in a consistent definition of fair value and common requirements for measurement of and disclosure regarding fair value between U.S. GAAP and International Financial Reporting Standards. Specifically, the amendments clarify the application of existing fair value measurement and disclosure requirements, including: a) application of the highest and best use and valuation premise concepts, b) measurement of the fair value of an instrument classified in a reporting entity's shareholders equity, and c) quantitative disclosure about the unobservable inputs used in a fair value measurement that is categorized within Level 3 of the fair value hierarchy. The amendments also change a particular principle or requirement for fair value measurement and disclosure, including: a) measurement of the fair value of financial instruments that are managed within a portfolio, b) application of premiums and discounts in a fair value measurement, and c) additional disclosure about fair value measurements. The company adopted the amendments of ASU No.

Table of Contents

2011-04 at the beginning of its fiscal 2012 second quarter, as required. The adoption of this guidance did not have an impact on the company's consolidated financial statements.

Acquisitions

On December 9, 2011, during the first quarter of fiscal 2012, the company completed the acquisition of certain assets and assumed certain liabilities for a greens roller product line for the golf course market. On February 10, 2012, during the second quarter of fiscal 2012, the company completed the acquisition of certain assets and assumed certain liabilities for an equipment line of vibratory plows, trenchers, and horizontal directional drills for the underground utilities market. On April 25, 2012, also during the second quarter of fiscal 2012, the company completed the acquisition of certain assets for an equipment line of concrete and mortar mixers, material handlers, compaction equipment, and other concrete power tools for the rental and light construction market. The aggregate purchase price of these acquisitions was \$11.1 million and accounted for as business combinations.

These acquisitions were immaterial individually and, in the aggregate, based on the company's consolidated financial condition and results of operations.

Comprehensive Income

Comprehensive income and the components of other comprehensive income (loss) were as follows:

(Dollars in thousands)	Three Months Ended		Six Months Ended	
	May 4, 2012	April 29, 2011	May 4, 2012	April 29, 2011
Net earnings	\$ 68,818	\$ 60,250	\$ 88,741	\$ 77,532
Other comprehensive income (loss):				
Cumulative translation adjustments	(705)	7,382	(1,755)	6,957
Pension liability adjustment, net of tax		(257)		(257)
Unrealized (loss) gain on derivative instruments, net of tax	(748)	(607)	937	330
Comprehensive income	\$ 67,365	\$ 66,768	\$ 87,923	\$ 84,562

Stock-Based Compensation*Stock Option Awards*

Edgar Filing: TORO CO - Form 10-Q

Under the company's equity and incentive plan, stock options are granted with an exercise price equal to the closing price of the company's common stock on the date of grant, as reported by the New York Stock Exchange. Options are generally granted to officers, other employees, and non-employee members of the company's Board of Directors on an annual basis in the first quarter of the company's fiscal year. Options generally vest one-third each year over a three-year period and have a ten-year term. Other options granted to certain key employees vest in full on the three-year anniversary of the date of grant and have a ten-year term. Compensation expense equal to the grant date fair value is generally recognized for these awards over the vesting period. Stock options granted to officers and other employees are subject to accelerated expensing if the option holder meets the retirement definition set forth in the plan. In that case, the fair value of the options is expensed in the fiscal year of grant because the option holder must be employed as of the end of the fiscal year in which the options are granted in order for the options to continue to vest following retirement. Similarly, if a non-employee director has served on the company's Board of Directors for ten full fiscal years or more, the fair value of the options granted is fully expensed on the date of the grant.

The fair value of each stock option is estimated on the date of grant using the Black-Scholes valuation method with the assumptions noted in the table below. The expected life is a significant assumption as it determines the period for which the risk-free interest rate, volatility, and dividend yield must be applied. The expected life is the average length of time in which officers, other key employees, and non-employee directors are expected to exercise their stock options, which is primarily based on historical experience. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. Expected volatilities are based on the movement of the company's common stock over the most recent historical period equivalent to the expected life of the option. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury rate over the expected life at the time of grant. Dividend yield is estimated over the expected life based on the company's dividend policy, historical cash dividends paid, expected future cash dividends, and expected changes in the company's stock price.

Edgar Filing: TORO CO - Form 10-Q

Table of Contents

The following table illustrates the assumptions for options granted in the following fiscal periods.

	Fiscal 2012	Fiscal 2011
Expected life of option in years	6	6
Expected volatility	34.87% - 35.02%	33.34% - 33.43%
Weighted-average volatility	35.01%	33.42%
Risk-free interest rate	1.20%	1.72% - 2.36%
Expected dividend yield	1.31% - 1.40%	1.04% - 1.16%
Weighted-average dividend yield	1.32%	1.05%
Grant date per share weighted-average fair value	\$17.10	\$20.30

Performance Share Awards

The company grants performance share awards to executive officers and other employees under which they are entitled to receive shares of the company's common stock contingent on the achievement of performance goals of the company, which are generally measured over a three-year period. The number of shares of common stock a participant receives will be increased (up to 200 percent of target levels) or reduced (down to zero) based on the level of achievement of performance goals and will vest at the end of a three-year period. Performance share awards are granted on an annual basis in the first quarter of the company's fiscal year. Compensation expense is recognized for these awards on a straight-line basis over the vesting period based on the per share fair value as of the date of grant and the probability of achieving performance goals. The per share fair value of performance share awards granted during the first quarter of each of fiscal 2012 and 2011 was \$56.47 and \$60.98, respectively. No performance share awards were granted during the second quarter of fiscal 2012 or 2011.

Restricted Stock Awards

Under the company's equity and incentive plan, restricted stock awards are generally granted to certain non-officer employees. Restricted stock awards generally vest one-third each year over a three-year period or vest in full on the three-year anniversary of the date of grant. Compensation expense equal to the grant date fair value, which is equal to the closing price of the company's common stock on the date of grant multiplied by the number of shares subject to the restricted stock award, is recognized for these awards over the vesting period. The per share weighted-average fair value of restricted stock awards granted during the first six months of fiscal 2012 and 2011 was \$61.41 and \$63.42, respectively.

Per Share Data

Reconciliations of basic and diluted weighted-average shares of common stock outstanding are as follows:

	Three Months Ended		Six Months Ended	
(Shares in thousands)	May 4, 2012	April 29, 2011	May 4, 2012	April 29, 2011

Edgar Filing: TORO CO - Form 10-Q

<u>Basic</u>				
Weighted-average number of shares of common stock	29,939	31,447	29,960	31,645
Assumed issuance of contingent shares			7	5
Weighted-average number of shares of common stock and assumed issuance of contingent shares	29,939	31,447	29,967	31,650
<u>Diluted</u>				
Weighted-average number of shares of common stock and assumed issuance of contingent shares	29,939	31,447	29,967	31,650
Effect of dilutive securities	541	573	514	578
Weighted-average number of shares of common stock, assumed issuance of contingent shares, and effect of dilutive securities	30,480	32,020	30,481	32,228

Options to purchase an aggregate of 142,834 and 222,360 shares of common stock outstanding during the second quarter of fiscal 2012 and 2011, respectively, were excluded from the diluted net earnings per share calculation because their exercise prices were greater than the average market price of the company's common stock during the same respective periods. Options to purchase an aggregate of 234,621 and 177,641 shares of common stock outstanding during the year-to-date periods through the second quarter of fiscal 2012 and 2011, respectively, were excluded from the diluted net earnings per share calculations because their exercise prices were greater than the average market price of the company's common stock during the same respective periods.

Table of Contents**Inventories**

Inventories are valued at the lower of cost or net realizable value, with cost determined by the last-in, first-out (LIFO) method for most inventories and first-in, first-out (FIFO) method for all other inventories. The company establishes a reserve for excess, slow-moving, and obsolete inventory that is equal to the difference between the cost and estimated net realizable value for that inventory. These reserves are based on a review and comparison of current inventory levels to the planned production, as well as planned and historical sales of the inventory.

Inventories were as follows:

(Dollars in thousands)	May 4, 2012	April 29, 2011	October 31, 2011
Raw materials and work in process	\$ 100,167	\$ 75,964	\$ 94,176
Finished goods and service parts	211,638	239,604	189,855
Total FIFO value	311,805	315,568	284,031
Less: adjustment to LIFO value	61,001	55,742	61,001
Total	\$ 250,804	\$ 259,826	\$ 223,030

Goodwill

The changes in the net carrying amount of goodwill for the first six months of fiscal 2012 were as follows:

(Dollars in thousands)	Professional Segment	Residential Segment	Total
Balance as of October 31, 2011	\$ 80,990	\$ 11,030	\$ 92,020
Translation adjustments	(9)	(23)	(32)
Balance as of May 4, 2012	\$ 80,981	\$ 11,007	\$ 91,988

Other Intangible Assets

The components of other amortizable intangible assets were as follows:

(Dollars in thousands)	Estimated Life (Years)	Gross Carrying Amount	Accumulated Amortization	Net
<u>May 4, 2012</u>				
Patents	1.5-13	\$ 9,593	\$ (7,760)	\$ 1,833

Non-amortizable - trade names		5,281		5,281
Total other intangible assets, net		\$ 56,659	\$ (21,113)	\$ 35,546

Table of Contents

Amortization expense for intangible assets during the first six months of fiscal 2012 was \$2.9 million. Estimated amortization expense for the remainder of fiscal 2012 and succeeding fiscal years is as follows: fiscal 2012 (remainder), \$3.0 million; fiscal 2013, \$5.8 million; fiscal 2014, \$5.4 million; fiscal 2015, \$5.2 million; fiscal 2016, \$4.7 million; fiscal 2017, \$3.7 million; and after fiscal 2017, \$2.8 million.

Investment in Joint Venture

In 2009, the company and TCF Inventory Finance, Inc. (TCFIF), a subsidiary of TCF National Bank, established Red Iron Acceptance, LLC (Red Iron), a joint venture in the form of a Delaware limited liability company that provides inventory financing, including floor plan and open account receivable financing, to distributors and dealers of the company's products in the U.S. and to select distributors of the company's products in Canada. As described in Part II, Item 5 of this Quarterly Report on Form 10-Q, on June 6, 2012, the company and TCFIF entered into amendments to certain of the agreements pertaining to Red Iron, among other things, to extend the initial term of Red Iron until October 31, 2017, subject to unlimited automatic two-year extensions thereafter. Either the company or TCFIF may elect not to extend the initial term or any subsequent term by giving one-year notice to the other party of its intention not to extend the term. Additionally, in connection with the joint venture, the company and an affiliate of TCFIF entered into an arrangement to provide inventory financing to dealers of the company's products in Canada. In connection with the establishment of Red Iron, the company terminated its agreement with a third party financing company that previously provided floor plan financing to dealers of the company's products in the U.S. and Canada.

The company owns 45 percent of Red Iron and TCFIF owns 55 percent of Red Iron. The company accounts for its investment in Red Iron under the equity method of accounting. Each of the company and TCFIF contributed a specified amount of the estimated cash required to enable Red Iron to purchase the company's inventory financing receivables and to provide financial support for Red Iron's inventory financing programs. Red Iron borrows the remaining requisite estimated cash utilizing a \$450 million secured revolving credit facility established under a credit agreement between Red Iron and TCFIF. The company's total investment in Red Iron as of May 4, 2012 was \$18.0 million. The company has not guaranteed the outstanding indebtedness of Red Iron. The company has agreed to repurchase products repossessed by Red Iron and the TCFIF Canadian affiliate, up to a maximum aggregate amount of \$7.5 million in a calendar year. In addition, the company has provided recourse to Red Iron for certain outstanding receivables, which amounted to a maximum amount of \$0.2 million as of May 4, 2012.

Under the repurchase agreement between Red Iron and the company, Red Iron provides financing for certain dealers and distributors. These transactions are structured as an advance in the form of a payment by Red Iron to the company on behalf of a distributor or dealer with respect to invoices financed by Red Iron. These payments extinguish the obligation of the dealer or distributor to make payment to the company under the terms of the applicable invoice. Under separate agreements between Red Iron and the dealers and distributors, Red Iron provides loans to the dealers and distributors for the advances paid by Red Iron to the company. The net amount of new receivables financed for dealers and distributors under this arrangement for the six months ended April 30, 2012 and April 29, 2011 was \$615.2 million and \$593.3 million, respectively.

As of April 30, 2012, Red Iron's total assets were \$352.0 million and total liabilities were \$312.0 million.

Warranty Guarantees

Edgar Filing: TORO CO - Form 10-Q

The company's products are warranted to ensure customer confidence in design, workmanship, and overall quality. Warranty coverage is for specified periods of time and on select products' hours of usage, and generally covers parts, labor, and other expenses for non-maintenance repairs. Warranty coverage generally does not cover operator abuse or improper use. An authorized company distributor or dealer must perform warranty work. Distributors and dealers submit claims for warranty reimbursement and are credited for the cost of repairs, labor, and other expenses as long as the repairs meet prescribed standards. Warranty expense is accrued at the time of sale based on the estimated number of products under warranty, historical average costs incurred to service warranty claims, the trend in the historical ratio of claims to sales, the historical length of time between the sale and resulting warranty claim, and other minor factors. Special warranty reserves are also accrued for major rework campaigns. The company also sells extended warranty coverage on select products for a prescribed period after the factory warranty period expires.

Edgar Filing: TORO CO - Form 10-Q

Table of Contents

Warranty provisions, claims, changes in estimates, and additions from acquisitions for the first six months of fiscal 2012 and 2011 were as follows:

(Dollars in thousands)	Six Months Ended	
	May 4, 2012	April 29, 2011
Beginning balance	\$ 62,730	\$ 56,934
Warranty provisions	22,263	22,253
Warranty claims	(13,573)	(11,709)
Changes in estimates	1,461	1,541
Additions from acquisitions	200	250
Ending balance	\$ 73,081	\$ 69,269

Segment Data

The presentation of segment information reflects the manner in which management organizes segments for making operating decisions and assessing performance. On this basis, the company has determined it has three reportable business segments: Professional, Residential, and Distribution. The Distribution segment, which consists of company-owned domestic distributorships, has been combined with the company's corporate activities and elimination of intersegment revenues and expenses that is shown as Other in the following tables due to the insignificance of the segment.

The following table shows the summarized financial information concerning the company's reportable segments:

(Dollars in thousands)				
Three months ended May 4, 2012	Professional	Residential	Other	Total

Treasury Share Retirement

On November 30, 2011, the company's Board of Directors authorized the retirement of 15 million treasury shares.

Derivative Instruments and Hedging Activities

The company is exposed to foreign currency exchange rate risk arising from transactions in the normal course of business, such as sales to third party customers, sales and loans to wholly owned foreign subsidiaries, foreign plant operations, and purchases from suppliers. The company actively manages the exposure of its foreign currency exchange rate market risk by entering into various hedging instruments, authorized under company policies that place controls on these activities, with counterparties that are highly rated financial institutions. The company's hedging activities primarily involve the use of forward currency contracts and cross currency swaps that are intended to offset intercompany loan exposures. The company uses derivative instruments only in an attempt to limit underlying exposure from foreign currency exchange rate fluctuations and to minimize earnings and cash flow volatility associated with foreign currency exchange rate changes. Decisions on whether to use such contracts are primarily based on the amount of exposure to the currency involved and an assessment of the near-term market value for each currency. The company's policy does not allow the use of derivatives for trading or speculative purposes. The company also has made an accounting policy election to use the portfolio exception permitted in ASU No. 2011-04 with respect to measuring counterparty credit risk for derivative instruments, and to measure the fair value of a portfolio of financial assets and financial liabilities on the basis of the net open risk position with each counterparty. The company's primary foreign currency exchange rate exposures are with the Euro, the Australian dollar, the Canadian dollar, the British pound, the Mexican peso, the Japanese yen, the Chinese Yuan, the Romanian New Lei against the U.S. dollar, as well as the Romanian New Lei against the Euro.

Cash flow hedges. The company recognizes all derivative instruments as either assets or liabilities at fair value on the consolidated balance sheet and formally documents relationships between cash flow hedging instruments and hedged items, as well as its risk-management objective and strategy for undertaking hedge transactions. This process includes linking all derivatives to the forecasted transactions, such as sales to third parties and foreign plant operations. Changes in fair values of outstanding cash flow hedge derivatives, except the ineffective portion, are recorded in other comprehensive income (OCI), until net earnings is affected by the variability of cash flows of the hedged transaction. Gains and losses on the derivative representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in net earnings. The consolidated statement of earnings classification of effective hedge results is the same as that of the underlying exposure. Results of hedges of sales and foreign plant operations are recorded in net sales and cost of sales, respectively, when the underlying hedged transaction affects net earnings. The maximum amount of time the company hedges its exposure to the variability in future cash flows for forecasted trade sales and purchases is two years.

The company formally assesses, at a hedge's inception and on an ongoing basis, whether the derivatives that are used in the hedging transaction have been highly effective in offsetting changes in the cash flows of the hedged items and whether those derivatives may be expected to remain highly effective in future periods. When it is determined that a derivative is not, or has ceased to be, highly effective as a hedge, the company discontinues hedge accounting prospectively. When the company discontinues hedge accounting because it is no longer probable, but it is still reasonably possible that the forecasted transaction will occur by the end of the originally expected period or within an additional two-month period of time thereafter, the gain or loss on the derivative remains in accumulated other comprehensive loss (AOCL) and is reclassified to net earnings when the forecasted transaction affects net earnings. However, if it is probable that a forecasted transaction will not occur by the end of the originally specified time period or within an additional two-month period of time thereafter, the gains and losses that were in AOCL are recognized immediately in net earnings. In all situations in which hedge accounting is discontinued and the derivative remains outstanding, the company carries the derivative at its fair value on the consolidated balance sheet, recognizing future changes in the fair value in other income, net. For the second quarter of fiscal 2012, there were no gains or losses on contracts reclassified into earnings as a result of the discontinuance of cash flow hedges. As of May 4, 2012, the notional amount outstanding of forward contracts designated as cash flow hedges was \$56.5

million.

Derivatives not designated as hedging instruments. The company also enters into foreign currency contracts that include forward currency contracts and cross currency swaps to mitigate the change in fair value of specific assets and liabilities on the consolidated balance sheet. These contracts are not designated as hedging instruments. Accordingly, changes in the fair value of hedges of recorded balance sheet positions, such as cash, receivables, payables, intercompany notes, and other various contractual claims to pay or receive foreign currencies other than the functional currency, are recognized immediately in other

Foreign exchange contracts	Other income, net	\$ 158	\$ (8,016)	\$ 4,506	\$ (9,509)

Table of Contents**Fair Value Measurements**

The company categorizes its assets and liabilities into one of three levels based on the assumptions (inputs) used in valuing the asset or liability. Estimates of fair value for financial assets and financial liabilities are based on the framework established in the accounting guidance for fair value measurements. The framework defines fair value, provides guidance for measuring fair value and requires certain disclosures. The framework discusses valuation techniques such as the market approach (comparable market prices), the income approach (present value of future income or cash flow), and the cost approach (cost to replace the service capacity of an asset or replacement cost). The framework utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. Level 1 provides the most reliable measure of fair value, while Level 3 generally requires significant management judgment. The three levels are defined as follows:

Level 1 Unadjusted quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 Unobservable inputs reflecting management's assumptions about the inputs used in pricing the asset or liability.

Cash and cash equivalents are valued at their carrying amounts in the consolidated balance sheets, which are reasonable estimates of their fair value due to their short-term maturities. Foreign currency forward exchange contracts are valued at fair market value using the market approach based on exchange rates as of the reporting date, which is the amount the company would receive or pay to terminate the contracts. The unfunded deferred compensation liability is primarily subject to changes in fixed-income investment contracts based on current yields. For accounts receivable and accounts payable, carrying amounts are a reasonable estimate of fair value given their short-term nature.

Assets and liabilities measured at fair value on a recurring basis, as of May 4, 2012, April 29, 2011, and October 31, 2011 are summarized below:

(Dollars in thousands)

May 4, 2012	Fair Value	Level 1	Level 2	Level 3

Deferred compensation liabilities	4,297		4,297	
Total Liabilities	\$ 7,447		\$ 7,447	

Table of Contents

Contingencies

Litigation

General. The company is party to litigation in the ordinary course of business. Litigation occasionally involves claims for punitive as well as compensatory damages arising out of use of the company's products. Although the company is self-insured to some extent, the company maintains insurance against certain product liability losses. The company is also subject to litigation and administrative and judicial proceedings with respect to claims involving asbestos and the discharge of hazardous substances into the environment. Some of these claims assert damages and liability for personal injury, remedial investigations or clean up and other costs and damages. The company is also typically involved in commercial disputes, employment disputes, and patent litigation cases in which it is asserting or defending against patent infringement claims. To prevent possible infringement of the company's patents by others, the company periodically reviews competitors' products. To avoid potential liability with respect to others' patents, the company regularly reviews certain patents issued by the United States Patent and Trademark Office (USPTO) and foreign patent offices. Management believes these activities help minimize its risk of being a defendant in patent infringement litigation.

Lawnmower Engine Horsepower Marketing and Sales Practices Litigation. Beginning in June 2004, various plaintiffs filed class action lawsuits in state and federal courts throughout the country against the company and other defendants alleging that the horsepower labels on the products the plaintiffs purchased were inaccurate. The plaintiffs (i) asserted statutory and common law claims, and (ii) sought an injunction, unspecified compensatory and punitive damages, treble damages, and attorneys' fees. In December 2008, all lawsuits were transferred to the United States District Court for the Eastern District of Wisconsin (the Court) for coordinated or consolidated pretrial proceedings.

The company and certain other defendants entered into a settlement agreement with plaintiffs in February 2010, the Court approved the company's settlement and certified the settlement class in August 2010, and the company's settlement agreement became final in February 2011. The settlement class consists of all persons in the United States who, beginning January 1, 1994 and through April 12, 2010, purchased a lawnmower containing a two-stroke or four-stroke gas combustible engine up to 30 horsepower that was manufactured or sold by the company and other defendants, and the company's settlement agreement provides for, among other things, (i) a monetary settlement, (ii) an additional warranty period for certain engines that are subject to the litigation, and (iii) injunctive relief relating to power rating labeling practices. The expected costs of the company's performance of its settlement obligations are consistent with accruals established in prior periods and, as such, management does not currently expect that the settlement will have a material adverse effect on the company's consolidated operating results or financial condition.

In March 2010, individuals who claim to have purchased lawnmowers in Canada filed class action litigation against the company and other defendants that (i) contains allegations under applicable Canadian law that are similar to the allegations made by the United States plaintiffs, (ii) seeks certification of a class of all persons in Canada who, beginning January 1, 1994 purchased a lawnmower containing a gas combustible engine up to 30 horsepower that was manufactured or sold by the company and other defendants, and (iii) seeks under applicable Canadian law unspecified compensatory and punitive damages, attorneys' costs and fees, and equitable relief.

Management continues to evaluate this Canadian litigation. In the event the company is unable to favorably resolve this litigation, management is unable to assess at this time whether this litigation would have a material adverse effect on the company's annual consolidated operating results or financial condition, although an unfavorable resolution or outcome could be material to the company's consolidated operating results for a particular period.

Subsequent Events

The company evaluated all subsequent events and concluded that no additional subsequent events have occurred that would require recognition in the consolidated financial statements or disclosure in the notes to the consolidated financial statements.

Table of Contents

**Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS**

Nature of Operations

The Toro Company is in the business of designing, manufacturing, and marketing professional turf maintenance equipment and services, turf irrigation systems, agricultural micro-irrigation systems, landscaping equipment and lighting, underground utility equipment, concrete and hardscape equipment, and residential yard and snow removal products. We sell our products worldwide through a network of distributors, dealers, hardware retailers, home centers, mass retailers, and over the Internet. Our businesses are organized into three reportable business segments: Professional, Residential, and Distribution. Our Distribution segment, which consists of our company-owned domestic distributorships, has been combined with our corporate activities and is shown as Other. Our emphasis is to provide innovative, well-built, and dependable products supported by an extensive service network. A significant portion of our revenues has historically been, and we expect will continue to be, attributable to new and enhanced products. We define new products as those introduced in the current and previous two fiscal years.

This Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) should be read in conjunction with the MD&A included in Part II, Item 7 of our Annual Report on Form 10-K for the fiscal year ended October 31, 2011.

RESULTS OF OPERATIONS

Overview

Our results for the second quarter of fiscal 2012 were positive with a net sales growth rate of 9.5 percent and a net earnings growth rate of 14.2 percent, each as compared to the second quarter of fiscal 2011. Year-to-date net earnings increased 14.5 percent in fiscal 2012 compared to the same period in the prior fiscal year on a year-to-date net sales growth rate of 9.9 percent. Sales for most professional segment businesses increased due to strong demand for domestic golf equipment as customers replaced aging equipment, favorable early spring weather that accelerated shipments and demand for landscape contractor equipment, the successful introduction of new products, higher demand resulting from improved domestic economic conditions in our markets, and price increases on some products. Worldwide sales for our micro-irrigation products also increased due to continued acceptance of drip irrigation solutions for agricultural markets. Additionally, for the first six months of fiscal 2012, \$7.5 million of incremental net sales from acquisitions completed during the past twelve months also contributed to the sales growth for our professional segment. During the second quarter of fiscal 2012, we completed the acquisitions of two professional product lines that increase our product offering and presence in the rental and light construction markets. Residential segment sales also were up primarily from favorable early spring weather conditions that drove strong demand for walk power mowers and riders, positive customer response to newly introduced products, and higher sales of Pope products in Australia due to more favorable weather conditions. However, shipments of snow thrower products and service parts were down, mainly for the year-to-date comparison, due to reduced demand resulting from the lack of snowfall during the 2011/2012 winter season. International net sales decreased slightly for the second quarter of fiscal 2012 compared to the second quarter of fiscal 2011 primarily from a slowdown in shipments of golf and grounds equipment in Europe. Our net earnings growth of 14.2 percent and 14.5 percent in the second quarter and year-to-date periods of fiscal 2012, respectively, compared to the same periods in fiscal 2011, resulted primarily from higher sales volumes and leveraging of our selling, general, and administrative (SG&A) expense over higher sales volumes. Our gross margin rate increased 20 basis points in the second quarter of fiscal 2012 compared to the second quarter of fiscal 2011. However, for the year-to-date period of fiscal 2012, our gross margin rate decreased 20 basis points compared to the same period in the prior

Edgar Filing: TORO CO - Form 10-Q

fiscal year. Additionally, our net earnings growth was hampered by an increase in our tax rate due to the expiration of the domestic research tax credit on December 31, 2011.

We continued to focus on asset management and our financial condition remained strong. Our receivables decreased slightly, by 2.0 percent, as of the end of the second quarter of fiscal 2012 compared to the end of the second quarter of fiscal 2011 on a sales increase of nearly 10 percent. Our inventory levels also declined by 3.5 percent as of the end of the second quarter of fiscal 2012 compared to the end of the second quarter of fiscal 2011. Our second quarter cash dividend increased by 10 percent from \$0.20 to \$0.22 per share compared to the quarterly cash dividend paid in the second quarter of fiscal 2011.

Our multi-year initiative, Destination 2014 will take us to our centennial in 2014 and into our second century. This four-year initiative is intended to focus our efforts on driving our legacy of excellence through building caring relationships and engaging in innovation. Through our Destination 2014 initiative financial goals, we will strive to achieve a minimum of \$100 million in organic revenue growth each fiscal year and 12 percent operating earnings as a percentage of net sales by the end of fiscal 2014. We define organic revenue growth as the increase in net sales, less net sales from acquisitions that occurred in the prior twelve-month period.

Table of Contents

Our first half of fiscal 2012 financial results were solid, and we are optimistic that our results for the full fiscal year of 2012 will end positively. Our continued focus is on generating customer demand and aggressively driving retail sales for our innovative products, while keeping production closely aligned with expected shipment volumes. We will continue to keep a cautionary eye on the global economic environment, particularly Europe, retail demand, field inventory levels, commodity prices, weather conditions, competitive actions, expenses, and other factors identified below under the heading Forward-Looking Information, which could cause our actual results to differ from our anticipated outlook.

Net Earnings

Net earnings for the second quarter of fiscal 2012 were \$68.8 million, or \$2.26 per diluted share, compared to \$60.3 million, or \$1.88 per diluted share, for the second quarter of fiscal 2011, resulting in a net earnings per diluted share increase of 20.2 percent. Year-to-date net earnings in fiscal 2012 were \$88.7 million, or \$2.91 per diluted share, compared to \$77.5 million, or \$2.41 per diluted share, in the last fiscal year, resulting in a net earnings per diluted share increase of 20.7 percent. The primary factors contributing to our earnings improvements were higher sales volumes and the leveraging of fixed SG&A costs over higher sales volumes, somewhat offset by a higher effective tax rate. In addition, second quarter and year-to-date fiscal 2012 net earnings per diluted share were benefited by approximately \$0.11 per share and \$0.16 per share, respectively, compared to the same periods in fiscal 2011, as a result of reduced shares outstanding from repurchases of our common stock.

The following table summarizes the major operating costs and other income as a percentage of net sales:

	Three Months Ended		Six Months Ended	
	May 4, 2012	April 29, 2011	May 4, 2012	April 29, 2011
Net sales	100.0%	100.0%	100.0%	100.0%
Cost of sales	(66.0)	(66.2)	(65.7)	(65.5)
Gross margin	34.0	33.8	34.3	34.5
SG&A expense	(18.6)	(19.0)	(21.7)	(22.6)
Operating earnings	15.4	14.8	12.6	11.9
Interest expense	(0.6)	(0.7)	(0.7)	(0.8)
Other income, net	0.3	0.2	0.2	0.2
Provision for income taxes	(5.1)	(4.8)	(4.1)	(3.7)
Net earnings	10.0%	9.5%	8.0%	7.6%

Net Sales

Worldwide consolidated net sales for the second quarter and year-to-date periods of fiscal 2012 were up 9.5 percent and 9.9 percent, respectively, from the same periods in the prior fiscal year. Worldwide professional segment net sales were up 9.0 percent and 9.3 percent for the second quarter and year-to-date periods of fiscal 2012, respectively, compared to the same periods in the prior fiscal year. Sales for most professional segment businesses increased due to strong demand for domestic golf equipment as customers replaced aging equipment, favorable early spring weather that accelerated shipments and demand for landscape contractor equipment, the successful introduction of new products, higher demand resulting from improved domestic economic conditions in our markets, and price increases on some products. However, shipments of golf and grounds equipment in Europe were down due to economic uncertainty in some European countries. Worldwide sales for our micro-irrigation products increased due to continued acceptance of drip irrigation solutions for agricultural markets. Additionally, for the first six months of fiscal 2012, \$7.5 million of incremental net sales from acquisitions completed during the past twelve months also contributed to the sales growth for our professional segment. Residential segment net sales were up 10.6 percent and 11.0 percent for the second quarter and

Edgar Filing: TORO CO - Form 10-Q

year-to-date periods of fiscal 2012, respectively, compared to the same periods in the prior fiscal year. Favorable early spring weather drove strong demand for walk power mowers and riders, and positive customer response to new products we introduced also increased net sales for our residential segment. Sales of Pope products in Australia were also up due to more favorable weather conditions in fiscal 2012 compared to fiscal 2011. However, shipments of snow thrower products and service parts were down, mainly for the year-to-date comparison, due to reduced demand resulting from the lack of snowfall during the 2011/2012 winter season. International net sales for the second quarter of fiscal 2012 were slightly down by 2.2 percent compared to the second quarter of fiscal 2011; however, for the year-to-date period of fiscal 2012, international net sales slightly increased by 1.8 percent from the same period in the prior fiscal year. A weaker U.S. dollar compared to other currencies in which we transact business accounted for approximately \$2.3 million and \$4.8 million of additional net sales for the second quarter and year-to-date periods of fiscal 2012, respectively. Field inventory levels were up as of the end of the second quarter of fiscal 2012 compared to the same period in the prior fiscal year due to increased orders

Table of Contents

from strong preseason demand as a result of early spring weather conditions, and higher field inventory levels of snow throwers as a result of decreased demand due to the lack of snowfall during the 2011/2012 winter season.

Gross Profit

As a percentage of net sales, gross profit for the second quarter of fiscal 2012 increased 20 basis points to 34.0 percent compared to 33.8 percent in the second quarter of fiscal 2011. This improvement was due mainly to manufacturing efficiencies from increased production and demand for our products, price increases on some products, somewhat offset by higher commodity costs. Gross profit as a percent of net sales for the year-to-date period of fiscal 2012 decreased 20 basis points to 34.3 percent compared to 34.5 percent for the year-to-date period of fiscal 2011. This decline mainly was due to a lower proportionate share of product sales that carry higher average gross margins and higher commodity prices, somewhat offset by price increases on some products and manufacturing efficiencies from increased production and demand for our products.

Selling, General, and Administrative Expense

SG&A expense increased \$8.7 million, or 7.3 percent, for the second quarter of fiscal 2012 compared to the second quarter of fiscal 2011 and increased \$11.9 million, or 5.2 percent, for the year-to-date period of fiscal 2012 compared to the year-to-date period of fiscal 2011. As a percentage of net sales, SG&A expense decreased 40 basis points and 90 basis points for the second quarter and year-to-date periods of fiscal 2012, respectively, compared to the same periods in the prior fiscal year. Those decreases were primarily attributable to the leveraging of SG&A costs over higher sales volumes.

Interest Expense

Interest expense for the second quarter of fiscal 2012 decreased slightly, by 0.5 percent, compared to the second quarter of fiscal 2011. For the year-to-date period of fiscal 2012, interest expense increased 3.5 percent compared to the same period in the prior fiscal year as a result of higher average debt levels.

Other Income, Net

Other income, net for the second quarter of fiscal 2012 increased \$0.7 million compared to the second quarter of fiscal 2011 due primarily to an increase in income from our equity investment. Other income, net for the year-to-date period of fiscal 2012 decreased slightly by \$0.1 million compared to the same period in the prior fiscal year.

Provision for Income Taxes

The effective tax rate for the second quarter of fiscal 2012 was 34.1 percent compared to 33.4 percent for the second quarter of fiscal 2011. The effective tax rate for the year-to-date periods of fiscal 2012 and 2011 was 34.0 percent and 32.6 percent, respectively. The increases in the effective tax rates were primarily the result of the expiration of the Federal Research and Development Tax Credit on December 31, 2011, whereas our tax rate in the first quarter of fiscal 2011 was benefited by the reinstatement and retroactive credit.

BUSINESS SEGMENTS

As described previously, we operate in three reportable business segments: Professional, Residential, and Distribution. Our Distribution segment, which consists of our company-owned domestic distributorships, has been combined with our corporate activities and elimination of intersegment revenues and expenses that is shown as **Other** in the following tables. Operating earnings for our Professional and Residential segments are defined as operating earnings plus other income, net. Operating loss for **Other** includes operating earnings (loss), corporate activities, other income, net, and interest expense.

Edgar Filing: TORO CO - Form 10-Q

Professional

Edgar Filing: TORO CO - Form 10-Q

Net Sales. Worldwide net sales for the professional segment in the second quarter and year-to-date periods of fiscal 2012 increased 9.0 percent and 9.3 percent, respectively, compared to the same periods in the prior fiscal year. Sales for most professional segment businesses increased due to strong demand for domestic golf equipment as customers replaced aging equipment, favorable early spring weather that accelerated shipments and demand for landscape contractor equipment, the successful introduction of new products, higher demand resulting from improved domestic economic conditions in our markets, and price increases on some products. However, shipments of golf and grounds equipment in Europe were down due to economic uncertainty in some European countries. Worldwide sales for our micro-irrigation products increased due to continued acceptance of drip irrigation solutions for agricultural markets. Additionally, for the first six months of fiscal 2012, \$7.5 million of incremental net sales from acquisitions completed during the past twelve months also contributed to the sales growth for our professional segment.

Table of Contents

Operating Earnings. Operating earnings for the professional segment in the second quarter and year-to-date periods of fiscal 2012 increased 15.3 percent and 14.0 percent, respectively, compared to the same periods in the last fiscal year. Expressed as a percentage of net sales, professional segment operating margin increased to 21.6 percent compared to 20.5 percent in the second quarter of fiscal 2011, and fiscal 2012 year-to-date professional segment operating margin also increased to 19.0 percent compared to 18.3 percent compared to the same period in the last fiscal year. These profit improvements were attributable to higher sales volumes, an increase in gross margins primarily from manufacturing efficiencies from increased production and demand, and lower SG&A expenses as a percentage of net sales due to the leveraging of fixed SG&A costs over higher sales volumes.

Residential

Net Sales. Worldwide net sales for the residential segment in the second quarter and year-to-date periods of fiscal 2012 increased 10.6 percent and 11.0 percent, respectively, compared to the same periods in the prior fiscal year. Favorable early spring weather drove strong demand for walk power mowers and riders, as well as positive customer response to new products we introduced also contributed to the net sales increase for our residential segment. Sales of Pope products in Australia also were up due to more favorable weather conditions in fiscal 2012 compared to fiscal 2011. However, shipments of snow thrower products and service parts were down, mainly for the year-to-date comparison, due to decreased demand resulting from the lack of snowfall during the 2011/2012 winter season. As a result of the aforementioned lack of snowfall during the 2011/2012 winter season, coupled with higher snow thrower field inventory levels, anticipated lower demand is expected to result in an adverse effect on our shipments of snow thrower products for the second half of fiscal 2012.

Operating Earnings. Operating earnings for the residential segment in the second quarter and year-to-date periods of fiscal 2012 increased 7.5 percent and 8.5 percent, respectively, compared to the same periods in the prior fiscal year due to higher sales volumes. However, expressed as a percentage of net sales, residential segment operating margin decreased to 12.3 percent in the second quarter of fiscal 2012 compared to 12.7 percent in the second quarter of fiscal 2011, and fiscal 2012 year-to-date residential segment operating margin also decreased to 11.1 percent compared to 11.4 percent compared to the same period in the last fiscal year. These decreases in operating margins were primarily attributable to lower gross margins due to higher commodity prices and a lower proportionate share of product sales that carry higher average gross margins, somewhat offset by lower SG&A expenses as a percentage of net sales due to the leveraging of fixed SG&A costs over higher sales volumes.

Other

Net Sales. Net sales for the other segment include sales from our wholly owned domestic distribution companies less sales from the professional and residential segments to those distribution companies. The other segment net sales for the second quarter of fiscal 2012 decreased slightly, by 1.1 percent, compared to the second quarter of fiscal 2011. For the year-to-date period of fiscal 2012, the other segment net sales increased \$0.7 million, or 13.4 percent, compared to the same period in the prior fiscal year due to favorable early spring weather that drove strong demand for products at our company-owned Midwestern distribution company.

Operating Losses. Operating losses for the other segment increased for the second quarter and year-to-date periods of fiscal 2012 by \$1.2 million, or 5.5 percent, and \$1.0 million, or 2.1 percent, respectively, compared to the same periods in the prior fiscal year. These loss increases were due primarily to an increase in self-insured health insurance expense and higher currency exchange rate losses, somewhat offset by an increase in income from our equity investment.

Table of Contents

FINANCIAL POSITION

Working Capital

In fiscal 2012, we have placed and intend to continue to place additional emphasis on asset utilization and limiting inventory build up, with a focus on minimizing the amount of working capital in the supply chain, adjusting production plans, and maintaining or improving order replenishment and service levels to end users.

Receivables as of the end of the second quarter of fiscal 2012 decreased by 2.0 percent compared to the end of the second quarter of fiscal 2011 due mainly to strong cash collections the last week of our quarter primarily due to the change in timing of our second quarter end date in fiscal 2012, which was five days later than the end of the second quarter in fiscal 2011. Our average days sales outstanding for receivables improved to 34.5 days based on sales for the twelve months ended May 4, 2012, compared to 36.3 days for the twelve months ended April 29, 2011. Inventory levels as of the end of the second quarter of fiscal 2012 also decreased by 3.5 percent compared to the end of the second quarter of fiscal 2011. Last fiscal year we prebuilt inventory, mainly residential turf products, in anticipation of then expected higher demand for our products that did not occur as planned, whereas this fiscal year we experienced strong preseason demand as a result of favorable early spring weather conditions. In addition, accounts payable decreased as of the end of our second quarter of fiscal 2012 by \$6.2 million, or 3.1 percent, driven by lower levels of inventory. Our average net working capital as a percentage of net sales for the twelve months ended May 4, 2012 increased to 14.9 percent compared to 13.6 percent for the twelve months ended April 29, 2011. This increase was due mainly to higher average inventory levels for the twelve-month period ended May 4, 2012 as compared to the twelve-month period ended April 29, 2011. We define average net working capital as accounts receivable plus inventory less trade payables as a percentage of net sales for a twelve month period.

Liquidity and Capital Resources

Our businesses are seasonally working capital intensive and require funding for purchases of raw materials used in production, replacement parts inventory, payroll and other administrative costs, capital expenditures, establishment of new facilities, expansion and upgrading of existing facilities, as well as for financing of receivables from customers that are not financed with Red Iron. We believe that our anticipated cash generated from operations, together with our fixed rate long-term debt, bank credit lines, and cash on hand, will provide us with adequate liquidity to meet our anticipated operating requirements. We believe that the funds available through existing financing arrangements and forecasted cash flows will be sufficient to provide the necessary capital resources for our anticipated working capital needs, capital expenditures, investments, debt repayments, quarterly cash dividend payments, and stock repurchases for at least the next twelve months.

Our Board of Directors approved a cash dividend of \$0.22 per share for the second quarter of fiscal 2012 paid on April 16, 2012, which was an increase of 10 percent over our cash dividend of \$0.20 per share for the second quarter of fiscal 2011. Our Board of Directors also declared a two-for-one split of our common stock, which will be effected in the form of a 100 percent stock dividend, and will be distributed June 29, 2012 to shareholders of record as of June 15, 2012.

Cash Flow. We historically use more operating cash in the first half of the fiscal year than the second half of our fiscal year due to the seasonality of our business. Cash provided by operating activities for the first six months of fiscal 2012 increased \$71.6 million compared to the first six months of fiscal 2011, mainly as a result of lower inventory levels and a higher increase in accounts payable and accrued liabilities for

Edgar Filing: TORO CO - Form 10-Q

the first half of fiscal 2012 as compared to the first half of fiscal 2011, as well as higher net earnings. Cash used for investing activities was down by \$7.4 million compared to the first six months of fiscal 2011, due mainly to lower levels of cash used for purchases of property, plant and equipment and cash utilized for acquisitions in the first half of fiscal 2012 compared to the first half of fiscal 2011. Cash used for financing activities for the first six months of fiscal 2012 was up by \$4.0 million due to higher amounts of funds used to repurchase our common stock during the first half of fiscal 2012 compared to the first half of fiscal 2011.

Credit Lines and Other Capital Resources. Our businesses are seasonal, with accounts receivable balances historically increasing between January and April as a result of higher sales volumes and extended payment terms made available to our customers, and decreasing between May and December when payments are received. The seasonality of production and shipments causes our working capital requirements to fluctuate during the year. Seasonal cash requirements are financed from operations, cash on hand, and with short-term financing arrangements, including our \$150.0 million unsecured senior revolving credit facility that expires in July 2015. Included in our \$150.0 million revolving credit facility is a sublimit for standby letters of credit and a sublimit for swingline loans. At our election and with the approval of the named borrowers on the revolving credit facility, the aggregate maximum principal amount available under the facility may be increased by an amount up to \$100.0 million in aggregate. Funds are available under the revolving credit facility for working capital, capital expenditures, and other lawful purposes, including, but not limited to, acquisitions and stock repurchases. Interest expense on this credit line is

Table of Contents

determined based on a LIBOR rate (or other rates quoted by the Administrative Agent, Bank of America, N.A.) plus a basis point spread defined in the credit agreement. In addition, our non-U.S. operations maintain unsecured short-term lines of credit in the aggregate amount of approximately \$6.3 million. These facilities bear interest at various rates depending on the rates in their respective countries of operation. As of May 4, 2012, we had no outstanding short-term debt under our credit facilities and an aggregate of \$9.4 million of outstanding letters of credit. As of May 4, 2012, we had an aggregate of \$146.8 million of unutilized availability under our credit agreements.

The revolving credit facility contains standard covenants, including, without limitation, financial covenants, such as the maintenance of minimum interest coverage and maximum debt to earnings ratios; and negative covenants, which among other things, limit loans and investments, disposition of assets, consolidations and mergers, transactions with affiliates, restricted payments, contingent obligations, liens and other matters customarily restricted in such agreements. Most of these restrictions are subject to certain minimum thresholds and exceptions. Under the revolving credit facility, we are not limited to payments of cash dividends and stock repurchases as long as our debt to earnings before interest, taxes, depreciation, and amortization (EBITDA) ratio from the previous quarter compliance certificate is less than or equal to 2.75; however, we are limited to \$50 million per fiscal year if our debt to EBITDA ratio from the previous quarter compliance certificate is greater than 2.75. As of May 4, 2012, we were not limited to payments of cash dividends and stock repurchases as our debt to EBITDA ratio was below 2.75. We were also in compliance with all covenants related to our credit agreement for our revolving credit facility as of May 4, 2012, and we expect to be in compliance with all covenants during the remainder of fiscal 2012. If we were out of compliance with any debt covenant required by this credit agreement following the applicable cure period, the banks could terminate their commitments unless we could negotiate a covenant waiver from the banks. In addition, our long-term senior notes and debentures could become due and payable if we were unable to obtain a covenant waiver or refinance our short-term debt under our credit agreement. If our credit rating falls below investment grade and/or our average debt to EBITDA ratio rises above 2.00, the basis point spread over LIBOR (or other rates quoted by the Administrative Agent, Bank of America, N.A.) we currently pay on our outstanding short-term debt under the credit agreement would increase. However, the credit commitment could not be cancelled by the banks based solely on a ratings downgrade. Our debt rating for long-term unsecured senior, non-credit enhanced debt was unchanged during the second quarter of fiscal 2012 by Moody's Investors Service at Baa3. On April 30, 2012, Standard and Poor's Ratings Group raised our credit and senior unsecured debt rating from BBB- to BBB.

Customer Financing Arrangements and Contractual Obligations

In fiscal 2009, we established our Red Iron joint venture with TCFIF. The purpose of Red Iron is to provide inventory financing, including floor plan and open account receivable financing, to distributors and dealers of our products in the U.S. and to select distributors of our products in Canada to enable our distributors and dealers to carry representative inventories of our products. Some independent international dealers continue to finance their products with a third party finance company. This third party financing company purchased \$12.9 million of receivables from us during the first six months of fiscal 2012. As of May 4, 2012, \$8.0 million of receivables financed by the third party financing company, excluding Red Iron, were outstanding, and also includes outstanding receivables that were financed by third party sources before the establishment of Red Iron. See our most recently filed Annual Report on Form 10-K for further details regarding our customer financing arrangements and contractual obligations.

Inflation

We are subject to the effects of inflation, deflation, and changing prices. In the first six months of fiscal 2012, average prices paid for commodities and components we purchase were higher compared to the average prices paid for commodities and components in the first six months of fiscal 2011, which hampered our gross margin rate in the first half of fiscal 2012 compared to the first half of fiscal 2011. We will continue to closely follow the commodities and components that affect our product lines, and we anticipate average prices paid for commodities and components to be higher for the remainder of fiscal 2012 as compared to fiscal 2011. We expect to mitigate the impact of inflationary pressures by engaging in proactive vendor negotiations, reviewing alternative sourcing options, substituting materials, engaging in internal cost

reduction efforts, and increasing prices on some of our products, all as appropriate.

Critical Accounting Policies and Estimates

See our most recent Annual Report on Form 10-K for the fiscal year ended October 31, 2011 for a discussion of our critical accounting policies.

Table of Contents

New Accounting Pronouncements to be Adopted

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220) Presentation of Comprehensive Income*. ASU No. 2011-05 guidance amended the presentation of comprehensive income to allow an entity the option to present the total of comprehensive income, the components of net income, and the components of other comprehensive income either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both choices, an entity is required to present each component of net income along with total net income, each component of other comprehensive income along with a total for other comprehensive income, and a total amount for comprehensive income. The guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. The amended guidance is effective for fiscal years, and interim periods within those years, beginning after December 15, 2011, and is to be applied retrospectively. We will adopt this guidance at the beginning of our fiscal 2013 first quarter, as required. The adoption of this guidance is not expected to have a material impact on our consolidated financial statements.

In December 2011, the FASB issued ASU No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*. ASU No. 2011-11 requires entities to disclose gross and net information about both instruments and transactions eligible for offset in the statement of financial position and those subject to an agreement similar to a master netting arrangement. This would include derivatives and other financial securities arrangements. We will adopt this guidance in our first quarter of fiscal year 2014, as required. The adoption of this guidance is not expected to have a material impact on our consolidated financial statements.

In December 2011, the FASB issued ASU No. 2011-12, *Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05*. ASU No. 2011-12 defers the changes in ASU No. 2011-05 of the requirement to present separate line items on the income statement for reclassification adjustments of items out of AOCI into net income. The effective dates for ASU No. 2011-12 are consistent with the effective dates for ASU No. 2011-05 and, similar to our expectations for the adoption of ASU No. 2011-05, we do not expect that the adoption of this guidance will have a material impact on our consolidated financial statements.

No other new accounting pronouncement that has been issued but not yet effective for us during the second quarter of fiscal 2012 has had, or is expected to have, a material impact on our consolidated financial statements.

Forward-Looking Information

This Quarterly Report on Form 10-Q contains not only historical information, but also forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and that are subject to the safe harbor created by those sections. In addition, we or others on our behalf may make forward-looking statements from time to time in oral presentations, including telephone conferences and/or web casts open to the public, in press releases or reports, on our web sites, or otherwise. Statements that are not historical are forward-looking and reflect expectations and assumptions. We try to identify forward-looking statements in this report and elsewhere by using words such as expect, strive, looking ahead, outlook, forecast, optimistic, plan, anticipate, continue, estimate, believe, could, should, will, would, may, possible, likely, intend, and similar expressions and by using future dates. Our forward-looking statements generally relate to our future performance, including our anticipated operating results, liquidity requirements, and financial condition; our business strategies and goals; and the effect of laws, rules, regulations, new accounting pronouncements, and outstanding litigation on our business and future performance.

Edgar Filing: TORO CO - Form 10-Q

Forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from those projected or implied. These risks and uncertainties include factors that affect all businesses operating in a global market as well as matters specific to Toro. The following are some of the factors known to us that could cause our actual results to differ materially from what we have anticipated in our forward-looking statements:

- Economic conditions and outlook in the United States and in other countries in which we conduct business could adversely affect our net sales and earnings, which include but are not limited to recessionary conditions; slow or negative economic growth rates; the impact of state debt and sovereign debt defaults by certain European countries; slow down or reductions in levels of golf course development, renovation, and improvement; golf course closures; reduced levels of home ownership, construction, and sales; home foreclosures; negative consumer confidence; reduced consumer spending levels; prolonged high unemployment rates; higher commodity and component costs and fuel prices; inflationary or deflationary pressures; reduced credit availability or unfavorable credit terms for our distributors, dealers, and end-user customers; higher short-term, mortgage, and other interest rates; and general economic and political conditions and expectations.
- Weather conditions may reduce demand for some of our products and adversely affect our net sales and operating results, or affect the timing of demand for some of our products and may adversely affect net sales and operating results in subsequent periods.

Table of Contents

- Increases in the cost, or disruption in the availability, of raw materials, components, and parts containing various commodities that we purchase, such as steel, aluminum, fuel, resins, linerboard, copper, lead, rubber, engines, transmissions, transaxles, hydraulics, electric motors, and other commodities and components, and increases in our other costs of doing business, such as transportation costs, may adversely affect our profit margins and business.
- Our professional segment net sales are dependent upon golf course revenues and the amount of investment in golf course renovations and improvements; the level of new golf course development and golf course closures; the level of homeowners who outsource their lawn care; the level of residential and commercial construction; availability of credit to professional segment customers on acceptable terms to finance new product purchases; and the amount of government revenues, budget, and spending levels for grounds maintenance equipment; and other factors.
- Our residential segment net sales are dependent upon mass retailers and home centers, such as The Home Depot, Inc. as a major customer, the amount of product placement at retailers, consumer confidence and spending levels, and changing buying patterns of customers.
- A significant percentage of our consolidated net sales are generated outside of the United States, and we intend to continue to expand our international operations. For example, late in fiscal 2011, we completed the construction of our new manufacturing facility in Romania. Our international operations also require significant management attention and financial resources, expose us to difficulties presented by international economic, political, legal, accounting, and business factors; including political, economic and/or social instability in the countries in which we sell products resulting in contraction or disruption of such markets; and may not be successful or produce desired levels of net sales. In addition, a portion of our international net sales are financed by third parties. The termination of our agreements with these third parties, any material change to the terms of our agreements with these third parties or in the availability or terms of credit offered to our international customers by these third parties, or any delay in securing replacement credit sources, could adversely affect our sales and operating results.
- Fluctuations in foreign currency exchange rates could result in declines in our reported net sales and net earnings.
- Our business, properties, and products are subject to governmental regulation with which compliance may require us to incur expenses or modify our products or operations and non-compliance may expose us to penalties. Governmental regulation may also adversely affect the demand for some of our products and our operating results. The United States Environmental Protection Agency has adopted increasingly stringent engine emission regulations, including Tier 4 emission requirements, that beginning in 2012, are applicable to diesel engines in a specified horsepower range that are used in some of our products. Although we have developed plans to achieve substantial compliance with Tier 4 requirements, these plans are subject to many variables including, among others, the inability of our suppliers to provide compliant engines on a timely basis or our inability to complete the necessary engineering and testing to meet our production schedule. If we are unable to successfully execute such plans, our ability to sell our products into the market may be inhibited, which could adversely affect our competitive position and financial results. To the extent in which we are able to pass along costs we incurred related to research, development, engineering, and other costs to design Tier 4 compliant products in the form of price increases to our customers and/or our competitors implement different strategies with respect to compliance with Tier 4 requirements, we may experience lower market demand for our products that may, ultimately, adversely affect our profit margins, net sales, and overall financial results. Additionally, if our customers' buying patterns change to purchasing our products in advance of price increases on compliant products, we may experience abnormal fluctuation in sales and our financial results of any one period may not be representative of expected financial results in subsequent periods.

Edgar Filing: TORO CO - Form 10-Q

- If we are unable to continue to enhance existing products and develop and market new products that respond to customer needs and preferences and achieve market acceptance, or if we experience unforeseen product quality or other problems in the development, production, or use of new and existing products, we may experience a decrease in demand for our products, and our business could suffer.
- Our reliance upon patents, trademark laws, and contractual provisions to protect our proprietary rights may not be sufficient to protect our intellectual property from others who may sell similar products. Our products may infringe the proprietary rights of others.
- We manufacture our products at and distribute our products from several locations in the United States and internationally. Any disruption at any of these facilities or our inability to cost-effectively expand existing, open and manage new facilities, including our new distribution facility near Des Moines, Iowa, and/or move production between manufacturing facilities could adversely affect our business and operating results. In late fiscal 2011, we completed the construction of our new manufacturing facility in Romania for micro-irrigation products. If this facility does not produce the anticipated manufacturing or operational efficiencies, or if the micro-irrigation products to be produced at this facility are not accepted into the new

Table of Contents

geographic markets at expected levels, we may not recover the costs of the new facility and our operating results may be adversely affected.

- We intend to grow our business in part through additional acquisitions and alliances, stronger customer relations, and new joint ventures and partnerships, all of which are risky and could harm our business, particularly if we are not able to successfully integrate such acquisitions and alliances, joint ventures, and partnerships.
- We rely on our management information systems for inventory management, distribution, and other key functions. If our information systems fail to adequately perform these functions, or if we experience an interruption in their operation, our business and operating results could be adversely affected.
- We face intense competition in all of our product lines with numerous manufacturers, including from some competitors that have larger operations and greater financial resources than us. We may not be able to compete effectively against competitors' actions, which could harm our business and operating results.
- We are subject to product liability claims, product quality issues, and other litigation from time to time that could adversely affect our operating results or financial condition.
- If we are unable to retain our key employees, and attract and retain other qualified personnel, we may not be able to meet strategic objectives and our business could suffer.
- As a result of our financing joint venture with TCFIF, we are dependent upon the joint venture to provide competitive inventory financing programs, including floor plan and open account receivable financing, to certain distributors and dealers of our products. Any material change in the availability or terms of credit offered to our customers by the joint venture, any termination or disruption of our joint venture relationship or any delay in securing replacement credit sources could adversely affect our net sales and operating results.
- The terms of our credit arrangements and the indentures governing our senior notes and debentures could limit our ability to conduct our business, take advantage of business opportunities, and respond to changing business, market, and economic conditions. Additionally, we are subject to counterparty risk in our credit arrangements. If we are unable to comply with the terms of our credit arrangements and indentures, especially the financial covenants, our credit arrangements could be terminated and our senior notes and debentures could become due and payable.
- Legislative enactments could impact the competitive landscape within our markets and affect demand for our products.

Edgar Filing: TORO CO - Form 10-Q

- Our business is subject to a number of other factors that may adversely affect our operating results, financial condition, or business, such as: our ability to achieve the revenue growth, operating earnings, and employee engagement goals of our multi-year employee initiative called Destination 2014 ; natural or man-made disasters or global pandemics that may result in shortages of raw materials and components, higher fuel and commodity costs, and an increase in insurance premiums; financial difficulties and viability of our distributors and dealers, changes in distributor ownership, changes in channel distribution of our products, relationships with our distribution channel partners, our success in partnering with new dealers, and our customers' ability to pay amounts owed to us; ability of management to adapt to unplanned events; drug cartel-related violence, which may disrupt our production activities and maquiladora operations based in Juarez, Mexico; and continued threat of terrorist acts and war that may result in heightened security and higher costs for import and export shipments of components or finished goods, reduced leisure travel, and contraction of the U.S. and world economies.

For more information regarding these and other uncertainties and factors that could cause our actual results to differ materially from what we have anticipated in our forward-looking statements or otherwise could materially adversely affect our business, financial condition, or operating results, see our most recently filed Annual Report on Form 10-K, Part I, Item 1A, Risk Factors.

All forward-looking statements included in this report are expressly qualified in their entirety by the foregoing cautionary statements. We wish to caution readers not to place undue reliance on any forward-looking statement which speaks only as of the date made and to recognize that forward-looking statements are predictions of future results, which may not occur as anticipated. Actual results could differ materially from those anticipated in the forward-looking statements and from historical results, due to the risks and uncertainties described above, as well as others that we may consider immaterial or do not anticipate at this time. The foregoing risks and uncertainties are not exclusive and further information concerning the company and our businesses, including factors that potentially could materially affect our financial results or condition, may emerge from time to time. We assume no obligation to update forward-looking statements to reflect actual results or changes in factors or assumptions affecting such forward-looking statements. We advise you, however, to consult any further disclosures we make on related subjects in our future Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K we file with or furnish to the Securities and Exchange Commission.

Table of Contents**Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We are exposed to market risk stemming from changes in foreign currency exchange rates, interest rates, and commodity prices. We are also exposed to equity market risk pertaining to the trading price of our common stock. Changes in these factors could cause fluctuations in our earnings and cash flows. See further discussion on these market risks below.

Foreign Currency Exchange Rate Risk. In the normal course of business, we actively manage the exposure of our foreign currency exchange rate market risk by entering into various hedging instruments, authorized under company policies that place controls on these activities, with counterparties that are highly rated financial institutions. Our hedging activities involve the primary use of forward currency contracts. We also utilize cross currency swaps to offset intercompany loan exposures. We use derivative instruments only in an attempt to limit underlying exposure from currency fluctuations and to minimize earnings and cash flow volatility associated with foreign currency exchange rate changes and not for trading purposes. We are exposed to foreign currency exchange rate risk arising from transactions in the normal course of business, such as sales to third party customers, sales and loans to wholly owned foreign subsidiaries, foreign plant operations, and purchases from suppliers. Because our products are manufactured or sourced primarily from the United States and Mexico, a stronger U.S. dollar and Mexican peso generally have a negative impact on our results from operations, while a weaker dollar and peso generally have a positive effect. Our primary foreign currency exchange rate exposures are with the Euro, the Australian dollar, the Canadian dollar, the British pound, the Mexican peso, the Japanese yen, the Chinese Yuan, the Romanian New Lei against the U.S. dollar, as well as the Romanian New Lei against the Euro.

We enter into various contracts, principally forward contracts that change in value as foreign currency exchange rates change, to protect the value of existing foreign currency assets, liabilities, anticipated sales, and probable commitments. Decisions on whether to use such contracts are made based on the amount of exposures to the currency involved and an assessment of the near-term market value for each currency. Worldwide foreign currency exchange rate exposures are reviewed monthly. The gains and losses on these contracts offset changes in values of the related exposures. Therefore, changes in values of these hedge instruments are highly correlated with changes in market values of underlying hedged items both at inception of the hedge and over the life of the hedge contract. Additional information regarding gains and losses on our derivative instruments is presented in the Notes to Condensed Consolidated Financial Statements (Unaudited) in Item 1 of this Quarterly Report on Form 10-Q, in the section entitled Derivative Instruments and Hedging Activities.

The following foreign currency exchange contracts held by us have maturity dates in fiscal 2012 and 2013. All items are non-trading and stated in U.S. dollars. Some derivative instruments we enter into do not meet the cash flow hedging criteria; therefore, changes in fair value are recorded in other income, net. The average contracted rate, notional amount, pre-tax value of derivative instruments in accumulated other comprehensive loss, and fair value impact of derivative instruments in other income, net as of and for the fiscal period ended May 4, 2012 were as follows:

Dollars in thousands (except average contracted rate)	Average Contracted Rate	Notional Amount	Value in Accumulated Other Comprehensive Income (Loss)	Fair Value Impact (Loss) Gain
Buy US dollar/Sell Australian dollar	1.0064	\$ 35,507.2	\$ 103.3	\$ (1,599.1)
Buy US dollar/Sell Canadian dollar	0.9700	5,051.5	169.0	143.6
Buy US dollar/Sell Euro	1.3707	60,995.9	1,578.2	3,209.8
Buy US dollar/Sell British pound	1.6188	5,827.5		(4.2)
Buy Euro/Sell US dollar	1.3158	6,460.0		118.8
Buy Mexican peso/Sell US dollar	13.1153	25,390.2	(316.8)	(348.3)

Edgar Filing: TORO CO - Form 10-Q

Buy Euro/Sell Romanian New Lei	4.4281	22,206.0	(325.8)
Buy British pound/Sell Euro	0.8121	9,078.8	2.8

Our net investment in foreign subsidiaries translated into U.S. dollars is not hedged. Any changes in foreign currency exchange rates would be reflected as a foreign currency translation adjustment, a component of accumulated other comprehensive loss in stockholders' equity, and would not impact net earnings.

Interest Rate Risk. Our market risk on interest rates relates primarily to LIBOR-based short-term debt from commercial banks, as well as the potential increase in fair value of long-term debt resulting from a potential decrease in interest rates. However, we do not have cash flow or earnings exposure due to market risks on long-term debt. We generally do not use interest rate swaps to

Table of Contents

mitigate the impact of fluctuations in interest rates. See our most recently filed Annual Report on Form 10-K (Item 7A Quantitative and Qualitative Disclosures about Market Risk). There has been no material change in this information.

Commodity Price Risk. Some raw materials used in our products are exposed to commodity price changes. The primary commodity price exposures are with steel, aluminum, fuel, petroleum-based resin, and linerboard. In addition, we are a purchaser of components and parts containing various commodities, including steel, aluminum, copper, lead, rubber, and others that are integrated into our end products. Further information regarding rising prices for commodities is presented in Item 2 of this Quarterly Report on Form 10-Q, in the section entitled Inflation.

We enter into fixed-price contracts for future purchases of natural gas in the normal course of operations as a means to manage natural gas price risks.

Item 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) that are designed to provide reasonable assurance that information required to be disclosed by us in the reports we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and we are required to apply our judgment in evaluating the cost-benefit relationship of possible internal controls. Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered in this Quarterly Report on Form 10-Q. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of such period to provide reasonable assurance that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure. There was no change in our internal control over financial reporting that occurred during our fiscal quarter ended May 4, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

We are a party to litigation in the ordinary course of business. Litigation occasionally involves claims for punitive as well as compensatory damages arising out of use of our products. Although we are self-insured to some extent, we maintain insurance against certain product liability losses. We are also subject to litigation and administrative and judicial proceedings with respect to claims involving asbestos and the discharge of hazardous substances into the environment. Some of these claims assert damages and liability for personal injury, remedial investigations or clean-up and other costs and damages. We are also typically involved in commercial disputes, employment disputes, and patent litigation cases in the ordinary course of business. To prevent possible infringement of our patents by others, we periodically review competitors' products. To

Edgar Filing: TORO CO - Form 10-Q

avoid potential liability with respect to others' patents, we regularly review certain patents issued by the USPTO and foreign patent offices. We believe these activities help us minimize our risk of being a defendant in patent infringement litigation. We are currently involved in patent litigation cases where we are asserting and defending against patent infringement.

For a description of our material legal proceedings, see Notes to Condensed Consolidated Financial Statements under the heading "Litigation" included in Item 1 of this Quarterly Report on Form 10-Q, which is incorporated into this Part II, Item 1 by reference.

Table of Contents**Item 1A. RISK FACTORS**

We are affected by risks specific to us as well as factors that affect all businesses operating in a global market. The significant factors known to us that could materially adversely affect our business, financial condition, or operating results or could cause our actual results to differ materially from our anticipated results or other expectations, including those expressed in any forward-looking statement made in this report, are described in our most recently filed Annual Report on Form 10-K (Item 1A. Risk Factors). There has been no material change in those risk factors.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table shows our second quarter of fiscal 2012 stock repurchase activity.

Period	Total Number of Shares (or Units) Purchased (1,2,3)	Average Price Paid per Share (or Unit)	Total Number of Shares (or Units) Purchased As Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares (or Units) that May Yet Be Purchased Under the Plans or Programs (1)
February 4, 2012 through March 2, 2012	25,702	\$ 67.00	25,702	1,917,699
March 3, 2012 through March 30, 2012	137,304	69.91	137,304	1,780,395
March 31, 2012 through May 4, 2012	564,204	70.75	563,700	1,216,695
Total	727,210	\$ 70.46	726,706	

(1) On December 1, 2010, the company's Board of Directors authorized the repurchase of 3,000,000 shares of the company's common stock in open-market or in privately negotiated transactions. This program has no expiration date but may be terminated by the company's Board of Directors at any time. The company repurchased an aggregate of 726,706 shares during the period indicated above under this program.

(2) Includes five shares of the company's common stock surrendered by employees to satisfy minimum tax withholding obligations upon vesting of restricted stock granted under the company's equity and incentive plan. These five shares were not repurchased under the company's repurchase program described in footnote 1 above.

(3) Includes 499 units (shares) of the company's common stock purchased in open-market transactions at an average price of \$71.13 per share on behalf of a rabbi trust formed to pay benefit obligations of the company to participants in deferred compensation plans. These 499 shares were not repurchased under the company's repurchase program described in footnote 1 above.

Item 5. OTHER INFORMATION

On June 6, 2012, we (and/or one or more of our wholly owned subsidiaries), TCFIF (and/or one or more of its wholly owned subsidiaries) and Red Iron entered into amendments to certain of the agreements pertaining to our Red Iron joint venture, including: (i) a First Amendment to Agreement to Form Joint Venture between us and TCFIF; (ii) a Second Amendment to Limited Liability Company Agreement of Red Iron between Red Iron Holding Corporation, a Delaware corporation and our wholly-owned subsidiary, and TCFIF Joint Venture I, LLC, a Minnesota limited liability company and wholly owned subsidiary of TCFIF; (iii) a First Amendment to Credit and Security Agreement between TCFIF, as lender, and Red Iron, as borrower; and (iv) a Second Amendment to Second Amended and Restated Repurchase Agreement (Two Step) between us and Red Iron.

The purpose of these amendments is, among other things, to: (i) extend the initial term of Red Iron from October 31, 2014 to October 31, 2017, subject to unlimited automatic two-year extensions thereafter; (ii) provide for an additional incentive payment by TCFIF to us; (iii) remove the restriction that TCFIF and its affiliates may not enter into any joint venture or similar jointly

Table of Contents

owned business relationship for the purpose of operating a wholesale finance business in the United States or Canada to support the financing of certain lawn and garden products, or otherwise providing financing, working capital or similar loan facilities to dealers or distributors of any manufacturer of certain lawn and garden products in the United States or Canada; and (iv) require that TCFIF and its affiliates will not, during the term of Red Iron, provide financing to any entity owned in part by TCFIF or its affiliates for the purpose of operating a wholesale finance business in the United States or Canada to support the financing of certain lawn and garden products at a non-default interest rate that is lower than the rate provided by TCFIF to Red Iron.

The foregoing description is a summary of the material terms of the amendments, does not purport to be complete and is qualified in its entirety by reference to the complete text of the amendments, copies of which are filed as Exhibits 2.1, 2.2, 2.3 and 10.1 to this Quarterly Report on Form 10-Q and are incorporated herein by reference.

Item 6. EXHIBITS

(a) Exhibits

- 2.1 (1) First Amendment to Agreement to Form Joint Venture, dated June 6, 2012, by and between The Toro Company and TCF Inventory Finance, Inc. (filed herewith).
- 2.2 Second Amendment to Limited Liability Company Agreement of Red Iron Acceptance, LLC, dated June 6, 2012, by and between Red Iron Holding Corporation and TCFIF Joint Venture I, LLC (filed herewith).
- 2.3 Second Amendment to Second Amended and Restated Repurchase Agreement (Two Step), dated June 6, 2012, by and between The Toro Company and Red Iron Acceptance, LLC (filed herewith).
- 3.1 and 4.1 Restated Certificate of Incorporation of The Toro Company (incorporated by reference to Exhibit 3.1 to Registrant's Current Report on Form 8-K dated June 17, 2008, Commission File No. 1-8649).
- 3.2 and 4.2 Amended and Restated Bylaws of The Toro Company (incorporated by reference to Exhibit 3.2 to Registrant's Current Report on Form 8-K dated June 17, 2008, Commission File No. 1-8649).
- 4.3 Specimen Form of Common Stock Certificate (incorporated by reference to Exhibit 4(c) to Registrant's Quarterly Report on Form 10-Q for the fiscal quarter ended August 1, 2008, Commission File No. 1-8649).
- 4.4 Indenture dated as of January 31, 1997, between Registrant and First National Trust Association, as Trustee, relating to The Toro Company's 7.80% Debentures due June 15, 2027 (incorporated by reference to Exhibit 4(a) to Registrant's Current Report on Form 8-K dated June 24, 1997, Commission File No. 1-8649).
- 4.5 Indenture dated as of April 20, 2007, between Registrant and The Bank of New York Trust Company, N.A., as Trustee, relating to The Toro Company's 6.625% Notes due May 1, 2037 (incorporated by reference to Exhibit 4.3 to Registrant's Registration Statement on Form S-3 filed with the Securities and Exchange Commission on April 23, 2007, Registration No. 333-142282).
- 4.6 First Supplemental Indenture dated as of April 26, 2007, between Registrant and The Bank of New York Trust Company, N.A., as Trustee, relating to The Toro Company's 6.625% Notes due May 1, 2037 (incorporated by reference to Exhibit 4.1 to Registrant's Current Report on Form 8-K dated April 23, 2007, Commission File No. 1-8649).
- 4.7 Form of The Toro Company 6.625% Note due May 1, 2037 (incorporated by reference to Exhibit 4.2 to Registrant's Current Report on Form 8-K dated April 23, 2007, Commission File No. 1-8649).

Edgar Filing: TORO CO - Form 10-Q

- 10.1 (1) First Amendment to Credit and Security Agreement, dated June 6, 2012, by and between Red Iron Acceptance, LLC and TCF Inventory Finance, Inc. (filed herewith).
- 31.1 Certification of Chief Executive Officer Pursuant to Rule 13a-14(a) (Section 302 of the Sarbanes-Oxley Act of 2002) (filed herewith).

Edgar Filing: TORO CO - Form 10-Q
