Edgar Filing: ROCKGATE CAPITAL CORP - Form 425

Under the Denison Offer, each Share will be exchanged for 0.192 of a common share of Denison.

REASONS TO ACCEPT THE DENISON OFFER

On September 24, 2013 Rockgate announced that it had terminated its agreement to be acquired by Mega Uranium Ltd. (**Mega**), since the Denison Offer constituted a **superior proposal** and Mega waived its right to match the Denison bid. **Rockgate shareholders do not have to wait for further instructions from Rockgate to tender their shares to the Denison Offer. They are your shares to tender.**

Denison believes that Rockgate shareholders will enjoy the following significant benefits from accepting the Denison Offer:

- **Significant Premium** The Denison Offer represents a premium of approximately 47% over the closing price of \$0.155 per Share on the TSX, and a premium of 38% based on the trailing 20 day VWAP of both companies on the TSX as of September 16, 2013.
 - **Superior Asset Value Recognition** Based on its closing share prices during the trailing three months as of September 16, 2013, Rockgate has not attained a market capitalization in excess of its June 30, 2013 net cash value per share. On September 17, 2013, Rockgate's market capitalization jumped significantly after Denison announced its intention to make an offer.
 - **Premier Uranium Exploration Company** The Denison Offer gives Rockgate shareholders the opportunity to participate in the assets of Denison, which include a best-in-class pipeline of advanced exploration, development and capital assets in the Athabasca Basin in Canada, including the Wheeler River Project, as well as the Mutanga Project in Zambia.
-

- ***Superior Capital Markets Presence*** With Denison shares, Rockgate shareholders benefit from larger scale (Denison's market capitalization was \$549 million as of September 16, 2013), superior trading liquidity (Denison's three month average daily trading value in Canada and the United States was \$3.5 million per day as of September 16, 2013) and increased research analyst coverage (11 research analysts actively cover Denison).
- ***Superior African Synergies*** Denison's African and global exploration team is complementary to the development of the Falea project..
- ***Business Activity Alignment*** Denison's active business is the exploration and development of uranium projects, which complements Rockgate's asset base. Denison also offers Rockgate shareholders the added potential benefit from any future increases in value associated with the continued exploration and development of Denison's current portfolio of assets.

The Denison Offer is open for acceptance until **4:00 p.m. (Toronto time) on October 25, 2013** (the **Expiry Time**), unless the Denison Offer is extended or withdrawn.
