VODAFONE AND MONEYGRAM GLOBAL AGREEMENT

Agreement will allow consumers to transfer funds from 200 countries to all M-Pesa users

Vodafone and MoneyGram, a leading global money transfer and global payment services company, have teamed up to enable consumers to transfer funds directly from around 200 countries to the millions of users of M-Pesa. This service will be launched in key markets during the second quarter of 2014, with additional roll-out planned throughout the remainder of the year.

The agreement will allow consumers who visit MoneyGram's 334,000 agents across the globe to send funds directly to M-Pesa accounts. MoneyGram customers can also transfer money to an M-Pesa user through moneygram.com or via a mobile app, available on iPhone, Android and Windows 8 phones.

M-Pesa, which allows customers to pay bills and withdraw, transfer and deposit money easily, is now available in the following countries: the Democratic Republic of Congo, Egypt, Fiji, India, Kenya, Lesotho, Mozambique, South Africa and Tanzania. Additional markets are due to launch M-Pesa during 2014.

The World Bank estimates that more than half of all inhabitants in the countries in which M-Pesa is available do not have access to a traditional bank account¹. With most of these inhabitants belonging to low-income rural areas and becoming increasingly reliant on cross-border transfers, mobile money provides a simple and low-cost method for geographically dispersed families to bank and transfer funds.

Michael Joseph, Vodafone Director of M-Pesa said: "There is huge demand for sending funds back to family and friends in your home market and an estimated \$90bn² per year is transferred to M-Pesa markets from around the globe. Our partnership with MoneyGram provides the most extensive global network and greatest number of access points for consumers wishing to transfer funds to M-Pesa users."

Alex Hoffmann, senior vice president of global product management and emerging channels at MoneyGram said: "We're excited about the opportunity to leverage our powerful platform to expand our reach to these digital channels. This agreement furthers our goal of joining with fast and reliable mobile wallets so consumers may send money for life's essentials anywhere and any way they want, simply and conveniently."

- ends -

Note to Editors

Developed by Vodafone, M-Pesa had nearly 16 million active customers as at 30 September 2013 and approximately 165,000 authorised agents worldwide. A customer can buy airtime and pay for bills, such as electricity and water as well as groceries. Many other businesses are using the service to allow their customers to pay them easily and safely. Additionally in Kenya, Safaricom and Vodafone recently launched a savings and loans product in partnership with the Commercial Bank of Africa (CBA).

The service has experienced significant growth and its active customers make in excess of 900 million worth of transactions per month.

VODAFONE INDIA ACQUIRES SPECTRUM FOR £1.9bn TO ENHANCE MOBILE SERVICES FOR CUSTOMERS

Vodafone India has been awarded spectrum licences in 11 telecom circles in the Indian government's 900 MHz and 1800 MHz spectrum auction, enabling the company to provide customers with enhanced mobile voice and data services across the country.

Vodafone India acquired a total of 23MHz in the 900MHz band in Mumbai, Delhi and Kolkata and 49MHz in the 1800MHz band in Mumbai, Delhi, Kolkata, Karnataka, Kerala, Gujarat, UP East, Rajasthan, Haryana, Andhra Pradesh and Punjab. Vodafone's investment totals INR19,645 crores (£1.9bn) of which INR 5,600 crores (£540million) is payable in financial year 2013/2014 with the remainder payable in instalments starting in 2017.

Vodafone India has established a strong platform for 4G data services by buying 1800MHz spectrum in Mumbai, Delhi, Kolkata, Karnataka and Kerala, which account for more than 50% of data revenues and are expected to drive the adoption of 4G as was the case after the introduction of 3G services in 2010. Vodafone India also maintained its overall holdings of 900 MHz spectrum in Delhi, Mumbai and Kolkata, and purchased 1800 MHz spectrum in four circles where its licences are due for extension in 2015.

Vodafone India has over 160 million customers, with the number of mobile internet users increasing 38% to 45.7 million in its most recent quarter. Data usage also continues to grow strongly with 3G usage now averaging in excess of 700MB per month. This spectrum and the continued investment in networks will enable Vodafone India to build on its success in delivering superior mobile services to its customers throughout India.

18 February 2014

VODAFONE UNVEILS WORLD'S LARGEST 4G ROAMING NETWORK

Vodafone will soon offer ultra-fast 4G roaming to more countries than any other mobile operator worldwide, it was announced today.

From summer 2014, consumers and business customers travelling overseas will be able to take advantage of 4G mobile services when using their smartphones and tablets in 18 countries worldwide for no more than the cost of existing 3G roaming services such as Vodafone's popular pan-European Union daily roaming price plans.

Vodafone already offers 4G roaming on its own networks in Greece, Italy, Portugal, Romania and Spain. Between now and the summer 2014, Vodafone will launch 4G roaming in Australia, Germany, the Netherlands, New Zealand, South Africa, and the UK. In addition, Vodafone customers will be able to use 4G networks of other telecommunications companies in Austria, Belgium, France, Japan, Singapore, South Korea and Switzerland.

Vodafone Group Chief Commercial and Operations Officer Paolo Bertoluzzo said: "4G is great for travellers, whether they are on business or on holiday. Much faster, simpler to use and often less expensive than typical, hotel wi-fi connections anywhere in Europe, 4G roaming will give our customers high-speed connections for video, music streaming, web surfing, working and much more anywhere, from the airport to the cafe."

Under its Project Spring £7 billion investment programme, Vodafone has fast-tracked its 4G roaming plans to ensure that key holiday destinations are covered in time for the summer break. It will also offer 4G roaming to customers of other operators under its existing reciprocal roaming agreements.

Notes for editors

Vodafone's daily roaming proposition now has 11 million registered customers, accounting for more than 20% of consumer contract and 15% of enterprise roaming customers. A European customer on Vodafone Red, for example, can take their home tariff and data allowance abroad for an additional daily price of £3.

20 February 2014

VODAFONE WINS AWARD FOR ITS ROLLOUT OF FIBRE IN EUROPE

Vodafone's outstanding contribution to fibre-to-the-home (FTTH) adoption in Europe was today acknowledged by the FTTH Council Europe, which presented Vodafone with the FTTH Operator Award 2014 at its annual conference in Stockholm.

Vodafone's optical fibre investments in Portugal, Spain and Italy were the focus of the award. Collectively:

- Vodafone Portugal has passed more than 700,000 homes with fibre and aims to reach 1.5 million by mid-2015;
- Vodafone Spain has partnered with Orange in a 1 billion partnership to co-invest in fibre and aims to reach 3 million homes in 2015, increasing to 6 million in 2017; and
- Vodafone Italy offers fibre services in 37 cities and aims to build out fibre-to-the-cabinet coverage in 150 cities over the next two years, reaching around 6.5 million households.

The award comes as Vodafone embarks on the largest and fastest period of investment in network and services in its history with plans to spend £19 billion over the next two years.

Philipp Humm, Vodafone CEO Europe, said: Vodafone's investments in Portugal, Spain and Italy are a key part of our commitment to offer customers an unmatched customer service, to help them be the best connected and to enjoy all the benefits of technological innovation in and out of their homes. Our investments in Portugal, Spain and Italy will be increased significantly over the next two years under Vodafone's Project Spring programme with nearly 3 billion committed to establishing even stronger network and service differentiation in these countries. We are delighted to be recognised by the FTTH Council Europe and will continue to strive to bring the best to our customers.

The FTTH Council Europe is an industry organisation with a mission to accelerate the availability of fibre-based, ultra-high-speed access networks to consumers and businesses.

Share consolidation effective and commencement of trading in consolidated shares

Further to the announcements on 19 and 21 February 2014, the 6 for 11 consolidation of the entire ordinary share capital of Vodafone Group Plc (Vodafone) will become effective today and trading in the new ordinary shares is expected to commence at 8.00 a.m. today.*

Existing share certificates for Vodafone ordinary shares will no longer be valid as of 8.00 a.m. today. Shareholders who are eligible for the Vodafone Share Account (VSA) and have not opted out of the VSA will receive a statement of ownership in due course. Shareholders who are not eligible for the VSA or who have opted out will receive new share certificates.

In conformity with Disclosure and Transparency Rule 5.6.1AR, Vodafone hereby notifies the market that, as at 8.00 a.m. today, Vodafone's issued and listed share capital will consist of 28,811,864,298 ordinary shares with a nominal value of 20/21 US cents each with voting rights, of which 2,373,727,362 ordinary shares will be held in Treasury.

Therefore, the total number of voting rights in Vodafone will be 26,438,136,936. This figure may be used by shareholders as the denominator for the calculations by which they will determine if they are required to notify their interest in, or a change to their interest in, Vodafone under the FCA's Disclosure and Transparency Rules.

In addition to these issued and listed ordinary shares, Vodafone has existing block listings with an outstanding balance of 93,251,236 ordinary shares with a nominal value of 113/7 US cents. Following the consolidation these block listings will be for 50,864,306 ordinary shares with a nominal value of 20 20/21 US cents.

Vodafone confirms that the ordinary shares held by its directors, persons discharging managerial responsibility and their connected persons will be consolidated with effect from 8.00 a.m. today, but that the relevant percentage interests in Vodafone on consolidation will remain the same.

Expected timetable of events:

Event

Time / Date

VODAFONE FOUNDATION UNVEILS MINI MOBILE NETWORK IN A BACKPACK

The Vodafone Foundation has today announced *Instant Network Mini*, an 11 kilogram mobile network in a backpack that can be deployed in just 10 minutes, enabling aid workers to carry out life-saving work in disaster situations.

A robust backpack that can be taken as hand luggage on commercial flights and deployed by non-technical staff, *Vodafone Foundation Instant Network Mini* can provide up to five concurrent calls within a radius of 100 metres and enable text messages to be sent to thousands of people to provide crucial information following a disaster.

The network in a backpack follows on from the original *Vodafone Foundation Instant Network*, a portable network in four suitcases weighing 100kg. The original *Instant Network* equipment, which offers a much larger operating radius of up to 5km, was deployed in the Philippines within 24 hours of Typhoon Haiyan hitting in November 2013. The deployment enabled 1.4 million text messages and 443,288 calls in 29 days.

Vodafone Foundation Instant Network Mini was developed with Vodafone Spain and the Vodafone Foundation's partners Huawei and Telecoms Sans Frontières. It provides a secure 2G GSM network. The GSM base transceiver station connects to a host network over a satellite connection. The equipment is particularly suited to providing a GSM mobile network in the immediate aftermath of a disaster and for delivering mobile money solutions to inaccessible areas. It has been designed to provide both voice and SMS communications to a small humanitarian field office in disaster areas.

Andrew Dunnett, Director, the Vodafone Foundation, said: The *Vodafone Foundation Instant Network* has enabled thousands of people to reconnect with their loved ones. *Vodafone Foundation Instant Network Mini* is simple and quick to deploy and will be particularly valuable to those humanitarian workers without any other means of communication.

In countries in which Vodafone operates, social investment is delivered by a unique footprint of 28 Vodafone Foundations and social investment programmes. These programmes are directed and chosen by the Foundation Trustees and receive funding from the Vodafone Foundation in the UK as well as their local Vodafone company. The Vodafone Foundation is a registered charity in England and Wales (registered number 1089625).

25 February 2014

EUROPE'S FIRST LIVE TRIAL OF LTE BROADCAST: REVOLUTIONISING VIDEO DELIVERY ACROSS MOBILE NETWORKS

- **Vodafone Germany and Ericsson trial a unique video broadcast in Borussia Mönchengladbach's football stadium**
- **Point-to-multipoint video signal distribution puts no additional load on the network**

Vodafone Germany is the first European carrier to conduct live tests with LTE Broadcast in collaboration with communications technology and services provider Ericsson, Qualcomm Technologies, Inc and Samsung. The trial took place at Borussia Mönchengladbach's stadium on Saturday 22 February, when they played 1899 Hoffenheim in the Bundesliga.

LTE Broadcast – also known as evolved Multimedia Broadcast Multicast Service (eMBMS) – puts no additional load on the network, enabling smartphone users in device dense locations to watch TV channels in high-quality.

The service uses Single Frequency Network technology (like DVB-T) to distribute the signal to an unlimited number of recipients. The user only needs an LTE-enabled device with an LTE Broadcast app.

As part of Vodafone Germany's network modernisation programme, LTE Broadcast could soon be available in further German stadia.

There is growing demand for high quality video content on mobile devices and LTE Broadcast gives our customers a brand new mobile media experience, said Eric Kuisch, CTO Vodafone Germany. This technology enables multiple broadcast sessions to be viewed simultaneously, so our customers will be able to watch Sky's Premiere League Summary or exclusive video content from the stadium they're in.

27 February 2014

VODAFONE FOUNDATION ANNOUNCES *CONNECTED WOMEN SUMMIT*

The Vodafone Foundation has today announced that the *Connected Women Summit* will take place in London on 3 March 2014.

The summit will focus on the impact of mobile technology on the lives of women around the world ahead of International Women's Day on 8 March 2014. At the event, the Vodafone Foundation will:

- publish new research on the economic impact of extending women's access to mobile, particularly in the developing world;
- demonstrate how innovative mobile technologies can transform health and education and change women's lives; and
- announce a major new global female literacy and education partnership

The day's activities will culminate in an evening event in London hosted by Vodafone Group Chief Executive Vittorio Colao and Vodafone Chief Executive for Africa, Middle East and Asia Pacific Serpil Timuray. Guest speakers will include **Malala Yousafzai**, ambassador for girls' education worldwide through the Malala Fund and author of *I am Malala: The Girl Who Stood Up for Education*, **Kathy Calvin**, President and Chief Executive Officer of the United Nations Foundation and **Justine Greening**, International Development Secretary in the UK. The evening event will be moderated by Carla Buzasi, Editor-in-Chief, The Huffington Post UK.

Vodafone Group Chief Executive Vittorio Colao said: 'Mobile changes women's lives forever. Mobile technologies can help women build businesses, lift families out of poverty, conquer illiteracy, enhance maternal and childhood health and reduce the blight of domestic violence.'
