- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 8.01. Other Events

On February 21, 2006, the Registrant issued a press release announcing that regulators have allowed the company to initiate Phase I/II clinical testing with its lead compound, Listeria-based cancer vaccine, Lovaxin C. Lovaxin C, which specifically targets cervical cancer in women, will be tested for the first time in humans in this study.

The Advaxis vaccine Lovaxin C is a therapeutic designed to treat women who have developed cervical cancer as a result of an HPV infection.

Advaxis expects to begin dosing at multiple center sites by the end of February. The study will be conducted at Hadassah Hospital in Jerusalem, The Institute of Oncology and Radiology in Belgrade, which treats several hundred cervical cancer patients every year, and at two facilities in Mexico. The first regulatory approval has been received for Belgrade, with approvals for Israel and Mexico in review and anticipated shortly. Advaxis expects to announce the data from these trials in the second half of 2006.

See Registrant's press release attached hereto as Exhibit 99.1.

Item 9.01. Financial Statements and Exhibits

- a) Not applicable.
