BANK OF SOUTH CAROLINA CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)
MARCH 31, 2011

NOTE 1: Basis of Presentation

The Bank of South Carolina (the "Bank") was organized on October 22, 1986 and opened for business as a state-chartered financial institution on February 26, 1987, in Charleston, South Carolina. The Bank was reorganized into a wholly-owned subsidiary of Bank of South Carolina Corporation (the "Company"), effective April 17, 1995. At the time of the reorganization, each outstanding share of the Bank was exchanged for two shares of Bank of South Carolina Corporation Stock. The Company operates as a commercial bank from four banking houses located at: 256 Meeting Street, Charleston, SC, 100 North Main Street, Summerville, SC, 1337 Chuck Dawley Boulevard, Mt. Pleasant, SC and 2027 Sam Rittenberg Boulevard, Charleston, SC.

The consolidated financial statements in this report are unaudited, except for the December 31, 2010 consolidated balance sheet. All adjustments consisting of normal recurring accruals which are, in the opinion of management, necessary for fair presentation of the interim consolidated financial statements have been included and fairly and accurately present the financial position, results of operations and cash flows of the Company. The results of operations for the three months ended March 31, 2011, are not necessarily indicative of the results which may be expected for the entire year.

The preparation of the consolidated financial statements is in conformity with accounting principles generally accepted in the United States of America (GAAP) which requires management to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements. In addition, they affect the reported amounts of income and expense during the reporting period. Actual results could differ from these estimates and assumptions.

In preparing these financial statements, the Company has evaluated events and transactions for potential recognition or disclosure through the date the financial statements were available to be issued.

NOTE 2: Investment Securities

The Company classifies investments into three categories as follows: (1) Held to Maturity - debt securities that the Company has the positive intent and ability to hold to maturity, which are reported at amortized cost, adjusted for the amortization of any related premiums or the accretion of any related discounts into interest income using a methodology which approximates a level yield of interest over the estimated remaining period until maturity; (2) Trading - debt and equity securities that are bought and held principally for the purpose of selling them in the near term, which are reported at fair value, with unrealized gains and losses included in earnings; and (3) Available for Sale - debt and equity securities that may be sold under certain conditions, which are reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of income taxes. Unrealized losses on securities due to fluctuations in fair value are recognized when it is determined that an other than temporary decline in value has occurred. Realized gains or losses on the sale of investments are recognized on a specific identification, trade date basis. All securities were classified as available for sale for the three months ended March 31, 2011 and 2010. The Company does not have any mortgage-backed securities nor has it ever invested in mortgage-backed securities.

NOTE 3: Stock Based Compensation

The shareholders of the Company voted at the Company's Annual Meeting, April 13, 2010, to approve the 2010 Omnibus Stock Incentive Plan, including 330,000 shares (adjusted for a 10% stock dividend declared on August 26, 2010) reserved under the plan (copy of the plan was filed with 2010 Proxy Statement). This plan is intended to assist the Company in recruiting and retaining employees with ability and initiative by enabling employees to participate in its future success and to associate their interest with those of the Company and its shareholders. Under the Omnibus Stock Incentive Plan, options are periodically granted to employees at a price not less than 100% of the fair market value of the shares at the date of the grant. All employees are eligible to participate in this plan if the Executive Committee, in its sole discretion, determines that such person has contributed or can be expected to contribute to the profits or growth of the Company or its subsidiary. Options may be exercised in whole at any time or in part from time to time at such times and in compliance with such requirements as the Executive Committee shall determine. The maximum period in which an Option may be exercised is determined at the date of grant and shall not exceed 10 years from the date of grant.

The options are not transferable except by will or by the laws of descent and distribution. On March 24, 2011, the Executive Committee granted options to purchase 5,000 shares of stock to 1 employee. Fair value was estimated at the date of grant using the Black-Scholes option pricing model with the following assumptions used for the grant: dividend yield 4.02%, historical volatility 54.43%, risk free interest rate of 3.42%, and an expected life of 10 years.

On April 14, 1998 the Company adopted the 1998 Omnibus Stock Incentive Plan which expired on April 14, 2008. Options can no longer be granted under the 1998 Plan. Options granted before April 14, 2008, shall remain valid in accordance with their terms.

The following is a summary of the activity under the 1998 and 2010 Omnibus Stock Incentive Plans for the three months ended March 31, 2011 and the 1998 Omnibus Stock Incentive Plan for the three months ended March 31, 2010.

	Options	Weighted Average Exercise Price
Three Months Ended March 31, 2011		
Balance at January 1, 2011	88,831	\$11.51
Granted	5,000	11.67
Exercised	(1,831)	8.11
Balance at March 31, 2011	92,000	\$11.59
Three months Ended March 31, 2010	Options	Weighted Average Exercise Price
Balance at January 1, 2010	86,995	\$10.61
Exercised	-	-
Balance at March 31, 2010	86,995	\$10.61
Options exercisable at March 31, 2011	11,303	\$8.11
	4,870	\$8.54

All share and per share data have been restated to reflect a 10% stock dividend declared on August 26, 2010.

NOTE 4: Shareholders' Equity

A regular quarterly cash dividend of \$.10 per share was declared on March 24, 2011 for shareholders of record at April 8, 2011, payable April 29, 2011. Income per common share for the three months ended March 31, 2011 and for the three months ended March 31, 2010 was calculated as follows:

	FOR THE THREE MONTHS ENDED MARCH 31, 2011		
	INCOME (NUMERATOR)	SHARES (DENOMINATOR)	PER SHARE AMOUNT
Net income	\$649,368		
Basic income available to common shareholders	\$649,368	4,430,705	\$.14
Effect of dilutive options		6,865	
Diluted income available to common shareholders	\$649,368	4,437,570	\$.14

	FOR THE THREE MONTHS ENDED MARCH 31, 2010		
	INCOME (NUMERATOR)	SHARES (DENOMINATOR)	PER SHARE AMOUNT
Net income	\$ 726,867		
Basic income available to common shareholders	\$ 726,867	4,403,201	\$..16
Effect of dilutive options		-	
Diluted income available to common shareholders	\$ 726,867	4,403,201	\$.16

All share and per share data have been restated to reflect a 10% stock dividend declared on August 26, 2010.

The future payment of cash dividends is subject to the discretion of the Board of Directors and depends upon a number of factors, including future earnings, financial condition, cash requirements, and general business conditions. Cash dividends when declared, are paid by the Bank to the Company for distribution to shareholders of the Company. Certain regulatory requirements restrict the amount of dividends which the Bank can pay to the Company.

NOTE 5: Comprehensive Income

The Company applies accounting standards which establish guidance for the reporting and display of comprehensive income and its components in a full set of general purpose financial statements. Comprehensive income consists of net income and net unrealized gains or losses on securities and is presented in the consolidated statements of shareholders' equity and comprehensive income.

Comprehensive income totaled \$1,038,296 at March 31, 2011 and \$738,504 at March 31, 2010.

NOTE 6: Fair Value Measurements

Effective January 1, 2008, the Company adopted accounting standards which provide a framework for measuring and disclosing fair value under generally accepted accounting principles. The guidance requires disclosures about the fair value of assets and liabilities recognized in the balance sheet in periods subsequent to initial recognition, whether the measurements are made on a recurring basis (for example, available-for-sale investment securities) or on a nonrecurring basis (for example, impaired loans).

The standard defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The standard also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Level 1 Valuation is based upon quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Level 1 assets and liabilities include debt and equity securities and derivative contracts that are traded in an active exchange market, as well as US Treasuries and money market funds.
- Level 2 Valuation is based upon quoted prices for similar assets and liabilities in active markets, as well as inputs that are observable for the asset or liability (other than quoted prices), such as interest rates, foreign exchange rates, and yield curves that are observable at commonly quoted intervals. Level 2 assets and liabilities include debt securities with quoted prices that are traded less frequently than exchange-traded instruments, mortgage-backed securities, municipal bonds, corporate debt securities and derivative contracts whose value is determined using a pricing model with inputs that are observable in the market or can be derived principally from or corroborated by observable market data. This category generally includes certain derivative contracts and impaired loans.
- Level 3 Valuation is generated from model-based techniques that use at least one significant assumption based on unobservable inputs for the asset or liability, which are typically based on an entity's own assumptions, as there is little, if any, related market activity. In instances where the determination of the fair value measurement is based on inputs from different levels of the fair value hierarchy, the level in the fair value hierarchy within which the entire fair value measurement falls is based on the lowest level input that is significant to the fair value measurement in its entirety. The assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability.

The following is a description of the valuation methodologies used for assets and liabilities recorded at fair value.

Investment Securities Available for Sale

Investment securities available for sale are recorded at fair value on a recurring basis. At March 31, 2011 and December 31, 2010, the Company's investment portfolio was comprised of US Treasury Notes, Government Sponsored Enterprises and Municipal Securities. The portfolio did not contain any mortgage-backed securities. Fair value measurement is based upon prices obtained from third party pricing services that use independent pricing models which rely on a variety of factors including reported trades, broker/dealer quotes, benchmark yields, economic and industry events and other relevant market information. As such, these securities are classified as Level 2.

Mortgage Loans Held for Sale

The Company originates fixed rate residential loans on a servicing released basis in the secondary market. Loans closed but not yet settled with other investors, are carried in the Company's loans held for sale portfolio. These loans are fixed rate residential loans that have been originated in the Company's name and have closed. Virtually all of these loans have commitments to be purchased by investors and the majority of these loans were locked in by price with the investors on the same day or shortly thereafter that the loan was locked in with the Company's customers. Therefore, these loans present very little market risk for the Company. The Company usually delivers to, and receives funding from, the investor within 30 days. Commitments to sell these loans to the investor are considered derivative contracts and are sold to investors on a "best efforts" basis. The Company is not obligated to deliver a loan or pay a penalty if a loan is not delivered to the investor. As a result of the short-term nature of these derivative contracts, the fair value of the mortgage loans held for sale in most cases is the same as the value of the loan amount at its origination. These loans are classified as Level 2.

Assets and liabilities measured at fair value on a recurring basis at March 31, 2011 and December 31, 2010 are as follows:

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at March 31, 2011
US Treasury Note	\$ 21,206,016	\$ -	\$ -	\$ 21,206,016
Government Sponsored Enterprises	\$ -	\$ 3,032,509	\$ -	\$ 3,032,509
Municipal Securities	\$ -	\$ 24,779,250	\$ -	\$ 24,779,250
Mortgage loans to be sold	\$ -	\$ 2,119,227	\$ -	\$ 2,119,227

Total	\$ 9,023,437	\$ 36,264,492	\$ -	\$ 45,287,929

Other Real Estate Owned (OREO)

Loans, secured by real estate, are adjusted to fair value upon transfer to other real estate owned (OREO). Subsequently, OREO is carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. When the fair value of the collateral is based on an observable market price or a current appraisal, the Company records the OREO as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the asset as nonrecurring Level 3.

Impaired Loans

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired and an allowance for loan losses is established. Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, management measures impairment in accordance with ASC 310-10, "Accounting by Creditors for Impairment of a Loan".

In accordance with this standard, the fair value is estimated using one of the following methods: fair value of the collateral less estimated costs to sell, discounted cash flows, or market value of the loan based on similar debt. The fair value of the collateral less estimated costs to sell is the most frequently used method. Typically, the Company reviews the most recent appraisal and if it is over 12 months old will request a new third party appraisal. Depending on the particular circumstances surrounding the loan, including the location of the collateral, the date of the most recent appraisal and the value of the collateral relative to the recorded investment in the loan, management may order an independent appraisal immediately or, in some instances, may elect to perform an internal analysis. Specifically as an example, in situations where the collateral on a nonperforming commercial real estate loan is out of the Company's primary market area, management would typically order an independent appraisal immediately, at the earlier of the date the loan becomes nonperforming or immediately following the determination that the loan is impaired. However, as a second example, on a nonperforming commercial real estate loan where management is familiar with the property and surrounding areas and where the original appraisal value far exceeds the recorded investment in the loan, management may perform an internal analysis whereby the previous appraisal value would be reviewed and adjusted for recent conditions including recent sales of similar properties in the area and any other relevant economic trends. These valuations are reviewed at a minimum on a quarterly basis.

Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. At March 31, 2011 and December 31, 2010, substantially all of the total impaired loans were evaluated based on the fair value of the collateral. In accordance with ASC 820, impaired loans where an allowance is established based on the fair value of collateral require classification in the fair value hierarchy. When the fair value of the collateral is based on an observable market price or a current appraised value, the Company records the impaired loan as nonrecurring Level 2. When an appraised value is not available or management determines the fair value of the collateral is further impaired below the appraised value and there is no observable market price, the Company records the impaired loan as nonrecurring Level 3.

Certain assets and liabilities are measured at fair value on a nonrecurring basis; that is, the instruments are not measured at fair value on an on going basis but are subject to fair value adjustments in certain circumstances (for example, when there is evidence of impairment). The following table presents the assets and liabilities carried on the balance sheet by caption and by level within the valuation hierarchy (as described above) as of March 31, 2011 and December 31, 2010 for which a nonrecurring change in fair value has been recorded during the three months ended March 31, 2011 and twelve months ended December 31, 2010.

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at March 31, 2011
Impaired loans	\$ -	\$ 4,644,770	\$ -	\$ 4,644,770
Other real estate owned	\$ -	\$ 659,430	\$ -	\$ 659,430
Total	\$ -	\$ 5,304,200	\$ -	\$ 5,304,200

	Quoted Market Price in active markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance at December 31, 2010
Impaired loans	\$ -	\$ 3,559,528	\$ -	\$ 3,559,528
Other real estate owned	\$ -	\$ 659,492	\$ -	\$ 659,492
Total	\$ -	\$ 4,219,020	\$ -	\$ 4,219,020

The Company has no assets or liabilities whose fair values are measured using level 3 inputs.

Accounting standards require disclosure of fair value information about financial instruments whether or not recognized on the balance sheet, for which it is practicable to estimate fair value. Fair value estimates are made as of a specific point in time based on the characteristics of the financial instruments and the relevant market information. Where available, quoted market prices are used. In other cases, fair values are based on estimates using present value or other valuation techniques. These techniques involve uncertainties and are significantly affected by the assumptions used and the judgments made regarding risk characteristics of various financial instruments, discount rates, prepayments, estimates of future cash flows, future expected loss experience and other factors. Changes in assumptions could significantly affect these estimates. Derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, may or may not be realized in an immediate sale of the instrument.

Under the accounting standard, fair value estimates are based on existing financial instruments without attempting to estimate the value of anticipated future business and the value of the assets and liabilities that are not financial instruments. Accordingly, the aggregate fair value amounts of existing financing instruments do not represent the underlying value of those instruments on the books of the Company.

The following describes the methods and assumptions used by the Company in estimating the fair values of financial instruments:

- a. Cash and due from banks, interest bearing deposits in other banks and federal funds sold

The carrying value approximates fair value. All mature within 90 days and do not present unanticipated credit concerns.

- b. Investment securities available for sale

The fair value of investment securities is derived from quoted market prices.

c.Loans

The carrying values of variable rate consumer and commercial loans and consumer and commercial loans with remaining maturities of three months or less, approximate fair value. The fair values of fixed rate consumer and commercial loans with maturities greater than three months are determined using a discounted cash flow analysis and assume the rate being offered on these types of loans by the Company at March 31, 2011 and December 31, 2010, approximate market.

The carrying value of mortgage loans held for sale approximates fair value.

For lines of credit, the carrying value approximates fair value.

d. Deposits

The estimated fair value of deposits with no stated maturity is equal to the carrying amount. The fair value of time deposits is estimated by discounting contractual cash flows, by applying interest rates currently being offered on the deposit products. The fair value estimates for deposits do not include the benefit that results from the low cost funding provided by the deposit liabilities as compared to the cost of alternative forms of funding (deposit base intangibles).

e. Short-term borrowings

The carrying amount approximates fair value due to the short-term nature of these instruments.

The estimated fair values of the Company's financial instruments at March 31, 2011 and December 31, 2010 are as follows:

	March 31, 2011	
	Carrying Amount	Estimated Fair Value
Cash and due from banks	\$ 6,210,726	\$ 6,210,726
Interest bearing deposits in other banks	8,309	8,309
Federal funds sold	34,227,475	34,227,475
Investments available for sale	49,017,775	49,017,775
Loans (1)	206,831,723	208,420,615
Deposits	268,173,854	268,942,172
Short-term borrowings	414,432	414,432

	December 31, 2010	
	Carrying Amount	Estimated Fair Value
Cash and due from banks	\$ 5,404,379	\$ 5,404,379
Interest bearing deposits in other banks	8,302	8,302
Federal funds sold	19,018,104	19,018,104
Investments available for sale	39,379,613	39,379,613
Loans (1)	213,916,674	218,670,423
Deposits	250,436,975	250,750,331

Short-term borrowings	767,497	767,497
-----------------------	---------	---------

(1) Includes mortgage loans to be sold

NOTE 7: Recently Issued Accounting Pronouncements

The following is a summary of recent authoritative pronouncements that could impact the accounting, reporting and/or disclosure of financial information by the Company.

In July 2010, the Receivables topic of the Accounting Standards Codification (“ASC”) was amended by Accounting Standards Update (“ASU”) 2010-20 to require expanded disclosures related to a company’s allowance for credit losses and the credit quality of its financing receivables. The amendments require the allowance disclosures to be provided on a disaggregated basis. The Company is required to include these disclosures in their interim and annual financial statements. See the discussion on “Allowance for Loan Losses”.

Disclosures about Troubled Debt Restructurings (“TDRs”) required by ASU 2010-20 were deferred by the Financial Accounting Standards Board (“FASB”) in ASU 2011-01 issued in January 2011. In April 2011 FASB issued ASU 2011-02 to assist creditors with their determination of when a restructuring is a TDR. The determination is based on whether the restructuring constitutes a concession and whether the debtor is experiencing financial difficulties as both events must be present. Disclosures related to TDRs under ASU 2010-20 will be effective for reporting periods beginning after June 15, 2011. The Company does not expect this to have an impact on its financial statements.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), which significantly changes the regulation of financial institutions and the financial services industry. The Dodd-Frank Act includes several provisions that will affect how community banks, thrifts, and small bank and thrift holding companies will be regulated in the future. Among other things, these provisions abolish the Office of Thrift Supervision and transfer its functions to the other federal banking agencies, relax rules regarding interstate branching, allow financial institutions to pay interest on business checking accounts, change the scope of federal deposit insurance coverage, and impose new capital requirements on bank and thrift holding companies. The Dodd-Frank Act also establishes the Bureau of Consumer Financial Protection as an independent entity within the Federal Reserve, which will be given the authority to promulgate consumer protection regulations applicable to all entities offering consumer financial services or products, including banks. Additionally, the Dodd-Frank Act includes a series of provisions covering mortgage loan origination standards affecting originator compensation, minimum repayment standards, and pre-payments. Management is actively reviewing the provisions of the Dodd-Frank Act and assessing its probable impact on the business, financial condition, and results of operations of the Company.

In August 2010, two updates were issued to amend various SEC rules and schedules pursuant to Release No. 33-9026: Technical Amendments to Rules, Forms, Schedules and Codification of Financial Reporting Policies and based on the issuance of SEC Staff Accounting Bulletin 112. The amendments related primarily to business combinations, removed references to “minority interest” and added references to “controlling” and “noncontrolling interests(s)”. The updates were effective upon issuance but had no impact on the Company’s financial statements.

Also in December 2010, the Business Combinations topic of the ASC was amended to specify that if a public entity presents comparative financial statements, the entity should disclose revenue and earnings of the combined entity as though the business combination that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period only. The amendment also requires that the supplemental pro forma disclosures include a description of the nature and amount of any material, nonrecurring pro forma adjustments directly attributable to the business combination included in the reported pro forma revenue and earnings. This amendment is effective for the Company for business combinations for which the acquisition date is on or after January 1, 2011, although early adoption is permitted. The Company does not expect the amendment to have any impact on its financial statements.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

NOTE 8: Subsequent Events

None

Subsequent events are events or transactions that occur after the balance sheet date but before financial statements are issued. Recognized subsequent events are events or transactions that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. Non-recognized subsequent events are events that provide evidence about conditions that did not exist at the date of the balance sheet but arose after that date. Management has reviewed events occurring through the date the financial statements were available to be issued and no subsequent events have occurred requiring accrual or disclosure.

ITEM 2
MANAGEMENT'S DISCUSSION AND ANALYSIS
OR PLAN OF OPERATION

Management's discussion and analysis is included to assist shareholders in understanding the Company's financial condition, results of operations, and cash flow. This discussion should be reviewed in conjunction with the consolidated financial statements (unaudited) and notes included in this report and the supplemental financial data appearing throughout this report. Since the primary asset of the Company is its wholly-owned subsidiary, most of the discussion and analysis relates to the Bank.

Management's Discussion and Analysis of Financial Condition and Results of Operations and other portions of this quarterly report contain certain "forward-looking statements" concerning the future operations of the Bank of South Carolina Corporation. Management desires to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1996 and is including this statement for the express purpose of availing the Company of protections of such safe harbor with respect to all "forward-looking statements" contained in this Form 10-Q. The Company has used "forward-looking statements" to describe future plans and strategies including its expectations of the Company's future financial results. The following are cautionary statements. Management's ability to predict results or the effect of future plans or strategies is inherently uncertain. A variety of factors may affect the operations, performance, business strategy and results of the Company including, but not limited to the following:

- Risk from changes in economic, monetary policy, and industry conditions
 - Changes in interest rates, shape of the yield curve, deposit rates, the net interest margin and funding sources
 - Market risk (including net income at risk analysis and economic value of equity risk analysis) and inflation
 - Risk inherent in making loans including repayment risks and changes in the value of collateral
- Loan growth, the adequacy of the allowance for loan losses, provisions for loan losses, and the assessment of problem loans
 - Level, composition, and re-pricing characteristics of the securities portfolio
 - Deposit growth, change in the mix or type of deposit products and services
 - Continued availability of senior management

- Technological changes
- Ability to control expenses
- Changes in compensation
- Risks associated with income taxes including potential for adverse adjustments
 - Changes in accounting policies and practices
- Changes in regulatory actions, including the potential for adverse adjustments
 - Recently enacted or proposed legislation
 - Current disarray in the financial service industry.

All forward-looking statements in this report are based on information available to the Company as of the date of this report. Although Management believes that the expectations reflected in the forward-looking statements are reasonable, Management cannot guarantee that these expectations will be achieved. The Company will undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events. In addition, certain statements in future filings by the Company with the SEC, in press releases, and in oral and written statements made by or with the approval of the Company, which are not statements of historical fact, constitute forward looking statements.

Overview

Bank of South Carolina Corporation (the Company) is a financial institution holding company headquartered in Charleston, South Carolina, with \$299.1 million in assets as of March 31, 2011 and net income of \$649,368 for the three months ended March 31, 2011. The Company offers a broad range of financial services through its wholly-owned subsidiary, The Bank of South Carolina (the Bank). The Bank is a state-chartered commercial bank which operates principally in the Charleston, Dorchester and Berkeley counties of South Carolina. The Bank's original and current concept is to be a full service financial institution specializing in personal service, responsiveness, and attention to detail to foster long standing relationships.

The following is a discussion of the Company's financial condition as of March 31, 2011 as compared to December 31, 2010 and the results of operations for the three months ended March 31, 2011 as compared to the three months ended March 31, 2010. The discussion and analysis identifies significant factors that have affected the Company's financial position and operating results and should be read in conjunction with the financial statements and the related notes included in this report.

The Company derives most of its income from interest on loans and investments (interest bearing assets). The primary source of funding for making these loans and investments is the Company's interest and non-interest bearing deposits. One of the key measures of the Company's success is the amount of net interest income, or the difference between the income on its interest earning assets, such as loans and investments, and the expense on its interest bearing liabilities, such as deposits. Another key measure is the spread between the yield the Company earns on these interest bearing assets and the yield the Company pays on its interest-bearing liabilities.

There are risks inherent in all loans; therefore, the Company maintains an allowance for loan losses to absorb estimated losses on existing loans that may become uncollectible. The Company established and maintains this allowance based on a methodology representing the lending environment it operates within. For a detailed discussion on the allowance for loan losses see "Provision for Loan Losses".

The Company's results of operations depend not only on the level of its net interest income from loans and investments, but also on its non-interest income and its operating expenses. Net interest income depends upon the volumes, rates and mix associated with interest earning assets and interest bearing liabilities which result in the net interest spread. The Company's net interest spread for the three months ended March 31, 2011 was 3.82% compared to 4.18% for the three months ended March 31, 2010.

Non-interest income includes fees and other expenses charged to customers. A more detailed discussion of interest income, non-interest income and operating expenses follows.

For three months ended March 31, 2011, the Bank has paid \$425,000 to the Company for dividend payments.

CRITICAL ACCOUNTING POLICIES

The Company has adopted various accounting policies that govern the application principles generally accepted in the United States and with general practices within the banking industry in the preparation of its financial statements. The Company's significant accounting policies are described in the footnotes to its unaudited consolidated financial statements as of March 31, 2011 and its notes included in the consolidated financial statements in its 2010 Annual Report on Form 10-K as filed with the SEC.

Certain accounting policies involve significant judgments and assumptions by the Company that have a material impact on the carrying value of certain assets and liabilities. The Company considers these accounting policies to be critical accounting policies. The judgment and assumptions the Company uses are based on historical experience and other factors, which the Company believes to be reasonable under the circumstances. Because of the number of the judgments and assumptions the Company makes, actual results could differ from these judgments and estimates that could have a material impact on the carrying values of its assets and liabilities and its results of operations.

The Company considers its policies regarding the allowance for loan losses to be its most subjective accounting policy due to the significant degree of Management judgment. The Company has developed what it believes to be appropriate policies and procedures for assessing the adequacy of the allowance for loan losses, recognizing that this process requires a number of assumptions and estimates with respect to its loan portfolio. The Company's assessments may be impacted in future periods by changes in economic conditions, the impact of regulatory examinations and the discovery of information with respect to borrowers which were not known by Management at the time of the issuance of the consolidated financial statements. For additional discussion concerning the Company's allowance for loan losses and related matters, see "Allowance for Loan Losses."

BALANCE SHEET

LOANS

The Company focuses its lending activities on small and middle market businesses, professionals and individuals in its geographic markets. At March 31, 2011 outstanding loans (plus deferred loan fees of \$23,692) totaled \$206,855,415 which equaled 77.13% of total deposits and 69.15% of total assets. Substantially all loans were to borrowers located in the Company's market areas in the counties of Charleston, Dorchester and Berkeley in South Carolina.

Because lending activities comprise such a significant source of revenue, the Company's main objective is to adhere to sound lending practices. The Loan Committee of the Board of Directors meets monthly to evaluate the adequacy of the Allowance for Loan Losses and to review all loans resulting in credit exposure of \$10,000.

The breakdown of total loans by type and the respective percentage of total loans are as follows:

	March 31,		December 31,
	2011	2010	2010
Commercial loans	\$ 50,459,661	\$ 47,710,071	\$ 50,601,639
Commercial real estate	105,619,466	111,002,283	108,004,910
Residential mortgage	15,720,208	18,986,636	16,071,839
Consumer loans	5,382,125	5,159,686	5,361,197
Personal banklines	27,307,356	28,225,043	27,734,166
Other	223,680	247,944	234,607
Total	204,712,496	211,331,663	208,008,358

Edgar Filing: BANK OF SOUTH CAROLINA CORP - Form 10-Q

Deferred loan fees (net)	23,692	(856)	17,306
Allowance for loan losses	(2,763,745)	(3,077,261)	(2,938,588)
Loans, net	\$ 201,972,443	\$ 208,253,546	\$ 205,087,076

18

Percentage of Loans	March 31,		December 31,	
	2011	2010	2010	2010
Commercial loans	24.65 %	22.58 %	24.33 %	
Commercial real estate	51.59 %	52.53 %	51.92 %	
Residential mortgage	7.68 %	8.98 %	7.73 %	
Consumer loans	2.63 %	2.44 %	2.58 %	
Personal banklines	13.34 %	13.36 %	13.33 %	
Other	.11 %	.11 %	0.11 %	
Total	100.00 %	100.00 %	100.00 %	

As the result of the recessionary economic conditions which began in the latter half of 2007, the Company has experienced a decrease in loan demand as shown in the table above. Loans have decreased 1.58% or approximately \$3,289,476 from March 31, 2010 to March 31, 2011.

INVESTMENT SECURITIES AVAILABLE FOR SALE

The Company uses the investment securities portfolio for several purposes. It serves as a vehicle to manage interest rate and prepayment risk, to generate interest and dividend income from investment of funds, to provide liquidity to meet funding requirements, and to provide collateral for pledges on public funds. Investments are classified into three categories (1) Held to Maturity (2) Trading and (3) Available for Sale. Management believes that maintaining its securities in the Available for Sale category provides greater flexibility in the management of the overall investment portfolio. The average yield on investments at March 31, 2011 was 2.63% compared to 3.90% at December 31, 2010. The amortized cost of the investments available for sale at March 31, 2011 and December 31, 2010 and percentage of each category to total investments are as follows:

	INVESTMENT PORTFOLIO			
	March 31,	March 31,	December 31,	December 31,
	2011	2010	2010	2010
US Treasury Notes	\$ 21,247,394	\$ 9,055,078		
Government-Sponsored Enterprises	3,006,709	6,013,897		
Municipal Securities	23,748,779	23,913,091		
	\$ 48,002,882	\$ 38,982,066		
US Treasury Note	44.26 %	.03 %		
Government-Sponsored Enterprises	6.27 %	20.09 %		
Municipal Securities	49.47 %	79.88 %		
	100.00 %	100.00 %		

All investment securities were classified as Available for Sale (debt and equity securities that may be sold under certain conditions), at March 31, 2011 and December 31, 2010. The securities were reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity, net of income taxes. Unrealized losses on securities due to fluctuations in fair value are recognized when it is determined that an other than temporary decline in value has occurred. Gains or losses on the sale of securities are recognized on a specific identification, trade date basis.

The amortized cost and fair value of investment securities available for sale are summarized as follows as of March 31, 2011 and December 31, 2010:

	March 31, 2011			ESTIMATED FAIR VALUE
	AMORTIZED COST	GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	
U.S. Treasury Note	\$21,247,394	\$ 12,432	\$ 53,810	\$ 21,206,016
Government-Sponsored Enterprises	3,006,709	25,800	-	3,032,509
Municipal Securities	23,748,779	1,065,585	35,114	24,779,250
Total	\$48,002,882	\$ 1,103,817	\$ 88,924	\$ 49,017,775

	DECEMBER 31, 2010			ESTIMATED FAIR VALUE
	AMORTIZED COST	GROSS UNREALIZED GAINS	GROSS UNREALIZED LOSSES	
U.S. Treasury Notes	\$9,055,078	\$ 8,784	\$ 40,425	\$ 9,023,437
Government-Sponsored Enterprises	6,013,897	86,648	-	6,100,545
Municipal Securities	23,913,091	577,462	234,922	24,255,631
Total	\$38,982,066	\$ 672,894	\$ 275,347	\$ 39,379,613

The amortized cost and estimated fair value of investment securities available for sale at March 31, 2011 and December 31, 2010 by contractual maturity are as follows:

March 31, 2011

	AMORTIZED COST	ESTIMATED FAIR VALUE
Due in one year or less	\$ 3,909,720	\$ 3,949,331
Due in one year to five years	24,915,379	25,099,023
Due in five years to ten years	10,172,213	10,804,382
Due in ten years and over	9,005,570	9,165,039
Total	\$ 48,002,882	\$ 49,017,775

December 31, 2010

	AMORTIZED COST	ESTIMATED FAIR VALUE
Due in one year or less	\$ 9,619,604	\$ 9,719,581
Due in one year to five years	9,465,147	9,608,773
Due in five years to ten years	8,832,440	9,137,645

Edgar Filing: BANK OF SOUTH CAROLINA CORP - Form 10-Q

Due in ten years and over	11,064,875	10,913,614
Total	\$ 38,982,066	\$ 39,379,613

20

Description of Securities	MARCH 31, 2011					
	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury Notes	\$12,193,125	\$53,810	\$-	\$-	\$12,193,125	\$53,810
Government-Sponsored Enterprises	-	-	-	-	-	-
Municipal Securities	2,577,487	35,114	-	-	2,577,487	35,114
	\$14,770,612	\$88,924	\$-	\$-	\$14,770,612	\$88,924

Description of Securities	DECEMBER 31, 2010					
	Less than 12 months		12 months or longer		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
U.S. Treasury Notes	\$6,015,469	40,425	\$-	-	\$6,015,469	\$40,425
Government-Sponsored Enterprises	-	-	-	-	-	-
Municipal Securities	8,468,976	234,922	-	-	8,468,976	234,922
Total	\$14,484,445	275,347	\$-	-	\$14,484,445	\$275,347

At March 31, 2011, there were four US Treasury Notes with an unrealized loss of \$53,810 and four Municipal Securities with an unrealized loss of \$35,114 as compared to two US Treasury Notes with an unrealized loss of \$40,425 and fourteen Municipal Securities with an unrealized loss of \$234,922, at December 31, 2010. The investments at March 31, 2011 and December 31, 2010 were not considered other-than-temporarily impaired. The Company does not intend to sell these investments and therefore it is more likely than not that the Company will not be required to sell these securities before recovery of any amortized cost. The contractual terms of these investments do not permit the issuer to settle the securities at a price less than the amortized cost of the investment.

DEPOSITS

Deposits remain the Company's primary source of funding for loans and investments. Average interest bearing deposits provided funding for 72.61% of average earning assets for the three months ended March 31, 2011, and 71.30% for the twelve months ended December 31, 2010. The Company encounters strong competition from other financial institutions as well as consumer and commercial finance companies, insurance companies and brokerage firms located in the primary service area of the Bank. However, the percentage of funding provided by deposits has remained stable. The breakdown of total deposits by type and the respective percentage of total deposits are as follows:

	March 31,		December 31,
	2011	2010	2010
Non-interest bearing demand	57,417,806	48,062,604	56,884,235
Interest bearing demand	54,724,732	52,090,918	50,394,101
Money market accounts	80,809,316	66,725,130	68,007,823
Certificates of deposit \$100,000 and over	45,280,146	38,877,199	45,523,280
Other time deposits	17,647,120	16,714,610	17,760,278
Other savings deposits	12,294,734	11,450,913	11,867,258
Total Deposits	268,173,854	233,921,374	250,436,975

Percentage of Deposits	March 31,		December 31,	
	2011	2010	2010	
Non-interest bearing demand	21.41 %	20.55 %	22.71 %	%
Interest bearing demand	20.41 %	22.27 %	20.12 %	%
Money Market accounts	30.13 %	28.52 %	27.16 %	%
Certificates of deposit \$100,000 and over	16.89 %	16.62 %	18.18 %	%
Other time deposits	6.58 %	7.15 %	7.09 %	%
Other savings deposits	4.58 %	4.89 %	4.74 %	%
Total Deposits	100.00 %	100.00 %	100.00 %	%

While deposit fluctuations are normal in the Company's business, in order to reduce its cost of funds the Company has tried to reduce the amount of its outstanding Certificates of deposit greater than \$100,000 as a current business strategy. Overall deposits have increased 14.64% from March 31, 2010 to March 31, 2011 and 7.08% from December 31, 2010 to March 31, 2011. This increase is the result of the Company's business development efforts and the strength of the Bank.

SHORT-TERM BORROWINGS

The Bank has a demand note through the US Treasury, Tax and Loan system with the Federal Reserve Bank of Richmond. The Bank may borrow up to \$1,000,000 at March 31, 2011 and December 31, 2010 under the arrangement at an interest rate set by the Federal Reserve. The note is secured by Government Sponsored Enterprise Securities with a market value of \$1,112,665 at March 31, 2011 and \$1,073,450 at December 31, 2010. The amount outstanding under the note totaled \$414,432 and \$767,497 at March 31, 2011 and December 31, 2010, respectively. At March 31, 2011 and December 31, 2010, the Company had no outstanding federal funds purchased with the option to borrow up to \$26,000,000 on short term lines of credit. The Company has also established a Borrower-In-Custody arrangement with the Federal Reserve. This arrangement permits the Company to retain possession of loans pledged as collateral to secure advances from the Federal Reserve Discount Window. The Company established this arrangement as a secondary source of liquidity. As of March 31, 2011 and December 31, 2010 the Company could borrow up to \$62,477,724 and \$63,389,913, respectively. There have been no borrowings under this arrangement.

Comparison of Three Months Ended March 31, 2011 to Three Months Ended March 31, 2010

Net income decreased \$77,499 or 10.66% to \$649,368, or basic and diluted earnings per share of \$.14 and \$.14, respectively, for the three months ended March 31, 2011, from \$726,867, or basic and diluted earnings per share of \$.16 and \$.16, respectively, for the three months ended March 31, 2010. The decrease in net income between periods is primarily due to an increase in other operating expenses including an increase in overall auditing fees and an increase in data processing fees. Average earning assets increased \$22.1 million for the three months ended March 31, 2011 as compared to the same period in 2010. Average earning assets were \$278.5 million during the three months ended March 31, 2011 as compared to \$256.4 million for the three months ended March 31, 2010. Average loans decreased \$8.3 million or 3.84% to \$208.9 million for the three months ended March 31, 2011 as compared to \$217.2 million for the three months ended March 31, 2010.

Net Interest Income

Net interest income, the major component of the Company's net income, decreased \$33,884 or 1.23% to \$2,712,766 for the three months ended March 31, 2011, from \$2,746,650 for the three months ended March 31, 2010. This decrease is primarily due to a decrease of \$54,857 or 2.05% in interest and fees on loans as well as a decrease of \$45,392 in interest and dividends on investment securities. Average loans decreased \$8,344,882 or 3.84% and average investments increased \$6,990,038 or 17.23%. The Company had a \$3 million US Treasury Note with a yield of 4.87%, a \$3 million Government Sponsored Security with a yield of 5.69%, and a \$160 thousand Municipal Security with a yield of 4.38%, mature during the three months ended March 31, 2011. The Company reinvested in \$6 million in US Treasury Notes that are yielding between 1.25% and 1.35%, a significant decrease in the yield on the Company's investments. The yields on interest earning assets decreased 51 basis points to 4.29% from 4.81%. The cost of interest bearing liabilities during the three months ended March 31, 2011 was 0.47% as compared to 0.63% for the same period in 2010, a decrease of 16 basis points. Also contributing to the decline in net interest income was the increase in Federal Funds Sold during the quarter ended March 31, 2011, which averaged \$25.7 million at a yield of .17% as compared to \$2.3 million at a yield of .19% during the quarter ended March 31, 2010.

Allowance for Loan Losses

The allowance for loan losses represents management’s estimate of probable losses inherent in the loan portfolio. The adequacy of the allowance for loan losses (the “Allowance”) is reviewed monthly by the Loan Committee and on a quarterly basis by the Board of Directors. For purposes of this analysis, adequacy is defined as a level sufficient to absorb estimated losses in the loan portfolio as of the balance sheet date presented. The methodology employed for this analysis was modified in 2007, 2008 and 2010 to better reflect the economic environment and regulatory guidance. The revised methodology is based on a Reserve Model that is comprised of the three components listed below.

- 1) Specific Reserve analysis for impaired loans based on FASB ASC 310-10-35.
- 2) General reserve analysis applying historical loss rates based on FASB ASC 450-20.
- 3) Qualitative or environmental factors.

Loans are reviewed for impairment which is measured in accordance with FASB ASC 310-10-35. Impaired loans can either be secured or unsecured, not including large groups of smaller balance loans that are collectively evaluated. Impairment is measured by the difference between the loan amount and the present value of the future cash flow discounted at the loan’s effective interest rate, or, alternatively the fair value of the collateral if the loan is collateral dependent. An impaired loan may not represent an expected loss.

A general reserve analysis is performed on individually reviewed loans, but not impaired loans, and excluded individually reviewed impaired loans, based on FASB ASC 450-20. Historical losses are segregated into risk-similar groups and a loss ratio is determined for each group over a three year period. The three year average loss ratio by type is then used to calculate the estimated loss based on the current balance of each group. The three year historical loss percentage for the three months ended March 31, 2011 and March 31, 2010 was .34% and .16%, respectively.

Qualitative and environmental factors include external risk factors that Management believes are representative of the overall lending environment of the Bank. Management believes that the following factors create a more comprehensive system of controls in which the Bank can monitor the quality of the loan portfolio.

- 1) Portfolio risk
- 2) National and local economic trends and conditions
- 3) Effects of changes in risk selection and underwriting practices
- 4) Experience, ability and depth of lending management staff
- 5) Industry conditions
- 6) Effects of changes in credit concentrations
- 7) Loan and credit administration risk

Portfolio risk includes the levels and trends in delinquencies, impaired loans and changes in the loan rating matrix, trends in volume and terms of loans and overmargined real estate lending. Management is satisfied with the stability of the past due and non-performing loans and believes there has been no decline in the quality of the loan portfolio

due to any trend in delinquent or adversely classified loans. Although the aggregate total of classified loans has increased, management is confident in the adequacy of the sources of repayment. Sizable unsecured principal balances on a non-amortizing basis are monitored. Within the portfolio risk factor the Company elected to increase the risk percentage for “trends in volume and term of loan”. In addition the Company elected to increase the risk percentage for “over margined real estate lending risk”. Although the vast majority of the Company’s real estate loans are underwritten on a cash flow basis, the secondary source of repayment is typically tied to the Company’s ability to realize on the collateral. Given the contraction in real estate values, the Company closely monitors its loan to value. The Company recently amended its Loan Policy to reduce the collateral advance rate from 85% to 80% on all real estate transactions, with the exception of raw land at 65% and land development at 70%.

Occasional extensions of credit occur beyond the policy thresholds of the Company's normal collateral advance margins for real estate lending. These loans are monitored and the balances reported to the Board every quarter. An excessive level of this practice could result in additional examiner scrutiny, competitive disadvantages and potential losses if forced to convert the collateral. The consideration of overmargined real estate loans directly relates to the capacity of the borrower to repay. Management often requests additional collateral to bring the loan to value ratio within the policy guidelines and also require a strong secondary source of repayment in addition to the primary source of repayment.

Although significantly under the threshold of 100% of capital (currently approximately \$29 million), the Company's list and number of over margined real estate loans currently totals approximately \$14.9 million or approximately 7.18% of its loan portfolio.

Management revised the credit rating matrix in order to rate all extensions of credit providing a more specified picture of the risk each loan poses to the quality of the loan portfolio. There are eight possible ratings based on ten different qualifying characteristics. The ten characteristics are: cash flow, collateral quality, guarantor strength, financial condition, management quality, operating performance, the relevancy of the financial statements, historical loan performance, debt service coverage and the borrower's leverage. In an effort to place more emphasis on borrower's cash flow a weighted average method is used to determine the loan grade with cash flow, financial conditions, and debt service coverage being weighted triple and financial statements being weighted double. The matrix is designed to meet management's standards and expectations of loan quality. In addition to the rating matrix, the Company rates its credit exposure on the basis of each loan and the quality of each borrower.

National and local economic trends and conditions are constantly changing and results in both positive and negative impact on borrowers. Most macroeconomic conditions are not controllable by the Company and are incorporated into the qualitative risk factors. Natural and environmental disasters, wars and the recent fallout of the subprime lending market as well as problems in the traditional mortgage market are a few of the trends and conditions that are currently affecting the Company's national and local economy. Changes in the national and local economy have impacted borrowers' ability, in many cases, to repay loans in a timely manner. On occasion a loan's primary source of repayment (i.e., personal income, cash flow, or lease income) may be eroded as a result of unemployment, lack of revenues, or the inability of a tenant to make rent payments.

The quality of the Bank's loan portfolio is contingent upon its risk selection and underwriting practices. Every credit with over \$100,000 in exposure is summarized by the Bank's Credit Department and reviewed by the Loan Committee on a monthly basis. The Board of Directors review credits over \$500,000 monthly with an annual credit analysis conducted on credits in excess of \$350,000 upon the receipt of updated financial information. Prior to any extension of credit, every significant commercial loan goes through sound credit underwriting. The Credit Department conducts detailed cash flow analysis on each proposal using the most current financial information. Relevant trends and ratios are evaluated.

The Bank has over 300 years of lending management experience among twelve members of its lending staff. In addition to the lending staff the Bank has an Advisory Board for each branch comprised of business and community leaders from the specific branch's market area. Management meets with these boards quarterly to discuss the trends and conditions in each respective market. Management is aware of the many challenges currently facing the banking industry. Assessing banks to replenish the insurance fund and its corresponding impact on bank profits, increased regulatory scrutiny in and or on lending practices, and pending changes in deposit and or funding source type and mix, continue to impact the Company's environment. As other banks look to increase earnings in the short term, the Company will continue to emphasize the need to maintain its sound lending practices and core deposit growth.

There has been an influx of new banks over the last several years within the Company's geographic area. This increase has decreased the local industry's overall margins as a result of pricing competition. Management believes that the borrowing base of the Bank is well established and therefore unsound price competition is not necessary.

The risks associated with the effects of changes in credit concentration include loan concentration, geographic concentration and regulatory concentration.

As of March 31, 2011, there were only four Standard Industrial Code groups that comprised more than three percent of the Bank's total outstanding loans. The four groups are activities related to real estate, offices and clinics of doctors, real estate agents and managers, and legal services.

The Company is located along the coast and on an earthquake fault, increasing the chances that a natural disaster may impact the Bank and its borrowers. The Company has a Disaster Recovery Plan in place; however, the amount of time it would take for its customers to return to normal operations is unknown.

Loan and credit administration risk includes collateral documentation, insurance risk and maintaining financial information risk.

The majority of the Bank's loan portfolio is collateralized with a variety of its borrower's assets. The execution and monitoring of the documentation to properly secure the loan is the responsibility of the Bank's lenders and Loan Department. The Bank requires insurance coverage naming the Bank as the mortgagee or loss payee. Although insurance risk is also considered collateral documentation risk, the actual coverage, amounts of coverage and increased deductibles are important to management.

Risk includes a function of time during which the borrower's financial condition may change; therefore, keeping financial information up to date is important to the Bank. The policy of the Bank is that all new loans, regardless of the customer's history with the Bank, should have updated financial information, as long as exposure is greater than \$10,000. In addition the Company is monitoring appraisals closely as real estate values continue to decline.

The aforementioned changes to the Company's Allowance for Loan Loss methodology were not made as a result of dramatic or patterned history of loan losses, increases in past due loans, or non-performing assets, but rather because of specific changes in the Company's lending environment. These changes precipitated the need for additional reserves in a period of time when the Company's loan portfolio grew significantly (three months ended March 31, 2010). Based on the evaluation described above, the Company recorded a provision for loan losses during the three months ended March 31, 2011 and March 31, 2010 of \$120,000, respectively. At March 31, 2011 the three year average loss ratios were: .57% Commercial, .48% Consumer, .49% 1-4 Residential, .00% Real Estate Construction and .14% Real Estate Mortgage. The three year historical loss ratio used at March 31, 2011 was .34% compared to .163% at March 31, 2010.

During the quarter ended March 31, 2011, charge-offs of \$303,403 and recoveries of \$8,559 were recorded to the allowance resulting in an allowance for loan losses of \$2,763,745 or 1.35% of total loans, compared to charge-offs of \$71,356 and recoveries of \$1,621 resulting in an allowance loan losses of \$3,077,261 or 1.46% of total loans at March 31, 2010.

The Bank had impaired loans totaling \$4,644,770 as of March 31, 2011, compared to \$2,721,896 as of March 31, 2010. The impaired loans at March 31, 2011 include six non-accrual loans with a combined balance of \$1,345,211. Impaired loans at March 31, 2010 included six non-accrual loans with a combined balance of \$1,100,852. Included in the impaired loans at March 31, 2011, is one credit totaling \$1,023,000 which is secured by a second mortgage. Management does not know of any loans which will not meet their contractual obligations that are not otherwise discussed herein.

The accrual of interest is generally discontinued on loans, which become 90 days past due as to principal or interest. The accrual of interest on some loans, however, may continue even though they are 90 days past due if the loans are well secured or in the process of collection and management deems it appropriate. If non-accrual loans decrease their past due status to less than 30 days for a period of three months, they are reviewed individually by management to determine if they should be returned to accrual status. There were no loans over 90 days past due still accruing interest at March 31, 2011 or March 31, 2010.

Net charge-offs for the three months ended March 31, 2011 were \$294,844 compared to net charge-offs of \$69,735 for the three months ended March 31, 2010. Uncertainty in the economic outlook still exists, making charge-off levels in future periods less predictable; however, loss exposure in the portfolio is identified, reserved and closely monitored to ensure that changes are promptly addressed in the analysis of reserve adequacy.

The Company had \$122,562 unallocated reserves at March 31, 2011 related to other inherent risk in the portfolio compared to unallocated reserves of \$694,943 at March 31, 2010. Management believes this amount is appropriate and properly supported through the environmental factors of its Allowance for Loan Losses. Management believes the allowance for loan losses at March 31, 2011 is adequate to cover estimated losses in the loan portfolio; however, assessing the adequacy of the allowance is a process that requires considerable judgment. Management's judgments are based on numerous assumptions about current events which it believes to be reasonable, but which may or may not be valid. Thus there can be no assurance that loan losses in future periods will not exceed the current allowance amount or that future increases in the allowance will not be required. No assurance can be given that management's ongoing evaluation of the loan portfolio in light of changing economic conditions and other relevant circumstances will not require significant future additions to the allowance, thus adversely affecting the operating results of the Company.

The Allowance is also subject to examination testing by regulatory agencies, which may consider such factors as the methodology used to determine adequacy and the size of the Allowance relative to that of peer institutions, and other adequacy tests. In addition, such regulatory agencies could require the Company to adjust its allowance based on information available to them at the time of their examination.

The methodology used to determine the reserve for unfunded lending commitments, which is included in other liabilities, is inherently similar to that used to determine the allowance for loan losses adjusted for factors specific to binding commitments, including the probability of funding and historical loss ratio. During the three months ended March 31, 2011, no entry was made to the allowance for unfunded loans and commitments leaving a balance of \$20,825.

The following is a summary of the non-accrual loans as of March 31, 2011.

Loans Receivable on Non-Accrual at March 31, 2011

Commercial	\$6,043
Commercial Real Estate:	
Commercial Real Estate - Construction	-
Commercial Real Estate - Other	838,768
Consumer Real Estate	500,400
Total	\$1,345,211

The following is a schedule of the Bank's delinquent loans, excluding mortgage loans held for sale and deferred loan fees, as of March 31, 2011.

March 31, 2011	30-59 Days Past Due	60-89 Days Past Due	Greater Than 90 Days	Total Past Due	Current	Total Loans Receivable	Recorded Investment > 90 Days and Accruing
Commercial	\$ 144,759	57,883	-	202,642	50,253,661	50,456,303	-
Commercial Real Estate:					4,127,548	4,127,548	
Commercial Real Estate - Other	1,793,000	322,669	486,390	2,602,059	98,289,860	100,891,919	-
Consumer:							
Consumer - Real Estate		317,500		317,500	43,803,174	44,120,674	
Consumer - Other	49,337	-		49,337	5,544,382	5,593,719	-
Total	\$ 1,987,096	698,052	486,390	3,171,538	202,018,625	205,190,163	-

As of March 31, 2011 loans individually evaluated and considered impaired are presented in the following table:

**Impaired and Restructured Loans
For the Three Months Ended March 31, 2011**

	Recorded Investment	Unpaid Principal Balance	Related Allowance	Average Recorded Investment	Interest Income Recognized
With no related allowance recorded:					
Commercial	\$ 83,350	\$ 6,043	\$ -	\$ 9,450	\$ 34,055
Commercial Real Estate	1,997,543	2,021,209	-	2,012,407	354,097
Consumer Real Estate	599,786	599,354	-	599,636	133,198
Total	\$ 2,680,679	\$ 2,626,606	\$ -	\$ 2,621,493	\$ 521,350
With an allowance recorded:					
Commercial	\$ 1,211,163	\$ 1,205,663	\$ 1,205,663	\$ 807,846	\$ 41,714
Commercial Real Estate	126,000	90,959	86,084	87,431	17,702
Consumer Real Estate	725,000	721,542	263,215	721,542	250,995
Total	\$ 2,062,163	\$ 2,018,164	\$ 1,554,962	\$ 1,616,819	\$ 310,411

The following table illustrates credit risks by category and internally assigned grades.

March 31, 2011	Commercial	Commercial Real Estate Construction	Commercial Real Estate Other	Residential – Real Estate	Consumer – Other
Pass	\$ 44,066,319	\$ 3,652,773	\$ 93,582,288	42,333,818	4,941,212
Watch	3,121,517	474,775	3,299,525	89,108	313,918
OAEM	1,925,601	-	426,124	376,852	230,142
Sub-Standard	1,342,866	-	3,583,982	1,320,896	106,824
Doubtful	-	-	-	-	1,623
Loss	-	-	-	-	-
Total	\$ 50,456,303	\$ 4,127,548	\$ 100,891,919	44,120,674	5,593,719

The following table sets forth the changes in the allowance and an allocation of the allowance by loan category. The allocation of the allowance may be made for specific loans, but the entire allowance is available for any loan that, in Management's judgment, should be charged-off. The allowance consists of specific and general components. The specific component relates to loans that are individually classified as impaired. The general component covers non-impaired loans and is based on historical loss experience adjusted for current economic factors described above.

March 31, 2011	Commercial	Commercial Real Estate	Consumer	Residential	Finance Leases	Total	Unallocated
Allowance for Loan Losses							
Beginning							
Balance	\$ 1,213,865	\$ 2,115,641	\$ -	\$ 230,022	\$ -	\$ 2,938,588	\$ 592,647
Charge-offs	-	303,403	-	-	-	303,403	
Recoveries	3,559	5,000	-	-	-	8,559	
Provisions	-	120,000	-	-	-	120,000	(470,085)
Ending Balance	1,217,424	1,937,238	-	230,022	-	2,763,744	122,562
Ending Balances:							
Individually evaluated for impairment	1,211,706	2,112,168	-	1,320,896	-	4,644,770	
Collectively evaluated for impairment	\$ 49,244,597	\$ 102,907,299	\$ 5,593,719	\$ 42,799,778	\$ -	\$ 200,545,393	\$

Other Income

Other income for the three months ended March 31, 2011, increased \$8,574 or 2.04% to \$429,327 from \$420,753 for the three months ended March 31, 2010. This increase is primarily due to a increase in mortgage banking income of \$11,385 or 6.82% to \$178,263 for the three months ended March 31, 2011 as compared to \$166,878 for the three months ended March 31, 2010. During the three months ended March 31, 2011, the Company originated \$12,315,708 in mortgage loans a decrease of \$1,732,344 compared to March 31, 2010. However, the service release premium increased \$28,171 to \$265,805 for the three months ended March 31, 2011 compared to 2010. This was offset by an increase in discount points paid of \$22,605 to \$83,618. With fewer originations, commissions paid to the mortgage lenders decreased \$2,286.

Other Expense

Bank overhead increased \$110,770 or 5.57% to \$2,096,436 for the three months ended March 31, 2011, from \$1,985,666 for the three months ended March 31, 2010. Net occupancy expense increased \$23,892 or 7.69% to \$334,478 for the three months ended March 31, 2011 as compared to \$310,586 for the three months ended March 31, 2010. During 2010 the Company moved its Mortgage Department from its main banking house at 256 Meeting Street to a new office on Morrison Drive in Charleston, SC. This move resulted in an increase in rental expense of \$2,000 a month as well as an increase in utilities. Other operating expenses increased \$83,334 or 16.40% to \$591,558 for the three months ended March 31, 2011, from \$508,224 for the three months ended March 31, 2010. Data processing fees increased \$22,036, due to the addition of remote capture and eCorp (online banking for corporations). The Company saw an increase of \$24,174 in audit fees and a decrease in legal fees of \$8,941 for the three months ended March 31, 2011 Audit fees increased due to additional audits required with the addition of new products. Legal fees decreased as a result of fewer billing hours related to foreclosed properties. The other changes in non-interest expense categories reflect normal modest fluctuations between the two periods.

Income Tax Expense

For the three months ended March 31, 2011, the Company's effective tax rate was 29.85% compared to 31.54% during the three months ended March 31, 2010.

Off Balance Sheet Arrangements

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with generally accepted accounting principles, are not recorded in the financial statements, or are recorded in amounts that differ from the notional amounts. These transactions involve, to varying degrees, elements of credit, interest rate, and liquidity risk. Such transactions are used by the Company for general corporate purposes or for customer needs. Corporate purpose transactions are used to help manage credit, interest rate and liquidity risk or to optimize capital. Customer transactions are used to manage customer's requests for funding.

The Company's off-balance sheet arrangements consist principally of commitments to extend credit described below. The Company estimates probable losses related to binding unfunded lending commitments and records a reserve for unfunded lending commitment in other liabilities on the consolidated balance sheet. The balance of the reserve was \$20,825 at March 31, 2011 and 2010. The Company had no interests in non-consolidated special purpose entities.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total

commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained if deemed necessary by the Company upon extension of credit is based on management's credit evaluation of the borrower. Collateral held varies, but may include accounts receivable, negotiable instruments, inventory, property, plant and equipment, and real estate. Commitments to extend credit, including unused lines of credit, amounted to \$45,451,474 and \$41,352,245 at March 31, 2011 and 2010, respectively.

Standby letters of credit represent an obligation of the Company to a third party contingent upon the failure of the Company's customer to perform under the terms of an underlying contract with the third party or obligates the Company to guarantee or stand as surety for the benefit of the third party. The underlying contract may entail either financial or nonfinancial obligations and may involve such things as the shipment of goods, performance of a contract, or repayment of an obligation. Under the terms of a standby letter, generally drafts will be drawn only when the underlying event fails to occur as intended. The Company can seek recovery of the amounts paid from the borrower. The majority of these standby letters of credit are unsecured. Commitments under standby letters of credit are usually for one year or less. The maximum potential amount of undiscounted future payments related to standby letters of credit at March 31, 2011 was \$532,613 and \$521,610 at March 31, 2010.

The Company originates certain fixed rate residential loans and commits these loans for sale. The commitments to originate fixed rate residential loans and the sale commitments are freestanding derivative instruments. The fair value of the commitments to originate fixed rate conforming loans was not significant at March 31, 2011. The Company has forward sales commitments, totaling \$2.1 million at March 31, 2011, to sell loans held for sale of \$2.1 million. The fair value of these commitments was not significant at March 31, 2011. The Company has no embedded derivative instruments requiring separate accounting treatment.

Liquidity

The Company must maintain an adequate liquidity position in order to respond to the short-term demand for funds caused by withdrawals from deposit accounts, extensions of credit and for the payment of operating expenses. Primary liquid assets of the Company are cash and due from banks, federal funds sold, investments available for sale, other short-term investments and mortgage loans held for sale. The Company's primary liquid assets accounted for 30.61% and 21.25% of total assets at March 31, 2011 and 2010, respectively. Proper liquidity management is crucial to ensure that the Company is able to take advantage of new business opportunities as well as meet the credit needs of its existing customers. Investment securities are an important tool in the Company's liquidity management. Securities classified as available for sale may be sold in response to changes in interest rates and liquidity needs. All of the securities presently owned by the Bank are classified as available for sale. At March 31, 2011, the Bank had short-term lines of credit totaling approximately \$26,000,000 (which are withdrawable at the lender's option), with no outstanding balance at March 31, 2011. Additional sources of funds available to the Bank for liquidity needs include borrowing on a short-term basis from the Federal Reserve System, increasing deposits by raising interest rates paid and selling mortgage loans for sale. In order to establish a secondary source of liquidity, the Company has established a Borrower-In-Custody arrangement with the Federal Reserve. This arrangement permits the Company to retain possession of assets pledged as collateral to secure advances from the Federal Reserve Discount Window. As of March 31, 2011 the Company could borrow up to \$62,477,724. There have been no borrowings under this arrangement. In addition, on March 11, 2010 the Company borrowed \$7,500,000 from the Federal Reserve Bank's Term Auction Facility (TAF) at a rate of .50% for a term of 28 days (paid off on April 8, 2010). The Board of Governor's of the Federal Reserve System established this program to allow depository institutions to place a bid for an advance from its local Federal Reserve Bank at a fixed interest rate determined via centralized single-price auction. The collateral pledged to secure advances from the Federal Reserve Discount Window, serves as collateral. This loan was paid off on April 8, 2010.

The Company's core deposits consist of non-interest bearing accounts, NOW accounts, money market accounts, time deposits and savings accounts. The Company closely monitors its reliance on certificates of deposit greater than \$100,000 and other large deposits. The Company's management believes its liquidity sources are adequate to meet its operating needs and does not know of any trends, events or uncertainties that may result in a significant adverse effect on the Company's liquidity position. At March 31, 2011 and 2010, the Bank's liquidity ratio was 23.97% and 10.68%, respectively.

Capital Resources

The capital needs of the Company have been met to date through the \$10,600,000 in capital raised in the Bank's initial offering, the retention of earnings less dividends paid and the exercise of stock options for total shareholders' equity at March 31, 2011 of \$29,339,537. The rate of asset growth since the Bank's inception has not negatively impacted this capital base. The risk-based capital guidelines for financial institutions are designed to highlight differences in risk profiles among financial institutions and to account for off balance sheet risk. The guidelines established require a risk based capital ratio of 8% for bank holding companies and banks. The risk based capital ratio at March 31, 2011, for the Bank is 13.15% and at March 31, 2010 was 12.76%. The Company's management does not know of any trends, events or uncertainties that may result in the Company's capital resources materially increasing or decreasing.

The Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a material effect on the financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's and the Bank's assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. The Company's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios of total and Tier 1 capital to risk-weighted assets and to average assets. Management believes, as of March 31, 2011, that the Company and the Bank meet all capital adequacy requirements to which they are subject.

At March 31, 2011 and 2010, the Company and the Bank were categorized as “well capitalized” under the regulatory framework for prompt corrective action. To be categorized as “well capitalized” the Company and the Bank must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios of 10%, 6% and 5%, respectively, and to be categorized as “adequately capitalized,” the Company and the Bank must maintain minimum total risk based, Tier 1 risk based and Tier 1 leverage ratios of 8%, 4% and 4%, respectively. There are no current conditions or events that management believes would change the Company's or the Bank's category.

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Not required.

ITEM 4 CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures and internal controls and procedures for financial reporting

An evaluation was carried out under the supervision and with the participation of Bank of South Carolina Corporation's management, including its Principal Executive Officer and the Chief Financial Officer/ Executive Vice President and Treasurer, of the effectiveness of Bank of South Carolina Corporation's disclosure controls and procedures as of March 31, 2011. Based on that evaluation, Bank of South Carolina Corporation's management, including the Chief Executive Officer and Chief Financial Officer/Executive Vice President and Treasurer, has concluded that Bank of South Carolina Corporation's disclosure controls and procedures are effective. During the period ending March 31, 2011, there was no change in Bank of South Carolina Corporation's internal control over

financial reporting that has materially affected or is reasonably likely to materially affect, Bank of South Carolina Corporation's internal control over financial reporting.

The Company established a Disclosure Committee on December 20, 2002. The committee is made up of the President and Chief Executive Officer, Chief Financial Officer/Executive Vice President and Treasurer, Executive Vice President, Vice President (Audit Compliance Officer), Vice President (Accounting), Vice President (Credit Department) and Vice President (Operations and Technology). This Committee meets quarterly to review the 10Q and or the 10K, to assure that the financial statements, Securities and Exchange Commission filings, and all public releases are free of any material misstatements and correctly reflect the financial position, results of operations and cash flows of the Company. This Committee also assures that the Company is in compliance with the Sarbanes-Oxley Act.

The Disclosure Committee establishes a calendar each year to assure that all filings are reviewed and filed in a proper manner. The calendar includes the dates of the Disclosure Committee meetings, the dates that the 10Q and or the 10K are sent to its independent accountants and to its independent counsel for review as well as the date for the Audit Committee of the Board of Directors to review the reports.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

The Company and its subsidiary from time to time are involved as plaintiff or defendant in various legal actions incident to its business. These actions are not believed to be material either individually or collectively to the consolidated financial condition of the Company or its subsidiary.

Item 1A. Risk Factors

Not required.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Removed and Reserved

Item 5. Other Information

None.

Item 6. Exhibits

1. The Consolidated Financial Statements are included in this Form 10-Q and listed on pages as indicated.

	Page
(1) Consolidated Balance Sheets	3
(2) Consolidated Statements of Income for the three months ended March 31, 2011 and 2010	4
(3) Consolidated Statements of Shareholders' Equity and Comprehensive Income	5
(4) Consolidated Statements of Cash Flows	6

2. Exhibits
