* Denotes that all or a portion of the loan secures the notes offered in the Debt Securitization (as defined in Note 6).

The majority of the investments bear interest at a rate that may be determined by reference to London Interbank Offered Rate ("LIBOR") "L" or Prime "P" and which reset daily, quarterly or semiannually. For each we have (1) provided the spread over LIBOR or Prime and the weighted average current interest rate in effect at June 30, 2012. Certain investments are subject to a LIBOR or Prime interest rate floor. For fixed rate loans, a spread above a reference rate is not applicable.

(2) For portfolio companies with multiple interest rate contracts, the interest rate shown is a weighted average current interest rate in effect at June 30, 2012.

The negative fair value is the result of the capitalized discount on the loan or the unfunded commitment being (3) valued below par. The negative cost is the result of the capitalized discount being greater than the principal amount outstanding on the loan.

- (4) The entire commitment was unfunded at June 30, 2012. As such, no interest is being earned on this investment.
- (5) Loan was on non-accrual status as of June 30, 2012, meaning that the Company has ceased recognizing interest income on the loan.
- (6) A portion of the interest may be deferred through a payment-in-kind ("PIK") rate option.
- (7) As of June 30, 2012, the Company also had a \$74 receivable from a total return swap ("TRS"), which was terminated on April 11, 2012.

See Notes to Consolidated Financial Statements.

* Denotes that all or a portion of the loan secures the notes offered in the Debt Securitization.

- The majority of the investments bear interest at a rate that may be determined by reference to LIBOR "L" or Prime "P" and which reset daily, quarterly or semiannually. For each we have provided the spread over LIBOR or Prime and the weighted average current interest rate in effect at September 30, 2011. Certain investments are subject to a LIBOR or Prime interest rate floor. For fixed rate loans, a spread above a reference rate is not applicable.
- (1) For portfolio companies with multiple interest rate contracts, the interest rate shown is a weighted average current interest rate in effect at September 30, 2011.
 - (2) The negative fair value is the result of the capitalized discount on the loan or the unfunded commitment being valued below par. The negative cost is the result of the capitalized discount being greater than the principal amount outstanding on the loan.
 - (3) The entire commitment was unfunded at September 30, 2011. As such, no interest is being earned on this investment.!
 - (4) Loan was on non-accrual status as of September 30, 2011, meaning that the Company has ceased recognizing interest income on the loan.
 - (5) A portion of the interest may be deferred through a PIK rate option.
 - (6)

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

Note 1. Organization

Golub Capital BDC, Inc. (“GBDC” and, together with its subsidiaries, the “Company”) is an externally managed, closed-end, non-diversified management investment company. GBDC has elected to be regulated as a business development company (“BDC”) under the Investment Company Act of 1940, as amended (the “1940 Act”). In addition, for U.S. federal income tax purposes, GBDC has elected to be treated as a regulated investment company (“RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended (the “Code”).

On April 13, 2010, Golub Capital BDC LLC (“GC LLC”) converted from a Delaware limited liability company to a Delaware corporation, leaving GBDC as the surviving entity (the “Conversion”). At the time of the Conversion, all limited liability company interests were exchanged for 8,984,863 shares of common stock in GBDC. GBDC had no assets or operations prior to the Conversion and, as a result, the books and records of GC LLC have become the books and records of the surviving entity. On April 14, 2010, GBDC completed its initial public offering.

GC LLC was formed in the State of Delaware on November 9, 2009 to continue and expand the business of Golub Capital Master Funding LLC (“GCMF”) which commenced operations on July 7, 2007. All of the outstanding limited liability company interests in GCMF were initially held by three Delaware limited liability companies, Golub Capital Company IV, LLC, Golub Capital Company V LLC and Golub Capital Company VI LLC (collectively, the “Capital Companies”). In November 2009, the Capital Companies formed GC LLC, into which they contributed 100% of the limited liability company interests of GCMF and from which they received a proportionate number of limited liability company interests in GC LLC. In February 2010, GEMS Fund L.P. (“GEMS”), a limited partnership affiliated through common management with the Capital Companies, purchased an interest in GC LLC. As a result of the Conversion, the Capital Companies and GEMS received shares of common stock in GBDC.

Subsequent to the Conversion, GCMF became a wholly owned subsidiary of GBDC. GCMF’s financial results are consolidated with GBDC, and the portfolio investments held by GCMF are included in the Company’s consolidated financial statements. All intercompany balances and transactions have been eliminated.

The Company’s investment strategy is to invest in senior secured, one stop (a loan that combines characteristics of traditional first lien senior secured loans and second lien or subordinated loans), mezzanine (a loan that ranks senior only to a borrower’s equity securities and ranks junior to all of such borrower’s other indebtedness in priority of payment), second lien loans and equity securities to middle market companies that are, in most cases, sponsored by private equity investors. The Company has entered into an investment advisory agreement (the “Investment Advisory

Agreement”) with GC Advisors LLC (the “Investment Adviser”), under which the Investment Adviser manages the day-to-day operations of, and provides investment advisory services to, the Company. Prior to April 14, 2010, Golub Capital Incorporated (the “Investment Manager”) served as the investment adviser for the Company.

Note 2. Accounting Policies and Recent Accounting Updates

Basis of presentation: The accompanying interim consolidated financial statements of the Company and related financial information have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Articles 6 or 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for annual financial statements. In the opinion of management, the consolidated financial statements reflect all adjustments and reclassifications consisting solely of normal accruals that are necessary for the fair presentation of financial results as of and for the periods presented. All intercompany balances and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the current period presentation.

Fair value of financial instruments: The Company applies fair value to all of its financial instruments in accordance with Accounting Standards Codification (“ASC”) Topic 820 — *Fair Value Measurements and Disclosures*. ASC Topic 820 defines fair value, establishes a framework used to measure fair value and requires disclosures for fair value measurements. In accordance with ASC Topic 820, the Company has categorized its financial instruments carried at fair value, based on the priority of the valuation technique, into a three-level fair value hierarchy. Fair value is a market-based measure considered from the perspective of the market participant who holds the financial instrument rather than an entity specific measure. Therefore, when market assumptions are not readily available, the Company’s own assumptions are set to reflect those that management believes market participants would use in pricing the financial instrument at the measurement date.

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

The availability of observable inputs can vary depending on the financial instrument and is affected by a wide variety of factors, including, for example, the type of product, whether the product is new, whether the product is traded on an active exchange or in the secondary market and the current market conditions. To the extent that the valuation is based on models or inputs that are less observable or unobservable in the market the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for financial instruments classified as Level 3.

Any changes to the valuation methodology are reviewed by management and the Company's board of directors (the "Board") to confirm that the changes are justified. As markets change, new products develop and the pricing for products becomes more or less transparent, the Company will continue to refine its valuation methodologies.

Use of estimates: The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Consolidation: As permitted under Regulation S-X and the American Institute of Certified Public Accountants Audit and Accounting Guide for Investment Companies, the Company will generally not consolidate its investment in a company other than an investment company subsidiary or a controlled operating company whose business consists of providing services to the Company. Accordingly, the Company consolidated the results of the Company's subsidiaries in its consolidated financial statements.

Assets related to transactions that do not meet ASC Topic 860 — *Transfers and Servicing* requirements for accounting sale treatment are reflected in the Company's consolidated statements of financial condition as investments. Those assets are owned by special purpose entities that are consolidated in the Company's financial statements. The creditors of the special purpose entities have received security interests in such assets and such assets are not intended to be available to the creditors of the Company (or any affiliate of the Company).

Cash and cash equivalents: Cash and cash equivalents are highly liquid investments with an original maturity of three months or less at the date of acquisition. The Company deposits its cash in financial institutions and, at times, such balances may be in excess of the Federal Deposit Insurance Corporation insurance limits.

Restricted cash and cash equivalents: Restricted cash and cash equivalents include amounts that are collected and are held by trustees who have been appointed as custodians of the assets securing certain of the Company's financing transactions. Restricted cash is held by the trustees for payment of interest expense and principal on the outstanding borrowings or reinvestment into new assets. In addition, restricted cash and cash equivalents include amounts held within the Company's small business investment company ("SBIC"). This amount is generally restricted to the originations of new loans from the SBIC and the payment of U.S. Small Business Administration ("SBA") debentures and related interest expense.

Revenue recognition:

Investments and related investment income: The Board determines the fair value of the Company's investments. Interest income is accrued based upon the outstanding principal amount and contractual interest terms of debt investments. In addition, the Company may generate revenue in the form of commitment, origination, amendment, structuring or due diligence fees, fees for providing managerial assistance and consulting fees. Loan origination fees, original issue discount and market discount or premium are capitalized, and the Company accretes or amortizes such amounts over the life of the loan as interest income. All other income is recorded into income when earned. The Company records prepayment premiums on loans as interest income. When the Company receives principal payments on a loan in an amount that exceeds the loan's amortized cost, it records the excess principal payment as interest income. For the three and nine months ended June 30, 2012, interest income included \$1,067 and \$3,447, respectively, of amortization of discounts. For the three and nine months ended June 30, 2011, interest income included \$965 and \$4,146, respectively, of amortization of discounts.

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

As of June 30, 2012 and September 30, 2011, the Company had interest receivable of \$3,893 and \$3,063, respectively. For the three and nine months ended June 30, 2012, the Company earned interest of \$14,811 and \$41,263, respectively. For the three and nine months ended June 30, 2011, the Company earned interest of \$10,071 and \$28,319, respectively. For the three and nine months ended June 30, 2012, the Company received interest in cash, which excludes income from amortization of loan origination fees, original issue discount and market discount or premium, in the amounts of \$13,120 and \$35,995, respectively. For the three and nine months ended June 30, 2011, the Company received interest in cash, which excludes income from amortization of loan origination fees, original issue discount and market discount or premium, in the amounts of \$9,410 and \$27,086, respectively. For the three and nine months ended June 30, 2012, the Company received loan origination fees of \$516 and \$6,027, respectively. For the three and nine months ended June 30, 2011, the Company received loan origination fees of \$1,941 and \$4,740, respectively. These loan origination fees are capitalized and amortized over the life of the loan as interest income.

For investments with contractual PIK interest, which represents contractual interest accrued and added to the principal balance that generally becomes due at maturity, the Company will not accrue PIK interest if the portfolio company valuation indicates that the PIK interest is not collectible. For the three and nine months ended June 30, 2012, the Company recorded PIK income of \$634 and \$1,545, respectively. For the three and nine months ended June 30, 2011, the Company recorded PIK income of \$268 and \$615, respectively. For the three and nine months ended June 30, 2012, the Company received PIK payments in cash of \$187 and \$554, respectively. For the three and nine months ended June 30, 2011, the Company received PIK payments in cash of \$104 and \$269, respectively.

Dividend income on preferred equity securities is recorded as dividend income on an accrual basis to the extent that such amounts are payable by the portfolio company and are expected to be collected. Dividend income on common equity securities is recorded on the record date for private portfolio companies or on the ex-dividend date for publicly traded portfolio companies. For the three and nine months ended June 30, 2012, the Company recorded dividend income of zero and \$377, respectively. The Company did not earn dividend income for the three and nine months ended June 30, 2011.

Investment transactions are accounted for on a trade-date basis. Realized gains or losses on investments are measured by the difference between the net proceeds from the disposition and the cost basis of investment, without regard to unrealized gains or losses previously recognized. The Company reports current period changes in fair value of investments that are measured at fair value as a component of the net change in unrealized appreciation (depreciation) on investments in the consolidated statements of operations.

Non-accrual loans: A loan may be left on accrual status during the period the Company is pursuing repayment of the loan. Management reviews all loans that become 90 days or more past due on principal and interest, or when there is reasonable doubt that principal or interest will be collected, for possible placement on non-accrual status. When a loan is placed on non-accrual status, unpaid interest credited to income is reversed. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment. Non-accrual loans are restored to accrual status when past due principal and interest is paid and, in management's judgment, are likely to remain current. The total fair value of non-accrual loans was \$4,243 and \$2,891 as of June 30, 2012 and September 30, 2011, respectively.

Income taxes: The Company has elected to be treated as a RIC under Subchapter M of the Code and operates in a manner so as to qualify for the tax treatment applicable to RICs. In order to qualify as a RIC, among other things, the Company is required to meet certain source of income and asset diversification requirements and timely distribute to its stockholders at least 90% of investment company taxable income, as defined by the Code, for each year. The Company has made, and intends to continue to make, the requisite distributions to its stockholders, which will generally relieve the Company from U.S. federal income taxes with respect to all income distributed to its stockholders.

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

Depending on the level of taxable income earned in a tax year, the Company may choose to carry forward taxable income in excess of current year dividend distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that the Company determines that its estimated current year annual taxable income will be in excess of estimated current year dividend distributions, the Company accrues excise tax, if any, on estimated excess taxable income as taxable income is earned. For the three and nine months ended June 30, 2012 and 2011, no amount was recorded for U.S. federal excise tax.

The Company accounts for income taxes in conformity with ASC Topic 740 — *Income Taxes*. ASC Topic 740 provides guidelines for how uncertain tax positions should be recognized, measured, presented and disclosed in financial statements. ASC Topic 740 requires the evaluation of tax positions taken in the course of preparing the Company's tax returns to determine whether the tax positions are "more-likely-than-not" to be sustained by the applicable tax authority. Tax benefits of positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax expense in the current year. It is the Company's policy to recognize accrued interest and penalties related to uncertain tax benefits in income tax expense. There were no material uncertain income tax positions through June 30, 2012. The 2009, 2010 and 2011 tax years remain subject to examination by U.S. federal and most state tax authorities.

Dividends and distributions: Dividends and distributions to common stockholders are recorded on the declaration date. The amount to be paid out as a dividend or distribution is determined by the Board each quarter and is generally based upon the earnings estimated by management. Net realized capital gains, if any, are distributed at least annually, although the Company may decide to retain such capital gains for investment.

The Company has adopted a dividend reinvestment plan ("DRIP") that provides for reinvestment of any distributions the Company declares in cash on behalf of its stockholders, unless a stockholder elects to receive cash. As a result, if the Board authorizes and the Company declares a cash distribution, then stockholders who have not "opted out" of the DRIP will have their cash distribution automatically reinvested in additional shares of the Company's common stock, rather than receiving the cash dividend. The Company may use newly issued shares under the guidelines of the DRIP (if the Company's shares are trading at a premium to net asset value), or the Company may purchase shares in the open market in connection with the obligations under the plan. In particular, if the Company's shares are trading at a significant discount to net asset value and the Company is otherwise permitted under applicable law to purchase such shares, the Company intends to purchase shares in the open market in connection with any obligations under the DRIP.

On May 3, 2011, the Company's Board approved an amendment to the DRIP that, in the event the market price per share of the Company's common stock on the date of a distribution exceeds the most recently computed net asset value

per share of the common stock, the Company will issue shares of common stock to participants in the DRIP at the greater of the most recently computed net asset value per share of common stock or 95% of the current market price per share of common stock (or such lesser discount to the current market price per share that still exceeds the most recently computed net asset value per share of common stock).

Deferred financing costs: Deferred financing costs represent fees and other direct incremental costs incurred in connection with the Company's borrowings. As of June 30, 2012 and September 30, 2011, the Company had deferred financing costs of \$6,082 and \$5,345, respectively. These amounts are amortized and included in interest expense in the consolidated statements of operations over the estimated average life of the borrowings. Amortization expense for the three and nine months ended June 30, 2012 was \$375 and \$1,072, respectively. Amortization expense for the three and nine months ended June 30, 2011 was \$202 and \$564, respectively.

Deferred offering costs: Deferred offering costs consist of fees paid in relation to legal, accounting, regulatory and printing work completed in preparation of equity offerings. Deferred offering costs are charged against the proceeds from equity offerings when received. As of June 30, 2012 and September 30, 2011, deferred offering costs, which are included in other assets on the consolidated statements of financial condition, were \$53 and \$272, respectively.

Accounting for derivative instruments: The Company does not utilize hedge accounting and marks its derivatives to market through net change in unrealized appreciation (depreciation) on derivative instruments in the consolidated statements of operations. For additional information on derivative instruments, refer to Note 7.

Golub Capital BDC, Inc. and Subsidiaries

Note 3. Related Party Transactions

Investment Advisory Agreement: On April 14, 2010, GBDC entered into the Investment Advisory Agreement with the Investment Adviser, under which the Investment Adviser manages the day-to-day operations of, and provides investment advisory services to, GBDC. The Investment Advisory Agreement was subsequently amended on July 16, 2010. The Board reapproved the Investment Advisory Agreement on February 2, 2012. The Investment Adviser is a registered investment adviser with the Securities and Exchange Commission (the “SEC”). The Investment Adviser receives fees for providing services, consisting of two components, a base management fee and an Incentive Fee (as defined below).

The base management fee is calculated at an annual rate equal to 1.375% of average adjusted gross assets at the end of the two most recently completed calendar quarters (including assets purchased with borrowed funds and securitization-related assets, leverage, unrealized depreciation or appreciation on derivative instruments and cash collateral on deposit with custodian but adjusted to exclude cash and cash equivalents so that investors do not pay the base management fee on such assets) and is payable quarterly in arrears. Such amount is adjusted, based on the actual number of days elapsed relative to the total number of days in such calendar quarter, for any share issuances or repurchases during such calendar quarter. For purposes of the Investment Advisory Agreement, cash equivalents means U.S. government securities and commercial paper instruments maturing within 270 days of purchase (which is different than the GAAP definition, which defines cash equivalents as U.S. government securities and commercial paper instruments maturing within 90 days of purchase). To the extent that the Investment Adviser or any of its affiliates provides investment advisory, collateral management or other similar services to a subsidiary of the Company, the base management fee will be reduced by an amount equal to the product of (1) the total fees paid to the Investment Adviser by such subsidiary for such services and (2) the percentage of such subsidiary’s total equity, including membership interests and any class of notes not exclusively held by one or more third parties, that is owned, directly or indirectly, by the Company.

The Company has structured the calculation of the Incentive Fee to include a fee limitation such that an Incentive Fee for any quarter can only be paid to the Investment Adviser if, after such payment, the cumulative Incentive Fees paid to the Investment Adviser since the effective date of the Company’s election to become a BDC would be less than or equal to 20.0% of the Company’s Cumulative Pre-Incentive Fee Net Income (as defined below).

The Company accomplishes this limitation by subjecting each quarterly Incentive Fee payable on the “Income and Capital Gain Incentive Fee Calculation” (as defined below) to the Incentive Fee Cap (as defined below). The Incentive Fee Cap in any quarter is the difference between (a) 20.0% of Cumulative Pre-Incentive Fee Net Income and (b)

cumulative Incentive Fees of any kind paid to the Investment Adviser by GBDC since the effective date of its election to become a BDC. To the extent the Incentive Fee Cap is zero or a negative value in any quarter, no Incentive Fee would be payable in that quarter. “Cumulative Pre-Incentive Fee Net Income” is equal to the sum of (a) Pre-Incentive Fee Net Investment Income for each period since the effective date of the Company’s election to become a BDC and (b) cumulative aggregate realized capital gains, cumulative aggregate realized capital losses, cumulative aggregate unrealized capital depreciation and cumulative aggregate unrealized capital appreciation since the effective date of the Company’s election to become a BDC.

“Pre-Incentive Fee Net Investment Income” means interest income, dividend income and any other income (including any other fees such as commitment, origination, structuring, diligence and consulting fees or other fees that the Company receives from portfolio companies but excluding fees for providing managerial assistance) accrued during the calendar quarter, minus operating expenses for the calendar quarter (including the base management fee, taxes, any expenses payable under the Investment Advisory Agreement and an administration agreement (the “Administration Agreement”) with GC Service Company, LLC (the “Administrator”), any expenses of securitizations and any interest expense and dividends paid on any outstanding preferred stock, but excluding the Incentive Fee). Pre-Incentive Fee Net Investment Income includes, in the case of investments with a deferred interest feature such as market discount, debt instruments with PIK interest, preferred stock with PIK dividends and zero coupon securities, accrued income that the Company has not yet received in cash.

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

Incentive Fees are calculated and payable quarterly in arrears (or, upon termination of the Investment Advisory Agreement, as of the termination date) (each, a “Performance Period”). The Investment Adviser is not under any obligation to reimburse the Company for any part of the Incentive Fee it received that was based on accrued income that is never actually received.

The income and capital gains incentive fee calculation (the “Income and Capital Gain Incentive Fee Calculation”) has two parts, the income component (the “Income Incentive Fee”) and the capital gains component (the “Capital Gain Incentive Fee” and, together with the Income Incentive Fee, the “Incentive Fee”). The Income Incentive Fee is calculated quarterly in arrears based on the Company’s Pre-Incentive Fee Net Investment Income for the immediately preceding calendar quarter. As described in Note 7 - Derivative Instruments, in June 2011, the Company entered into the TRS with Citibank, N.A. (“Citibank”) for the purpose of gaining economic exposure to a portfolio of broadly syndicated loans. The TRS was subsequently terminated on April 11, 2012. For purposes of the computation of the Incentive Fee, the Company:

- treated the interest spread, which represents the difference between the interest and fees received on the reference assets underlying the TRS and the interest paid to Citibank on the settled notional value of the TRS, as part of the Income Incentive Fee; and
- treated the realized gains and losses on the sale or maturity of reference assets underlying the TRS and futures contracts as part of the Capital Gain Incentive Fee.

For the periods ending September 30, 2011 and prior, the Company had included interest spread payments from the TRS in the Capital Gain Incentive Fee as this is consistent with GAAP, which records such payments in net realized gains/(losses) on derivative instruments in the consolidated statement of operations. However, the Company changed its methodology in the first quarter of fiscal year 2012 pursuant to discussions with the staff of the SEC, resulting in the TRS interest spread payments being included in the Income Incentive Fee.

For the three and nine months ended June 30, 2012, the Company received interest spread payments of \$990 and \$2,560, respectively. For the three months ended December 31, 2011, including the interest spread payments from the TRS in the Income Incentive Fee caused an increase in the Incentive Fee by \$647 as the Company was in the “catch-up” provision as described below. Upon reviewing the Income and Capital Gain Incentive Fee Calculation and the treatment of the interest spread payments from the TRS, the Investment Adviser irrevocably waived the incremental portion of the Incentive Fee attributable from the TRS interest spread payments for the three months ended December 31, 2011. For the three months ended June 30, 2012, the Income Incentive Fee was \$1,917. For the nine months ended June 30, 2012, after taking into account the waiver by the Investment Adviser, the Income Incentive Fee was \$4,261, rather than \$4,908. The Income Incentive Fee for the three and nine months ended June 30, 2011 was zero and \$348,

respectively.

Pre-Incentive Fee Net Investment Income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Because of the structure of the Income Incentive Fee, it is possible that an Incentive Fee may be calculated under this formula with respect to a period in which the Company has incurred a loss. For example, if the Company receives Pre-Incentive Fee Net Investment Income in excess of the hurdle rate (as defined below) for a calendar quarter, the Income Incentive Fee will result in a positive value and an Incentive Fee will be paid unless the payment of such Incentive Fee would cause the Company to pay Incentive Fees on a cumulative basis that exceed 20.0% of Cumulative Pre-Incentive Fee Net Investment Income. Pre-Incentive Fee Net Investment Income, expressed as a rate of return on the value of the Company's net assets (defined as total assets less indebtedness and before taking into account any Incentive Fees payable during the period) at the end of the immediately preceding calendar quarter, is compared to a fixed "hurdle rate" of 2.0% quarterly. If market interest rates rise, the Company may be able to invest funds in debt instruments that provide for a higher return, which would increase Pre-Incentive Fee Net Investment Income and make it easier for the Investment Adviser to surpass the fixed hurdle rate and receive an Incentive Fee based on such net investment income. The Company's Pre-Incentive Fee Net Investment Income used to calculate this part of the Incentive Fee is also included in the amount of its total assets (other than cash and cash equivalents but including assets purchased with borrowed funds and securitization-related assets) used to calculate the 1.375% base management fee annual rate.

The Company calculates the Income Incentive Fee with respect to its Pre-Incentive Fee Net Investment Income quarterly, in arrears, as follows:

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

·Zero in any calendar quarter in which the Pre-Incentive Fee Net Investment Income does not exceed the hurdle rate; 100% of the Company's Pre-Incentive Fee Net Investment Income with respect to that portion of such Pre-Incentive Fee Net Investment Income, if any, that exceeds the hurdle rate but is less than 2.5% in any calendar quarter. This portion of the Company's Pre-Incentive Fee Net Investment Income (which exceeds the hurdle rate but is less than 2.5%) is referred to as the "catch-up" provision. The catch-up is meant to provide the Investment Adviser with 20.0% of the Pre-Incentive Fee Net Investment Income as if a hurdle rate did not apply if this net investment income exceeds 2.5% in any calendar quarter; and 20.0% of the amount of the Company's Pre-Incentive Fee Net Investment Income, if any, that exceeds 2.5% in any calendar quarter.

The sum of these calculations yields the Income Incentive Fee. This amount is appropriately adjusted for any share issuances or repurchases during the quarter.

The Capital Gain Incentive Fee equals (a) 20.0% of the Company's Capital Gain Incentive Fee Base (as defined below), if any, calculated in arrears as of the end of each calendar year (or upon termination of the Investment Advisory Agreement, as of the termination date), which commenced with the calendar year ending December 31, 2010, less (b) the aggregate amount of any previously paid Capital Gain Incentive Fees. The Company's "Capital Gain Incentive Fee Base" equals the sum of (1) realized capital gains, if any, on a cumulative positive basis from the date the Company elected to become a BDC through the end of each calendar year, (2) all realized capital losses on a cumulative basis and (3) all unrealized capital depreciation on a cumulative basis.

The cumulative aggregate realized capital losses are calculated as the sum of the amounts by which (a) the net sales price of each investment in the Company's portfolio when sold is less than (b) the accreted or amortized cost base of such investment.

The cumulative aggregate realized capital gains are calculated as the sum of the differences, if positive, between (a) the net sales price of each investment in the Company's portfolio when sold and (b) the accreted or amortized cost basis of such investment.

The aggregate unrealized capital depreciation is calculated as the sum of the differences, if negative, between (a) the valuation of each investment in the Company's portfolio as of the applicable Capital Gain Incentive Fee calculation date and (b) the accreted or amortized cost basis of such investment.

The Company accrues the Capital Gain Incentive Fee if, on a cumulative basis, the sum of net realized gains/(losses) plus net unrealized appreciation/(depreciation) is positive. The Capital Gain Incentive Fee is calculated on a cumulative basis from the date the Company elected to become a BDC through the end of each calendar year. For the three and nine months ended June 30, 2012, the Capital Gain Incentive Fee was zero. For the three and nine months ended June 30, 2011, the Company accrued a Capital Gain Incentive Fee of \$113 and \$177, respectively.

As described above, the Incentive Fee will not be paid at any time if, after such payment, the cumulative Incentive Fees paid to date would be greater than 20.0% of the Company's Cumulative Pre-Incentive Fee Net Investment Income since the effective date of the Company's election to be treated as a BDC. Such amount, less any Incentive Fees previously paid, is referred to as the "Incentive Fee Cap." If, for any relevant period, the Incentive Fee Cap calculation results in the Company paying less than the amount of the Incentive Fee calculated above, then the difference between the Incentive Fee and the Incentive Fee Cap will not be paid by GBDC and will not be received by the Investment Adviser as an Incentive Fee either at the end of such relevant period or at the end of any future period.

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

Administration Agreement: GBDC has also entered into the Administration Agreement. Under the Administration Agreement, the Administrator furnishes GBDC with office facilities and equipment, provides GBDC with clerical, bookkeeping and record keeping services at such facilities and provides GBDC with other administrative services as the Administrator, subject to review by the Board, determines necessary to conduct GBDC's day-to-day operations. GBDC reimburses the Administrator the allocable portion (subject to the review and approval of the Board) of overhead and other expenses incurred by it in performing its obligations under the Administration Agreement, including rent, fees and expenses associated with performing compliance functions and GBDC's allocable portion of the cost of its chief financial officer and chief compliance officer and their respective staffs. As permitted by the Administration Agreement, beginning January 1, 2012, the Administrator began charging the allocable portion of the cost of the Company's chief compliance officer and chief financial officer and their respective staffs to the Company. The Board reviews such expenses to determine that these expenses are reasonable and comparable to administrative services charged by unaffiliated third party asset managers. Under the Administration Agreement, the Administrator also provides on the Company's behalf significant managerial assistance to those portfolio companies to which GBDC is required to provide such assistance and will be paid an additional amount based on the services provided, not to exceed the amount GBDC receives from such portfolio companies.

Included in accounts payable and accrued expenses is \$489 and \$226 as of June 30, 2012 and September 30, 2011, respectively, for accrued allocated shared services under the Administration Agreement. The administrative service fee expense under the Administration Agreement for the three and nine months ended June 30, 2012 was \$489 and \$1,207, respectively. The administrative service fee expense under the Administration Agreement for the three and nine months ended June 30, 2011 was \$224 and \$611, respectively.

Other related party transactions: The Investment Manager pays for certain unaffiliated third-party expenses incurred by the Company. Such expenses include postage, printing, office supplies and rating agency fees. These expenses are not marked-up and represent the same amount the Company would have paid had the Company paid the expenses directly. These expenses are subsequently reimbursed in cash.

Total expenses reimbursed to the Investment Manager during the three and nine months ended June 30, 2012 were \$90 and \$289, respectively. Total expenses reimbursed to the Investment Manager during the three and nine months ended June 30, 2011 were \$68 and \$266, respectively.

As of June 30, 2012 and September 30, 2011, included in accounts payable and accrued expenses were \$47 and \$65, respectively, for accrued expenses paid on behalf of the Company by the Investment Manager.

Note 5. Fair Value Measurements

The Company follows ASC Topic 820 for measuring fair value. Fair value is the price that would be received in the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where available, fair value is based on observable market prices or parameters, or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models are applied. These valuation models involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the assets or liabilities or market and the assets' or liabilities' complexity. The Company's fair value analysis includes an analysis of the value of any unfunded loan commitments. Assets and liabilities are categorized for disclosure purposes based upon the level of judgment associated with the inputs used to measure their value. The valuation hierarchical levels are based upon the transparency of the inputs to the valuation of the asset or liability as of the measurement date. The three levels are defined as follows:

Level 1: Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2: Inputs include quoted prices for similar assets or liabilities in active markets and inputs that are observable for the assets or liabilities, either directly or indirectly, for substantially the full term of the assets or liabilities.

Level 3: Inputs include significant unobservable inputs for the assets or liabilities and include situations where there is little, if any, market activity for the assets or liabilities. The inputs into the determination of fair value are based upon the best information available and may require significant management judgment or estimation.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an asset's or a liability's categorization within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the asset or liability. The Company assesses the levels of investments at each measurement date, and transfers between levels are recognized on the actual date of the event or change in circumstances that caused the transfers. There were no transfers among level 1, 2 and 3 investments during the nine months ended June 30, 2012 and 2011. The following section describes the valuation techniques used by the Company to measure different assets and liabilities at fair value and includes the level within the fair value hierarchy in which the assets and liabilities are categorized.

Cash and cash equivalents held at large financial institutions and futures contracts that are valued based on quoted market prices in active markets are categorized in Level 1 of the fair value hierarchy. All other assets and liabilities as of June 30, 2012 and September 30, 2011 were valued using Level 3 inputs of the fair value hierarchy. Level 1 assets

and liabilities are valued using quoted market prices. Level 2 assets and liabilities are valued using market consensus prices that are corroborated by observable market data and quoted market prices for similar assets and liabilities. Level 3 assets and liabilities are valued at fair value as determined in good faith by the Board, based on input of management, the audit committee and independent valuation firms that have been engaged at the direction of the Board to assist in the valuation of each portfolio investment without a readily available market quotation at least once during a trailing twelve-month period under a valuation policy and a consistently applied valuation process. This valuation process is conducted at the end of each fiscal quarter, with approximately 25% (based on fair value) of the Company's valuation of debt and equity securities without readily available market quotations subject to review by an independent valuation firm.

When valuing Level 3 debt and equity investments, the Company may take into account the following factors, where relevant, in determining the fair value of the investments: the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flows, the markets in which the portfolio company does business, comparisons to publicly traded securities, changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made and other relevant factors. In addition, for certain debt and equity investments, the Company may base its valuation on indicative bid and ask prices provided by an independent third party pricing service. Bid prices reflect the highest price that the Company and others may be willing to pay. Ask prices represent the lowest price that the Company and others may be willing to accept for an investment. The Company generally uses the midpoint of the bid/ask range as its best estimate of fair value of such investment.

Golub Capital BDC, Inc. and Subsidiaries
Notes to Unaudited Consolidated Financial Statements
(In thousands, except shares and per share data)

On April 11, 2012, the Company terminated its TRS with Citibank. As of June 30, 2012, the Company had a receivable of \$74 for accrued interest from the TRS, which will be paid in September 2012. As of September 30, 2011, the TRS had a value of \$(141). The referenced portfolio of loans of the TRS were valued by Citibank. Citibank based its valuation on the indicative bid prices provided by an independent third party pricing service. Bid prices reflect the highest price that market participants may be willing to pay. These valuations were sent to the Company and its Board for review and testing. The Board reviewed and approved the value of the TRS, as well as the value of the loans underlying the TRS, on a quarterly basis as part of its quarterly determination of net asset value. For additional disclosures on the Company's TRS, refer to Note 7 — Derivative Instruments.

Fair value of the Company's debt is estimated by discounting remaining payments using applicable market rates or market quotes for similar instruments at the measurement date, if available.

ASC Topic 820 requires disclosure of the fair value of financial instruments for which it is practical to estimate such value. As a result, with the exception of the line item titled "debt" which is reported at cost, all assets and liabilities approximate fair value on the consolidated statements of financial condition due to their short maturity.

Due to the inherent uncertainty of determining the fair value of Level 3 assets and liabilities that do not have a readily available market value, the fair value of the assets and liabilities may differ significantly from the values that would have been used had a ready market existed for such assets and liabilities and may differ materially from the values that may ultimately be received or settled. Further, such assets and liabilities are generally subject to legal and other restrictions or otherwise are less liquid than publicly traded instruments. If the Company were required to liquidate a portfolio investment in a forced or liquidation sale, the Company may realize significantly less than the value at which such investment had previously been recorded.

The Company's investments, borrowings and derivatives are subject to market risk. Market risk is the potential for changes in the value due to market changes. Market risk is directly impacted by the volatility and liquidity in the markets in which the investments, borrowings and derivatives are traded.

Proceeds from principal payments and sales of portfolio investments	(120,536)	(66)	-	(120,602)
Proceeds from derivative instruments ⁽¹⁾	-	-	(3,779) (3,779)
Amortization of discount and premium	3,447	-	-	3,447
Fair value, end of period	\$618,640	\$ 17,992	\$ 74	\$636,706

⁽¹⁾ Refer to Note 7 for additional disclosures.

The following table presents quantitative information about the significant unobservable inputs of the Company's level 3 investments as of June 30, 2012. The below table is not intended to be all-inclusive, but rather to provide information on significant unobservable inputs and valuation techniques used by the Company.

Quantitative information about Level 3 Fair Value Measurements

	Fair value at June 30, 2012	Valuation Techniques	Unobservable Input	Range (Weighted Average)
Senior secured loans ⁽¹⁾⁽²⁾	\$ 195,258	Market comparable companies Market rate	EBITDA multiples market interest rate	5.0 - 13.5 (6.2) 2.7% - 16.0% (5.7%)

One stop loans	\$ 236,827	approach Market comparable companies Market rate approach	EBITDA multiples market interest rate	4.7 - 13.0 (8.3) 5.2% - 14.5% (8.9%)
Subordinated and second lien loans ⁽³⁾⁽⁴⁾	\$ 109,639	approach Market comparable companies Market rate approach	EBITDA multiples market interest rate	6.5 - 11.0 (7.5) 8.0% - 21.0% (11.6%)
Equity securities	\$ 17,992	Market comparable companies	EBITDA multiples	5.5 - 13.0 (8.7)

⁽¹⁾ Excludes \$60,685 of loans at fair value, which the Company values using indicative bid and ask prices provided by an independent third party pricing service.

⁽²⁾ Excludes \$2,808 of non-accrual loans at fair value. These loans were valued on a liquidation basis.

⁽³⁾ Excludes \$11,988 of loans at fair value, which the Company values using indicative bid and ask prices provided by an independent third party pricing service.

⁽⁴⁾ Excludes \$1,435 of non-accrual loans at fair value. These loans were valued on a liquidation basis.

The significant unobservable inputs used in the fair value measurement of the Company's debt and equity securities are earnings before interest, taxes, depreciation and amortization ("EBITDA") multiples and market interest rates. The Company uses EBITDA multiples on its loans and equity securities to determine any credit gains or losses. Significant increases or decreases in either of these inputs in isolation would result in a significantly lower or higher fair value measurement. The Company uses market interest rates for loans to determine if the effective yield on a loan is commensurate with the market yields for that type of loan. If a loan's effective yield is significantly less than the market yield for a similar loan with a similar credit profile, then the resulting fair value of the loan may be lower.

Golub Capital BDC, Inc. and Subsidiaries

Notes to Unaudited Consolidated Financial Statements

(In thousands, except shares and per share data)

The following are the carrying values and fair values of the Company's debt liabilities as of June 30, 2012 and September 30, 2011.

As of June 30, 2012		As of September 30, 2011	
Carrying Value	Fair Value	Carrying Value	Fair Value
Debt \$329,800	\$ 333,194	\$237,683	\$ 240,373

Note 6. Borrowings

In accordance with the 1940 Act, with certain limited exceptions, the Company is only allowed to borrow amounts such that its asset coverage, as defined in the 1940 Act, is at least 200% after such borrowing. On September 13, 2011, the Company received exemptive relief from the SEC allowing it to modify the asset coverage requirement to exclude the SBA debentures from this calculation. As such, the Company's ratio of total consolidated assets to outstanding indebtedness may be less than 200%. This provides the Company with increased investment flexibility but also increases its risks related to leverage. As of June 30, 2012, the Company's asset coverage for borrowed amounts was 282.1%.

Debt Securitization: On July 16, 2010, the Company completed a \$300,000 term debt securitization ("Debt Securitization"). The notes ("Notes") offered in the Debt Securitization were issued by Golub Capital BDC 2010-1 LLC (the "Issuer"), a subsidiary of Golub Capital BDC 2010-1 Holdings LLC ("Holdings"), a direct subsidiary of the Company, and the Class A Notes and Class B Notes are secured by the assets held by the Issuer. The Debt Securitization was executed through a private placement of \$174,000 of Aaa/AAA Class A Notes of the Issuer which bear interest at three-month LIBOR plus 2.40%. The \$10,000 face amount of Class B Notes bears interest at a rate of three-month LIBOR plus 2.40%, and the \$116,000 face amount of Subordinated Notes does not bear interest. The

Class A Notes are included in the June 30, 2012 and September 30, 2011 consolidated statements of financial condition. In partial consideration for the loans transferred to the Issuer as part of the Debt Securitization, Holdings retained all of the Class B and Subordinated Notes totaling \$10,000 and \$116,000, respectively, and all of the membership interests in the Issuer, which Holdings initially purchased for two hundred and fifty dollars.

During a period of up to three years from the closing date (which may be extended for two additional years, upon satisfaction of certain conditions), all principal collections received on the underlying collateral may be used by the Issuer to purchase new collateral under the direction of the Investment Adviser in its capacity as collateral manager of the Issuer and in accordance with the Company's investment strategy, allowing the Company to maintain the initial leverage in the Debt Securitization for such three-year period. The Notes are scheduled to mature on July 20, 2021.

The proceeds of the private placement of the Notes, net of expenses, were used to repay and terminate the Company's prior credit facility, which was a \$300,000 credit facility entered into on July 27, 2007. As part of the Debt Securitization, the Company entered into a master loan sale agreement with Holdings and the Issuer under which the Company agreed to sell or contribute certain senior secured and second lien loans (or participation interests therein) to Holdings, and Holdings agreed to sell or contribute such loans (or participation interests therein) to the Issuer and to purchase or otherwise acquire subordinated notes issued by the Issuer. The Notes are the secured obligations of the Issuer, and an indenture governing the Notes includes customary covenants and events of default.

The Investment Adviser serves as collateral manager to the Issuer under a collateral management agreement and receives a fee for providing these services. As a result, the Company has amended and restated its Investment Advisory Agreement to provide that the base management fee payable under such agreement is reduced by an amount equal to the total fees that are paid to the Investment Adviser by the Issuer for rendering such collateral management services.

As of June 30, 2012 and September 30, 2011, there were 81 and 79 portfolio companies with a total fair value of \$286,055 and \$284,288, respectively, securing the Notes. The pool of loans in the Debt Securitization must meet certain requirements, including asset mix and concentration, collateral coverage, term, agency rating, minimum coupon, minimum spread and sector diversity requirements.

Golub Capital BDC, Inc. and Subsidiaries**Notes to Unaudited Consolidated Financial Statements**

(In thousands, except shares and per share data)

The interest charged under the Debt Securitization is based on three-month LIBOR, which as of June 30, 2012 was 0.5%. For the three and nine months ended June 30, 2012, the effective annualized average interest rate, which includes amortization of debt issuance costs on the Debt Securitization, was 3.3% and 3.3%, respectively. For the three and nine months ended June 30, 2012, interest expense was \$1,269 and \$3,792, respectively. Cash paid for interest during the three and nine months ended June 30, 2012 was \$1,303 and \$3,730, respectively. For the three and nine months ended June 30, 2011, the effective annualized average interest rate, which includes amortization of debt issuance costs on the Debt Securitization, was 3.1% and 3.3%, respectively. For the three and nine months ended June 30, 2011, interest expense was \$1,179 and \$3,789, respectively. Cash paid for interest during the three and nine months ended June 30, 2011 was \$1,176 and \$4,025, respectively.

The classes, amounts, ratings and interest rates (expressed as a spread to LIBOR) of the Class A Notes are as follows:

Description	Class A Notes
Type	Senior Secured Floating Rate
Amount Outstanding	\$174,000
Moody's Rating	"Aaa"
S&P Rating	"AAA"
Interest Rate	LIBOR + 2.40%
Stated Maturity	July 20, 2021

SBA Debentures: On August 24, 2010, GC SBIC IV, L.P., a wholly owned subsidiary of the Company, received approval for a license from the SBA to operate as an SBIC. As an SBIC, GC SBIC IV, L.P. is subject to a variety of regulations and oversight by the SBA concerning the size and nature of the companies in which it may invest as well as the structures of those investments.

The license allows GC SBIC IV, L.P. to obtain leverage by issuing SBA-guaranteed debentures, subject to issuance of a capital commitment by the SBA and customary procedures. These debentures are non-recourse to the Company, have interest payable semiannually and a ten-year maturity. The interest rate is fixed at the time of issuance at a market-driven spread over U.S. Treasury Notes with ten-year maturities.

Under present SBIC regulations, the maximum amount of SBA-guaranteed debentures that may be issued by multiple licensees under common management is \$225,000. An affiliate of the Investment Adviser manages another SBIC. As such, it is possible that GC SBIC IV, L.P. will be constrained in its ability to issue SBA-guaranteed debentures in the future if the other affiliated SBIC has already issued such debentures. As of June 30, 2012, the affiliated SBIC licensee had \$90,720 of SBA-guaranteed debentures outstanding, while GC SBIC IV, L.P. had \$123,500 of outstanding SBA-guaranteed debentures. This leaves incremental borrowing capacity of a maximum of \$10,780 of SBA-guaranteed debentures for GC SBIC IV, L.P. and the affiliated SBIC licensee. As of September 30, 2011, GC SBIC IV, L.P. had \$61,300 of outstanding SBA-guaranteed debentures. On August 24, 2010, the date GC SBIC IV, L.P. received its license from the SBA, the SBA restricted the affiliated SBIC licensee from making certain new investments without approval from the SBA. The affiliated SBIC licensee is limited to only making add-on investments in existing portfolio companies. As such, the majority of the incremental borrowing capacity is available for GC SBIC IV, L.P. The borrowing capacity of GC SBIC IV, L.P. could be expanded further if the affiliated SBIC retires its SBA-guaranteed debentures.

GC SBIC IV, L.P. may borrow up to two times the amount of its regulatory capital, subject to customary regulatory requirements including an examination by the SBA. As of June 30, 2012, the Company had committed and funded \$75,000 to GC SBIC IV, L.P. and had SBA-guaranteed debentures of \$123,500 outstanding which mature between March 2021 and March 2022. The interest rate on \$100,000 of outstanding debentures was fixed at an average annualized interest rate of 3.5%. The annualized interim financing rate on the remaining \$23,500 of outstanding debentures was 1.8%. For the three and nine months ended June 30, 2012, the effective annualized average interest rate, which includes amortization of fees paid on the debentures, was 3.6% and 3.4%, respectively. For the three and nine months ended June 30, 2012, interest expense was \$989 and \$2,319, respectively. Cash paid for interest during the three and nine months ended June 30, 2012 was zero and \$1,210, respectively. For the three and nine months ended June 30, 2011, the effective annualized average interest rate, which includes amortization of fees paid on the debentures, was 3.7% and 2.9%, respectively. For the three and nine months ended June 30, 2011, interest expense was \$256 and \$328, respectively. Cash paid for interest during the three and nine months ended June 30, 2011 was \$zero and \$64, respectively.

Golub Capital BDC, Inc. and Subsidiaries

Notes to Unaudited Consolidated Financial Statements

(In thousands, except shares and per share data)

Revolving Credit Facility: On July 21, 2011, Golub Capital BDC Funding LLC (“Funding”), a wholly owned subsidiary of the Company, entered into a \$75,000 senior secured revolving credit facility (“Credit Facility”) with Wells Fargo Securities, LLC, as administrative agent, and Wells Fargo Bank, N.A., as lender.

Under the Credit Facility, which matures on October 21, 2015, the lender has agreed to extend credit to Funding in an aggregate principal amount of \$75,000. Funding’s ability to draw under the Credit Facility is scheduled to terminate on October 20, 2012. The period from the closing date until October 20, 2012 is referred to as the reinvestment period. All amounts outstanding under the Credit Facility are required to be repaid by October 21, 2015. Through the reinvestment period, the Credit Facility bears interest at one-month LIBOR plus 2.25% per annum. After the reinvestment period, the rate will reset to LIBOR plus 2.75% per annum for the remaining term of the Credit Facility. In addition to the stated interest expense on the Credit Facility, the Company is required to pay a fee of 0.50% per annum on any unused portion of the Credit Facility up to \$30,000 and 2.00% on any unused portion in excess of \$30,000. The Credit Facility is secured by all of the assets held by Funding, and the Company has pledged its interests in Funding as collateral to Wells Fargo Bank, N.A., as the collateral agent, under an ancillary agreement to secure the obligations of the Company as the transferor and servicer under the Credit Facility. Both the Company and Funding have made customary representations and warranties and are required to comply with various covenants, reporting requirements and other customary requirements for similar credit facilities. Borrowing under the Credit Facility is subject to the leverage restrictions contained in the 1940 Act.

The Company plans to transfer certain loans and debt securities it has originated or acquired from time to time to Funding through a purchase and sale agreement and may cause Funding to originate or acquire loans in the future, consistent with the Company’s investment objectives.

As of June 30, 2012 and September 30, 2011, the Company had outstanding debt under the Credit Facility of \$32,300 and \$2,383, respectively. For the three and nine months ended June 30, 2012, the Company had borrowings on the Credit Facility of \$22,900 and \$92,617, respectively, and repayments on the Credit Facility of \$24,800 and \$62,700, respectively. For the three and nine months ended June 30, 2012, the effective annualized average interest rate on outstanding borrowings, which includes amortization of debt financing costs, was 2.9% and 3.0%, respectively. For the three and nine months ended June 30, 2012, interest expense was \$232 and \$629, respectively. Cash paid for interest during the three and nine months ended June 30, 2012 was \$228 and \$597, respectively.

The average total debt outstanding (including the debt under the Debt Securitization, SBA debentures and Credit Facility) for the three and nine months ended June 30, 2012 was \$317,666 and \$297,322, respectively. The average total debt outstanding (including the debt under the Debt Securitization, SBA debentures and Credit Facility) for the three and nine months ended June 30, 2011 was \$206,471 and \$193,250, respectively.

For the three and nine months ended June 30, 2012, the effective annualized average interest rate on the Company's total debt outstanding was 3.6% and 3.5%, respectively. For the three and nine months ended June 30, 2011, the effective annualized average interest rate on the Company's total debt outstanding was 3.2% and 3.2%, respectively.

Golub Capital BDC, Inc. and Subsidiaries**Notes to Unaudited Consolidated Financial Statements**

(In thousands, except shares and per share data)

A summary of the Company's maturity requirements for borrowings as of June 30, 2012 is as follows:

		Payments Due by Period			
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Debt Securitization	\$ 174,000	\$ -	\$ -	\$ -	\$ 174,000
SBA debentures	123,500	-	-	-	123,500
Credit Facility	32,300	-	-	32,300	-
Total borrowings	\$ 329,800	\$ -	\$ -	\$ 32,300	\$ 297,500

Note 7. Derivative Instruments

The following table summarizes the fair value and location of the Company's derivative instruments on the consolidated statements of financial condition:

	Location	June 30, 2012 Fair Value	September 30, 2011 Fair Value
Futures Contracts	Unrealized appreciation (depreciation) on derivative instruments	\$ 75	\$ (141)
TRS	Unrealized appreciation (depreciation) on derivative instruments	74	(1,845)
Total		\$ 149	\$ (1,986)

Edgar Filing: Golub Capital BDC, Inc. - Form 10-Q

The TRS was terminated on April 11, 2012. The balance of \$74 as of June 30, 2012 represents unpaid accrued interest owed to the Company, which will be paid in September 2012.

Realized and unrealized gains and losses on derivative instruments recorded by the Company for the three and nine months ended June 30, 2012 are in the following location on the consolidated statements of operations:

		Three months ended June 30, 2012	Nine months ended June 30, 2012		Three months ended June 30, 2012	Nine months ended June 30, 2012
	Location	Realized Gain (Loss)		Location	Unrealized Gain (Loss)	
Futures Contracts	Net realized gain (loss) on derivative instruments	\$ (960)	\$ (1,563)	Net change in unrealized (depreciation) appreciation on derivative instruments	\$ (243)	\$ 217
TRS	Net realized gain (loss) on derivative instruments	2,188	3,779	Net change in unrealized (depreciation) appreciation on derivative instruments	(1,405)	1,919
		\$ 1,228	\$ 2,216		\$ (1,648)	\$ 2,136

There were no realized gains or losses on derivative instruments for the three and nine months ended June 30, 2011. Unrealized gains and losses on derivative instruments recorded by the Company for the three and nine months ended June 30, 2011 are in the following location on the consolidated statements of operations:

		Three months ended June 30, 2011	Nine months ended June 30, 2011
	Location	Unrealized Gain (Loss)	
TRS	Net change in unrealized (depreciation) appreciation on derivative instruments	(262)	(262)
		\$ (262)	\$ (262)

Golub Capital BDC, Inc. and Subsidiaries

Notes to Unaudited Consolidated Financial Statements

(In thousands, except shares and per share data)

Futures contracts: The Company has entered into ten-year U.S. Treasury futures contracts to mitigate its exposure to adverse fluctuation in interest rates related to the Company's SBA debentures with a total notional amount of \$24,300 as June 30, 2012. The interest rate on the Company's SBA debentures is fixed semi-annually (each, a "pooling date") and is based on the ten-year U.S. Treasury rate plus a market spread. The futures contracts insulate the Company against adverse changes in the ten-year U.S. Treasury rate for SBA debentures that the Company has drawn but for which the rate will not be fixed until the next pooling date. As of June 30, 2012, the Company's cash collateral balance at the broker was \$1,287, which is included in cash collateral on deposit with custodian on the consolidated statements of financial condition.

Based on the daily fluctuation of the fair value of the futures contracts, the Company records an unrealized gain or loss equal to the daily fluctuation in fair value. If market conditions move unexpectedly, the Company may not achieve the anticipated benefits of the futures contracts and may realize a loss. Upon maturity or settlement of the futures contracts, the Company will realize a gain or loss based on the difference of the fair value of the futures contracts at inception and the fair value of the futures contracts at settlement or maturity. This gain or loss is included on the consolidated statements of operations as net realized gain (loss) on derivative instruments.

For the three and nine months ended June 30, 2012, the realized loss on settlement of futures contracts was \$(960) and \$(1,563), respectively, and the change in unrealized (depreciation) appreciation related to the futures contracts was \$(243) and \$217, respectively. As of June 30, 2012 and September 30, 2011, the fair value of the futures contracts was \$75 and \$(141), respectively. The futures contracts mature in September 2012. The total volume of futures contracts that the Company entered into for the three and nine months ended June 30, 2012 was two hundred forty-three and seven hundred forty-three, respectively.

Total return swap termination: On April 11, 2012, GCMF terminated the TRS that it had entered into with Citibank.

GCMF entered into the TRS to gain economic exposure to a portfolio of broadly syndicated loans. Generally, under the terms of a total return swap, one party agrees to make periodic payments to another party based on the change in the market value of the assets referenced by the total return swap, which may include a specified security, basket of securities or securities indices during the specified period, in return for periodic payments based on a fixed or variable

interest rate. A total return swap is typically used to obtain exposure to a security or market without owning or taking physical custody of such security or investing directly in such market.

The Company received from Citibank all interest and fees payable in respect of the loans included in the portfolio. The Company paid to Citibank interest at a rate equal to three-month LIBOR plus 1.2% per annum based on the settled notional value of the TRS. Upon termination of the TRS, the Company received from Citibank the net appreciation in the value of the referenced loans. On a quarterly basis, net payment between the Company and Citibank for interest and realized appreciation and depreciation on the portfolio of loans occurs.

The Company acted as the manager of the rights and obligations of GCMF under the TRS.

For GAAP purposes, realized gains and losses on the TRS are composed of any gains or losses on the referenced portfolio of loans as well as the net interest received or owed at the time of the quarterly settlement. For GAAP purposes, unrealized gains and losses on the TRS are composed of the net interest income earned or interest expense owed during the period that was not previously settled as well as the change in fair value of the referenced portfolio of loans.

As of June 30, 2012, the fair value of the TRS was \$74, comprised of unpaid accrued interest still owed to the Company under the terms of the TRS. As of September 30, 2011, the fair value of the TRS was \$(1,845), comprised of spread interest income of \$591 and an unrealized loss on the referenced loans of \$(2,436). The change in the fair value of the TRS was \$(1,405) and \$1,919 for the three and nine months ended June 30, 2012, respectively. The change in the fair value of the TRS was \$(262) and \$(262) for the three and nine months ended June 30, 2011, respectively. Realized gains on the TRS for the three months ended June 30, 2012 were \$2,188, which consisted of spread interest income of \$990 and a realized gain of \$1,198 on the sale of the referenced loans. Realized gains on the TRS for the nine months ended June 30, 2012 were \$3,779, which consisted of spread interest income of \$2,560 and a realized gain of \$1,219 on the sale of the referenced loans. There were no realized gains or losses on the TRS for the three and nine months ended June 30, 2011.

Upon termination, cash collateral of \$19,912 that had secured the obligations to Citibank under the TRS was returned to the Company and is being used to fund new middle-market debt and equity investments.

Golub Capital BDC, Inc. and Subsidiaries

Notes to Unaudited Consolidated Financial Statements

(In thousands, except shares and per share data)

Note 8. Commitments and Contingencies

Commitments: The Company had outstanding commitments to fund investments totaling \$52,034 and \$49,449 under various undrawn revolvers and other credit facilities as of June 30, 2012 and September 30, 2011, respectively.

Indemnifications: In the normal course of business, the Company enters into contracts and agreements that contain a variety of representations and warranties that provide general indemnifications. The Company's maximum exposure under these arrangements is unknown, as these involve future claims that may be made against the Company but that have not occurred. The Company expects the risk of any future obligations under these indemnifications to be remote.

Off-balance sheet risk: Off-balance sheet risk refers to an unrecorded potential liability that may result in a future obligation or loss, even though it does not appear on the statements of financial condition. The Company's derivative instruments contain elements of off-balance sheet market and credit risk. Derivative instruments can be affected by market conditions, such as interest rate volatility, which could impact the fair value of the derivative instruments. If market conditions move against the Company, it may not achieve the anticipated benefits of these derivative instruments and may realize a loss. The Company minimizes market risk through monitoring its investments.

Concentration of credit and counterparty risk: Credit risk arises primarily from the potential inability of counterparties to perform in accordance with the terms of the contract. The Company is engaged in derivative transactions with counterparties. In the event that the counterparties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the creditworthiness of the counterparties or issuers of the instruments. The Company's maximum loss that it could incur related to counterparty risk on its derivative instruments is the value of the collateral for that respective derivative instrument. It is the Company's policy to review, as necessary, the credit standing of each counterparty.

Legal proceedings: In the normal course of business, the Company may be subject to legal and regulatory proceedings that are generally incidental to its ongoing operations. While there can be no assurance of the ultimate disposition of any such proceedings, the Company does not believe any disposition will have a material adverse effect

on the Company's consolidated financial statements.

Note 9. Financial Highlights

The financial highlights for the Company are as follows:

	Nine months ended June 30,			
	2012		2011	
Per share data ⁽¹⁾ :				
Net asset value at beginning of period	\$14.56		\$14.71	
Net increase in net assets as a result of public offering	0.04		0.06	
Costs related to public offering	(0.03))	(0.04))
Dividends and distributions declared	(0.96))	(0.95))
Net investment income	0.84		0.86	
Net realized (loss) gain on investments	(0.21))	0.11	
Net realized gain (loss) on derivative instruments	0.09		-	
Net change in unrealized appreciation (depreciation) on investments	0.15		-	
Net change in unrealized appreciation (depreciation) on derivative instruments	0.10		-	
Net asset value at end of period	\$14.58		\$14.75	
Per share market value at end of period	\$15.09		\$14.93	
Total return based on market value ⁽²⁾	8.08	%	3.79	%
Total return based on average net asset value*	8.73	%	6.52	%
Shares outstanding at end of period	25,663,009		21,733,903	
Ratios/Supplemental Data:				
Ratio of expenses (without incentive fees) to average net assets*	6.56	%	5.43	%
Ratio of incentive fees to average net assets ^{*(3)}	1.62	%	0.25	%
Ratio of total expenses to average net assets ^{*(3)}	8.18	%	5.68	%
Ratio of net investment income to average net assets*	7.62	%	7.77	%
Net assets at end of period	\$374,211		\$320,523	
Average debt outstanding	\$297,322		\$193,250	
Average debt outstanding per share	\$11.59		\$8.89	
Portfolio turnover*	28.28	%	64.52	%

* Annualized for a period less than one year.

(1) Based on actual number of shares outstanding at the end of the corresponding period or the weighted average shares outstanding for the period, unless otherwise noted, as appropriate.

(2) Total return based on market value assumes dividends are reinvested.

(3) During the nine months ended June 30, 2012, the Investment Adviser irrevocably waived \$647 of incentive fees attributable to the TRS. Had the Investment Advisor not waived these fees, the annualized ratio of incentive fees to average net assets and the annualized ratio of total expenses to average net assets would have been 1.86% and 8.42%, respectively, for the nine months ended June 30, 2012.

Nine months ended June 30, 2012						
12/07/2011	12/19/2011	12/29/2011	\$ 0.32	\$ 6,580	25,052	\$ 375
2/2/2012	3/16/2012	3/29/2012	\$ 0.32	\$ 7,381	55,416	\$ 805
5/1/2012	6/15/2012	6/29/2012	\$ 0.32	\$ 7,858	23,575	\$ 347

Note 12. Subsequent Events

The Company has evaluated subsequent events through the date these financial statements were issued and has determined that there are no subsequent events that require disclosure except for the following:

On August 2, 2012, the Company's Board declared a quarterly distribution of \$0.32 per share payable on September 27, 2012 to holders of record as of September 13, 2012.

On August 6, 2012, the Company announced an At the Market ("ATM") program to sell up to \$50 million of shares of its common stock. An ATM offering is a registered offering by a publicly traded issuer of its listed equity securities selling shares directly into the market at market prices. The Company engaged Wells Fargo Securities and UBS Investment Bank as its placement agents under the ATM program.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

The information contained in this section should be read in conjunction with our consolidated financial statements and related notes thereto appearing elsewhere in this quarterly report on Form 10-Q. In this report, "we," "us," "our" and "Golub Capital BDC" refer to Golub Capital BDC, Inc. and its consolidated subsidiaries.

Forward-Looking Statements

Some of the statements in this quarterly report on Form 10-Q constitute forward-looking statements, which relate to future events or our future performance or financial condition. The forward-looking statements contained in this quarterly report on Form 10-Q involve risks and uncertainties, including statements as to:

- our future operating results;
- our business prospects and the prospects of our portfolio companies;
- the effect of investments that we expect to make;
- our contractual arrangements and relationships with third parties;
- actual and potential conflicts of interest with our investment adviser, GC Advisors LLC, or GC Advisors, and other affiliates of Golub Capital Incorporated and Golub Capital LLC (formerly Golub Capital Management LLC), collectively, Golub Capital;
- the dependence of our future success on the general economy and its effect on the industries in which we invest;
- the ability of our portfolio companies to achieve their objectives;
- the use of borrowed money to finance a portion of our investments;
- the adequacy of our financing sources and working capital;
- the timing of cash flows, if any, from the operations of our portfolio companies;
- the ability of GC Advisors to locate suitable investments for us and to monitor and administer our investments;
- the ability of GC Advisors or its affiliates to attract and retain highly talented professionals;
- our ability to qualify and maintain our qualification as a regulated investment company, or RIC, and as a business development company;
- the impact on our business of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the rules and regulations issued thereunder; and
- the effect of changes to tax legislation and our tax position.

Such forward-looking statements may include statements preceded by, followed by or that otherwise include the words "may," "might," "will," "intend," "should," "could," "can," "would," "expect," "believe," "estimate," "anticipate," "predict" or similar words. The forward-looking statements contained in this quarterly report on Form 10-Q involve risks and uncertainties, many of which are beyond our control and difficult to predict. Our actual results could differ materially from those implied or expressed in the forward-looking statements for any reason, including the factors set forth as "Risk Factors" and elsewhere in this quarterly report on Form 10-Q.

We have based the forward-looking statements included in this report on information available to us on the date of this report, and we assume no obligation to update any such forward-looking statements. Actual results could differ materially from those anticipated in our forward-looking statements and future results could differ materially from historical performance. Although we undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make directly to you or through reports that we have filed or in the future may file with the Securities and Exchange Commission, or the SEC, including annual reports on Form 10-K, registration statements on Form N-2, quarterly reports on Form 10-Q and current reports on Form 8-K.

You should understand that, under Section 27A(b)(2)(B) of the Securities Act of 1933, as amended, and Section 21E(b)(2)(B) of the Securities Exchange Act of 1934, as amended, or the Exchange Act, the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995 do not apply to this quarterly report on Form 10-Q.

Overview

We are an externally managed, closed-end, non-diversified management investment company that has elected to be regulated as a business development company under the Investment Company Act of 1940, as amended, or the 1940 Act. In addition, for U.S. federal income tax purposes, we have elected to be treated as a RIC under Subchapter M of the Internal Revenue Code of 1986, as amended, or the Code. As a business development company and a RIC, we are also subject to certain constraints, including limitations imposed by the 1940 Act and the Code. We were formed in November 2009 to continue and expand the business of our predecessor, Golub Capital Master Funding LLC, or GCMF, which commenced operations in July 2007, in making investments in senior secured, one stop (a loan that combines characteristics of traditional first lien senior secured loans and second lien or subordinated loans), mezzanine (a loan that ranks senior only to a borrower's equity securities and ranks junior to all of such borrower's other indebtedness in priority of payment), second lien loans and equity securities of middle-market companies that are, in most cases, sponsored by private equity firms.

Our shares are currently listed on The NASDAQ Global Select Market under the symbol "GBDC".

Our investment objective is to maximize the total return to our stockholders in the form of current income and capital appreciation through debt and minority equity investments. We intend to achieve our investment objective by (1) accessing the established loan origination channels developed by Golub Capital, a leading lender to middle-market companies with over \$6.0 billion in capital under management as of June 30, 2012, (2) selecting investments within our core middle-market company focus, (3) partnering with experienced private equity firms, or sponsors, in many cases with whom we have invested alongside in the past, (4) implementing the disciplined underwriting standards of Golub Capital and (5) drawing upon the aggregate experience and resources of Golub Capital.

Our investment activities are managed by GC Advisors and supervised by our board of directors of which a majority of the members are independent of us.

Under an investment advisory agreement, or the Investment Advisory Agreement, entered into on April 14, 2010, and amended and restated on July 16, 2010, we have agreed to pay GC Advisors an annual base management fee based on our average adjusted gross assets as well as an incentive fee based on our investment performance. We have also entered into an administration agreement, or the Administration Agreement, with GC Service Company, LLC, or GC Service, under which we have agreed to reimburse GC Service for our allocable portion (subject to the review and approval of our independent directors) of overhead and other expenses incurred by GC Service in performing its obligations under the Administration Agreement.

We seek to create a diverse portfolio that includes senior secured, one stop, mezzanine and second lien loans and warrants and minority equity securities by investing approximately \$5 to \$25 million of capital, on average, in the securities of middle-market companies. We may also selectively invest more than \$25 million in some of our portfolio companies and generally expect that the size of our individual investments will vary proportionately with the size of our capital base.

As of June 30, 2012, our portfolio at fair value was comprised of 40.7% senior secured loans, 37.2% one stop loans, 7.6% second lien loans, 11.7% mezzanine loans and 2.8% equity securities. As of September 30, 2011, our portfolio at fair value was comprised of 44.3% senior secured loans, 38.7% one stop loans, 4.8% second lien loans, 10.2% mezzanine loans and 2.0% equity securities.

As of June 30, 2012 and September 30, 2011, we had debt investments in 116 and 103 portfolio companies, respectively. For the three and nine months ended June 30, 2012, our income producing assets, which represented nearly 100% of our total portfolio, had a weighted average annualized interest income (which excludes income resulting from amortization of fees and discounts) yield of 9.3% and 9.4% and a weighted average annualized investment income (which includes interest income and amortization of fees and discounts) yield of 10.0% and 10.3%, respectively. For the three and nine months ended June 30, 2011, our income producing assets, which represented nearly 100% of our total portfolio, had a weighted average annualized interest income (which excludes income resulting from amortization of fees and discounts) yield of 8.6% and 8.6% and a weighted average annualized investment income (which includes interest income and amortization of fees and discounts) yield of 9.6% and 10.1%, respectively.

Revenues: We generate revenue in the form of interest income on debt investments and capital gains and distributions, if any, on portfolio company investments that we originate or acquire. Our debt investments, whether in the form of senior secured, one stop, mezzanine or second lien loans, typically have a term of three to seven years and bear interest at a fixed or floating rate. In some instances, we receive payments on our debt investments based on scheduled amortization of the outstanding balances. In addition, we receive repayments of some of our debt investments prior to their scheduled maturity date. The frequency or volume of these repayments fluctuates significantly from period to period. Our portfolio activity also reflects the proceeds of sales of securities. In some cases, our investments provide for deferred interest payments or payment-in-kind, or PIK, interest. The principal amount of loans and any accrued but unpaid interest generally become due at the maturity date. In addition, we may generate revenue in the form of commitment, origination, amendment, structuring or due diligence fees, fees for providing managerial assistance and consulting fees. Loan origination fees, original issue discount and market discount or premium are capitalized, and we accrete or amortize such amounts as interest income. We record prepayment premiums on loans as interest income. When we receive partial principal payments on a loan in an amount that exceeds its amortized cost, we record the excess principal payment as interest income. Dividend income on preferred equity securities is recorded as dividend income on an accrual basis to the extent that such amounts are payable by the portfolio company and are expected to be collected. Dividend income on common equity securities is recorded on the record date for private portfolio companies or on the ex-dividend date for publicly traded portfolio companies.

We recognize realized gains or losses on investments based on the difference between the net proceeds from the disposition and the cost basis of the investment or derivative instrument, without regard to unrealized gains or losses previously recognized. We record current period changes in fair value of investments and derivative instruments that are measured at fair value as a component of the net change in unrealized appreciation (depreciation) on investments in the consolidated statements of operations.

Expenses: Our primary operating expenses include the payment of fees to GC Advisors under the Investment Advisory Agreement, our allocable portion of overhead expenses under the Administration Agreement and other operating costs described below. Additionally, we pay interest expense on our outstanding debt. We bear all other out-of-pocket costs and expenses of our operations and transactions, including:

- organizational expenses;

- calculating our net asset value (including the cost and expenses of any independent valuation firm);
- fees and expenses incurred by GC Advisors payable to third parties, including agents, consultants or other advisors, in monitoring financial and legal affairs for us and in monitoring our investments and performing due diligence on our prospective portfolio companies or otherwise relating to, or associated with, evaluating and making investments;
- interest payable on debt, if any, incurred to finance our investments and expenses related to unsuccessful portfolio acquisition efforts;

- offerings of our common stock and other securities;

- investment advisory and management fees;

- administration fees and expenses, if any, payable under the Administration Agreement (including payments under the Administration Agreement between us and GC Service based upon our allocable portion of GC Service's overhead in performing its obligations under the Administration Agreement, including rent and the allocable portion of the cost of our chief compliance officer, chief financial officer and their respective staffs);

Edgar Filing: Golub Capital BDC, Inc. - Form 10-Q

fees payable to third parties, including agents, consultants or other advisors, relating to, or associated with evaluating and making, investments in portfolio companies, including costs associated with meeting financial sponsors;

- transfer agent, dividend agent and custodial fees and expenses;
- U.S. federal and state registration fees;
- all costs of registration and listing our shares on any securities exchange;
- U.S. federal, state and local taxes;
- independent directors' fees and expenses;
- costs of preparing and filing reports or other documents required by the SEC or other regulators;
- costs of any reports, proxy statements or other notices to stockholders, including printing costs;
- costs associated with individual or group stockholders;
- costs associated with compliance under the Sarbanes-Oxley Act of 2002;

our allocable portion of any fidelity bond, directors and officers/errors and omissions liability insurance, and any other insurance premiums;
direct costs and expenses of administration, including printing, mailing, long distance telephone, copying, secretarial and other staff, independent auditors and outside legal costs;
proxy voting expenses; and
all other expenses incurred by us or GC Service in connection with administering our business.

During periods of asset growth, we expect our general and administrative expenses to be relatively stable or decline as a percentage of total assets and increase during periods of asset declines. Incentive fees, interest expenses and costs relating to future offerings of securities would be additive to the expenses described above.

GC Advisors, as collateral manager for Golub Capital BDC 2010-1 LLC, or the Securitization Issuer, under the collateral management agreement, is entitled to receive an annual fee in an amount equal to 0.35% of the principal balance of the portfolio loans held by the Securitization Issuer at the beginning of the collection period relating to each payment date, which is payable in arrears on each payment date. This fee, which is less than the management fee payable under the Investment Advisory Agreement, is paid directly by the Securitization Issuer to GC Advisors and offset against such management fee. Accordingly, the 1.375% management fee paid by us to GC Advisors under the Investment Advisory Agreement on all of our assets, including those indirectly held through the Securitization Issuer, is reduced, on a dollar-for-dollar basis, by an amount equal to such 0.35% fee paid to GC Advisors by the Securitization Issuer. The term “collection period” refers to a quarterly period running from the day after the end of the prior collection period to the fifth business day of the calendar month in which a payment date occurs. This fee may be waived by the collateral manager. The collateral management agreement does not include any incentive fee payable to GC Advisors. In addition, the Securitization Issuer paid Wells Fargo Securities, LLC a structuring and placement fee for its services in connection with the initial structuring of a \$300 million term debt securitization, or the Debt Securitization. The Securitization Issuer also agreed to pay ongoing administrative expenses to the trustee, collateral manager, independent accountants, legal counsel, rating agencies and independent managers in connection with developing and maintaining reports and providing required services in connection with the administration of the Debt Securitization. The administrative expenses are paid by the Securitization Issuer on each payment date in two parts: (1) a component that is paid in a priority to other amounts distributed by the Securitization Issuer, subject to an administrative expense cap equal to the sum of 0.04% per annum on the adjusted principal balance of the portfolio loans and other assets held by the Securitization Issuer on the last day of the collection period relating to such payment date, plus \$150,000 per annum, and (2) a component that is paid in a subordinated position relative to other amounts distributed by the Securitization Issuer, equal to any amounts that exceed the aforementioned administrative expense cap. We believe that these administrative expenses approximate the amount of ongoing fees and expenses that we would be required to pay in connection with a traditional secured credit facility. Our common stockholders indirectly bear all of these expenses.

Recent Developments

On August 2, 2012, our board of directors declared a quarterly distribution of \$0.32 per share payable on September 27, 2012 to holders of record as of September 13, 2012.

On August 2, 2012, our board of directors approved a share repurchase program which allows us to repurchase up to \$30 million of our common stock on the open market at prices below our net asset value as reported in our most recently published financial statements.

Consolidated Results of Operations

Consolidated operating results for the three and nine months ended June 30, 2012 and 2011 are as follows:

	Three months ended June 30, 2012			Nine months ended June 30, 2012		
	2012	2011	Variances 2012 vs. 2011	2012	2011	Variances 2012 vs. 2011
	(In thousands)					
Interest income	\$ 13,744	\$ 9,106	\$ 4,638	\$ 37,816	\$ 24,173	\$ 13,643
Income from amortization of discounts and origination fees	1,067	965	102	3,447	4,146	(699)
Dividend income	-	-	-	377	-	377
Total investment income	14,811	10,071	4,740	41,640	28,319	13,321
Total expenses	8,133	4,119	4,014	21,556	11,954	9,602
Net investment income	6,678	5,952	726	20,084	16,365	3,719
Net realized gains (losses) on investments and derivative instruments	1,158	71	1,087	(2,786)	1,997	(4,783)
Net change in unrealized (depreciation) appreciation on investments and derivative instruments	(2,443)	497	(2,940)	5,716	(4)	5,720
Net income	\$ 5,393	\$ 6,520	\$ (1,127)	\$ 23,014	\$ 18,358	\$ 4,656
Average earning portfolio company investments, at fair value	\$ 602,056	\$ 427,607	\$ 174,449	\$ 544,103	\$ 380,463	\$ 163,640
Average debt outstanding	\$ 317,666	\$ 206,471	\$ 111,195	\$ 297,322	\$ 193,250	\$ 104,072

The results of operations for the three and nine months ended June 30, 2012 and 2011 may not be indicative of the results we report in future periods. Net income can vary substantially from period to period for various reasons, including the recognition of realized gains and losses and unrealized appreciation and depreciation. As a result, quarterly comparisons of net income may not be meaningful.

Investment Income

Interest income increased by \$4.6 million from the three months ended June 30, 2011 to the three months ended June 30, 2012 and was primarily driven by an increase in the weighted average investment balance of earning investments from \$427.6 million for the three months ended June 30, 2011 to \$602.1 million for the three months ended June 30, 2012. To a lesser extent, the increase in interest income was driven by a higher weighted average annualized interest income yield (which excludes income resulting from amortization of fees and discounts), which increased from 8.6% for the three months ended June 30, 2011 to 9.3% for the three months ended June 30, 2012.

Interest income increased by \$13.6 million from the nine months ended June 30, 2011 to the nine months ended June 30, 2012 and was primarily driven by an increase in the weighted average investment balance of earning investments from \$380.5 million for the nine months ended June 30, 2011 to \$544.1 million for the nine months ended June 30, 2012. To a lesser extent, the increase in interest income was driven by a higher weighted average annualized interest income yield (which excludes income resulting from amortization of fees and discounts), which increased from 8.6% for the nine months ended June 30, 2011 to 9.4% for the nine months ended June 30, 2012.

The increase in the yield was driven primarily by the change in asset mix of our portfolio. Higher yielding subordinated and one stop investments increased from 10.6% and 34.8%, respectively, of the total investment in portfolio companies as of June 30, 2011 to 11.7% and 37.2%, respectively, of the total investment in portfolio companies as of June 30, 2012. From June 30, 2011 to June 30, 2012, lower yielding senior secured investments decreased from 47.4% to 40.7% of the total investment in portfolio companies.

Annualized interest income yield (which excludes income resulting from amortization of fees and discounts) by security type for the three and nine months ended June 30, 2012 and 2011 was as follows:

	Three months ended June 30,		Nine months ended June 30,					
	2012		2011		2012		2011	
Senior secured	7.3	%	7.2	%	7.4	%	7.2	%
One stop	8.9	%	8.6	%	9.0	%	8.6	%
Second lien ⁽¹⁾	11.5	%	11.6	%	10.4	%	10.5	%
Subordinated debt	13.8	%	14.1	%	13.7	%	14.0	%

⁽¹⁾ Second lien loans include loans structured as first lien last out term loans.

Interest rate yields increased for the three and nine months ended June 30, 2012 for senior secured and one stop categories, primarily due to increased pricing on new originations for these product types from pricing for the three and nine months ended June 30, 2011. Interest rate yields on second lien investments and fixed rate subordinated debt remained relatively flat as pricing on new originations remained relatively flat the past three quarters. For additional details on investment yields and asset mix, refer to the “*Liquidity and Capital Resources - Portfolio Composition, Investment Activity and Yield*” section below.

Income from the amortization of discounts and origination fees increased by \$0.1 million from the three months ended June 30, 2011 to the three months ended June 30, 2012. Income from the amortization of discounts and origination fees decreased by \$0.7 million from the nine months ended June 30, 2011 to the nine months ended June 30, 2012. The fluctuation in amortization of discounts and origination fees depends on the volume of payoffs and the discounts on the loans at the time of payoffs. For the nine months ended June 30, 2011, the discounts and origination fees accelerated into income were larger than for the nine months ended June 30, 2012.

Dividend income increased by \$0.4 million from the nine months ended June 30, 2011 to the nine months ended June 30, 2012 as a result of dividend income received from an equity investment in a portfolio company.

Expenses

The following table summarizes our expenses:

	Three months ended June 30, 2012			Nine months ended June 30, 2012			Variances
	2012	2011	2012 vs. 2011	2012	2011	2012 vs. 2011	
	(In thousands)						
Interest and other debt financing expenses	\$2,865	\$1,637	\$ 1,228	\$ 7,811	\$ 4,681	\$ 3,130	
Base management fee	2,220	1,497	723	6,187	4,122	2,065	
Incentive fee	1,917	113	1,804	4,261	525	3,736	
Professional fees	538	500	38	1,685	1,558	127	
Administrative service fee	489	224	265	1,207	611	596	
General and administrative expenses	104	148	(44)	405	457	(52)	
Total expenses	\$8,133	\$4,119	\$ 4,014	\$ 21,556	\$ 11,954	\$ 9,602	

Interest and debt financing expenses increased from the three months ended June 30, 2011 to the three months ended June 30, 2012 primarily due to an increase in the weighted average of outstanding borrowings from \$206.5 million for the three months ended June 30, 2011 to \$317.7 million for the three months ended June 30, 2012. In addition to the \$174.0 million of borrowings under the Debt Securitization that was outstanding for the three months ended June 30, 2012 and 2011, we increased our use of debt through GC SBIC IV, L.P., our small business investment company, or SBIC, subsidiary and our revolving credit facility, or the Credit Facility, which had outstanding balances of \$123.5 million and \$32.3 million, respectively, as of June 30, 2012 and \$48.3 million and zero, respectively, as of June 30, 2011. To a lesser extent, the increase in interest expense was also caused by an increase in the effective annualized average interest rate on our outstanding debt from 3.2% for the three months ended June 30, 2011 to 3.6% for the three months ended June 30, 2012.

Interest and debt financing expenses increased from the nine months ended June 30, 2011 to the nine months ended June 30, 2012 primarily due to an increase in the weighted average of outstanding borrowings from \$193.3 million for the nine months ended June 30, 2011 to \$297.3 million for the nine months ended June 30, 2012. To a lesser extent, the increase in interest expense was also caused by an increase in the effective annualized average interest rate on our outstanding debt from 3.2% for the nine months ended June 30, 2011 to 3.5% for the nine months ended June 30, 2012.

The base management fee and the administrative service fee primarily increased as a result of an increase in average assets and average investments from the three and nine months ended June 30, 2011 to the three and nine months ended June 30, 2012. Additionally, as permitted under the Administration Agreement, beginning January 1, 2012, the allocable portion of the cost of our chief compliance officer and chief financial officer and their respective staffs were charged to us, which was also partially related to the increase in the administrative service fee. These costs are permitted to be charged under the terms of the Administration Agreement but were previously being waived by GC Service.

The incentive fee increased by \$1.8 million and \$3.7 million from the three and nine months ended June 30, 2011 to the three and nine months ended June 30, 2012, respectively, as a result of the increase in pre-incentive fee net investment income.

As described in the “Net Realized and Unrealized Gains and Losses” section below, we entered into the TRS with Citibank for the purpose of gaining economic exposure to a portfolio of broadly syndicated loans. We subsequently terminated the TRS on April 11, 2012. For the periods ending September 30, 2011 and prior, we had included interest spread payments, which represent the difference between the interest and fees received on the referenced assets underlying the TRS and the interest paid to Citibank on the settled notional value of the TRS, from the TRS in the capital gains component of the incentive fee calculation as this is consistent with generally accepted accounting principles in the United States of America, or GAAP, which records such payments in net realized gains/(losses) on derivative instruments in the consolidated statement of operations. However, we changed our methodology in the first fiscal quarter of fiscal year 2012 pursuant to discussions with the staff, or the Staff, of the SEC, resulting in the TRS interest spread payments being included in the income component of the incentive fee calculation.

For the three and nine months ended June 30, 2012, we received interest spread payments from the TRS of \$1.0 million and \$2.6 million, respectively. For the three months ended December 31, 2011, including the interest spread payments from the TRS in the income component of the incentive fee calculation caused an increase in the incentive fee by \$0.6 million. Upon reviewing the incentive fee calculation and the treatment of the interest spread payments from the TRS, GC Advisors irrevocably waived the incremental portion of the incentive fee attributable from the TRS interest spread payments for the three months ended December 31, 2011. For the three months ended June 30, 2012, the incentive fee was \$1.9 million. For the nine months ended June 30, 2012, after taking into account the waiver by GC Advisors, the incentive fee was \$4.3 million, rather than \$4.9 million. The incentive fee for the three and nine months ended June 30, 2011 was \$0.1 million and \$0.5 million, respectively.

Golub Capital Incorporated pays for certain expenses incurred by us. These expenses are subsequently reimbursed in cash. Total expenses reimbursed by us to Golub Capital Incorporated for the three and nine months ended June 30, 2012 were \$0.1 million and \$0.3 million, respectively. Total expenses reimbursed by us to Golub Capital Incorporated for the three and nine months ended June 30, 2011 were \$0.1 million and \$0.3 million, respectively.

As of June 30, 2012 and September 30, 2011, included in accounts payable and accrued expenses were \$0.1 million and \$0.1 million, respectively, for accrued expenses paid on behalf of us by Golub Capital Incorporated.

Net Realized and Unrealized Gains and Losses

The following table summarizes our net realized and unrealized gains (losses) for the periods presented:

	Three months ended June 30, 2012		Nine months ended June 30, 2012		Variances 2012 vs. 2011	
	2012	2011	2012	2011	2012 vs. 2011	
	(In thousands)					
Net realized (loss) gain on investments	\$(70)	\$71	\$(141)	\$(5,002)	\$1,997	\$(6,999)
Net realized gain on TRS	2,188	-	2,188	3,779	-	3,779
Net realized (loss) on financial futures contracts	(960)	-	(960)	(1,563)	-	(1,563)
Net realized gain (loss)	1,158	71	1,087	(2,786)	1,997	(4,783)
Unrealized (depreciation) on investments	(3,338)	(1,279)	(2,059)	(9,487)	(5,768)	(3,719)
Unrealized appreciation on investments	2,543	2,038	505	13,067	6,026	7,041
Unrealized (depreciation) appreciation on TRS	(1,405)	(262)	(1,143)	1,919	(262)	2,181
Unrealized (depreciation) appreciation on financial futures contracts	(243)	-	(243)	217	-	217
Net change in unrealized (depreciation) appreciation on investments and derivative instruments	\$(2,443)	\$497	\$(2,940)	\$5,716	\$ (4)	\$ 5,720

For the three and nine months ended June 30, 2012, we had net realized losses on investments of \$0.1 million and \$5.0 million, respectively, primarily as a result of the sale of our investment in two non-accrual portfolio companies in the nine months ended June 30, 2012. During the three months ended June 30, 2012, we had \$3.3 million in unrealized depreciation on 85 portfolio company investments, which was partially offset by \$2.5 million in unrealized appreciation on 35 portfolio company investments. For the nine months ended June 30, 2012, we had \$13.1 million in unrealized appreciation on 54 portfolio company investments, which was partially offset by \$9.5 million in unrealized depreciation on 81 portfolio company investments. Unrealized appreciation during the three and nine months ended June 30, 2012 resulted from an increase in fair value primarily due to the rise in market prices and a reversal of prior period unrealized depreciation. A majority of the unrealized depreciation resulted from negative credit related adjustments in certain of our investments which caused a reduction in fair value.

For the three and nine months ended June 30, 2011, we had \$0.1 million and \$2.0 million in net realized gains, respectively. For the three months ended June 30, 2011, we had \$2.0 million in unrealized appreciation on 29 portfolio company investments, which was partially offset by \$1.3 million in unrealized depreciation on 78 portfolio company investments. For the nine months ended June 30, 2011, we had \$6.0 million in unrealized appreciation on 57

portfolio company investments, which was partially offset by \$5.8 million in unrealized depreciation on 72 portfolio company investments.

Unrealized appreciation during the three and nine months ended June 30, 2011 resulted from an increase in fair value primarily due to the rise in market prices and a reversal of prior period unrealized depreciation. Unrealized depreciation primarily resulted from negative credit-related adjustments which caused a reduction in fair value.

Termination of the Total Return Swap

On April 11, 2012, we terminated the TRS that we had entered into with Citibank.

The purpose of entering into the TRS was to gain economic exposure to a portfolio of broadly syndicated loans. Generally, under the terms of a total return swap, one party agrees to make periodic payments to another party based on the change in the market value of the assets referenced by the total return swap, which may include a specified security, basket of securities or securities indices during the specified period, in return for periodic payments based on a fixed or variable interest rate.

As of June 30, 2012, the fair value of the TRS was \$0.1 million, comprised of unpaid accrued interest still owed to us under the terms of the TRS, which will be paid in September 2012. As of September 30, 2011, the fair value of the TRS was \$(1.8) million, comprised of spread interest income of \$0.6 million and an unrealized loss on the referenced loans of \$(2.4) million. The change in the fair value of the TRS was \$(1.4) million and \$1.9 million for the three and nine months ended June 30, 2012, respectively. The change in the fair value of the TRS was \$(0.3) million and \$(0.3) million for the three and nine months ended June 30, 2011, respectively. Realized gains on the TRS for the three months ended June 30, 2012 were \$2.2 million, which consisted of spread interest income of \$1.0 million and a realized gain of \$1.2 million on the referenced loans. Realized gains on the TRS for the nine months ended June 30, 2012 were \$3.8 million, which consisted of spread interest income of \$2.6 million and a realized gain of \$1.2 million on the referenced loans. There were no realized gains or loss on the TRS for the three and nine months ended June 30, 2011.

Cash collateral of \$19.9 million that had secured the obligations to Citibank under the TRS was returned to the company and will be used to fund new middle-market debt and equity investments.

Ten-Year U.S. Treasury Futures Contracts

We have entered into ten-year U.S. Treasury futures contracts to mitigate our exposure to adverse fluctuation in interest rates related to our Small Business Administration, or SBA, debentures. Based on the daily fluctuation of the fair value of the referenced securities of the financial futures, we record an unrealized gain or loss equal to the daily fluctuation in fair value. Upon maturity or settlement of the futures contracts, we will realize a gain or loss based on the difference of the fair value of the financial futures contracts at inception and the fair value of the futures contracts at settlement or maturity. As of June 30, 2012 and September 30, 2011, the fair value of the futures contracts was \$0.1 million and \$(1.0) million, respectively. For the three and nine months ended June 30, 2012, the realized loss on settlement of futures contracts was \$(1.0) million and \$(1.6) million, respectively. For the three and nine months ended June 30, 2012, the change in unrealized (depreciation) appreciation related to the futures contracts was \$(0.2)

million and \$0.2 million, respectively. The losses on the futures contracts were a result of the decrease in the ten-year U.S. Treasury rate. The futures contracts will mature in September 2012.

Liquidity and Capital Resources

As a business development company, we distribute substantially all of our net income to our stockholders and will have an ongoing need to raise additional capital for investment purposes. To fund growth, we have a number of alternatives available to increase capital, including raising equity, increasing debt, including through one or more additional securitization facilities, and funding from operational cash flow.

For the nine months ended June 30, 2012, we experienced a net decrease in cash and cash equivalents of \$28.3 million. During the same period, we used \$131.6 million in operating activities, primarily as a result of fundings of portfolio investments of \$292.9 million. This was partially offset by proceeds from principal payments and sales of portfolio investments of \$120.6 million and net investment income of \$20.1 million. During the same period, cash used in investment activities of \$21.6 million was driven by the change in restricted cash and cash equivalents. Lastly, cash provided by financing activities was \$125.0 million, primarily due to borrowings on debt of \$154.8 million and proceeds from shares sold from our public offering of \$57.2 million (described below), partially offset by repayments of debt of \$62.7 million and distributions paid of \$21.8 million.

On January 31, 2012, we priced a public offering of 3,500,000 shares of our common stock at a public offering price of \$15.35 per share, raising approximately \$53.7 million in gross proceeds. On February 3, 2012, the transaction closed, the shares were delivered, and proceeds, net of offering costs but before expenses, of \$52.3 million were received. On March 1, 2012, we sold an additional 325,000 shares of our common stock at a public offering price of \$15.35 per share pursuant to the underwriters' partial exercise of the over-allotment option we granted to the underwriters in connection with the offering that closed on February 3, 2012. Settlement of this partial exercise of the over-allotment option resulted in gross proceeds of \$5.0 million and proceeds, net of offering costs but before expenses, of \$4.8 million.

For the nine months ended June 30, 2011, we experienced a net decrease in cash and cash equivalents of \$17.1 million. During the same period we used \$107.9 million in operating activities, primarily as a result of fundings of portfolio investments of \$274.8 million. This was partially offset by proceeds from principal payments of \$108.9 million and sales of portfolio investments of \$80.1 million and net investment income of \$16.4 million. During the same period, cash provided by financing activities was \$88.3 million, primarily due to net proceeds from the follow-on offering of \$59.4 million and borrowings on debt of \$48.3 million, partially offset by distributions paid of \$17.0 million. Lastly, net cash provided by investing activities was \$2.5 million as a result of a decrease in restricted cash and cash equivalents.

As of June 30, 2012 and September 30, 2011, we had cash and cash equivalents of \$18.1 million and \$46.4 million, respectively. In addition, we had restricted cash and cash equivalents of \$45.1 million and \$23.4 million as of June 30, 2012 and September 30, 2011, respectively. Cash and cash equivalents are available to fund new investments, pay operating expenses and pay distributions. As of June 30, 2012, \$18.8 million of our restricted cash and cash equivalents could be used to fund new investments that meet the investment guidelines established in the Debt Securitization, which are described in further detail in Note 6 to our consolidated financial statements, and for the payment of interest expense on the notes issued in the Debt Securitization. \$4.3 million of such restricted cash and cash equivalents was used to fund investments that meet the guidelines under the Credit Facility as well as for the payment of interest expense and revolving debt of the Credit Facility. The remaining \$22.0 million of restricted cash and cash equivalents can be used to fund new investments that meet the regulatory and investment guidelines established by the SBA for our SBIC, which are described in further detail in Note 6 to our consolidated financial statements, and for interest expense and fees on our outstanding SBA debentures.

As of June 30 2012 and September 30, 2011, we had outstanding commitments to fund investments totaling \$52.0 million and \$49.4 million, respectively. These amounts may or may not be funded to the borrowing party now or in the future. The unfunded commitments relate to loans with various maturity dates, but the entire amount was eligible for funding to the borrowers as of June 30, 2012 and September 30, 2011, subject to the terms of each loan's respective credit agreement.

As of June 30, 2012 and September 30, 2011, subject to leverage and borrowing base restrictions, we had approximately \$42.7 million and \$72.6 million, respectively, available for additional borrowings on the Credit Facility.

Under present SBIC regulations, the maximum amount of SBA-guaranteed debentures that may be issued by multiple licensees under common management is \$225.0 million. An affiliate of GC Advisors manages another SBIC. As such, it is possible that GC SBIC IV, L.P., our wholly owned SBIC subsidiary, will be constrained in its ability to issue SBA-guaranteed debentures in the future if the other affiliated SBIC has already issued such debentures. As of June 30, 2012, the affiliated SBIC licensee had \$90.7 million of SBA-guaranteed debentures outstanding, while GC SBIC IV, L.P. had \$123.5 million of outstanding SBA-guaranteed debentures, leaving incremental borrowing capacity of a maximum of \$10.8 million of SBA-guaranteed debentures for GC SBIC IV, L.P. and the affiliated SBIC licensee. Unless specifically approved by the SBA, the other licensee was prohibited by the SBA from making certain new investments when GC SBIC IV, L.P. received its license on August 24, 2010. The affiliated SBIC licensee is limited to only making add-on investments in existing portfolio companies. As such, the majority of the incremental borrowing capacity is available for GC SBIC IV, L.P. The borrowing capacity of GC SBIC IV, L.P. could be expanded further if the affiliated SBIC retires its SBA-guaranteed debentures.

On February 2, 2012, we received a “Green Light” letter from the SBA allowing us to proceed with an application for a second SBIC license and we submitted such an application to the SBA on April 19, 2012. On May 18, 2012, we received an “Acceptance Letter” from the SBA notifying us that the application had been accepted by the SBA for further processing. The application process is anticipated to take six to twelve months. If approved, the additional license will provide us with an incremental source of attractive long-term capital.

In accordance with the 1940 Act, with certain limited exceptions, we are only allowed to borrow amounts such that our asset coverage, as defined in the 1940 Act, is at least 200% after such borrowing. On September 13, 2011, we received exemptive relief from the SEC allowing us to modify the asset coverage requirement to exclude the SBA debentures from this calculation. As such, our ratio of total consolidated assets to outstanding indebtedness may be less than 200%. This provides us with increased investment flexibility but also increases our risks related to leverage. As of June 30, 2012, our asset coverage for borrowed amounts was 282.1% (excluding the SBA debentures).

Although we expect to fund the growth of our investment portfolio through the net proceeds from future securities offerings and through our dividend reinvestment plan as well as future borrowings, to the extent permitted by the 1940 Act, we cannot assure you that our efforts to raise capital will be successful. In addition to capital not being available, it also may not be available on favorable terms.

We believe that our existing cash and cash equivalents and available borrowings as of June 30, 2012 will be sufficient to fund our anticipated requirements through at least June 30, 2013.

Portfolio Composition, Investment Activity and Yield

As of June 30, 2012 and September 30, 2011, we had investments in 116 and 103 portfolio companies, respectively, with a total value of \$636.6 million and \$459.8 million, respectively. The following table shows the asset mix of our new originations for the three and nine months ended June 30, 2012 and 2011:

	Three months ended June 30, 2012			2011			Nine months ended June 30, 2012			2011		
	(In thousands)	Percentage of Commitments		(In thousands)	Percentage of Commitments		(In thousands)	Percentage of Commitments		(In thousands)	Percentage of Commitments

Edgar Filing: Golub Capital BDC, Inc. - Form 10-Q

For the three and nine months ended June 30, 2012, we had approximately \$34.2 million and \$114.4 million in proceeds from principal payments of portfolio companies, respectively. For the three and nine months ended June 30, 2012, we had sales of securities in zero and seven portfolio companies aggregating approximately zero and \$6.2 million, respectively.

For the three and nine months ended June 30, 2011, we had approximately \$33.5 million and \$108.9 million in debt repayments, respectively. For the three and nine months ended June 30, 2011, we had sales of securities in 19 and 37 portfolio companies aggregating approximately \$46.2 million and \$80.1 million, respectively.

The following table shows the par, amortized cost and fair value of our portfolio of investments excluding derivative instruments by asset class:

	As of June 30, 2012 ⁽¹⁾			As of September 30, 2011 ⁽¹⁾		
	Par	Amortized Cost	Fair Value	Par	Amortized Cost	Fair Value
(In thousands)						
Senior secured:						
Performing	\$258,716	\$254,267	\$255,943	\$203,647	\$201,018	\$200,940
Non-accrual ⁽²⁾	6,862	6,856	2,808	9,078	8,711	2,891
One stop:						
Performing	237,506	233,973	236,827	178,854	176,393	177,880

Equity	N/A	18,341	17,992	N/A	9,420	9,390
Total	\$627,759	\$635,252	\$636,632	\$460,305	\$462,961	\$459,827

(1) Sixteen and fourteen of our loans included a feature permitting a portion of the interest due on such loan to be PIK interest as of June 30, 2012 and September 30, 2011, respectively.

We refer to a loan as non-accrual when we cease recognizing interest income on the loan because we have stopped pursuing repayment of the loan or, in certain circumstances, it is past due 90 days or more on principal and interest or our management has reasonable doubt that principal or interest will not be collected. See "—Critical Accounting Policies— Revenue Recognition."

(2) Second lien loans included \$16.0 million and \$12.3 million of loans structured as first lien last out term loans as of June 30, 2012 and September 30, 2011, respectively.

The following table shows the weighted average rate, spread over LIBOR of floating rate, fixed rate and fees of investments originated and the weighted average rate of sales and payoffs of portfolio companies during the three and nine months ended June 30, 2012 and 2011:

	Three months ended June 30,			Nine months ended June 30,				
	2012		2011		2012		2011	
Weighted average rate of new investment fundings ⁽¹⁾⁽²⁾	8.2	%	8.7	%	9.3	%	8.7	%
Weighted average spread over LIBOR of new floating rate investment fundings ⁽¹⁾⁽²⁾	6.7	%	6.4	%	7.1	%	6.4	%
Weighted average rate of new fixed rate investment fundings	8.0	%	13.7	%	13.6	%	13.6	%
Weighted average fees of new investment fundings	1.7	%	1.5	%	1.9	%	1.6	%
Weighted average rate of sales and payoffs of portfolio companies	6.7	%	5.7	%	7.2	%	6.2	%

(1) For the three and nine months ended June 30, 2012, we have excluded \$20.4 million of broadly syndicated loans held for short term investment purposes. These loans had a weighted average rate of 2.6% and a weighted average spread over LIBOR of 2.2%. Had we included the broadly syndicated loans in these rates, for the three and nine months ended June 30, 2012, our weighted average rate of new investments would have been 5.9% and 8.8%, respectively, and our weighted average spread over LIBOR would have been 4.8% and 6.7%, respectively.

(2) For the three and nine months ended June 30, 2011, we have excluded \$22.0 million of broadly syndicated loans held for short term investment purposes. These loans had a weighted average rate of 3.9% and a weighted average spread over LIBOR of 3.3%. Had we included the broadly syndicated loans in these rates, for the three and nine months ended June 30, 2011, our weighted average rate of new investments would have been 7.8% and 8.1%, respectively, and our weighted average spread over LIBOR would have been 5.3% and 5.7%, respectively.

For the three and nine months ended June 30, 2012, the weighted average annualized interest income (which excludes income resulting from amortization of fees and discounts) yield on the fair value of income producing loans in our portfolio was 9.3% and 9.4%, respectively. For the three and nine months ended June 30, 2011, the weighted average annualized interest income (which excludes income resulting from amortization of fees and discounts) yield on the fair value of income producing investments in our portfolio were 8.6% and 8.6%, respectively. As of June 30, 2012, 81.2% and 80.5% of our portfolio at fair value and at cost, respectively, had interest rate floors that limit the minimum applicable interest rates on such loans. As of September 30, 2011, 78.8% and 79.0% of our portfolio at fair value and at cost, respectively, had interest rate floors that limited minimum interest rates on such loans.

GC Advisors regularly assesses the risk profile of each of our investments and rates each of them based on an internal system developed by Golub Capital and its affiliates. This system is not generally accepted in our industry or used by our competitors. It is based on the following categories, which we refer to as GC Advisors' investment performance rating:

Risk Ratings Definition

Rating Definition

- 5 Involves the least amount of risk in our portfolio. The borrower is performing above expectations and the trends and risk factors are generally favorable.
- 4 Involves an acceptable level of risk that is similar to the risk at the time of origination. The borrower is generally performing as expected and the risk factors are neutral to favorable.
- 3 Involves a borrower performing below expectations and indicates that the loan's risk has increased somewhat since origination. The borrower may be out of compliance with debt covenants; however, loan payments are generally not past due.
- 2 Involves a borrower performing materially below expectations and indicates that the loan's risk has increased materially since origination. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due (but generally not more than 180 days past due).
- 1 Involves a borrower performing substantially below expectations and indicates that the loan's risk has substantially increased since origination. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. Loans rated 1 are not anticipated to be repaid in full and we will reduce the fair market value of the loan to the amount we anticipate will be recovered.

The following table shows the distribution of our investments on the 1 to 5 investment performance rating scale at fair value as of June 30, 2012 and September 30, 2011.

Investment Performance Rating	June 30, 2012		September 30, 2011		
	Investments at Fair Value (In thousands)	Percentage of Total Investments	Investments at Fair Value (In thousands) ⁽¹⁾	Percentage of Total Investments	
5	\$138,479	21.7	% \$49,691	10.8	%
4	437,319	68.7	360,259	78.7	
3	56,168	8.8	45,141	9.9	
2	341	0.1	2,891	0.6	
1	4,325	0.7	-	-	
Total	\$636,632	100.0	% \$457,982	100.0	%

As of September 30, 2011, the TRS was included in the above table with an investment performance rating of 4.
(1) The fair value of the TRS as of September 30, 2011 was \$(1.8) million.

Contractual Obligations and Off-Balance Sheet Arrangements

A summary of our significant contractual payment obligations as of June 30, 2012 is as follows:

	Payments Due by Period (In millions)				
	Total	Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Debt Securitization	\$ 174.0	\$ -	\$ -	\$ -	\$ 174.0
SBA debentures	123.5	-	-	-	123.5
Credit Facility	32.3	-	-	32.3	-
Unfunded commitments ⁽¹⁾	52.0	52.0	-	-	-
Total contractual obligations	\$ 381.8	\$ 52.0	\$ -	\$ 32.3	\$ 297.5

(1) Unfunded commitments represent all amounts unfunded as of June 30, 2012. These amounts may or may not be funded to the borrowing party now or in the future. The unfunded commitments relate to loans with various maturity dates, but we are showing this amount in the less than one year category, as this entire amount was eligible for funding to the borrowers as of June 30, 2012.

The notes offered in the Debt Securitization are scheduled to mature on July 20, 2021. The SBA debentures are scheduled to mature between March 2021 and March 2022. The Credit Facility is scheduled to mature on October 21, 2015.

We may become a party to financial instruments with off-balance sheet risk in the normal course of our business to meet the financial needs of our portfolio companies. These instruments may include commitments to extend credit and involve, to varying degrees, elements of liquidity and credit risk in excess of the amount recognized in the balance sheet. As of June 30, 2012 and September 30, 2011, we had outstanding commitments to fund investments totaling \$52.0 million and \$49.4 million, respectively.

Our ten-year U.S. Treasury futures contracts contain elements of off-balance sheet market and credit risk. Such derivative instruments can be affected by market conditions, such as interest rate volatility, which could impact the fair value of our derivative instruments. If market conditions move against us, we may not achieve the anticipated benefits of these derivative instruments and may realize a loss. We minimize market risk through monitoring our investments. In addition to market risk, we have credit risk that a counterparty will not be able to meet its obligations

to us. It is our policy to review, as necessary, the credit standing of each counterparty.

We have certain contracts under which we have material future commitments. We have entered into the Investment Advisory Agreement with GC Advisors in accordance with the 1940 Act. The Investment Advisory Agreement became effective upon the pricing of our initial public offering and was amended and restated on July 16, 2010 in order to offset fees payable in connection with the Debt Securitization against the base management fee. Under the Investment Advisory Agreement, GC Advisors provides us with investment advisory and management services. For these services, we pay (1) a management fee equal to a percentage of the average adjusted value of our gross assets and (2) an incentive fee based on our performance. To the extent that GC Advisors or any of its affiliates provides investment advisory, collateral management or other similar services to a subsidiary of ours, we intend to reduce the base management fee by an amount equal to the product of (1) the total fees paid to GC Advisors by such subsidiary for such services and (2) the percentage of such subsidiary's total equity that is owned, directly or indirectly, by us.

We also entered into the Administration Agreement with GC Service as our administrator on April 14, 2010. Under the Administration Agreement, GC Service furnishes us with office facilities and equipment, provides us clerical, bookkeeping and record keeping services at such facilities and provides us with other administrative services necessary to conduct our day-to-day operations. We reimburse GC Service for the allocable portion (subject to the review and approval of our board of directors) of overhead and other expenses incurred by it in performing its obligations under the Administration Agreement, including rent, the fees and expenses associated with performing compliance functions and our allocable portion of the cost of our chief financial officer and chief compliance officer and their respective staffs. GC Service also provides on our behalf significant managerial assistance to those portfolio companies to which we are required to offer to provide such assistance.

If any of the contractual obligations discussed above are terminated, our costs under any new agreements that we enter into may increase. In addition, we would likely incur significant time and expense in locating alternative parties to provide the services we receive under our Investment Advisory Agreement and our Administration Agreement. Any new investment advisory agreement would also be subject to approval by our stockholders.

Distributions

In order to qualify as a RIC and to avoid corporate-level U.S. federal income tax on the income we distribute to our stockholders, we are required under the Code to distribute at least 90% of our net ordinary income and net short-term capital gains in excess of net long-term capital losses, if any, to our net stockholders on an annual basis. Additionally, we must meet the annual distribution requirements of the U.S. federal excise tax rules. We intend to distribute quarterly distributions to our stockholders as determined by our board of directors.

We may not be able to achieve operating results that will allow us to make distributions at a specific level or to increase the amount of our distributions from time to time. In addition, we may be limited in our ability to make distributions due to the asset coverage requirements applicable to us as a business development company under the 1940 Act. If we do not distribute a certain percentage of our income annually, we will suffer adverse U.S. federal income tax consequences, including the possible loss of our qualification as a RIC. We cannot assure stockholders that they will receive any distributions.

To the extent our taxable earnings fall below the total amount of our distributions for that fiscal year, a portion of those distributions may be deemed a return of capital to our stockholders for U.S. federal income tax purposes. Thus, the source of a distribution to our stockholders may be the original capital invested by the stockholder rather than our income or gains. Stockholders should read any written disclosure accompanying a dividend payment carefully and should not assume that the source of any distribution is our ordinary income or gains. We believe a portion of the distributions paid to stockholders for the quarter ended June 30, 2012 represented a return of capital.

We have adopted an “opt out” dividend reinvestment plan for our common stockholders. As a result, if we declare a distribution, then our stockholders’ cash distributions will be automatically reinvested in additional shares of our common stock unless a stockholder specifically “opts out” of our dividend reinvestment plan. If a stockholder opts out, that stockholder will receive cash distributions. Although distributions paid in the form of additional shares of our common stock will generally be subject to U.S. federal, state and local taxes in the same manner as cash distributions, stockholders participating in our dividend reinvestment plan will not receive any corresponding cash distributions with which to pay any such applicable taxes.

Related Party Transactions

We have entered into a number of business relationships with affiliated or related parties, including the following:

We have entered into the Investment Advisory Agreement with GC Advisors. Mr. Lawrence Golub, our chairman, is a manager of GC Advisors, and Mr. David Golub, our chief executive officer, is a manager of GC Advisors, and each of Messrs. Lawrence Golub and David Golub owns an indirect pecuniary interest in GC Advisors.

GC Service provides us with the office facilities and administrative services necessary to conduct day-to-day operations pursuant to our Administration Agreement.

We have entered into a license agreement with Golub Capital LLC, pursuant to which Golub Capital LLC has granted us a non-exclusive, royalty-free license to use the name "Golub Capital."

Under a staffing agreement, or Staffing Agreement, between Golub Capital and GC Advisors, Golub Capital has agreed to provide GC Advisors with the resources necessary to fulfill its obligations under the Investment Advisory Agreement. The Staffing Agreement provides that Golub Capital will make available to GC Advisors experienced investment professionals and access to the senior investment personnel of Golub Capital for purposes of evaluating, negotiating, structuring, closing and monitoring our investments. The Staffing Agreement also includes a commitment that the members of GC Advisors' investment committee will serve in such capacity. Services under the Staffing Agreement are provided on a direct cost reimbursement basis.

In our common stock offering that closed on February 3, 2012, Golub Capital Employee Grant Program Rabbi Trust, a trust organized for the purpose of awarding equity incentive compensation to employees of Golub Capital, purchased an aggregate of \$3.1 million of shares at the public offering price per share. In addition, in the same offering, Mr. William M. Webster IV, one of our directors, purchased 15,000 shares at the public offering price per share, and Mr. John T. Baily, one of our directors, purchased \$75,000 of shares at the public offering price per share. The same trust also invested \$3.1 million through open market purchases from March 1, 2012 through June 30, 2012.

GC Advisors irrevocably waived \$0.6 million of the incentive fee payable by us to GC Advisors for the three months ended December 31, 2011, representing the difference between (1) the incentive fee attributable to the TRS if the spread between the interest received on the reference assets underlying the TRS and the interest paid to Citibank on the settled notional value of the TRS were to be treated as part of the income component of the incentive fee and (2) the incentive fee attributable to the TRS if such interest spread were to be treated as part of the capital gains component of such incentive fee.

GC Advisors also sponsors or manages, and may in the future sponsor or manage, other investment funds, accounts or investment vehicles, collectively referred to as accounts, that have investment mandates that are similar, in whole or in part, with ours. GC Advisors and its affiliates may determine that an investment is appropriate for us and for one or more of those other accounts. In such event, depending on the availability of such investment and other appropriate factors, and pursuant to GC Advisors' allocation policy, GC Advisors or its affiliates may determine that we should invest side-by-side with one or more other accounts. We do not intend to make any investments if they are not permitted by applicable law and interpretive positions of the SEC and its Staff, or if they are inconsistent with GC Advisors' allocation procedures.

In addition, we have adopted a formal code of ethics that governs the conduct of our and GC Advisors' officers, directors and employees. Our officers and directors also remain subject to the duties imposed by both the 1940 Act and the General Corporation Law of the State of Delaware.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the periods reported. Actual results could materially differ from those estimates. We have identified the following items as critical accounting policies.

Valuation of Investments

We value investments for which market quotations are readily available at their market quotations. However, a readily available market value is not expected to exist for many of the investments in our portfolio, and we value these portfolio investments at fair value as determined in good faith by our board of directors under our valuation policy and process. We may seek pricing information with respect to certain of our investments from pricing services or brokers or dealers in order to value such investments. We also employ independent third party valuation firms for all of our investments for which there is not a readily available market value.

Valuation methods may include comparisons of the portfolio companies to peer companies that are public, the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings, discounted cash flow, the markets in which the portfolio company does business and other relevant factors. When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we will consider the pricing indicated by the external event to corroborate the private equity valuation. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the investments may differ significantly from the values that would have been used had a readily available market value existed for such investments and may differ materially from values that may ultimately be received or settled.

Our board of directors is ultimately and solely responsible for determining, in good faith, the fair value of investments that are not publicly traded, whose market prices are not readily available on a quarterly basis or any other situation where portfolio investments require a fair value determination.

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

- Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals of GC Advisors responsible for credit monitoring.
- Preliminary valuation conclusions are then documented and discussed with our senior management and GC Advisors.
- The audit committee of our board of directors reviews these preliminary valuations.

· At least once annually, the valuation for each portfolio investment is reviewed by an independent valuation firm. Our board of directors discusses valuations and determines the fair value of each investment in our portfolio in good faith.

The factors that are taken into account in fair value pricing investments include: available current market data, including relevant and applicable market trading and transaction comparables; applicable market yields and multiples; security covenants; call protection provisions; information rights; the nature and realizable value of any collateral; the portfolio company's ability to make payments, its earnings and discounted cash flows and the markets in which it does business; comparisons of financial ratios of peer companies that are public; comparable merger and acquisition transactions; and the principal market and enterprise values.

Determination of fair values involves subjective judgments and estimates not verifiable by auditing procedures. Under current auditing standards, the notes to our consolidated financial statements refer to the uncertainty with respect to the possible effect of such valuations, and any change in such valuations, on our consolidated financial statements.

We follow Accounting Standards Codification Topic 820, *Fair Value Measurements and Disclosures*, as amended, for measuring fair value. Fair value is the price that would be received in the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Where available, fair value is based on observable market prices or parameters, or derived from such prices or parameters. Where observable prices or inputs are not available, valuation models are applied. These valuation models involve some level of management estimation and judgment, the degree of which is dependent on the price transparency for the assets or liabilities or market and the assets' or liabilities' complexity. Our fair value analysis includes an analysis of the value of any unfunded loan commitments. Assets and liabilities are categorized for disclosure purposes based upon the level of judgment associated with the inputs used to measure their value. The valuation hierarchical levels are based upon the transparency of the inputs to the valuation of the asset or liability as of the measurement date. The three levels are defined as follows:

Level 1: Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date.

Level 2: Inputs include quoted prices for similar assets or liabilities in active markets and inputs that are observable for the assets or liabilities, either directly or indirectly, for substantially the full term of the assets or liabilities.

Level 3: Inputs include significant unobservable inputs for the assets or liabilities and include situations where there is little, if any, market activity for the assets or liabilities. The inputs into the determination of fair value are based upon the best information available and may require significant management judgment or estimation.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an asset's or a liability's categorization within the fair value hierarchy is based on the lowest level of input that is

significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and we consider factors specific to the asset or liability. We assess the levels of investments at each measurement date, and transfers between levels are recognized on the actual date of the event or change in circumstances that caused the transfers. There were no transfers among Level 1, 2 and 3 investments during the nine months ended June 30, 2012 and 2011. The following section describes the valuation techniques used by us to measure different assets and liabilities at fair value and includes the level within the fair value hierarchy in which the assets and liabilities are categorized.

Cash and cash equivalents held at large financial institutions and futures contracts that are valued based on quoted market prices in active markets are categorized in Level 1 of the fair value hierarchy. All other assets and liabilities as of June 30, 2012 and September 30, 2011 were valued using Level 3 inputs of the fair value hierarchy. Level 1 assets and liabilities are valued using quoted market prices. Level 2 assets and liabilities are valued using market consensus prices that are corroborated by observable market data and quoted market prices for similar assets and liabilities. Level 3 assets and liabilities are valued at fair value as determined in good faith by our board of directors, based on input of management, the audit committee and independent valuation firms that have been engaged at the direction of our board of directors to assist in the valuation of each portfolio investment without a readily available market quotation at least once during a trailing twelve-month period under a valuation policy and a consistently applied valuation process. This valuation process is conducted at the end of each fiscal quarter, with approximately 25% (based on fair value) of our valuation of debt and equity securities without readily available market quotations subject to review by an independent valuation firm.

When valuing Level 3 debt and equity investments, we may take into account the following factors, where relevant, in determining the fair value of the investments: the enterprise value of a portfolio company, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flows, the markets in which the portfolio company does business, comparisons to publicly traded securities, and changes in the interest rate environment and the credit markets generally that may affect the price at which similar investments may be made and other relevant factors. In addition, for certain debt and equity investments, we may base our valuation on indicative bid and ask prices provided by an independent third party pricing service. Bid prices reflect the highest price that we and others may be willing to pay. Ask prices represent the lowest price that we and others may be willing to accept for an investment. We generally use the midpoint of the bid/ask range as our best estimate of fair value of such investment.

Fair value of our debt is estimated by discounting remaining payments using applicable market rates or market quotes for similar instruments at the measurement date, if available.

Due to the inherent uncertainty of determining the fair value of Level 3 assets and liabilities that do not have a readily available market value, the fair value of the assets and liabilities may differ significantly from the values that would have been used had a market existed for such assets and liabilities and may differ materially from the values that may ultimately be received or settled. Further, such assets and liabilities are generally subject to legal and other restrictions or otherwise are less liquid than publicly traded instruments. If we were required to liquidate a portfolio investment in a forced or liquidation sale, we may realize significantly less than the value at which such investment had previously been recorded.

Our investments, borrowings and derivatives are subject to market risk. Market risk is the potential for changes in the value due to market changes. Market risk is directly impacted by the volatility and liquidity in the markets in which the investments, borrowings and derivatives are traded.

Revenue Recognition:

Our revenue recognition policies are as follows:

Investments and Related Investment Income: Our board of directors determines the fair value of our portfolio of investments. Interest income is accrued based upon the outstanding principal amount and contractual interest terms of debt investments. Premiums, discounts, and origination fees are amortized or accreted into interest income over the life of the respective debt investment. For investments with contractual PIK interest, which represents contractual interest accrued and added to the principal balance that generally becomes due at maturity, we do not accrue PIK interest if the portfolio company valuation indicates that the PIK is not likely to be collectible. Dividend income on

preferred equity securities is recorded as dividend income on an accrual basis to the extent that such amounts are payable by the portfolio company and are expected to be collected. Dividend income on common equity securities is recorded on the record date for private portfolio companies or on the ex-dividend date for publicly traded portfolio companies.

We account for investment transactions on a trade-date basis. Realized gains or losses on investments are measured by the difference between the net proceeds from the disposition and the cost basis of investment, without regard to unrealized gains or losses previously recognized. We report changes in fair value of investments that are measured at fair value as a component of the net change in unrealized appreciation (depreciation) on investments in our consolidated statement of operations.

We record the fair value of the futures contracts based on the unrealized gain or loss of the reference securities of the futures contracts. Upon maturity or settlement of the futures contracts, we will realize a gain or loss based on the difference of the fair value of the futures contracts at inception and the fair value of the futures contracts at settlement or maturity. This gain or loss would be included on the consolidated statements of operations as net realized gain (loss) on derivative instruments.

We recorded the fair value of our investment in the TRS based on the unrealized gain or loss of the reference securities of the TRS. For GAAP purposes, realized gains and losses on the TRS were composed of any gains or losses on the referenced portfolio of loans as well as the net interest received or owed at the time of the quarterly settlement. For GAAP purposes, unrealized gains and losses on the TRS were composed of the net interest income earned or interest expense owed during the period that was not previously settled as well as the change in fair value of the referenced portfolio of loans.

Non-accrual: Loans may be left on accrual status during the period we are pursuing repayment of the loan. Management reviews all loans that become past due 90 days or more on principal and interest or when there is reasonable doubt that principal or interest will be collected for possible placement on non-accrual status. We generally reverse accrued interest when a loan is placed on non-accrual. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment. We restore non-accrual loans to accrual status when past due principal and interest is paid and, in our management's judgment, are likely to remain current. The total fair value of our non-accrual loans was \$4.2 million and \$2.9 million as of June 30, 2012 and September 30, 2011, respectively.

Income taxes:

We have elected to be treated as a RIC under Subchapter M of the Code and operate in a manner so as to qualify for the U.S. federal income tax treatment applicable to RICs. In order to qualify as a RIC, we are required to meet certain source of income and asset diversification requirements and timely distribute to our stockholders at least 90% of investment company taxable income, as defined by the Code, each year. We have made and intend to continue to make the requisite distributions to our stockholders, which will generally relieve us from U.S. federal income taxes.

Depending on the level of taxable income earned in a tax year, we may choose to carry forward taxable income in excess of current year distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that we determine that our estimated current year annual taxable income will be in excess of estimated current year distributions, we accrue excise tax, if any, on estimated excess taxable income as taxable income is earned.

Because U.S. federal income tax regulations differ from GAAP, distributions in accordance with such tax regulations may differ from net investment income and realized gains recognized for financial reporting purposes. Differences may be permanent or temporary. Permanent differences are reclassified within capital accounts in the financial statements to reflect their U.S. federal income tax character. Temporary differences arise when certain items of income, expense, gain or loss are recognized at some time in the future. Differences in classification may also result from the treatment of short-term gains as ordinary income for U.S. federal income tax purposes.

Item 3: Quantitative and Qualitative Disclosures About Market Risk.

We are subject to financial market risks, including changes in interest rates. During the period covered by our predecessor's financial statements, many of the loans in our portfolio had floating interest rates, and we expect that our loans in the future may also have floating interest rates. These loans are usually based on a floating LIBOR and typically have interest rate re-set provisions that adjust applicable interest rates under such loans to current market rates on a quarterly basis. In addition, the Class A Notes issued as a part of the Debt Securitization have a floating interest rate provision based on 3-month LIBOR that resets quarterly and the Credit Facility has a floating interest rate provision based on 1-month LIBOR that resets daily, and we expect that other credit facilities into which we enter in the future may have floating interest rate provisions.

Assuming that the consolidated statement of financial condition as of June 30, 2012 were to remain constant and that we took no actions to alter our existing interest rate sensitivity, the following table shows the annualized impact of hypothetical base rate changes in interest rates.

Change in interest rates	Increase (decrease) in interest income (in thousands)	Increase (decrease) in interest expense	Net increase (decrease)
Down 25 basis points	\$(105)	\$ (516)	\$ 411
Up 100 basis points	677	2,063	(1,386)
Up 200 basis points	5,473	4,126	1,347
Up 300 basis points	10,800	6,189	4,611

Although we believe that this analysis is indicative of our existing sensitivity to interest rate changes, it does not adjust for changes in the credit market, credit quality, the size and composition of the assets in our portfolio and other business developments, including borrowing under the Debt Securitization or other borrowings, that could affect net increase in net assets resulting from operations, or net income. Accordingly, we can offer no assurances that actual results would not differ materially from the analysis above.

We entered into ten-year U.S. Treasury futures contracts to mitigate our risks associated with a rising ten-year U.S. Treasury rate. These futures contracts insulate us against adverse changes in such rate, but also limit our ability to participate in the benefits of lower interest rates.

We may in the future hedge against interest rate fluctuations by using standard hedging instruments such as futures, options and forward contracts. While hedging activities may insulate us against adverse changes in interest rates, they may also limit our ability to participate in the benefits of lower interest rates with respect to the investments in our portfolio with fixed interest rates.

Item 4: Controls and Procedures.

As of the period covered by this report, we, including our chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act). Based on our evaluation, our management, including the chief executive officer and chief financial officer, concluded that our disclosure controls and procedures were effective in timely alerting management, including the chief executive officer and chief financial officer, of material information about us required to be included in our periodic SEC filings. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, are based upon certain assumptions about the likelihood of future events and can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. There has not been any change in our internal controls over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal controls over financial reporting.

Part II – Other Information

Item 1: Legal Proceedings.

Although we may, from time to time, be involved in litigation arising out of our operations in the normal course of business or otherwise, we are currently not a party to any pending material legal proceedings.

Item 1A: Risk Factors.

None.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds.

None.

Item 3: Defaults Upon Senior Securities.

None.

Item 4: Removed and Reserved.

Item 5: Other Information.

None.

Item 6: Exhibits.

EXHIBIT INDEX

Number	Description
--------	-------------

31.1	Certifications by Chief Executive Officer pursuant to Exchange Act Rule 13a-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002*
31.2	Certifications by Chief Financial Officer pursuant to Exchange Act Rule 13a-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002*
32.1	Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002*
