

DERMA SCIENCES, INC.
Form 10-K
March 11, 2015

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the fiscal year ended
^XDecember 31, 2014

..Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the transition period
from _____ to _____

Commission file number: 1-31070

DERMA SCIENCES, INC.

(Name of Issuer in Its Charter)

Delaware	23-2328753
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

214 Carnegie Center, Suite 300, Princeton, New Jersey	08540
(Address of principal executive offices)	(Zip code)

Registrant's telephone number: (609) 514-4744

Securities registered under Section 12(b) of the Exchange Act:

Edgar Filing: DERMA SCIENCES, INC. - Form 10-K

Title of each class Name of each exchange on which registered

Common Stock, \$.01 par value The NASDAQ Stock Market LLC

Securities registered under Section 12(g) of the Exchange Act:

None.

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Indicate by checkmark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files).

Yes No

Indicate by checkmark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: DERMA SCIENCES, INC. - Form 10-K

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act).

Yes No

The aggregate market value of the common equity stock held by non-affiliates, computed by reference to the average bid and asked prices of such stock as of June 30, 2014, was approximately \$235,667,000.

The number of shares outstanding of the issuer's common equity as of March 10, 2015 was 25,701,011.

Documents Incorporated by Reference

Portions of the Registrant’s definitive proxy statement for its 2015 annual meeting of stockholders are incorporated by reference in Part III of this report.

Cautionary Statement Regarding Forward-Looking Statements

This annual report on Form 10-K includes certain “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements include, but are not limited to, statements about the confidence, strategies, plans, expectations, intentions, objectives, technologies, opportunities, market demand or acceptance of new or existing products of the Company, and other statements contained in this annual report that are not historical facts. Forward-looking statements in this annual report or hereafter included in other publicly available documents filed with the Securities and Exchange Commission reports to our stockholders and other publicly available statements issued or released by us involve known and unknown risks, uncertainties and other factors that could cause our actual results, performance (financial or operating) or achievements to differ from the future results, performance (financial or operating) or achievements expressed or implied by such forward-looking statements. Such future results are based upon management's best estimates, current conditions and the most recent results of operations. When used in this annual report, the words “expect,” “anticipate,” “intend,” “plan,” “believe,” “seek,” “estimate” and similar expressions are generally intended to identify forward-looking statements, because these forward-looking statements involve risks and uncertainties. There are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements, including our plans, objectives, expectations and intentions, changes in political, economic, business, competitive, market and regulatory factors and other factors that are discussed under the section in this annual report entitled “Risk Factors.” Neither we nor any other person assume responsibility for the accuracy or completeness of these forward-looking statements. We are under no duty to update any of the forward-looking statements after the date of this annual report to conform these statements to actual results.

Part I

Item 1. Business

Overview

Derma Sciences, Inc. (“Derma Sciences”) and its subsidiaries Sunshine Products, Inc., Derma Sciences Canada Inc., Derma First Aid Products, Inc., MedEfficiency, Inc. and Derma Sciences Europe, Ltd., are referred to collectively as “we,” “our,” “us” and the “Company.” Our executive offices are located at 214 Carnegie Center, Suite 300, Princeton, New Jersey 08540. Derma Sciences was incorporated under the laws of Colorado on September 10, 1984. On June 3, 1996, we changed our state of domicile to Pennsylvania and on September 14, 2012, we changed our state of domicile to Delaware.

Derma Sciences is a tissue regeneration company focused on three segments of the wound care marketplace: pharmaceutical wound care, advanced wound care and traditional wound care products. Our strategic objectives are to grow the Company by continuing to progress the development of DSC127, our angiotensin analog pharmaceutical compound with an initial indication for the treatment of diabetic foot ulcers, growing and expanding our existing line of novel advanced wound care products and managing our traditional wound care products to sustain and grow this line where possible, while deploying the appropriate amount of human and financial resources available. The Company maintains manufacturing facilities in Toronto, Canada and Nantong, China and a well-established network of third party suppliers for its products. The majority of our products are sold through distributors to various health care providers such as wound care centers, extended care facilities, acute care facilities, home health care agencies and physicians' offices. Certain products are sold directly to care givers and through retail channels. The Company markets its products principally through direct sales representatives in the United States (the "U.S."), Canada and the United Kingdom (the "U.K."), and through independent distributors within other select international markets.

Products

Pharmaceutical Wound Care

In 2013, we commenced a Phase 3 clinical trial for DSC127, an angiotensin analog licensed from the University of Southern California for the treatment of diabetic foot ulcers. The compound has been shown to improve epithelialization, granulation and vascularization, accelerating wound healing in a variety of normal and diabetic models. This finding suggests that DSC127 produces different actions at the wound site during various stages of healing. DSC127 has successfully completed a Phase 1 study in healthy volunteers and a Phase 2 study on patients with diabetic foot ulcers. Full results of the study were published by a major international advanced wound care journal in July 2012 (*Wound Repair and Regeneration* 20:482-490). There were no safety concerns observed in the preclinical, Phase 1 and Phase 2 trials of DSC127 for diabetic foot ulcers.

If the Phase 3 clinical trial for diabetic foot ulcers is successful, we believe the commercial launch of this product is three to four years away.

Beyond the initial indication for diabetic foot ulcers, we have begun preclinical testing for scar reduction. We anticipate having the results of this study in 2015. In addition, we are presently evaluating the feasibility of initiating clinical testing for radiation dermatitis using this angiotensin analog. Testing has been ongoing since 2011 for the treatment and/or prevention of tissue damage related to radiation exposure as a result of a nuclear attack. A grant for up to \$14 million was made available for this testing by Biomedical Advanced Research and Development Authority ("BARDA") to our development partners, US Biotest, the inventors of the angiotensin analog.

Program spending by trial are outlined below (\$'s 000's):

	Program To Date	2014	2013	2012
P3 DFU trial	\$ 37,498	\$ 18,219	\$ 11,336	\$ 7,123
Pre-clinical Scar	594	594	-	-
Total	\$ 38,092	\$ 18,813	\$ 11,336	\$ 7,123

Pending NDA approval for each respective indication, the potential markets for this compound are significant.

Advanced Wound Care

Our advanced wound care product line consists of the following:

MEDIHONEY offers a line of patented dressings, comprised of Active *Leptospermum* Honey. *MEDIHONEY* dressings are ideal for the management of non-chronic and hard-to-heal wounds including chronic ulcers, burns and post-operative wounds. The dressings are non-toxic and have been shown in a large scale, randomized controlled study to promote healing.

TCC-EZ is a patented market leading off-loading system for patients with diabetic foot ulcers. Total contact casting (TCC) has been shown in multiple randomized controlled studies to achieve 89% healing rates. However, traditional

TCC is utilized in a small percentage of cases (< 5%) due to various factors, such as long application times, frequency of application error and patient dissatisfaction as a result of the heavy nature of the cast. *TCC-EZ* virtually eliminates these issues as it can be applied in less than one-third the time of a traditional TCC. *TCC-EZ* allows for a much more simplified process, so application errors are less common, and the cast itself is significantly lighter than a traditional TCC cast, due to its open weave pattern.

AMNIOEXCEL and *AMNIOMATRIX* represent our entry into the \$500 million skin substitute market. *AMNIOEXCEL* is an amniotic extracellular membrane product that is a sterile, room-temperature stable, re-absorbable tissue allograft derived from human amnion, providing a natural scaffold for tissue repair, reconstruction and replacement. *AMNIOMATRIX* is a cryopreserved liquid allograft derived from human placenta tissue used as a wound covering in the treatment of localized tissue defects. The addressable skin substitute market includes traumatic injuries, burns, surgical wounds, complex chronic and acute wounds and other soft-tissue defects. As part of our commercialization efforts, we are required to fund clinical studies up to \$2,000,000 in support of these products. In 2014, we initiated and spent \$440,246 on diabetic foot and venous leg ulcer post marketing randomized controlled trials in support of our commercialization efforts.

XTRASORB provides a novel, proprietary line of dressings that utilizes super-absorbent polymer technologies. While other absorbing dressings currently on the market use open cell structures to capture fluid, *XTRASORB* dressings convert fluid within the dressings to a gel, thus locking the exudates into the dressings. *XTRASORB* dressings have a distinct advantage over alternative products due to their ability to absorb more fluid and segregate the fluid from the wound, thus avoiding further wound deterioration. Studies have shown these dressings are able to reduce wound exposure to harmful and damaging matrix metalloproteinases (“MMP’s”). These dressings can absorb excess wound fluid and compare favorably to the market leading dressings at a cost effective price point.

BIOGUARD is a line of patented primary and secondary dressings containing an active antimicrobial compound. This compound, a cationic biocide, is intrinsically bound to the dressing through a proprietary process that results in the inability for the compound to separate from the dressing. These dressings are ideal for prophylactic use in the prevention of hospital or community acquired infections through wound sites, especially for burns. The dressings have been shown to kill 99.9% of virulent bacteria such as methicillin resistant *staphylococcus aureus* (MRSA) in less than one minute.

Other advanced wound care products include *ALGICELL AG*, a proprietary antimicrobial dressing with ionic silver as its active ingredient; and a range of moist, occlusive dressings such as hydrocolloids, foams, hydrogels, alginates, additional silver antimicrobial dressings, cleansers and our proprietary *DERMAGRAN* products.

Our advanced wound care products are the main focus of our sales and marketing resources. Our promoted advanced wound care products are differentiated in the marketplace and carry higher gross profit margins. *MEDIHONEY* and *TCC-EZ* are our two largest selling products. These products, together with our *AMNIO* products, represent our major growth opportunities. We continue to evaluate synergistic products and technologies within the advanced wound care market for consideration in the expansion of our advanced wound care product line.

Traditional Wound Care

Our traditional wound care product line consists of the following:

A broad line of branded gauze sponges and bandages, non-adherent impregnated dressings, retention devices, paste bandages and other compression devices for the medical markets;

A broad line of branded and private-label adhesive bandages and related first aid products for the medical, industrial, private label and retail markets;

Private-label wound care products utilizing our manufacturing capabilities for a number of U. S. and international health care companies;

A line of rigid and proprietary flexible wound closure strips, nasal tube fasteners and a variety of catheter fasteners for the medical markets; and

A line of general purpose and specialized skin care products for the institutional medical market.

Our traditional wound care products are generally not differentiated in the marketplace and carry lower gross profit margins. We sell these products principally through distributors or, in the case of private label products, directly to customers on the basis of quality, price and customer service. At times, we have the opportunity to bundle these products with the sale of our advanced wound care products. As such, this product line does not require a significant investment in sales and marketing resources to sustain it. To the extent opportunities for growth are available, we will invest accordingly.

A breakdown of net sales between Advanced Wound Care and Traditional Wound Care are outlined below (\$'s 000's):

	2014	% of Total	2013	% of Total	2012	% of Total
Advanced Wound Care	\$38,111	45.5 %	\$33,929	42.6 %	\$24,833	34.2 %
Traditional Wound Care	\$45,635	54.5 %	\$45,782	57.4 %	\$47,815	65.8 %
Total	\$83,746		\$79,711		\$72,648	

Net sales by major world area are outlined below (\$'s 000's):

	2014	2013	2012
United States	\$63,325	\$61,235	\$51,325
Canada	\$11,860	\$11,084	\$14,759
Rest of World	\$8,561	\$7,392	\$6,564
Total	\$83,746	\$79,711	\$72,648

Rest of World is broken down and separately managed between Europe, Middle East and Africa (“EMEA”) and Asia, Pacific and Latin America (“APLA”).

Sales and Marketing

Our sales and marketing infrastructure is divided into two groups, Advanced Wound Care and Traditional Wound Care. The Advanced Wound Care group is comprised of the Group President and the sales and marketing infrastructure that supports the global sale of our advanced wound care products. This infrastructure includes the Company’s global advanced wound care marketing, clinical, product development and sales organizations. The Advanced Wound Care group’s principal objective is to create care giver demand for our products. The Traditional Wound Care group is comprised of the Group President and the global marketing and sales infrastructure that support the global sale of our traditional wound care products. This infrastructure includes the global commodity wound care, first aid products and contract manufacturing marketing and sales organizations, together with the corporate accounts team that supports both groups. The Traditional Wound Care group’s principal objective is to create distributor and private label demand for our products.

Marketing

Our Advanced Wound Care global marketing team is comprised of a vice president, four product managers and two graphic artists at corporate headquarters. While the majority of this teams’ time is spent supporting the U.S. market, they are also responsible for supporting our rest of world marketing efforts by working closely with local management.

Our Traditional Wound Care marketing efforts consist principally of direct expenses in support of the business. These efforts are for the most part managed by sales personnel. As needed, the advanced wound care team will assist with

creative marketing requirements.

Clinical

Our Advanced Wound Care global clinical team is located in the U.S. and is comprised of a director, five clinicians and a clinical project manager. The director and project manager are located at corporate headquarters, while the clinicians are geographically disbursed, with one to each of five sales regions. All team members contribute to the development of clinical evidence in support of our advanced wound care products, the process of which is managed by the project manager. While the majority of this teams' time is spent supporting the U.S. market, they are also responsible for supporting clinical efforts throughout the rest of the world by working closely with local management.

Product Development

In 2014, we added a product development manager to oversee and coordinate our advanced wound care product development efforts, working closely with our operations teams and licensors.

Sales

Our advanced wound care global sales team is comprised of a vice president and two sales administrators at corporate headquarters. In the U.S., our field sales force consists of five regions, each consisting of a regional manager, a product specialist and ten territory managers. Our EMEA sales team is comprised of a general manager and a sales administrator headquartered in the United Kingdom (“U.K.”). The general manager is responsible for managing a direct sales force of six in the U.K. consisting of a sales manager and five territory managers, together with distributor relationships throughout the rest of EMEA. Our APLA sales team is led by a vice president at corporate headquarters who is responsible for managing distributor relationships throughout APLA. In 2014 we added regional in-market sales support in South America and the Far East to further develop these markets.

Our traditional wound care sales team is comprised of a vice president of distribution and contract manufacturing, a vice president of first aid products and a vice president of corporate accounts located at corporate headquarters. The vice president of distribution and contract manufacturing is responsible for managing our U.S. distributor and global private label medical relationships. The vice president of first aid products, working with a number of independent brokers, is responsible for managing our branded and private label first aid business. The vice president of corporate accounts, working with two field directors and two sales operations specialists located at corporate headquarters, is responsible for managing our relationship with group purchasing organizations in the U.S., as well as providing sales analytics for sales management, commission and third party fee payment. Our Canada sales team reports directly to the Group President and is responsible for supporting both our advanced and traditional lines of products. The team is comprised of a sales manager and a sales administrator located in our Toronto sales office, together with three territory managers and a manufacturer’s representative covering the major population centers.

Competition

Many of our competitors are larger and have greater resources than we do. The advanced wound care sector of the global medical device marketplace is characterized by evolving technology and intense competition. We believe that we have assembled a broad range of proprietary advanced wound care products capable of effectively competing in the marketplace. We are recognized for both our entrepreneurial culture that cost effectively incubates product development and our ability to commercialize new advanced wound care products offering superior value. Our traditional wound care products compete in a very intense commodity oriented global marketplace. We offer a broad

range of traditional wound care products, some of which have a degree of product differentiation. While our competitors sell products that are in many respects comparable to ours, we have been successful in this environment selling our traditional wound care products on the basis of quality, price and customer service.

Product Sourcing

Our Operations team headquartered in Toronto, Canada manages our supply chain function which consists of internal product manufacturing, third party supply of product, regulatory, distribution and inventory management. Our main manufacturing facility is located in Toronto and manufactures a broad range of advanced and traditional wound care products. We have a small facility in Nantong, China which we use principally for low volume and labor intensive traditional wound care gauze products. We have a contract manufacturing relationship with a supplier in China for adhesive bandages and related first aid products and one in Mexico for paste bandages. All of these facilities are FDA registered and ISO certified.

A significant portion of our products are sourced directly from a long standing global network of third party suppliers. We require that all suppliers conform to the standards set forth in the Good Manufacturing Practice regulations promulgated by the FDA and local health agencies. The majority of these products are manufactured using readily available components. Accordingly, there are numerous companies capable of manufacturing these products to applicable specifications and regulatory standards.

We are contractually obligated to source the bulk honey used in our MEDIHONEY products exclusively from the product licensor. Both parties effectively manage demand versus capacity on a continuous basis and maintain adequate safety stock levels to guard against any interruption in supply. Other sources of bulk honey exist. Should the licensor be unable to supply, we have the right to source our requirements elsewhere.

We are contractually obligated to source a key component of our TCC-EZ product exclusively from the product licensor. Both parties effectively manage demand versus capacity on a continuous basis and we maintain a reasonable level of safety stock to guard against interruption in supply.

We are contractually obligated to source AMNIOEXCEL and AMNIOMATRIX products exclusively from the product licensor. Both parties effectively manage demand versus capacity on a continuous basis and maintain adequate safety stock levels to guard against any interruption in supply. The licensor has agreed to qualify and maintain a qualified back up supplier for these products to protect against a long term interruption in supply.

Given the oversight of our manufacturing facilities and our third party suppliers, the availability of other suppliers and our inventory management policy concerning safety stock levels, we do not believe that a temporary interruption of supply or the loss of one or more suppliers would have a long-term detrimental impact on our supply chain operations.

Derma Sciences is registered with the FDA and Health Canada. We hold the following ISO certifications: ISO 13485:2003, ISO9001:2008 and Directive 93/42/EEC. Derma Toronto and Nantong China have been recently inspected by the FDA and no violations were noted. Derma has also been inspected by various international regulatory agencies and customer audits and has consistently achieved very high compliance ratings.

Patents, Trademarks, Proprietary and Non-Proprietary Technology

We own or license a number of trademarks covering the Company and its products. In addition, we own or license over 50 U.S. patents, corresponding foreign patents and patent applications. The patents relating to the DSC127, MEDIHONEY, BIOGUARD, AMNIOEXCEL and AMNIOMATRIX technologies are held under license agreements of indefinite duration. We also have a number of non-patented formulations and process technologies that, together with the aforementioned patents, provide competitive advantages in the marketplace.

Government Regulation

The manufacture, distribution and advertising of our products are subject to various U.S. and foreign agencies. In addition, we are subject to regulation regarding occupational safety, laboratory practices, environmental protection and hazardous substance control and may be subject to other present and future U.S. and foreign regulations. We believe we are in compliance with all such laws, regulations and standards currently in effect and that the cost of continued compliance will not have a material adverse effect on us.

Employees

Derma Sciences had 299 full-time and 4 part-time employees at December 31, 2014. Of these employees, 156 are located in the U.S., 105 in Canada, 31 in China, ten in Europe and one in Korea. The Company considers employee relations to be satisfactory.

Available Information

We file reports with the Securities and Exchange Commission (the “SEC”), including our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished to the SEC pursuant to the requirements of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). The general public may read and copy any materials that we file with the SEC at the SEC’s Public Reference Room located at 100 F Street N.E., Washington, DC 20549. The public may also obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an internet site, www.sec.gov, which contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

You may also obtain copies of our annual reports on our website at www.dermasciences.com under the heading “Investor Relations.” The information disclosed on our website is not incorporated by this reference and is not a part of this Annual Report on Form 10-K. We make available on our website, free of charge, our annual reports on Form 10K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports, as soon as reasonably practicable after we electronically file with or furnish the reports to the SEC. The following corporate governance related documents are also available free on our website; Code of Ethics, Board Independency Guidelines, Audit Committee Charter, Compensation Committee Charter, and Nominating and Corporate Governance Committee Charter.

Item 1A. Risk Factors

We have a history of losses and can offer no assurance of future profitability.

We incurred net losses of \$39,771,555, \$23,964,053 and \$12,070,431 in 2014, 2013 and 2012, respectively, and additional losses in previous years. At December 31, 2014, we had an accumulated deficit of \$103,942,366. We cannot offer any assurance that we will be able to generate sustained or future earnings.

Our liquidity may be dependent upon amounts available through additional debt or equity financings.

We have a history of operating losses and negative cash flow from operating activities. As such, we have utilized funds from offerings of our equity securities to fund our operations. We have taken steps to improve our overall liquidity and believe we have sufficient liquidity to meet our needs for the next twelve months. However, in the event our cash flow from operating activities is insufficient to meet our requirements, we may be forced either to secure a line of credit or seek additional equity financing. The sale of additional securities could result in additional dilution to our stockholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financing covenants that would restrict our operations. There can be no assurance that such financing would be available or, if available, that such financing could be obtained upon terms acceptable to us.

The results of preclinical studies and completed clinical trials are not necessarily predictive of future results, and our current drug candidates may not have favorable results in later studies or trials.

Preclinical studies and Phase 1 and Phase 2 clinical trials are not primarily designed to test the efficacy of a drug candidate, but rather to test safety, to study pharmacokinetics and pharmacodynamics, and to understand the drug candidate's side effects at various doses and schedules. Favorable results in early studies or trials may not be repeated in later studies or trials, including continuing preclinical studies and large-scale Phase 3 clinical trials, and our drug candidates in later-stage trials may fail to show desired safety and efficacy despite having progressed through earlier-stage trials. Unfavorable results from ongoing preclinical studies or clinical trials could result in delays, modifications or abandonment of ongoing or future clinical trials, or abandonment of a clinical program. Preclinical and clinical results are frequently susceptible to varying interpretations that may delay, limit or prevent regulatory approvals or commercialization. Negative or inconclusive results or adverse medical events during a clinical trial could cause a clinical trial to be delayed, repeated or terminated, or a clinical program to be abandoned.

We rely on third parties to conduct our clinical trials and many of our preclinical studies. If those parties do not successfully carry out their contractual duties or meet expected deadlines, our drug candidates may not advance in a timely manner or at all.

In the course of our preclinical testing and clinical trials, we rely on third parties, including laboratories, investigators, clinical contract research organizations (“CROs”), and manufacturers, to perform critical services for us. For example, we rely on third parties to conduct our clinical trials and many of our preclinical studies. CROs are responsible for many aspects of the trials, including finding and enrolling subjects for testing and administering the trials. Although we rely on these third parties to conduct our clinical trials, we are responsible for ensuring that each of our clinical trials is conducted in accordance with its investigational plan and protocol. Moreover, the FDA and foreign regulatory authorities require us to comply with regulations and standards, commonly referred to as good clinical practices, or GCPs, for conducting, monitoring, recording, and reporting the results of clinical trials to ensure that the data and results are scientifically credible and accurate, and that the trial subjects are adequately informed of the potential risks of participating in clinical trials. Our reliance on third parties does not relieve us of these responsibilities and requirements. These third parties may not be available when we need them or, if they are available, may not comply with all regulatory and contractual requirements or may not otherwise perform their services in a timely or acceptable manner, and we may need to enter into new arrangements with alternative third parties and our clinical trials may be extended, delayed or terminated. These independent third parties may also have relationships with other commercial entities, some of which may compete with us. In addition, if such third parties fail to perform their obligations in compliance with our clinical trial protocols or GCPs, our clinical trials may not meet regulatory requirements or may need to be repeated. As a result of our dependence on third parties, we may face delays or failures outside of our direct control. These risks also apply to the development activities of collaborators, and we do not control their research and development, clinical trial or regulatory activities.

Our foreign operations are essential to our economic success and are subject to various unique risks.

Our future operations and earnings will depend to a large extent on the results of our international operations and our ability to maintain a continuous supply of wound care products from our international operations and suppliers. While we do not envision any adverse change to our international operations or suppliers, adverse changes to these operations, as a result of political, governmental, regulatory, economic, exchange rate, labor, logistical or other factors, could have a material adverse effect on our future operating results.

The rate of reimbursement for the purchase of our products by government and private insurance is subject to change.

Sales of several of our wound care products depend partly on the ability of our customers to obtain reimbursement for the cost of our products from government health administration agencies such as Medicare and Medicaid and other Global Government Authorities. Government health administration agencies and private insurance firms continuously seek to reduce healthcare costs. Our ability to commercialize our products successfully will depend in part on the extent to which reimbursement for the costs of such products and related treatments will be available from government health administration authorities, private health insurers and other third-party payors. Significant uncertainty exists as to the reimbursement status of newly approved medical products. The continuing efforts of the government, insurance companies, managed care organizations and other payors of healthcare services to contain or reduce costs of healthcare may adversely affect:

- Our ability to set a price we believe is fair for our products;
- Our ability to generate revenues or achieve or maintain profitability; and
- The availability to us of capital.

Payors are increasingly attempting to contain healthcare costs by limiting both coverage, which requires clinical data and the level of reimbursement, particularly for new therapeutic products or where fiduciary parties, including third party payors perceive that the target indication of the new product is well served by existing drugs or other treatments. Accordingly, even if coverage and reimbursement are provided, market acceptance of our products would be adversely affected if the amount of coverage and/or reimbursement available for the use of our products proved to be administratively burdensome or unprofitable for healthcare providers or less profitable than alternative treatments. In addition, reimbursement from Medicare, Medicaid and other third-party payors may be subject to periodic adjustments as a result of legislative, regulatory and policy changes as well as budgetary pressures. Possible reductions in, or eliminations of, coverage or reimbursement by third-party payors, or denial of, or provision of uneconomical reimbursement for new products, as a result of these changes may affect our customers' revenue and ability to purchase our products. Any changes in the healthcare regulatory, payment or enforcement landscape relative to our customers' healthcare services has the potential to significantly affect our operations and revenue.

There have been federal and state legislation changes which have subjected the pricing of healthcare goods and services to government control and made other changes to the U.S. healthcare system. While we cannot predict the outcome of current or future legislation, we anticipate, particularly given the recent enactment of healthcare reform legislation that Governmental Authorities will continue to introduce initiatives directed at lowering the total cost of healthcare. In addition, in certain foreign markets the pricing of drugs is subject to government control and reimbursement may in some cases be unavailable or insufficient. It is uncertain if future legislation, whether domestic or abroad, will be adopted that might affect our products. It is also uncertain what actions government including, federal and/or state, or private payors for healthcare treatment and services may take in response to any such healthcare reform proposals or legislation. Any such healthcare reforms could have a material and adverse effect on the marketability of any products for which we ultimately receive FDA or other regulatory agency clearance/approval or for which we receive government sponsored reimbursements.

Our success may depend upon our ability to protect our patents and proprietary technology.

We own patents, both in the U.S. and abroad, for several of our products, and rely upon the protection afforded by our patents and trade secrets to protect our technology. Our future success may depend upon our ability to protect our intellectual property. However, the enforcement of intellectual property rights can be both expensive and time consuming. Therefore, we may not be able to devote the resources necessary to prevent infringement of our intellectual property. Also, our competitors may develop or acquire substantially similar technologies without infringing our patents or trade secrets. For these reasons, we cannot be certain that our patents and proprietary technology will provide us with a competitive advantage.

Government regulation plays a significant role in our ability to develop, manufacture, and market products.

Government regulation by the U.S. FDA and similar agencies in other countries is a significant factor in the development, manufacturing and marketing of many of our products and in our acquisition or licensing of new products. Complying with government regulations is often time consuming and expensive and may involve delays or actions adversely impacting the marketing and sale of our current or future products.

A significant portion of our products are sourced from third parties.

A significant portion of our products are sourced in raw, semi-finished and finished form directly from third party suppliers. None of these sourced products presently account for more than 10% of our sales with the exception of *MEDIHONEY* and *TCC-EZ*. We maintain good relations with our third party suppliers. With the exception of *MEDIHONEY*, *TCC-EZ* and our AMNIO Products there are several third party suppliers available for each of our products. If a current supplier were unable or unwilling to continue to supply our products, sale of the affected products could be delayed for the period necessary to secure a replacement.

The technology utilized in many of our advanced wound care products is licensed from third parties and could become unavailable.

A significant percentage of our advanced wound care products utilize technology that we license on an exclusive basis from third parties. These products include *MEDIHONEY* dressings, *BIOGUARD* dressings, *TCC-EZ* total contact casts and our AMNIO Products. The licensing agreements that we have with the owner of the *TCC-EZ* technology is of limited duration and renewal of the agreement is at the discretion of the licensor. In addition, in some instances, the maintenance of the license agreements requires that we meet various minimum sales and/or minimum royalty requirements. If we fail to meet the minimum sales or minimum royalty requirements of a given license agreement, there is a possibility that the agreement will be cancelled or not renewed or that our exclusivity under the license agreement will be withdrawn. If any of these events were to occur, our ability to sell the products utilizing the licensed technology could be lost or compromised and our revenues and potential profits could be adversely affected.

Competitors could invent products superior to ours and cause our products and technology to become obsolete.

The wound care sector of the medical products industry is characterized by rapidly evolving technology and intense competition. Our competitors currently manufacture and distribute a variety of products that are in many respects comparable to our products. Many suppliers of competing products are considerably larger and have much greater

resources than we do. In addition, many specialized products companies have formed collaborations with large, established companies to support research, development and commercialization of wound care products which may be competitive with ours. Academic institutions, government agencies and other public and private research organizations are also conducting research activities and may commercialize wound care products on their own or through joint ventures. While we have no specific knowledge of products under development by our competitors, it is possible that these competitors may develop technologies and products that are more effective than any we currently have. If this occurs, any of our products and technology affected by these developments could become obsolete.

Although we are insured, any material product liability claims could adversely affect our business.

We sell over-the-counter products and medical devices and are exposed to the risk of lawsuits claiming alleged injury caused by our products. Among the grounds for potential claims against us are injuries due to alleged product inefficacy and injuries resulting from infection due to allegedly non-sterile products. Although we carry product liability insurance with limits of \$1.0 million per occurrence and \$2.0 million aggregate with \$10.0 million in umbrella coverage, this insurance may not be adequate to reimburse us for all damages that we could suffer as a result of successful product liability claims. Also, defending against a claim could be time consuming and costly. No material product liability claim has ever been made against us and we are not aware of any pending product liability claims. However, a successful material product liability suit could adversely affect our business.

We are subject to stringent medical device regulation and any adverse regulatory action may materially affect our financial condition and business operations.

Fraud, Abuse and False Claims

We are directly and indirectly subject to various federal and state laws governing relationships with healthcare providers and pertaining to healthcare fraud and abuse, including anti-kickback laws. In particular, the federal healthcare program Anti-Kickback Statute prohibits persons from knowingly and willfully soliciting, offering, receiving or providing remuneration, directly or indirectly, in exchange for or to induce either the referral of an individual, or the furnishing, arranging for or recommending a good or service for which payment may be made in whole or part under federal healthcare programs, such as the Medicare and Medicaid programs. Penalties for violations include criminal penalties and civil sanctions such as fines, imprisonment and possible exclusion from Medicare, Medicaid and other federal healthcare programs. The Anti-Kickback Statute is broad and prohibits many arrangements and practices that are lawful in businesses outside of the healthcare industry. In implementing the statute, the Office of Inspector General of the U.S. Department of Health and Human Services (“OIG”) has issued a series of regulations, known as the “safe harbors.” These safe harbors set forth provisions that, if all their applicable requirements are met, will assure healthcare providers and other parties that they will not be prosecuted under the Anti-Kickback Statute. The failure of a transaction or arrangement to fit precisely within one or more safe harbors does not necessarily mean that it is illegal or that prosecution will be pursued. However, conduct and business arrangements that do not fully satisfy each applicable element of a safe harbor may result in increased scrutiny by government enforcement authorities, such as the OIG. Many states have laws similar to the federal law.

The Federal False Claims Act (“FCA”) imposes civil liability on any person or entity that submits, or causes the submission of, a false or fraudulent claim to the U.S. Government. Damages under the FCA can be significant and consist of the imposition of fines and penalties. The FCA also allows a private individual or entity with knowledge of past or present fraud against the federal government to sue on behalf of the government to recover the civil penalties and treble damages. The U.S. Department of Justice (“DOJ”) on behalf of the government has previously alleged that the marketing and promotional practices of pharmaceutical and medical device manufacturers including the off-label promotion of products or the payment of prohibited kickbacks to doctors violated the FCA resulting in the submission of improper claims to federal and state healthcare entitlement programs such as Medicaid. In certain cases, manufacturers have entered into criminal and civil settlements with the federal government under which they entered into plea agreements, paid substantial monetary amounts and entered into corporate integrity agreements that require, among other things, substantial reporting and remedial actions going forward.

The FDA has been increasing its scrutiny of the medical device industry and the government is expected to continue to scrutinize the industry closely with inspections, and possibly enforcement actions, by the FDA or other agencies. Additionally, the FDA may restrict manufacturing and impose other operating restrictions, enjoin and restrain certain violations of applicable law pertaining to medical devices, and assess civil or criminal penalties against our officers, employees, or us. The FDA may also recommend prosecution to the DOJ. Any adverse regulatory action, depending on its magnitude, may restrict us from effectively manufacturing, marketing and selling our products. In addition,

negative publicity and product liability claims resulting from any adverse regulatory action could have a material adverse effect on our financial condition and results of operations.

Tissue Product Regulations

Our AMNIOEXCEL® and AMNIOMATRIX® products are derived from human tissue. The FDA has specific regulations governing human cells, tissues and cellular and tissue-based products, (“HCT/Ps”). An HCT/P is a product containing or consisting of human cells or tissue intended for transplantation into a human patient. HCT/Ps that meet the criteria for regulation solely under Section 361 of the Public Health Service Act (so-called “361 HCT/Ps”) are not subject to any premarket clearance or approval requirements and are subject to less stringent post-market regulatory requirements. There can be no assurance that the FDA will not, at some future point, take the position that our current or any future tissue products do not qualify for regulation as 361 HCT/Ps. Any regulatory reclassification could have adverse consequences for us and make it more difficult or expensive for us to conduct our business by requiring premarket clearance or approval and compliance with additional post-market regulatory requirements with respect to those products. Moreover, increased regulatory scrutiny could lead to increased regulation of HCT/Ps, including 361 HCT/Ps. We also cannot assure you that the FDA will not impose more stringent definitions with respect to products that qualify as 361 HCT/Ps. For example, one of the regulatory criteria is that the HCT/P be “minimally manipulated”. The FDA has recently issued a draft guidance document interpreting this requirement.

The potential increase in common shares due to the conversion, exercise or vesting of outstanding dilutive securities may have a depressive effect upon the market value of our shares.

Up to 5,031,040 shares of our common stock were potentially issuable at December 31, 2014 upon the conversion, exercise or vesting of outstanding convertible preferred stock, warrants, options and restricted stock units. The shares of common stock potentially issuable upon conversion, exercise or vesting of these securities are substantial compared to the 25,319,203 shares of common stock outstanding at December 31, 2014.

Earnings per share of common stock may be substantially diluted by the existence of these dilutive securities regardless of whether they are converted, exercised or issued. This dilution of earnings per share could have a depressive effect upon the market value of our common stock.

Our stock price has been volatile and this volatility is likely to continue.

Historically, the market price of our common stock has been volatile. The high and low bid prices for the years 2010 through 2014 are set forth in the table below:

Derma Sciences, Inc.
Trading Range – Common Stock

	Year Low	High
2010	\$4.40	\$9.00
2011	\$4.50	\$12.72
2012	\$6.94	\$11.89
2013	\$9.93	\$15.45
2014	\$7.88	\$15.51

Events that may affect our common stock price include:

- Outcome of DSC127 development;
- Quarter to quarter variations in our operating results;
- Changes in earnings estimates by securities analysts;

- Changes in interest rates, exchange rates or other general economic conditions;
- Changes in market conditions in the wound care industry;
- Fluctuations in stock market prices and trading volumes of similar companies;
- Discussion of us or our stock price by the financial and scientific press and in online investor communities;
- Additions or departures of key personnel;
- Changes in third party reimbursement policies;
- The introduction of new products either by us or by our competitors; and
- The loss of a major customer.

Although publicly traded securities are subject to price and volume fluctuations, it is likely that our common stock will experience these fluctuations to a greater degree than the securities of more established and better capitalized organizations.

We have not paid, and we are unlikely to pay in the near future, cash dividends on our securities.

We have never paid any cash dividends on our common or preferred stock and do not anticipate paying cash dividends in the foreseeable future. The payment of dividends by us will depend on our future earnings, financial condition and such other business and economic factors as our management may consider relevant.

Our common stock does not have a vigorous trading market and you may not be able to sell your securities when desired.

We have a limited active public market for our common shares. We cannot assure you that a more active public market will develop thereby allowing you to sell large quantities of our shares. Consequently, you may not be able to readily liquidate your investment.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our headquarters are located in Princeton, New Jersey. In addition to the lease relative to our headquarters, we have entered into leases for office, manufacturing, and distribution facilities. Our facilities, locations, size, monthly rent and lease expirations are set forth in the table below:

Location	Use	Segment	Square Footage	Base Monthly Rent	Lease Expiration
Princeton, New Jersey	Corporate Headquarters	Other	15,065	\$ 54,420	November 2018
Fenton, Missouri	Distribution	Advanced and Traditional Wound Care	42,400	\$ 14,568	March 2021
Houston, Texas	Distribution	Traditional Wound Care	52,770	\$ 17,781	March 2020
Toronto, Canada	Manufacturing, Distribution & Offices	Advanced and Traditional Wound Care and Other	76,399	\$ 31,326	August 2017
Maidenhead, U.K.	Offices	Advanced and Traditional Wound Care	450	\$ 2,350	March 2016
Nantong, China	Manufacturing & Offices	Traditional Wound Care	11,388	\$ 2,065	December 2015

We believe that our facilities are adequate to meet our office, manufacturing and distribution requirements for the foreseeable future.

Item 3. Legal Proceedings

None.

Item 4. Mine Safety Disclosures

Not applicable.

14

Part II**Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock is traded on the NASDAQ Capital Market under the symbol “DSCI.” The following table sets forth the high and low bid prices for our common stock during each of the indicated calendar quarters:

Quarter Ended	High	Low
March 31, 2014	\$15.51	\$10.71
June 30, 2014	\$13.02	\$8.45
September 30, 2014	\$12.02	\$7.88
December 31, 2014	\$9.45	\$8.10
March 31, 2013	\$12.89	\$10.78
June 30, 2013	\$14.92	\$9.93
September 30, 2013	\$15.45	\$12.00
December 31, 2013	\$13.24	\$10.67

The stock prices reflect inter-dealer prices without retail mark-up, mark-down or commission and may not necessarily represent actual transactions. There is no public market for our preferred stock.

Holder of common stock. As of the close of business on March 10, 2015 there were approximately 738 holders of record of our common stock. We believe that the number of beneficial holders of our common stock is substantially greater. On March 10, 2015, the closing sales price of our common stock as reported on the NASDAQ Capital Market was \$7.40.

Dividends and dividend policy. We have never paid any cash dividends on our common stock and do not anticipate paying cash dividends in the foreseeable future. The payment of dividends by us will depend on our future earnings, financial condition and such other business and economic factors as our management may consider relevant.

Securities authorized for issuance under equity compensation plans. The information called for by this item is incorporated by reference to our definitive proxy statement relating to our 2015 annual meeting of stockholders, which we will file with the Securities and Exchange Commission within 120 days after December 31, 2014.

Recent sales of unregistered securities. All prior sales of unregistered securities have been previously reported on a quarterly report on Form 10-Q or a current report on Form 8-K.

Item 6. Selected Financial Data

The selected consolidated financial data presented below has been derived from our Consolidated Financial Statements for each of the periods indicated. The data set forth below is qualified by reference to and should be read in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our Consolidated Financial Statements included as Items 7 and 8, respectively, in this Annual Report.

	Selected Consolidated Financial Data				
	Year Ended December 31,				
	2014	2013	2012	2011	2010
Statement of Comprehensive Loss Data:					
Net sales	\$83,745,680	\$79,710,980	\$72,648,198	\$62,630,247	\$56,474,056

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion provides an analysis of the results for each of our segments, an overview of our liquidity and capital resources and other items related to our business for the years ended December 31, 2014, 2013 and 2012. It contains forward-looking statements about our future revenue, operating results and expectations. See “Cautionary Statement Regarding Forward-Looking Statements” and the section in this annual report entitled “Risk Factors” for a discussion of the risks, assumptions and uncertainties affecting these statements. This discussion and analysis should be read in conjunction with Part I of this annual report as well as our consolidated financial statements and notes thereto included in this annual report.

Year Ended December 31, 2014 Compared to Year Ended December 31, 2013Overview

The following table highlights the year ended December 31, 2014 versus 2013 operating results:

	Year Ended December 31,		Variance	
	2014	2013		
Gross sales	\$94,008,003	\$88,841,450	\$5,166,553	5.8 %
Sales adjustments	(10,262,323)	(9,130,470)	(1,131,853)	12.4 %
Net sales	83,745,680	79,710,980	4,034,700	5.1 %
Cost of sales	53,635,745	50,320,506	3,315,239	6.6 %
Gross profit	30,109,935	29,390,474	719,461	2.4 %
Selling, general and administrative expense	50,961,022	42,044,484	8,916,538	21.2 %
Research and development expense	19,253,059	11,335,672	7,917,387	69.8 %
Other income, net	(181,543)	(185,740)	4,197	*
Total expenses	70,032,538	53,194,416	16,838,122	31.7 %
Loss before income taxes	(39,922,603)	(23,803,942)	(16,118,661)	67.7 %
Income tax (benefit) provision	(151,048)	160,111	(311,159)	*
Net loss	\$(39,771,555)	\$(23,964,053)	\$(15,807,502)	66.0 %

* not meaningful

Gross to Net Sales Adjustments

Gross to net sales adjustments are comprised of the following:

	Year Ended December 31,	
	2014	2013
Gross sales	\$94,008,338	\$88,841,450
Trade rebates	(7,050,638)	(6,083,940)
Distributor fees	(1,083,584)	(984,947)
Sales incentives	(929,196)	(978,770)
Returns and allowances	(534,523)	(394,656)
Cash discounts	(664,717)	(688,157)
Total adjustments	(10,262,658)	(9,130,470)
Net sales	\$83,745,680	\$79,710,980

Trade rebates increased in 2014 versus 2013 principally due to higher sales in Canada and an increase in the rebate percentage due to a change in product mix towards higher rebated advanced wound care products, coupled with an increase in U.S. sales subject to rebate. The increase in distributor fees is commensurate with the increase in Canadian sales upon which the fees are based. The decrease in sales incentives reflects lower sales subject to incentives. Sales returns and allowances were impacted by higher U.S. sales in 2014 versus 2013. The decrease in cash discounts principally relates to a decrease in U.S. sales subject to cash discount.

Rebate Reserve Roll-Forward

A roll-forward of the trade rebate accruals for the years ended December 31, 2014 and 2013 were as follows:

	December 31,	
	2014	2013
Beginning balance – January 1	\$1,746,993	\$2,466,091
Rebates paid	(6,917,106)	(6,803,038)
Rebates accrued	7,050,638	6,083,940
Ending balance – December 31	\$1,880,525	\$1,746,993

The \$133,532 increase in the trade rebate reserve balance at December 31, 2014 from December 31, 2013 principally reflects an increase in sales subject to rebate in Canada and the U.S. There was no other significant change in the nature of our business in 2014 as it relates to the accrual and subsequent payment of rebates.

Net Sales and Gross Margin

The following table highlights the product line net sales and gross margin for the years ended December 31, 2014 versus 2013:

	Year Ended December 31,		Variance	
	2014	2013		
Net sales	\$83,745,680	\$79,710,980	\$4,034,700	5.1%
Cost of sales	53,635,745	50,320,506	3,315,239	6.6%
Gross profit	\$30,109,935	\$29,390,474	\$719,461	2.4%
Gross profit %	36.0	% 36.9	%	

Net sales increased \$4,034,700, or 5.1% (5.7% adjusted for exchange), in 2014 versus 2013. Advanced wound care sales increased \$4,182,316, or 12.3%, to \$38,110,851 in 2014 from \$33,928,535 in 2013. Traditional wound care sales decreased \$147,616, or 0.3%, to \$45,634,829 in 2014 from \$45,782,445 in 2013.

Sales from our U.S. operating subsidiaries increased \$2,110,262, or 3.2%, to \$67,458,532 in 2014 from \$65,348,270 in 2013. The increase was driven by higher advanced wound care sales of \$3,084,330, or 10.3%, partially offset by lower traditional wound care sales of \$974,068, or 2.7%. The increase in U.S. advanced wound care sales was led by MEDIHONEY, TCC and AMNIO products. The traditional wound care sales decrease was driven by lower private label sales. The 2014 private label sales were unfavorably impacted by approximately \$1,300,000 from the loss of a customer due to industry consolidation. Sales from our Canadian operating subsidiary increased \$804,186, or 7.4% (14.1% adjusted for exchange), to \$11,615,544 in 2014 from \$10,811,358 in 2013. This increase was driven by an increase in sales to our exclusive distributor of \$1,521,388 to support an increase in its inventory partially offset by unfavorable foreign exchange of \$717,202. Sales from our Canadian distributor to end users increased one percent in 2014 versus the comparable period in the prior year. Sales from our international operating subsidiary increased \$1,120,252, or 31.5% (26.5% adjusted for exchange) to \$4,671,604 in 2014 from \$3,551,352 in 2013. The increase was driven by higher United Kingdom advanced wound care sales along with favorable foreign exchange of \$177,656.

Gross profit increased \$719,461, or 2.4%, in 2014 versus 2013. Advanced wound care gross profit increased \$1,333,147, or 7.9%, to \$18,170,944 in 2014 from \$16,837,797 in 2013. Traditional wound care gross profit decreased \$613,686, or 4.9%, to \$11,938,991 in 2014 from \$12,552,677 in 2013. The overall gross profit margin percentage decreased to 36.0% in 2014 from 36.9% in 2013. The increase in gross profit dollars reflected higher sales partially offset by lower gross margin percentage. The lower gross margin percentage principally reflected higher manufacturing costs and sales adjustments, along with unfavorable foreign exchange. Manufacturing overhead costs increased reflecting additions of quality assurance personnel. Additionally, the manufacturing costs of the advanced wound care segment were unfavorably impacted by approximately \$370,000 of costs associated with TCC manufacturing defects in 2014. Unfavorable foreign exchange impact reflected an 8.6% devaluation of the Canadian dollar in 2014 versus 2013.

Selling, General and Administrative Expenses

The following table highlights selling, general and administrative expenses by type for the years ended December 31, 2014 versus 2013:

	Year Ended December 31,		Variance	
	2014	2013		
Distribution	\$2,484,458	\$2,345,041	\$139,417	5.9 %
Marketing	8,638,756	5,480,275	3,158,481	57.6%
Sales	23,889,012	17,903,341	5,985,671	33.4%
General and administrative	15,948,796	16,315,827	(367,031)	(2.2)%
Total	\$50,961,022	\$42,044,484	\$8,916,538	21.2%

Selling, general and administrative expenses increased \$8,916,538, or 21.2% (21.7% adjusted for exchange), in 2014 versus 2013.

Distribution expense increased \$139,417, or 5.9% (7.1% adjusted for exchange), in 2014 versus 2013. The increase reflected higher operating costs, principally compensation due to a growth driven increase in warehouse personnel, as well as repairs and maintenance on warehouse buildings and equipment.

Marketing expense increased \$3,158,481, or 57.6% (57.7% adjusted for exchange), in 2014 versus 2013. The increase was attributable to higher compensation expense associated with the addition of five marketing, two clinical and one product development positions added in the second half of 2013 and early 2014, along with travel and recruiting fees associated with the addition of the new positions, and higher product development and consulting costs.

Sales expense increased \$5,985,671, or 33.4% (33.5% adjusted for exchange), in 2014 versus 2013. The increase was principally attributable to incremental costs consisting of compensation and benefits, travel, recruiting, samples and tradeshow expenses to support the expansion of the advanced wound care sales force in the U.S and higher administrative fees associated with the expansion of our group purchasing program enrollment. Incremental growth related to international sales expansion also contributed to the increase.

General and administrative expenses decreased \$367,031, or 2.2% (1.1% adjusted for exchange), in 2014 versus 2013. This decrease primarily reflected lower legal fees resulting from the absence of litigation expense incurred in 2013 and lower board of directors' retirement associated costs, partially offset by due diligence costs incurred in 2014 for an acquisition transaction, higher compensation and benefits due to the addition of new positions, higher public and investor relations expenses, and other professional fees.

Research and Development Expense

Research and development expense increased \$7,917,387, or 69.8%, to \$19,253,059 in 2014 from \$11,335,672 in 2013. The increase reflected the ongoing DSC127 Phase 3 related expenses, together with incremental pre-clinical DSC127 scar prevention and AMNIO post marketing clinical studies.

Other Income, net

Other income, net decreased \$4,197 to \$181,543 in 2014 from \$185,740 in 2013 due principally to unfavorable foreign exchange, partially offset by a higher dividend received from Comvita Limited (“Comvita”) in 2014.

Income Tax Benefit

We recognized a \$151,048 income tax benefit in 2014 consisting of a \$169,789 foreign income tax benefit and a \$18,741 U.S. income tax provision which relates solely to deferred taxes. The foreign income tax benefit relates primarily to the tax benefit recognized as a result of the net loss incurred by the Canadian operations, partially offset by taxes paid on the dividend from the Comvita investment. The deferred tax provision was due to differences in financial reporting and tax treatment of goodwill of \$166,376 net of amortization for financial reporting but not tax purposes of acquired MedEfficiency identified intangible assets of \$118,803 and a tax benefit related to a reduction in the Company’s U.S. valuation allowance to offset the tax impact of the unrealized gain on equity securities included in accumulated other comprehensive income of \$28,832.

Due to uncertainties surrounding our ability to use our U.S. and U.K. net operating loss carry forwards and net deferred tax assets, a full valuation allowance for the U.S. and U.K. net deferred tax assets has been provided.

Net Loss

We generated a net loss of \$39,771,555, or \$1.62 per share (basic and diluted), in 2014 compared to a net loss of \$23,964,053, or \$1.40 per share (basic and diluted), in 2013.

Year Ended December 31, 2013 Compared to Year Ended December 31, 2012Overview

The following table highlights the year ended December 31, 2013 versus 2012 operating results:

	Year Ended December 31,		Variance	
	2013	2012		
Gross sales	\$88,841,450	\$83,024,063	\$5,817,387	7.0 %
Sales adjustments	(9,130,470)	(10,375,865)	1,245,395	12.0 %
Net sales	79,710,980	72,648,198	7,062,782	9.7 %
Cost of sales	50,320,506	47,507,349	2,813,157	5.9 %
Gross profit	29,390,474	25,140,849	4,249,625	16.9 %
Selling, general and administrative expense	42,044,484	32,485,368	9,559,116	29.4 %
Research and development expense	11,335,672	7,123,123	4,212,549	59.1 %
Other income, net	(185,740)	(26,729)	(159,011)	*
Total expenses	53,194,416	39,581,762	13,612,654	34.4 %
Loss before income taxes	(23,803,942)	(14,440,913)	(9,363,029)	(64.8)%
Income tax expense (benefit)	160,111	(2,370,482)	2,530,593	*
Net loss	\$(23,964,053)	\$(12,070,431)	\$(11,893,622)	(98.5)%

* *not meaningful*

Gross to Net Sales Adjustments

Gross to net sales adjustments are comprised of the following:

	Year Ended December 31,	
	2013	2012
Gross sales	\$88,841,450	\$83,024,063
Trade rebates	(6,083,940)	(7,623,597)
Distributor fees	(984,947)	(1,368,645)
Sales incentives	(978,770)	(503,563)
Returns and allowances	(394,656)	(316,258)
Cash discounts	(688,157)	(563,802)
Total adjustments	(9,130,470)	(10,375,865)

Net sales \$79,710,980 \$72,648,198

Trade rebates decreased in 2013 versus 2012 principally due to lower sales in Canada, and a decrease in the rebate percentage due to a change in product mix towards lower rebated products, partially offset by an increase in U.S. sales subject to rebate. The decrease in distributor fees is commensurate with the decrease in Canadian sales upon which the fees are based. The increase in sales incentives reflects higher sales subject to incentives. The increase in sales returns and allowances reflects higher U.S. sales in 2013 versus 2012. The increase in cash discounts principally relates to an increase in U.S. sales subject to cash discount.

Rebate Reserve Roll-Forward

A roll-forward of the trade rebate accruals for the years ended December 31, 2013 and 2012 were as follows:

	December 31,	
	2013	2012
Beginning balance – January 1	\$2,466,091	\$2,195,006
Rebates paid	(6,803,038)	(7,352,512)
Rebates accrued	6,083,940	7,623,597
Ending balance – December 31	\$1,746,993	\$2,466,091

The \$719,098 decrease in the trade rebate reserve balance at December 31, 2013 from December 31, 2012 principally reflects a decrease in sales subject to rebate in Canada, partially offset by an increase in U.S. sales subject to rebate. There was no other significant change in the nature of our business in 2013 as it relates to the accrual and subsequent payment of rebates.

Net Sales and Gross Margin

The following table highlights the product line net sales and gross margin for the years ended December 31, 2013 versus 2012:

	Year Ended December 31,		Variance	
	2013	2012		
Net sales	\$79,710,980	\$72,648,198	\$7,062,782	9.7 %
Cost of sales	50,320,506	47,507,349	2,813,157	5.9 %
Gross profit	\$29,390,474	\$25,140,849	\$4,249,625	16.9 %
Gross profit %	36.9 %	34.6 %		

Net sales increased \$7,062,782, or 9.7% (10.3% adjusted for exchange), in 2013 versus 2012. Advanced wound care sales increased \$9,095,813, or 36.6%, to \$33,928,535 in 2013 from \$24,832,722 in 2012. Traditional wound care sales decreased \$2,033,031, or 4.3%, to \$45,782,445 in 2013 from \$47,815,476 in 2012.

Sales from our U.S. operating subsidiaries increased \$9,795,177, or 17.6%, to \$65,348,270 in 2013 from \$55,553,093 in 2012. The increase was driven by higher advanced wound care sales of \$8,331,887, or 38.8%, and traditional wound care sales of \$1,463,290, or 4.3%. Excluding TCC sales, which were positively impacted by our April 2012 acquisition of MedEfficiency, advanced wound care sales increased by 30.2%, led by MEDIHONEY, XTRASORB and BIOGUARD. The traditional wound care sales increase was led by higher private label and first aid product sales which included an initial stocking order for a large U.S. retail pharmacy chain of approximately \$1,100,000. Sales from our Canadian operating subsidiary decreased \$3,586,741, or 24.9% (22.0% adjusted for exchange), to \$10,811,358 in 2013 from \$14,398,099 in 2012. This decrease was driven by lower end user demand of 7.4% due to business lost in 2013, a significant reduction in sales to our exclusive distributor as a result of the distributor's decision to rebalance its inventory, and unfavorable exchange of \$415,925 due to weakening of the Canadian dollar. Sales from our international operating subsidiary increased \$854,346, or 31.7% (33.0% excluding exchange) to \$3,551,352 in 2013 from \$2,697,006 in 2012. The increase was driven by higher advanced wound care sales of \$735,953 and traditional wound care sales of \$118,393.

Gross profit increased \$4,249,625, or 16.9%, in 2013 versus 2012. Advanced wound care gross profit increased \$4,378,877, or 35.1%, to \$16,837,797 in 2013 from \$12,458,920 in 2012. Traditional wound care gross profit decreased \$129,252, or 1.0%, to \$12,552,677 in 2013 from \$12,681,929 in 2012. The overall gross profit margin percentage increased to 36.9% in 2013 from 34.6% in 2012. The increase in gross profit dollars reflected higher sales, coupled with the higher gross profit margin percentage. The higher gross margin percentage principally reflected an increase in higher margined advanced wound care sales, partially offset by higher product costs.

Selling, General and Administrative Expenses

The following table highlights selling, general and administrative expenses by type for the years ended December 31, 2013 versus 2012:

	Year Ended December 31,		Variance	
	2013	2012		
Distribution	\$2,345,041	\$2,073,893	\$271,148	13.1%
Marketing	5,480,275	3,572,629	1,907,646	53.4%
Sales	17,903,341	14,244,048	3,659,293	25.7%
General and administrative	16,315,827	12,594,798	3,721,029	29.5%
Total	\$42,044,484	\$32,485,368	\$9,559,116	29.4%

Selling, general and administrative expenses increased \$9,559,116, or 29.4% (29.8% adjusted for exchange), in 2013 versus 2012.

Distribution expense increased \$271,148, or 13.1% (13.6% adjusted for exchange), in 2013 versus 2012. The increase reflected higher operating costs in support of our growing base of sales.

Marketing expense increased \$1,907,646, or 53.4% (53.6% adjusted for exchange), in 2013 versus 2012. The increase was attributable to higher equity based compensation expense, two new marketing and two new clinical personnel added in 2012 and 2013, travel expenses, and promotional and product development costs principally in support of our advanced wound care growth initiatives, partially offset by lower recruiting costs.

Sales expense increased \$3,659,293, or 25.7% (26.0% adjusted for exchange), in 2013 versus 2012. The increase was principally attributable to incremental costs consisting of compensation and benefits, commission, travel and sample expenses associated with the expansion of the advanced wound care sales force in the U.S., Canada, and the U.K., which was completed during the second quarter of 2012, along with the incremental investment of an international sales management position to support our international growth, higher equity based compensation expense, and administrative fees associated with group purchasing and sales data collection programs.

General and administrative expenses increased \$3,721,029, or 29.5% (30.1% adjusted for exchange), in 2013 versus 2012. This increase reflects higher legal costs, compensation expense associated with the December 2012 and 2013 executive and director's equity based awards, compensation and benefits related to annual salary increases and the addition of seven new positions in 2012 and 2013 to support our growth, coupled with higher professional service

costs, information technology costs associated with an information systems integration project, insurance and corporate office expenses.

Research and Development Expense

Research and development expense increased \$4,212,549, or 59.1%, to \$11,335,672 in 2013 from \$7,123,123 in 2012. The increase reflected the ramp up and continuation of DSC127 Phase 3 related expenses as the project moved into its clinical trial phase during the first quarter of 2013.

Other Income, net

Other income, net increased \$159,011 to \$185,740 in 2013 from \$26,729 in 2012. The increase reflects an increase in short term investments, mainly certificates of deposits, which earned interest in 2013, a gain on foreign currency exchange, as well as a dividend received from Comvita in connection with the Company's equity investment that was made in 2013.

Income Taxes

We recognized a \$160,111 income tax expense in 2013 consisting of a \$120,330 U.S. income tax expense and a foreign income tax expense of \$39,781. The U.S. income tax expense consists of a current tax expense of \$5,365 and a deferred tax expense of \$114,965. The deferred tax expense was due to differences in financial reporting and tax treatment of goodwill of \$153,619 net of amortization for financial reporting but not tax purposes of acquired MedEfficiency identified intangible assets of \$38,654.

Due to uncertainties surrounding our ability to use our U.S. and U.K. net operating loss carry forwards and net deferred tax assets, a full valuation allowance for the U.S. and U.K. net deferred tax assets has been provided.

Net Loss

We generated a net loss of \$23,964,053, or \$1.40 per share (basic and diluted), in 2013 compared to a net loss of \$12,070,431, or \$0.97 per share (basic and diluted), in 2012.

Liquidity and Capital Resources

Cash Flow and Working Capital

At December 31, 2014 and 2013, we had cash and cash equivalents of \$19,396,845 and \$6,501,586, respectively. The \$12,895,259 increase in cash and cash equivalents reflected net cash provided by financing activities of \$82,586,676 and an exchange rate effect on cash which increased cash by \$178,937, partially offset by cash used in investing activities of \$43,863,216 and operating activities of \$26,007,138.

Net cash provided by financing activities of \$82,586,676 included net proceeds of \$80,616,032 from the issuance of common stock and \$2,270,714 from the exercise of warrants and stock options, partially offset by the payment of payroll withholding taxes related to stock compensation of \$300,070 in connection with net share settlements.

Net cash used in investing activities of \$43,863,216 included cash used for the net purchase of investments of \$41,005,693, which included \$1,483,693 to purchase additional shares of Comvita stock, \$1,732,523 for capital expenditures and \$1,250,000 for the payment of the BioDLogics, LLC (“BioD”) license fee partially offset by a \$125,000 reimbursement for the MEDIHONEY coating technology. The majority of the capital expenditures are being made to upgrade and expand our manufacturing capabilities and purchase computer equipment in connection with the upgrade of the U.S. and Canadian computer systems.

Net cash used in operating activities of \$26,007,138 resulted from \$29,690,705 cash used in operations (net loss plus non-cash items) together with \$3,683,567 cash provided by the net change in operating assets and liabilities. Lower inventory and prepaid expenses, and higher accounts payable and accrued liabilities, partially offset by higher receivables, were the main drivers behind the net cash provided by the net change in operating assets and liabilities. The increase in receivables reflects a higher level of sales as well as timing of payments. The decrease in inventory reflected planned reductions in first-aid division inventory. The decrease in prepaid expenses reflected timing of advance payments for the Phase 3 clinical trial and other operating expenditure payments. The increase in accounts payable reflected the increase in the level of business activity, while the increase in accrued expenses and other current liabilities principally reflected higher accrued commissions and bonus.

Working capital increased \$49,292,501 at December 31, 2014 to \$89,332,503 from \$40,040,002 at December 31, 2013. This increase principally reflected the net cash provided by the issuance of common stock and the exercise of warrants and stock options, partially offset by the net cash outflow from operating activities and the net purchase of investments. We believe this level of working capital is sufficient to support our existing operations for the next twelve months.

Contractual Obligations

Our cash requirements as of December 31, 2014 for contractual obligations were as follows:

	Total	Less Than 1 Year	1-3 Years	4-5 Years	More than 5 Years
Operating leases (1)	\$6,390,795	\$1,607,369	\$3,045,121	\$1,408,366	\$ 329,939

(1) Represents minimum future lease payments under existing operating leases.

Prospective Assessment

Our strategic objective is to build the Company by both continuing to progress DSC127, with an initial indication for the treatment of diabetic foot ulcers, as well as in-licensing, developing and launching novel higher margin advanced wound care products while utilizing our cash on-hand and cash flow provided by our traditional wound care business (to the extent possible) to fund this objective. In addition, we will continue to evaluate external opportunities to leverage our core capabilities for growth and additional development programs on new indications for DSC127. To the extent we determine that we cannot finance our growth initiatives internally, additional sources of funding may be available to us through the sale of equity, the sale of licensing rights to DSC127, jointly developing products with third parties and/or selling a portion of our existing business.

The launch of a number of advanced wound care product line extensions in recent years and the acquisition of the MedEfficiency line of TCC products in April 2012 and the licensing of the BioD human placental products in January 2014 bodes well for the future growth of our higher-margined advanced wound care products both domestically and abroad.

Our strategy for growth is:

· Assuming the existing resources in place are generating the expected return, we will continue to expand our worldwide investment in sales and marketing resources in support of our higher-margined advanced wound care products. Additional sales and marketing resources will continue to be prudently added as needed to support the continued growth of this segment of our business. We have an established presence in EMEA through a direct sales

organization in the U.K. and through distributors in a number of other countries. We are in the process of building our presence in APLA employing the distribution model. We plan to expand our sales and marketing in this and other areas of the world employing a direct sales force or distributor model as the basis for conducting business, as circumstances dictate.

While the potential commercial launch of DSC127 is estimated to be three to four years away (pending the acceptance of a New Drug Application (“NDA”) by the U.S. FDA), we believe the market potential of this product for diabetic foot ulcers and other indications that we have the rights to are significant. Our toxicology and chemistry, manufacturing and control programs are proceeding as planned. All aspects of the clinical program are in place. Since the start-up of the clinical trials during the first quarter of 2013 we continue to make progress initiating and activating sites and enrolling patients. We are working closely with the clinical research organization managing the trials and others to ensure the trials are progressing. The cost of the preparation and execution of the Phase 3 program up to the point of NDA submission is presently estimated to be approximately \$62.5 to \$67.5 million. This includes the costs for the clinical, manufacturing and the toxicology (nonclinical) programs. Beyond the initial indication of the treatment of diabetic foot ulcers, we have initiated pre-clinical activities for scar prevention, and anticipate having initial data in 2015 to help determine whether or not to progress towards an Investigational New Drug application. In March 2015 the Company hired a Chief Medical Officer to oversee all clinical research activities.

We will continue to nurture our traditional wound care business in an effort to sustain it and grow it where possible, utilizing the appropriate amount of human and financial resources to achieve our objectives. While this area of our business presently represents a significant (albeit diminishing) percentage of our sales and realizes lower gross profit margins, it generates positive cash flow as it does not require extensive sales and marketing resources to sustain it. Maintenance and growth of this business is important to us as we utilize this cash flow to help support our advanced wound care and pharmaceutical wound care growth initiatives.

With the cash, cash equivalents and short term investments on hand as of December 31, 2014, we anticipate having sufficient liquidity to meet our existing operating and product development needs for the next twelve months. Further, if needed, we believe the continued success of our advanced wound care business and the development of DSC127 will serve to improve our ability to raise equity or generate capital through licensing the rights going forward to fund prospective growth initiatives.

Our common stock is traded on the NASDAQ Capital Market under the symbol "DSCI." We have paid no cash dividends in respect of our common stock and do not intend to pay cash dividends in the near future.

Additional Financial Information

Off-Balance Sheet Arrangements

As of December 31, 2014, we had no off-balance sheet arrangements.

Inflation

Our management currently believes that inflation has not had, and does not currently have, a material impact on continuing operations.

Critical Accounting Policies

Estimates and assumptions are required in the determination of sales deductions for trade rebates, sales incentives, discounts and allowances. Significant estimates and assumptions are also required in determining the appropriateness

of amortization periods for identifiable intangible assets, the potential impairment of goodwill and the valuation of inventory. Some of these judgments can be subjective and complex and, consequently, actual results may differ from these estimates. For any individual estimate or assumption made by us, there may also be other reasonable estimates or assumptions. We believe, however, that given current facts and circumstances, it is unlikely that applying any such other reasonable judgment would cause a material adverse effect on the consolidated results of operations, financial position or cash flows for the periods presented. Our most critical accounting policies were discussed with the Audit Committee of the Board of Directors and are described below.

Revenue Recognition and Adjustments to Revenue

We sell our products through our own direct sales force and through independent distributors and manufacturers' representatives. The primary end users of our products are nursing homes, hospitals, clinics and home healthcare agencies. We recognize revenue from the sale of our products when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collectability is reasonably assured, which is generally at the time of shipment or receipt by our customers, depending on the terms of the related sales or distribution agreement. When we recognize revenue from the sale of our products, we simultaneously adjust revenue for estimated trade rebates and distribution fees (in Canada), and estimates of returns and allowances, cash discounts and other sales incentives.

A trade rebate represents the difference between the invoice price to the wholesaler/distributor and the end user's contract price. These rebates are estimated monthly based on historical experience, distributor rebate submission trends, estimated distributor inventory levels, and existing contract sales terms with our distributors and end users. We have a contract with our exclusive Canadian distributor and we pay a fixed fee based on sales subject to the fee (as defined) for distribution services in Canada. Because the services performed by the distributor cannot be separated from the purchase of our products by the distributor, we treat this distribution fee as a reduction of revenue. The distribution fee is accrued monthly based on net sales to the distributor multiplied by the ratio of recent historical distributor fee expense to net sales. The percentage of distributor fee expense to net sales is re-evaluated quarterly for reasonableness.

Sales incentives represent credits granted to specific customers based on attainment of pre-determined sales objectives. Sales incentives are accrued monthly in accordance with the terms of the underlying sales incentive agreement and actual customer sales. Sales incentive agreements are generally for a period of one year.

We provide our customers certain limited return rights and we have a formal returned goods policy that guides the disposition of returns with our customers. We accrue for sales returns and allowances and cash discounts monthly based on current sales and historical activity. We do not offer our customers price protection rights or concessions. Returns were less than 1% of gross sales in 2014, 2013 and 2012.

We continually monitor the factors that influence rebates and fees, returns and allowances, and other discounts and sales incentives and make adjustments as necessary.

Goodwill

At December 31, 2014, we had \$13,457,693 of goodwill of which \$6,337,967 related to the MedEfficiency acquisition in April 2012, \$4,679,684 related to the First Aid Products acquisition in November 2007, and \$2,440,042 related to the Western Medical acquisition in April 2006. We assess the impairment of goodwill annually in the fourth quarter or whenever events or changes in circumstances indicate that the carrying value of goodwill may not be recoverable. The assessment is performed using the two-step process required by accounting guidance relating to goodwill. The first step is a review for potential impairment, while the second step measures the amount of the impairment, if any. The first step of the goodwill impairment test compares the fair value of a reporting unit with its carrying amount, including goodwill. For 2014 and 2013, the first step of our goodwill impairment test reflected a fair value in excess of the carrying value of our reporting units. Accordingly, we did not perform the second step of this test during these periods.

The cash generating unit level or reporting unit at which we test goodwill for impairment is the operating segment level. Products are allocated to each segment based on the nature and intended use of the product. The Medefficiency goodwill is allocated to our advanced wound care segment and the First Aid Products and Western Medical goodwill to our traditional wound care segment.

For 2014 and 2013 and consistent with prior periods, we estimated the fair value of our segments using the “income approach,” where we use a discounted cash flow model (“DCF”) in preparing our goodwill impairment assessment. This approach calculates fair value by estimating the after-tax cash flows attributable to a segment and then discounting these after-tax cash flows to a present value using a risk-adjusted discount rate. We selected this method as being the most meaningful in preparing our goodwill assessments because we believe the income approach most appropriately measures our income producing assets.

Significant estimates used in the fair value calculation include: (i) estimates of future revenue and expense growth; (ii) future estimated effective tax rates; (iii) future estimated capital expenditures; (iv) future required investments in working capital; (v) average cost of capital; and (vi) the terminal value of the reporting unit.

The amount and timing of future cash flows within our DCF analysis is based on our five year forecast. Beyond our five year forecast we assumed a terminal value to calculate the value of cash flows beyond the last projected period in our DCF analysis. Annual revenue growth rates in our DCF model reflect expected growth in our advanced and traditional wound care products. The weighted average cost of capital used to discount cash flows for the annual 2014 goodwill impairment test ranged from 15% to 23% dependent on respective business segment.

There have been no substantial changes to the methodology employed, significant assumptions or calculations applied in the first step of the goodwill impairment test over the past several years.

Inventory

The Company writes down the value of inventory by the estimate of the difference between the cost of the inventory and its net realizable value. The estimate takes into account projected sales of the inventory on-hand and the age of the inventory in stock. If actual future demand or market conditions are less favorable than those projected, additional inventory write-downs may be required. The provision for the write-down of inventory is recorded in cost of sales.

Stock-Based Compensation

We record compensation expense associated with stock options and other equity-based compensation based on the fair value at the grant date, amortized over the requisite service and performance periods. We estimate the fair value of stock options as of the date of grant using the Black-Scholes option pricing model for service and performance based awards. We use the quoted market price for service and performance based restricted share units and binomial/lattice option pricing model for market based awards. Significant judgment and the use of estimates to value the equity-based compensation, particularly surrounding Black-Scholes or binomial/lattice pricing model assumptions such as stock price volatility and expected option lives are made.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Interest Rate Risk

We have investments in certificates of deposit with maturities of up to one year. It is our intention to hold these investments to maturity and therefore we have no exposure to fluctuations in interest rates. Based on the absence of any term loan borrowings as of December 31, 2014, a 50 basis point fluctuation in short-term interest rates would have no impact on our expected pre-tax income on an annual basis.

Equity Investment Risk

We presently have a long term investment in a foreign public company, with whom we have a business relationship, which is subject to foreign market and exchange risk. This investment is classified as an available-for-sale investment carried at fair value, with the resulting unrealized gains and/or losses included in accumulated other comprehensive income in our Consolidated Balance Sheet. We presently do not foresee the need or the desire to liquidate this investment.

Foreign Exchange Risk

In 2014, we generated approximately 76 percent of our net sales inside the United States. We have wholly owned foreign subsidiaries in Canada and the United Kingdom. Our Canadian subsidiary has a wholly owned Chinese subsidiary. Each of these subsidiaries has their own functional currencies. Each may conduct business with each other, third parties and/or the Company in other than its functional currency, within the normal course of business. Where possible, we manage foreign currency exposures on a consolidated basis, which allows us to take advantage of any natural offsets; therefore, weakness in one currency might be offset by strengths in other currencies over time. Exchange gains and losses are recognized as incurred in our Consolidated Statement of Comprehensive Loss, which historically have not been material. Fluctuations in exchange rates affect our results of operations, financial position and cash flows. We currently do not hedge our exposure to fluctuations in exchange rates.

Commodity Price Risk

A significant portion of our business is exposed to the price of cotton and directly and indirectly to the price of oil. Fluctuations in the price of these commodities affect our results of operations, financial position and cash flows. We monitor our commodity price risk on an ongoing basis. Steps have been, and will continue to be, taken to manage the adverse impact of price increases on our business relative to the market. We currently do not hedge commodity price risk.

At present, we do not believe our operations are subject to significant market risks for interest rates, equity investment, foreign currency exchange, commodity prices or other relevant market price risks of a material nature.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Derma Sciences, Inc.:

We have audited the accompanying consolidated balance sheets of Derma Sciences, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of comprehensive loss, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Derma Sciences, Inc. and subsidiaries as of December 31, 2014 and 2013, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2014, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Derma Sciences Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 11, 2015 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders

Derma Sciences, Inc.:

We have audited Derma Sciences, Inc.'s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Derma Sciences, Inc.'s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Derma Sciences, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (1992)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Derma Sciences, Inc. and subsidiaries as of December 31, 2014 and 2013, and the related consolidated statements of comprehensive loss, stockholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2014, and our report dated March 11, 2015 expressed an unqualified opinion on those consolidated financial statements.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

1. Description of Business

Derma Sciences, Inc. and its subsidiaries (the “Company”) is a tissue regeneration company focused on three segments of the wound care marketplace: advanced wound care, traditional wound care and pharmaceutical wound care products. The Company has one drug candidate that initiated its Phase 3 study during the first quarter of 2013. The Company markets its products principally through direct sales representatives in the United States (“U.S.”), Canada and the United Kingdom (“U.K.”), and through independent distributors within other select international markets. The Company’s U.S. distribution facilities are located in St. Louis, Missouri and Houston, Texas. The Company utilizes third party distributors for distribution in Canada, Europe and the Far East. The Company has manufacturing facilities in Toronto, Canada and Nantong, China.

2. Summary of Significant Accounting Policies

Principles of Consolidation – The consolidated financial statements include the accounts of Derma Sciences, Inc. and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates – The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on knowledge of current events and actions which may be undertaken in the future, actual results may ultimately differ from these estimates. Estimates and assumptions are required in the determination of sales deductions for trade rebates, sales incentives, discounts and allowances. Significant estimates and assumptions are also required in determining the appropriateness of amortization periods for identifiable intangible assets, the potential impairment of goodwill and the valuation of inventory.

Foreign Currency Translation – Assets and liabilities are translated using the exchange rates in effect at the balance sheet date, while income and expenses are translated using average rates during the period. Translation adjustments are reported as a component of stockholders’ equity in accumulated other comprehensive income. For the Company’s foreign subsidiaries, exchange rate fluctuations on foreign currency denominated assets and liabilities other than the functional currency resulted in an expense of \$407,988 and income of \$140,721 and \$47,738 for the years ended December 31, 2014, 2013 and 2012, respectively, which is included in the Consolidated Statement of Comprehensive Loss as follows:

	2014	2013	2012
Cost of sales	\$421,525	\$57,894	\$7,031
Other income, net	(13,537)	(198,615)	(54,769)
Total	\$407,988	\$(140,721)	\$(47,738)

Exchange rate fluctuations of foreign currency denominated assets and liabilities associated with inventory are included in cost of sales, while all other such fluctuations are included in other income, net.

Concentration of Credit Risk – Financial instruments that subject the Company to a concentration of credit risk consist principally of cash and cash equivalents, investments in debt securities and accounts receivable. The Company maintains cash and cash equivalents with various financial institutions in amounts which at times may exceed federally insured limits. Accounts are guaranteed by the Federal Deposit Insurance Corporation up to \$250,000. The Company has not experienced any losses in such accounts. The Company does not require collateral or other security to support credit sales, but provides an allowance for doubtful accounts based on historical experience and specifically identified risks. Accounts receivable are charged off against the allowance for doubtful accounts when management determines that recovery is unlikely and the Company ceases collection efforts.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Customer and Vendor Concentrations - In 2014, 2013 and 2012 the Company had a major Canadian customer comprising 14%, 14% and 20%, respectively, of consolidated net sales. Due to outstanding rebate obligations, the Company was in a net liability position to this customer at December 31, 2014. The Company purchases critical components of its products from sole-supply vendors, and if these vendors are unable or unwilling to supply the required components there could be a material adverse effect on the Company's business, as well as its financial condition and results of operations. Sales of these products represented 32%, 29% and 20% of total sales for the years ended December 31, 2014, 2013 and 2012, respectively.

Inventories – Inventories consist of raw materials, packaging materials, work in process and finished goods valued at the lower of cost or market. Cost is determined on the basis of the first-in, first-out method.

Equipment and improvements – Equipment and improvements are stated at cost and are depreciated on a straight-line basis over the estimated useful lives of the assets ranging from three to 10 years. Leasehold improvements are amortized over the lesser of their useful lives or the remaining lease term.

Fair Value of Financial Instruments – The carrying value of cash equivalents, accounts receivable, prepaid expenses and other current assets, and accounts payable reported in the consolidated balance sheets equal or approximate fair value due to their short term nature.

Identifiable Intangible Assets – Identifiable intangible assets, which consist of product license rights, developed technology and supply agreements, and other identifiable intangible assets, are amortized over five to 13 years on a straight-line basis.

Long Lived Assets –The Company reviews its long-lived assets with definitive lives whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. If the carrying amount of the asset or group of assets exceeds its net realizable value, the asset will be written down to its fair value.

Goodwill – The Company tests goodwill for impairment using a two-step process. The first step tests for potential impairment, while the second step measures the amount of impairment, if any. The Company uses a discounted cash flow analysis to complete the first step in this process. If the first step indicates an impairment, i.e. when the carrying value exceeds the fair value, then the second step is required to determine the implied fair value of goodwill. The implied fair value of goodwill is calculated in the same manner that goodwill is calculated in a business combination. The allocation is to be performed as if the reporting unit had just been acquired and the fair value of the unit was the purchase price. The goodwill impairment equals the carrying value of goodwill less the implied fair value of goodwill. The Company performs its goodwill impairment test as of December 31st of each year, or more frequently if impairment indicators are present.

Stock-Based Compensation – Stock-based compensation for share-based awards with employees and non-employee directors, such as grants of stock options and restricted share units, are recognized in the consolidated financial statements based on the fair value of the award at the grant date on a straight-line basis over the requisite service or performance periods. Stock-based compensation for share-based awards granted to consultants are recognized based on the fair value of the award on a straight-line basis over the requisite service or performance periods and are revalued at the end of each period until the award vests. The Company estimates the fair value of stock options using the Black-Scholes option-pricing model for service and performance based awards. The fair value of restricted share units is based on the quoted market price for service and performance based awards, and by using a binomial/lattice pricing model for market based awards. The Company issues new common stock shares upon exercise of share-based awards.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Income Taxes – Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and the respective tax bases. Deferred tax assets, including tax loss and credit carryforwards, and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. The effect of income tax positions is recognized only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs.

The Company measures and recognizes the tax implications of positions taken or expected to be taken in its tax returns on an ongoing basis. In 2014, 2013 and 2012, the Company had no unrecognized tax benefits or liabilities, and no adjustment to its financial position, results of operations or cash flows were required. The Company records interest and penalties related to tax matters within other income, net on the accompanying Consolidated Statements of Comprehensive Loss. These amounts are not material to the consolidated financial statements for the periods presented. The Company's U.S. tax returns are subject to examination by federal and state taxing authorities. Tax years prior to 2011 are no longer subject to federal examination. However, the Company's federal net operating losses for tax years 2000 through 2010 will remain subject to examination until the losses are utilized or expire. State tax years 2010 to 2014 remain open to examination by the various state jurisdictions in which the Company is subject to tax. Tax years prior to 2005, as well as the 2006 tax year, are no longer subject to examination in Canada. The U.K. tax returns prior to 2012 are no longer subject to examination.

Revenue Recognition – Sales are recorded when product is shipped or title passes to customers and collectability is reasonably assured. Gross sales are adjusted for cash discounts, returns and allowances, trade rebates, distribution fees (in Canada) and other sales deductions in the same period that the related sales are recorded. Freight costs billed to and reimbursed by customers are recorded as a component of revenue. Freight costs to ship product to customers are recorded as a component of cost of sales.

Advertising and Promotion Costs – Advertising and promotion costs are charged to expense as incurred and were \$3,531,561, \$3,082,221 and \$2,243,387 in 2014, 2013 and 2012, respectively.

Royalties – The Company recognizes royalty expenses associated with the products sold at the time the related sale occurs and records them as a component of cost of sales. Royalty expense for the years ended December 31, 2014, 2013 and 2012 was \$1,853,187, \$1,741,742 and \$1,395,567, respectively.

Net Loss per Share – Net loss per common share – basic is computed by dividing net loss by the weighted average number of common shares outstanding for the period. Net loss per common share – diluted reflects the potential dilution of earnings by including the effects of the assumed exercise, conversion or issuance of potentially issuable shares of common stock (“potentially dilutive securities”), including those attributable to stock options, warrants, convertible preferred stock and restricted share units in the weighted average number of common shares outstanding for a period, if dilutive. The effects of the assumed exercise of warrants and stock options are determined using the treasury stock method. Potentially dilutive securities have not been included in the computation of diluted loss per share for the years ended December 31, 2014, 2013 and 2012 as the effect would be anti-dilutive.

Potentially dilutive shares excluded as a result of the effects being anti-dilutive are as follows:

	Year Ended December 31,		
	2014	2013	2012
Excluded dilutive shares:			
Convertible preferred stock	73,332	73,332	73,332
Additional stock issuable related to conversion of preferred stock	49,782	49,154	-
Restricted share units	651,883	720,550	786,900
Stock options	2,166,959	1,814,233	1,639,985
Warrants	2,089,084	2,305,272	2,930,154
Total dilutive shares	5,031,040	4,962,541	5,430,371

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Recently Issued Accounting Pronouncements - In May 2014, the Financial Accounting Standards Board issued Accounting Standards Update (“ASU”) No. 2014-09, *Revenue from Contracts with Customers*, which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. The ASU will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The new standard is effective for the Company on January 1, 2017. Early application is not permitted. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

3. Acquisition

On April 16, 2012, the Company acquired all of the outstanding stock of MedEfficiency, Inc. (“MedEfficiency”) pursuant to the terms of an Agreement and Plan of Merger. The purchase price was \$14,475,000 and was funded by the Company with cash on hand. The Company incurred transaction and transition related costs totaling \$1,256,853 related to the purchase, which were charged to selling, general and administrative expense in the 2012 Consolidated Statement of Comprehensive Loss.

MedEfficiency develops, manufactures and markets medical devices for treating chronic wounds and lower extremity injuries, specializing in TCC products. The TCC-EZ total contact cast system is MedEfficiency’s lead product, in addition to a line of traditional and specialized contact casts and related equipment. The Company has distributed MedEfficiency’s TCC products since 2008 under an exclusive distribution agreement.

The acquisition has been accounted for as a purchase. Accordingly, the results of operations of MedEfficiency have been included in the consolidated financial statements commencing April 17, 2012. The allocation of the purchase price to the estimated fair value of the assets acquired and the liabilities assumed is outlined below:

Current assets	\$925,817
Equipment	29,579
Acquired intangible assets	10,700,000
Goodwill	6,337,967

Total assets acquired	17,993,363
Current liabilities	653,315
Deferred tax liability	2,982,470
Total liabilities assumed	3,635,785
Net assets acquired	\$14,357,578
Purchase price	\$14,475,000
Less cash acquired	117,422
Net cash paid	\$14,357,578

The allocation of the purchase price to the assets acquired and liabilities assumed was based on an independent valuation study to establish the fair value of the identifiable intangible assets acquired. The identifiable intangible assets acquired consist of developed technology and patents, customer relationships, a supply agreement, trade names and trademarks and non-compete agreements. The Company recorded the excess of the purchase price over the fair values of the identifiable assets acquired and liabilities assumed as goodwill. While the acquired intangible assets are amortizable for financial reporting purposes, the acquired intangible assets and goodwill are not deductible for tax purposes. Deferred taxes have been recorded associated with the acquisition for the basis differences for financial reporting and income tax purposes for the acquired identifiable intangible assets at the effective tax rates for the period in which the deferred tax asset and liability are expected to reverse. All of the assets acquired, including goodwill, and liabilities assumed are included in the Advanced Wound Care segment.

Notes To Consolidated Financial Statements

The unaudited pro forma information below presents combined results of operations as if the acquisition had occurred at the beginning of the periods presented instead of April 16, 2012. The pro forma information is based on historical results adjusted for the effect of purchase accounting and is not necessarily indicative of the results of operations of the combined entity had the acquisition occurred at the beginning of the periods presented, nor is it necessarily indicative of future results.

	Year ended, December 31, 2012 (Unaudited)
Net Sales	\$ 74,035,688
Net Loss	\$ (12,762,551)
Net Loss per common share - basic and diluted	\$ (1.02)
Weighted average number of shares - basic and diluted	12,488,263

4. Cash and Cash Equivalents and Investments**Cash and Cash Equivalents**

The Company considers cash and cash equivalents as amounts on hand, on deposit in financial institutions and highly liquid investments purchased with an original maturity of three months or less. Money market mutual funds consist of funds deposited into mutual funds investing in U.S. government and non-government obligations. The Company maintains cash and cash equivalents and money market mutual funds with various domestic and foreign financial institutions within the ordinary course of business, which at times may exceed jurisdictional insurance limits.

Investments in debt securities

Investments in debt securities includes certificates of deposit purchased with an original maturity greater than three months which are deposited in various U.S. financial institutions and are fully insured by the Federal Deposit Insurance Corporation. The Company intends to hold the certificates of deposit to maturity and accordingly these investments are carried at amortized cost. Investments in debt securities with maturities greater than one year from the balance sheet date are classified as a long-term asset.

Investment in equity securities

In 2013, the Company purchased 2,272,277 shares of Comvita Limited (“Comvita”) common stock for \$7,000,000. In conjunction with this investment, the Company’s chairman and chief executive officer was named to Comvita’s board of directors. In 2014, the Company purchased an additional 530,000 shares of Comvita common stock for \$1,483,693 for a total investment of \$8,483,693. At December 31, 2014, the 2,802,277 shares of Comvita common stock owned by the Company represented 7.1% of Comvita’s outstanding shares.

The investment in Comvita common stock is classified as an available-for-sale investment carried at fair value, with any unrealized gains and losses associated with the investment included in accumulated other comprehensive income and any dividends received recorded in other income. The investment is classified as a long term asset. As of December 31, 2014, the fair value of the Comvita common stock was \$8,422,790 as determined by the quoted market price of the outstanding stock on the New Zealand stock exchange. The \$60,903 decrease in fair value from cost was recorded in accumulated other comprehensive income. For the years ended December 31, 2014 and 2013, Comvita declared a dividend, the Company’s share of which was \$226,318 and \$75,421, net of taxes.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Cash and cash equivalents and investments at December 31, 2014 and 2013 consisted of the following:

	December 31,	
	2014	2013
Cash	\$7,665,958	\$5,265,903
Money market mutual funds	11,730,887	1,235,683
Cash and cash equivalents	19,396,845	6,501,586
Investments in debt securities	55,996,000	16,474,000
Investment in equity securities	8,422,790	6,862,140
Total investments	64,418,790	23,336,140
Total cash and cash equivalents and investments	83,815,635	\$29,837,726

The following table provides fair value information as of December 31, 2014:

	Total carrying value as of December 31, 2014	Fair Value Measurements, Using		
		Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Cash and cash equivalents	\$ 19,396,845	\$19,396,845	\$ -	\$ -

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets. Level 2 inputs are quoted prices for similar assets in active markets or inputs that are observable for the asset, either directly or indirectly through market corroboration, for substantially the full term of the financial instrument. Level 3 inputs are unobservable inputs based on management's own assumptions used to measure assets at fair value. A financial asset's classification is determined based on the lowest level input that is significant to the fair value measurement.

5. Accounts Receivable, net

Accounts receivable, net includes the following:

	December 31,	
	2014	2013
Accounts receivable	\$9,289,239	\$7,781,482
Less: Allowance for doubtful accounts	(136,995)	(97,729)
Allowance for trade rebates	(257,815)	(218,700)
Allowance for cash discounts and returns	(136,395)	(132,297)
Accounts receivable, net	\$8,758,034	\$7,332,756

6.**Inventories**

Inventories include the following:

	December 31,	
	2014	2013
Finished goods	\$8,386,356	\$11,044,746

Notes To Consolidated Financial Statements

7. Equipment and Improvements, net

Equipment and improvements, net include the following:

	December 31,	
	2014	2013
Machinery and equipment	\$7,306,132	\$7,102,144
Furniture and fixtures	1,220,799	911,879
Leasehold improvements	2,769,371	2,300,500
	11,296,302	10,314,523
Less: accumulated depreciation	(7,681,863)	(7,361,054)
Total equipment and improvements, net	\$3,614,439	\$2,953,469

8. Identifiable Intangible Assets, net

Costs of identifiable intangible assets associated with previous acquisitions, as well as payments in connection with obtaining product license rights, are included as identifiable intangible assets. See Note 3 for the acquisition completed in 2012 and Note 14 for product license rights agreements.

Identifiable intangible assets, net include the following:

	December 31,		Amortization
	2014	2013	Period
Product license rights	\$9,346,876	\$8,217,126	6-10 years
Developed technology and supply agreements	7,700,000	7,700,000	5-7 years
Other	6,400,000	6,400,000	5-13 years

	23,446,876	22,317,126
Less accumulated amortization	(10,631,372)	(7,681,128)
Total identifiable intangible assets, net	\$12,815,504	\$14,635,998

During the years ended December 31, 2014, 2013 and 2012, amortization expense was recorded as follows:

	2014	2013	2012
Cost of sales	\$2,300,244	\$2,009,472	\$1,461,411
Selling, general and administrative expenses	775,000	833,413	812,750
Total amortization expense	\$3,075,244	\$2,842,885	\$2,274,161

Amortization expense for product license rights and developed technology and supply agreements is included as a component of cost of sales and amortization of other identifiable intangible assets is included in selling, general and administrative expense in the Consolidated Statement of Comprehensive Loss.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Amortization expense for 2014, 2013 and 2012 and estimated amounts thereafter by year are as follows:

	Product License Rights	Developed Technology and Supply Agreements	Other	Total
Amortization expense for year ended December 31, 2014	\$ 1,194,529	\$ 1,105,715	\$ 775,000	\$ 3,075,244
Weighted Average Remaining Useful Life	5.2	4.3	2.4	4.0
Amortization expense for year ended December 31, 2013	\$ 908,758	\$ 1,100,714	\$ 833,413	\$ 2,842,885
Amortization expense for year ended December 31, 2012	\$ 692,363	\$ 769,048	\$ 812,750	\$ 2,274,161

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

9. Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities include the following:

	December 31,	
	2014	2013
Accrued compensation and related taxes	\$2,930,525	\$2,529,211
Accrued Canadian sales rebate, net (note 14)	633,162	252,671
Accrued royalties	463,823	361,559
Accrued sales incentives and other fees	557,918	546,296
Other	1,866,930	1,279,488
Total accrued expenses and other current liabilities	\$6,452,358	\$4,969,225

At December 31, 2014 and 2013, the amount of the Canadian accrued sales rebate and other reserves exceeded the amount of the underlying trade receivables outstanding. The net credit balance in trade receivables was reclassified for financial reporting purposes to accrued expense to recognize it as a net liability.

10. Stockholders' Equity**Preferred Stock**

There are 18,598 shares of series A convertible preferred stock outstanding at December 31, 2014. The series A preferred stock is convertible into common stock on a one-for-one basis, bears no dividend, has a liquidation preference of \$32.00 per share, votes as a class on matters affecting the series A preferred stock and has voting rights identical to the common stock on all other matters.

There are 54,734 shares of series B convertible preferred stock outstanding at December 31, 2014. The series B preferred stock is convertible into common stock on a one-for-one basis, bears no dividend, has a liquidation preference of \$48.00 per share, votes as a class on matters affecting the series B preferred stock and has voting rights identical to the common stock on all other matters.

The certificates of designations, voting powers, preferences and rights of the Company's series A and B and former C and D convertible preferred stock provide, among other items, that the 1:1 preferred stock to common stock conversion ratio will be adjusted as of the closing date of any offering of common stock issued at less than the prevailing market price. In the event the market price exceeds the offering price of the common stock, the conversion ratios of any series of preferred stock then outstanding are to be adjusted in accordance with a prescribed formula.

Subsequent to the issuances of the preferred stock, the Company has undertaken a number of common stock offerings that impact the above described adjustments to the preferred stock conversion ratios. As of December 31, 2014, current series A and B preferred stockholders holding 73,332 preferred shares are entitled to receive an aggregate of 123,114 shares (49,782 additional shares) of common stock upon conversion of their holdings, as a result of the conversion ratio adjustments. The number of shares issuable upon conversion is subject to further adjustment should the Company in the future undertake one or more offerings of its common stock at less than the prevailing market price. In 2014 and 2013, the Company issued 1,397 and 140,086 common shares to prior holders of the preferred stock based on the adjustment of the conversion ratios, respectively.

The 49,782 incremental shares associated with the conversion ratio adjustment will be recorded to common stock at par with the offset to additional paid in capital as all of the convertible preferred stock was issued prior to the November 16, 2000 effective date of certain provisions of ASC 470 (formerly, EITF 00-27 *Application of Issue No. 98-5 to Certain Convertible Instruments*).

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Common Stock

On January 29, 2014, the Company raised \$80,616,032 (net of \$5,633,968 in commission and other offering expenses) from the sale of 7,500,000 shares of the Company's common stock at \$11.50 per share. The Company plans to use the net proceeds from the offering for the continued development of its pharmaceutical product DSC127, for sales force expansion and for general corporate purposes.

On May 20, 2014, stockholders of the Company approved the proposal to increase the number of authorized shares of common stock from 35,000,000 to 50,000,000. On June 6, 2014, the Company amended its Certificate of Incorporation to reflect the increase in the number of authorized shares of common stock. During 2014, the Company issued 7,972,132 shares of common stock consisting of: 7,500,000 shares in connection with the January 29, 2014 equity offering; 351,651 shares upon the exercise of stock purchase warrants and options for which the Company received \$2,270,714; 119,084 shares in connection with the vesting of 148,050 restricted share units, net of the shares withheld for payment of withholding taxes; and 1,397 shares in connection with preferred stock conversion ratio adjustments.

On May 29, 2013, the Company amended its Certificate of Incorporation to reflect an increase in the number of authorized shares of common stock from 25,000,000 to 35,000,000.

During 2013, the Company issued 822,348 shares of common stock consisting of 556,855 shares upon the exercise of stock purchase warrants and options for which the Company received \$2,817,001 (net of \$45,368 in expenses), 140,086 shares in connection with the preferred stock ratio adjustments, 120,957 shares in connection with the vesting of 145,650 restricted share units, net of the shares withheld for payment of withholding taxes, and 4,450 shares to a retired director of the Company for consulting services.

In 2012, the Company received net cash proceeds of \$51,461,053 (net of \$4,605,439 in commission and other offering expenses) from the sale of 5,646,300 shares of common stock. On April 5, 2012, 2,125,000 common stock shares were sold at \$9.25 per share and on December 5, 2012, 3,521,300 common stock shares were sold at \$10.34 per share. The Company used the net proceeds from the offerings for the development of its pharmaceutical product DSC127 and for general corporate purposes.

During 2012, the Company issued 255,210 shares of common stock upon the exercise of stock purchase warrants and options and received \$1,225,620 (net of \$10,560 in issuance costs), 43,081 net shares of common stock in connection with the vesting of 51,500 restricted share units, net of the shares withheld for payment of withholding taxes, and 2,500 shares of common stock to a retiring director of the Company for past services.

Stock Purchase Warrants

At December 31, 2014, the Company had warrants outstanding to purchase shares of the Company's common stock consisting of the following:

Series	Number of Warrants	Exercise Price	Expiration Date
N	100,000	\$ 6.25	February 22, 2015
O	98,234	\$ 5.50	February 22, 2015
P	2,187	\$ 6.25	February 16, 2015
Q	133,333	\$ 5.50	February 22, 2015
R	1,705,330	\$ 9.90	June 22, 2016
S	50,000	\$ 11.81	January 14, 2019
Total	2,089,084		

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

During 2014, a total of 266,188 warrants were exercised on a for cash and cashless basis consisting of 132,666 Series O, 127,272 Series R, and 6,250 Series L warrants. A total of 264,611 shares of common stock were issued in connection with the 2014 warrant exercises. Additionally, in 2014, a total of 50,000 Series S warrants were forfeited. In 2013, a total of 624,882 warrants were exercised on a for cash and cashless basis consisting of 367,814 Series K, 200,893 Series J, 53,667 Series O, and 2,508 Series P warrants. A total of 421,465 shares of common stock were issued in connection with the 2013 warrant exercises. In 2012, a total of 135,548 warrants were exercised on a cash basis consisting of 47,333 Series O, 66,965 Series J and 21,250 Series K warrants. A total of 135,548 shares of common stock were issued in connection with the 2012 warrant exercises.

Equity Based Compensation

Under the Derma Sciences, Inc. 2012 Equity Incentive Plan (the "EIP Plan") the Company is authorized to issue shares of common stock. On May 20, 2014, stockholders of the Company approved the proposal to increase the number of authorized shares of common stock the Company can issue from 4,500,000 to 6,000,000. The EIP Plan authorizes the Company to grant equity-based and cash-based incentive compensation in the form of stock options, stock appreciation rights, restricted shares, restricted share units, other share-based awards and cash-based awards, for the purpose of providing the Company's employees, non-employee directors and consultants with incentives and rewards for performance. At December 31, 2014, options to purchase 2,166,959 shares and 651,883 restricted share units were issued and outstanding under the EIP Plan and 2,366,472 shares were available for grant.

Stock Options

The EIP Plan permits the granting of both incentive and nonqualified stock options to employees and nonqualified stock options to non-employee directors and consultants of the Company. The option exercise price may not be less than the fair market value of the stock on the date of the grant of the option. The duration of each option may not exceed 10 years from the date of grant.

For the years ended December 31, 2014, 2013 and 2012, the fair value of each option award was estimated at the date of grant using the Black-Scholes option-pricing model. The weighted-average assumptions for the years ended December 31, 2014, 2013 and 2012 were as follows:

	2014	2013	2012
Risk-free interest rate	1.79%	1.22%	1.11%
Volatility factor	63.2%	69.9%	73.6%
Dividend yield	0 %	0 %	0 %
Expected option life (years)	5.79	6.14	6.25

The risk-free rate utilized represents the U.S. treasury yield curve rate for the expected option life at the time of grant. The volatility factor was calculated based on the Company's historical stock price volatility equal to the expected life of the option at the grant date. The dividend yield is 0% since the Company does not anticipate paying dividends in the near future. The simplified expected option life method is used to determine the expected option life for Company employees and directors while the contractual option life period is utilized for consultants.

Based on the Company's historical experience of options that were forfeited before becoming fully vested, the Company has assumed an annualized forfeiture rate of 1.0% for all options. The Company will record additional expense if the actual forfeiture rate is lower than estimated, and will record a recovery of prior expense if the actual forfeiture rate is higher than estimated.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

A summary of the Company's stock option activity and related information for the years ended December 31, 2014, 2013 and 2012 follows:

	Options	Weighted Average Exercise Price
Outstanding – January 1, 2012	1,582,683	\$ 5.82
Granted	268,160	\$ 8.93
Forfeited	(61,825)	\$ 7.53
Exercised	(149,033)	\$ 4.37
Outstanding – December 31, 2012	1,639,985	\$ 6.38
Granted	421,480	\$ 12.14
Forfeited	(36,878)	\$ 10.99
Exercised	(184,824)	\$ 5.50
Expired	(25,530)	\$ 13.16
Outstanding – December 31, 2013	1,814,233	\$ 7.67
Granted	637,383	\$ 12.98
Forfeited	(116,765)	\$ 12.48
Exercised	(145,053)	\$ 6.42
Expired	(22,839)	\$ 10.70
Outstanding – December 31, 2014	2,166,959	\$ 9.03
Exercisable at December 31, 2014	1,618,949	\$ 7.84
Expected to vest at December 31, 2014	2,145,289	\$ 9.03

During 2014, the Company granted 452,057 service based options and 185,326 performance based options to Company employees, directors and consultants. During 2013, the Company granted 300,880 service based options and 120,600 performance based options to Company employees, directors and consultants. During 2012, the Company granted 199,460 service based options and 68,700 performance based options to Company employees,

directors and consultants. The weighted average fair value per share of options granted during the years ended December 31, 2014, 2013 and 2012 was \$7.63, \$8.30 and \$5.93, respectively.

During 2014, 145,053 stock options were exercised on a for cash and cashless basis. A total of 87,040 shares of common stock were issued in connection with the 2014 stock option exercises. During 2013, 184,824 stock options were exercised on a for cash and cashless basis. A total of 135,390 shares of common stock were issued in connection with the 2013 stock option exercises. During 2012, 149,033 stock options were exercised on a for cash and cashless basis. A total of 119,662 common stock shares were issued in connection with the 2012 stock option exercises.

The aggregate intrinsic value of outstanding and exercisable stock options was \$3,750,551 and \$3,725,913, respectively, at December 31, 2014. The intrinsic value represents the difference between the Company's closing stock price on the last trading day of the year of \$9.31 and the exercise price of the options, multiplied by the number of in-the-money stock options that would have been received by the option holders had all exercised their options on December 31, 2014. The intrinsic value of options exercised in 2014, 2013 and 2012 was \$684,060, \$1,286,818 and \$792,315, respectively.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

The following table summarizes information related to stock options outstanding and exercisable at December 31, 2014:

Range of Exercise Prices	Options Outstanding		Weighted-Average Exercise Price	Options Exercisable	
	Number Outstanding	Weighted-Average Remaining Contractual Life		Number Exercisable	Weighted-Average Exercise Price
\$2.88 - \$4.00	227,586	2.38	\$ 3.43	227,586	\$ 3.43
\$4.01 - \$6.00	389,537	4.67	\$ 5.06	389,537	\$ 5.06
\$6.01 - \$10.00	591,675	6.02	\$ 8.04	543,864	\$ 7.97
\$10.01 - \$13.99	958,161	8.59	\$ 12.58	457,962	\$ 12.26
	2,166,959	6.53	\$ 9.03	1,618,949	\$ 7.84

During the years ended December 31, 2014, 2013, and 2012 stock option compensation expense was recorded as follows:

	2014	2013	2012
Cost of sales	\$178,899	\$95,726	\$39,789
Selling, general and administrative expenses	2,625,129	2,087,827	1,470,269
Research and development	194,427	165,581	103,289
Total stock option compensation expense	\$2,998,455	\$2,349,134	\$1,613,347

As of December 31, 2014, there was \$2,666,813 of unrecognized compensation cost related to non-vested service based awards granted under the plan. These costs are expected to be recognized over the options' remaining weighted average vesting period of 1.80 years. There was no unrecognized compensation cost related to non-vested performance based awards at December 31, 2014.

Restricted Share Units

The Company has issued service, performance and market based restricted share units to employees and directors of the Company. Expense for restricted share awards is amortized on a straight-line basis over the awards' vesting period.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

The following table summarizes the restricted share unit activity for the period:

	Number of Units	Weighted Average Fair Value
Unvested – January 1, 2012	51,500	\$ 7.07
Granted	786,900	\$ 8.78
Vested	(51,500)	\$ 7.07
Unvested – December 31, 2012	786,900	\$ 8.78
Granted	79,300	\$ 13.65
Vested	(145,650)	\$ 10.18
Unvested – December 31, 2013	720,550	\$ 9.03
Granted	101,100	\$ 10.05
Vested	(148,050)	\$ 11.86
Cancelled	(21,717)	\$ 12.78
Unvested – December 31, 2014	651,883	\$ 8.47

In connection with the vesting of restricted share unit awards during the year ended December 31, 2014, 28,966 common stock shares with a fair value of \$300,070 were withheld in satisfaction of employee tax withholding obligations. In connection with the vesting of restricted share unit awards during the year ended December 31, 2013, 24,693 common stock shares with a fair value of \$228,149 were withheld in satisfaction of employee tax withholding obligations. In connection with the vesting of restricted share unit awards during the year ended December 31, 2012, 8,419 common stock shares with a fair value of \$80,550 were withheld in satisfaction of employee minimum tax withholding obligations.

During 2014, 2013 and 2012, restricted share unit compensation expense was \$2,593,239, \$2,634,340 and \$490,870, respectively, and included in selling, general and administrative expense.

As of December 31, 2014, the intrinsic value of the non-vested awards was \$6,069,031 and there was \$2,793,562 of unrecognized compensation cost related to unvested restricted share unit awards. These costs are expected to be

recognized over the restricted shares units' remaining weighted average vesting period of 0.96 years.

In consideration of prior service, the Company accelerated the vesting of any unvested stock options and the restricted share units scheduled to vest in 2014 of a retiring director and extended the date to exercise vested stock options to 24 months (versus 90 days) from the date of retirement. An additional \$48,536 of stock based compensation expense was recognized during 2014 and included in selling, general and administrative expense in connection with the retirement. During 2013, in consideration of prior service to the Company, a retiring director received 5,000 restricted share units, accelerated vesting of any unvested stock options and restricted share units and extended the date to exercise vested stock options to the earlier of 36 months or the awards original expiration date (versus 90 days) from the date of the retirement. Also, during 2013, the Company granted 4,450 shares of common stock to a former director for consulting services. An additional \$337,422 of stock based compensation expense was recognized during 2013 and included in selling, general and administrative expense in connection with these activities. During 2012, in consideration of prior service to the Company, a retiring director received 2,500 shares of common stock, acceleration of vesting of any unvested restricted share units and extension of the date to exercise vested stock options to 36 months (versus 90 days) as of that date. For 2012 a charge of \$137,393 was included in stock based compensation in connection with these benefits.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Shares Reserved for Future Issuance

At December 31, 2014, the Company had reserved the following shares of common stock for future issuance:

Convertible preferred shares (Series A – B)	73,332
Additional stock issuable related to conversion of preferred stock	49,782
Common stock options outstanding	2,166,959
Common stock warrants outstanding	2,089,084
Restricted share units outstanding	651,883
Common stock equivalents available for grant	2,366,472
Total common stock shares reserved	7,397,512

11. Operating Segments

The Company operates in three segments: advanced wound care, traditional wound care and pharmaceutical wound care products. They are managed separately as each segment requires different technology, marketing and sales strategies. Advanced wound care products principally consist of both novel and otherwise differentiated dressings, bandages and ointments designed to promote wound healing and/or prevent infection. Traditional wound care products principally consist of commodity related dressings, ointments, gauze bandages, adhesive bandages, wound closer strips, catheter fasteners and skin care products. Pharmaceutical wound care products consist of DSC127, a novel product for the treatment of a variety of dermal applications.

Advanced and traditional wound care products are marketed globally to acute care, extended care, home health care, wound and burn care clinics and physician offices. The Company utilizes a broad network of well-established distributors to deploy the majority of its products to end users. A smaller portion of the Company's sales are sold directly to care providers and through retail. The advanced and traditional wound care products are both manufactured internally and sourced from third party suppliers. The majority of marketing expenses are deployed in support of advanced wound care products with traditional wound care products requiring limited support. The Company utilizes direct sales representatives, distributor relationships and contractual relationships with buying groups and wound care service providers to sell its products. Direct sales representatives are used solely in support of advanced wound care sales in the U.S. and the U.K. and for both advanced and traditional wound care products in Canada.

The pharmaceutical wound care segment is presently limited to the development of DSC127 for diabetic foot ulcers and pre-clinical work on scar prevention.

Each operating segment is managed at the segment contribution level consisting of gross profit minus direct expense consisting of distribution, marketing, sales, research and development and intangible amortization expenses. Expenses are allocated directly by segment to the extent possible. Expenses common to all three operating segments are allocated consistently using activity based assumptions. The aggregation or allocation of indirect expenses by segment is not practical.

12.**Income Taxes**

Loss before income taxes for the year ended December 31, 2014, 2013 and 2012 consist of the following components:

	2014	2013	2012
Domestic	(37,854,272)	\$(23,145,554)	\$(14,590,416)
Foreign	(2,068,331)	(658,388)	149,503
Loss before income taxes	\$(39,922,603)	\$(23,803,942)	\$(14,440,913)

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

The components of income tax (benefit) provision for the year ended December 31 are as follows:

	2014	2013	2012
Current:			
Federal	\$-	\$-	\$-
State	-	5,365	-
Foreign	(165,953)	22,590	136,873
Total current	(165,953)	27,955	136,873
Deferred:			
Federal	124,316	149,108	(2,291,057)
State	(105,575)	(34,143)	(219,463)
Foreign	(3,836)	17,191	3,165
Total deferred	14,905	132,156	(2,507,355)
Total income tax (benefit) provision	\$(151,048)	\$160,111	\$(2,370,482)

In 2014, the Company recognized a \$151,048 income tax benefit consisting of a \$169,789 foreign income tax benefit and a \$18,741 U.S. deferred income tax provision. The foreign income tax benefit relates primarily to the tax benefit recognized as a result of the net loss incurred by the Canadian operations, partially offset by taxes paid on the dividend from the Comvita investment. The U.S. deferred tax expense is due to differences in financial reporting and tax treatment of goodwill of \$166,376 net of amortization for financial reporting but not tax purposes of acquired MedEfficiency identified intangible assets of \$118,803 and a tax benefit related to a reduction in the Company's U.S. valuation allowance to offset the tax impact of the unrealized gain on equity securities included in accumulated other comprehensive income of \$28,832.

The reconciliation of income tax computed at the U.S. federal statutory tax rates to income tax expense along with percentage of loss before income taxes for the year ended December 31, 2014, 2013 and 2012 is as follows:

	2014		2013		2012	
Tax benefit at federal statutory rate	\$ (13,573,685)	34.0 %	\$ (8,093,340)	34.0 %	\$ (4,909,912)	34.0 %

Other	-	(654)
Deferred tax liabilities	(4,097,587)	(4,414,287)
Valuation allowance	(34,255,466)	(19,119,723)
Net deferred tax liabilities	\$(1,693,194)	\$(1,665,891)

The net deferred tax liability of \$1,693,194 consists of a net noncurrent deferred tax liability of \$1,700,640 and a net current deferred tax asset of \$7,446 as of December 31, 2014. The net deferred tax liability includes a U.S. deferred tax liability of \$1,347,754 related to differences in the basis for financial reporting and tax purposes for goodwill, a deferred liability of \$106,368 related to intangible assets acquired from MedEfficiency and a \$239,072 net deferred tax liability related to the Company's Canadian operations. The deferred tax asset is included in prepaid expenses and other current assets in the Consolidated Balance Sheet.

At December 31, 2014, the Company has U.S. federal net operating loss carry forwards of approximately \$78,500,000 that begin to expire in 2018. For U.S. state income tax purposes, the Company has net operating loss carry forwards in a number of jurisdictions in varying amounts and with varying expiration dates. Federal and state net operating loss carryforwards include excess stock-based compensation benefit deductions of which, if recognized in the future, will be recorded as additional paid in capital in the Consolidated Balance Sheet. The Company also has \$1,581,000 in research and development tax credit carry forwards and \$205,000 in foreign tax credit carry forwards which begin to expire in 2031 and 2019, respectively.

The Company has determined that the amount by which the U.S. federal net operating loss carryforwards can be utilized in any year is limited under the Internal Revenue Code Section 382 regarding changes in ownership of corporations. Due to uncertainties surrounding the Company's ability to use its net operating loss carryforwards, foreign tax credit and realize the other net deferred tax assets based on historical operating results and ownership change limitations a full valuation allowance has been provided as of December 31, 2014 and 2013 for the deferred tax assets for the U.S. and U.K.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

13. Retirement Benefits

The Company maintains a profit sharing 401(k) plan for eligible full-time U.S. employees. Participants may contribute a fixed percentage of their salary to the plan, subject to IRS limitations. The Company makes a matching contribution up to a maximum amount of each participant's annual base salary earnings contributed to the plan. During 2014, 2013 and 2012, the Company matched 100% on the first 4% of each participant's contributed annual base salary. Company contributions to the plan for the years ended December 31, 2014, 2013 and 2012 were \$517,872, \$303,913 and \$208,654, respectively.

The Company's Canadian subsidiary maintains a group retirement savings plan (Registered Retirement Savings Plan) for eligible full time Canadian employees. The Canadian subsidiary makes a matching contribution to the plan based on a percentage of each participant's contributed annual gross earnings. Employee contribution limits to the group retirement savings plan are set by the Canada Customs and Revenue Agency. During 2014, 2013 and 2012, the Company matched 100% on the first 4% of each participant's contributed annual gross earnings. The Company's Canadian subsidiary's contributions to the plan for the years ended December 31, 2014, 2013 and 2012 were \$152,551, \$133,319 and \$109,442, respectively.

14. Commitments and Contingencies

Operating Leases

The Company has non-cancelable operating lease agreements for its facilities and equipment expiring in various years through 2021. Total lease expense under these lease agreements was \$1,565,307, \$1,227,718 and \$1,544,575 in 2014, 2013 and 2012, respectively. Total minimum lease payments under each lease are recorded on a straight-line basis to lease expense over the lease term. Differences between the recognition of lease expense on a straight-line basis and payments owed and/or free rent are recorded as deferred rent. Tenant improvement allowances are recorded as deferred lease expense as received, and amortized to lease expense over the lesser of the corresponding asset life or the lease term. At December 31, 2014 and 2013, the Company had deferred rent of \$521,358 and \$242,325, respectively, recorded in long-term liabilities on the Consolidated Balance Sheet.

The leases generally provide for scheduled increases in future minimum annual lease payments over the life of the lease and for renewal options consistent with the terms of the existing lease. It is expected that these leases will be renewed or replaced by leases on other property and equipment, as needed.

Minimum future lease payments under existing operating leases as of December 31, 2014 are:

Minimum Future Rental Payments Year Ending December 31,	Amount
2015	1,607,369
2016	1,636,913
2017	1,408,208
2018	938,011
2019	470,355
Thereafter	329,939
Net minimum future rental payments	\$ 6,390,795

Comvita Licensing Agreement

In February 2010, the Company entered into a new agreement with Comvita under which the Company received perpetual and exclusive worldwide licensing rights for Manuka Honey based MEDIHONEY wound and skin care products for all markets outside of the consumer market (the “Comvita Agreement”). The Comvita Agreement supersedes the prior agreement, which was terminated as of the effective date. The Comvita Agreement also provides that Comvita will serve as the Company’s supplier for Manuka Honey and will not provide Manuka Honey to any other entities for use in the professional medical-surgical marketplace. The Comvita Agreement calls for graduated royalty payments based on sales and milestone payments of up to \$20,000,000 based on achievement of specified net sales objectives of which \$2,000,000 was incurred and paid in 2012, which payments were recorded as additions to the MEDIHONEY license intangible asset and are being amortized to cost of sales. The license rights may be terminated or rendered non-exclusive by Comvita if the Company fails to meet certain minimum royalty requirements.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Comvita is a stockholder of the Company and its Chief Executive Officer serves on the Company's Board of Directors. The Company purchased \$2,203,992, \$2,266,964 and \$1,653,075 of medical grade honey from Comvita in 2014, 2013 and 2012, respectively. In addition, the Company incurred MEDIHONEY royalties of \$1,357,040, \$1,240,818 and \$901,826 in 2014, 2013 and 2012, respectively. Amounts due to Comvita for raw material purchases and royalties totaled \$625,947 and \$421,578 at December 31, 2014 and 2013, respectively. The Company made equity investments in Comvita common stock totaling \$8,483,693 (note 4) during 2014 and 2013. Also, the Company received \$125,000 from Comvita in 2014 as reimbursement for a portion of a licensing fee paid by the Company in 2013.

Quick-Med Technologies, Inc. – License Agreement

In July 2012, the Company entered into a new patent and technology license agreement (the "QMT Agreement") with Quick-Med Technologies, Inc. ("QMT") relating to QMT's proprietary anti-microbial technology (the "Technology") utilized in the Company's BIOGUARD products. The QMT Agreement supersedes a prior agreement, which had been in effect since March 2007.

Under the QMT Agreement, QMT granted to the Company an exclusive, royalty-bearing right and license to make, use and sell products incorporating the Technology worldwide, except for India (the "Territory"). If the Company does not achieve the first commercial sale of a product incorporating the Technology in Europe and in Asia and Central and South America by certain dates, or in the event that, for a given calendar year, the Company fails to meet a minimum net sales requirement under the QMT Agreement, QMT has the right, as its sole remedy within each geographic area affected, to either terminate the QMT Agreement or convert the exclusive license in that geographic area to a non-exclusive license. Unless otherwise terminated pursuant to the QMT Agreement, the term of the QMT Agreement continues, with respect to each country in the Territory, until the expiration of the patent rights in that country.

In 2012, the Company paid QMT an upfront license fee of \$1,300,000. This upfront fee has been capitalized as an identifiable intangible asset and is being amortized over its estimated useful life of seven years. In addition to the upfront license fee, royalties are payable to QMT based upon a sliding scale of the Company's net sales of products incorporating the Technology and declining as net sales increase. The QMT Agreement also requires the Company to make certain milestone payments of up to \$3,500,000 to QMT based upon the achievement of certain net sales levels for four consecutive calendar quarters. In 2014, 2013 and 2012, the Company incurred QMT royalties of \$178,476, \$202,377 and \$279,537, respectively.

In the event that QMT desires to sell the Technology, patent rights and improvements or QMT receives a bona fide offer from an unaffiliated third party to purchase the same during the term of the QMT Agreement, the Company has the right of first negotiation or right of first refusal, respectively, relating to any such sale.

BiodLogics, LLC License Agreement

On January 14, 2014, the Company entered into a license, market development and commercialization agreement (the “Agreement”) with BiodLogics, LLC (“BioD”) relating to BioD’s human placental based products (the “Licensed Products”) and intellectual property related thereto.

Under the Agreement, BioD granted to the Company an exclusive, perpetual, royalty-bearing license to use, offer for sale and sell, the Licensed Products in North America (the “Territory”), including the rights to sublicense solely as provided in the Agreement, for a broad range of dermal applications (the “Field”). During the term of the Agreement, the Company will be responsible for the sale and marketing of the Licensed Products in the Field throughout the Territory. As part of its commercialization efforts, the Company is required to fund clinical studies up to \$2,000,000 in support of the Field pursuant to the Agreement. In 2014, the Company funded \$440,246 as part of these commercialization efforts.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

The Company paid BioD an initial license fee of \$1,250,000 and granted BioD a warrant to purchase 100,000 shares of the Company's common stock. One quarter (25%) of the warrant was exercisable immediately at a price of \$11.81 per share, while the remaining 75% of the warrant becomes exercisable, if at all, upon the achievement of certain milestones. The warrant expires in January 2019 (note 10). The warrant has been valued at \$129,750 using the Black-Scholes option pricing model. Total consideration paid to BioD of \$1,379,750 has been recorded as an intangible asset and is being amortized to cost of sales over an estimated useful life of seven years. In addition to the initial license fee and warrant, royalties are payable to BioD based upon a sliding scale of the Company's net sales of Licensed Products within the Territory and declining as net sales increase. Royalty rates range from the low double digits and decline to the mid-single digits. The Agreement also requires the Company to make milestone payments to BioD of up to \$19,750,000 based upon the achievement of certain development events and annual net sales levels.

The Agreement may be terminated as follows: (i) upon mutual agreement of the parties; (ii) by BioD if the Company challenges certain BioD patents or trade secrets; (iii) by BioD if the Company fails to meet the annual minimum net sales requirement under the Agreement, unless the Company pays the difference between the amount of royalties that would have been due had the minimum annual net sales for such year been achieved and royalty payments made by the Company with respect to net sales during such year plus any milestone payments payable; or (iv) by either party in the event of a material breach or certain events of bankruptcy. The minimum annual net sales requirement commences in 2015, and is \$2,000,000 for the year.

USC License Agreement

In November 2007, the Company entered into a license agreement (the "License Agreement") with the University of Southern California ("USC") pursuant to which the Company acquired exclusive rights to a number of U.S. and foreign patents and non-exclusive rights to one patent, together with trade secrets and know-how, related to an angiotensin analog (the patents, trade secrets and know-how, collectively, the "Angiotensin Analog Technology"). The Angiotensin Analog Technology relates to all dermal applications including applications for the treatment of chronic wounds such as diabetic ulcers, leg ulcers associated with venous insufficiency, pressure ulcers (bed sores), burns and surgical scars.

The Company paid to or on behalf of USC an initial license fee which was charged to expense. The Company will pay USC royalties relative to sales of products employing the Angiotensin Analog Technology (the "Angiotensin Products") at specified rates in respect of revenues less than \$100 million and revenues equal to or greater than \$100 million,

respectively, together with milestone payments of up to \$9,625,000 predicated upon obtaining FDA approval of the various indications for the Angiotensin Products, as well as the attainment of various sales objectives.

The compound employing the Angiotensin Analog Technology is classified as a “drug,” the sale of which is conditioned upon FDA approval. The process of obtaining FDA approval for the compound consists of subjecting the compound to a series of pre-clinical and clinical studies, these latter known as Phase 1, Phase 2 and Phase 3 studies.

The first product, DSC 127, utilizing this compound for the treatment of diabetic foot ulcers has successfully undergone pre-clinical, Phase 1 and Phase 2 clinical studies for use in the treatment of diabetic foot ulcers. The first of two Phase 3 clinical trials commenced in the first quarter of 2013, with the second commencing during the second quarter of 2013.

The Company is under no obligation to undertake or complete further studies in respect of the Angiotensin Analog Technology. Should it not do so, the Company may either sublicense the Angiotensin Analog Technology to one or more third parties or release the Angiotensin Analog Technology to USC. In this latter event, USC would reimburse the Company for certain of its costs incident to clinical studies that have heretofore been performed.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Canadian Distribution Agreement

In May 2005, the Company entered into a distribution agreement with a Canadian company to serve as the exclusive distributor of its products in Canada. The agreement also appoints the distributor as the Company's servicing agent to fulfill supply contracts held directly by the Company. The agreement was most recently amended in January 2011, extending it through April 2016. The Company recognizes revenue under the agreement when title and risk of loss pass to the distributor and collectability is reasonably assured, which is at the time product is shipped to the distributor. Payment terms from the distributor are 30 days. Either party has the right to terminate the agreement when an event of default (as defined) has occurred with respect to the other party. The distributor is entitled to continue to sell or otherwise dispose of all inventory owned by it from and after the date of contract expiration or termination. If termination of the agreement is not occasioned by breach by the distributor, the distributor will be entitled on notice to the Company to return saleable inventory (as defined) to the Company. Estimated returns are reserved at the time of sale. Since the inception of the agreement, sales returns have been minimal.

The distributor assumes responsibility for customer service, product delivery and maintenance and warehousing of sufficient inventory to meet agreed upon order fulfillment requirements. On an ongoing basis, the distributor places inventory replenishment orders with the Company at agreed upon prices, 120 days in advance of scheduled delivery. Unless amended, each order becomes non-cancelable 90 days in advance of scheduled delivery.

With respect to sales made by the distributor, the Company pays the distributor an agreed upon distribution fee. The Company reimburses the distributor for the difference between the price paid by the distributor and the Company's contract price with the end customer, upon submission by the distributor of an agreed upon rebate report. The distribution fee is recorded as a reduction of revenue under this agreement.

New Cast Industry Co., Ltd. Supply Agreements

On April 17, 2012, the Company entered into a supply agreement (the "North America Agreement") with New Cast Industry Co. Ltd. ("NCIC") relating to NCIC's proprietary technology for the casting element within the TCC-EZ total contact casting system (the "Technology"). Under the North America Agreement, NCIC agreed to exclusively supply the Company with its product utilizing the Technology and granted the Company the exclusive right to sell products incorporating the Technology in North America. During the term of the North America Agreement, the Company is obligated to purchase an escalating minimum number of units of product each year. Product costs are negotiable in

accordance with the agreement terms. Unless otherwise terminated pursuant to the terms of the North America Agreement, the term is for five years with automatic five year renewals.

On March 27, 2013, the Company entered into a supply agreement (the “International Agreement”) with NCIC. Under the International Agreement, NCIC agreed to exclusively supply the Company with its product utilizing the Technology and granted the Company the exclusive right to sell products incorporating the Technology outside North America. If the Company does not achieve the first commercial sale of a product incorporating the Technology in Latin America, Europe, Middle East, Australia, Asia and India (the “Territory”) by certain dates, NCIC has the right, as its sole remedy, to convert the exclusive license in the Territory to a non-exclusive license. Unless otherwise terminated pursuant to the terms of the International Agreement, the term is for five years with automatic five year renewals.

In consideration for the exclusive international rights set forth above, the Company paid NCIC \$100,000. The cost of \$100,000 has been capitalized as an identifiable intangible asset and is being amortized over the initial five year term of the agreement. Further, the International Agreement includes milestone payments of up to \$1,000,000 to NCIC based upon achievement of international net sales levels during a calendar year.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements

Executive Employment Agreements

The five executive officers of the Company are appointed by and serve at the discretion of the Board of Directors pursuant to one year employment agreements that are subject to renewal annually as of April 1st. The agreements were renewed in March 2015. The agreements provide for annual salary and provision for bonus and equity based compensation assuming financial and personal objectives are met. The agreements also outline certain obligations that may be triggered by a change in control and severance for failure to renew an agreement other than for cause.

Contingencies

On occasion, the Company is involved in claims and other legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on the Company's consolidated financial position, results of operations, or liquidity.

15. Quarterly Consolidated Financial Data (Unaudited)

(\$'s 000's)	Quarter				
	First	Second	Third	Fourth	Year

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company has carried out an evaluation under the supervision and with the participation of management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's "disclosure controls and procedures" as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act") as of the end of the period covered by this report. The Company's disclosure controls and procedures are designed so that information required to be disclosed in the Company's reports filed under the Exchange Act, such as this Annual Report on Form 10-K, is recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms. The Company's disclosure controls and procedures are also intended to ensure that such information is accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives, and management necessarily is required to use its judgment in evaluating the cost-benefit relationship of possible disclosure controls and procedures. Based upon this evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2014, the Company's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed in the reports that the Company files and submits under the Exchange Act is recorded, processed, summarized and reported as and when required and such information is accumulated and communicated as appropriate to allow timely decisions regarding required disclosures.

Changes in Internal Control Over Financial Reporting

There have been no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2014, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that:

(i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company;

(ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and

- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Our management assessed the effectiveness of the Company's internal control over financial reporting as of December 31, 2014. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (1992)*.

Based upon our assessment and those criteria, management has concluded that the Company maintained effective internal control over financial reporting as of December 31, 2014.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2014 has been audited by KPMG LLP, our independent registered public accounting firm, who also audited our consolidated financial statements as of December 31, 2014 and 2013 and for each of the years in the three-year period ended December 31, 2014 included in this Annual Report on Form 10-K, as stated in their report which appears with our accompanying consolidated financial statements.

Item 9B. Other Information.

On March 9, 2015, the Company entered into amended employment agreements with each of Edward J. Quilty, John E. Yetter, Robert C. Cole, Frederic Eigner and Barry J. Wolfenson to (1) extend the term of each employment agreement for a period of two years, expiring on March 31, 2017, and (2) incorporate the Company's claw-back policy with respect to incentive compensation paid by the Company to each executive officer. The amendments to the employment agreements for Mr. Quilty, Mr. Yetter, Mr. Cole, Mr. Eigner and Mr. Wolfenson are filed as exhibits hereto and incorporated herein by reference. For further information about the compensation arrangements of each of the Company's named executive officers, see the Company's definitive proxy statement relating to our 2015 annual meeting of stockholders, which we will file with the Securities and Exchange Commission within 120 days after December 31, 2014.

On March 9, 2015, the Company entered into an employment agreement with John Caminis, M.D., as Chief Medical Officer, effective as of March 9, 2015 and expiring on March 9, 2017, providing for an annual base salary of

\$325,000, a signing bonus of \$50,000 and a target bonus for 2015 of 30% of base salary. The agreement also provides for incentive compensation at the discretion of the Board of Directors. The agreement further provides that, upon the Company's failure to renew the agreement or termination of employment, each without cause, Mr. Caminis is entitled to (i) payment of severance compensation in the amount of one-year's base salary, to be paid in twelve equal monthly installments, (ii) at the Company's expense, the same health care benefits provided to the Company's active employees for twelve months following such Severance Event and (iii) an extension of the period to exercise any options to purchase securities of the Company to the earlier to occur of (a) the expiration thereof, as set forth in the option instrument, or (b) the tenth anniversary of the original grant date of the option instrument (the "Option Exercise Extension"). Mr. Caminis' receipt of severance benefits and an Option Exercise Extension under his employment agreement is further conditioned upon his release of any claims against our Company. Mr. Caminis' employment agreement also contains a claw-back provision. Mr. Caminis' employment agreement is filed as an exhibit hereto and incorporated herein by reference.

Part III

Item 10. Directors, Executive Officers and Corporate Governance

Information in response to this Item is incorporated herein by reference to our definitive proxy statement for our 2015 annual meeting of stockholders to be filed with the Securities and Exchange Commission no later than 120 days after December 31, 2014.

Item 11. Executive Compensation

Information in response to this Item is incorporated herein by reference to our definitive proxy statement for our 2015 annual meeting of stockholders to be filed with the Securities and Exchange Commission no later than 120 days after December 31, 2014.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information in response to this Item is incorporated herein by reference to our definitive proxy statement for our 2015 annual meeting of stockholders to be filed with the Securities and Exchange Commission no later than 120 days after December 31, 2014.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information in response to this Item is incorporated herein by reference to our definitive proxy statement for our 2015 annual meeting of stockholders to be filed with the Securities and Exchange Commission no later than 120 days after December 31, 2014.

Item 14. Principal Accounting Fees and Services

Information in response to this Item is incorporated herein by reference to our definitive proxy statement for our 2015 annual meeting of stockholders to be filed with the Securities and Exchange Commission no later than 120 days after December 31, 2014.

Part IV

Item 15. Exhibits, Financial Statement Schedules

(a) Financial Statements

- (1) Financial statements and related documents are listed in the Index under Item 8 of this report.

- (2) All financial statement schedules are omitted because they are not applicable, not material or the required information is shown in the financial statements or notes thereto.

(b) Exhibits

Edgar Filing: DERMA SCIENCES, INC. - Form 10-K

Exhibit Number	Description
