2	SEMI-ANNUAL REPORT	FEBR	UARY 29, 2012

Dear Shareholder

Risk assets were advancing at this time last year despite a wave of geopolitical revolutions, soaring oil prices and natural disasters in Japan. Markets reversed sharply in May, however, when escalating political strife in Greece rekindled fears about sovereign debt problems spreading across Europe. Concurrently, global economic indicators signaled that the recovery had slowed. Confidence was further shaken by the prolonged debt ceiling debate in Washington, DC. On August 5, 2011, Standard & Poor s downgraded the US government s credit rating and turmoil erupted in financial markets around the world. Extraordinary levels of volatility persisted in the months that followed as Greece teetered on the brink of default, debt problems escalated in Italy and Spain, and exposure to European sovereign bonds stressed banks globally. Financial markets whipsawed on hopes and fears. Macro news flow became a greater influence on trading decisions than the fundamentals of the securities traded. By the end of the third quarter, equity markets had fallen nearly 20% from their April peak while safe-haven assets such as US Treasuries and gold had rallied to historic highs.

October brought enough positive economic data to assuage fears of a global double-dip recession. Additionally, European leaders began to show progress toward stemming the region s debt crisis. Investors began to reenter the markets and risk assets recovered through the month. But a lack of definitive details about Europe s rescue plan eventually raised doubts among investors and thwarted the rally at the end of October. The last two months of 2011 saw more political instability in Greece, unsustainable yields on Italian government bonds, and US policymakers in gridlock over budget issues. Global central bank actions and improving economic data invigorated the markets, but investor confidence was easily tempered by sobering news flow.

Investors showed more optimism at the start of 2012. Risk assets rallied through January and February as economic data grew stronger and debt problems in Europe stabilized. In the United States, jobs data signaled solid improvement in the labor market and the Federal Reserve indicated that it would keep short-term interest rates low through 2014. In Europe, policymakers made significant progress toward securing a Greek bailout plan and restructuring the nation s debt. Nevertheless, considerable head-winds remain. Europe faces a prolonged recession, the US economy still remains somewhat shaky and the risks of additional flare ups of euro-zone debt problems and slowing growth in China weigh heavily on the future of the global economy.

Risk assets, including equities and high yield bonds, recovered their late-summer losses and posted strong returns for the 6-month period ended February 29, 2012. On a 12-month basis, US large-cap stocks and high yield bonds delivered positive results, while small-cap and emerging-market stocks finished slightly negative. International markets, which experienced some significant downturns in 2011, lagged the broader rebound. Fixed income securities, which benefited from declining yields, advanced over the 6- and 12-month periods. Despite their quality rating downgrade, US Treasury bonds performed particularly well. Municipal bonds also delivered superior results. Continued low short-term interest rates kept yields on money market securities near their all-time lows.

Many of the themes that caused uncertainty in 2011 remain. For investors, the risks appear daunting, but this challenging environment offers new opportunities. BlackRock was built for these times. Visit **blackrock.com/newworld** for more information.

Sincerely,

Rob Kapito

President, BlackRock Advisors, LLC

Trust Summary as of February 29, 2012

BlackRock Core Bond Trust

Investment Objective

BlackRock Core Bond Trust s (**BHK**) (the **Trust**) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 15.20% based on market price and 8.63% based on net asset value (NAV). For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of 8.84% based on market price and 5.79% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Spread sectors outperformed government-related debt for the six-month period as improving US economic fundamentals and accommodative monetary policy provided a backdrop conducive for credit spread compression. As a result, the Trust benefited from its allocations to investment grade credit and high yield corporate credit. Within corporate credit, relative value trading in industrials was additive to performance. The Trust also benefited from exposure to commercial mortgage-backed securities (CMBS), which outperformed most other securitized debt sectors. Finally, the Trust s duration stance (sensitivity to interest rate movements) contributed to returns as rates generally moved lower throughout the period.

The Trust actively traded exposure to financials within investment grade credit. Although these positions performed well toward period end, the overall effect was a drag on performance as European sovereign debt fear caused weakness in US financial names.

Describe recent portfolio activity.

During the period, the Trust reduced its allocation to investment grade securities in the banking industry while increasing exposure to companies with strong cash flow and high earnings visibility in the energy and telecommunications space. Toward period end, the Trust increased its portfolio duration, primarily by adding exposure to US Treasury bonds.

Describe portfolio positioning at period end.

At period end, the Trust maintained a diversified exposure to non-government spread sectors, including investment grade credit, high yield corporate credit, CMBS, asset-backed securities and non-agency residential mortgage-backed securities (MBS). The Trust also held allocations to government-related sectors such as US Treasuries, agency debt and agency MBS. The Trust ended the reporting period with a long duration profile.

SEMI-ANNUAL REPORT

FEBRUARY 29, 2012

5

Trust Summary as of February 29, 2012

BlackRock Corporate High Yield Fund V, Inc.

Investment Objective

BlackRock Corporate High Yield Fund V, Inc. s (HYV) (the Trust) investment objective is to provide shareholders with current income by investing primarily in a diversified portfolio of fixed income securities that are rated in the lower rating categories of the established rating services (BB or lower by S&P or Ba or lower by Moody s) or in unrated securities considered by the Trust s investment adviser to be of comparable quality. The Trust also seeks to provide shareholders with capital appreciation. The Trust seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield debt instruments, including high yield bonds (commonly referred to as junk bonds) and high yield corporate loans which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 16.85% based on market price and 11.05% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 13.38% based on market price and 10.05% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The Trust delivered strong returns for the six-month period as risk assets rallied. High yield debt posted solid gains, outpacing government, emerging market and investment grade corporate sectors. Across the high yield credit spectrum, security selection in the mid- to higher-quality tiers boosted the Trust-s returns. Among sectors, security selection in the consumer service and non-captive diversified financials was rewarding. The Trust-s exposure to Delphi Automotive Plc stock received in connection with the company-s reorganization also added to performance.

Detracting from performance was the Trust stactical allocations to bank loans and investment grade credit, which underperformed relative to high yield debt in the risk asset rally. Exposure to select lower- and non-rated names in the high yield market hurt performance, as did security selection in the paper, metals & mining and non-cable media sectors.

Describe recent portfolio activity.

The period began with severe market volatility in reaction to headwinds from Europe s debt crisis and a possible US government shut-down. However, the environment shifted in December when the European Central Bank announced a long-term refinancing operation. This liquidity program provided a much-needed short-term panacea for the financial markets and mitigated the risk of a collapse in the European banking system. Moreover, it was the catalyst for a positive turn in the valuation of risk assets.

Given these developments, the Trust maintained its higher-quality income- oriented bias, but started selectively adding back some risk in names with appealing risk-reward characteristics. Despite this modest shift to risk-on, the Trust continued to seek issuers with superior fundamentals (solid cash flows, earnings visibility and attractive downside protection), while generally remaining cautious of higher-beta credits (i.e., those with higher sensitivity to market volatility) and the more cyclical sectors.

Describe portfolio positioning at period end.

At period end, the Trust held 76% of its total portfolio in corporate bonds, 15% in floating rate loan interests (bank loans), with the remainder in common stocks, preferred stocks and other interests. The Trust s largest sector exposures included non-cable media, wireless and independent energy, while its portfolio holdings reflected less emphasis on the more cyclical segments of the market such as gaming, building materials and technology. The Trust ended the period with economic leverage at 24% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 29, 2012

9

Trust Summary as of February 29, 2012

BlackRock High Income Shares

Investment Objective

BlackRock High Income Shares (HIS) (the Trust) primary investment objective is to provide the highest current income attainable consistent with reasonable risk as determined by the Trust s investment adviser, through investment in a professionally managed, diversified portfolio of high yield, high risk fixed income securities (commonly referred to as junk bonds). The Trust s secondary objective is to provide capital appreciation, but only when consistent with its primary objective. The Trust seeks to achieve its objectives by investing primarily in high yield, high risk debt instruments rated in the medium to lower categories by nationally recognized rating services (BBB or lower by S&P or Baa or lower by Moody s) or non-rated securities, which, in the investment adviser s opinion, are of comparable quality. Under normal market conditions, the average maturity of the Trust s portfolio is between eight and twelve years. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 16.70% based on market price and 8.54% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 13.38% based on market price and 10.05% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The Trust delivered strong returns for the six-month period as risk assets rallied. High yield debt posted solid gains, outpacing government, emerging market and investment grade corporate sectors. Across the high yield credit spectrum, security selection in the higher-quality tiers boosted the Trust s returns. Among sectors, security selection in the consumer service and non-captive diversified financials was rewarding. The Trust s exposure to preferred stock also added to performance.

Detracting from performance was the Trust stactical allocations to bank loans and investment grade credit, which underperformed relative to high yield debt in the risk asset rally. Exposure to select mid-, lower- and non-rated names in the high yield market hurt performance, as did security selection in the paper, metals & mining and non-cable media sectors.

Describe recent portfolio activity.

The period began with severe market volatility in reaction to headwinds from Europe s debt crisis and a possible US government shut-down. However, the environment shifted in December when the European Central Bank announced a long-term refinancing operation. This liquidity program provided a much-needed short-term panacea for the financial markets and mitigated the risk of a collapse in the European banking system. Moreover, it was the catalyst for a positive turn in the valuation of risk assets.

Given these developments, the Trust maintained its higher-quality income- oriented bias, but started selectively adding back some risk in names with appealing risk-reward characteristics. Despite this modest shift to risk-on, the Trust continued to seek issuers with superior fundamentals (solid cash flows, earnings visibility and attractive downside protection), while generally remaining cautious of higher-beta credits (i.e., those with higher sensitivity to market volatility) and the more cyclical sectors.

Describe portfolio positioning at period end.

At period end, the Trust held 81% of its total portfolio in corporate bonds, 16% in floating rate loan interests (bank loans), with the remainder in preferred securities and common stocks. The Trust s largest sector exposures included non-cable media, wireless and independent energy, while its portfolio holdings reflected less emphasis on the more cyclical segments of the market such as gaming, building materials and technology. The Trust ended the period with economic leverage at 19% of its total managed assets.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 13.56% based on market price and 10.07% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 13.38% based on market price and 10.05% based on NAV. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The Trust delivered strong returns for the six-month period as risk assets rallied. High yield debt posted solid gains, outpacing government, emerging market and investment grade corporate sectors. Across the high yield credit spectrum, security selection in the higher-quality tiers and among non-rated investments boosted the Trust s returns. Among sectors, security selection in the consumer service and non-captive diversified financials was rewarding. The Trust s exposure to Delphi Automotive Plc stock received in connection with the company s reorganization also added to performance.

Detracting from performance was the Trust stactical allocations to bank loans and investment grade credit, which underperformed relative to high yield debt in the risk asset rally. Exposure to select lower-rated names in the high yield market hurt performance, as did security selection in the paper and non-cable media sectors.

Describe recent portfolio activity.

The period began with severe market volatility in reaction to headwinds from Europe s debt crisis and a possible US government shut-down. However, the environment shifted in December when the European Central Bank announced a long-term refinancing operation. This liquidity program provided a much-needed short-term panacea for the financial markets and mitigated the risk of a collapse in the European banking system. Moreover, it was the catalyst for a positive turn in the valuation of risk assets.

Given these developments, the Trust maintained its higher-quality income- oriented bias, but started selectively adding back some risk in names with appealing risk-reward characteristics. Despite this modest shift to risk-on, the Trust continued to seek issuers with superior fundamentals (solid cash flows, earnings visibility and attractive downside protection), while generally remaining cautious of higher-beta credits (i.e., those with higher sensitivity to market volatility) and the more cyclical sectors.

Describe portfolio positioning at period end.

At period end, the Trust held 79% of its total portfolio in corporate bonds, 16% in floating rate loan interests (bank loans), with the remainder in common stocks and other interests. The Trust s largest sector exposures included non-cable media, wireless and independent energy, while its portfolio holdings reflected less emphasis on the more cyclical segments of the market such as banking, building materials and technology. The Trust ended the period with economic leverage at 21% of its total managed assets.

SEMI-ANNUAL REPORT

FEBRUARY 29, 2012

13

Trust Summary as of February 29, 2012

BlackRock Income Opportunity Trust, Inc.

Investment Objective

BlackRock Income Opportunity Trust, Inc. s (BNA) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 12.86% based on market price and 8.48% based on NAV. For the same period, the closed-end Lipper Corporate Debt Funds BBB-Rated category posted an average return of 8.84% based on market price and 5.79% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Spread sectors outperformed government-related debt for the six-month period as improving US economic fundamentals and accommodative monetary policy provided a backdrop conducive for credit spread compression. As a result, the Trust benefited from its allocations to investment grade credit and high yield corporate credit. Within corporate credit, relative value trading in industrials was additive to performance. The Trust also benefited from exposure to commercial mortgage-backed securities (CMBS), which outperformed most other securitized debt sectors. Finally, the Trust s duration stance (sensitivity to interest rate movements) contributed to returns as rates generally moved lower throughout the period.

The Trust actively traded exposure to financials within investment grade credit. Although these positions performed well toward period end, the overall effect was a drag on performance as European sovereign debt fear caused weakness in US financial names.

Describe recent portfolio activity.

During the period, the Trust reduced its allocation to investment grade securities in the banking industry while increasing exposure to companies with strong cash flow and high earnings visibility in the energy and telecommunications space. Toward period end, the Trust increased its portfolio duration, primarily by adding exposure to US Treasury bonds.

Describe portfolio positioning at period end.

At period end, the Trust maintained a diversified exposure to non-government spread sectors, including investment grade credit, high yield corporate credit, CMBS, asset-backed securities and non-agency residential mortgage-backed securities (MBS). The Trust also held allocations to government-related sectors such as US Treasuries, agency debt and agency MBS. The Trust ended the reporting period with a long duration profile.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT

FEBRUARY 29, 2012

15

Trust Summary as of February 29, 2012

BlackRock Income Trust, Inc.

Investment Objective

BlackRock Income Trust, Inc. s (BKT) (the Trust) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the US government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. Securities issued or guaranteed by the US government or its agencies or instrumentalities are generally considered to be of the same or higher credit or quality as privately issued securities rated AAA or Aaa. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 8.48% based on market price and 3.29% based on NAV. For the same period, the closed-end Lipper US Mortgage Funds category posted an average return of 5.62% based on market price and 4.03% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

The agency mortgage-backed securities (MBS) sector exhibited elevated volatility during the period as debt problems in Europe weighed on market sentiment and the future of government policy on mortgage pre-payment remained uncertain. While these headwinds challenged the sector, the US Federal Reserve s MBS purchase program provided support, and agency MBS outperformed US Treasuries for the period. Given these market conditions, the Trust benefited from increasing its allocation to pre-payment-sensitive agency MBS during the fourth quarter of 2011 after spreads widened in the space due to increased policy risk. These purchases were focused on securities where the impact of the potential policy changes would be limited while their spread widening was commensurate with the rest of the sector. These holdings were significant contributors to the Trust s performance as they generated strong returns in the first two months of 2012.

Detracting slightly from performance were the Trust s interest rate hedges designed to protect the portfolio from market volatility. The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration, convexity and yield curve positioning. During the period, the Trust held short positions in US Treasury futures in order to reduce the overall duration profile of the portfolio. These positions served as a drag on performance as the US Treasury market broadly advanced during the period.

Describe recent portfolio activity.

The Trust increased its allocation to agency MBS in the fourth quarter of 2011, as discussed above. Near the end of the period, the Trust took profits on these holdings. The sales were mainly among the lower-coupon securities, where the potential for their extension was greatest. The Trust maintained a strong level of yield by increasing exposure to pre-payment-sensitive securities. The Trust also maintained a limited exposure to commercial mortgage-backed securities (CMBS), which performed well later in the period. The Trust slightly reduced its small allocation to non-agency MBS.

Describe portfolio positioning at period end.

The backdrop for agency MBS appears constructive given the impact of the Federal Reserve s mortgage reinvestment program in curtailing net supply along with the pending conclusion of the US Treasury portfolio liquidation, subdued mortgage refinance and purchase activity, and the sector s attractive yields relative to other high-quality asset classes in a low interest rate environment. However, the extension potential for lower-coupon agency MBS remains high and, therefore, the Trust maintains a cautious stance. The Trust maintains exposure to high-quality agency MBS with varying maturities and coupon rates. The Trust also holds small allocations to non-agency MBS and CMBS. The Trust ended the reporting period with a slightly short duration profile.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Trust Summary as of February 29, 2012

BlackRock Strategic Bond Trust

Investment Objective

BlackRock Strategic Bond Trust s (BHD) (the Trust) investment objective is to provide total return through high current income and capital appreciation. The Trust seeks to achieve its investment objective by investing primarily in a diversified portfolio of fixed income securities including corporate bonds, US government and agency securities, mortgage-related and asset-backed securities and other types of fixed income securities. The Trust invests, under normal market conditions, a significant portion of its assets in corporate fixed income securities that are below investment grade quality, including high-risk, high yield bonds (commonly referred to as junk bonds) and other such securities, such as preferred stocks. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six months ended February 29, 2012, the Trust returned 12.07% based on market price and 10.13% based on NAV. For the same period, the closed-end Lipper High Current Yield Funds (Leveraged) category posted an average return of 13.38% based on market price and 10.05% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Security selection among higher-quality credit instruments had a positive impact on the Trust s performance. While the surge in risk assets benefited overall performance, the Trust s tactical exposure to equity securities was particularly helpful as equities outperformed high yield bonds, bank loans and investment grade credits amid improving investor demand for riskier assets over the six-month period.

The Trust differs from its Lipper category competitors, which invest primarily in high yield bonds, in that the Trust also invests in floating rate loan interests (bank loans) and investment grade credits. While the Trust s allocations to bank loans and investment grade credit did not detract from performance on an absolute basis, these asset classes underperformed high yield bonds for the period.

Describe recent portfolio activity.

In the early part of the period, as the outlook for global growth worsened and the potential for further spreading of the ongoing debt crisis in Europe increased, the Trust shifted its positioning to a more conservative posture. Specifically, the Trust reduced positions in the more cyclical credits and increased exposure to market sectors with more stable cash flows.

However, the environment shifted in December when the European Central Bank announced a long-term refinancing operation. This liquidity program provided a much-needed short-term panacea for the financial markets and mitigated the risk of a collapse in the European banking system. Moreover, it was the catalyst for a positive turn in the valuation of risk assets. Given these developments, the Trust maintained its higher-quality income-oriented bias, but started selectively adding back some risk in names with appealing risk-reward characteristics. Despite this modest shift to risk-on, the Trust continued to seek issuers with superior fundamentals while avoiding higher-beta credits (i.e., those with higher sensitivity to market volatility) and the more economically sensitive areas of the market.

Describe portfolio positioning at period end.

At period end, the Trust held 82% of its total portfolio in corporate bonds, 14% in floating rate loan interests (bank loans), with the remainder in other interests, preferred securities and US Treasury Obligations. The Trust s largest sector exposures included non-cable media, independent energy and wireless. The Trust ended the period with economic leverage at 20% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 29, 2012

19

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

The Trusts may utilize leverage by borrowing through a credit facility or through entering into reverse repurchase agreements and treasury roll transactions. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of each Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Trust shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Trusts had not used leverage.

To illustrate these concepts, assume a Trust s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Trust s long-term investments, and therefore the Trust s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Trust pays higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Trusts portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trusts borrowings does not fluctuate in relation to interest rates.

As a result, changes in interest rates can influence the Trusts NAVs positively or negatively in addition to the impact on Trust performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Trusts, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Trust s net income will be less than if leverage had not been used, and therefore the amount available for distribution to Shareholders will be reduced. Each Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Trust to incur losses. The use of leverage may limit each Trust s ability to invest in certain types of securities or use certain types of hedging strategies. Each Trust will incur expenses in connection with the use of leverage, all of which are borne by Shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Trusts are permitted to issue senior securities representing indebtedness up to 33½,% of their total managed assets (each Trust s net assets plus the proceeds of any outstanding borrowings). If the Trusts segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Trust voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of February 29, 2012, the Trusts had aggregate economic leverage from reverse repurchase agreements, treasury roll transactions and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

Percent of Economic

	Leverage
ВНК	Leverage 29%
HYV	24%
HYT	24%
HIS	19%
BHY BNA BKT BHD	21%
BNA	30%
BKT	24%
BHD	20%

Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate, foreign currency exchange rate and/or other risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts—ability to use a derivative financial instrument successfully depends on the investment advisor—s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders or may cause a Trust to hold an investment that it might otherwise sell. The Trusts—investments in these instruments are discussed in detail in the Notes to Financial Statements.

28 SEMI-ANNUAL REPORT FEBRUARY 29, 2012

Schedule of Investments (continued)

BlackRock Core Bond Trust (BHK)

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) Variable rate security. Rate shown is as of report date.
- (c) Non-income producing security.
- (d) Represents a step-down bond that pays an initial coupon rate for the first period and then a lower coupon rate for the following periods. Rate shown is as of report date.
- (e) All or a portion of security has been pledged as collateral in connection with open reverse repurchase agreements.
- (f) Convertible security.
- (g) When-issued security. Unsettled when-issued transactions were as follows:

			Unrealized
Counterparty	Valu	ie	Appreciation
Morgan Stanley & Co., Inc.	\$ 1,1	175,149 \$	34,149

- (h) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.
- (i) Issuer filed for bankruptcy and/or is in default of interest payments.
- (j) All or a portion of security has been pledged as collateral in connection with swaps.
- (k) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (l) Security is perpetual in nature and has no stated maturity date.
- (m) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (n) All or a portion of security has been pledged as collateral in connection with open financial futures contracts.
- (o) Represents or includes a to-be-announced (TBA) transaction. Unsettled TBA transactions as of February 29, 2012 were as follows:

Counterparty	Value	App	realized reciation reciation)
BNP Paribas Securities Corp.	\$ 310,031	\$	(141)
Credit Suisse Securities (USA) LLC	\$ 3,455,000	\$	4,000
Deutsche Bank Securities, Inc.	\$ 326,344	\$	891
Goldman Sachs & Co., Inc.	\$ 4,014,531	\$	363
JPMorgan Securities, Inc.	\$ (3,765,031)	\$	(1,250)
Morgan Stanley & Co., Inc.	\$ (754,069)	\$	(90)
RBS Greenwich Capital	\$ (4,340,875)	\$	(641)
UBS Securities	\$ 754,469	\$	1,422

Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.

- (q) Represents the current yield as of report date.
- (r) Investments in companies considered to be an affiliate of the Trust during the period, for purposes of Section 2(a)(3) of the 1940 Act, as amended, were as follows:

	Shares Held at August 31,	Net	Shares Held at February 29,	
Affiliate	2011	Activity	2012	Income

¹ Net payment made at termination.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust s perceived risk of investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 29, 2012 in determining the fair valuation of the Trust s investments and derivative financial instruments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term				
Investments:				
		\$ 19,268,906	\$ 5,593,922	\$ 24,862,828

Derivative financial instruments are financial futures contracts, foreign currency exchange contracts, options and swaps. Financial futures contracts, foreign currency exchange contracts and swaps are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

See Notes to Financial Statements.

32 SEMI-ANNUAL REPORT FEBRUARY 29, 2012

Schedule of Investments (concluded)

BlackRock Core Bond Trust (BHK)

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Asset-Backed Securities	Common Stocks	Corporate Bonds	Non-Agency Mortgage-Backed Securities	Other Interests	Preferred Securities	Warrants	Total
Assets:								
Balance, as of August 31, 2011	\$ 6,120,404		\$ 5,241,393	\$ 1,960,958	\$ 191	\$ 102,281	\$ 77,670	\$ 13,502,897
Accrued discounts/premiums	(146,593)		190	62				(146,341)
Net realized gain (loss)	89		17,862	40,781				58,732
Net change in unrealized								
appreciation/depreciation ¹	97,835	\$ (1,584)	(60,374)	30,880	(191)	(102,281)	(1)	(35,716)
Purchases	1,364,968		62,767	960,976				2,388,711
Sales	(513,437)		(52,000)	(1,676,933))			(2,242,370)
Transfers in ²		1,587						1,587
Transfers out ²	(1,329,344)			(352,670))		(77,669)	(1,759,683)
Balance, as of February 29, 2012	\$ 5,593,922	\$ 3	\$ 5,209,838	\$ 964,054				\$ 11,767,817

- Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held at February 29, 2012 was \$61,330.
- The Trust s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the event.

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Credit ntracts
Liabilities:	
Balance, as of August 31, 2011	\$ (941)
Accrued discounts/premiums	
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ³	322
Purchases	
Issuances ⁴	
Sales	
Settlements ⁵	
Transfers in ⁶	
Transfers out ⁶	
Balance, as of February 29, 2012	\$ (619)

- Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held at February 29, 2012 was \$322.
- ⁴ Issuances represent upfront cash received on certain derivative financial instruments.
- ⁵ Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.
- The Trust s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the period in relation to net assets.

See Notes to Financial Statements.

Using S&P s rating.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

See Notes to Financial Statements.

42 SEMI-ANNUAL REPORT FEBRUARY 29, 2012

The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of agreement.

BlackRock Corporate High Yield Fund V, Inc. (HYV)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust s perceived risk of investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the inputs used as of February 29, 2012 in determining the fair valuation of the Trust s investments and derivative financial instruments:

Valuation Inputs	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term				
Investments:				
Common Stocks	\$ 14,848,884	\$ 11,847,986	\$ 7,202,327	\$ 33,899,197
Corporate Bonds		409,644,549	6,696,167	416,340,716
Floating Rate				
Loan Interests		69,391,312	13,859,223	83,250,535
Other Interests	157		7,968	8,125
Preferred				
Securities	3,904,201	8,717,556	517,447	13,139,204
Warrants		512,924	1	512,925
Total	\$ 18,753,242	\$ 500,114,327	\$ 28,283,133	\$ 547,150,702
Valuation Inputs	Level 1	Level 2	Level 3	Total
Derivative Financial				
Instruments ¹				
Assets:				
Credit contracts		\$ 313,222	\$ 329,954	\$ 643,176
Foreign currency				
exchange				
contracts		8,857		8,857
Equity contracts	\$ 305,250			305,250
Liabilities:				
Credit contracts		(112,073)	(134)	(112,207)
Foreign currency				
exchange				
contracts		(1,448,067)		(1,448,067)
Equity contracts	(412,959)			(412,959)
Total	\$ (107,709)	\$ (1,238,061)	\$ 329,820	\$ (1,015,950)

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Securities	Warrants	Total
Assets:							
Balance, as of August 31, 2011	\$ 3,390,998	\$ 8,408,570	\$ 14,224,136	\$ 3,097,694	\$ 985,270	\$ 355,505 \$	30,462,173
Accrued discounts/premiums		3,387	120,185				123,572

Net realized gain (loss)	8,788	(3,496,785)	(359,806)				(3,847,803)
Net change in unrealized							
appreciation/depreciation ²	2,239,989	3,519,894	(839,134)	(3,089,726)	(467,823)	(275)	1,362,925
Purchases	1,573,669	935,832	620,035				3,129,536
Sales	(11,117)	(2,674,731)	(991,223)				(3,677,071)
Transfers in ³			3,304,905				3,304,905
Transfers out ³			(2,219,875)			(355,229)	(2,575,104)
Balance, as of February 29, 2012	\$ 7,202,327 \$	6,696,167	\$ 13,859,223 \$	7,968 \$	517,447 \$	1 \$	28,283,133

- Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held at February 29, 2012 was \$(2,179,491).
- The Trust s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Credit ontracts
Liabilities:	
Balance, as of August 31, 2011	
Accrued discounts/premiums	\$ (43,709)
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ⁴	329,820
Purchases	
Issuances ⁵	408,569
Sales	
Settlements ⁶	(364,860)
Transfers in ⁷	
Transfers out ⁷	
Balance, as of February 29, 2012	\$ 329,820

- Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held at February 29, 2012 was \$329,820.
- ⁵ Issuances represent upfront cash received on certain derivative financial instruments.
- Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.
- The Trust s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the period in relation to net assets.

See Notes to Financial Statements.

Total							\$	637,696

Using S&P s rating.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Trust management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and does not necessarily correspond to the Trust s perceived risk of investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

See Notes to Financial Statements.

The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of agreement.

52 SEMI-ANNUAL REPORT FEBRUARY 29, 2012

BlackRock Corporate High Yield Fund VI, Inc. (HYT)

The following tables summarize the inputs used as of February 29, 2012 in determining the fair valuation of the Trust s investments and derivative financial instruments:

Valuation Inputs	Level 1	Level 2	Level 3		Total
Assets:					
Investments:					
Long-Term Investments:					
Common Stocks	\$ 16,814,523	\$ 11,751,399	\$	7,490,513	\$ 36,056,435
Corporate Bonds		430,767,015		4,871,629	435,638,644
Floating Rate Loan Interests		73,111,438		13,469,516	86,580,954
Other Interests	163			71	234
Preferred Securities	3,848,604	6,268,836			10,117,440
Warrants		488,919		1	488,920
Total	\$ 20,663,290	\$ 522,387,607	\$	25,831,730	\$ 568,882,627

Valuation Inputs	L	evel 1	Level 2	Level 3		Total	
Derivative Financial Instruments ¹							
Assets:							
Credit contracts			\$ 312,216	\$	350,640	\$	662,856
Foreign currency exchange contracts			7,223				7,223
Equity contracts	\$	316,130					316,130
Liabilities:							
Credit contracts			(119,825)		(134)		(119,959)
Foreign currency exchange contracts			(1,500,303)				(1,500,303)
Equity contracts		(445,363)					(445,363)
Total	\$	(129,233)	\$ (1,300,689)	\$	350,506	\$	(1,079,416)

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used to determine fair value:

	Common Stocks	Corporate Bonds	Floating Rate Loan Interests	Other Interests	Preferred Securities	Warrants	Total
Assets:							
Balance, as of August 31,							
2011	\$ 3,689,799	\$ 6,541,570	\$ 14,112,734	\$ 3,081,895	\$ 503,497	\$ 382,599	\$ 28,312,094
Accrued							
discounts/premiums		3,505	118,663				122,168
Net realized gain (loss)	9,199	(3,657,646)	(353,729)		592,350		(3,409,826)
Net change in unrealized							
appreciation/depreciation ²	2,173,916	3,685,657	(880,297)	(3,081,824)	(503,497)	(275)	1,393,680
Purchases	1,629,236	979,696	602,350				3,211,282
Sales	(11,637)	(2,681,153)	(1,025,465)		(592,350)		(4,310,605)
Transfers in ³			3,424,885				3,424,885
Transfers out ³			(2,529,625)			(382,323)	(2,911,948)
Balance, as of February							
29, 2012	\$ 7,490,513	\$ 4,871,629	\$ 13,469,516	\$ 71		\$ 1	\$ 25,831,730

Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held at February 29, 2012 was \$(1,811,285).

The Trust s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

The following table is a reconciliation of Level 3 derivative financial instruments for which significant unobservable inputs were used to determine fair value:

	Credit ontracts
Liabilities:	 intracts
Balance, as of August 31, 2011	
Accrued discounts/premiums	\$ (46,404)
Net realized gain (loss)	
Net change in unrealized appreciation/depreciation ⁴	350,506
Purchases	
Issuances ⁵	432,194
Sales	
Settlements ⁶	(385,790)
Transfers in ⁷	
Transfers out ⁷	
Balance, as of February 29, 2012	\$ 350,506

- Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on derivative financial instruments still held at February 29, 2012 was \$350,506.
- Issuances represent upfront cash received on certain derivative financial instruments.
- ⁶ Settlements represent periodic contractual cash flows and/or cash flows to terminate certain derivative financial instruments.
- The Trust s policy is to recognize transfers in and transfers out as of the beginning of the period of the event or the change in circumstances that caused the transfer.

A reconciliation of Level 3 investments and derivative financial instruments is presented when the Trust had a significant amount of Level 3 investments and derivative financial instruments at the beginning and/or end of the period in relation to net assets.

See Notes to Financial Statements.
