NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED MARCH 31, 2009 AND 2008 (UNAUDITED)
Expressed in US Dollars

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ORGANIZATION

(A) Basis of presentation and accounting policies

The unaudited interim consolidated financial statements have been prepared in conformity with United States generally accepted accounting principles. They include the accounts of Dragon Pharmaceutical Inc., which is incorporated under the laws of the State of Florida, United States, and its wholly-owned or controlled subsidiaries (collectively, the Company). Certain information and footnote disclosures required by United States generally accepted accounting principles for complete annual financial statements have been omitted and, therefore, these consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2008. In the opinion of management, these consolidated financial statements reflect all adjustments, of a normal recurring nature, necessary to present fairly, in all material respects, the Company's consolidated financial position, results of operations, and cash flows for the interim periods presented. The results of operations for the three months ended March 31, 2009 are not necessarily indicative of those for a full fiscal year.

The accompanying unaudited interim consolidated financial statements contemplate continuation of the Company as a going concern. The Company has a working capital deficiency of \$22.66 million as at March 31, 2009. However, the Company has developed and is implementing a plan to decrease its debt and increase its working capital which will allow the Company to continue operations as discussed below.

The Company plans to seek additional equity through the conversion of some of its liabilities and expects to raise funds through private placements in order to support existing operations and expand the range and scope of its business. The Company has also significantly increased production levels which is expected to generate additional cash flow under contracted supply agreements. In addition, the Company intends to continue to renegotiate and extend loans, as required, when they become due, as has been done in the past. There is no assurance that additional funds will be available for the Company on acceptable terms, if at all, or that the Company will be able to negotiate and extend the loans. If adequate funds are not available or not available on acceptable terms or the Company is unable to negotiate or extend its loans, the Company may be required to scale back or abandon some activities. Management believes that actions presently taken provide the opportunity for the Company to continue as a going concern. The Company's ability to achieve these objectives cannot be determined at this time. These conditions raise substantial doubt about the Company's ability to continue as a going concern. These financial statements do not include any adjustments that might result from this uncertainty.

(B) Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS 141R). SFAS 141R establishes principles and requirements for how an acquirer recognizes and measures the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired. SFAS 141R also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. FAS 141(R) is to be applied prospectively to business combinations for which the acquisition date is on or after an entity's fiscal year that begins after December 15, 2008. The Company will assess the impact of SFAS 141R if and when a future acquisition occurs.

Effective January 1, 2008, the Company adopted, on a prospective basis, SFAS No. 157, Fair Value Measurements (SFAS 157) as amended by FASB Staff Position SFAS 157-1, Application of FASB Statement No. 157 to FASB Statement No. 13 and Other Accounting Pronouncements That Address Fair Value Measurements for Purposes of Lease Classification or Measurement under Statement 13 (FSP FAS 157-1) and FASB Staff Position SFAS 157-2, Effective Date of FASB Statement No. 157 (FSP FAS 157-2). SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP and provides for expanded disclosure about fair value measurements. SFAS 157 applies prospectively to all other accounting pronouncements that require or permit fair value measurements. FSP FAS 157-1 amends SFAS 157 to exclude from the scope of SFAS 157 certain leasing transactions accounted for under SFAS No. 13, Accounting for Leases. FSP FAS 157-2 amends SFAS 157 to defer the effective date of SFAS 157 for all non-financial assets and non-financial liabilities except those that are recognized or disclosed at fair value in the financial statements on a recurring basis to fiscal years beginning after November 15, 2008. The adoption of SFAS 157 did not have a material impact on the Company's consolidated financial statements.

In March 2008, the FASB issued SFAS No. 161, "Disclosures About Derivative Instruments and Hedging Activities, an Amendment of FASB Statement No. 133." SFAS No. 161 amends SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," to amend and expand the disclosure requirements of SFAS No. 133 to provide greater transparency about (i) how and why an entity uses derivative instruments, (ii) how derivative instruments and related hedge items are accounted for under SFAS No. 133 and its related interpretations, and (iii) how derivative instruments and related hedged items affect an entity's financial position, results of operations and cash flows. To meet those objectives, SFAS No. 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of gains and losses on derivative instruments and disclosures about credit-risk-related contingent features in derivative agreements. SFAS No. 161 was effective for the Company on January 1, 2009. The adoption of SFAS No. 161 did not have a material impact on the Company's consolidated financial statements.

Deposit for land and constructions costs	-	3,751
	8,327	3,751

During 2007 and 2008, the Company was actively exploring additional business opportunities which may involve an investment in a new production campus. In this regard, the Company paid \$3,751,000 refundable deposits to the land bureau and various contractors for possible land and construction costs. During the three months ended March 31, 2009, the Company signed a letter of intent with a third party to acquire a formulation facility which the Company has been leasing since 2008, for a total amount of \$8,327,000 (RMB57 million) with \$4,576,000 in cash and a transfer of \$3,751,000 refundable deposit mentioned above. The Company will continue to lease the formulation facility from the third party until the legal ownership of the fixed assets is transferred to the Company, which is expected to happen prior to December 31, 2009.

NOTE 7 DISCONTINUED OPERATIONS

The Company signed an agreement on November 5, 2007 with a non-affiliated third party to sell the assets of the biotech operation excluding finished goods on hand. According to the agreement, the buyer agreed to pay the Company, before June 2008, a total of US\$ 2.14 million (or RMB15.6 million), in exchange for certain fixed assets and certain net working capital as at October 31, 2007 of the biotech business. The loss on disposal of biotech division was as follows:

NOTE 15 STOCKHOLDERS EQUITY

(A) Reserves

Pursuant to PRC regulations, Shanxi Weiqida is required to make appropriations to reserves funds, comprising the reserve fund, staff welfare fund and enterprise expansion fund, based on after-tax net income determined in accordance with generally accepted accounting principles of the People's Republic of China (the PRC GAAP). Appropriations to the reserve fund should be at least 10% of the after tax net income determined in accordance with the PRC GAAP until the reserve is equal to 50% of Shanxi Weiqida's registered capital. The reserve fund is established for covering potential losses. Appropriations to the staff welfare fund are at a percentage, as determined by the Board of Directors, of the after tax net income determined in accordance with the PRC GAAP.

The staff welfare fund is established for the purpose of providing employee facilities and other collective benefits to the employees. Appropriations to the enterprise expansion fund are made at the discretion of the Board of Directors. The enterprise expansion fund is established for expanding business operation. The reserve fund and enterprise expansion fund are recorded as part of shareholders' equity but are not available for distribution to shareholders other than in liquidation, while the staff welfare fund is recorded as a liability and is not for distribution to shareholders. The appropriations to reserves are made by the Board of Directors on an annual basis.

In order to fulfill Shanxi Weiqida's additional registered capital requirement, the Company transferred \$0 and \$6,104,000 of retained earnings of Shanxi Weiqida to registered capital during the three months ended March 31, 2009 and 2008 (Note 14 (C)). The Company recorded stock-based compensation expense of \$27,000 for the three months ended March 31, 2009 (\$75,000 for the three months ended March 31, 2008) related to stock options granted to directors and employees, which amounts are included in general and administrative expenses. The estimated fair value of stock options granted during the three months ended March 31, 2008 was determined using the Black-Scholes option pricing model with the following weighted average assumptions: expected volatility 81.51%; risk-free rate 4.4%; expected average life of the options 3 years; dividend yield 0%. The Company estimated a 0% forfeiture rate by considering the historical employee turnover rates and expectations about the future, and will subsequently adjust compensation cost for differences between expectations and actual experience. The estimated fair value of the options granted during the three months ended March 31, 2008 was \$0.41 per share. The fair value of the options is being expensed on a straight-line basis over the vesting period of the options.

Aggregate intrinsic value of the Company's stock options is calculated as the difference between the exercise price of the options and the quoted price of the common shares that were in-the-money. The aggregate intrinsic value of the Company's outstanding stock options as at March 31, 2009 and 2008 was \$281,000 and \$1,161,000, respectively. The estimated fair value of stock options vested during the three months ended March 31, 2009 and 2008 was \$10,000 and \$49,000 respectively. There is approximately \$20,000 of unrecognized compensation expense as of March 31, 2009 that is expected to be recognized over the next 10 months.

NOTE 16 INCOME TAXES

On March 16, 2007, The National People's Congress of China passed The Law of the People's Republic of China on Enterprise Income Tax (the Enterprise Income Tax Law). The Enterprise Income Tax Law became effective on January 1, 2008. This new law eliminated the existing preferential tax treatment that is available to the foreign invested enterprises (FIEs) but provides grandfathering of the preferential tax treatment currently enjoyed by the FIEs. Under the new law, both domestic companies and FIEs are subject to a unified income tax rate of 25% starting from 2008.

During the three months ended March 31, 2008, Shanxi Weiqida applied for and received an income tax credit for reinvestment of \$444,000 from the government of China. This credit was related to reinvestment of retained earnings of 2006 of \$6,704,000 (RMB 49 million) to paid-in capital of 2007. These credits were recorded as a reduction of income taxes for the three months ended March 31, 2008. According to the new China Enterprise Income Tax Law effective on January 1, 2008, the tax refund for reinvestment is no longer applicable to FIEs.

NOTE 18 FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of the Company's cash and cash equivalents, accounts receivable, investments, amounts due to related parties and short-term loans and other payables approximates their fair value. The fair value of long-term loans payables and long-term accounts payable are estimated using discounted cash flow analysis, based upon the Company's current borrowing rates, and approximate their carrying value.

NOTE 19 CONCENTRATIONS AND RISKS

81% and 84% of the Company's revenues for the three months ended March 31, 2009 and 2008, respectively, were derived from customers located in China. During the three months ended March 31, 2009 and 2008, the Company had sales of \$3,881,000 and \$4,607,000 respectively to customers in India, representing 10.5% and 12.8% respectively of the Company's revenues for the three months ended March 31, 2009 and 2008. Sales to the Company's largest customer, a Cephalosporin Division customer, accounted for approximately 10.47% and 10% of the Company's sales for the three months ended March 31, 2009 and 2008, respectively. Amounts owing from one customer represented 14% of the Company's trade and other receivables at March 31, 2009.

The Company is exposed to the risk arising from changing interest rates. A detailed analysis of the Company's Loans Payable, together with their respective interest rates and maturity dates, are included in Note 9.

The majority of the Company's assets, liabilities, revenues and expenses are denominated in Renminbi, which was tied to the US Dollar and is now tied to a basket of currencies of China's largest trading partners, is not a freely convertible currency. The appreciation of the Renminbi against the US Dollar would result in an increase in the assets, liabilities, revenues and expenses of the Company and a foreign currency gain included in comprehensive income. Conversely, the devaluation of the Renminbi against the US Dollar would result in a decrease in the assets, liabilities, revenues and expenses of the Company and a foreign currency loss included in comprehensive income. As at March 31, 2009, approximately US\$2,796,000 of the cash and restricted cash (December 31, 2008: US\$4,819,000) were held in Renminbi.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Except for statements of historical facts, this section contains forward-looking statements involving risks and uncertainties. You can identify these statements by forward-looking words including "believes," "considers," "intends," "expects," "may," "will," "should," "forecast," or "anticipates," or the negative equivalents of those words or comparable terminology, and by discussions of strategies that involve risks and uncertainties. Forward-looking statements are not guarantees of the Company's future performance or results, and the Company's actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factor. This section should be read in conjunction with the Company's unaudited consolidated financial statements.

The following discusses the Company's financial condition and results of operations for the three-month ended March 31, 2009 and 2008 based upon the Company's unaudited interim consolidated financial statements which have been prepared in accordance with the United States generally accepted accounting principles. It should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto and other financial information included in the Company's Form 10-K for the fiscal year ended December 31, 2008.

Starting January 1, 2008, the Company has reclassified its business into two segments, consisting of the Penicillin Division and the Cephalosporin Division.

The Penicillin Division currently operates the production and sales of clavulanic acid, cefalexin and cefadroxil. Cefalexin and cefadroxil were launched and included in the Company's product portfolio only at the beginning of 2008. Clavulanic acid is a drug that combines with penicillin group antibiotics to increase the effectiveness against bacterial resistance. Cefalexin and cefadroxil are Penicillin G downstream products that are widely used to treat urinary tract infections, respiratory tract, skin and soft tissue infections.

The Cephalosporin Division operates the production and sales of 7-ACA, crude bulk drugs and formulation drugs. In addition to 7-ACA, an intermediate for cephalosporin antibiotics, the Company's current product offering in the Division also includes crude bulk drug, such as ceftazidime crude powder, and formulation drugs including powder for injection for ceftriaxone, ceftazolin, cefotaxime, cefoperazone, ceftazidime, cefuroxime, cefonicid and cefminox.

Results of Operations for the Three-month Period Ended March 31, 2009 and 2008

Sales and Gross Margin Analysis

Sales for the quarter ended March 31, 2009 increased to \$36.96 million from \$35.87 million for the same period in 2008. \$30.08 million or approximately 81% of the sales were generated from the sales of products in the Chinese market, and the remaining \$6.88 million or approximately 19% were generated from the markets outside of China compared to 84% and 16% respectively during the quarter ended March 31, 2008. Sales generated from the international market outside of China increased 20% from \$5.73 million for the first quarter of 2008 to \$6.88 million for the same period in 2009 reflecting the Company's stronger market acceptance and position in the targeted emerging market.

For the quarter ended March 31, 2009, \$12.55 million or 34% of sales were from the Penicillin Division and \$24.41 million or approximately 66% of the sales were from the Cephalosporin Division. For the same period in 2008, 34% of sales were from the Penicillin Division and 66% of sales were from the Cephalosporin Division. The slight increase in sales for the three-month period ended March 31, 2009 as compared to the same period of prior year was primarily due to an increase in sales in clavulanic acid (34% year-over-year growth), cephalosporin crude bulk drug (562% year-over-year growth) and cephalosporin formulation drugs (11.5% year-over-year growth), which were partially offset by the decrease of sales in cefalexin & cefadroxil and 7-ACA which was mainly due to an increase in internal use for producing downstream products.

Cost of sales for the quarter ended March 31, 2009 was \$30.55 million compared to \$29.70 million for the same period in 2008. The increase in the cost of sales was mainly due to the increase in production and sales of products from both Penicillin and Cephalosporin Divisions as mentioned above.

Overall gross profit for the quarter ended March 31, 2009 increased 4% to \$6.41 million from \$6.17 million for the same period in 2008. The overall gross margin for the quarter ended March 31, 2009 was 17.4% as compared to 17.2% for the same period in 2008. The improvement in the overall gross margin was mainly contributed by the improvement of the gross margin for the Company's core products such as clavulanic acid (43% gross margin for the first quarter of 2009 as compared to 34% for the same period in 2008) and 7-ACA (31% gross margin for the first quarter of 2009 as compared to 27% for the same period in 2008) even though it is partially offset by the decrease in gross margins in cephalosporin crude bulk drugs, cephalosporin formulation drugs as well as cefalexin and cefadroxil

Divisional Revenues and Gross Margin Analysis

The Company's businesses are currently organized under two business Divisions: the Penicillin Division and the Cephalosporin Division.

Penicillin Division

The Penicillin Division's sales for the quarter ended March 31, 2009 were \$12.55 million, accounting for 34% of the total sales of the Company. By comparison, Penicillin Division's sales were \$12.14 million for the same period in 2008, contributing 34% of the total sales of the Company. Overall gross margin for the Penicillin Division was 28% for the first quarter of 2009, an improvement from 20% gross margin for the same period in 2008.

The key products for the Penicillin Division are clavulanic acid and cefalexin & cefadroxil. Clavulanic acid achieved an overall growth rate of 34% in sales for the first quarter of 2009 as compared to the same period in 2008, resulting primarily from a 97% increase in sales volumes but partially offset by a decrease in the average price due to a change in sales product mix. Clavulanic acid products continued to show strong momentum in both the Chinese and international market outside of China with a 12% and 75% year-over-year growth rates respectively. The gross margin for clavulanic acid further improved to 43% for the first quarter of 2009 as compared to 34% in the same period of 2008 due to the continuing effort to improve the production yield and lower the production cost,

Cefalexin and cefadroxil were launched at the beginning of 2008. Sales of these two new products for the first quarter of 2009 was approximately 4% lower than the same period in 2008, because of a 25% decrease in selling price while the sales volume increased by 29% year over year. The overall gross margin for these two products was -0.4% during

the first quarter of 2009 as compared to 1.3% for the same period of 2008.

Cephalosporin Division

Sales for the Cephalosporin Division for the quarter ended March 31, 2009 were \$24.41 million, an increase from \$23.73 million during the same period in 2008. The slight increase in sales was mainly due to higher sales of the cephalosporin crude bulk drug (562% year-over-year growth rate) as well as formulation drugs (11.5% year-over-year growth rate). Sales of 7-ACA for the quarter ended March 31, 2009 decreased 19% from the same period of 2008 due to lower market price and sales volume as the Company used more of its production to produce downstream products.

Overall gross margin for the Cephalosporin Division was 11.7% for the first quarter of 2009 as compared to 15.5% for the same period in 2008. As a result of the Company's continuing effort to improve production yield, 7-ACA's gross margin further improved to 31% during the first quarter of 2009 from 27% for the same period in 2008. Gross margin for the crude bulk drugs and formulation drugs were 1% and -4.9%, respectively, for the first quarter of 2009, as compared to 5% and -0.3% for the same period of 2008.

Operating Expenses

Total operating expenses were \$3.39 million for the quarter ended March 31, 2009. The major category of operating expenses were general and administration expenses of \$1.55 million, and research and development expenses of \$0.20 million, selling expense of \$1.27 million, and depreciation and amortization expenses of \$0.36 million. Total operating expenses were \$3.60 million for the quarter ended March 31, 2008 including general and administration expenses of \$1.87 million, selling expense of \$1.12 million, research and development expenses of \$0.43 million and depreciation and amortization expenses of \$0.18 million.

The decrease of \$0.21 million in operating expenses for the quarter ended March 31, 2009 as compared to the same period of 2008 mainly reflects the continuing effort of the management to lower the operating expenses.

Income from Operations

During the first quarter of 2009, the Company realized \$3.03 million income from operations, an 18% increase from \$2.57 million for the same period in 2008. Such an increase in the income from operations was mainly due to the combined effect of an increase in gross profit and a lowering of operating expenses as described above.

Other Expense

During the quarter ended March 31, 2009, the Company recognized a net other expense of \$0.99 million. This amount primarily consisted of \$0.96 million of interest expense and other expense of \$0.04 which was partly offset by a \$0.01 million other income in form of government grant. Total other expenses for the quarter ended March 31, 2008 were \$0.57 million. The increase in the net other expense for the first quarter of 2009 as compared to the same period of 2008 was due to the fact that the Company received \$0.24 million less in government subsidies.

Income Tax Expense

The Company had \$0.59 million income tax expense for the first quarter of 2009 as compared to \$0.27 million for the same period of 2008. Such an increase in income tax expense was due to the fact that the Company received a tax credit of \$0.44 million for the first quarter of 2008 as compared to \$nil during the same period of 2009.

After-tax Income from Continuing Operations

The Company realized an after-tax income from continuing operations of \$1.45 million for the quarter ended March 31, 2009 as compared to \$1.73 million for the same period of 2008. The decrease of \$0.28 million after-tax income from continuing operations was mainly due to the combined impact of a lowering government subsidies and tax credit

received by the Company during the first quarter of 2009 as described above.

After-tax Income from Discontinued Operations

The Company realized an after-tax income from discontinued operations of \$nil million for the quarter ended March 31, 2009 as compared to an after-tax income from discontinued operations of \$0.23 million for the same period of 2008.

Net Income

For the quarter ended March 31, 2009, the Company had a net income of \$1.45 million compared to \$1.96 million for the same period in 2008. However, year-over-year comparison needs to take into consideration that net income for the first quarter of 2008 benefited from \$0.24 million government subsidies, \$0.44 million tax credit and \$0.23 million after-tax income from discontinued operation. The decrease in the net income for the first quarter of 2009 compared to the same period of 2008 was significantly impacted by the lowering of such government subsidies, tax credit and after-tax income from discontinued operations.

Comprehensive Income

Including a gain on foreign currency translation of \$0.07 million, the Company had a comprehensive income of \$1.52 million for the first quarter of 2009, compared to a comprehensive income of \$3.91 million for the same period of 2008. However, year-over-year comparison needs to take into consideration that net income for the first quarter 2008 benefited from a \$1.94 million gain on foreign currency translation. Foreign currency translation gain results from the translation of the financial statements expressed in Chinese Renminbi (RMB) to United States Dollars. The increase reflects the appreciation of the RMB relative to the United States dollar.

Net Income per Share Basic

Company's net income per share has been computed by dividing the net income for the period by the weighted average number of shares outstanding during the same period. The weighted average number of shares outstanding was 67,066,418 and 66,374,507 for the first quarter of 2009 and 2008 respectively.

Net Income per share from continuing operations was \$0.02 for the first quarter of 2009 as compared to \$0.03 for the same period of 2008.

Net Income per share from discontinued operations was \$nil for the first quarter of 2009 as compared to \$0.00 for the same period of 2008.

Net Income per share was \$0.02 for the first quarter of 2009 as compared to a net income of \$0.03 per share for the same period of 2008. The decrease of the net income per share for the first quarter of 2009 as compared to the same period of 2008 mainly reflected the lowering of government subsidies, tax credit and after-tax income from discontinued operations during the first quarter of 2009.

Net Income per Share Diluted

During the first quarter of 2009, some of the stock options outstanding had a dilutive impact of the Company's net income. The weighted average number of shares on a diluted basis was 67,362,462 and 68,170,887 for the first quarter of 2009 and 2008 respectively.

Net Income per share from continuing operations on a diluted basis was \$0.02 for the first quarter of 2009 as compared to \$0.03 for the same period of 2008.

Net Income per share from discontinued operations on a diluted basis was \$0.00 for the first quarter of 2009 as compared to \$0.00 for the same period of 2008.

Net Income per share on a diluted basis was \$0.02 for the first quarter of 2009 compared to \$0.03 per share for the same period of 2008. The decrease of the net income per share on a diluted basis for the first quarter of 2009 as compared to the same period of 2008 mainly reflected the lowering of government subsidies, tax credit and after-tax income from discontinued operations during the first quarter of 2009.

Liquidity and Capital Resources

As of March 31, 2009, Dragon Pharma had current liabilities of \$68.33 million and current assets of \$45.67 million, including cash of \$2.12 million, restricted cash of \$0.74 million and accounts receivables of \$13.04 million. The deficiency in working capital was mainly due to the use of short-term loans to finance the increase in working capital requirements as the business grows.

The Company has developed and is implementing a plan to decrease its debt and increase its working capital which will allow the Company to continue operations. To meet these objectives, the Company plans to seek additional equity through the exchange of some of its liabilities and expects to raise funds through private placements in order to support existing operations and expand the range and scope of its business. In addition, the Company intends to continue to renegotiate and extend loans, as required, when they become due, as has been done in the past. There is no assurance that such additional funds will be available for the Company on acceptable terms, if at all, or that the Company will be able to negotiate and extend the loans. If adequate funds are not available or not available on acceptable terms or the Company is unable to negotiate or extend its loans, the Company may be required to scale back or abandon some activities. Management believes that actions presently taken provide the opportunity for the Company to continue as a going concern. The Company's ability to achieve these objectives cannot be determined at this time. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The Company's financial statements do not include any adjustments that might result from this uncertainty.

As of March 31, 2009, the Company had current liabilities of \$68.33 million as follows:

Accounts Payable	\$17.48 million
Other Payables and Accrued Expenses	\$26.52 million
Loans Payable - Short Term	\$23.57 million
Note Payable	\$0.74 million
Due to related companies	\$0.02 million
Total Current Liabilities	\$68.33 million

As of March 31, 2009, the Company had outstanding short-term loans (less than one year term) totaling \$23.57 million. The Company believes that it will be successful in renegotiating loans based on the assumption that the Company has enhanced its ability to generate additional cash flow from its operation since the loans were originally entered into, even though there is no assurance of renewing the loans.

Long-term Liabilities:

At March 31, 2009, the Company had long-term loan payable of \$20.60 million. During the quarter ended March 31, 2009, the Company financed its operations and increased production level at its Penicillin and Cephalosporin Divisions through operating revenues, accounts payables and short-term loans. The Company intends to seek additional funding through equity financing to improve its financial position.
