<Note> In order for the warrants to be granted or transferred to the directors and certain employees of the Company and the directors and certain employees of an affiliated company, the Company issued unsecured bonds with detachable warrants. Under pre-revised section 341-8-4 of the Japanese Commercial Code, the redemption and retirement of these bonds are restricted when the total amount of the bonds is less than the total amount of the issue price of the stocks from unexecuted warrants. To reduce interest costs, the Company repurchased some of the issued bonds after warrants were detached. Based on the above reason, the Company intends to hold the treasury bonds until they can be retired legally which is substantially the same as redemption. Thus, bonds and treasury bonds (4,000 million yen as of March 31, 2006 and 4,000 million yen as of December 31, 2005 respectively) are disclosed in net amount in the balance sheet.

In 2<sup>nd</sup> quarter, the company expected that (Yen) 1,380 million of Stock option cost will be incurred as part of Cost of sales and Operating expense .

(Note) Since the business environment surrounding Trend Micro Group tends to fluctuate in the short run, it is difficult to make the highly reliable projection figures on a yearly basis. We, therefore, decided to announce the earnings on a quarterly basis in the fiscal year ending in December 2006 as well as earnings projection of the succeeding quarter.

If we found through our calculation conducted from time to time that the net sales fluctuate from the most recent quarterly projection by more than 10%, or operating income or net income fluctuates by more than 30%, we will announce the revision of the earnings projection.
