Edgar Filing: BJ's RESTAURANTS INC - Form 10-Q

See accompanying notes to unaudited consolidated financial statements.

Table of Contents**BJ'S RESTAURANTS, INC.****NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS****1. BASIS OF PRESENTATION**

The accompanying unaudited consolidated financial statements include the accounts of BJ's Restaurants, Inc. and its wholly owned subsidiaries. Our consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information, and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X.

Certain information and footnote disclosures normally included in consolidated financial statements in accordance with U.S. generally accepted accounting principles have been omitted pursuant to requirements of the Securities and Exchange Commission (SEC). A description of our accounting policies and other financial information is included in our audited consolidated financial statements as filed with the SEC on Form 10-K for the year ended January 3, 2006. We believe that the disclosures included in our accompanying interim financial statements and footnotes are adequate to make the information not misleading, but should be read in conjunction with our consolidated financial statements and notes thereto included in the Annual Report on Form 10-K. The accompanying consolidated balance sheet as of January 3, 2006 has been derived from our audited financial statements.

Effective the fiscal third quarter of 2005, we changed our fiscal week-end from Sunday to Tuesday. This change was completed to facilitate operational efficiencies by transferring certain administrative tasks away from the weekends when our restaurants are busiest. Accordingly, the thirty-nine weeks ended October 3, 2006 contain 273 days as compared to 275 days for the thirty-nine weeks ended October 4, 2005.

To conform to the prevalent practice in the casual dining segment of the restaurant industry, we have reclassified certain non food related items from cost of sales to operating and occupancy expenses and manager-in-training salaries from restaurant labor to general and administrative expenses for the current year. These reclassifications have been made to the prior year's financial statements to conform to the current period presentation.

2. INVESTMENTS

All investments are classified as held-to-maturity and are reported at amortized cost. Realized gains and losses are reflected in earnings.

Investments consist of the following (in thousands):

	October 3, 2006	January 3, 2006
U.S. and government agency securities	\$ 2,466	\$ 982
U.S. corporate notes and bonds	14,478	40,721
Total investments	\$ 16,944	\$ 41,703

Average maturities for our total investment portfolio as of October 3, 2006 and January 3, 2006 were approximately 2 months and 3 months, respectively. All short term investments are investment grade securities.

3. NET INCOME PER SHARE

Basic net income per share is computed by dividing the net income attributable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net income per share reflects the potential dilution that could occur if stock options issued by us to sell common stock at set prices were exercised. The financial statements present basic and diluted net income per share. Common share equivalents included in the diluted computation represent shares issuable upon assumed exercises of outstanding stock options using the treasury stock method.

Table of Contents

The following table presents a reconciliation of basic and diluted net income per share computations and the number of dilutive securities (stock options) that were included in the dilutive net income per share computation (in thousands).

	For The Thirteen		For The Thirty-Nine	
	Weeks Ended		Weeks Ended	
	October 3,	October 4,	October 3,	October 4,
	2006	2005	2006	2005
Numerator:				
Net income for basic and diluted net income per share	\$ 2,372	\$ 2,309	\$ 7,023	\$ 6,036
Denominator:				
Weighted average shares outstanding - basic	22,918	22,682	22,869	21,934
Effect of dilutive common stock options	775	1,319	882	1,229
Weighted average shares outstanding - diluted	23,693	24,001	23,751	23,163

For the thirteen weeks and thirty-nine weeks ended October 3, 2006 and October 4, 2005, there were approximately 382,680 and 418,130 stock options outstanding whereby the exercise price exceeded the average common stock market value, respectively. The effects of the shares which would be issued upon the exercise of these options have been excluded from the calculation of diluted net income per share because they are anti-dilutive.

4. RELATED PARTY

As of October 3, 2006, we believe that Jacmar Companies and their affiliates (collectively referred to herein as Jacmar) owned approximately 19.9% of our outstanding common stock. Jacmar, through its specialty wholesale food distributorship, is currently the Company's largest supplier of food, beverage and paper products. In 2004, Jacmar also acquired ownership of the Shakey's pizza parlor chain. In July 2006, after an extensive competitive bidding process, the Company entered into a three-year agreement with Distribution Market Advantage (DMA) for its company-wide foodservice distribution requirements. DMA is a national foodservice distribution system whose shareholders are prominent regional foodservice distributors, of which Jacmar is one. Jacmar will continue to service the Company's restaurants in California, while other DMA distributors will service our restaurants in all other states. We believe that Jacmar sells products to us at prices comparable to those offered by unrelated third parties. Jacmar supplied us with approximately \$20.5 million and \$18.5 million of food, beverage and paper products for the thirty-nine weeks ended October 3, 2006 and October 4, 2005, respectively, which represents 46.0% and 56.6% of our total costs for these products. We had trade payables related to these products of approximately \$1.4 million and \$2.3 million at October 3, 2006 and October 4, 2005, respectively.

5. STOCK-BASED COMPENSATION

We have two stock-based compensation plans—the 2005 Equity Incentive Plan and the 1996 Stock Option Plan—under which we may issue shares of our common stock to employees, officers, directors and consultants. Upon effectiveness of the 2005 Equity Incentive Plan, the 1996 Stock Option Plan was closed for purposes of new grants. Both of these plans have been approved by our shareholders.

Prior to January 4, 2006, we accounted for those plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation* (Statement No. 123). No stock-based employee compensation cost was recognized in our Statement of Income for the thirteen weeks and thirty-nine weeks ended October 4, 2005 as all options granted under our plans had an exercise price equal to the market value of the underlying common stock on the date of grant. Effective January 4, 2006, we adopted the fair value recognition provisions of FASB Statement No. 123(R), *Share-Based Payment* (Statement No. 123(R)), using the modified-prospective-transition method. Under that transition method, compensation cost recognized in the thirteen weeks and thirty-nine weeks ended October 3, 2006 includes: (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 4, 2006, based on the grant date fair value estimated in accordance with the original provisions of Statement No. 123, and (b) compensation cost for all share-based payments granted subsequent to January 4, 2006, based on the grant date fair value estimated in accordance with the provisions of Statement No. 123(R). Results for prior periods have not been restated.

Table of Contents

Prior to the adoption of Statement No. 123(R), we presented all tax benefits of deductions resulting from the exercise of stock options as operating cash flows in our Statement of Cash Flows. Statement No. 123(R) requires the cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows. For the thirty-nine weeks ended October 3, 2006, the \$1.5 million excess tax benefit classified as financing cash inflow would have been classified as an operating cash inflow if we had not adopted Statement No. 123(R).

The following tables illustrate the effect on net income and net income per share if we had applied the fair value recognition provisions of Statement 123(R) to all periods presented. For the purposes of this pro forma disclosure, the value of the options for fiscal 2005 are estimated using a Black-Scholes option-pricing formula and amortized to expense over the options' vesting periods. Management believes that the adjusted presentation may be useful to investors to permit them to compare the Company's results using consistent assumptions regarding stock-based compensation.

Diluted net income per share	\$ 0.10	\$ 0.08	\$ 0.30	\$ 0.19

The fair value of each option grant issued is estimated at the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions:

	For the Thirty-Nine	
	Weeks Ended	
	October 3,	October 4,
	2006	2005
Expected volatility	38.78%	40.49%
Risk free interest rate	4.46%	3.94%
Expected option life	5 years	5 years
Dividend yield	0%	0%
Fair value of options granted	\$ 9.49	\$ 7.30

Edgar Filing: BJs RESTAURANTS INC - Form 10-Q

FASB Statement No. 123(R) requires us to make certain assumptions and judgments regarding the grant date fair value. These judgments include expected volatility, risk free interest rate, expected option life, dividend yield and vesting percentage. These estimations and judgments are determined by us using many different variables that, in many cases, are outside of our control. The changes in these variables or trends, including stock price volatility and risk free interest rate, may significantly impact the grant date fair value resulting in a significant impact to our financial results.

Table of Contents

6. COMMON STOCK

On March 11, 2005, we sold 2.75 million shares of common stock to institutional investors at a purchase price of \$15.50 per share for \$40.3 million (net of approximately \$2.2 million in related fees and expenses). The proceeds are currently being utilized to fund the expansion of the Company's restaurant operations.

7. DIVIDEND POLICY

We have not paid any cash dividends since our inception and have currently not allocated any funds for the payment of dividends. Rather, it is our current policy to retain earnings, if any, for expansion of our restaurant and brewing operations, remodeling of existing restaurants and other general corporate purposes. We have no plans to pay any cash dividends in the foreseeable future. Should we decide to pay cash dividends in the future, such payments would be at the discretion of the Board of Directors.

8. RECENT ACCOUNTING PRONOUNCEMENTS

On October 6, 2005, the FASB issued Staff Position No. 13-1 (FSP 13-1), *Accounting for Rental Costs Incurred During a Construction Period*. Generally, FSP 13-1 requires companies to expense rental costs incurred during a construction period. As permitted prior to the adoption of FSP 13-1, we capitalized rental costs during construction. We adopted FSP 13-1 on January 4, 2006. The financial statement impact of the adoption of FSP 13-1 is expected to range from approximately \$50,000 to \$60,000 in additional pre-opening rent expense per restaurant during 2006 which may vary based on lease terms, restaurant openings and the length of construction periods.

In December 2004, the FASB issued Statement No. 153, *Exchanges of Nonmonetary Assets*, an amendment of APB Opinion No. 29, *Accounting for Nonmonetary Transactions*. This Statement amends the principle that exchanges of nonmonetary assets should be measured based on the fair value of the assets exchanged and more broadly provides for exceptions regarding exchanges of nonmonetary assets that do not have commercial substance. This Statement is effective for nonmonetary asset exchanges occurring during our fiscal year beginning January 4, 2006. The adoption of this Statement did not have a material impact on our results of operations or financial position.

In May 2005, the FASB issued Statement No. 154, *Accounting Changes and Error Corrections*, which changes the accounting for and reporting of a change in accounting principle. This Statement applies to all voluntary changes in accounting principle and changes required by an accounting pronouncement in the usual instance that the pronouncement does not include specific transition provisions. This Statement requires retrospective application to prior period financial statements of changes in accounting principle, unless it is impractical to determine either the period specific or cumulative effects of the change. Statement No. 154 is effective for accounting changes made in our fiscal year beginning January 4, 2006. The adoption of this Statement did not have a material impact on our results of operation or financial position.

In July 2006, the FASB issued FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement No. 109, *Accounting for Income Taxes*, which is effective for fiscal years beginning after December 15, 2006, and clarifies the accounting for uncertainty in tax positions. FIN 48 requires that we recognize the impact of a tax position in our financial statements if that position is more likely than not of being sustained on audit, based on the technical merits of the position. The cumulative effect of the change in accounting principle is recorded as an adjustment to opening retained earnings. We are currently evaluating the impact of the adoption of FIN 48 on our financial statements.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS STATEMENT REGARDING FORWARD LOOKING DISCLOSURE

The following discussion and analysis should be read in conjunction with our consolidated financial statements and notes thereto included elsewhere in this Form 10-Q. Except for the historical information contained herein, the discussion in this Form 10-Q contains certain forward-looking statements that involve known and unknown risks and uncertainties, such as statements of our plans, objectives, expectations and intentions. The cautionary statements made in this Form 10-Q should be read as being applicable to all related forward-looking statements wherever they

Table of Contents

appear in this Form 10-Q. Our actual results could differ materially from those discussed in forward-looking statements. Factors that could cause or contribute to such differences include, without limitation: (i) our ability to manage an increasing number of new restaurant openings, (ii) construction delays, (iii) labor shortages, (iv) minimum wage increases, (v) food quality and health concerns, (vi) factors that impact California, where 35 of our current 54 restaurants are located (as of October 27, 2006), (vii) restaurant and brewery industry competition, (viii) impact of certain brewery business considerations, including, without limitation, dependence upon suppliers and related hazards, (ix) consumer trends, (x) potential uninsured losses and liabilities, (xi) fluctuating commodity costs including food and energy, (xii) trademark and servicemark risks, (xiii) government regulations, (xiv) licensing costs (xv) beer and liquor regulations, (xvi) loss of key personnel, (xvii) inability to secure acceptable sites, (xviii) limitations on insurance coverage, (xix) legal proceedings, (xx) other general economic and regulatory conditions and requirements and (xxi) numerous other matters discussed in this Form 10-Q and our Annual Report on Form 10-K for the fiscal year ended January 3, 2006. See Part II, Item 1A Risk Factors of this Form 10-Q.

GENERAL

On October 27, 2006, we owned and operated 54 restaurants located in California, Oregon, Colorado, Arizona, Texas and Nevada. A licensee also operates one restaurant in Lahaina, Maui. Each of our restaurants is operated either as a BJ's Restaurant & Brewery® which includes a brewery within the restaurant, a BJ's Restaurant & Brewhouse® which receives the beer it sells from one of our breweries or an approved third party craft brewer of our proprietary recipe beers (contract brewer), or a BJ's Pizza & Grill which is a smaller format, full service restaurant. Our menu features our BJ's® award-winning, signature deep-dish pizza, our own hand-crafted beers as well as a wide selection of appetizers, entrees, pastas, sandwiches, specialty salads and desserts including our unique Pizookie® dessert. Our 11 BJ's Restaurant & Brewery restaurants feature in-house brewing facilities where BJ's proprietary hand-crafted beers are produced and sold.

Our revenues are comprised of food and beverage sales at our restaurants. Revenues from restaurant sales are recognized when payment is tendered at the point of sale. Revenues from our gift cards are recognized upon redemption in our restaurants. Until the redemption of gift cards occurs, all outstanding balances on such cards are included as a liability in our consolidated balance sheets.

Cost of sales is comprised of food and beverage supplies. The components of cost of sales are variable and typically fluctuate with sales volumes. Labor and benefit costs include direct hourly and management wages, bonuses and payroll taxes and fringe benefits for restaurant employees (including stock-based compensation related to restaurant level employees). Occupancy and operating expenses include restaurant supplies, credit card fees, marketing costs, fixed rent, percentage rent, common area maintenance charges, utilities, real estate taxes, repairs and maintenance and other related restaurant costs.

General and administrative expenses include all corporate, field supervision and administrative functions that support existing operations and provide infrastructure to facilitate our future growth. Components of this category include management, supervisory and staff salaries and related employee benefits (including stock-based compensation), travel and relocation costs, information systems, restaurant manager recruitment and training, corporate rent and professional, legal and consulting fees. Depreciation and amortization principally include depreciation on capital expenditures for restaurants. Restaurant opening expenses, which are expensed as incurred, consist of the costs of hiring and training the initial work force for each new restaurant, travel, the cost of food and supplies used in training, marketing costs, the cost of the initial stocking of office supplies and other direct costs related to the opening of a new restaurant.

In calculating comparable company-owned restaurant sales, we include a restaurant in the comparable base once it has been open for 18 months.

RESULTS OF OPERATIONS

The following table sets forth, for the periods indicated, our unaudited Consolidated Statements of Income expressed as percentages of total revenues. The results of operations for the thirteen and thirty-nine weeks ended October 3, 2006 and October 4, 2005 are not necessarily indicative of the results to be expected for the full fiscal year.

Effective the fiscal third quarter of 2005, we changed our fiscal week-end from Sunday to Tuesday. This change was completed to facilitate operational efficiencies by transferring certain administrative tasks away from the weekends

Table of Contents

when our restaurants are busiest. Accordingly, our third quarter of 2006 contains 91 days and ended on Tuesday, October 3, 2006 as compared to our third quarter of 2005, which contained 93 days, and ended on Tuesday, October 4, 2005. Additionally, the thirty-nine weeks ended October 3, 2006 contain 273 days as compared to 275 days for the thirty-nine weeks ended October 4, 2005.

	For The Thirteen		For The Thirty-Nine	
	Weeks Ended October 3, 2006	Weeks Ended October 4, 2005	Weeks Ended October 3, 2006	Weeks Ended October 4, 2005

Thirteen Weeks Ended October 3, 2006 Compared to Thirteen Weeks Ended October 4, 2005.

Revenues. Total revenues increased by \$14.2 million, or 29.9%, to \$61.8 million during the thirteen weeks ended October 3, 2006 from \$47.6 million during the comparable thirteen week period of 2005. The \$14.2 million increase in revenues consisted of an approximate \$10.4 million increase in restaurant sales from new restaurants not yet in our comparable sales base, and an approximate \$2.0 million, or 5.3%, increase from comparable restaurant sales, offset by \$705,000 of additional revenues due to the two additional operating days in the prior year. The increase in comparable restaurant sales benefited from a menu price increase of approximately 2.5% with the rest due to increased customer counts and menu mix shifts. We believe that our new computerized kitchen display system (KDS) and related quality fast service enhancements, introduced during the first half of 2006, enabled our restaurant operators to process a greater amount of customers during peak meal periods.

Cost of Sales. Cost of sales increased by \$4.0 million, or 33.1%, to \$16.0 million during the thirteen weeks ended October 3, 2006 from \$12.1 million during the comparable thirteen week period of 2005. As a percentage of revenues, cost of sales increased to 26.0% for the current thirteen week period from 25.3% for the prior year comparable thirteen week period. This increase is primarily a result of temporary transitional costs and inefficiencies that resulted from our new distribution and produce supplier agreements with DMA and another produce company effective July 2006; increased produce costs as a result of record high temperatures experienced in the produce-growing areas of California this summer and continuing diesel fuel surcharges from our distributors, partially offset by the impact of menu price increases.

In our new restaurants, our cost of sales will typically be higher during the first 90-120 days of operations versus our mature restaurants, as our restaurant management teams become accustomed to optimally predicting, managing and servicing sales volumes at our restaurants. As such, the timing of new restaurant openings has had and will continue to have an effect on our cost of sales.

Table of Contents

We provide our restaurant guests with a large variety of menu items and therefore we are not overly dependent on a single group of commodities. We continue to work with our suppliers to control food costs; however, there can be no assurance that future supplies and costs for commodities used in our restaurants will not fluctuate due to weather and other market conditions outside of our control.

Labor and Benefits. Labor and benefit costs for our restaurants increased by \$4.2 million, or 24.6%, to \$21.4 million during the thirteen weeks ended October 3, 2006 from \$17.2 million during the comparable thirteen week period of 2005. This increase was primarily due to the opening of ten new restaurants since the thirteen weeks ended October 4, 2005. As a percentage of revenues, labor and benefit costs decreased to 34.7% for the current thirteen week period from 36.2% for the prior year comparable thirteen week period. This percentage decrease is primarily due to increased leverage of the fixed component of our labor costs with higher sales, coupled with slightly improved hourly labor productivity resulting from the new web-based labor scheduling and analysis system that was introduced during the first half of 2006.

For new restaurants, labor and benefit costs will typically be higher than normal during the first 90-120 days of operations until our management team at each new restaurant becomes more accustomed to optimally predicting, managing and servicing the sales volumes and resulting staff requirements at our new restaurants. As such, the timing of new restaurant openings has had and will continue to have an effect on labor and benefit costs.

The California minimum hourly wage is scheduled to increase by \$0.75 to \$7.50 on January 1, 2007. An additional \$0.50 increase is scheduled for January 1, 2008. As of October 27, 2006, 35 of our 54 restaurants in operation are located in California. In order to substantially offset the expected increase in our California hourly labor costs, we will implement an approximate 1.7% effective menu price increase in our California restaurants effective with our regularly scheduled menu update in mid-November 2006. We expect other foodservice operators to increase their menu prices in California as well. However, there can be no absolute assurance that the planned menu price increase will cover the incremental cost of the higher minimum wage (see Impact of Inflation).

As previously noted in the Company's 2005 annual report and accompanying letter to shareholders, the Company is in the final stages of structuring a meaningful performance-based equity incentive plan for its restaurant general managers, executive kitchen managers and field supervision personnel. The recruitment, retention and motivation of highly qualified restaurant management personnel remains extremely critical to the successful execution of the Company's national restaurant expansion plan, as well as to the correct and consistent execution of its established high volume, operationally complex restaurants. Most of the Company's highly successful competitors in the casual-plus or premium casual segment already offer total compensation programs to their restaurant managers and field supervision personnel that include a meaningful equity component. The Company must continue to improve its ability to successfully compete for the best available restaurant management and supervision talent on a national basis. Company management believes that, by hiring and retaining the most qualified restaurant management and supervision talent available, the Company's opportunity for sustained profitable performance and growth should be significantly enhanced. The new equity incentive plan, BJ's Gold Standard Stock Ownership Plan, is currently expected to consist of awards of restricted stock units that will have five-year vesting and performance requirements. The annualized pre-tax compensation expense associated with these awards is currently expected to average approximately \$16,000 per restaurant on an ongoing basis. The Company intends to grant equity awards to its existing restaurant management personnel as well as to managers of new restaurants going forward. The Company expects to achieve certain longer-term benefits from implementing the new equity incentive plan in terms of improved operational execution and lower expenses related to restaurant manager turnover. However, there can be no absolute assurance that such benefits will be achieved. The Company anticipates incurring approximately \$825,000-900,000 in additional non-cash equity compensation expense during fiscal 2007 related to this new equity incentive plan. The non cash equity compensation expense for field supervision will be reflected in the Company's general and administrative expenses and the non cash equity compensation expense for restaurant management will be reflected in restaurant labor expense.

Occupancy and Operating Expenses. Occupancy and operating expenses increased by \$2.9 million, or 32.3%, to \$12.0 million during the thirteen weeks ended October 3, 2006 from \$9.1 million during the comparable thirteen week period of 2005. The increase reflects additional operating and occupancy expenses related to the ten new restaurants we opened since the thirteen weeks ended October 4, 2005. As a percentage of revenues, occupancy and operating expenses increased to 19.5% for the thirteen week period from 19.1% for the prior year comparable thirteen week period. This increase is primarily due to higher energy costs and increased dining and kitchen supplies partially offset by increased leverage of the fixed component of these expenses with higher sales.

Table of Contents

General and Administrative Expenses. General and administrative expenses increased by \$1.7 million, or 48.7%, to \$5.1 million during the thirteen weeks ended October 3, 2006 from \$3.4 million during the comparable thirteen week period of 2005. Included in general and administrative costs for the thirteen weeks ended October 3, 2006 is \$425,000 of stock-based compensation expense related to the adoption of Statement No. 123(R). Excluding this amount, general and administrative costs increased \$1.2 million, or 36.3%. This increase was principally due to planned investments in additional field supervision and corporate infrastructure to support our growth and increased investments in our restaurant management recruiting and training program. During 2006, we expect to continue to add resources to the corporate support and field supervision activities in preparation for the planned openings of as many as 11 new restaurants this year and as many as 13 new restaurants during 2007. We also expect to continue to increase our investment in higher quality restaurant manager recruits to support our national growth plan. As a percentage of revenues, general and administrative expenses increased to 8.3% for the thirteen week period from 7.2% for the prior year comparable thirteen week period. Approximately 70 basis points of this percentage increase is the result of stock-based compensation due to the adoption of Statement No. 123(R), with the remaining increase being due primarily to the factors noted above.

In order to add capacity to support the expected future growth of our restaurant and brewery operations, as well as to provide more professional restaurant manager training and culinary R&D capabilities, we plan to relocate our home office support staff and activities to a larger leased facility in Huntington Beach, CA during the first quarter of 2007. We expect the annual expense related to our new leased home office will be approximately \$360,000 higher compared to the same expense for 2006. The total fixed rental commitment related to the new office lease is approximately \$3.8 million for 68.5 months.

Depreciation and Amortization. Depreciation and amortization increased by \$784,000, or 42.7%, to \$2.6 million during the thirteen weeks ended October 3, 2006 from \$1.8 million during the comparable thirteen week period of 2005. The increase was primarily due to our acquisition of restaurant equipment, furniture, leasehold improvements and brewery equipment related to new restaurant development. As a percentage of revenues, depreciation and amortization increased to 4.2% for the thirteen week period from 3.9% for the prior year comparable thirteen week period. This increase is primarily due to increased construction costs for new restaurants and depreciation on our new operating systems.

Restaurant Opening Expense. Restaurant opening expense increased by \$409,000, or 45.5%, to \$1.3 million during the thirteen weeks ended October 3, 2006 from \$899,000 million during the comparable thirteen week period of 2005. The increase was primarily due to the new restaurants we opened during the period, opening costs for five other restaurants that were either opened prior to this quarter or will subsequently open this year and pre-opening rent related to the adoption of FSP 13-1 (described below). During the thirteen weeks ended October 3, 2006 and October 4, 2005, we opened two and one restaurants, respectively. Our opening costs will fluctuate from period to period, depending upon, but not limited to, the number of restaurant openings, the size and concept of the restaurants being opened, the location of the restaurants and the complexity of the staff hiring and training process.

Effective January 4, 2006, we began expensing non-cash holiday rent during each restaurant's construction period to restaurant opening expense in accordance with the adoption of FSP13-1, *Accounting for Rental Costs Incurred During a Construction Period*. We anticipate this non-cash rent to average approximately \$50,000 to \$60,000 per restaurant. As a result, we anticipate higher restaurant opening costs this year compared to prior years.

Interest Income, Net. Net interest income decreased by \$48,000, or 13.0%, to \$321,000 during the thirteen weeks ended October 3, 2006 from \$369,000 during the comparable thirteen week period of 2005. This decrease is primarily due to lower investment balances offset by higher interest rates compared to the same quarter as last year.

Other Income, Net. Net other income increased to \$5,000 during comparable thirteen weeks ended October 3, 2006 from \$4,000 during the comparable thirteen week period of 2005, an increase of \$1,000.

Income Tax Expense. Our effective income tax rate for the thirteen weeks ended October 3, 2006 was 33.9% compared to 32.6% for the comparable thirteen week period of 2005. The effective income tax rate for the thirteen weeks ended October 3, 2006 differs from the statutory income tax rate primarily due to anticipated FICA tip credits and the non-deductibility of incentive stock options. We currently estimate our effective tax rate to be approximately

Table of Contents

34.0% to 35.0% for fiscal 2006. However, the actual effective tax rate for fiscal 2006 may be different than our current estimate due to actual revenues, pre-tax income and tax credits achieved during the year.

Thirty-Nine Weeks Ended October 3, 2006 Compared to Thirty-Nine Weeks Ended October 4, 2005.

Revenues. Total revenues increased by \$44.0 million, or 34.1%, to \$173.0 million during the thirty-nine weeks ended October 3, 2006 from \$129.0 million during the comparable thirty-nine week period of 2005. The \$44.0 million increase in revenues consisted of an approximate \$37.7 million increase in restaurant sales from new restaurants not yet in our comparable sales base, and an approximate \$6.4 million or 6.0% increase from comparable restaurant sales, offset by \$705,000 of additional revenues due to the two additional operating days in the prior year. The increase in comparable restaurant sales benefited from a menu price increase of approximately 2.0% with the rest due to increased customer counts and menu mix shifts.

Cost of Sales. Cost of sales increased by \$11.9 million, or 36.3%, to \$44.5 million during the thirty-nine weeks ended October 3, 2006 from \$32.7 million during the comparable thirty-nine week period of 2005. As a percentage of revenues, cost of sales increased to 25.7% for the current thirty-nine week period from 25.3% for the prior year comparable thirty-nine week period. This increase is primarily a result of increased costs for seafood, temporary transitional inefficiencies that resulted from the change in our principal foodservice and produce distribution arrangements, increased produce costs as a result of record high temperatures in the produce-growing areas of California this summer and continuing diesel fuel surcharges from our distributors, partially offset by the impact of menu price increases.

Labor and Benefits. Labor and benefit costs for our restaurants increased by \$13.9 million, or 29.9%, to \$60.1 million during the thirty-nine weeks ended October 3, 2006 from \$46.3 million during the comparable thirty-nine week period of 2005. This increase was primarily due to the opening of ten new restaurants since the thirty-nine weeks ended October 4, 2005. As a percentage of revenues, labor and benefit costs decreased to 34.8% for the current thirty-nine week period from 35.9% for the prior year comparable thirty-nine week period. This percentage decrease is primarily due to increased leverage of the fixed component of our labor costs with higher sales, coupled with slightly improved hourly labor productivity resulting from the new web-based labor scheduling and analysis system that was introduced during the first half of 2006.

Occupancy and Operating Expenses. Occupancy and operating expenses increased by \$8.8 million, or 35.7%, to \$33.3 million during the thirty-nine weeks ended October 3, 2006 from \$24.5 million during the comparable thirty-nine week period of 2005. The increase reflects additional operating and occupancy expenses related to the ten new restaurants we opened since the thirty-nine weeks ended October 4, 2005. As a percentage of revenues, occupancy and operating expenses increased to 19.2% for the thirty-nine week period from 19.0% for the prior year comparable thirty-nine week period. This increase is primarily due to higher energy costs and increased dining and kitchen supplies partially offset by our ability to leverage the fixed nature of many of these costs as a result of higher comparable sales.

General and Administrative Expenses. General and administrative expenses increased by \$5.3 million, or 55.1%, to \$14.8 million during the thirty-nine weeks ended October 3, 2006 from \$9.6 million during the comparable thirty-nine week period of 2005. Included in general and administrative costs for the thirty-nine weeks ended October 3, 2006 is \$1.3 million of stock-based compensation expense related to the adoption of Statement No. 123(R). Excluding this amount, general and administrative costs increased \$4.0 million, or 41.8%. This increase was the result of our planned investments in field supervision and corporate infrastructure to support our growth coupled with higher restaurant management recruiting and training costs. As a percentage of revenues, general and administrative expenses increased to 8.6% for the thirty-nine week period from 7.4% for the prior year comparable thirty-nine week period. Approximately 80 basis points of this percentage increase is the result of stock-based compensation due to the adoption of Statement No. 123(R), with the remaining increase being due primarily to the factors noted above.

Depreciation and Amortization. Depreciation and amortization increased by \$2.2 million, or 44.2%, to \$7.1 million during the thirty-nine weeks ended October 3, 2006 from \$4.9 million during the comparable thirty-nine week period of 2005. The increase was primarily due to our acquisition of restaurant equipment, furniture, leasehold improvements and brewery equipment related to new restaurant development. As a percentage of revenues, depreciation and amortization increased to 4.1% for the thirty-nine week period from 3.8% for the prior year comparable thirty-nine week period. This increase is primarily due to increased construction costs for new restaurants and depreciation on our new operating systems.

Table of Contents

Restaurant Opening Expense. Restaurant opening expense increased by \$644,000, or 21.4%, to \$3.6 million during the thirty-nine weeks ended October 3, 2006 from \$3.0 million during the comparable thirty-nine week period of 2005. During the thirty-nine weeks ended October 3, 2006 and October 4, 2005, we opened seven and six restaurants, respectively. This increase is primarily due to additional restaurants compared to prior year end and construction rent expensed related to the adoption of FSP 13-1. Our opening costs will fluctuate from period to period, depending upon, but not limited to, the number of restaurant openings, the size and concept of the restaurants being opened, the location of the restaurants and the complexity of the staff hiring and training process.

Interest Income, Net. Net interest income increased by \$327,000, or 42.9%, to \$1.1 million during the thirty-nine weeks ended October 3, 2006 from \$762,000 during the comparable thirty-nine week period of 2005. This increase is primarily due to increased investments after the completion of our private placement in March 2005 coupled with higher interest rates.

Other Income, Net. Net other income decreased to \$37,000 during comparable thirty-nine weeks ended October 3, 2006 from \$121,000 during the comparable thirty-nine week period of 2005, a decrease of \$84,000. This decrease is primarily due to our decision to discontinue lottery ticket sales in our Oregon restaurants.

Income Tax Expense. Our effective income tax rate for the thirty-nine weeks ended October 3, 2006 was 34.2% compared to 32.3% for the comparable thirty-nine week period of 2005. The effective income tax rate for the thirty-nine weeks ended October 3, 2006 differs from the statutory income tax rate primarily due to FICA tip credits and the non-deductibility of incentive stock options. We currently estimate our effective tax rate to be approximately 34.0% to 35.0% for fiscal 2006. However, the actual effective tax rate for fiscal 2006 may be different than our current estimate due to actual revenues, pre-tax income and tax credits achieved during the year.

LIQUIDITY AND CAPITAL RESOURCES

Our capital requirements are principally related to our restaurant growth plans. While our ability to achieve our growth plans is dependent on a variety of factors, many of which are outside of our control, our primary growth objective is to achieve a 20% to 25% increase in total restaurant operating weeks during each of fiscal 2006 and 2007. Our base of established restaurant operations is not yet large enough to generate enough free cash flow from operations to totally fund our planned expansion. Similar to many restaurant chains, we typically utilize operating lease arrangements (principally ground leases) for substantially all of our restaurant locations. However, from time to time, we may be required to purchase the underlying land for a new restaurant if that is the only way to secure a highly desirable site. We are typically required to expend cash to perform certain site related work and to construct and equip our restaurant buildings. We have opened seven new restaurants during the first three quarters of fiscal 2006 and we currently expect to open as many as four more during the remainder of fiscal 2006. And, we currently expect to open as many as 13 new restaurants during fiscal 2007. We believe that our operating lease arrangements continue to provide appropriate leverage for our capital structure in a financially efficient manner. However, we are not limited to the use of lease arrangements as our only method of opening new restaurants. While our operating lease obligations are not currently required to be reflected as indebtedness on our consolidated balance sheets, the minimum rents and related fixed asset obligations under our lease agreements must be satisfied by cash flows from our ongoing operations. Accordingly, our lease arrangements reduce, to some extent, our capacity to utilize funded indebtedness in our capital structure. We also require capital resources to maintain our existing base of restaurants and brewery operations and to further expand and strengthen the capabilities of our corporate and information technology infrastructures. Our requirement for working capital is not significant since our restaurant guests pay for their food and beverage purchases in cash or credit cards at the time of the sale. Thus, we are able to sell many of our inventory items before we have to pay our suppliers for such items.

Our cash flows from operating activities, as detailed in the consolidated statements of cash flows, provided \$19.5 million of net cash during the thirty-nine weeks ended October 3, 2006, a \$2.6 million increase from the \$16.9 million generated during the comparable thirty-nine week period of 2005. The increase in cash from operating activities is due to the timing of payments to vendors included in accounts payable, increased net income, higher depreciation expense due to more restaurants, increased credit card receipts in-transit classified as receivables and non-cash stock-based compensation expense, partially offset by the timing of payments to vendors included in accrued expenses.

Table of Contents

For the thirty-nine weeks ended October 3, 2006, total capital expenditures were \$41.7 million of which expenditures for the acquisition of land, restaurant and brewery equipment and leasehold improvements to construct new restaurants were \$34.6 million. These expenditures were primarily related to the construction of our seven new restaurants opened by the end of the third quarter as well as expenditures on four additional restaurants expected to open in the fourth quarter of 2006. In addition, total capital expenditures related to the maintenance of existing restaurants and expenditures related to restaurant and corporate systems were \$3.8 million and \$3.3 million, respectively.

On March 11, 2005, we sold 2.75 million shares of common stock at a purchase price of \$15.50 per share for \$40.3 million (net of approximately \$2.2 million in related fees and expenses). The proceeds are currently being utilized to fund the expansion of our restaurant operations.

On December 15, 2005, we established a \$10 million unsecured revolving line of credit (the Line of Credit) which expires on December 31, 2008. Availability under the Line of Credit is reduced by outstanding letters of credit primarily supporting our self insurance programs. As of October 3, 2006, there were no funded borrowings outstanding under the Line of Credit; however there was \$1.4 million outstanding in letters of credit. Borrowings under the Line of Credit will bear interest at 1% per annum in excess of the applicable LIBOR rate.

Prior to the March 2005 equity offering, we funded our capital requirements primarily through cash flows from operations and proceeds received from the exercise of redeemable warrants during 2002. As of October 27, 2006, we have entered into nine signed leases or purchase agreements, for which the restaurants have not yet began operations, and we expect to enter into additional leases for new restaurant locations. Our capital requirements related to opening additional restaurants will continue to be significant. We currently anticipate our capital expenditures for 2006 to be approximately \$50 million related to the construction of our new restaurants and a 15,000 barrel brewery in Reno, Nevada, the purchase of land underlying two new restaurants, image enhancement remodels in some of our older restaurants as well as normal maintenance capital expenditures and the investment in our restaurant toolsets.

Our future cash requirements and the adequacy of available funds will depend on many factors, including the pace of expansion, real estate markets, site locations and the nature of the arrangements negotiated with landlords. We believe that our current cash flow and our cash and investments balances together with anticipated cash flows from operations should be sufficient to satisfy our working capital and capital expenditure requirements through fiscal 2006. Based on our current restaurant expansion plan and subject to market conditions, we expect to seek additional funds to finance our future growth and operations in the future. There can be no assurance that such funds will be available when required or available on terms acceptable to us.

IMPACT OF INFLATION

The impact of inflation on food, labor, energy and occupancy costs can significantly affect our operations. Many of our employees are paid hourly rates related to federal and state minimum wage laws. Minimum wages have been increased numerous times and remain subject to future increases. The California minimum wage is scheduled to increase by \$0.75 to \$7.50 on January 1, 2007 and an additional \$0.50 on January 1, 2008. While we have been able to react to inflation, minimum wage increases and other changes in our costs of key operating expenses by gradually increasing prices for our menu items, combined with reduced purchasing costs, and greater economies of scale, there can be no assurance that we will be able to continue to do so in the future. We do anticipate increasing our menu prices to substantially offset the impact of the 2007 California minimum wage increase, however competitive conditions could limit our menu pricing flexibility. We cannot guarantee that all future cost increases can be offset by increased menu prices or that increased menu prices will be fully absorbed by our restaurant guests without any resulting changes in their visit frequencies or purchasing patterns. Many of the leases for our restaurants provide for contingent rent obligations based on a percentage of sales. As a result, rent expense will absorb a proportionate share of any menu price increases in our restaurants. There can be no assurance that we will continue to generate increases in comparable restaurant sales in amounts sufficient to offset inflationary or other cost pressures.

SEASONALITY AND ADVERSE WEATHER

Our results of operations have historically been impacted by seasonality, which directly impacts tourism at our coastal California locations. The summer months (June through August) have traditionally been higher sales volume periods than other periods of the year. Quarterly results have been and will continue to be significantly impacted by the timing of

Table of Contents

new restaurant openings and their associated restaurant opening costs. As a result of these and other factors, our financial results for any given quarter may not be indicative of the results that may be achieved for a full fiscal year.

CRITICAL ACCOUNTING POLICIES

Critical accounting policies require the greatest amount of subjective or complex judgments by management and are important to portraying our financial condition and results of operations. Judgments or uncertainties regarding the application of these policies may result in materially different amounts being reported under different conditions or using different assumptions. We consider the following policies to be the most critical in understanding the judgments that are involved in preparing our consolidated financial statements.

Property and Equipment

We record all property and equipment at cost. Property and equipment accounting requires estimates of the useful lives for the assets for depreciation purposes and selection of depreciation methods. We believe the useful lives reflect the actual economic life of the underlying assets. We have elected to use the straight-line method of depreciation over the estimated useful life of an asset or the primary lease term of the respective lease, whichever is shorter. Renewals and betterments that materially extend the useful life of an asset are capitalized while maintenance and repair costs are charged to operations as incurred. Judgment is often required in the decision to distinguish between an asset which qualifies for capitalization versus an expenditure which is for maintenance and repairs.

We review property and equipment (which includes leasehold improvements) and intangible assets with finite lives for impairment when events or circumstances indicate these assets might be impaired. We test impairment using historical cash flows and other relevant facts and circumstances as the primary basis for our estimates of future cash flows. The analysis is performed at the restaurant level for indicators of impairment. If impairment indicators were identified, then assets would be recorded at fair value. This process requires the use of estimates and assumptions, which are subject to a high degree of judgment. If these assumptions change in the future, we may be required to record impairment charges for these assets. As of October 3, 2006, no impairment indicators have been identified.

Self Insurance Liability

We are self-insured for a portion of our employee workers' compensation program. We maintain coverage with a third party insurer to limit our total exposure for this program. The accrued liability associated with this program is based on our estimate of the ultimate costs to settle known claims as well as claims incurred but not yet reported to us (IBNR claims) as of the balance sheet date. Our estimated liability is not discounted and is based on information provided by our insurance broker and insurer, combined with our judgments regarding a number of assumptions and factors, including the frequency and severity of claims, our claims development history, case jurisdiction, related legislation, and our claims settlement practice. Significant judgment is required to estimate IBNR claims as parties have yet to assert such claims. If actual claims trends, including the severity or frequency of claims, differ from our estimates, our financial results could be significantly impacted.

Income Taxes

We provide for income taxes based on our estimate of federal and state tax liabilities. Our estimates include, but are not limited to, effective state and local income tax rates, allowable tax credits for items such as FICA taxes paid on reported tip income and estimates related to depreciation expense allowable for tax purposes. We usually file our income tax returns several months after our fiscal year-end. We file our tax returns with the advice and compilation of tax consultants. All tax returns are subject to audit by federal and state governments, usually years after the returns are filed, and could be subject to differing interpretation of the tax laws.

Deferred tax accounting requires that we evaluate net deferred tax assets to determine if these assets will more likely than not be realized in the foreseeable future. This test requires projection of our taxable income into future years to determine if there will be taxable income sufficient to realize the tax assets (future tax deductions and FICA tax credit carryforwards). The preparation of the projections requires considerable judgment and is subject to change to reflect future events and changes in the tax laws.

Table of Contents

Leases

We lease the majority of our restaurant locations. We account for our leases under the provisions of FASB Statement No. 13, *Accounting for Leases* (SFAS 13) and subsequent amendments, which require that our leases be evaluated and classified as operating or capital leases for financial reporting purposes. All of our restaurant leases are classified as operating leases pursuant to the requirements of SFAS 13. We disburse cash for leasehold improvements, furniture and fixtures and equipment to build out and equip our leased premises. We may also expend cash for permanent improvements that we make to leased premises that may be reimbursed to us by our landlords as construction contributions (also known as tenant improvement allowances) pursuant to agreed-upon terms in our leases. Landlord construction contributions can take the form of up-front cash, full or partial credits against minimum or percentage rents otherwise payable by us or a combination thereof.

Stock-based Compensation

We have two stock-based compensation plans—the 2005 Equity Incentive Plan and the 1996 Stock Option Plan—under which we may issue shares of our common stock to employees, officers, directors and consultants. Upon effectiveness of the 2005 Equity Incentive Plan, the 1996 Stock Option Plan was closed for purposes of new grants. Both of these plans have been approved by our shareholders.

Prior to January 4, 2006, we accounted for those plans under the recognition and measurement provisions of APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and related Interpretations, as permitted by FASB Statement No. 123, *Accounting for Stock-Based Compensation* (Statement No. 123). No stock-based employee compensation cost was recognized in our Statement of Income for the thirteen weeks and Thirty-nine weeks ended October 4, 2005 as all options granted under our plans had an exercise price equal to the market value of the underlying common stock on the date of grant. Effective January 4, 2006, we adopted the fair value recognition provisions of FASB Statement No. 123(R), *Share-Based Payment* (Statement No. 123(R)), using the modified-prospective-transition method. Under that transition method, compensation cost recognized in the thirteen weeks and thirty-nine weeks ended October 3, 2006 includes; (a) compensation cost for all share-based payments granted prior to, but not yet vested as of January 4, 2006, based on the grant date fair value estimated in accordance with the original provisions of Statement No. 123, and (b) compensation cost for all share-based payments granted subsequent to January 4, 2006, based on the grant date fair value estimated in accordance with the provisions of Statement No. 123(R). Results for prior periods have not been restated.

FASB Statement No 123(R) requires us to make certain assumptions and judgments regarding the grant date fair value. These judgments include expected volatility, risk free interest rate, expected option life, dividend yield and vesting percentage. These estimations and judgments are determined by us using many different variables that, in many cases, are outside of our control. The changes in these variables or trends, including stock price volatility and risk free interest rate, may significantly impact the grant date fair value resulting in a significant impact to our financial results.

Prior to the adoption of Statement No. 123(R), we presented all tax benefits of deductions resulting from the exercise of stock options as operating cash flows in our Statement of Cash Flows. Statement No. 123(R) requires the cash flows resulting from the tax benefits resulting from tax deductions in excess of the compensation cost recognized for those options (excess tax benefits) to be classified as financing cash flows.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our market risk exposures are related to cash and cash equivalents and investments. We invest our excess cash in highly liquid short-term investments with maturities of less than twelve months as of the date of purchase. These investments are not held for trading or other speculative purposes. Changes in interest rates affect the market value of marketable securities and also affect the investment income we earn on our investments and, therefore, impact our cash flows and results of operations. For the thirty-nine weeks ended October 3, 2006, the average pre-tax interest rate earned on cash and cash equivalents and investments was approximately 4.4%. As of October 3, 2006, we held \$16.9 million in investments in marketable securities. A hypothetical 10% decline in the market value of these securities would result in a \$1.7 million unrealized loss and a corresponding decline in their fair value. The hypothetical decline would not affect our cash flows unless and until we disposed of the securities prior to maturity.

We are also exposed to market risk from changes in interest rates on funded debt. This exposure relates to our \$10 million Line of Credit. There were no borrowings outstanding under the Line of Credit as of the end of the third

Table of Contents

fiscal quarter of 2006. Borrowings under the Line of Credit bear interest at LIBOR plus 1%. A hypothetical 1% interest rate change would not have any current impact on our results of operations.

We purchase food and other commodities for use in our operations, based upon market prices established with our suppliers. Many of the commodities purchased by us can be subject to volatility due to market supply and demand factors outside of our control. To manage this risk in part, we attempt to enter into fixed price purchase commitments, with terms typically up to one year, for many of our commodity requirements. Dairy costs can also fluctuate due to government regulation. We believe that substantially all of our food and supplies are available from several sources, which helps to diversify our overall commodity cost risk. We also believe that we have the ability to increase certain menu prices, or vary certain menu items offered, in response to food commodity price increases. Some of our commodity purchase arrangements may contain contractual features that limit the price paid by establishing certain price floors or caps. We do not use financial instruments to hedge commodity prices, since our purchase arrangements with suppliers, to the extent that we can enter into such arrangements, help control the ultimate cost that we pay.

Item 4. CONTROLS AND PROCEDURES ***Evaluation of Disclosure Controls and Procedures***

Under the supervision and with the participation of our management, including the Chief Executive Officer and Chief Financial Officer, we have evaluated the effectiveness of our disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934 as amended, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that these disclosure controls and procedures are effective.

Changes in Internal Control over Financial Reporting

There has not been any change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during our third fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

Restaurants such as those operated by us are subject to litigation in the ordinary course of business, most of which we expect to be covered by our general liability insurance, subject to certain deductibles and coverage limits. Punitive damages awards and employee unfair practice claims, however, are not covered by our general liability insurance. To date, we have not paid punitive damages with respect to any claims, but there can be no assurance that punitive damages will not be awarded with respect to any future claims, employee unfair practice claims or any other actions. We could be affected by the adverse publicity resulting from allegations, regardless of whether or not such allegations are valid or whether we are determined to be liable. We believe that the final disposition of any such lawsuits and claims will not have a material adverse effect on our financial positions, results of operations or liquidity.

The following paragraphs describe certain legal actions recently settled or pending:

Labor Related Matters

On February 5, 2004, a former employee of ours, on behalf of herself, and allegedly other employees, filed a class action complaint in Los Angeles County, California Superior Court, Case Number BC310146, and on March 16, 2004, filed an amended complaint, alleging causes of action for: (1) failure to pay reporting time minimum pay; (2) failure to allow meal breaks; (3) failure to allow rest breaks; (4) waiting time penalties; (5) civil penalties; (6) reimbursement for fraud and deceit; (7) punitive damages for fraud and deceit; and (8) disgorgement of illicit profits. On June 28, 2004, the plaintiff stipulated to dismiss her second, third, fourth and fifth causes of action. During September 2004, the plaintiff stipulated to arbitration of the action. No further court action has been taken since that date. The parties are scheduling a mediation settlement meeting, on a non binding basis, for the first quarter of next year. The outcome of this matter cannot be ascertained at this time.

Table of Contents

On June 10, 2005, a former employee filed a complaint against us in Los Angeles County, California, Superior Court, Case Number BC 336317. The allegations of this complaint were described in our Form 10-K for the fiscal year ended January 3, 2006. The same plaintiff filed a separate individual complaint on July 11, 2005, in another Los Angeles County, California, Superior Court alleging that he was wrongfully terminated in violation of public policy and was discriminated against because of his alleged disability. The same plaintiff filed a claim with the Workers Compensation Appeals Board alleging injuries of stress, strain and harassment. The parties have agreed to settle the cases, including the workers compensation claim, without any admission of liability by us. The settlement includes payment by us of an amount which is not material.

On February 16, 2006, a former employee filed a lawsuit in Orange County, California, Superior Court, Case Number 06CC00030, on behalf of herself and allegedly other employees, for alleged failure to provide rest periods and meal periods and violation of California Business and Professions Code Section 17200. We have answered the complaint, denying the allegations and raising various additional defenses. The outcome of this matter cannot be ascertained at this time.

On March 15, 2006, a former employee filed a lawsuit in Los Angeles County, California, Superior Court, Case Number BC 349038, and on June 9, 2006, filed an amended complaint, on behalf of himself and allegedly others employed by us as servers, alleging unlawful tip pooling distribution and unfair competition under California law. The lawsuit asks for return of tips in an unspecified amount, an injunction requiring proper tip pool distribution, restitution of an unspecified amount, and statutory penalties for each employee required to tip pool contrary to law in an amount which cannot now be determined. We have filed a demurrer, stating the plaintiff's lawsuit has no legal merit, and other pleadings contesting plaintiff's lawsuit. The Court is expected to rule on the demurrer in the fourth quarter of this year. The Court has also ordered a mediation settlement meeting, to take place before a date in the first quarter of 2007. The outcome of this matter cannot be ascertained at this time.

Item 1A. RISK FACTORS

A discussion of the significant risks associated with investments in our securities are set forth in Item 1A of our Annual Report on Form 10-K for the fiscal year ended January 3, 2006. There have been no material changes in the risks related to us from those disclosed in such Annual Report. These cautionary statements are to be used as a reference in connection with any forward-looking statements. The factors, risks and uncertainties identified in these cautionary statements are in addition to those contained in any other cautionary statements, written or oral, which may be made or otherwise addressed in connection with a forward-looking statement or contained in any of our subsequent filings with the SEC.

Item 6. EXHIBITS

Exhibit Number	Description
3.1	Amended and Restated Articles of Incorporation of the Company, as amended, incorporated by reference to Exhibit 3.1 to the Registration Statement on Form SB-2 filed with the Securities and Exchange Commission on June 28, 1996, as amended by the Company's Registration Statement on Form SB-2/A filed with the Commission on August 1, 1996 and the Company's Registration Statement on Form SB-2A filed with the Commission on August 22, 1996 (File No. 3335182-LA) (as amended, the Registration Statement).
3.2	Bylaws of the Company, incorporated by reference to Exhibits 3.2 of the Registration Statement.
3.3	Certificate of amendment of Articles of Incorporation incorporated by reference to Exhibit 3.3 of the 2004 Annual Report on Form 10-K.
3.4	Amendment to Bylaws of the Company, incorporated by reference to Exhibit 3.4 of the 2004 Annual Report on Form 10-K.
4.1	Specimen Common Stock Certificate of the Company, incorporated by reference to Exhibit 4.1 of the Registration Statement.
10.1	Employee Non-Qualified Stock Option Agreement under the 2005 Equity Incentive Plan.
10.2	Employment Agreement of Tom Norton, incorporated by reference to Exhibit 10.1 to the Current Report on Form 8-K filed by the Company on September 11, 2006
10.3	

Edgar Filing: BJs RESTAURANTS INC - Form 10-Q

Summary of 2007 Board Compensation, incorporated by reference to Item 1.01 of the Current Report on Form 8-K filed by the Company on July 14, 2006

- 31 Section 302 Certifications of Chief Executive Officers and Chief Financial Officer.
- 32 Section 906 Certification of Chief Executive Officers and Chief Financial.
