Semi-Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Global High Income Fund (the Fund) for the semi-annual reporting period ended September 30, 2008. The Fund is a closed-end fund that trades under the New York Stock exchange symbol AWF. On April 13, 2007, the Fund acquired all of the assets and assumed all of the liabilities of Alliance World Dollar Government Fund, Inc. in exchange for shares of the Fund.

Investment Objective and Policies

This closed-end fund seeks high current income and secondarily, capital appreciation. The Fund invests without limit in securities denominated in non-U.S. currencies as well as those denominated in the U.S. dollar. The Fund may also invest, without limit, in sovereign debt securities issued by emerging and developed nations and in debt securities of U.S. and non-U.S. corporate issuers. For more information regarding the Fund's risks, please see "A Word About Risk" on page 3 and "Note E Risks Involved in Investing in the Fund" of the Notes to Financial Statements on pages 41-43.

Investment Results

The table on page 4 shows the Fund's performance compared to its benchmark, the J.P. Morgan Emerging Markets Bond Index Global (JPM EMBI Global).

The Fund underperformed the benchmark for both the six- and 12-month periods ended September 30, 2008.

For both periods, the Fund and the benchmark posted negative returns. The Fund's corporate allocation and overweight to high yield detracted for both periods as high-yield debt

underperformed. Overall corporate security selection also detracted, particularly the Fund's investment-grade financial holdings.

Within the Fund's emerging-market allocation, overall individual country selection also detracted for both periods. The Fund's overweight positions in Russia, Ecuador and Argentina which underperformed within the index detracted, as did the Fund's underweight in Chile and China, which outperformed. Leverage during both periods detracted from performance.

Market Review and Investment Strategy

The credit crisis entered a new and more menacing phase late in the 12-month period ended September 30, 2008, with fear of counterparty risk paralyzing interbank lending and threatening the survival of some of the world's most powerful financial firms. Stocks fell sharply and government bonds rallied around the world. Credit spreads widened as investors sought safety in risk-free assets; spreads on global investment-grade corporates hit record highs, while three-month U.S. T-bill yields fell near zero for the first time and the U.S. dollar rose against most currencies.

Loss of confidence undermined several prominent financial firms, and their collapses further undermined confidence. The severe difficulties that financial firms faced prompted government rescues of Fannie Mae, Freddie Mac and American International Group in the U.S.; Bradford & Bingley in the UK; and Fortis Group and Dexia in the euro area. These difficulties also led to the bankruptcy of Lehman Brothers and the rapid consolidations of Merrill Lynch with Bank

of America, HBOS with Lloyds TSB, Washington Mutual with JPMorgan Chase and Wachovia with Wells Fargo.

Evidence also mounted that the global economic outlook was worsening as the credit crisis unfolded, darkening corporate profit outlooks. Major central banks responded to the deepening financial crisis by flooding the money markets with liquidity, and the U.S. government moved forward with a \$700 billion effort to aid the financial system, which included capital injections directly into banks rather than their original plan to purchase bad bank assets. At the time of writing, the Treasury has already committed approximately \$310 billion. It has allocated \$125 billion to the nine largest banks, another \$125 billion for publicly traded regional banks; and \$40 billion to expand the existing bailout of American International Group, the insurance conglomerate that collapsed in September. Most recently, Citigroup Inc. received a rescue package that shields the bank from losses on toxic assets and injects an additional \$20 billion of capital.

Emerging debt markets remained relatively resilient against developed market turbulence until September. September's flight to quality more than wiped out gains made in emerging-market debt during both the six- and 12-month periods. For the six-month period emerging-market debt, as represented by the JPM EMBI Global, returned -5.82%. Emerging market spreads widened 118 basis points to 442 during the semi-annual period.

The high-yield market was also swept up in the credit crisis and extreme flight to quality. High-yield returns followed the equity markets downward and posted some of their worst returns in September. For the

six-month period the high-yield market, as measured by the CSFBHY Index, posted a return of -6.37%.

In the Fund's management team's view, the global credit crisis has created some of the most compelling opportunities in fixed income in recent years. Valuations in many sectors have become divorced from fundamentals as the credit crisis intensified and spreads, in the case of corporate debt, widened to levels hundreds of basis points above previous highs.

In emerging-market debt, the team is focusing its quantitative and fundamental research on identifying countries that successfully used the favorable pre-crisis global environment to solidify their economic and fiscal positions. Countries that are believed to meet the team's desired profile have the policies and resources not only to withstand the crisis, but also to move past it to better days. The team believes these countries amply meet criteria such as fiscal surpluses, current account surpluses, strong foreign-exchange reserves and supportive external-debt-to-GDP ratios. Additionally, their central banks and other policymakers are actively trying to strike an appropriate balance between encouraging growth and fighting inflation.

High-yield spreads (the price an issuer pays above a benchmark fixed-income yield to borrow money) are now at all-time wides, and the market is pricing in higher default rates, which are not in line with fundamentals. While dispersion has increased of late, the systemic nature of this sell-off has resulted in a more consistent weakening than that seen in 2002. New issue volumes are near record lows. To mitigate the current financial market volatility, the Fund's corporate holdings remain diversified.

HISTORICAL PERFORMANCE

An Important Note About the Value of Historical Performance

The performance shown on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

AllianceBernstein Global High Income Fund Shareholder Information

The Fund's NYSE trading symbol is AWF. Weekly comparative and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Sunday in *The New York Times*, each Saturday in *Barron's* and other newspapers in a table called "Closed-End Funds." For additional shareholder information regarding this Fund, please see page 49.

Benchmark Disclosure

The unmanaged J.P. Morgan Emerging Markets Bond Index Global (JPM EMBI Global) does not reflect fees and expenses associated with the active management of a mutual fund portfolio. In addition, such index does not reflect the impact of leverage. The JPM EMBI Global tracks total returns for U.S. dollar-denominated debt instruments issued by emerging market sovereign and quasi-sovereign entities, Brady bonds, loans and Eurobonds. An investor cannot invest directly in an index, and its results are not indicative of the performance of any specific investment, including the Fund.

A Word About Risk

The Fund invests primarily in foreign securities which may result in significant fluctuations due to changes in foreign exchange rates and the possibility of substantial volatility due to political and economic uncertainty in foreign countries. The Fund may invest in securities of emerging market nations, which may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed foreign countries. Fluctuations in the exchange rates between the U.S. dollar and foreign currencies may negatively affect the value of the Fund's investments or reduce the returns of the Fund. Price fluctuation in the Fund's portfolio securities may be caused by changes in the general level of interest rates or changes in bond credit quality ratings. Please note, as interest rates rise, existing bond prices fall and can cause the value of an investment in the Fund to decline. Changes in interest rates have a greater effect on bonds with longer maturities than on those with shorter maturities. At the discretion of the Fund's Adviser, the Fund may invest substantially all of its net assets in bonds that are rated below investment grade (i.e., junk bonds) and up to 50% in securities that are not readily marketable. These high-yield bonds involve a greater risk of default and price volatility than other bonds. Investing in non-investment grade securities presents special risks, including credit risk. Investments in the Fund are not guaranteed because of fluctuation in the net asset value of the underlying fixed-income related investments. Similar to direct bond ownership, bond funds have the same interest rate, inflation and credit risks that are associated with the underlying bonds owned by the Fund. The Fund utilizes leverage, which increases volatility since leverage magnifies both positive and negative performance. The Fund maintains asset coverage of at least 300%. While the Fund invests principally in bonds and other fixed-income securities, in order to achieve its investment objectives, the Fund may at times use certain types of investment derivatives, such as options, futures, forwards and swaps. These instruments involve risks different from, and in certain cases, greater than, the risks presented by more traditional investments.

(f) *Coupon rate adjusts periodically based upon a predetermined schedule. Stated interest rate in effect at September 30, 2008.*

(g) *Security is in default and is non-income producing.*

(h) *Pay-In-Kind Payments (PIK).*

(i) *Position, or a portion thereof, has been segregated to collateralize reverse repurchase agreements. The aggregate market value of these securities amounted to \$30,103,772.*

(j) *This position or a portion of this position represents an unsettled loan purchase. At September 30, 2008, the market value of these unsettled loan purchases amounted to \$544,207. The coupon rate will be determined at the time of settlement and will be based upon the London-Interbank Offered Rate (LIBOR) plus a premium which was determined at the time of purchase.*

(k) *Non-income producing security.*

The fund currently owns investments collateralized by subprime mortgage loans. Subprime loans are offered to homeowners who do not have a history of debt or who have had problems meeting their debt obligations. Because repayment is less certain, subprime borrowers pay a higher rate of interest than prime borrowers. As of September 30, 2008, the fund's total exposure to subprime investments was 0.36%. These investments are valued in accordance with the fund's Valuation Policies (see Note A.1 for additional details).

FINANCIAL ACCOUNTING STANDARDS NO. 157**September 30, 2008 (unaudited)**

The Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157), effective April 1, 2008. In accordance with FAS 157, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. FAS 157 also establishes a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of September 30, 2008:

Level	Investments in Securities	Other Financial Instruments*
Level 1	\$ 153,581	\$ 0
Level 2	694,964,019	2,827,405
Level 3	245,875,572	0
Total	\$ 940,993,172	\$ 2,827,405

* Other financial instruments are derivative instruments not reflected in the Portfolio of Investments, such as futures, forwards and swap contracts, which are valued at the unrealized appreciation/depreciation on the instrument.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

	Investments in Securities	Other Financial Instruments
Balance as of 3/31/2008	\$ 426,201,367	\$ 0
Accrued discounts /premiums	2,492,427	0
Realized gain (loss)	(368,676)	0 *
Change in unrealized appreciation/depreciation	(29,622,023)	0
Net purchases (sales)	(95,661,998)	0
Net transfers in and/or out of Level 3	(57,165,525)	0
Balance as of 9/30/08	\$ 245,875,572	\$ 0
Net change in unrealized appreciation/depreciation from Investments still held as of 9/30/08	\$ (19,102,505)	\$ 0

* *The realized gain (loss) recognized during the period ended 9/30/08 for other financial instruments was \$0.*

NOTES TO FINANCIAL STATEMENTS

September 30, 2008 (unaudited)

NOTE A

Significant Accounting Policies

AllianceBernstein Global High Income Fund, Inc. (the Fund), formerly Alliance World Dollar Government Fund II, Inc., was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles, which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on The NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market (OTC) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed-income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the Adviser) may

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 35

Notes to Financial Statements

establish procedures whereby changes in market yields or spreads are used to adjust, on a daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security.

Investments in money market funds are valued at their net asset value each day.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because, most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

2. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and asked prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at the rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation and depreciation of investments and foreign currency denominated assets and liabilities.

3. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated.

Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with the Financial Accounting Standards Board (FASB) Interpretation No. 48, Accounting for Uncertainties in Income Taxes (FIN 48), management has analyzed the Fund's tax positions taken on federal and state income tax returns for all open tax years (March 31, 2006-2009) and has concluded that no provision for income tax is required in the Funds' financial statements.

4. Investment Income and Investment Transactions

Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

5. Dividends and Distributions

Dividends and distributions to shareholders are recorded on the ex-dividend date. Income and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. generally accepted accounting principles. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement, the Fund pays the Adviser an advisory fee at an annual rate of .90% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

Pursuant to an Amended Administration Agreement, the Fund reimburses the Adviser for its costs, including legal and accounting costs, in serving as Administrator of the Fund; provided, however, that the reimbursement may not exceed the prior fee of .15% of average weekly net assets. For the six months ended September 30, 2008, the Fund paid the Adviser \$64,612 for its administrative services, representing .01% of the Fund's average weekly net assets.

Under the terms of a Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly-owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the six months ended September 30, 2008, there was no reimbursement paid to ABIS.

NOTE C**Investment Transactions**

Purchases and sales of investment securities (excluding short-term investments) for the six months ended September 30, 2008, were as follows:

	Purchases	Sales
Investment securities (excluding		
U.S. government securities)	\$ 157,546,857	\$ 264,787,676
U.S. government securities	0	0

The cost of investments for federal income tax purposes was substantially the same as the cost for financial reporting purpose. Accordingly, gross unrealized appreciation and unrealized depreciation (excluding swap contracts and foreign currency transactions) are as follows:

Gross unrealized appreciation	\$ 16,444,268
Gross unrealized depreciation	(147,575,946)
Net unrealized depreciation	\$ (131,131,678)

1. Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sale commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions. A forward currency exchange contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions.

Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Fund.

The Fund's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Fund having a value at least equal to the aggregate amount of the Fund's commitments under forward currency exchange contracts entered into with respect to position hedges.

Risks may arise from the potential inability of the counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars reflects the total exposure the Fund has in that particular currency contract.

2. Option Transactions

For hedging purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. The Fund may also use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions .

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

For the six months ended September 30, 2008, the Fund had no transactions in written options.

3. Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates and credit risk or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under Currency Transactions . A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interim payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential credit risk. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities.

The Fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Once the interim payments are settled in cash, the net amount is recorded as realized gain/loss on swaps, in addition to realized gain/loss recorded upon the termination of swap contracts on the statement of operations. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation/depreciation of investments.

The Fund may enter into credit default swaps. The Fund may purchase credit protection on the referenced obligation of the credit default swap (Buy Contract) or provide credit protection on the referenced obligation of the credit default swap (Sale Contract). A sale/(buy) in a credit default swap provides upon the occurrence of a credit event, as defined in the swap agreement, for the Fund to buy/(sell) from/(to) the counterparty at the notional amount (the Notional Amount) and receive/(deliver) the principal amount of the referenced obligation. If a credit event occurs, the maximum payout amount for a Sale Contract is limited to the Notional Amount of the swap contract (Maximum Payout Amount). During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the Notional Amount. These interim payments are recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities.

Credit default swaps may involve greater risks than if a Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer and no credit event occurs, it will lose its investment. In addition, if the Fund is a seller and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received, may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

At September 30, 2008, the Fund had Sale Contracts outstanding with Maximum Payout Amounts aggregating \$47,750,000 with net unrealized appreciation of \$571,650 and terms ranging from 5 months to 2 years, as reflected in the portfolio of investments.

In certain circumstances, the Fund may hold Sale Contracts on the same referenced obligation and with the same counterparty from which it has purchased credit protection, which may reduce its obligation to make payments on Sale Contracts, if a credit event occurs. At September 30, 2008, the Fund had no Buy Contracts outstanding with the same referenced obligations and same counterparties as Sales Contracts outstanding.

4. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price.

For the six months ended September 30, 2008, the average amount of reverse repurchase agreements outstanding was \$43,207,354 and the daily weighted average interest rate was 2.25%.

5. Currency Transactions

The Fund may invest in non-U.S. Dollar securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and options. The Fund may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

NOTE D

Capital Stock

During the six months ended September 30, 2008 and the year ended March 31, 2008, the Fund issued no shares in connection with the Fund's dividend reinvestment plan.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may

be reflected in its credit risk rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as junk bonds) have speculative elements or are predominantly speculative risks.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

Leverage Risk The Fund may utilize leverage through borrowings or the investment techniques of reverse repurchase agreements and dollar rolls. Reverse repurchase agreements and dollar rolls are speculative techniques and the proceeds from these transactions may be used, similar to borrowings by the Fund, for investment purposes.

The effect of leverage can produce higher shareholder returns than if the Fund were not leveraged, and the use of leverage techniques can add to the net asset value (NAV) of the Common Stock. However, the risks of such techniques are potentially a higher volatility of the NAV of the Common Stock, potentially more volatility in the market value of the Common Stock and the relatively greater effect on the NAV of the Common Stock caused by favorable or adverse changes in the currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of Common Stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940

Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so, thereby reducing its NAV.

Currency Risk This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Fund's investments or reduce the returns of the Fund. For example, the value of the Fund's investments in foreign currency-denominated securities or currencies may decrease if the U.S. Dollar is strong (i.e., gaining value relative to other currencies) and other currencies are weak (i.e., losing value relative to the U.S. Dollar). Currency markets are generally not as regulated as securities markets. Independent of the Portfolio's investments in securities denominated in foreign currencies, the Portfolio's positions in various foreign currencies may cause the Portfolio to experience investment losses due to the changes in exchange rates and interest rates.

NOTE F

Acquisition of Alliance World Dollar Government Fund, Inc. by AllianceBernstein Global High Income Fund (the Fund)

On April 13, 2007, the Fund acquired all of the net assets and assumed all of the liabilities of Alliance World Dollar Government Fund, Inc. (AWG) in a tax free event, pursuant to an Agreement and Plan of Acquisition and Liquidation approved by the stockholders of AWG at a Special Meeting of Stockholders held on January 19, 2007. As a result of the acquisition, stockholders of AWG received shares of the Fund equivalent to the aggregate net asset value of the shares they held in AWG. Stockholders participating in AWG's dividend reinvestment plan received full and fractional shares of the Fund. Other stockholders received cash in lieu of fractional shares. On April 13, 2007, the acquisition was accomplished by a tax-free exchange of 8,687,393 shares of the Fund for 8,897,498 shares of Alliance World Dollar Government Fund, Inc. The aggregate net assets of the Fund and Alliance World Dollar Government Fund, Inc. immediately before the acquisition were \$1,001,015,960 and \$128,584,856 (including \$11,483,514 of net unrealized depreciation of investments and foreign currency denominated assets and liabilities), respectively. Immediately after the acquisition, the combined net assets of the Fund amounted to \$1,129,600,816.

NOTE G

Distributions to Shareholders

The tax character of distributions to be paid for the year ending March 31, 2009 will be determined at the end of the current fiscal year. The tax character of distributions paid during the fiscal years ended March 31, 2008 and March 31, 2007 were as follows:

	2008	2007
Distributions paid from:		
Ordinary income	\$ 93,428,602	\$ 66,464,867
Long-term capital gain	30,808,050	0
Total taxable distributions	124,236,652	66,464,867
 Total distributions paid	 \$ 124,236,652	 \$ 66,464,867

As of March 31, 2008, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 13,407,782
Undistributed long-term capital gains	32,608,826
Accumulated capital and other losses	(1,299,644) ^(a)
Unrealized appreciation/(depreciation)	(24,091,566) ^(b)
Total accumulated earnings/(deficit)	\$ 20,625,398

^(a) For the year ended March 31, 2008, the portfolio deferred losses on straddle of \$1,299,644.

^(b) The difference between book-basis and tax-basis unrealized appreciation/(depreciation) is attributable primarily to the tax deferral of losses on wash sales, the difference between book and tax amortization methods for premium, the difference between book and tax treatment of swap income and the realization for tax purpose of gain/losses on certain derivative instruments.

During the current fiscal year, permanent differences primarily due to the tax treatment of swap income, tax character of paydown gain/losses, foreign currency transactions, the tax treatment of bond premium, and merger related adjustment resulted in a net decrease in distributions in excess of net investment income, a decrease in accumulated net realized gain on investment transactions, and an increase to additional paid in capital. This reclassification had no effect on net assets.

NOTE H

Legal Proceedings

As has been previously reported, the staff of the U.S. Securities and Exchange Commission (SEC) and the Office of the New York Attorney General (NYAG) have been investigating practices in the mutual fund industry identified as market timing and late trading of mutual fund shares. Certain other regulatory authorities have also been conducting investigations into these practices within the industry and have requested that the Adviser provide information to them. The Adviser has been cooperating and will continue to cooperate with all of these authorities. The shares of the Fund are not redeemable by the Fund, but are traded on an exchange at prices established by the market. Accordingly, the Fund and its shareholders are not subject to the market timing and late trading practices that are the subject of the investigations mentioned above or the lawsuits described below.

Numerous lawsuits have been filed against the Adviser and certain other defendants in which plaintiffs make claims purportedly based on or related to the same practices that are the subject of the SEC and NYAG investigations referred to above. Some of these lawsuits name the Fund as a party. The lawsuits are now pending in the United States District Court for the District of Maryland pursuant to a ruling by the Judicial Panel on Multidistrict Litigation transferring and centralizing all of the mutual funds involving market and late trading in the District of Maryland.

The Adviser believes that these matters are not likely to have a material adverse effect on the Fund or the Adviser's ability to perform advisory services relating to the Fund.

NOTE I

Recent Accounting Pronouncements

On March 19, 2008, the FASB released Statement of Financial Accounting Standards No. 161, "Disclosures about Derivative Instruments and Hedging Activities" (FAS 161). FAS 161 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements. The application of FAS 161 is required for fiscal years beginning after November 15, 2008 and interim periods within those fiscal years. At this time, management is evaluating the implications of FAS 161 and believes the adoption of FAS 161 will have no material impact on the Fund's financial statements.

See footnote summary on page 47.

(a) *As of April 1, 2003, the Fund has adopted the method of accounting for interim payments on swap contracts in accordance with Financial Accounting Standards Board Statement No. 133. These interim payments are reflected within net realized and unrealized gain (loss) on swap contracts, however prior to April 1, 2003, these interim payments were reflected within interest income/expense on the statement of operations. The effect of this change for the year ended March 31, 2004, was to decrease net investment income per share by \$0.06 and increase net realized and unrealized gain (loss) on investment transactions per share by \$0.06, and decrease the ratios of net investment income and expenses to average net assets by 0.50% and 0.20%, respectively.*

(b) *Based on average shares outstanding.*

(c) *Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.*

(d) *Annualized.*

(1) Member of the Audit Committee, the Governance and Nominating Committee, and the Independent Directors Committee. Mr. Foulk is the sole member of the Fair Value Pricing Committee.

(2) The day-to-day management of, and investment decisions for, the Fund's portfolio are made by the Global Fixed Income Emerging Market Investment Team. While all members of the team work jointly to determine the majority of the investment strategy including stock selection for the Fund, Messrs. Paul J. DeNoon, Fernando Grisales, Douglas J. Peebles and Matthew S. Sheridan, members of the Global Fixed-Income Emerging Market Investment Team, are primarily responsible for the day-to-day management of the Fund's portfolio.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may purchase from time to time at market prices shares of its Common Stock in the open market.

This report, including the financial statements herein, is transmitted to the shareholders of AllianceBernstein Global High Income Fund for their information. The financial information included herein is taken from the records of the Fund. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in this report.

Annual Certifications As required, on April 28, 2008, the Fund submitted to the New York Stock Exchange (NYSE) the annual certification of the Fund's Chief Executive Officer certifying that he is not aware of any violation of the NYSE's Corporate Governance listing standards. The Fund also has included the certifications of the Fund's Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Fund's Form N-CSR filed with the Securities and Exchange Commission for the reporting period.

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The Fund distributes its daily net asset value (NAV) to various financial publications or independent organizations such as Lipper, Inc., Morningstar, Inc. and Bloomberg.

The Fund's NYSE trading symbol is AWF. Weekly comparative net asset value and market price information about the Fund is published each Monday in *The Wall Street Journal*, and each Sunday in *The New York Times* and other newspapers in a table called Closed-End Bond Funds.

Dividend Reinvestment Plan

If your shares are held in your own name, you will automatically be a participant in the Plan unless you elect to

receive cash. If your shares are held in nominee or street name through a broker or nominee who provides this service, you will also automatically be a participant in the Plan. If your shares are held in the name of a broker or nominee who does not provide this service, you will need to instruct them to participate in the Plan on your behalf or your distributions will not be reinvested. In such case, you will receive your distributions in cash.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.

ITEM 2. CODE OF ETHICS.

(a) The registrant has adopted a code of ethics that applies to its principal executive officer, principal financial officer and principal accounting officer. A copy of the registrant's code of ethics is filed herewith as Exhibit 12(a)(1).

(b) During the period covered by this report, no material amendments were made to the provisions of the code of ethics adopted in 2(a) above.

(c) During the period covered by this report, no implicit or explicit waivers to the provisions of the code of ethics adopted in 2(a) above were granted.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Directors has determined that independent directors Garry L. Moody and William H. Foulk, Jr. qualify as audit committee financial experts.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

Not applicable when filing a semi-annual report to shareholders.

ITEM 6. SCHEDULE OF INVESTMENTS.

Please see Schedule of Investments contained in the Report to Shareholders included under Item 1 of this Form N-CSRS.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Not applicable when filing a semi-annual report to shareholders.

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

Not applicable when filing a semi-annual report to shareholders.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Fund's Board of Directors since the Fund last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-2(c) under the Investment Company Act of 1940, as amended) are effective at the reasonable assurance level based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.

(b) There were no changes in the registrant's internal controls over financial reporting that occurred during the second fiscal quarter of the period that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
