UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. BASIS OF PRESENTATION

Universal Corporation, with its subsidiaries (Universal or the Company), is the world's leading leaf tobacco merchant and processor. Because of the seasonal nature of the Company's business, the results of operations for any fiscal quarter will not necessarily be indicative of results to be expected for other quarters or a full fiscal year. All adjustments necessary to state fairly the results for the period have been included and were of a normal recurring nature. Certain amounts in prior year statements have been reclassified to conform to the current year presentation. As part of the process of preparing its financial statements, the Company performed an evaluation of subsequent events occurring from December 31, 2009, the date of the consolidated balance sheet included in this report, through February 5, 2010, the date its financial statements were issued. This Form 10-Q should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

NOTE 2. ACCOUNTING PRONOUNCEMENTS

Recent Pronouncements Adopted Through December 31, 2009

Effective September 30, 2009, the Company adopted Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162 (SFAS 168). SFAS 168 established the FASB Accounting Standards Codification (Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in preparing financial statements in conformity with generally accepted accounting principles in the United States. All guidance in the Codification carries the same level of authority, and all changes or additions to U.S. generally accepted accounting principles are now issued as Accounting Standards Updates. SFAS 168 did not make any changes to existing accounting guidance that impact the Company's accounting and financial reporting.

Effective April 1, 2009, Universal adopted FASB Statement of Financial Accounting Standards No. 160, Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51 (SFAS 160). SFAS 160, which is now set forth in Topic 810 of the Codification, requires that noncontrolling interests in subsidiaries that are included in a company's consolidated financial statements, commonly referred to as minority interests, be reported as a component of shareholders' equity in the balance sheet. It also requires that a company's consolidated net income and comprehensive income include the amounts attributable to both the company's interest and the noncontrolling interest in the subsidiary, identified separately in the financial statements. Finally, the new guidance requires certain disclosures about noncontrolling interests in the consolidated financial statements. Adoption of this guidance did not have a material impact on the Company's financial statements.

Effective April 1, 2009, Universal also adopted FASB Statement of Financial Accounting Standards No. 141R, Business Combinations (SFAS 141R), which requires that companies record assets acquired, liabilities assumed, and noncontrolling interests in business combinations at fair value, separately from goodwill, as of the acquisition date. This approach differs from the cost allocation approach provided under previous accounting guidance and can result in recognition of a gain at acquisition date if the cost to acquire a business is less than the net fair value of the assets acquired, liabilities assumed, and noncontrolling interests. SFAS 141R, which is now set forth under Topic 805 of the Codification, also provides new guidance on recording assets and liabilities that arise from contingencies in a business combination, and it requires that transaction costs associated with business combinations be charged to expense instead of being recorded as part of the cost of the acquired business. Universal will apply the guidance to all future business combinations.

Effective June 30, 2009, the Company adopted FASB Statement of Financial Accounting Standards No. 165, Subsequent Events (SFAS 165). SFAS 165, which is now set forth under Topic 855 of the Codification, establishes standards for accounting and disclosure for events occurring after the balance sheet date but before financial statements are issued. It defines the period after the balance sheet date during which events or transactions should be evaluated for potential recognition or disclosure, and it provides guidance on recognition and disclosure of actual transactions or events occurring after the balance sheet date. The adoption of SFAS 165 did not have a material effect on the Company's financial statements.

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 3. GUARANTEES AND OTHER CONTINGENT LIABILITIES

Guarantees and Other Contingent Liabilities

Guarantees of bank loans to growers for crop financing and construction of curing barns or other tobacco producing assets are industry practice in Brazil and support the farmers' production of tobacco there. At December 31, 2009, the Company's total exposure under guarantees issued by its operating subsidiary in Brazil for banking facilities of farmers in that country was approximately \$129 million (\$155 million face amount including unpaid accrued interest, less \$26 million recorded for the fair value of the guarantees). About 80% of these guarantees expire within one year, and all of the remainder expire within five years. The subsidiary withholds payments due to the farmers on delivery of tobacco and forwards those payments to the third-party banks. Failure of farmers to deliver sufficient quantities of tobacco to the subsidiary to cover their obligations to the third-party banks could result in a liability for the subsidiary under the related guarantees; however, in that case, the subsidiary would have recourse against the farmers. The maximum potential amount of future payments that the Company's subsidiary could be required to make at December 31, 2009, was the face amount, \$155 million including unpaid accrued interest (\$133 million as of December 31, 2008, and \$139 million at March 31, 2009). The fair value of the guarantees was a liability of approximately \$26 million at December 31, 2009 (\$26 million at December 31, 2008, and \$35 million at March 31, 2009). In addition to these guarantees, the Company has other contingent liabilities totaling approximately \$62 million, primarily related to a bank guarantee that bonds an appeal of a 2006 fine in the European Union, as discussed below.

European Commission Fines and Other Legal Matters

European Commission Fines in Spain

In October 2004, the European Commission (the "Commission") imposed fines on five companies active in the raw Spanish tobacco processing market totaling 20 million for colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain. Two of the Company's subsidiaries, Tabacos Espanoles S.A. ("TAES"), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. ("Deltafina"), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of 108,000 on TAES and a fine of 11.88 million on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. The Company recorded a charge of about 12 million (approximately \$14.9 million at the September 2004 exchange rate) in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against the Company's subsidiaries.

In January 2005, Deltafina filed an appeal in the Court of First Instance of the European Communities. Although a hearing on the matter was held in June 2009, the outcome of the appeal is uncertain, and an ultimate resolution to the matter could take several years. The Company has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, the Company reported that it was aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. The Company reported that it did not believe that the Commission investigation in Italy would result in penalties being assessed against it or its subsidiaries that would be material to the Company's earnings. The reason the Company held this belief was that it had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, the Company received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, the Company received notification from the Commission that the Commission had imposed fines totaling 30 million (about \$43 million at the December 31, 2009 exchange rate) on Deltafina and the Company jointly for infringing European Union antitrust law in connection with the

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

purchase and processing of tobacco in the Italian raw tobacco market.

The Company does not believe that the decision can be reconciled with the Commission's Statement of Objections and the facts. In January 2006, the Company and Deltafina each filed appeals in the Court of First Instance of the European Communities. Based on consultation with outside legal counsel, the Company believes it is probable that it will prevail in the appeals process and has not accrued a charge or interest for the fine. Deltafina has provided a bank guarantee to the Commission in the amount of the fine plus accrued interest in order to stay execution during the appeal process.

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. Foreign Corrupt Practices Act

As a result of a posting to the Company's Ethics Complaint hotline alleging improper activities that involved or related to certain of its tobacco subsidiaries, the Audit Committee of the Company's Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. The payments involved approximated \$2 million over a seven-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but the Company believes those activities did not violate U.S. antitrust laws. The Company voluntarily reported these activities to the Department of Justice (DOJ) and Securities and Exchange Commission (SEC) in March 2006. On June 6, 2006, the SEC notified the Company that a formal order of investigation had been issued.

The Company has engaged in settlement discussions with the DOJ and SEC to resolve the above-referenced matter. Although those discussions are ongoing, the Company expects to enter into agreements with the DOJ and the SEC to resolve the matter, and it believes it is probable that such resolution will include injunctive relief, disgorgement and prejudgment interest, fines, penalties, and the retention of an independent compliance monitor. Since this matter arose, the Company has recorded accruals that it believes are adequate to satisfy the estimated financial settlement it expects with the resolution of this matter. However, because the Company's discussions are ongoing, it cannot predict with certainty when or whether an agreement will be reached with the DOJ and SEC, or the precise terms of any such agreement. The Company will continue to cooperate with the authorities in this matter while resolution discussions proceed.

Other Legal Matters

In addition to the above-mentioned matters, various subsidiaries of the Company are involved in other litigation and tax examinations incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending these matters and does not currently expect that any of them will have a material adverse effect on the Company's financial position. However, should one or more of these matters be resolved in a manner adverse to management's current expectation, the effect on the Company's results of operations for a particular fiscal reporting period could be material.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 4. EARNINGS PER SHARE**

The following table sets forth the computation of basic and diluted earnings per share:

(in thousands, except per share data)	Three Months Ended December 31,		Nine Months Ended December 31,	
	2009	2008	2009	2008
Basic Earnings Per Share				
Numerator for basic earnings per share				
Net income attributable to Universal Corporation	\$ 45,696	\$ 53,084	\$ 141,956	\$ 115,977
Less: Dividends on convertible perpetual preferred stock	(3,712)	(3,712)	(11,137)	(11,137)
Earnings available to Universal Corporation common shareholders for calculation of basic earnings per share	41,984	49,372	130,819	104,840
Denominator for basic earnings per share				
Weighted average shares outstanding	24,684	24,989	24,823	25,759
Basic earnings per share	\$ 1.70	\$ 1.98	\$ 5.27	\$ 4.07
Diluted Earnings Per Share				
Numerator for diluted earnings per share				
Earnings available to Universal Corporation common shareholders	\$ 41,984	\$ 49,372	\$ 130,819	\$ 104,840
Add: Dividends on convertible perpetual preferred stock (if conversion assumed)	3,712	3,712	11,137	11,137
Earnings available to Universal Corporation common shareholders for calculation of diluted earnings per share	45,696	53,084	141,956	115,977
Denominator for diluted earnings per share:				
Weighted average shares outstanding	24,684	24,989	24,823	25,759
Effect of dilutive securities (if conversion or exercise assumed)				
Convertible perpetual preferred stock	4,735	4,719	4,731	4,717
Employee share-based awards	226	142	173	196
Denominator for diluted earnings per share	29,645	29,850	29,727	30,672
Diluted earnings per share	\$ 1.54	\$ 1.78	\$ 4.78	\$ 3.78

For the three- and nine-month periods ended December 31, 2009 and 2008, certain employee share-based awards were not included in the computation of diluted earnings per share because their effect would have been anti-dilutive. These awards included stock appreciation rights and stock options totaling 507,801 shares at a weighted-average exercise price of \$56.52 for the quarter and nine months ended December 31, 2009, and 704,972 shares at a weighted-average exercise price of \$50.92 for the quarter and nine months ended December 31, 2008.

NOTE 6. INCOME TAXES

The Company is subject to the tax laws of many jurisdictions. Changes in tax laws or the interpretation of tax laws can affect the Company's earnings, as can the resolution of pending and contested tax issues. The consolidated income tax rate is affected by a number of factors, including the mix of domestic and foreign earnings and investments, local tax rates of subsidiaries, repatriation of foreign earnings, and the Company's ability to utilize foreign tax credits.

The Company's consolidated effective income tax rates on pre-tax earnings for the quarter and nine months ended December 31, 2009, were approximately 32% and 31%, respectively. During both the second and third quarters, the Company reversed income taxes previously provided for uncertain tax positions because the statutes of limitations expired for the related tax years in the applicable tax jurisdictions. In addition, forecast current year earnings of subsidiaries in the African region have resulted in the recognition of foreign tax credits on historical unremitted earnings. The favorable impact of these items was partially offset by additional U.S. taxes provided for certain foreign income taxes that are not eligible as foreign tax credits when the related earnings are repatriated in future periods. The effect of these items reduced the consolidated effective tax rate below the 35% U.S. statutory rate for the quarter and nine months.

The consolidated effective income tax rates for the quarter and nine months ended December 31, 2008, were approximately 26% and 30%, respectively. During the quarter ended December 31, 2008, the Company reversed income taxes previously provided for uncertain tax positions due to the expiration of the related statute of limitations. In addition, changes in the Company's overall tax position allowed it to utilize foreign tax credit carryforwards and reverse a valuation allowance that had previously been recorded on those carryforwards. The effect of these items reduced the consolidated effective tax rate below the 35% U.S. statutory rate for both the quarter and the nine months.

NOTE 7. DERIVATIVES AND HEDGING ACTIVITIES

Universal is exposed to various risks in its worldwide operations and uses derivative financial instruments to manage two specific types of risks interest rate risk and foreign currency exchange rate risk. Interest rate risk has been managed by entering into interest rate swap agreements, and foreign currency exchange rate risk has been managed by entering into forward foreign currency exchange contracts. However, the Company's policy also permits other instruments. In addition, management works to manage foreign currency exchange rate risk by minimizing net monetary positions in non-functional currencies, which may include using local borrowings. The disclosures below provide additional information about the Company's hedging strategies, the derivative instruments used, and the effects of these activities on the consolidated

statements of income and the consolidated balance sheets.

Fair Value Hedging Strategy for Interest Rate Risk

The Company has entered into interest rate swap agreements to manage its exposure to interest rate risk, with a strategy of maintaining a level of floating rate debt that is related to the interest rate exposure on committed inventories. The strategy is implemented by borrowing at floating interest rates, and by converting a portion of the Company's fixed-rate debt to floating rates. The interest rate swap agreements allow the Company to receive amounts equal to the fixed interest payments it is obligated to

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

make on the underlying debt instruments in exchange for making floating-rate interest payments that change semi-annually based on changes in the benchmark interest rate.

The interest rate swap agreements are designated and qualify as hedges of the exposure to changes in the fair value of the underlying debt instruments created by fluctuations in prevailing market interest rates. In all cases, the critical terms of each interest rate swap agreement match the terms of the underlying debt instrument, and there is no hedge ineffectiveness. At December 31, 2009, the total notional amount of the Company's receive-fixed/pay-floating interest rate swaps was \$245 million. At December 31, 2008, and March 31, 2009, the total notional amount of the outstanding interest rate swaps was \$170 million.

Cash Flow Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Forecast Purchases of Tobacco

The majority of the tobacco production in most countries outside the United States where Universal operates is sold in export markets at prices denominated in U.S. dollars. However, purchases of tobacco from farmers and most processing costs (such as labor and energy) in those countries are usually denominated in the local currency. Changes in exchange rates between the U.S. dollar and the local currencies where tobacco is grown and processed affect the ultimate U.S. dollar cost of the processed tobacco and therefore can adversely impact the gross profit earned on the sale of that tobacco. Since the Company is able to reasonably forecast the volume, timing, and local currency cost of its tobacco purchases, it has routinely entered into forward contracts to sell U.S. dollars and buy the local currency at future dates that coincide with the expected timing of a portion of those purchases. This strategy contemplates the Company's pricing arrangements with key customers and substantially eliminates the variability of future U.S. dollar cash flows for tobacco purchases for the foreign currency notional amount hedged. The hedging strategy has been used for tobacco purchases in Brazil, where the large crops, the terms of sale to customers, and the availability of derivative markets make it particularly desirable to manage the related foreign exchange rate risk.

The Company did not designate the forward contracts it entered for the 2007-2008 crop year as hedges, and therefore it recognized all related gains and losses in earnings on a mark-to-market basis each reporting period. For the 2008-2009 crop cycle, all contracts were designated and qualify as hedges of the future cash flows associated with forecast purchases of tobacco. As a result, except for insignificant amounts related to any ineffective portion of the hedging strategy, gains and losses on the forward contracts are recognized in comprehensive income as they occur, but are not recognized in earnings until the related tobacco is sold to third-party customers.

From September 2008 through July 2009, the Company hedged approximately \$241 million U.S. dollar notional amount related to 2008-2009 crop tobacco purchases in Brazil, primarily related to customer contractual requirements. As noted above, all of the related forward contracts were designated and accounted for as cash flow hedges. Purchases of the 2008-2009 crop were completed in July 2009, and all forward contracts related to that crop matured and were settled by that time. Sales of the 2008-2009 crop began during the first quarter of fiscal year 2010. During the nine months ended December 31, 2009, a portion of the hedge gains and losses previously recorded in accumulated other comprehensive income was reclassified to cost of goods sold related to those sales. For all remaining hedge gains and losses recorded in accumulated other comprehensive loss at December 31, 2009, the Company expects to complete the sale of the tobacco and recognize the amounts in earnings during fiscal year 2010.

From October 2007 through July 2008, the Company hedged approximately \$240 million U.S. dollar notional amount related to the 2007-2008 crop in Brazil, but they were not designated and accounted for as hedges, so gains and losses on those contracts were recorded in earnings as they occurred.

As of December 31, 2009, the Company had not entered any forward contracts to hedge 2009-2010 crop tobacco purchases.

Hedging Strategy for Foreign Currency Exchange Rate Risk Related to Net Local Currency Monetary Assets and Liabilities of Foreign Subsidiaries

Most of the Company's foreign subsidiaries transact the majority of their sales in U.S. dollars and finance the majority of their operating requirements with U.S. dollar borrowings, and therefore use the U.S. dollar as their functional currency. These subsidiaries normally have certain monetary assets and liabilities on their balance sheets that are denominated in the local currency. Those assets and liabilities can include cash and cash equivalents, accounts receivable and accounts payable, advances to farmers and suppliers, deferred income tax assets and

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

liabilities, recoverable value-added taxes, and other items. Net monetary assets and liabilities denominated in the local currency are remeasured into U.S. dollars each reporting period, generating gains and losses that the Company records in earnings as a component of selling, general and administrative expenses. The level of net monetary assets or liabilities denominated in the local currency normally fluctuates throughout the year based on the operating cycle, but it is most common for monetary assets to exceed monetary liabilities at most times of the year, sometimes by a significant amount. When this situation exists and the local currency weakens against the U.S. dollar, remeasurement losses are

Table of Contents

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

generated. Conversely, remeasurement gains are generated on a net monetary asset position when the local currency strengthens against the U.S. dollar. Due to the size of its operations and the fact that it provides significant financing to farmers for crop production, the Company's subsidiary in Brazil has significant exposure to currency remeasurement gains and losses due to fluctuations in exchange rates at certain times of the year. To manage a portion of its exposure to currency remeasurement gains and losses in Brazil during fiscal year 2009, the Company entered into forward contracts to sell the Brazilian currency and buy U.S. dollars at future dates coinciding with expected changes in the overall net local currency monetary asset position of the subsidiary. Gains and losses on the forward contracts were recorded in earnings as a component of selling, general, and administrative expenses for each reporting period as they occurred, and thus directly offset the related remeasurement losses or gains for the notional amount hedged in the consolidated statements of income. Accordingly, the Company did not designate these contracts as hedges for accounting purposes. The notional amount of these contracts totaled approximately \$36 million in U.S. dollars, and all of the contracts matured and were settled before March 31, 2009. To further mitigate currency remeasurement exposure, the Company's Brazilian subsidiary has obtained short-term local currency financing during certain periods. This strategy, while not involving the use of derivative instruments, is intended to minimize the subsidiary's net monetary position by financing a portion of the local currency monetary assets with local currency monetary liabilities and thus hedging a portion of the overall position. During the nine months ended December 31, 2009, such local borrowings in Brazil approximated \$31 million.

The Company has several foreign subsidiaries that transact the majority of their sales and finance the majority of their operating requirements in their local currency, and therefore use their respective local currencies as the functional currency for reporting purposes. From time to time, these subsidiaries sell tobacco to customers in transactions that are not denominated in the functional currency. In those situations, the subsidiaries routinely enter into forward exchange contracts to offset currency risk for the period of time the related trade account receivable is outstanding with the customer. The contracts are not designated as hedges for accounting purposes.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

For the interest rate swap agreements designated as fair value hedges, since the hedges have no ineffectiveness, the gain or loss recognized in earnings on the derivative is offset by a corresponding loss or gain on the underlying hedged debt.

For the forward foreign currency exchange contracts designated as cash flow hedges of tobacco purchases in Brazil, a net hedge loss of approximately \$0.4 million remained in accumulated other comprehensive loss at December 31, 2009. That balance reflects losses on the settled contracts, less the amount reclassified to earnings related to tobacco sold through December 31, 2009. The balance in accumulated other comprehensive loss will be recognized in earnings as a component of cost of goods sold during fiscal year 2010 as the remaining 2008-2009 Brazilian crop tobacco is sold to customers. Based on the hedging strategy, as the loss or gain is recognized in earnings, it is offset by a change in the expected direct cost for the tobacco or by a change in sales prices if the strategy has been mandated by the customer. Margins on the sale of the tobacco are generally not significantly affected.

Effect of Derivative Financial Instruments on the Consolidated Balance Sheets

The table below outlines the effects of the Company's derivative financial instruments on the consolidated balance sheets at December 31, 2009 and 2008, and March 31, 2009:

	Derivatives in a Fair Value Asset Position				Derivatives in a Fair Value Liability Position			
	Fair Value as of				Fair Value as of			
(in thousands of dollars)	Balance Sheet Location	Dec. 31, 2009	Dec. 31, 2008	March 31, 2009	Balance Sheet Location	Dec. 31, 2009	Dec. 31, 2008	March 31, 2009

Total		\$ 556	\$	\$ 45		\$ 287	\$	\$ 712

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 8. FAIR VALUE MEASUREMENTS**

Universal adopted the current accounting guidance for fair value measurements effective April 1, 2008, for financial assets and liabilities, and effective April 1, 2009, for nonfinancial assets and liabilities. The financial assets and liabilities measured at fair value include money market funds, trading securities associated with deferred compensation plans, interest rate swap agreements, forward foreign currency exchange contracts, and guarantees of bank loans to tobacco growers. The application of the fair value guidance to nonfinancial assets and liabilities primarily includes assessments of goodwill and long-lived assets for potential impairment.

Under the accounting guidance, fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The framework for measuring fair value under the guidance is based on a fair value hierarchy that distinguishes between observable inputs (i.e., inputs that are based on market data obtained from independent sources) and unobservable inputs (i.e., inputs that require the Company to make its own assumptions about market participant assumptions because little or no market data exists). There are three levels within the fair value hierarchy:

Level	Description
1	quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the reporting date;
2	quoted prices in active markets for similar assets or liabilities, or quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability; and
3	unobservable inputs for the asset or liability.

In measuring the fair value of liabilities, the Company considers the risk of non-performance in determining fair value.

At December 31, 2009, the Company had certain financial assets and financial liabilities that were required to be measured and reported at fair value on a recurring basis. These assets and liabilities are listed in the table below and classified based on how their values were determined under the fair value hierarchy:

(in thousands of dollars)	Level 1	December 31, 2009		Total
		Level 2	Level 3	
Assets:				
Money market funds	\$ 139,716	\$	\$	\$ 139,716
Trading securities associated with deferred compensation plans	19,031			19,031
Interest rate swaps		10,833		10,833
Forward foreign currency exchange contracts		556		556
Total assets	\$ 158,747	\$ 11,389	\$	\$ 170,136
Liabilities:				
Guarantees of bank loans to tobacco growers	\$	\$	\$ 25,859	\$ 25,859
Interest rate swaps		1,611		1,611
Forward foreign currency exchange contracts		287		287
Total liabilities	\$	\$ 1,898	\$ 25,859	\$ 27,757

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Money market funds***

The fair values of money market funds, which are reported in cash and cash equivalents in the consolidated balance sheets, are based on quoted market prices (Level 1). The fair values of the Company's money market funds approximate cost due to the short-term maturities and the high credit quality of the issuers of the underlying securities.

Trading securities associated with deferred compensation plans

Trading securities represent mutual fund investments that are matched to employee deferred compensation obligations. These investments are bought and sold as employees defer compensation, receive distributions, or make changes in the funds underlying their accounts. Quoted market prices (Level 1) are used to determine the fair values of the mutual funds and their underlying securities.

Interest rate swaps

The fair values of interest rate swap contracts are determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, interest rate swaps are classified within Level 2 of the fair value hierarchy.

Forward foreign currency exchange contracts

The fair values of forward foreign currency exchange contracts are also determined based on dealer quotes using a discounted cash flow model matched to the contractual terms of each instrument. Since inputs to the model are observable and significant judgment is not required in determining the fair values, forward foreign currency exchange contracts are classified within Level 2 of the fair value hierarchy.

Guarantees of bank loans to tobacco growers

The fair values of the Company's guarantees of bank loans to tobacco growers are determined by using internally tracked historical loss data for such loans to develop an estimate of future losses under the guarantees outstanding at the measurement date. The present value of the cash flows associated with those estimated losses is then calculated at a risk-adjusted interest rate. This approach is sometimes referred to as the contingent claims valuation method. Although historical loss data is an observable input, significant judgment is required in applying this information to the portfolio of guaranteed loans outstanding at each measurement date and in selecting a risk-adjusted interest rate. The guarantees of bank loans to tobacco growers are therefore classified within Level 3 of the fair value hierarchy.

A reconciliation of the change in the balance of the financial liability for guarantees of bank loans to tobacco growers (Level 3) for the nine months ended December 31, 2009, is as follows:

	Nine Months Ended December 31, 2009
(in thousands of dollars)	
Balance at beginning of year	\$ 35,154
Transfer to allowance for loss on direct loans to farmers (removal of prior crop year loans from portfolio and addition of current crop year loans)	(17,992)
Change in discount rate and estimated collection period	1,106
Currency remeasurement	7,591
Balance at end of period	\$ 25,859

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

Universal has not elected to report at fair value any financial instruments or other items not otherwise required to be reported at fair value under current accounting guidance.

[Table of Contents](#)

UNIVERSAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

NOTE 9. PENSION AND OTHER POSTRETIREMENT BENEFIT PLANS

The Company has several defined benefit pension plans covering U.S. salaried employees and certain foreign and other employee groups. These plans provide retirement benefits based primarily on employee compensation and years of service. The Company also provides postretirement health and life insurance benefits for eligible U.S. employees attaining specific age and service levels.

The components of the Company's net periodic benefit cost were as follows:

(in thousands of dollars)	Pension Benefits Three Months Ended December 31,		Other Postretirement Benefits Three Months Ended December 31,	
	2009	2008	2009	2008
Service cost	\$ 1,030	\$ 1,432	\$ 162	\$ 228
Interest cost	3,710	3,403	705	698
Expected return on plan assets	(3,469)	(3,326)	(38)	(39)
Settlement cost	2,084			
Net amortization and deferral	245	572	(255)	(138)
Net periodic benefit cost	\$ 3,600	\$ 2,081	\$ 574	\$ 749

(in thousands of dollars)	Pension Benefits Nine Months Ended December 31,		Other Postretirement Benefits Nine Months Ended December 31,	
	2009	2008	2009	2008
Service cost	\$ 3,071	\$ 4,331	\$ 489	\$ 684
Interest cost	11,076	10,297	2,116	2,093
Expected return on plan assets	(10,360)	(10,006)	(114)	(117)
Curtailment loss		815		
Settlement cost	3,334	3,302		
Net amortization and deferral	735	1,211	(765)	(162)
Net periodic benefit cost	\$ 7,856	\$ 9,950	\$ 1,726	\$ 2,498

During the nine months ended December 31, 2009, the Company made contributions of approximately \$14 million to its qualified and non-qualified pension plans. Additional contributions of approximately \$2.5 million are expected during the remaining three months of fiscal year 2010.

NOTE 10. STOCK-BASED COMPENSATION

Universal's shareholders have approved Executive Stock Plans (Plans) under which officers, directors, and employees of the Company may receive grants and awards of common stock, restricted stock, restricted stock units (RSUs), performance share awards (PSAs), stock appreciation rights (SARs), incentive stock options, and non-qualified stock options. The Company's practice is to award grants of stock-based compensation to officers on an annual basis at the first regularly scheduled meeting of the Executive Compensation, Nominating and Corporate Governance Committee of the Board of Directors (the Compensation Committee) in the fiscal year, which is scheduled on a day between two and twelve business days following the public release of the Company's annual financial results. The Compensation Committee administers the Company's

Edgar Filing: UNIVERSAL CORP /VA/ - Form 10-Q

Plans consistently, following previously defined guidelines. Awards of restricted stock, RSUs, PSAs, SARs, and non-qualified stock options are currently outstanding under the Plans. The non-qualified stock options and SARs have an exercise price equal to the closing price of a share of the Company's common stock on the grant date. All stock options currently outstanding are fully vested and exercisable, and they expire ten years after the grant date. The SARs are settled in shares of common stock, vest in equal one-third tranches one, two, and three years after the grant date, and expire ten years after the grant date, except that SARs granted after fiscal year 2007 expire on the earlier of three years after the grantee's retirement date or ten years after the grant date. The RSUs vest five years from the grant date and are then paid out in shares of common stock. Under the terms of the RSU awards, grantees receive dividend equivalents in the form of additional RSUs that vest and are paid out on the same date as the original RSU grant. The PSAs vest three years from the grant date, are paid out in shares of common stock at the vesting date, and do not

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

carry rights to dividends or dividend equivalents prior to vesting. Shares ultimately paid out under PSA grants are dependent on the achievement of predetermined performance measures established by the Compensation Committee and can range from zero to 150% of the stated award. The Company's outside directors automatically receive shares of restricted stock following each annual meeting of shareholders. These shares vest upon the individual's retirement from service as a director.

During the nine-month period ended December 31, 2009 and 2008, Universal issued the following stock-based awards, representing the regular annual grants to officers and outside directors of the Company:

	Nine Months Ended December 31,	
	2009	2008
SARs:		
Number granted	253,800	132,000
Exercise price	\$ 35.30	\$ 51.32
Grant date fair value	\$ 7.85	\$ 11.65
RSUs:		
Number granted	63,450	36,500
Grant date fair value	\$ 35.30	\$ 51.32
PSAs:		
Number granted	63,450	31,600
Grant date fair value	\$ 29.67	\$ 45.96
Restricted Shares:		
Number granted	17,550	14,500
Grant date fair value	\$ 39.76	\$ 54.38

The grant date fair value of the SARs was estimated using the Black-Scholes pricing model and the following assumptions:

	2009	2008
Expected term	5.0 years	5.0 years
Expected volatility	39.0%	31.3%
Expected dividend yield	5.21%	3.50%
Risk-free interest rate	2.51%	3.32%

Fair value expense for stock-based compensation is recognized ratably over the period from grant date to the earlier of: (1) the vesting date of the award, or (2) the date the grantee is eligible to retire without forfeiting the award. For employees who are already eligible to retire at the date an award is granted, the total fair value of all non-forfeitable awards is recognized as expense at the date of grant. As a result, Universal typically incurs higher stock compensation expense in the first quarter of each fiscal year when grants are awarded than in the other three quarters. For PSAs, the Company generally recognizes fair value expense ratably over the performance and vesting period based on management's judgment of the ultimate award that is likely to be paid out based on the achievement of the predetermined performance measures. For the nine months ended December 31, 2009 and 2008, the Company recorded total stock-based compensation expense of approximately \$4.6 million and \$3.8 million, respectively. The Company expects to recognize stock-based compensation expense of approximately \$1.2 million during the remaining three months of fiscal year 2010.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 11. OPERATING SEGMENTS**

The principal approach used by management to evaluate the Company's performance is by geographic region, although some components of the business are evaluated on the basis of their worldwide operations. The Company evaluates the performance of its segments based on operating income after allocated overhead expenses (excluding significant non-recurring charges or credits), plus equity in pretax earnings of unconsolidated affiliates.

Operating results for the Company's reportable segments for each period presented in the consolidated statements of income and retained earnings were as follows:

(in thousands of dollars)	Three Months Ended December 31,		Nine Months Ended December 31,	
	2009	2008	2009	2008
SALES AND OTHER OPERATING REVENUES				
Flue-cured and burley leaf tobacco operations:				
North America	\$ 101,302	\$ 160,979	\$ 187,308	\$ 264,272
Other regions (1)	502,624	482,538	1,570,973	1,570,299

Other tobacco operations (2)	10,582	9,030	31,825	24,983
Segment operating income	76,728	82,671	231,611	199,586
Less:				
Equity in pretax earnings of unconsolidated affiliates (3)	7,783	5,259	17,029	12,792
Consolidated operating income	\$ 68,945	\$ 77,412	\$ 214,582	\$ 186,794

(1) Includes South America, Africa, Europe, and Asia regions, as well as inter-region eliminations.

(2) Includes Dark Air-Cured, Special Services, and Oriental, as well as inter-company eliminations. Sales and other operating revenues for this reportable segment include limited amounts for Oriental because its financial results consist principally of equity in the pretax earnings of an unconsolidated affiliate.

- ⁽³⁾ Item is included in segment operating income, but not included in consolidated operating income.

Table of Contents**UNIVERSAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****NOTE 12. CHANGES IN SHAREHOLDERS EQUITY AND NONCONTROLLING INTERESTS IN SUBSIDIARIES**

As discussed in Note 2, the Company adopted SFAS 160 (now set forth in Topic 810 of the Codification) effective April 1, 2009, and revised its financial statement presentation for noncontrolling interests in subsidiaries to reflect the new guidance. A reconciliation of the changes in Universal Corporation shareholders equity and noncontrolling interests in subsidiaries for the nine months ended December 31, 2009 and 2008, is as follows:

(in thousands of dollars)	Nine Months Ended December 31, 2009			Nine Months Ended December 31, 2008		
	Universal Corporation	Noncontrolling Interests	Total	Universal Corporation	Noncontrolling Interests	Total
Balance at beginning of year	\$ 1,029,473	\$ 3,771	\$ 1,033,244	\$ 1,115,631	\$ 3,182	\$ 1,118,813

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

This Quarterly Report on Form 10-Q and the following Management's Discussion and Analysis of Financial Condition and Results of Operations contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Among other things, these statements relate to the Company's financial condition, results of operation, and future business plans, operations, opportunities, and prospects. In addition, the Company and its representatives may from time to time make written or oral forward-looking statements, including statements contained in other filings with the Securities and Exchange Commission and in reports to shareholders. These forward-looking statements are generally identified by the use of words such as we expect, believe, anticipate, could, should, may, plan, will, predict, estimate, and similar expressions or words of similar import. These forward-looking statements are based upon management's current knowledge and assumptions about future events and involve risks and uncertainties that could cause actual results, performance, or achievements to be materially different from any anticipated results, prospects, performance, or achievements expressed or implied by such forward-looking statements. Such risks and uncertainties include: anticipated levels of demand for and supply of its products and services; costs incurred in providing these products and services; timing of shipments to customers; changes in market structure; changes in exchange rates; and general economic, political, market, and weather conditions. For a further description of factors that may cause actual results to differ materially from such forward-looking statements, see Item 1A, Risk Factors of our Annual Report on Form 10-K for the fiscal year ended March 31, 2009. We caution investors not to place undue reliance on any forward-looking statements as these statements speak only as of the date when made, and we undertake no obligation to update any forward-looking statements made in this report. This Form 10-Q should be read in conjunction with our Annual Report on Form 10-K for the fiscal year ended March 31, 2009.

Liquidity and Capital Resources*Overview*

After significant seasonal working capital investments during the first half of our fiscal year, we generally see contraction in inventory and other working capital elements in the second half of the fiscal year as major crops in Africa are being shipped and South American shipments near completion. Reflecting this seasonal pattern, inventory levels have declined, cash balances have increased, short-term bank borrowings and customer funds have decreased, and operating cash flows have increased since September 30. In addition, we purchased common stock under our share repurchase program, which is based on free cash flow generated in prior years, adjusted to reflect our expected capital structure and our future capital needs and working capital requirements. We define free cash flow as cash flow from operations less capital expenditures and dividends.

Our liquidity and capital resource requirements are predominantly short term in nature and relate to working capital for tobacco crop purchases. Working capital needs are seasonal within each geographic region. The geographic dispersion and the timing of working capital needs permit us to predict our general level of cash requirements, although crop size, prices paid to farmers, and currency fluctuations affect requirements each year. Peak working capital requirements are generally reached during the first and second fiscal quarters. Each geographic area follows a seasonal cycle of buying, processing, and shipping, although in many regions, we also provide agricultural materials to farmers during the growing season. The timing of the elements of each cycle is influenced by such things as local weather conditions and individual customer shipping requirements, which may change the level or the duration of crop financing. Despite a predominance of short-term needs, we maintain a relatively large portion of our total debt as long-term to reduce liquidity risk and ensure financial flexibility.

Operations

Operating activities provided about \$55 million in net cash flow during the first nine months of fiscal year 2010. This is a favorable variance of about \$60 million compared to the same period last year, primarily because customer accounts receivable decreased due to later shipments in certain origins this year. Current advances to suppliers were \$134 million at December 31, 2009, a reduction of \$80 million from March 31, 2009, as crops were delivered in payment of those balances primarily in Asia, Africa, and South America. Compared to the same time last year, current advances to suppliers were \$36 million lower, reflecting lower advances in Brazil and Argentina.

Tobacco inventory, at \$771 million, was up \$185 million during the first nine months of fiscal year 2010 on seasonal tobacco crop purchases in several areas, mostly Africa and North America. In addition to seasonal increases, tobacco inventory levels are \$157 million higher than December 31, 2008, levels, primarily reflecting inventory in Africa and North America that is expected to be shipped later this year than last year. Higher leaf prices in Africa and larger crops in the United States also increased inventory balances. Inventory is usually financed with a mix of cash, notes payable, and customer deposits, depending on our borrowing capabilities, interest rates, and exchange rates, as well as those of our customers.

Table of Contents

We generally do not purchase material quantities of tobacco on a speculative basis. At December 31, 2009, our uncommitted inventories were \$121 million, or about 16%, of total tobacco inventory, compared to \$124 million at March 31, 2009, or about 21%, of our total inventory, and \$97 million at December 31, 2008, or about 16%, of our total inventory. These percentages are within normal ranges for our business and vary seasonally. Uncommitted inventories have increased as the balance of supply and demand has improved. In recent periods, uncommitted stocks had dropped to record low levels.

Investment

During the nine months ended December 31, 2009, we invested about \$43 million in our fixed assets compared to \$29 million in the first nine months of last year. Depreciation expense was approximately \$31 million and \$32 million in the nine months ended December 31, 2009 and 2008, respectively. Our intent is to limit maintenance capital spending to a level below depreciation expense in order to maintain strong cash flow. However, from time to time larger projects may be undertaken. Our capital expenditures during the current year include investments to expand and upgrade our facility in Lancaster, Pennsylvania, to accommodate the consolidation of our U.S. dark tobacco processing operations. That work is now nearly complete, but the facility is operational. Through December 31, 2009, we had spent approximately \$10 million of the \$12 million estimated total cost of that project. We have several other customer-driven opportunities that will require about \$24 million of capital investment in the aggregate. Approximately \$12 million was spent on those projects through December 31, 2009, and we expect to spend approximately \$3 million of the remaining cost by the end of the current fiscal year.

Financing

We define our net debt as the sum of notes payable and overdrafts, long-term debt (including current portion), and customer advances and deposits, less cash, cash equivalents, and short-term investments on our balance sheet. We also define our total capitalization as our net debt plus shareholders' equity. Net debt increased by about \$73 million to \$454 million during the nine months ended December 31, 2009, primarily due to seasonal working capital requirements. Net debt as a percentage of total capitalization was approximately 28% at December 31, 2009, up from about 27% at March 31, 2009, and down from approximately 32% at December 31, 2008. Net debt was about \$33 million lower than December 31, 2008, levels, and it was lower than our target range of 35% to 45% of total capitalization. We repaid \$79.5 million in long-term debt that matured in September 2009, and we provided \$14 million in funding to our pension plans during the nine months. In November 2009, we issued \$100 million in 6.25% senior, unsecured notes due December 1, 2014. The proceeds were used to repay debt obligations, including notes payable and overdrafts incurred to repay the September 2009 long-term debt maturity, and for general corporate purposes.

As of December 31, 2009, we were in compliance with the covenants of our debt agreements. We had \$400 million available under a committed revolving credit facility that will expire on August 31, 2012, and \$164 million in cash and cash equivalents. Our short-term debt totaled \$151 million, and we had \$15 million of current maturities of long-term debt. In addition, we had over \$500 million in unused, uncommitted credit lines. Our seasonal working capital requirements typically increase significantly between March and September and decline after mid-year. As noted above, a significant portion of the capital spending to complete the consolidation of our U.S. dark tobacco operations as well as new investments requested by our customers was incurred during the first nine months of the year, and we expect most of the remainder to be spent by the end of the fiscal year. Our available capital resources from our cash balances, committed credit facilities, and uncommitted credit lines remain adequate to support our foreseeable operating needs.

On November 7, 2007, we announced that our Board of Directors had approved the purchase of up to \$150 million of our common stock through November 2009. The purchases were carried out from time to time on the open market at prevailing market prices. During the nine months ended December 31, 2009, we purchased 347,491 shares of common stock at an aggregate cost of \$13.1 million (average price per share of \$37.84), which brought our total purchases under the program to 2.9 million shares at an aggregate cost of \$141 million (average price per share of \$48.59). The program ended on November 5, 2009, when it was superseded by a new program. On November 5, 2009, we announced that our Board of Directors had approved a new authorization for the purchase of up to \$150 million of our common stock through November 5, 2012. The purchases are to be carried out from time to time on the open market or in privately negotiated transactions at prices not exceeding prevailing market rates. The program is based on cash flow from operating activities less capital expenditures and dividends generated in prior years, adjusted to reflect our working capital needs. During the three months ended December 31, 2009, we purchased 66,188 shares of common stock under the new program at an aggregate cost of \$3.1 million (average price per share of \$46.62). As of December 31, 2009, we had approximately 24.6 million common shares outstanding.

Table of Contents

Derivatives

From time to time, we use interest rate swap agreements to manage our exposure to changes in interest rates. These agreements typically adjust interest rates on designated long-term obligations from fixed to variable. The swaps are accounted for as fair value hedges. During the quarter ended December 31, 2009, we entered into new interest rate swaps with a notional balance totaling \$75 million to hedge our interest rate exposure. These swaps were entered at the time we issued our 6.25% senior unsecured notes. The floating rate at the time of issuance would have approximated 4%. At December 31, 2009, the total notional amount of our outstanding interest rate swaps was \$245 million and the fair value was a net asset of \$9.2 million.

We also enter into forward contracts from time to time to hedge certain foreign currency exposures, primarily related to forecast purchases of tobacco in Brazil, and we account for them as cash flow hedges. At December 31, 2009, all forward contracts to hedge 2008-2009 crop tobacco purchases were settled, and we had approximately \$0.4 million in losses on those contracts remaining in accumulated other comprehensive loss related to the portion of those tobaccos not yet sold. At December 31, 2009, we had other forward contracts outstanding that were not designated as hedges, and the fair value of those contracts was not material.

Results of Operations

Amounts included in the following discussion are attributable to Universal Corporation and exclude earnings related to non-controlling interests in subsidiaries.

Net income for the nine months ended December 31, 2009, was \$142.0 million, or \$4.78 per diluted share, 22% above last year's results of \$116.0 million, or \$3.78 per diluted share. Last year's strong performance was overshadowed by the recognition of \$45 million in currency-related costs due to the rapid strengthening of the U.S. dollar, and the current year has benefited from a \$42 million reduction in those costs. That benefit was partially offset by delays in shipments from Africa and North America this year. Those shipment delays also caused a 3% reduction in revenues for the nine months and contributed to a modest decline in third quarter results this year. For the third quarter of fiscal year 2010, net income was about \$45.7 million, or \$1.54 per diluted share, compared to last year's net income of \$53.1 million, or \$1.78 per diluted share. Revenues for the quarter of about \$661 million were down by 5%.

Flue-cured and Burley Operations

First Nine Months

Operating income for our flue-cured and burley tobacco operations, which comprise the North America and Other Regions segments, increased by more than 14% to nearly \$200 million for the first nine months of this fiscal year, largely on lower currency-related costs. Revenues were down by 4%, primarily due to shipment delays in North America and Africa that were partly offset by higher sales from Asia and South America. In North America, operating income increased by nearly \$5 million as higher prices and improved experience with farmer advances in some areas outweighed the effect of lower U.S. shipments. Revenues for the North America unit declined on shipment delays, lower sales of old crop leaf, and lower Canadian volumes. Earnings for the Other Regions segment were up by nearly 14%, primarily due to large currency-related costs in Brazil last year. African volumes were substantially lower because the current crop is being shipped later and because first quarter shipments of old crop tobacco were lower this year. The later timing of current crop shipments from Africa was due to customer delays, a late start to the purchasing season, and logistical issues. In Europe, lower margins and the effect of currency translation reduced reported results. Volumes improved in Asia on increased trading business, and currency effects were favorable in that region as well. Revenues for Other Regions were nearly flat for the nine months as lower volumes from the shipment delays in Africa were offset by higher sales in Asia and South America.

Third Quarter

In the third quarter of fiscal year 2010, operating income for flue-cured and burley operations was \$66 million, 10% lower than the same period last year. Revenues for the group, at \$604 million, were lower due to the decrease in volumes caused by the delayed shipments from North America and Africa. Sales increases in South America offset part of the reduction from shipment timing. Despite lower volumes, operating income for the North America segment was flat, largely reflecting additional processing business and improved margins in some areas. Results for the Other Regions segment were down 15%, primarily due to lower African volumes. Although results benefited from the absence of currency losses in Brazil this year, the benefit was reduced by several other factors in the quarter, including higher pension settlement costs and higher provisions against direct and guaranteed farmer loans in Brazil. Revenues for the Other Regions segment revenue increased by 4% in the quarter compared to last year as the effect of African shipment delays was mitigated by higher volumes in Asia, coupled with higher prices in some areas to recover increased costs of green tobacco.

Table of Contents

Other Tobacco Operations

The Other Tobacco Operations segment performed well during the first nine months of fiscal year 2010 with a 27% improvement in operating income compared to last year. The dark tobacco group benefited from a better currency environment and improvements related to mix of business, which more than offset slightly lower volumes and costs of rationalizing their U.S. operations. Despite a decrease in overall volumes, the oriental tobacco joint venture earnings increased by \$4 million for the nine months due to a better sales mix and cost savings, as well as lower interest and currency costs. The latter factors also benefited the third quarter, driving segment performance up 17% for that period. Dark tobacco business results lagged the prior year primarily due to some one-time sales last year and shipment timing differences, which also reduced revenues for the quarter. The facility upgrade and expansion in Lancaster, Pennsylvania, was near completion in December, and the factory is now operating. Segment revenues were higher in both the quarter and the nine months ended December 31, 2009, as higher volumes of oriental leaf in each period were sold through the consolidated group.

Other Information

Selling, general, and administrative costs decreased by about \$13 million, or 14%, in the quarter and \$21 million, or 9%, in the nine months ended December 31, 2009, compared to the same periods last year. The reductions were primarily due to lower currency remeasurement and exchange losses, which were down \$25 million for the quarter and \$42 million for the nine months, offset partially by higher pension settlement costs and an increase in provisions on direct and guaranteed farmer loans in Brazil. Compared to last year, interest expense was about \$6 million lower in the quarter and \$9 million lower in the nine-month period primarily because of lower average borrowings combined with lower average interest rates.

Our consolidated effective income tax rates on pre-tax earnings for the quarter and nine months ended December 31, 2009, were approximately 32% and 31%, respectively. During both the second and third quarters, we reversed income taxes previously provided for uncertain tax positions because the statutes of limitations expired for the related tax years in the applicable tax jurisdictions. In addition, forecast current year earnings of subsidiaries in the African region have resulted in the recognition of foreign tax credits on historical unremitted earnings. The favorable impact of these items was partially offset by additional U.S. taxes provided for certain foreign income taxes that are not eligible as foreign tax credits when the related earnings are repatriated in future periods. The effect of these items reduced the consolidated effective tax rate below the 35% U.S. statutory rate for the quarter and nine months.

The consolidated effective income tax rates for the quarter and nine months ended December 31, 2008, were approximately 26% and 30%, respectively. During the quarter ended December 31, 2008, we reversed income taxes previously provided for uncertain tax positions due to the expiration of the related statute of limitations. In addition, changes in the our overall tax position allowed us to utilize foreign tax credit carryforwards and reverse a valuation allowance that had previously been recorded on those carryforwards. The effect of these items reduced the consolidated effective tax rate below the 35% U.S. statutory rate for both the quarter and the nine months.

General Overview

Our operations continue to perform well as we look at them over the crop cycle. Timing differences are a normal part of our business whether caused by farmer deliveries that affect inventory levels or by shipments that affect both inventory and income recognition. This year is no exception as both North American and African shipments have been delayed. We currently expect the shipments to be substantially completed by our fiscal year end. We are benefiting from continued cost controls and global coordination, and we are pleased with our performance so far this year.

Looking ahead to crops that will be sold in fiscal year 2011, Brazilian crops are now expected to be lower than originally estimated because of excess rainfall, while dry conditions have reduced the Malawi burley crop. However, these changes should not have a substantial effect on worldwide production. In recent months, some of our customers have announced that the combined impact of increased excise taxes and the recessionary economy has reduced demand somewhat for tobacco products in more developed markets. Although such decreases could shift future demand for some types of leaf, we expect the overall export markets will remain largely in balance because export production appears stable and worldwide uncommitted dealer inventories remain near historical December lows.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK*****Interest Rates***

After inventory is purchased, interest rate risk is limited in the tobacco business because major customers usually pre-finance purchases or pay market rates of interest for inventory purchased for their accounts. Our customers generally pay interest on tobacco purchased for their order. That interest is paid at rates based on current markets for variable-rate debt. When we fund our committed tobacco inventory with fixed-rate debt, we may not be able to recover interest at that fixed rate if current market interest rates were to fall. As of December 31, 2009, tobacco inventory of \$771 million included about \$650 million in inventory that was committed for sale to customers and about \$121 million that was not committed. Committed inventory, after deducting \$38 million in customer deposits, represents our net exposure of \$612 million. We normally maintain a substantial portion of our debt at variable interest rates either directly or through interest rate exchange agreements in order to mitigate interest rate risk related to carrying fixed-rate debt. We also periodically have large cash balances that we use to fund seasonal tobacco purchases. These cash balances reduce our financing needs. Debt carried at variable interest rates was about \$396 million at December 31, 2009. Although a hypothetical 1% change in short-term interest rates would result in a change in annual interest expense of approximately \$4 million, that amount would be mitigated by changes in charges to customers. Our policy is to work toward a level of floating rate liabilities, including customer deposits, that reflects a substantial portion of our average committed inventory levels over time. In addition to the \$396 million of debt with variable interest rates, about \$175 million of our long-term debt has an effective average fixed rate of 5.6%.

Currency

The international tobacco trade generally is conducted in U.S. dollars, thereby limiting foreign exchange risk to that which is related to production costs, overhead, and income taxes in the source country. We also provide farmer advances that are directly related to leaf purchases and are denominated in the local currency. Any currency gains or losses on those advances are usually offset by decreases or increases in the cost of tobacco, which is priced in the local currency. However, the effect of the offset may not occur until a subsequent quarter or fiscal year. Most of our operations are accounted for using the U.S. dollar as the functional currency. Because there are no forward foreign exchange markets in many of our major countries of tobacco origin, we generally manage our foreign exchange risk by matching funding for inventory purchases with the currency of sale, which is usually the U.S. dollar, and by minimizing our net local currency monetary position in individual countries. We are vulnerable to currency remeasurement gains and losses to the extent that monetary assets and liabilities denominated in local currency do not offset each other. In addition to foreign exchange gains and losses, we are exposed to changes in the cost of tobacco due to changes in the value of the local currency in relation to the U.S. dollar. For example, when we purchased the Brazilian crop in the beginning of fiscal year 2009, the local currency had appreciated significantly against the U.S. dollar. Thus, the cost of the crop increased over the prior year, in U.S. dollar terms. We enter into forward currency exchange contracts to hedge some of the effects of currency movements on purchases of tobacco to reduce the volatility of costs related to customer contracts. In addition, we enter into some forward contracts to hedge balance sheet exposures.

In certain tobacco markets that are primarily domestic, we use the local currency as the functional currency. Examples of these domestic markets are Hungary, Poland, and the Philippines. In other markets, such as Western Europe, where export sales have been primarily in local currencies, we also use the local currency as the functional currency. In each case, reported earnings are affected by the translation of the local currency into the U.S. dollar.

Derivatives Policies

Hedging interest rate exposure using swaps and hedging foreign exchange exposure using forward contracts are specifically contemplated to manage risk in keeping with management's policies. We may use derivative instruments, such as swaps, forwards, or futures, which are based directly or indirectly upon interest rates and currencies, to manage and reduce the risks inherent in interest rate and currency fluctuations. When we use foreign currency derivatives to mitigate our exposure to exchange rate fluctuations, we may choose not to designate them as hedges for accounting purposes, which may result in the effects of the derivatives being recognized in our earnings in periods different from the items that created the exposure.

We do not utilize derivatives for speculative purposes, and we do not enter into market risk-sensitive instruments for trading purposes. Derivatives are transaction specific so that a specific debt instrument, forecast purchase, contract, or invoice determines the amount, maturity, and other specifics of the hedge. Counterparty risk is limited to institutions with long-term debt ratings of A or better.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in reports we file under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. Our Chief Executive Officer and Chief Financial Officer evaluated, with the participation of other members of management, the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), as of the end of the period covered by this Quarterly Report on Form 10-Q. Based on this evaluation, management concluded that our disclosure controls and procedures were effective. There were no changes in our internal controls over financial reporting identified in connection with this evaluation that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

European Commission Fines in Spain

In October 2004, the European Commission (the "Commission") imposed fines on five companies active in the raw Spanish tobacco processing market totaling 20 million for colluding on the prices paid to, and the quantities bought from, the tobacco growers in Spain. Two of our subsidiaries, Tabacos Espanoles S.A. ("TAES"), a purchaser and processor of raw tobacco in Spain, and Deltafina, S.p.A. ("Deltafina"), an Italian subsidiary, were among the five companies assessed fines. In its decision, the Commission imposed a fine of 108,000 on TAES and a fine of 11.88 million on Deltafina. Deltafina did not and does not purchase or process raw tobacco in the Spanish market, but was and is a significant buyer of tobacco from some of the Spanish processors. We recorded a charge of about 12 million (approximately \$14.9 million at the September 2004 exchange rate) in the second quarter of fiscal year 2005 to accrue the full amount of the fines assessed against our subsidiaries.

In January 2005, Deltafina filed an appeal in the Court of First Instance of the European Communities. Although a hearing of the matter was held in June 2009, the outcome of the appeal is uncertain, and an ultimate resolution to the matter could take several years. Deltafina has deposited funds in an escrow account with the Commission in the amount of the fine in order to stay execution during the appeal process. This deposit is accounted for as a non-current asset.

European Commission Fines in Italy

In 2002, we reported that we were aware that the Commission was investigating certain aspects of the leaf tobacco markets in Italy. Deltafina buys and processes tobacco in Italy. We reported that we did not believe that the Commission investigation in Italy would result in penalties being assessed against us or our subsidiaries that would be material to our earnings. The reason we held this belief was that we had received conditional immunity from the Commission because Deltafina had voluntarily informed the Commission of the activities that were the basis of the investigation.

On December 28, 2004, we received a preliminary indication that the Commission intended to revoke Deltafina's immunity for disclosing in April 2002 that it had applied for immunity. Neither the Commission's Leniency Notice of February 19, 2002, nor Deltafina's letter of provisional immunity, contains a specific requirement of confidentiality. The potential for such disclosure was discussed with the Commission in March 2002, and the Commission never told Deltafina that disclosure would affect Deltafina's immunity. On November 15, 2005, we received notification that the Commission had imposed fines totaling 30 million (about \$43 million at the December 31, 2009 exchange rate) on Deltafina and Universal Corporation jointly for infringing European Union antitrust law in connection with the purchase and processing of tobacco in the Italian raw tobacco market.

We do not believe that the decision can be reconciled the Commission's Statement of Objections and the facts. In January 2006, both Deltafina and Universal Corporation filed appeals in the Court of First Instance of the European Communities. Based on consultation with outside legal counsel, we believe it is probable that we will prevail in the appeals process, and we have not accrued a charge or interest for the fine. Deltafina has provided a bank guarantee to the Commission in the amount of the fine plus accrued interest in order to stay execution during the appeal process.

U.S. Foreign Corrupt Practices Act

As a result of a posting to our Ethics Complaint hotline alleging improper activities that involved or related to certain of our tobacco subsidiaries, the Audit Committee of our Board of Directors engaged an outside law firm to conduct an investigation of the alleged activities. That investigation revealed that there have been payments that may have violated the U.S. Foreign Corrupt Practices Act. The payments involved approximated \$2 million over a seven-year period. In addition, the investigation revealed activities in foreign jurisdictions that may have violated the competition laws of such jurisdictions, but we believe those activities did not violate U.S. antitrust laws. We voluntarily reported these activities to the Department of Justice ("DOJ") and Securities and Exchange Commission ("SEC") in March 2006. On June 6, 2006, the SEC notified us that a formal order of investigation had been issued.

We have engaged in settlement discussions with the DOJ and SEC to resolve the above-referenced matter. Although those discussions are ongoing, we expect to enter into agreements with the DOJ and the SEC to resolve the matter, and we believe it is probable that such resolution will include injunctive relief, disgorgement and prejudgment interest, fines, penalties, and the retention of an independent compliance monitor. Since this matter arose, we have recorded accruals that we believe are adequate to satisfy the estimated financial settlement we expect with the

resolution of this matter. However, because our discussions are ongoing, we cannot predict with certainty when or whether an agreement will be reached with the DOJ and SEC, or the precise

Table of Contents

terms of any such agreement. We will continue to cooperate with the authorities in this matter while resolution discussions proceed.

Other Legal Matters

In addition to the above-mentioned matters, some of our subsidiaries are involved in other litigation or legal and tax matters incidental to their business activities. While the outcome of these matters cannot be predicted with certainty, management is vigorously defending these matters and does not currently expect that any of them will have a material adverse effect on our financial position. However, should one or more of these matters be resolved in a manner adverse to our current expectation, the effect on our results of operations for a particular fiscal reporting period could be material.

ITEM 1A. RISK FACTORS

As of the date of this report, there are no material changes to the risk factors previously disclosed in our Annual Report on Form 10-K for the year ended March 31, 2009. In evaluating our risks, readers should carefully consider the risk factors discussed in our Annual Report on Form 10-K, which could materially affect our business, financial condition or operating results, in addition to the other information set forth in this report and in our other filings with the Securities and Exchange Commission.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

The following table summarizes our repurchases of equity securities for the three-month period ended December 31, 2009:

Period (1)	Total Number of Shares Repurchased	Average Price Paid Per Share(2)	Total Number of Shares Repurchased as Part of Publicly Announced Plan or Program(3)	Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(3)
October 1, 2009 to October 31, 2009	43,790	\$ 43.41	43,790	\$ 9,078,273
November 1, 2009 to November 30, 2009				150,000,000
December 1, 2009 to December 31, 2009	66,188	46.62	66,188	146,914,579
Total	109,978	\$ 45.35	109,978	\$ 146,914,579

- (1) Repurchases are based on the date the shares were traded. This presentation differs from the consolidated statement of cash flows, where the cost of share repurchases is based on the date the transactions were settled.
- (2) Amounts listed for average price paid per share includes broker commissions paid in the transactions.
- (3) A stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 7, 2007. It authorized the purchase of up to \$150 million in common stock in open market or privately negotiated transactions, subject to market conditions and other factors. This program ended on November 5, 2009, when it was superseded by a new program. The new stock repurchase plan, which was authorized by our Board of Directors, became effective and was publicly announced on November 5, 2009. This stock repurchase plan authorizes the purchase of up to \$150 million in common stock in open market or privately negotiated transactions, subject to market conditions and other factors. This stock repurchase program will expire on the earlier of November 5, 2012, or when we have exhausted the funds authorized for the program.
