The investment return and principal value of an investment in the Fund will fluctuate as the prices of the individual securities in which it invests fluctuate, so that your shares, when redeemed, may be worth more or less than their original cost. You should consider the investment objectives, risks, charges and expenses of the Fund carefully before investing. For a free copy of the Fund's prospectus, which contains this and other information, visit our website at www.alliancebernstein.com or call your financial advisor or AllianceBernstein® at (800) 227-4618. Please read the prospectus carefully before you invest.

You may obtain performance information current to the most recent month-end by visiting www.alliancebernstein.com.

This shareholder report must be preceded or accompanied by the Fund's prospectus for individuals who are not current shareholders of the Fund.

You may obtain a description of the Fund's proxy voting policies and procedures, and information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, without charge. Simply visit AllianceBernstein's website at www.alliancebernstein.com, or go to the Securities and Exchange Commission's (the Commission) website at www.sec.gov, or call AllianceBernstein at (800) 227-4618.

The Fund files its complete schedule of portfolio holdings with the Commission for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the Commission's website at www.sec.gov. The Fund's Forms N-Q may also be reviewed and copied at the Commission's Public Reference Room in Washington, DC; information on the operation of the Public Reference Room may be obtained by calling (800) SEC-0330. AllianceBernstein publishes full portfolio holdings for the Fund monthly at www.alliancebernstein.com.

AllianceBernstein Investments, Inc. (ABI) is the distributor of the AllianceBernstein family of mutual funds. ABI is a member of FINRA and is an affiliate of AllianceBernstein L.P., the manager of the funds.

Annual Report

This report provides management's discussion of fund performance for AllianceBernstein Global High Income Fund, Inc. (the Fund) for the annual reporting period ended March 31, 2011. The Fund is a closed-end fund that trades under the New York Stock Exchange symbol AWF.

Investment Objective and Policies

The Fund seeks high current income and secondarily, capital appreciation. The Fund invests without limit in securities denominated in non-US currencies as well as those denominated in the US dollar. The Fund may also invest, without limit, in sovereign debt securities issued by emerging and developed nations and in debt securities of US and non-US corporate issuers. For more information regarding the Fund's risks, please see A Word About Risk on page 4 and Note E Risks Involved in Investing in the Fund of the Notes to Financial Statements on pages 78-79.

Investment Results

The table on page 5 shows the Fund's performance compared with its composite benchmark. The composite benchmark is composed of equal weightings of the JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global), the JPM Government Bond Index-Emerging Markets (GBI-EM) (local currency-denominated) and the Barclays Capital US Corporate High Yield (HY) 2% Issuer Cap Index, for the six- and 12-month periods ended March 31, 2011. Individual performance for each of these indices is also included for both time periods.

The Fund provided solid positive absolute returns and outperformed the composite benchmark for both the six- and 12- month periods. The Fund's overweight position to high yield corporates and exposure to emerging market corporates were the primary positive drivers of relative outperformance for both periods. The Fund's use of leverage was also a significant positive contributor during both periods, as fixed income markets posted strong positive returns. The Fund utilized leverage through repurchase agreements at favorable rates and was able to reinvest the proceeds in higher-yielding securities.

Within the Fund's high yield holdings, an overweight to subordinated financials (banks and insurance) within the capital structure contributed positively to relative performance for both periods. Within the Fund's emerging market holdings, an overweight to sovereign debt in Argentina and the Ukraine, Russian corporate debt, as well as currency exposure to the Brazilian real contributed positively for both periods. An underweight to Venezuela detracted for both periods. Within the Fund's derivative positions, credit derivative exposure contributed positively for both periods while interest rate swaps had no meaningful impact.

Market Review and Investment Strategy

The global economic recovery continued to strengthen and broaden during the 12-month period ended March 31, 2011, bolstering investors demand for risk assets. Global manufacturing particularly in G7 countries was especially strong as

demand in emerging market economies continued to drive a robust export cycle. Equity markets rebounded strongly, as measured by the S&P 500 Stock Index, and interest rates rose globally in the latter half of the period. In the US, consumer sentiment rose while the beleaguered job market began to show gains in private hiring and the unemployment rate receded from recent record levels. Despite a number of shocks in the first quarter of 2011 which included rising social unrest in North Africa and the Middle East, and a major earthquake and tsunami in Japan the global economic expansion remained intact, and risk assets performed well.

For the 12-month period ended March 31, 2011, non-government securities outperformed, led by US high yield corporates and commercial mortgage-backed securities (CMBS). High yield performed well as strong revenue and earnings growth continued to help issuers deleverage, and default rates continued to fall. CMBS performed well, thanks to positive technicals, strong investor appetite for yield and signs of a stabilization of commercial real estate prices in core markets. Yield spreads in both of these sectors tightened significantly during the 12-month period. US investment-grade corporates also outperformed government securities.

Emerging market debt returns were also solid. US-dollar denominated emerging market debt returns were dampened late in the annual period by rising US interest rates. Argentina, one of the strongest emerging market

performers for the 12-month period, benefited from strong commodity prices and an opening to new markets as well as improving country fundamentals. The Ukraine also outperformed, as the new government made progress on their International Monetary Fund program after elections earlier in 2010 led to political clarity.

The Fund's Management Team (the Team) remains optimistic on the outlook for global economic growth and believes that the environment for global credit investing remains supportive. The Team believes that central banks will continue to remove excess liquidity from the financial system, but still forecasts ample amounts of global liquidity. The Team continues to favor high yield corporate debt over sovereign emerging market debt. Corporate securities continue to offer relatively attractive valuations along with solid fundamentals. Business confidence is rebounding as economies recover, and corporations, particularly in the US, have strong balance sheets and ample cash flows to cover their debts.

In anticipation of higher interest rates in both developed and emerging market countries, the Fund remains defensively positioned with a short-duration bias. The Team continues to see opportunities in corporate dollar-denominated emerging market debt. This sector is receiving increased investor focus and supply is increasing at a rapid pace. Given the dramatic narrowing of spreads witnessed in 2009 and 2010 as the global economy recovered from crisis, the Team does

not expect further spread compression to be significant. In 2011, the Team expects most nongovernment sectors excess returns to be largely in line with their incremental yield advantage.

HISTORICAL PERFORMANCE

An Important Note About the Value of Historical Performance

The performance shown on the following page represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance information shown. All fees and expenses related to the operation of the Fund have been deducted. Performance assumes reinvestment of distributions and does not account for taxes.

AllianceBernstein Global High Income Fund Shareholder Information

The Fund's NYSE trading symbol is AWF. Weekly comparative net asset value (NAV) and market price information about the Fund is published each Saturday in Barron's and in other newspapers in a table called "Closed End Funds". Daily NAVs and market price information, and additional information regarding the Fund, is available at www.alliancebernstein.com and www.nyse.com. For additional shareholder information regarding this Fund, please see page 102.

Benchmark Disclosure

The unmanaged JPMorgan Emerging Markets Bond Index Global (JPM EMBI Global), the JPM Government Bond Index-Emerging Markets (GBI-EM) and the Barclays Capital US Corporate High Yield (HY) 2% Issuer Cap Index do not reflect fees and expenses associated with the active management of a mutual fund portfolio. The J.P. Morgan® EMBI Global Index (market-capitalization weighted) represents the performance of USD denominated Brady bonds, Eurobonds, and trade loans issued by sovereign and quasi-sovereign entities. The J.P. Morgan® Government Bond Index-Emerging Markets (GBI-EM) represents the performance of local currency government bonds issued by emerging markets. The Barclays Capital High Yield 2% Issuer Constrained Index is the 2% Issuer Cap component of the US Corporate High Yield Index, which represents the performance of fixed-income securities having a maximum quality rating of Ba1, a minimum amount outstanding of \$150 million, and at least one year to maturity. An investor cannot invest directly in an index, and its results are not indicative of the performance of any specific investment, including the Fund.

A Word About Risk

Investing in derivative instruments such as options, futures, forwards or swaps can be riskier than traditional investments, and may be more volatile, especially in a down market. Non-US securities may be more volatile because of political, regulatory, market and economic uncertainties associated with such securities. Fluctuations in currency exchange risk may negatively affect the value of the investment or reduce returns. These risks are magnified in emerging or developing markets. Trying to enhance investment returns by borrowing money or using other leverage tools magnify both gains and losses, resulting in greater volatility. Prices for goods and services tend to rise over time, which may erode the purchasing power of investments. A bond's credit rating reflects the issuer's ability to make timely payments of interest or principal; the lower the rating, the higher the risk of default. If the issuer's financial strength deteriorates, the issuer's rating may be lowered and the bond's value may decline. The Fund utilizes leverage. Trying to enhance investment returns by borrowing money or using other leverage tools magnifies both gains and losses, resulting in greater volatility. The Fund maintains asset coverage of at least 300%. The use of derivatives by the Fund, such as forwards, futures, options and swaps, may result in a form of leverage.

As interest rates rise, bond prices fall and vice versa; long-term securities tend to rise and fall more than short-term securities. The values of mortgage-related and asset-backed securities are particularly sensitive to changes in interest rates due to prepayment risk. Investments in fixed-income securities with lower ratings (commonly known as "junk bonds") tend to have a higher probability that an issuer will default or fail to meet its payment obligations. The market values of the Fund's holdings rise and fall from day to day, so investments may lose value. Portfolios that hold a smaller number of securities may be more volatile than more diversified portfolios, since gains or losses from each security will have a greater impact on the portfolio's overall value.

(Historical Performance continued on next page)

HISTORICAL PERFORMANCE*(continued from previous page)*

THE FUND VS. ITS BENCHMARK	Returns	
PERIODS ENDED MARCH 31, 2011	6 Months	12 Months

Statement of Changes in Net Assets

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 61

NOTES TO FINANCIAL STATEMENTS

March 31, 2011

NOTE A

Significant Accounting Policies

AllianceBernstein Global High Income Fund, Inc. (the Fund) was incorporated under the laws of the State of Maryland on May 20, 1993 and is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The financial statements have been prepared in conformity with U.S. generally accepted accounting principles (U.S. GAAP), which require management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and amounts of income and expenses during the reporting period. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund.

1. Security Valuation

Portfolio securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at fair value as determined in accordance with procedures established by and under the general supervision of the Fund's Board of Directors.

In general, the market value of securities which are readily available and deemed reliable are determined as follows. Securities listed on a national securities exchange (other than securities listed on the NASDAQ Stock Market, Inc. (NASDAQ)) or on a foreign securities exchange are valued at the last sale price at the close of the exchange or foreign securities exchange. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. Securities listed on more than one exchange are valued by reference to the principal exchange on which the securities are traded; securities listed only on NASDAQ are valued in accordance with the NASDAQ Official Closing Price; listed put or call options are valued at the last sale price. If there has been no sale on that day, such securities will be valued at the closing bid prices on that day; open futures contracts and options thereon are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuation, the last available closing settlement price is used; securities traded in the over-the-counter market (OTC) are valued at the mean of the current bid and asked prices as reported by the National Quotation Bureau or other comparable sources; U.S. government securities and other debt instruments having 60 days or less remaining until maturity are valued at amortized cost if their original maturity was 60 days or less; or by amortizing their fair value as of the 61st day prior to maturity if their original term to maturity exceeded 60 days; fixed income securities, including mortgage backed and asset backed securities, may be valued on the basis of prices provided by a pricing service or at a price obtained from one or more of the major broker/dealers. In cases where broker/dealer quotes are obtained, AllianceBernstein L.P. (the Adviser) may establish procedures whereby changes in market yields or spreads are used to adjust, on a

daily basis, a recently obtained quoted price on a security; and OTC and other derivatives are valued on the basis of a quoted bid price or spread from a major broker/dealer in such security. Investments in money market funds are valued at their net asset value each day.

Securities for which market quotations are not readily available (including restricted securities) or are deemed unreliable are valued at fair value. Factors considered in making this determination may include, but are not limited to, information obtained by contacting the issuer, analysts, analysis of the issuer's financial statements or other available documents. In addition, the Fund may use fair value pricing for securities primarily traded in non-U.S. markets because most foreign markets close well before the Fund values its securities at 4:00 p.m., Eastern Time. The earlier close of these foreign markets gives rise to the possibility that significant events, including broad market moves, may have occurred in the interim and may materially affect the value of those securities.

In valuing the Term Asset-Backed Securities Loan Facility (TALF) transactions, the Adviser utilized a portfolio pricing service to price the TALF loans. The methodologies utilized by the vendor to value the TALF loans took into consideration, among other factors, the deal characteristics, historical performance, market interest rates, and the value of the underlying collateral.

2. Fair Value Measurements

In accordance with U.S. GAAP regarding fair value measurements, fair value is defined as the price that the Fund would receive to sell an asset or pay to transfer a liability in an orderly transaction between market participants at the measurement date. The U.S. GAAP disclosure requirements establish a framework for measuring fair value, and a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability. Inputs may be observable or unobservable and refer broadly to the assumptions that market participants would use in pricing the asset or liability. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions that market participants would use in pricing the asset or liability based on the best information available in the circumstances. Each investment is assigned a level based upon the observability of the inputs which are significant to the overall valuation. The three-tier hierarchy of inputs is summarized below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

As of June 15, 2010 and for the remainder of the reporting period, there were no TALF loans outstanding for the Fund. For the period April 1, 2010 through

June 14, 2010, the Fund elected the fair value option in valuing the TALF loan liability as permitted by U.S. GAAP regarding the fair value option for financial assets and financial liabilities. The fair value option permitted a fund the opportunity to mitigate volatility in net assets caused by measuring related assets and liabilities differently. Consequently the Fund recorded the loan liability on the statement of assets and liabilities at fair value. The fair value option required that the TALF loan be marked-to-market giving consideration to relevant market factors including changes in the market value of the collateral related to the TALF loan (see Note C.4). Through June 14, 2010, the Fund did not have a difference between the aggregate fair value and the aggregate unpaid principal balance of the TALF loans outstanding.

The following table summarizes the valuation of the Fund's investments by the above fair value hierarchy levels as of March 31, 2011:

Investments in Securities	Level 1	Level 2	Level 3	Total
Corporates Non-Investment Grades	\$ 0	\$ 821,029,224	\$ 9,856,900	\$ 830,886,124

** The unrealized appreciation/depreciation is included in net change in unrealized appreciation/depreciation of investments and other financial instruments in the accompanying statement of operations.

3. Currency Translation

Assets and liabilities denominated in foreign currencies and commitments under forward currency exchange contracts are translated into U.S. dollars at the mean of the quoted bid and asked prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated into U.S. dollars at the rates of exchange prevailing when such securities were acquired or sold. Income and expenses are translated into U.S. dollars at the rates of exchange prevailing when accrued.

Net realized gain or loss on foreign currency transactions represents foreign exchange gains and losses from sales and maturities of foreign fixed income investments, foreign currency exchange contracts, holding of foreign currencies, currency gains or losses realized between the trade and settlement dates on foreign investment transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains and losses from valuing foreign currency denominated assets and liabilities at period end exchange rates are reflected as a component of net unrealized appreciation and depreciation of investments and foreign currency denominated assets and liabilities.

4. Taxes

It is the Fund's policy to meet the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its investment company taxable income and net realized gains, if any, to shareholders. Therefore, no provisions for federal income or excise taxes are required. The Fund may be subject to taxes imposed by countries in which it invests. Such taxes are generally based on income and/or capital gains earned or repatriated. Taxes are accrued and applied to net investment income, net realized gains and net unrealized appreciation/depreciation as such income and/or gains are earned.

In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Fund's tax positions taken or expected to be taken on federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Fund's financial statements.

5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date or as soon as the Fund is informed of the dividend. Interest income is accrued daily. Investment transactions are accounted for on the date securities are purchased or sold. Investment gains and losses are determined on the identified cost basis. The Fund amortizes premiums and accretes discounts as adjustments to interest income.

6. Dividends and Distributions

Dividends and distributions to shareholders, if any, are recorded on the ex-dividend date. Income dividends and capital gains distributions are determined in accordance with federal tax regulations and may differ from those determined in accordance with U.S. GAAP. To the extent these differences are permanent, such amounts are reclassified within the capital accounts based on their federal tax basis treatment; temporary differences do not require such reclassification.

NOTE B

Advisory Fee and Other Transactions with Affiliates

Under the terms of the investment advisory agreement, the Fund pays the Adviser an advisory fee at an annual rate of .90% of the Fund's average weekly net assets. Such fee is accrued daily and paid monthly.

For the year ended March 31, 2011, the Adviser reimbursed the Fund \$179,099 for trading losses incurred due to trade entry errors.

Pursuant to the amended administration agreement, the Fund may reimburse the Adviser for certain legal and accounting services provided to the Fund by the Adviser, provided, however, that the reimbursement may not exceed .15% annualized of average weekly net assets. For the year ended March 31, 2011,

such fee amounted to \$82,866, representing .01% annualized of the Fund's average weekly net assets.

Under the terms of a Shareholder Inquiry Agency Agreement with AllianceBernstein Investor Services, Inc. (ABIS), a wholly owned subsidiary of the Adviser, the Fund reimburses ABIS for costs relating to servicing phone inquiries on behalf of the Fund. During the year ended March 31, 2011, there was \$290 reimbursement paid to ABIS.

The Fund may invest in the AllianceBernstein Fixed-Income Shares, Inc.- Government STIF Portfolio, an open-end management investment company managed by the Adviser. The Government STIF Portfolio is offered as a cash management option to mutual funds and other institutional accounts of the Adviser, and is not available for direct purchase by members of the public. The Government STIF Portfolio pays no investment management fees but does bear its own expenses. A summary of the Fund's transactions in shares of the Government STIF Portfolio for the year ended March 31, 2011, is as follows:

Market Value March 31, 2010 (000)	Purchases at Cost (000)	Sales Proceeds (000)	Market Value March 31, 2011 (000)	Dividend Income (000)
\$ 6,293	\$ 449,271	\$ 444,546	\$ 11,018	\$ 14

NOTE C

Investment Transactions

Purchases and sales of investment securities (excluding short-term investments) for the year ended March 31, 2011 were as follows:

	Purchases	Sales
Investment securities (excluding U.S. government securities)	\$ 736,274,079	\$ 722,660,606
U.S. government securities	0	0

The cost of investments for federal income tax purposes, gross unrealized appreciation and unrealized depreciation (excluding foreign currency exchange contracts and swap contracts) are as follows:

Cost	\$ 1,345,696,373
Gross unrealized appreciation	\$ 146,952,314
Gross unrealized depreciation	(24,177,554)
Net unrealized appreciation	\$ 122,774,760

1. Derivative Financial Instruments

The Fund may use derivatives to earn income and enhance returns, to hedge or adjust the risk profile of its portfolio, to replace more traditional direct investments, or to obtain exposure to otherwise inaccessible markets.

The principal types of derivatives utilized by the Fund, as well as the methods in which they may be used are:

Forward Currency Exchange Contracts

The Fund may enter into forward currency exchange contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sales commitments denominated in foreign currencies and for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions** .

A forward currency exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract would be included in net realized gain or loss on foreign currency transactions. Fluctuations in the value of open forward currency exchange contracts are recorded for financial reporting purposes as unrealized appreciation and/or depreciation by the Fund. Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars reflects the total exposure the Fund has in that particular currency contract.

During the year ended March 31, 2011, the Fund entered into foreign-currency contracts for hedging and non-hedging purposes.

Option Transactions

For hedging and investment purposes, the Fund may purchase and write (sell) put and call options on U.S. and foreign securities, including government securities, and foreign currencies that are traded on U.S. and foreign securities exchanges and over-the-counter markets. The Fund may also use options transactions for non-hedging purposes as a means of making direct investments in foreign currencies, as described below under **Currency Transactions** .

The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which

expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss. If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund's selling or buying a security or currency at a price different from the current market value. For the year ended March 31, 2011, the Fund had no transactions in written options.

The Fund may also invest in options on swap agreements, also called swaptions. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium. A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

During the year ended March 31, 2011, the Fund held swaptions for hedging purposes.

Swap Agreements

The Fund may enter into swaps to hedge its exposure to interest rates, credit risk, or currencies. The Fund may also enter into swaps for non-hedging purposes as a means of gaining market exposures including by making direct investments in foreign currencies, as described below under Currency Transactions. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. The payment flows are usually netted against each other, with the difference being paid by one party to the other. In addition, collateral may be pledged or received by the Fund in accordance with the terms of the respective swap agreements to provide value and recourse to the Fund or its counterparties in the event of default, bankruptcy or insolvency by one of the parties to the swap agreement.

Risks may arise as a result of the failure of the counterparty to the swap contract to comply with the terms of the swap contract. The loss incurred by the failure of a counterparty is generally limited to the net interim

payment to be received by the Fund, and/or the termination value at the end of the contract. Therefore, the Fund considers the creditworthiness of each counterparty to a swap contract in evaluating potential counterparty risk. This risk is mitigated by having a netting arrangement between the Fund and the counterparty and by the posting of collateral by the counterparty to the Fund to cover the Fund's exposure to the counterparty. Additionally, risks may arise from unanticipated movements in interest rates or in the value of the underlying securities. The Fund accrues for the interim payments on swap contracts on a daily basis, with the net amount recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities, where applicable. Once the interim payments are settled in cash, the net amount is recorded as realized gain/(loss) on swaps on the statement of operations, in addition to any realized gain/(loss) recorded upon the termination of swap contracts. Fluctuations in the value of swap contracts are recorded as a component of net change in unrealized appreciation/depreciation of swap contracts on the statement of operations.

Interest Rate Swaps:

The Fund is subject to interest rate risk exposure in the normal course of pursuing its investment objectives. Because the Fund holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To help hedge against this risk and to maintain its ability to generate income at prevailing market rates, the Fund may enter into interest rate swap contracts. Interest rate swaps are agreements between two parties to exchange cash flows based on a notional amount. The Fund may elect to pay a fixed rate and receive a floating rate, or, receive a fixed rate and pay a floating rate on a notional amount.

In addition, The Fund may also enter into interest rate swap transactions to preserve a return or spread on a particular investment or portion of its portfolio, or protecting against an increase in the price of securities the Fund anticipates purchasing at a later date. Interest rate swaps involve the exchange by a Fund with another party of their respective commitments to pay or receive interest (*e.g.*, an exchange of floating rate payments for fixed rate payments) computed based on a contractually-based principal (or notional) amount. Interest rate swaps are entered into on a net basis (*i.e.*, the two payment streams are netted out, with the Fund receiving or paying, as the case may be, only the net amount of the two payments).

During the year ended March 31, 2011, the Fund held interest rate swap contracts for hedging purposes.

Credit Default Swaps:

The Fund may enter into credit default swaps, including to manage its exposure to the market or certain sectors of the market, to reduce its risk exposure to defaults by corporate and sovereign issuers held by the Fund,

or to create exposure to corporate or sovereign issuers to which it is not otherwise exposed. The Fund may purchase credit protection (Buy Contract) or provide credit protection (Sale Contract) on the referenced obligation of the credit default swap. During the term of the swap agreement, the Fund receives/(pays) fixed payments from/(to) the respective counterparty, calculated at the agreed upon interest rate applied to the notional amount. The accrual for these interim payments is recorded within unrealized appreciation/depreciation of swap contracts on the statement of assets and liabilities. Upfront premiums paid or received in connection with credit default swap contracts are recognized as cost or proceeds on the statement of assets and liabilities and are amortized on a straight line basis over the life of the contract. Amortized upfront premiums are included in net realized gain/(loss) from swaps on the statement of operations. If the Fund is a buyer/(seller) of protection and a credit event occurs, as defined under the terms of the swap agreement, the Fund will either (i) receive from the seller/(pay to the buyer) of protection an amount equal to the notional amount of the swap contract (the Maximum Payout Amount) and deliver/(take delivery of) the referenced obligation or (ii) receive/(pay) a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation.

During the year ended March 31, 2011, the Fund held credit default swaps contracts for hedging and non-hedging purposes.

Credit default swaps may involve greater risks than if the Fund had invested in the referenced obligation directly. Credit default swaps are subject to general market risk, liquidity risk, counterparty risk and credit risk. If the Fund is a buyer of protection and no credit event occurs, it will lose its investment. If the Fund is a seller of protection and a credit event occurs, the value of the referenced obligation received by the Fund coupled with the periodic payments previously received may be less than the Maximum Payout Amount it pays to the buyer, resulting in a loss to the Fund.

Implied credit spreads over Treasuries of comparable maturity utilized in determining the market value of credit default swaps on issuers as of period end are disclosed in the portfolio of investments. The implied spreads serve as an indicator of the current status of the payment/performance risk and typically reflect the market's assessment of the likelihood of default by the issuer of the referenced obligation. The implied credit spread of a particular reference entity reflects the cost of buying/selling protection and may include upfront payments required to be made to enter into the agreement. Widening credit spreads typically represent a deterioration of the referenced entity's credit soundness and greater likelihood of default or other credit event occurring as defined under the terms of the agreement. A credit spread identified as Defaulted indicates a credit event has occurred for the referenced entity or obligation.

At March 31, 2011, the Fund had Sale Contracts outstanding with Maximum Payout Amounts aggregating \$43,850,000 with net unrealized appreciation of \$1,979,727 and net unrealized depreciation of \$139,390 and terms ranging from 8 months to 5 years, as reflected in the portfolio of investments.

In certain circumstances, Maximum Payout Amounts may be partially offset by recovery values of the respective referenced obligations, upfront premium received upon entering into the agreement, or net amounts received from settlement of buy protection credit default swap agreements entered into by the Fund for the same reference obligation with the same counterparty. As of March 31, 2011, the Fund did not have Buy Contracts outstanding for the same referenced obligation with the same counterparty for its Sale Contracts outstanding.

Documentation governing the Fund's swap transactions may contain provisions for early termination of a swap in the event the net assets of the Fund decline below specific levels set forth in the documentation (net asset contingent features). If these levels are triggered, the Fund's counterparty has the right to terminate the swap and require the Fund to pay or receive a settlement amount in connection with the terminated swap transaction. As of March 31, 2011, the Fund had interest rate swap contracts and credit default swap contracts in liability positions with net asset contingent features. The fair value of such contracts amounted to \$501,595 and \$409,692, respectively at March 31, 2011.

At March 31, 2011 the Fund had entered into the following derivatives:

Derivative Type	Asset Derivatives		Liability Derivatives	
	Statement of Assets and Liabilities Location	Fair Value	Statement of Assets and Liabilities Location	Fair Value
Interest rate contracts	Unrealized appreciation of interest rate swap contracts	\$ 1,018,829	Unrealized depreciation of interest rate swap contracts	\$ 501,595
Foreign exchange contracts	Unrealized appreciation of forward currency exchange contracts	2,820,273	Unrealized depreciation of forward currency exchange contracts	5,369,233
Credit contracts	Unrealized appreciation of credit default swap contracts	2,090,356	Unrealized depreciation of credit default swap contracts	409,692
Total		\$ 5,929,458		\$ 6,280,520

The effect of derivative instruments on the statement of operations for the year ended March 31, 2011:

Derivative Type	Location of Gain or (Loss) on Derivatives	Realized Gain or (Loss) on Derivatives	Change in Unrealized Appreciation or (Depreciation)
Credit contracts	Net realized gain/(loss) on swap contracts; Net change in unrealized appreciation/depreciation of swap contracts	\$ 3,126,433	\$ (1,436,185)
Interest rate contracts	Net realized gain/(loss) on swap contracts; Net change in unrealized appreciation/depreciation of swap contracts	(277,727)	517,234
Foreign exchange contracts	Net realized gain/(loss) on foreign currency transactions; Net change in unrealized appreciation/depreciation of foreign currency denominated assets and liabilities	(3,937,980)	(3,673,439)
Total		\$ (1,087,274)	\$ (4,592,390)

For the year ended March 31, 2011, the average monthly notional amount of credit default swap contracts was \$45,790,000 and the average monthly principal amount of forward currency exchange contracts was \$244,839,690. For four months of the year, the average monthly notional amount of interest rate swap contracts was \$454,242,500.

2. Currency Transactions

The Fund may invest in non-U.S. Dollar securities on a currency hedged or unhedged basis. The Fund may seek investment opportunities by taking long or short positions in currencies through the use of currency-related derivatives, including forward currency exchange contracts, futures and options on futures, swaps, and other options. The Fund may enter into transactions for investment opportunities when it anticipates that a foreign currency will appreciate or depreciate in value but securities denominated in that currency are not held by the Fund and do not present attractive investment opportunities. Such transactions may also be used when the Adviser believes that it may be more efficient than a direct investment in a foreign currency-denominated security. The Fund may also conduct currency exchange contracts on a spot basis (i.e., for cash at the spot rate prevailing in the currency exchange market for buying or selling currencies).

3. Reverse Repurchase Agreements

Under a reverse repurchase agreement, the Fund sells securities and agrees to repurchase them at a mutually agreed upon date and price. At the time the Fund enters into a reverse repurchase agreement, it will establish a segregated account with the custodian containing liquid assets having a value at least equal to the repurchase price. For the year ended March 31, 2011, the average amount of reverse repurchase agreements outstanding was \$157,776,528 and the daily weighted average interest rate was 0.09%.

4. Loan Participations and Assignments

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders or lending syndicates by corporate, governmental, or other borrowers, either in the form of participations at the time the loan is originated (Participations) or by buying an interest in the loan in the secondary market from a financial institution or institutional investor (Assignments). A loan is often administered by a bank or other financial institution (the Lender) that acts as agent for all holders. The agent administers the terms of the loan as specified in the loan agreement. When investing in Participations, the Fund generally has no right to enforce compliance with the terms of the loan agreement with the borrower. In addition, when investing in Participations, the Fund has the right to receive payments of principal, interest and any fees to which it is entitled only from the Lender and only upon receipt of payments by the Lender from the borrower. As a result, the Fund may be subject to the credit risk of both the borrower and the Lender. When the Fund purchases Assignments from Lenders, it will typically acquire direct rights against the borrower on the loan. These loans may include participations in bridge loans , which are loans taken out by borrowers for a short period (typically less than six months) pending arrangement of more permanent financing through, for example, the issuance of bonds, frequently high-yield bonds issued for the purpose of acquisitions. The Fund may also participate in unfunded loan commitments, which are contractual obligations for investing in future Participations, and receive a commitment fee based on the amount of the commitment. Under these arrangements, the Fund will receive a fixed rate commitment fee and, if and to the extent the borrower borrows under the facility, the Fund will receive an additional funding fee. At March 31, 2011, the Fund had such commitments in the amount of \$11,766,590 and received \$0 in commitment fees for the year ended March 31, 2011.

5. Term Asset-Backed Securities Loan Facility

Through June 14, 2010, the Fund participated in the TALF program. Under the TALF program eligible borrowers may obtain a non-recourse loan from the Federal Reserve Bank of New York (FRBNY) by posting certain asset-backed securities and commercial mortgage-backed securities (Eligible Securities) as collateral. The transfer of the collateral was not recorded as a sale on the Fund 's records. The Fund agreed to repay the non-recourse loan amount plus accrued interest under the terms of the loan, with the principal balance being due at loan

maturity. According to the terms of the TALF program, the Fund was not required to pledge further collateral should the value of the Eligible Securities transferred as collateral fell below the loan amount. The loan was prepayable in whole or in part at any time at the Fund's option. Prepayments of principal received on the collateral during the loan term must be used to immediately reduce proportionately the loan balance outstanding. At the time of loan approval, the Fund paid a one time administration fee based upon the amount borrowed to the FRBNY.

Borrowing under TALF, as with the extension of other types of credit, subjected the Fund to certain risks, including possible delays in the recovery of securities posted as collateral or possible loss of rights in the collateral should the Fund be unable to repay a loan. Additionally, there was the risk that the expenses associated with the TALF loan, including interest expense may be greater than the income earned from the investment of the proceeds and/or the interest earned on the collateral to which the Fund was entitled. Under the TALF program, interest earned on collateral was used to pay interest expense associated with a loan. Should the interest earned exceed the interest expense on any given payment date, the remainder was applied to the principal balance. Conversely, should the interest earned on the collateral be in shortfall of the interest expense due at any given payment date, the Fund was required to expend cash for the difference in order to meet its obligation. Interest on the TALF loan was measured based on a predetermined rate on the loan origination and is reported on the statement of operations as interest expense.

As of June 14, 2010 and the remainder of the reporting period, there were no TALF loans outstanding for the Fund. For the period April 1, 2010 through June 14, 2010 the average amount of TALF loans outstanding for the Fund was \$11,700,000 and the weighted average interest rate was 1.28%.

NOTE D

Capital Stock

During the year ended March 31, 2011, the Fund issued no shares in connection with the Fund's dividend reinvestment plan; residual shares of capital stock held by the Fund were sold in the amount of \$76,982.

NOTE E

Risks Involved in Investing in the Fund

Interest Rate Risk and Credit Risk Interest rate risk is the risk that changes in interest rates will affect the value of the Fund's investments in fixed-income debt securities such as bonds or notes. Increases in interest rates may cause the value of the Fund's investments to decline. Credit risk is the risk that the issuer or guarantor of a debt security, or the counterparty to a derivative contract, will be unable or unwilling to make timely principal and/or interest payments, or to otherwise honor its obligations. The degree of risk for a particular security may

be reflected in its credit risk rating. Credit risk is greater for medium quality and lower-rated securities. Lower-rated debt securities and similar unrated securities (commonly known as junk bonds) have speculative elements or are predominantly speculative risks.

Foreign Securities Risk Investing in securities of foreign companies or foreign governments involves special risks which include changes in foreign currency exchange rates and the possibility of future political and economic developments which could adversely affect the value of such securities. Moreover, securities of many foreign companies or foreign governments and their markets may be less liquid and their prices more volatile than those of comparable U.S. companies and the U.S. government.

Foreign investment risk may be particularly high to the extent the Fund invests in emerging market securities of issuers based in countries with developing economies. These securities may present market, credit, currency, liquidity, legal, political and other risks different from, or greater than, the risks of investing in developed foreign (non-U.S.) countries.

Currency Risk This is the risk that changes in foreign currency exchange rates may negatively affect the value of the Fund's investments or reduce the returns of the Fund. For example, the value of the Fund's investments in foreign currency-denominated securities or currencies may decrease if the U.S. Dollar is strong (i.e., gaining value relative to other currencies) and other currencies are weak (i.e., losing value relative to the U.S. Dollar). Currency markets are generally not as regulated as securities markets. Independent of the Fund's investments in securities denominated in foreign currencies, the Fund's positions in various foreign currencies may cause the Portfolio to experience investment losses due to the changes in exchange rates and interest rates.

Derivatives Risk The Fund may enter into derivative transactions such as forwards, options, futures and swaps. Derivatives may be illiquid, difficult to price, and leveraged so that small changes may produce disproportionate losses for the Fund, and subject to counterparty risk to a greater degree than more traditional investments. Derivatives may result in significant losses, including losses greater than the value of the derivatives reflected in the statement of assets and liabilities.

Indemnification Risk In the ordinary course of business, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote. Therefore, the Fund has not accrued any liability in connection with these indemnification provisions.

Leverage Risk The Fund may utilize leverage through borrowings or the investment techniques of reverse repurchase agreements and dollar rolls. Reverse

repurchase agreements and dollar rolls are speculative techniques and the proceeds from these transactions may be used, similar to borrowings by the Fund, for investment purposes.

Leverage may result in higher returns to the Fund than if the Fund were not leveraged, but may also adversely affect returns, particularly if the market is declining. The risks of leverage also include potentially a higher volatility of the NAV of the Common Stock, potentially more volatility in the market value of the Common Stock and the relatively greater effect on the NAV of the Common Stock caused by the favorable or adverse changes in portfolio security values or currency exchange rates. In addition, changes in the interest rate environment can increase or decrease shareholder returns. The Fund maintains asset coverage of at least 300% with respect to borrowings.

To the extent that the current interest rate on the Fund's indebtedness approaches the net return on the leveraged portion of the Fund's investment portfolio, then the benefit to the shareholders will be reduced. If the rate on indebtedness were to exceed the net return on the same portion of the portfolio, then this would result in a lower rate of return for the shareholders. Similarly, the use of leverage in a declining market can advance the decrease of the Fund's NAV more so than if the Fund were not leveraged, which would likely be reflected in a greater decline in the market price for shares of Common Stock than if the Fund were not leveraged. In extreme cases, if the Fund's current investment income were not sufficient to meet interest payments on indebtedness or if the Fund failed to maintain the asset coverage required by the 1940 Act, then it could be necessary for the Fund to liquidate certain investments at a time when it may be disadvantageous to do so. The use of derivative instruments by the Fund, such as forwards, futures, options and swaps, may result in a form of leverage.

NOTE F

Acquisition of ACM Managed Dollar Income Fund, Inc. by AllianceBernstein Global High Income Fund, Inc. (the Fund)

On September 25, 2009, the Fund acquired all of the net assets and assumed all of the liabilities of ACM Managed Dollar Income, Inc. (ACM Managed Dollar), pursuant to an Agreement and Plan of Acquisition and Liquidation approved by the Board of Directors of the Fund at the Regular Meetings of the Board of Directors of the Fund held on March 11, 2009. The primary reason for the transaction was to combine a smaller fund into a larger fund with the same investment objective and with similar strategies, except that the Fund may invest in non-U.S. Dollar-denominated fixed-income securities while ACM Managed Dollar's investments were limited to U.S. Dollar-denominated securities. On September 25, 2009, the acquisition was accomplished by a tax-free exchange of 8,835,725 shares of the Fund for 15,166,366 shares of ACM Managed Dollar. For financial reporting purposes, the assets received and shares issued by the

Fund were recorded at fair value; however, the cost basis of the investments received from ACM Managed Dollar was carried forward to align ongoing reporting of the Fund's realized and unrealized gains and losses with amounts distributable to shareholders for tax purposes. The aggregate net assets of the Fund and ACM Managed Dollar immediately before the acquisition were \$1,020,391,036 and \$118,193,362 (including \$4,515,708 of net unrealized appreciation of investments), respectively. The ACM Managed Dollar's net assets were primarily comprised of investments with a fair value of \$122,868,050. Immediately after the acquisition, the combined net assets of the Fund amounted to \$1,138,584,398. Stockholders participating in ACM Managed Dollar dividend reinvestment plan received full and fractional shares of the fund. Other stockholders received cash of \$2,669 in lieu of 200 shares.

The financial statements reflect the Fund's operations for the period prior to the acquisition and the combined operations for the period subsequent to the acquisition. Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition was completed, it is not practicable to separate the amounts of revenue and earnings of ACM Managed Dollar that have been included in the Fund's statement of operations since the acquisition was completed. Assuming the acquisition had been completed on April 1, 2009, the beginning of the annual reporting period of the Fund, the Fund's pro-forma net investment income, net gain on investments and net increase in net assets from operations for the year ended March 31, 2010 would have been \$101,229,778, \$410,730,402 and \$511,960,180, respectively.

NOTE G

Distributions to Shareholders

The tax character of distributions paid during the fiscal years ended March 31, 2011 and March 31, 2010 were as follows:

	2011	2010
Distributions paid from:		
Ordinary income	\$ 102,203,133	\$ 92,187,081
Long-term capital gains	0	0
Total taxable distributions	102,203,133	92,187,081
Total distributions paid	\$ 102,203,133	\$ 92,187,081

As of March 31, 2011, the components of accumulated earnings/(deficit) on a tax basis were as follows:

Undistributed ordinary income	\$ 30,554,137
Accumulated capital and other losses	(15,838,496) ^(a)
Unrealized appreciation/(depreciation)	123,398,109 ^(b)
Total accumulated earnings/(deficit)	\$ 138,113,750 ^(c)

^(a) On March 31, 2011, the Fund had a net capital loss carryover for federal income tax purposes of \$10,168,184 which expires in the year 2018. To the extent future capital gains

are offset by capital loss carryforwards, such gains will not be distributed. During the fiscal year, the Fund utilized capital loss carryforwards of \$75,494,588. For the year ended March 31, 2011, the cumulative deferred loss on straddles was \$5,670,312.

(b) *The differences between book-basis and tax-basis unrealized appreciation/(depreciation) are attributable primarily to the tax deferral of losses on wash sales, the difference between book and tax amortization methods for premium, the difference between book and tax treatment of swap income and the realization for tax purpose of gain/losses on certain derivative instruments.*

(c) *The difference between book-basis and tax-basis components of accumulated earnings/(deficit) is attributable primarily to the tax treatment of interest on defaulted securities.*

During the current fiscal year, permanent differences primarily due to the tax treatment of swap income, the tax treatment of foreign currency gains and losses, the tax treatment of defaulted securities, and the tax treatment of contributions from the Adviser resulted in a net decrease in undistributed net investment income, a net decrease in accumulated net realized loss on investment transactions and foreign currency transactions, and a net decrease to additional paid-in capital. This reclassification had no effect on net assets.

NOTE H

Subsequent Events

Management has evaluated subsequent events for possible recognition or disclosure in the financial statements through the date the financial statements are issued. Management has determined that there are no material events that would require disclosure in the Fund's financial statements through this date.

See footnote summary on page 83.

(a) *Based on average shares outstanding.*

(b) *Amount is less than \$0.005.*

(c) *Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of each period reported. Dividends and distributions, if any, are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's Dividend Reinvestment Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net asset value from the beginning to the end of such periods. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods. Total investment return calculated for a period of less than one year is not annualized.*

* *Includes the impact of proceeds received and credited to the Fund resulting from the class actions settlements, which enhanced the Fund's performance for the year ended March 31, 2011 by 0.01%*

See notes to financial statements.

Financial Highlights

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 83

REPORT OF INDEPENDENT REGISTERED

PUBLIC ACCOUNTING FIRM

To the Shareholders and Board of Directors of

AllianceBernstein Global High Income Fund, Inc.

We have audited the accompanying statement of assets and liabilities of AllianceBernstein Global High Income Fund, Inc. (the Fund), including the portfolio of investments, as of March 31, 2011, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of March 31, 2011 by correspondence with the custodian and others, or by other appropriate auditing procedures where replies from others were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of AllianceBernstein Global High Income Fund, Inc. at March 31, 2011, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

TAX INFORMATION

(unaudited)

For Federal income tax purposes, the following information is furnished with respect to the distributions paid by the Fund during the taxable year ended March 31, 2011. For foreign shareholders, 54.78% of ordinary dividends paid may be considered to be qualifying to be taxed as interest-related dividends.

Tax Information

ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND 85

ADDITIONAL INFORMATION

(unaudited)

AllianceBernstein Global High Income Fund

Shareholders whose shares are registered in their own names will automatically be participants in the Dividend Reinvestment Plan (the Plan), pursuant to which distributions to shareholders will be paid in or reinvested in additional shares of the Fund, unless they elect to receive cash. Computershare Trust Company N.A. (the Agent) will act as agent for participants under the Plan. Shareholders whose shares are held in the name of a broker or nominee should contact such broker or nominee to determine whether or how they may participate in the Plan.

If the Board declares a distribution payable either in shares or in cash, as holders of the Common Stock may have elected, non-participants in the Plan will receive cash and participants in the Plan will receive the equivalent in shares of Common Stock of the Fund valued as follows:

- (i) If the shares of Common Stock are trading at net asset value or at a premium above net asset value at the time of valuation, the Fund will issue new shares at the greater of net asset value or 95% of the then current market price.
- (ii) If the shares of Common Stock are trading at a discount from net asset value at the time of valuation, the Agent will receive the distribution in cash and apply it to the purchase of the Fund's shares of Common Stock in the open market on the New York Stock Exchange or elsewhere, for the participants' accounts. Such purchases will be made on or shortly after the payment date for such distribution and in no event more than 30 days after such date except where temporary curtailment or suspension of purchase is necessary to comply with Federal securities laws. If, before the Agent has completed its purchases, the market price exceeds the net asset value of a share of Common Stock, the average purchase price per share paid by the Agent may exceed the net asset value of the Fund's shares of Common Stock, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund.

The Agent will maintain all shareholders' accounts in the Plan and furnish written confirmation of all transactions in the account, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Agent in non-certificate form in the name of the participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan.

There will be no charges with respect to shares issued directly by the Fund to satisfy the dividend reinvestment requirements. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Agent's open market purchases of shares.

The automatic reinvestment of distributions will not relieve participants of any income taxes that may be payable (or required to be withheld) on distributions.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan as applied to any voluntary cash payments made and any dividend or distribution paid subsequent to written notice of the change sent to participants in the Plan at least 90 days before the record date for such dividend or distribution. The Plan may also be amended or terminated by the Agent on at least 90 days written notice to participants in the Plan. All correspondence concerning the Plan should be directed to the Agent at Computershare Trust Company N.A., P.O. Box 43010, Providence, RI 02940-3010.

(1) Member of the Audit Committee, the Governance and Nominating Committee and the Independent Directors Committee. Mr. Foulk is the sole member of the Fair Value Pricing Committee.

(2) The day-to-day management of, and investment decisions for, the Fund's portfolio are made by the Global Fixed-Income: Emerging Market Investment Team. While all members of the team work jointly to determine the majority of the investment strategy including stock selection for the Fund, Messrs. Paul J. DeNoon, Douglas J. Peebles, Marco G. Santamaria and Matthew S. Sheridan, members of the Global Fixed-Income: Emerging Market Investment Team, are primarily responsible for the day-to-day management of the Fund's portfolio.

Notice is hereby given in accordance with Section 23(c) of the Investment Company Act of 1940 that the Fund may purchase from time to time at market prices shares of its Common Stock in the open market.

This report, including the financial statements herein, is transmitted to the shareholders of AllianceBernstein Global High Income Fund for their information. The financial information included herein is taken from the records of the Fund. This is not a prospectus, circular or representation intended for use in the purchase of shares of the Fund or any securities mentioned in this report.

Annual Certifications As required, on April 27, 2011, the Fund submitted to the New York Stock Exchange (NYSE) the annual certification of the Fund's Chief Executive Officer certifying that he is not aware of any violation of the NYSE's Corporate Governance listing standards. The Fund also has included the certifications of the Fund's Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Fund's Form N-CSR filed with the Securities and Exchange Commission for the reporting period.

++ *Member of the Fair Value Pricing Committee.*

Member of the Audit Committee, the Governance and Nominating Committee and the Independent Directors Committee.

96 ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND

Management of the Fund

Officer Information

Certain information concerning the Fund's Officers is listed below.

NAME, ADDRESS*	POSITION(S)	PRINCIPAL OCCUPATION
AND AGE	HELD WITH FUND	DURING PAST FIVE YEARS
Robert M. Keith, 51	President and Chief Executive Officer	See biography above.
Philip L. Kirstein, 66	Senior Vice President and Independent Compliance Officer	Senior Vice President and Independent Compliance Officer of the AllianceBernstein Mutual Funds, with which he has been associated since October 2004. Prior thereto, he was Of Counsel to Kirkpatrick & Lockhart, LLP from October 2003 to October 2004, and General Counsel of Merrill Lynch Investment Managers, L.P. since prior to March 2003.
Paul J. DeNoon, 49	Vice President	Senior Vice President of the Adviser**, with which he has been associated since prior to 2006.
Marco G. Santamaria, 45	Vice President	Vice President of the Adviser**, with which he has been associated since June 2010. Prior thereto, he was a founding partner at Global Securities Advisors, an emerging-markets oriented fixed-income hedge fund since prior to 2006.
Emilie D. Wrapp, 55	Secretary	Senior Vice President, Assistant General Counsel and Assistant Secretary of ABI**, with which she has been associated since prior to 2006.
Joseph J. Mantineo, 52	Treasurer and Chief Financial Officer	Senior Vice President of AllianceBernstein Investor Services, Inc. (ABIS)**, with which he has been associated since prior to 2006.
Stephen Woetzel, 39	Controller	Vice President of ABIS**, with which he has been associated since prior to 2006.

* The address for each of the Fund's Officers is 1345 Avenue of the Americas, New York, NY 10105.

** The Adviser, ABI and ABIS are affiliates of the Fund.

Information Regarding the Review and Approval of the Fund's Advisory and Administration Agreements

The disinterested directors (the "directors") of AllianceBernstein Global High Income Fund, Inc. (the "Fund") unanimously approved the continuance of the Fund's Advisory Agreement with the Adviser and the continuance of the Fund's Administration Agreement with the Adviser (in such capacity, the "Administrator") at a meeting held on November 2-4, 2010.

Prior to approval of the continuance of the Advisory Agreement and the Administration Agreement, the directors had requested from the Adviser, and received and evaluated, extensive materials. They reviewed the proposed continuance of the Advisory Agreement and Administration Agreement with the Adviser and with experienced counsel who are independent of the Adviser, who advised on the relevant legal standards. The directors also discussed the proposed continuances in private sessions with counsel and the Fund's Senior Officer (who is also the Fund's Independent Compliance Officer).

The directors considered their knowledge of the nature and quality of the services provided by the Adviser to the Fund gained from their experience as directors or trustees of most of the registered investment companies advised by the Adviser, their overall confidence in the Adviser's integrity and competence they have gained from that experience, the Adviser's initiative in identifying and raising potential issues with the directors and its responsiveness, frankness and attention to concerns raised by the directors in the past, including the Adviser's willingness to consider and implement organizational and operational changes designed to improve investment results and the services provided to the AllianceBernstein Funds. The directors noted that they have four regular meetings each year, at each of which they receive presentations from the Adviser on the investment results of the Fund and review extensive materials and information presented by the Adviser.

The directors also considered all other factors they believed relevant, including the specific matters discussed below. In their deliberations, the directors did not identify any particular information that was all-important or controlling, and different directors may have attributed different weights to the various factors. The directors determined that the selection of the Adviser to manage the Fund and the overall arrangements (i) between the Fund and the Adviser, as provided in the Advisory Agreement, including the advisory fee and (ii) between the Fund and the Administrator, as provided in the Administration Agreement, including the administration fee, were fair and reasonable in light of the services performed, expenses incurred and such other matters as the directors considered relevant in the exercise of their business judgment. The material factors and conclusions that formed the basis for the directors' determinations included the following:

Nature, Extent and Quality of Services Provided

The directors considered the scope and quality of services provided by the Adviser under the Advisory Agreement and by the Administrator under the Administration Agreement, including the quality of the investment research capabilities of the Adviser and the other resources it has dedicated to performing services for the Fund and the resources the Administrator has devoted to providing services to the Fund. They noted the professional experience and qualifications of the Fund's portfolio management team and other senior personnel of the Adviser. The quality of administrative and other services, including the Adviser's role in coordinating the activities of the Fund's other service providers, also were considered. The directors concluded that, overall, they were satisfied with the nature, extent and quality of services provided to the Fund under the Advisory Agreement and the Administration Agreement.

Costs of Services Provided and Profitability

The directors reviewed a schedule of the revenues and expenses and related notes indicating the profitability of the Fund to the Adviser for calendar years 2008 and 2009 that had been prepared with an expense allocation methodology arrived at in consultation with an independent consultant retained by the Fund's Senior Officer. The directors reviewed the assumptions and methods of allocation used by the Adviser in preparing fund-specific profitability data and noted that there are a number of potentially acceptable allocation methodologies for information of this type. The directors noted that the profitability information reflected all revenues and expenses of the Adviser's relationship with the Fund, including those relating to its subsidiary which provides shareholder services to the Fund. The directors recognized that it is difficult to make comparisons of profitability between fund advisory contracts because comparative information is not generally publicly available and is affected by numerous factors. The directors focused on the profitability of the Adviser's relationship with the Fund before taxes. The directors concluded that they were satisfied that the Adviser's level of profitability from its relationship with the Fund was not unreasonable.

Fall-Out Benefits

The directors considered the benefits to the Adviser and its affiliates from their relationships with the Fund other than the fees payable under the Advisory and Administration Agreements, including but not limited to benefits relating to soft dollar arrangements (whereby the Adviser receives brokerage and research services from many of the brokers that execute purchases and sales of securities on behalf of its clients (although not for the Fund) on an agency basis) and shareholder servicing fees paid by the Fund to a wholly owned subsidiary of the Adviser. The directors recognized that the Adviser's profitability would be somewhat lower without these benefits. The directors understood that the Adviser also might derive reputational and other benefits from its association with the Fund.

Investment Results

In addition to the information reviewed by the directors in connection with the meeting, the directors receive detailed performance information for the Fund at each regular Board meeting during the year. At the November 2010 meeting, the directors reviewed information prepared by Lipper showing the performance of the Fund as compared with that of a group of similar funds selected by Lipper (the Performance Group), and information prepared by the Adviser showing the Fund's performance as compared with a composite index (33% JPMorgan Emerging Markets Bond Index Global, 33% JPMorgan Government Bond Index Emerging Markets and 33% Barclays Capital U.S. Corporate High Yield 2% Issuer Capped Index), in each case for various periods ended July 31, 2010. The directors noted that the Fund was in the 2nd quintile of the Performance Group for the 1- and 3-year periods, in the 1st quintile of the Performance Group for the 5-year period and 1st out of 2 of the Performance Group for the 10-year period. The Fund outperformed the composite index (which, they noted, is not leveraged) in the 1-, 3- and 5-year periods. The directors recognized that the small number of other funds in the Fund's Lipper category made performance comparisons of limited utility. Based on their review, the directors concluded that the Fund's relative performance over time had been satisfactory.

Advisory Fees and Other Expenses

The directors considered the latest fiscal year actual management fee rate paid by the Fund (combined advisory fee paid to the Adviser and administration fee paid to the Administrator) and information prepared by Lipper concerning fee rates paid by other funds in the same Lipper category as the Fund. They compared the combined advisory and administration fees paid by the Fund to the advisory fees of other funds where there is no separate administrator. The directors recognized that it is difficult to make comparisons of advisory fees because there are variations in the services that are included in the fees paid by other funds.

The directors noted that in connection with the settlement of the market timing matter with the New York Attorney General in December 2003, the Adviser agreed to material reductions (averaging 20%) in the fee schedules of most of the open-end funds sponsored by the Adviser and that such open-end funds had benefited from such reductions since 2004. The directors noted that the Fund's contractual advisory fee rate was higher than the fee rate charged to an open-end high income fund managed by the Adviser that also invested globally, and that the Fund's fee rate exceeded the rate paid by the open-end fund's predecessor prior to the settlement related reduction. The directors further noted that in 2005 the directors considered and approved the Adviser's proposal, in response to the directors' request for advisory and administration fee reductions, to amend the Advisory Agreement to reduce the fee rate by 10 basis points (from 1.00% to 0.90%) and the Administrator's proposal to replace the 15 basis points fee in the Administration Agreement with an amount equal to no more than the cost to the Administrator of providing administrative services subject to a maximum of 15 basis points.

The Adviser informed the directors that there are no institutional products managed by it that have an investment style substantially similar to that of the Fund. The directors reviewed the relevant fee information from the Adviser's Form ADV and noted that the Adviser charged institutional clients lower fees for advising comparably sized institutional accounts using strategies that differ from those of the Fund but which involved investments in securities of the same type that the Fund invests in (*i.e.*, various types of fixed income securities). The Adviser reviewed with the directors the significantly greater scope of the services it provides to the Fund relative to institutional clients. In light of the substantial differences in services rendered by the Adviser to institutional clients as compared to funds such as the Fund, the directors considered these fee comparisons inapt and did not place significant weight on them in their deliberations.

The directors also considered the total expense ratio of the Fund in comparison to the fees and expenses of funds within two comparison groups created by Lipper: an Expense Group and an Expense Universe. Lipper described an Expense Group as a representative sample of funds similar to the Fund and an Expense Universe as a broader group, consisting of all funds in the Fund's investment classification/objective. The directors noted that because of the small number of funds in the Fund's Lipper category, at the request of the Adviser and the Fund's Senior Officer, Lipper had expanded the Expense Group and Expense Universe of the Fund to include closed-end funds that are allowed to utilize leverage but do not do so. The expense ratio of the Fund was based on the Fund's latest fiscal year. The directors noted that it was likely that the expense ratios of some funds in the Fund's Lipper category were lowered by waivers or reimbursements by those funds' investment advisers, which in some cases might be voluntary and temporary. The directors view the expense ratio information as relevant to their evaluation of the Adviser's services because the Adviser is responsible for coordinating services provided to the Fund by others.

The information reviewed by the directors showed that the Fund's latest fiscal year actual management fee rate of 91.2 basis points (combined advisory fee paid to the Adviser plus administration fee paid to the Administrator) was higher than the Expense Group median and the same as the Expense Universe median. The directors noted that the total management fee rate would have been lower if expressed as a percentage of the Fund's average weekly total assets (*i.e.*, net assets plus assets supported by leverage). The directors also noted that the Fund's total expense ratio was lower than the Expense Group and the Expense Universe medians. The directors concluded that the Fund's expense ratio was satisfactory.

Economies of Scale

The advisory fee schedule for the Fund does not contain breakpoints that reduce the fee rates on assets above specified levels. The directors considered that the Fund is a closed-end fixed-income fund and that it was not expected to have

meaningful asset growth (absent a rights offering or an acquisition). In such circumstances, the directors did not view the potential for realization of economies of scale as the Fund's assets grow to be a material factor in their deliberations. They noted that if the Fund's net assets were to increase materially, they would review whether potential economies of scale were being realized.

102 ALLIANCEBERNSTEIN GLOBAL HIGH INCOME FUND

SUMMARY OF GENERAL INFORMATION

Shareholder Information

The Fund distributes its daily net asset value (NAV) to various financial publications or independent organizations such as Lipper, Inc., Morningstar, Inc. and Bloomberg.

The Fund's NYSE trading symbol is AWF. Weekly comparative net asset value and market price information about the Fund is published each Monday in *The Wall Street Journal*, each Saturday in *Barron's* and other newspapers in a table called Closed-End Funds. Daily net asset value information and market price information and additional information regarding the Fund is available at www.alliancebernstein.com and at www.nyse.com.

Dividend Reinvestment Plan

If your shares are held in your own name, you will automatically be a participant in the Plan unless you elect to receive cash. If your shares are held in nominee or street name through a broker or nominee who provides this service, you will also automatically be a participant in the Plan. If your shares are held in the name of a broker or nominee who does not provide this service, you will need to instruct them to participate in the Plan on your behalf or your distributions will not be reinvested. In such case, you will receive your distributions in cash.

For questions concerning shareholder account information, or if you would like a brochure describing the Dividend Reinvestment Plan, please call Computershare Trust Company, N.A. at (800) 219-4218.

ITEM 2. CODE OF ETHICS.

(a) The registrant has adopted a code of ethics that applies to its principal executive officer, principal financial officer and principal accounting officer. A copy of the registrant's code of ethics is filed herewith as Exhibit 12(a)(1).

(b) During the period covered by this report, no material amendments were made to the provisions of the code of ethics adopted in 2(a) above.

(c) During the period covered by this report, no implicit or explicit waivers to the provisions of the code of ethics adopted in 2(a) above were granted.

ITEM 3. AUDIT COMMITTEE FINANCIAL EXPERT.

The registrant's Board of Directors has determined that independent directors William H. Foulk, Jr. and Gary L. Moody qualify as audit committee financial experts.

ITEM 4. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

(a) - (c) The following table sets forth the aggregate fees billed by the independent auditor Ernst & Young LLP, for the Fund's last two fiscal years for professional services rendered for: (i) the audit of the Fund's annual financial statements included in the Fund's annual report to stockholders; (ii) assurance and related services that are reasonably related to the performance of the audit of the Fund's financial statements and are not reported under (i), which include advice and education related to accounting and auditing issues and quarterly press release review (for those Funds that issue quarterly press releases), and preferred stock maintenance testing (for those Funds that issue preferred stock); and (iii) tax compliance, tax advice and tax return preparation.

	Audit Fees	Audit-Related Fees	Tax Fees
2010	\$ 58,658	\$ 7,200	\$ 19,096
2011	\$ 57,500	\$ 8,000	\$ 16,971

(d) Not applicable.

(e) (1) Beginning with audit and non-audit service contracts entered into on or after May 6, 2003, the Fund's Audit Committee policies and procedures require the pre-approval of all audit and non-audit services provided to the Fund by the Fund's independent auditors. The Fund's Audit Committee policies and procedures also require pre-approval of all audit and non-audit services provided to the Adviser and Service Affiliates to the extent that these services are directly related to the operations or financial reporting of the Fund.

(e) (2) All of the amounts for Audit Fees, Audit-Related Fees and Tax Fees in the table under Item 4 (a) - (c) are for services pre-approved by the Fund's Audit Committee.

(f) Not applicable.

(g) The following table sets forth the aggregate non-audit services provided to the Fund, the Fund's Adviser and entities that control, are controlled by or under common control with the Adviser that provide ongoing services to the Fund, which include conducting an annual internal control report pursuant to Statement on Auditing Standards No. 70 (Service Affiliates):

	All Fees for Non-Audit Services Provided to the Portfolio, the Adviser and Service Affiliates	Total Amount of Foregoing Column Pre- approved by the Audit Committee (Portion Comprised of Audit Related Fees) (Portion Comprised of Tax Fees)
2010	\$ 956,828	\$ 270,142
		\$ (251,046)
		\$ (19,096)
2011	\$ 588,417	\$ 24,971
		\$ (8,000)
		\$ (16,971)

(h) The Audit Committee of the Fund has considered whether the provision of any non-audit services not pre-approved by the Audit Committee provided by the Fund's independent auditor to the Adviser and Service Affiliates is compatible with maintaining the auditor's independence.

ITEM 5. AUDIT COMMITTEE OF LISTED REGISTRANTS.

The registrant has a separately-designated standing audit committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934. The audit committee members are as follows:

John H. Dobkin

D. James Guzy

Michael J. Downey

Gary. L Moody

William H. Foulk, Jr.

Marshall C. Turner, Jr.

Nancy P. Jacklin

Earl D. Weiner

ITEM 6. SCHEDULE OF INVESTMENTS.

Please see Schedule of Investments contained in the Report to Shareholders included under Item 1 of this Form N-CSR.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

Statement of Policies and Procedures for

Proxy Voting

1. Introduction

As a registered investment adviser, AllianceBernstein L.P. (AllianceBernstein , we or us) has a fiduciary duty to act solely in the best interests of our clients. We recognize that this duty requires us to vote client securities in a timely manner and make voting decisions that are intended to maximize shareholder value. We consider ourselves shareholder advocates and take this responsibility very seriously. Consistent with these obligations, we will disclose our clients' voting records only to them and as required by mutual fund vote disclosure regulations. In addition, the proxy committees may, after careful consideration, choose to respond to surveys regarding past votes.

This statement is intended to comply with Rule 206(4)-6 of the Investment Advisers Act of 1940. It sets forth our policies and procedures for voting proxies for our discretionary investment advisory clients, including investment companies registered under the Investment Company Act of 1940. This statement applies to AllianceBernstein's investment groups investing on behalf of clients in both U.S. and non-U.S. securities.

2. Proxy Policies

Our proxy voting policies are principle-based rather than rules-based. We adhere to a core set of principles that are described in this Statement and in our Proxy Voting Manual. We assess each proxy proposal in light of those principles. Our proxy voting litmus test will always be what we view as most likely to maximize shareholder value. We believe that authority and accountability for setting and executing corporate policies, goals and compensation should generally rest with the board of directors and senior management. In return, we support strong investor rights that allow shareholders to hold directors and management accountable if they fail to act in the best interests of shareholders. In addition, when a company engages in illegal activities or other anti-social behavior, we exercise our proxy voting rights considering such behavior.

This statement is designed to be responsive to the wide range of proxy voting subjects that can have a significant effect on the investment value of the securities held in our clients' accounts. These policies are not exhaustive due to the variety of proxy voting issues that we may be required to consider. AllianceBernstein reserves the right to depart from these guidelines in order to make voting decisions that are in our clients' best interests. In reviewing proxy issues, we will apply the following general policies:

2.1. Corporate Governance

AllianceBernstein's proxy voting policies recognize the importance of good corporate governance in ensuring that management and the board of directors fulfill their obligations to shareholders. We favor proposals promoting transparency and accountability within a company. We support the appointment of a majority of independent directors on key committees and generally support separating the positions of chairman and chief executive officer, except in cases where a company has sufficient counter-balancing governance in place. Because we believe that good corporate governance requires shareholders to have a meaningful voice in the affairs of the company, we generally will support shareholder proposals which request that companies amend their by-laws to provide that director nominees be elected by an affirmative vote of a majority of the votes cast. Furthermore, we have written to the SEC in support of shareholder access to corporate proxy statements under specified conditions with the goal of serving the best interests of all shareholders.

2.2. Elections of Directors

Unless there is a proxy fight for seats on the Board or we determine that there are other compelling reasons for withholding votes for directors, we will vote in favor of the management proposed slate of directors. That said, we believe that directors have a duty to respond to shareholder actions that have received significant shareholder support. Therefore, we may withhold votes for directors (or vote against directors in non-U.S. markets) who fail to act on key issues such as failure to implement proposals to declassify boards, failure to implement a majority vote requirement, failure to submit a rights plan to a shareholder vote or failure to act on tender offers where a majority of shareholders have tendered their shares. (We may vote against directors under these circumstances if the company has adopted a majority voting policy because, if a company has adopted such a policy, withholding votes from directors is not possible.)

In addition, we will withhold votes for directors who fail to attend at least seventy-five percent of board meetings within a given year without a reasonable excuse, and we may abstain or vote against directors of non-U.S. issuers where there is insufficient information about the nominees disclosed in the proxy statement. Also, we will generally not withhold votes for directors who meet the definition of independence promulgated by the primary exchange on which the company's shares are traded or set forth in the code we determine to be best practice in the country where the subject company is domiciled. Finally, because we believe that cumulative voting in single shareholder class structures provides a disproportionately large voice to minority shareholders in the affairs of a company, we will generally vote against such proposals and vote for management proposals seeking to eliminate cumulative voting. However, in dual class structures (such as A&B shares) where the shareholders with a majority economic interest have a minority voting interest, we will generally vote in favor of cumulative voting.

2.3. Appointment of Auditors

AllianceBernstein believes that the company is in the best position to choose its auditors, so we will generally support management's recommendation. However, we recognize that there are inherent conflicts when a company's independent auditor performs substantial non-audit services for the company. The Sarbanes-Oxley Act of 2002 prohibits certain categories of services by auditors to U.S. issuers, making this issue less prevalent in the U.S. Nevertheless, in reviewing a proposed auditor, we will consider the fees paid for non-audit services relative to total fees and whether there are other reasons for us to question the independence or performance of the auditors.

2.4. Changes in Legal and Capital Structure

Changes in a company's charter, articles of incorporation or by-laws are often technical and administrative in nature. Absent a compelling reason to the contrary, AllianceBernstein will cast its votes in accordance with management's recommendations on such proposals. However, we will review and analyze on a case-by-case basis any non-routine proposals that are likely to affect the structure and operation of the company or have a material economic effect on the company. For example, we will generally support proposals to increase authorized common stock when it is necessary to implement a stock split, aid in a restructuring or acquisition, or provide a sufficient

number of shares for an employee savings plan, stock option plan or executive compensation plan. However, a satisfactory explanation of a company's intentions must be disclosed in the proxy statement for proposals requesting an increase of greater than 100% of the shares outstanding. We will oppose increases in authorized common stock where there is evidence that the shares will be used to implement a poison pill or another form of anti-takeover device. We will support shareholder proposals that seek to eliminate dual class voting structures.

2.5. Corporate Restructurings, Mergers and Acquisitions

AllianceBernstein believes proxy votes dealing with corporate reorganizations are an extension of the investment decision. Accordingly, we will analyze such proposals on a case-by-case basis, weighing heavily the views of our research analysts that cover the company and our investment professionals managing the portfolios in which the stock is held.

2.6. Proposals Affecting Shareholder Rights

AllianceBernstein believes that certain fundamental rights of shareholders must be protected. We will generally vote in favor of proposals that give shareholders a greater voice in the affairs of the company and oppose any measure that seeks to limit those rights. However, when analyzing such proposals we will weigh the financial impact of the proposal against the impairment of shareholder rights.

2.7. Anti-Takeover Measures

AllianceBernstein believes that measures that impede corporate transactions (such as takeovers) or entrench management not only infringe on the rights of shareholders but may also have a detrimental effect on the value of the company. Therefore, we will generally oppose proposals, regardless of whether they are advanced by management or shareholders, when their purpose or effect is to entrench management or excessively or inappropriately dilute shareholder ownership. Conversely, we support proposals that would restrict or otherwise eliminate anti-takeover or anti-shareholder measures that have already been adopted by corporate issuers. For example, we will support shareholder proposals that seek to require the company to submit a shareholder rights plan to a shareholder vote. We will evaluate, on a case-by-case basis, proposals to

completely redeem or eliminate such plans. Furthermore, we will generally oppose proposals put forward by management (including the authorization of blank check preferred stock, classified boards and supermajority vote requirements) that appear to be anti-shareholder or intended as management entrenchment mechanisms.

2.8. Executive Compensation

AllianceBernstein believes that company management and the compensation committee of the board of directors should, within reason, be given latitude to determine the types and mix of compensation and benefits offered to company employees. Whether proposed by a shareholder or management, we will review proposals relating to executive compensation plans on a case-by-case basis to ensure that the long-term interests of management and shareholders are properly aligned. In general, we will analyze the proposed plan to ensure that shareholder equity will not be excessively diluted taking into account shares available for grant under the proposed plan as well as other existing plans. We generally will oppose plans that allow stock options to be granted with below market value exercise prices on the date of issuance or permit re-pricing of underwater stock options without shareholder approval. Other factors such as the company's performance and industry practice will generally be factored into our analysis. In markets where remuneration reports are not required for all companies (for instance, in the U.S. such reports are required only for companies that received funds from the Troubled Asset Relief Program (TARP) but not other companies), we will generally support shareholder proposals asking the board to adopt a policy (*i.e.*, say on pay) that the company's shareholders be given the opportunity to vote on an advisory resolution to approve the compensation committee's report. Although say on pay votes are by nature only broad indications of shareholder views, they do lead to more compensation-related dialogue between management and shareholders and help ensure that the important common objective of management and shareholders is met, which is maximizing the value of the company. In markets where votes to approve remuneration reports are required, we review the reports on a case-by-case basis. With respect to companies that have received governmental assistance through government programs such as TARP, we will generally oppose shareholder proposals that seek to impose greater executive compensation restrictions on subject companies than are required under the applicable program because such restrictions could create a competitive disadvantage for the subject company. We believe the U.S. Securities and Exchange Commission (SEC) took appropriate steps to ensure more complete and transparent

disclosure of executive compensation when it issued modified executive compensation and corporate governance disclosure rules in 2006 and February 2010. Therefore, while we will consider them on a case-by-case basis, we generally vote against shareholder proposals seeking additional disclosure of executive and director compensation, including proposals that seek to specify the measurement of performance-based compensation, if the company is subject to SEC rules. Finally, we will support requiring a shareholder vote on management proposals to provide severance packages that exceed 2.99 times the sum of an executive officer's base salary plus bonus that are triggered by a change in control. Finally, we will support shareholder proposals requiring a company to expense compensatory employee stock options (to the extent the jurisdiction in which the company operates does not already require it) because we view this form of compensation as a significant corporate expense that should be appropriately accounted for.

2.9. Social and Corporate Responsibility

These types of shareholder proposals often raise complex and controversial issues that may have both a financial and non-financial effect on the company. They reflect increasing shareholder concern about Socially Responsible Investing, which may include environmental, social and governance-related issues, as well as other forms of responsible investing and proxy voting. These proposals present a special set of challenges because, beyond distinctions between legal and illegal activity, perspectives on social good vary widely, not only across borders but also from shareholder to shareholder.

Maximizing long-term shareholder value is the overriding concern in considering these proposals, so AllianceBernstein will review and analyze them on a case-by-case basis to determine what effect, if any, they will have on the future earnings of the company. We will vote against proposals that are unduly burdensome or result in unnecessary and excessive costs to the company with no discernable benefits to shareholders. We may abstain from voting on social proposals that do not have a readily determinable financial impact on shareholder value.

3. Proxy Voting Procedures

3.1. Proxy Voting Committees

Our growth and value investment groups have formed separate proxy voting committees to establish general proxy policies for AllianceBernstein and consider specific proxy voting matters as necessary. These committees periodically review these policies and new types of corporate governance issues, and decide how we should vote on proposals not covered by these policies. When a proxy vote cannot be clearly decided by an application of our stated policy, the proxy committee will evaluate the proposal. In addition, the committees, in conjunction with the analyst that covers the company, may contact corporate management, interested shareholder groups and others as necessary to discuss proxy issues. Members of the committees include senior investment personnel and representatives of the Legal and Compliance Department. The committees may also evaluate proxies where we face a potential conflict of interest (as discussed below). Finally, the committees monitor adherence to these policies.

3.2. Conflicts of Interest

AllianceBernstein recognizes that there may be a potential conflict of interest when we vote a proxy solicited by an issuer whose retirement plan we manage or administer, who distributes AllianceBernstein-sponsored mutual funds, or with whom we have, or one of our employees has, a business or personal relationship that may affect (or may be reasonably viewed as affecting) how we vote on the issuer's proxy. Similarly, AllianceBernstein may have a potentially material conflict of interest when deciding how to vote on a proposal sponsored or supported by a shareholder group that is a client. We believe that centralized management of proxy voting, oversight by the proxy voting committees and adherence to these policies ensures that proxies are voted based solely on our clients' best interests. Additionally, we have implemented procedures to ensure that our votes are not the product of a material conflict of interest, including: (i) on an annual basis, the proxy committees taking reasonable steps to evaluate (A) the nature of AllianceBernstein's and our employees' material business and personal relationships (and those of our affiliates) with any company whose equity securities are held in client accounts and (B) any client that has sponsored or has a material interest in a proposal upon which we will be eligible to vote; (ii) requiring anyone involved in the decision making process to disclose to the chairman of the appropriate proxy committee any

potential conflict that he or she is aware of (including personal relationships) and any contact that he or she has had with any interested party regarding a proxy vote; (iii) prohibiting employees involved in the decision making process or vote administration from revealing how we intend to vote on a proposal in order to reduce any attempted influence from interested parties; and (iv) where a material conflict of interests exists, reviewing our proposed vote by applying a series of objective tests and, where necessary, considering the views of third party research services to ensure that our voting decision is consistent with our clients' best interests.

Because under certain circumstances AllianceBernstein considers the recommendation of third party research services, the proxy committees take reasonable steps to verify that any third party research service is, in fact, independent taking into account all of the relevant facts and circumstances. This includes reviewing the third party research service's conflict management procedures and ascertaining, among other things, whether the third party research service (i) has the capacity and competency to adequately analyze proxy issues, and (ii) can make recommendations in an impartial manner and in the best interests of our clients.

3.3. Proxies of Certain Non-U.S. Issuers

Proxy voting in certain countries requires share blocking. Shareholders wishing to vote their proxies must deposit their shares shortly before the date of the meeting with a designated depository. During this blocking period, shares that will be voted at the meeting cannot be sold until the meeting has taken place and the shares are returned to the clients' custodian banks. Absent compelling reasons to the contrary, AllianceBernstein believes that the benefit to the client of exercising the vote is outweighed by the cost of voting (*i.e.*, not being able to sell the shares during this period). Accordingly, if share blocking is required we generally choose not to vote those shares.

AllianceBernstein seeks to vote all proxies for securities held in client accounts for which we have proxy voting authority. However, in non-US markets administrative issues beyond our control may at times prevent AllianceBernstein from voting such proxies. For example, AllianceBernstein may receive meeting notices after the cut-off date for voting or without sufficient time to fully consider the proxy. As another

example, certain markets require periodic renewals of powers of attorney that local agents must have from our clients prior to implementing AllianceBernstein's voting instructions.

3.4. *Loaned Securities*

Many clients of AllianceBernstein have entered into securities lending arrangements with agent lenders to generate additional revenue. AllianceBernstein will not be able to vote securities that are on loan under these types of arrangements. However, under rare circumstances, for voting issues that may have a significant impact on the investment, we may request that clients recall securities that are on loan if we determine that the benefit of voting outweighs the costs and lost revenue to the client or fund and the administrative burden of retrieving the securities.

3.5. *Proxy Voting Records*

Clients may obtain information about how we voted proxies on their behalf by contacting their AllianceBernstein administrative representative. Alternatively, clients may make a written request for proxy voting information to: Mark R. Manley, Senior Vice President & Chief Compliance Officer, AllianceBernstein L.P., 1345 Avenue of the Americas, New York, NY 10105.

[ALTERNATIVE LANGUAGE FOR U.S. MUTUAL FUNDS]

You may obtain information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30, without charge. Simply visit AllianceBernstein's web site at www.alliancebernstein.com, go to the Securities and Exchange Commission's web site at www.sec.gov or call AllianceBernstein at (800) 227-4618.

ITEM 8. PORTFOLIO MANAGERS OF CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

(a) (1) The management of, and investment decisions for, the Fund's portfolio are made by the Global Fixed Income: Emerging Markets Investment Team.

The following table lists the five members of the team with the most significant responsibility for the day-to-day management of the Fund's portfolio, the length of time that each person has been involved in the management of the Fund, and each person's principal occupation during the past five years:

Employee; Year; Title	Principal Occupation During the Past Five (5) Years
Paul DeNoon; since August 2002; Senior Vice President of AllianceBernstein L.P. (AB) and Director of Emerging Market Debt	Senior Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since prior to 2006, and Director of Emerging Market Debt.
Douglas J. Peebles; since August 2002; Senior Vice President of AB, Chief Investment Officer and Co-Head of Fixed Income	Senior Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since prior to 2006, and Chief Investment Officer and Co-Head of Fixed Income.
Marco Santamaria, since September 2010; Vice President of AB	Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since June 2010. Prior thereto, he was a founding partner at Global Securities Advisors, an emerging-markets oriented fixed-income hedge fund since prior to 2006.
Matthew S. Sheridan; since October 2005; Vice President of AB	Vice President of AB, with which he has been associated in a substantially similar capacity to his current position since prior to 2006,

(a) (2) The following tables provide information regarding registered investment companies other than the Fund, other pooled investment vehicles and other accounts over which the Fund's portfolio managers also have day-to-day management responsibilities. The tables provide the numbers of such accounts, the total assets in such accounts and the number of accounts and total assets whose fees are based on performance. The information is provided as of the Fund's fiscal year ended March 31, 2011.

REGISTERED INVESTMENT COMPANIES

(excluding the Fund)

Portfolio Manager	Total Number of Registered Investment Companies Managed	Total Assets of Registered Investment Companies Managed	Number of Registered Investment Companies Managed with Performance-based Fees	Total Assets of Registered Investment Companies Managed with Performance-based Fees
Paul DeNoon	91	\$ 22,237,000,000	1	None
Douglas J. Peebles	123	\$ 25,402,000,000	1	None
Marco Santamaria	1	\$ 148,000,000	None	None
Matthew S. Sheridan	11	\$ 9,712,000,000	None	None

Investment Professional Conflict of Interest Disclosure

As an investment adviser and fiduciary, AllianceBernstein owes its clients and shareholders an undivided duty of loyalty. We recognize that conflicts of interest are inherent in our business and accordingly have developed policies and procedures (including oversight monitoring) reasonably designed to detect, manage and mitigate the effects of actual or potential conflicts of interest in the area of employee personal trading, managing multiple accounts for multiple clients, including AllianceBernstein Mutual Funds, and allocating investment opportunities. Investment professionals, including portfolio managers and research analysts, are subject to the above-mentioned policies and oversight monitoring to ensure that all clients are treated equitably. We place the interests of our clients first and expect all of our employees to meet their fiduciary duties.

Employee Personal Trading. AllianceBernstein has adopted a Code of Business Conduct and Ethics that is designed to detect and prevent conflicts of interest when investment professionals and other personnel of AllianceBernstein own, buy or sell securities which may be owned by, or bought or sold for, clients. Personal securities transactions by an employee may raise a potential conflict of interest when an employee owns or trades in a security that is owned or considered for purchase or sale by a client, or recommended for purchase or sale by an employee to a client. Subject to the reporting requirements and other limitations of its Code of Business Conduct and Ethics, AllianceBernstein permits its employees to engage in personal securities transactions, and also allows them to acquire investments in the AllianceBernstein Mutual Funds through direct purchase and/or notionally in connection with deferred incentive compensation awards. AllianceBernstein's Code of Business Conduct and Ethics requires disclosure of all personal accounts and maintenance of brokerage accounts with designated broker-dealers approved by AllianceBernstein. The Code also requires preclearance of all securities transactions (except transactions in open-end mutual funds) and imposes a 90-day holding period for securities purchased by employees to discourage short-term trading.

Managing Multiple Accounts for Multiple Clients. AllianceBernstein has compliance policies and oversight monitoring in place to address conflicts of interest relating to the management of multiple accounts for multiple clients. Conflicts of interest may arise when an investment professional has responsibilities for the investments of more than one account because the investment professional may be unable to devote equal time and attention to each account. The investment professional or investment professional teams for each client may have responsibilities for managing all or a portion of the investments of multiple accounts with a common investment strategy, including other registered investment companies, unregistered investment vehicles, such as hedge funds, pension plans, separate accounts, collective trusts and charitable foundations. Among other things, AllianceBernstein's policies and procedures provide for the prompt dissemination to investment professionals of initial or changed investment recommendations by analysts so that investment professionals are better able to develop investment strategies for all accounts they manage. In addition, investment decisions by investment professionals are reviewed for the purpose of maintaining uniformity among similar accounts and ensuring that accounts are treated equitably. No investment professional that manages client accounts carrying performance fees is compensated directly or specifically for the performance of those accounts. Investment professional compensation reflects a broad contribution in multiple dimensions to long-term investment success for our clients and is not tied specifically to the performance of any particular client's account, nor is it directly tied to the level or change in level of assets under management.

Allocating Investment Opportunities. AllianceBernstein has policies and procedures intended to address conflicts of interest relating to the allocation of investment opportunities. These policies and procedures are designed to ensure that information relevant to investment decisions is disseminated promptly within its portfolio management teams and investment opportunities are allocated equitably among different clients. The investment professionals at AllianceBernstein routinely are required to select and allocate investment opportunities among accounts. Portfolio holdings, position sizes, and industry and sector exposures tend to be similar across similar accounts, which minimizes the potential for conflicts of interest relating to the allocation of investment opportunities. Nevertheless, investment opportunities may be allocated differently among accounts due to the particular characteristics of an account, such as size of the account, cash position, tax status, risk tolerance and investment restrictions or for other reasons.

AllianceBernstein's procedures are also designed to prevent potential conflicts of interest that may arise when AllianceBernstein has a particular financial incentive, such as a performance-based management fee, relating to an account. An investment professional may perceive that he or she has an incentive to devote more time to developing and analyzing investment strategies and opportunities or allocating securities preferentially to accounts for which AllianceBernstein could share in investment gains.

To address these conflicts of interest, AllianceBernstein's policies and procedures require, among other things, the prompt dissemination to investment professionals of any initial or changed investment recommendations by analysts; the aggregation of orders to facilitate best execution for all accounts; price averaging for all aggregated orders; objective allocation for limited investment opportunities (*e.g.*, on a rotational basis) to

ensure fair and equitable allocation among accounts; and limitations on short sales of securities. These procedures also require documentation and review of justifications for any decisions to make investments only for select accounts or in a manner disproportionate to the size of the account.

(a) (3) Portfolio Manager Compensation

The Adviser's compensation program for investment professionals is designed to be competitive and effective in order to attract and retain the highest caliber employees. The compensation program for investment professionals is designed to reflect their ability to generate long-term investment success for our clients, including shareholders of the AllianceBernstein Mutual Funds. Investment professionals' annual compensation is comprised of the following:

(i) Fixed base salary: This is generally the smallest portion of compensation. The base salary is a relatively low, fixed salary within a similar range for all investment professionals. The base salary is determined at the outset of employment based on level of experience, does not change significantly from year-to-year and hence, is not particularly sensitive to performance.

(ii) Discretionary incentive compensation in the form of an annual cash bonus: The Adviser's overall profitability determines the total amount of incentive compensation available to investment professionals. This portion of compensation is determined subjectively based on qualitative and quantitative factors. In evaluating this component of an investment professional's compensation, the Adviser considers the contribution to his/her team or discipline as it relates to that team's overall contribution to the long-term investment success, business results and strategy of the Adviser. Quantitative factors considered include, among other things, relative investment performance (*e.g.*, by comparison to competitor or peer group funds or similar styles of investments, and appropriate, broad-based or specific market indices), and consistency of performance. There are no specific formulas used to determine this part of an investment professional's compensation and the compensation is not tied to any pre-determined or specified level of performance. The Adviser also considers qualitative factors such as the complexity and risk of investment strategies involved in the style or type of assets managed by the investment professional; success of marketing/business development efforts and client servicing; seniority/length of service with the firm; management and supervisory responsibilities; and fulfillment of the Adviser's leadership criteria.

(iii) Discretionary incentive compensation in the form of awards under the Adviser's Partners Compensation Plan (deferred awards): The Adviser's overall profitability determines the total amount of deferred awards available to investment professionals. The deferred awards are allocated among investment professionals based on criteria similar to those used to determine the annual cash bonus. There is no fixed formula for determining these amounts. Deferred awards, for which, prior to 2009, there were various investment options, vest over a four-year period and are generally forfeited if the employee resigns or the Adviser terminates his/her employment. Prior to 2009,

investment options under the deferred awards plan included many of the same AllianceBernstein Mutual Funds offered to mutual fund investors. Beginning in 2009, all deferred awards are in the form of the Adviser's publicly traded equity securities. Prior to 2002, investment professional compensation also included discretionary long-term incentive in the form of restricted grants of the Adviser's Master Limited Partnership Units.

(iv) Contributions under the Adviser's Profit Sharing/401(k) Plan: The contributions are based on the Adviser's overall profitability. The amount and allocation of the contributions are determined at the sole discretion of the Adviser.

(v) Compensation under the Adviser's Special Option Program: Under this Program, certain investment professionals may be permitted to allocate a portion of their deferred awards to options to buy the Adviser's publicly traded equity securities, and to receive a two-for-one match of such allocated amount. The determination of who may be eligible to participate in the Special Option Program is made at the sole discretion of the Adviser.

(a) (4) The dollar range of the Fund's equity securities owned directly or beneficially by the Fund's portfolio managers as of the Fund's fiscal year ended March 31, 2011 is set forth below:

	DOLLAR RANGE OF EQUITY SECURITIES IN THE FUND
Paul DeNoon	\$0-\$10,000
Marco Santamaria	None
Douglas J. Peebles	None
Matthew S. Sheridan	None

ITEM 9. PURCHASES OF EQUITY SECURITIES BY CLOSED-END MANAGEMENT INVESTMENT COMPANY AND AFFILIATED PURCHASERS.

There have been no purchases of equity securities by the Fund or by affiliated parties for the reporting period.

ITEM 10. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

There have been no material changes to the procedures by which shareholders may recommend nominees to the Fund's Board of Directors since the Fund last provided disclosure in response to this item.

ITEM 11. CONTROLS AND PROCEDURES.

(a) The registrant's principal executive officer and principal financial officer have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-2(c) under the Investment Company Act of 1940, as amended) are effective at the reasonable assurance level based on their evaluation of these controls and procedures as of a date within 90 days of the filing date of this document.

(b) There were no changes in the registrant's internal controls over financial reporting that occurred during the second fiscal quarter of the period that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

ITEM 12. EXHIBITS.

The following exhibits are attached to this Form N-CSR:

EXHIBIT NO.	DESCRIPTION OF EXHIBIT
12 (a) (1)	Code of Ethics that is subject to the disclosure of Item 2 hereof
12 (b) (1)	Certification of Principal Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
12 (b) (2)	Certification of Principal Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
12 (c)	Certification of Principal Executive Officer and Principal Financial Officer Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
