PART I FINANCIAL INFORMATION

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations (MD&A)

This MD&A should be read in conjunction with our unaudited condensed consolidated financial statements and related notes in this Report and the more detailed information contained in our 2011 Annual Report on Form 10-K (2011 Form 10-K). This discussion contains forward-looking statements that are based upon management s current expectations and are subject to significant uncertainties and changes in circumstances. Please review Forward-Looking Statements for more information on the forward-looking statements in this Report. Our actual results may differ materially from those included in these forward-looking statements due to a variety of factors including, but not limited to, those described in this Report in Part II Item 1A. Risk Factors, in our 2011 Form 10-K in Part I Item 1A. Risk Factors.

SUMMARY OF SELECTED FINANCIAL DATA

Below we provide selected consolidated financial data from our results of operations for the three months ended March 31, 2012 and 2011, and selected comparative consolidated balance sheet data as of March 31, 2012, and December 31, 2011. We also provide selected key metrics we use in evaluating our performance.

On February 17, 2012, we completed the previously announced acquisition (the ING Direct acquisition) of substantially all of the ING Direct business in the United States (ING Direct) from ING Groep N.V., ING Bank N.V., ING Direct N.V. and ING Direct Bancorp, which resulted in the addition of loans of $40.4 billion, other assets of $53.9 billion and deposits of $84.4 billion at acquisition. The ING Direct acquisition had a significant impact on our results and selected metrics for the three months ended and as of March 31, 2012. We use the term acquired loans to refer to the substantial majority of loans acquired in the ING Direct and Chevy Chase Bank business combinations, which were recorded at fair value at acquisition and subsequently accounted for based on expected cash flows to be collected. Because this accounting methodology takes into consideration estimated credit losses expected to be realized over the remaining estimated lives of the loans, including these acquired loans in our credit quality metrics may have a material impact. We therefore present certain credit quality metrics with and without these acquired loans.

Table of Contents

** Change is less than one percent or not meaningful.

(1) Amounts attributable to Kohl s Department Stores (Kohl s) under the revenue and loss-sharing arrangement reduced interest income by $222 million, reduced the provision for credit losses by $193 million and reduced net charge-offs by $40 million in the first quarter of 2012. The expected loss reimbursement from Kohl s netted against our allowance for loan and lease losses was approximately $153 million and $139 million as of March 31, 2012 and December 31, 2011, respectively.

(2) Includes a bargain purchase gain of $594 million attributable to the February 17, 2012 acquisition of ING Direct recognized in non-interest income in the first quarter of 2012. The bargain purchase gain represents the excess of the fair value of the net assets acquired from ING Direct as of the acquisition date over the consideration transferred. See Note 2 Acquisitions for additional information.

(3) Discontinued operations reflect ongoing costs related to the mortgage origination operations of GreenPoint s wholesale mortgage banking unit, GreenPoint Mortgage Funding, Inc. (GreenPoint), which we closed in 2007.

(4) Loans held for investment includes loans acquired in the ING Direct and Chevy Chase Bank business combinations. The carrying value and outstanding unpaid principal balance of acquired loans accounted for based on expected cash flows at acquisition was $43.2 billion and $44.3 billion as of March 31, 2012, respectively, and $4.7 billion and $5.2 billion, respectively, as of December 31, 2011. The average balance of loans held for investment excluding the carrying value of acquired loans was $129.8 billion and $119.8 billion in the first quarter of 2012 and 2011, respectively.

(5) Consists of credit card purchase transactions for the period, net of returns. Excludes cash advance transactions.

(6) Calculated based on annualized total revenue for the period divided by average interest-earning assets for the period.

(7) Calculated based on annualized net interest income for the period divided by average interest-earning assets for the period.

(8) Calculated based on annualized net charge-offs for the period divided by average loans held for investment for the period.

(9) Calculated based on annualized net charge-offs for the period divided by average loans held for investment, excluding acquired loans, for the period.

(10) Calculated based on annualized income from continuing operations, net of tax, for the period divided by average total assets for the period.

(11) Calculated based on annualized income from continuing operations, net of tax, for the period divided by average stockholders equity for the period.

(12) Calculated based on annualized non-interest expense, excluding goodwill impairment charges, for the period divided by average loans held for investment for the period.

(13) Calculated based on non-interest expense, excluding goodwill impairment charges, for the period divided by total revenue for the period.

(14) Tier 1 common ratio is a regulatory capital measure calculated based on Tier 1 common capital divided by risk-weighted assets. See Capital Management and Supplemental Tables Table A: Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures for additional information, including the calculation of this ratio.

(15) Tier 1 risk-based capital ratio is a regulatory measure calculated based on Tier 1 capital divided by risk-weighted assets. See Capital Management and Supplemental Tables Table A: Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures for additional information, including the calculation of this ratio.

(16) Total risk-based capital ratio is a regulatory measure calculated based on total risk-based capital divided by risk-weighted assets. See Capital Management and Supplemental Tables Table A: Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures for additional information, including the calculation of this ratio.

(17) TCE ratio is a non-GAAP measure calculated based on tangible common equity divided by tangible assets. See Supplemental Tables Table A: Reconciliation of Non-GAAP Measures and Calculation of Regulatory Capital Measures for the calculation of this measure and reconciliation to the comparative GAAP measure.

INTRODUCTION

We are a diversified financial services holding company with banking and non-banking subsidiaries that offer a broad array of financial products and services to consumers, small businesses and commercial clients through branches, the internet and other distribution channels. Our principal subsidiaries include Capital One Bank (USA), National Association (COBNA), Capital One, National Association (CONA) and ING Bank, fsb. The Company and its subsidiaries are hereafter collectively referred to as we, us or our. CONA and COBNA are hereafter collectively referred to as the Banks. We continue to deliver on our strategy of combining the power of national scale lending and local scale banking.

The closing of the ING Direct acquisition in the first quarter of 2012 resulted in the addition of loans of $40.4 billion and other assets of $53.9 billion at acquisition. The ING Direct acquisition strengthens our customer franchise and brand and adds over seven million customers and approximately $84.4 billion in deposits to our Consumer Banking business segment. With the ING Direct acquisition, we have grown to become the sixth largest depository institution and the largest direct banking institution in the United States. We had $173.8 billion in total loans outstanding and $216.5 billion in deposits as of March 31, 2012, compared with $135.9 billion in total loans outstanding and $128.2 billion in deposits as of December 31, 2011.

Our revenues are primarily driven by lending to consumers and commercial customers and by deposit-taking activities, which generate net interest income, and by activities that generate non-interest income, such as fee-based services provided to customers, merchant interchange fees with respect to certain credit card transactions, gains and losses and fees associated with the sale and servicing of loans. Our expenses primarily consist of the cost of funding our assets, our provision for credit losses, operating expenses (including associate salaries and benefits, infrastructure maintenance and enhancements and branch operations and expansion costs), marketing expenses and income taxes.

Our principal operations are currently organized, for management reporting purposes, into three primary business segments, which are defined primarily based on the products and services provided or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. The operations of acquired businesses have been integrated into our existing business segments. Certain activities that are not part of a segment are included in our Other category.

Credit Card: Consists of our domestic consumer and small business card lending, national small business lending, national closed end installment lending and the international card lending businesses in Canada and the United Kingdom.

Consumer Banking: Consists of our branch-based lending and deposit gathering activities for consumers and small businesses, national deposit gathering, national auto lending and consumer home loan lending and servicing activities.

Commercial Banking: Consists of our lending, deposit gathering and treasury management services to commercial real estate and commercial and industrial customers. Our commercial and industrial customers typically include companies with annual revenues between $10 million to $1.0 billion.

In the first quarter of 2012, we re-aligned the reporting of our Commercial Banking business to reflect the operations on a product basis rather than by customer type. Table 2 summarizes our business segment results, which we report based on income from continuing operations, net of tax, for the three months ended March 31, 2012 and 2011. We provide additional information on the realignment of our Commercial Banking business segment below under Business Segment Results and in Note 14 Business Segments of this Report. We also provide a reconciliation of our total business segment results to our consolidated U.S. GAAP results in Note 14 Business Segments.

(1) Total revenue consists of net interest income and non-interest income.

(2) Net income for our business segments is reported based on income from continuing operations, net of tax.

(3) Includes the residual impact of the allocation of our centralized Corporate Treasury group activities, such as management of our corporate investment portfolio and asset/liability management, to our business segments as well as other items as described in Note 14 Business Segments.

EXECUTIVE SUMMARY AND BUSINESS OUTLOOK

Despite ongoing challenges and uncertainties, including high oil and gas prices and global economic concerns, the U.S. economy showed positive trends during the first quarter of 2012. Our results for the first quarter of 2012 reflected the impact of growth in consumer and business spending, coupled with traction from our geographic expansion and strategy to deepen our customer relationships, and credit performance improvement. The completion of our previously announced ING Direct acquisition also had a significant impact on our results during the first quarter. We believe that cyclical and seasonal improvement trends, as well as actions we took in underwriting and managing our business through the recession, including focusing on our most resilient businesses, have continued to drive our strong credit performance.

Financial Highlights

We reported net income of $1.4 billion, or $2.72 per diluted share, for the first quarter of 2012 on revenues of $4.9 billion, with each of our three business segments contributing to our earnings. Current-quarter results include an approximate half-quarter impact from the operations of ING Direct and a benefit from the recognition of a bargain purchase gain of $594 million in the ING Direct acquisition. The bargain purchase gain represents the excess of the fair value of the net assets acquired in the ING Direct acquisition as of the acquisition date over the consideration transferred. This gain was driven largely by a substantial decline in long-term interest rates between the period of our announcement of the ING Direct acquisition and its closing, which resulted in an increase in the fair value of the acquired assets. Net income excluding the impact of the bargain purchase gain was $809 million, or $1.56 per diluted share, for the first quarter of 2012. In comparison, we reported net income of $1.0 billion, or $2.21 per diluted share, for the first quarter of 2011 on revenues of $4.1 billion.

Our capital levels strengthened during the quarter, driven by strong earnings growth and capital actions related to the financing of the ING Direct acquisition and the acquisition of HSBC s U.S. credit card business. On March 20, 2012, we closed a public offering of 24,442,706 shares of our common stock, which we sold to the underwriters at a per share price of $51.14 for net proceeds of approximately $1.24 billion. On February 16, 2012, we issued 40 million shares of our common stock at settlement of the forward sale agreements that we entered into with certain counterparties acting as forward purchasers in connection with a public offering of shares of our common stock on July 19, 2011 for net proceeds of $1.9 billion. In addition, on February 17, 2012, we issued 54,028,086 shares of our common stock to the ING Sellers with a fair

value of $2.6 billion. Our recent equity issuances contributed to a significant increase in our regulatory capital ratios, with the Tier 1 common

ratio increasing by 220 basis points during the quarter to 11.9% as of March 31, 2012. The Tier 1 risk-based capital ratio increased to 13.9% as of March 31, 2012, from 12.0% as of December 31, 2011. In addition, we issued $1.25 billion of our senior notes due 2015 in a public offering, that closed on March 23, 2012.

Below are additional highlights of our performance for the first quarter of 2012. These highlights generally are based on a comparison to the same prior year period. The changes in our financial condition and credit performance are generally based on our financial condition and credit performance as of March 31, 2012, compared with our financial condition and credit performance as of December 31, 2011. We provide a more detailed discussion of our financial performance in the sections following this Executive Summary and Business Outlook.

Total Company

Earnings: Our net income of $1.4 billion in the first quarter of 2012 increased by $380 million, or 37%, from the first quarter of 2011. The increase reflected the favorable impacts from the bargain purchase gain of $594 million attributable to ING Direct acquisition, income related to the sale of Visa stock of $162 million and higher revenue from our legacy businesses. These factors were partially offset by higher operating expenses related to our recent acquisitions, including an estimated $150 million of operating expenses attributable to ING Direct, increased marketing expenditures and an increase in the provision for mortgage loan repurchase losses largely due to the Government-Sponsored Enterprise (GSE) settlement described below in Consolidated Balance Sheet Analysis Potential Mortgage Representation & Warranty Liabilities.

Total Loans: Period-end loans held for investment increased by $37.9 billion, or 28%, in the first quarter of 2012, to $173.8 billion as of March 31, 2012, from $135.9 billion as of December 31, 2011. The increase was primarily attributable to the addition of the ING Direct loan portfolio of $40.4 billion. Excluding the impact from the addition of the ING Direct loan portfolio, total loans decreased by $2.5 billion, or 2%, reflecting an expected seasonal decline in credit card loan balances.

Charge-off and Delinquency Statistics: Our net charge-off and delinquency rates continued to improve during the first quarter of 2012. The net charge-off rate decreased to 2.04% in the first quarter of 2012, from 2.69% in the fourth quarter of 2011 and 3.66% in the first quarter of 2011. The 30+ day delinquency rate decreased to 2.69% as of March 31, 2012, from 3.95% as of December 31, 2011, primarily due to seasonality trends. Although our first quarter delinquency improvements outpaced industry trends, it is important to note that the seasonality in our delinquency rates is more pronounced than the overall industry. Some of the improvement in our credit quality metrics was attributable to the addition of the ING Direct loan portfolio and the related accounting. We provide information on our credit quality metrics excluding the impact of acquired loans in the Credit Risk Profile section of this report.

Allowance for Loan and Lease Losses: As a result of the strong credit performance, we reduced our allowance by $190 million in the first quarter of 2012 to $4.1 billion. The coverage ratio of the allowance to total loans held for investment fell by 79 basis points to 2.34% as of March 31, 2012, primarily due to the addition of the ING Direct loan portfolio. Because we recorded the ING Direct loans at fair value at acquisition there is currently no allowance related to these loans. See the Credit Risk Profile section of this report for information on our credit quality metrics excluding the impact of acquired loans.

Representation and Warranty Reserve: We recorded a provision for mortgage loan repurchase losses of $169 million in the first quarter of 2012, of which $95 million related to the GSE settlement. In comparison, we recorded a provision of $44 million in the first quarter of 2011. Our representation and warranty reserve totaled $1.1 billion as of March 31, 2012, compared with $943 million as of December 31, 2011.

Business Segments

Credit Card: Our Credit Card business generated net income from continuing operations of $566 million in the first quarter of 2012, compared with net income from continuing operations of $643 million in the first

Table of Contents

quarter of 2011. The decrease in earnings was attributable to higher non-interest expense and a reduction in non-interest income, which were partially offset by an increase in net interest income. Non-interest expense rose as a result of increased marketing expenditures and merger-related expenses associated with the acquisition of the HSBC U.S. credit card portfolio. Non-interest income was reduced due to the recognition of expense of $75 million in the first quarter of 2012 to establish a reserve for expected customer refunds attributable to issues associated with cross-selling certain other products to credit card customers. The increase in net interest income was primarily attributable to growth in average loan balances. Domestic Card continued to grow and gain market share in new account originations, due in part to recent acquisitions.

Consumer Banking: Our Consumer Banking business generated net income from continuing operations of $224 million in the first quarter of 2012, compared with net income from continuing operations of $215 million in the first quarter of 2011. The increase in earnings was attributable to growth in revenue, which was partially offset by higher non-interest expense and an increase in the provision for credit losses. Growth in revenue stemmed from higher average loan balances resulting from increased auto loan originations over the past year and the half-quarter impact from home loans added in the ING Direct acquisition. The increase in non-interest expense reflected the approximate half-quarter impact of operating expenses associated with ING Direct, merger-related costs related to the ING Direct acquisition, higher infrastructure expenditures resulting from continued investments in our home loan business and growth in auto originations and modestly higher marketing expenditures in our retail banking operations. The increase in the provision for credit losses was largely due to increased loan balances due to growth in auto loan originations, as net charge-offs declined as a result of continued credit performance improvements. Because of the growth in auto loans, we recorded an allowance build in the first quarter of 2012, compared with an allowance release in the first quarter of 2011.

Commercial Banking: Our Commercial Banking business generated net income from continuing operations of $210 million in the first quarter of 2012, compared with net income from continuing operations of $162 million in the first quarter of 2011. The improvement in results for Commercial Banking was attributable to an increase in revenues driven by increased average loan balances as well as loan spreads and a decrease in the provision for credit losses due to improving credit trends. These factors were partially offset by higher non-interest expense resulting from operating costs associated with the increased volume of loan originations in our commercial real estate and commercial and industrial business, increased infrastructure expenditures and the expansion into new markets.

Significant Recent Developments

Acquisition-Related Developments

HSBC Acquisition U.S. Credit Card Business

We completed the transaction in which we acquired substantially all of the assets and assumed liabilities of HSBC s credit card and private-label credit card business in the United States (the HSBC Transaction) for a purchase price of $31.3 billion on May 1, 2012. In the HSBC Transaction, the Company acquired $28.2 billion of credit card receivables and $0.6 billion in other net assets. We used the net proceeds from the equity and debt offerings described above, along with cash sourced from current liquidity, to fund the cash consideration payable in connection with the acquisition of HSBC s U.S credit card business.

Business Outlook

We discuss below our current expectations regarding our total company performance and the performance of each of our business segments over the near-term based on market conditions, the regulatory environment and our business strategies as of the time we filed this Quarterly Report on Form 10-Q. The statements contained in this section are based on our current expectations regarding our outlook for our financial results and business strategies. Our expectations take into account, and should be read in conjunction with, our expectations regarding

7

economic trends and analysis of our business as discussed in Part I Item 1. Business and Part I Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations in our 2011 Form 10-K. Certain statements are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Actual results could differ materially from those in our forward-looking statements. Forward-looking statements do not reflect (i) any change in current dividend or repurchase strategies, (ii) the effect of any acquisitions, divestitures or similar transactions, except for the forward-looking statements specifically discussing the acquisition of ING Direct or of HSBC s U.S. credit card business, or (iii) any changes in laws, regulations or regulatory interpretations, in each case after the date as of which such statements are made. See Forward-Looking Statements in this Quarterly Report on Form 10-Q for more information on the forward-looking statements in this report and Item 1A. Risk Factors in our 2011 Form 10-K for factors that could materially influence our results.

Total Company Expectations

Our strategies and actions are designed to deliver profitable long-term growth through the acquisition and retention of franchise-enhancing customer relationships across our businesses. We believe that franchise-enhancing customer relationships produce strong long-term economics through low credit costs, low customer attrition and a gradual build in loan balances and revenues over time. Examples of franchise-enhancing customer relationships include rewards customers and new partnerships in our Credit Card business, retail deposit customers in our Consumer Banking business and primary banking relationships with commercial customers in our Commercial Banking business. We intend to grow these customer relationships by continuing to invest in our bank infrastructure to allow us to provide more convenient and flexible customer banking options, including a broader range of fee-based and credit products and services, by leveraging our direct bank customer franchise with national reach and by continued marketing investments to attract and retain credit card and auto finance customers and further strengthen our brand.

We believe our actions have created a well-positioned balance sheet and capital and liquidity levels which have provided us with investment flexibility to take advantage of attractive organic growth opportunities and adjust, where we believe appropriate, to changing market conditions. The addition of ING Direct and of the HSBC s U.S. credit card business has grown our loan balances. Although we anticipate strong underlying growth in our Auto Finance, Commercial Banking and Domestic Card segments, we expect modest overall loan growth because of significant run-off portfolios that we acquired in the ING Direct Acquisition and HSBC Transaction. The timing and pace of this modest loan growth will depend on broader economic trends that impact overall consumer and commercial demand.

As noted above, we closed the HSBC Transaction in the second quarter of 2012. We expect that the closing of the HSBC Transaction will have a significant impact on our financial results in the second quarter. While we expect the acquisition to enhance our earnings trajectory and capital generation in the long-term, we anticipate that it will have a substantial negative effect on earnings and capital in the short-term. We anticipate that the largest impact on our earnings for the second quarter of 2012 from the HSBC Transaction, will result from an increase in our provision for credit losses due to an expected significant build in the allowance for loan and lease losses associated with loans acquired in the transaction. Over the next several years, we expect expenses and earnings to be affected by the amortization of intangibles as well as transaction and merger-related expenses.

Business Segment Expectations

Credit Card Business

In Domestic Card, the closing of the HSBC Transaction has added significant new customer relationships and loan portfolios and will affect quarterly trends in loan growth, revenue margin, non-interest expense, charge-off rates and earnings. We anticipate that the run-off of parts of the portfolios acquired in the HSBC Transaction will offset the underlying growth trajectory, resulting in modest loan growth for the segment. We expect to take a credit mark to cover expected losses on delinquent loans in the HSBC portfolio that no longer carry revolving privileges. We

Table of Contents

anticipate the credit mark would absorb most of the HSBC credit losses for the next several quarters, lowering the overall charge-off rate of the Domestic Card segment during that time. When we announced the HSBC Transaction, we planned to take certain actions to bring HSBC customer practices into alignment with our customer practices. We expect that these planned actions will put downward pressure on Domestic Card revenue margin as we implement them over the next several quarters. The overall trends and level of Domestic Card revenue margin will depend upon the competitive environment, the pace and nature of Domestic Card loan growth, and other market forces in addition to the expected impact from our planned customer actions.

Consumer Banking Business

In our Consumer Banking business, we added significant new customer relationships, loans and deposits with the acquisition of ING Direct, and the acquisition will have a significant impact on Consumer Banking loan and deposit growth trajectories. The addition of the ING Direct loan portfolio caused loan yields to decrease. We expect loan yields will decrease again in the second quarter after which we expect them to remain relatively stable because we anticipate loan yield increases from the expected mortgage run-off to be offset by loan yield decreases from a higher mix of prime loans in our Auto Finance business in 2012. We expect that the growth in auto loans will be more than offset by a sizeable run-off of the ING Direct home loan portfolio and the continuing run-off of certain loans in our legacy Home Loan portfolio, which will drive a declining trend in Consumer Banking loan volumes. We expect that seasonal patterns will drive quarterly credit trends throughout the rest of 2012.

Commercial Banking Business

Our Commercial Banking business continues to grow loans, deposits, and revenues as we attract new customers and deepen relationships with existing customers. Although we anticipate some quarterly fluctuations in nonperforming loan and charge-off rates, we expect our Commercial Banking business to continue strong and relatively steady performance trends throughout 2012.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of financial statements in accordance with U.S. GAAP requires management to make a number of judgments, estimates and assumptions that affect the reported amount of assets, liabilities, income and expenses in the consolidated financial statements. Understanding our accounting policies and the extent to which we use management judgment and estimates in applying these policies is integral to understanding our financial statements. We provide a summary of our significant accounting policies in Note 1 Summary of Significant Accounting Policies of our 2011 Form 10-K.

In the MD&A Critical Accounting Policies and Estimates section of our 2011 Form 10-K, we identified the following accounting policies as critical because they require significant judgments and assumptions about highly complex and inherently uncertain matters and the use of reasonably different estimates and assumptions could have a material impact on our reported results of operations or financial condition.

- Loan loss reserves
- Representation and warranty reserve
- Asset impairment
- Fair value
- Derivative and hedge accounting
- Income taxes

We evaluate our critical accounting estimates and judgments on an ongoing basis and update them as necessary based on changing conditions. Management has reviewed and approved these critical accounting policies and has discussed our judgments and assumptions with the Audit and Risk Committee of the Board of Directors. There has been no material changes in the methods used to formulate these critical accounting estimates from those discussed in the MD&A Critical Accounting Policies and Estimates section of our 2011 Form 10-K.

Table of Contents

CONSOLIDATED RESULTS OF OPERATIONS

The section below provides a comparative discussion of our consolidated financial performance for the three months ended March 31, 2012 and 2011. Following this section, we provide a discussion of our business segment results. You should read this section together with our Executive Summary and Business Outlook where we discuss trends and other factors that we expect will affect our future results of operations.

Net Interest Income

Net interest income represents the difference between the interest income and applicable fees earned on our interest-earning assets, which include loans held for investment and investment securities, and the interest expense on our interest-bearing liabilities, which include interest-bearing deposits, senior and subordinated notes, securitized debt and other borrowings. We include in interest income any past due fees on loans that we deem are collectible. Our net interest margin represents the difference between the yield on our interest-earning assets and the cost of our interest-bearing liabilities, including the impact of non-interest bearing funding. We expect net interest income and our net interest margin to fluctuate based on changes in interest rates and changes in the amount and composition of our interest-earning assets and interest-bearing liabilities.

Table 3 below presents, for each major category of our interest-earning assets and interest-bearing liabilities, the average outstanding balances, interest income earned or interest expense incurred, and average yield or cost for the first quarter of 2012 and 2011.

Table of Contents

(1) Past due fees included in interest income totaled approximately $283 million and $245 million for the first quarter of 2012 and 2011, respectively.
(2) Interest income on credit card, auto, home and retail banking loans is reflected in consumer loans. Interest income generated from small business credit card loans also is included in consumer loans.
(3) Amounts attributable to Kohl s under the revenue and loss-sharing arrangement reduced interest income by $222 million for the first quarter of 2012.

Table 4 presents the variances between our net interest income for the first quarter of 2012 and 2011, and the extent to which the variance was attributable to: (i) changes in the volume of our interest-earning assets and interest-bearing liabilities or (ii) changes in the interest rates of these assets and liabilities.

Table 4: Rate/Volume Analysis of Net Interest Income[(1)]

	Three Months Ended March 31, 2012 vs. 2011		
	Total	Variance Due to	
(Dollars in millions)	Variance	Volume	Rate
Interest income:			
Loans held for investment:			
Consumer loans	$ 219	$ 696	$ (477)
Commercial loans	19	46	(27)
Total loans held for investment, including past-due fees	238	742	(504)
Investment securities	(18)	61	(79)
Other	7	18	(11)
Total interest income	227	821	(594)
Interest expense:			
Deposits	(11)	105	(116)
Securitized debt obligations	(60)	(47)	(13)
Senior and subordinated notes	24	18	6
Other borrowings		27	(27)
Total interest expense	(47)	103	(150)
Net interest income	$ 274	$ 718	$ (444)

(1) We calculate the change in interest income and interest expense separately for each item. The change in net interest income attributable to both volume and rates is allocated based on the relative dollar amount of each item.

Net interest income of $3.4 billion for the first quarter of 2012 increased by $274 million, or 9%, from the first quarter of 2011, driven by a 27% increase in average interest-earning assets, which was partially offset by a 14% decline in our net interest margin to 6.20%. The addition of the ING Direct loan portfolio of $40.4 billion, which primarily consisted of consumer loans, and investment security portfolio of $30.2 billion, accounted for approximately $136 million of the $274 million increase in net interest income.

Average Interest-Earning Assets: The increase in average interest-earning assets was attributable to the addition of the ING Direct loan portfolio as well as growth in our legacy loan portfolios from the addition of new credit card accounts and increased purchase volumes and

a significant increase in auto loan originations over twelve months.

Net Interest Margin: The decrease in our net interest margin was attributable to a decline in the average yield on our interest-earning assets, which was partially mitigated by an improvement in our cost of funds. The decline in average yield reflected the shift in the mix of our interest-earning assets as result of the addition of ING Direct assets and temporarily higher cash balances from the recent equity and debt offerings, which had the effect of diluting the net interest margin. The ING Direct interest-earning assets

generally have lower yields than our legacy loan and the investment security portfolios. Our cost of funds continued to benefit from the shift in the mix of our funding to lower cost consumer and commercial banking deposits from higher cost wholesale sources and the decline in deposit interest rates as a result of the continued overall low interest rate environment.

Non-Interest Income

Non-interest income primarily consists of service charges and other customer-related fees, interchange income (net of rewards expense) and other non-interest income. The servicing fees, finance charges, other fees, net of charge-offs and interest paid to third party investors related to our consolidated securitization trusts are reported as a component of non-interest income. We also record the provision for mortgage repurchase losses related to continuing operations in non-interest income. The other component of non-interest income includes gains and losses on derivatives not accounted for in hedge accounting relationships and gains and losses from the sale of investment securities, which we generally do not allocate to our business segments because they relate to centralized asset/liability and market risk management activities undertaken by our Corporate Treasury group.

Table 5 displays the components of non-interest income for the first quarter of 2012 and 2011.

Table 5: Non-Interest Income

	Three Months Ended March 31,	
(Dollars in millions)	**2012**	**2011**
Non-interest income:		
Service charges and other customer-related fees	**$ 415**	$ 525
Interchange fees	**328**	320
Bargain purchase gain[1]	**594**	
Net other-than-temporary impairment (OTTI)	**(14)**	(3)
Other non-interest income:		
Provision for mortgage repurchase losses[2]	**(17)**	(5)
Other	**215**[3]	105
Total other non-interest income	**198**	100
Total non-interest income	**$ 1,521**	$ 942

(1) Represents the excess of the fair value of the net assets acquired in the ING Direct acquisition as of the acquisition date of February 17, 2012 over the consideration transferred.

(2) We recorded a total provision for mortgage repurchase losses of $169 million and $44 million in the first quarter of 2012 and 2011, respectively. The remaining portion of the provision for repurchase losses is included in discontinued operations.

(3) Includes a mark-to-market derivative loss of $78 million related to interest-rate swaps we entered into in 2011 to partially hedge the interest rate risk of the net assets associated with the ING Direct acquisition and income of $162 million related to the sale of Visa stock.

Non-interest income of $1.5 billion for the first quarter of 2012 increased by $579 million, or 61%, from non-interest income of $942 million for the first quarter of 2011. This increase was attributable to the recognition of a bargain purchase gain of $594 million at acquisition of ING direct and income of $162 million related to the sale of Visa stock shares in the first quarter of 2012. The bargain purchase gain represents the excess of the fair value of the net assets acquired in the ING Direct acquisition as of the acquisition date over the consideration transferred. This gain was driven largely by a substantial decline in long-term interest rates between the period shortly after our announcement of the ING Direct acquisition and the closing of the acquisition, which resulted in an increase in the fair value of the acquired assets. We provide additional information on the allocation of the ING Direct purchase price to the fair values of assets acquired and liabilities assumed and the bargain purchase gain in Note 2 Acquisitions.

These income amounts were partially offset by the recognition of expense of $75 million in the first quarter of 2012 to establish a reserve for expected customer refunds attributable to issues associated with cross-selling certain other products to credit card customers and a mark-to-market loss of $78 million recorded in the first quarter of 2012 for interest-rate swaps we entered into in 2011 to partially hedge the interest rate risk of the net assets associated with the ING Direct acquisition. The cumulative mark-to-market loss on these interest-rate swaps, which we terminated in the first quarter of 2012, from inception to termination totaled $355 million. See the Market Risk Profile section below and Note 10 Derivative Instruments and Hedging Activities for additional information on the ING Direct acquisition related hedges.

We also recorded higher other-than-temporary impairment losses of $14 million in the first quarter of 2012, compared with $3 million in the first quarter of 2011. The impairment losses stemmed from deterioration in the credit quality of certain non-agency mortgage-backed securities due to the continued weakness in the housing market. We provide additional information on other-than-temporary impairment recognized on our available-for-sale securities in Note 4 Investment Securities.

Provision for Credit Losses

We build our allowance for loan and lease losses and unfunded lending commitment reserves through the provision for credit losses. Our provision for credit losses in each period is driven by charge-offs and the level of allowance for loan and lease losses that we determine is necessary to provide for probable credit losses inherent in our loan portfolio as of each balance sheet date.

We recorded a provision for credit losses of $573 million in the first quarter of 2012, compared with $534 million in the first quarter of 2011. The increase in the provision was driven primarily by the year-over-year increase in legacy loan balances and smaller allowance releases as a result of the stabilization of the improvement in credit trends. The net charge-off rate steadily declined, falling to 2.04% in the first quarter of 2012, from 2.69% in the fourth quarter of 2011 and 3.66% in the first quarter of 2011. The net charge-off rate excluding acquired loans was 2.40% in the first quarter of 2012, compared with 2.79% in the fourth quarter of 2011 and 3.82% in the first quarter of 2011.

We provide additional information on the provision for credit losses and changes in the allowance for loan and lease losses under the Credit Risk Profile Summary of Allowance for Loan and Lease Losses section below.

Non-Interest Expense

Non-interest expense consists of ongoing operating costs, such as salaries and associated employee benefits, communications and other technology expenses, supplies and equipment and occupancy costs, and miscellaneous expenses. Marketing expenses are also included in non-interest expense. Table 6 displays the components of non-interest expense for the first quarter of 2012 and 2011.

Table of Contents

Table 6: Non-Interest Expense

	Three Months Ended March 31,	
(Dollars in millions)	**2012[1]**	**2011**
Non-interest expense:		
Salaries and associated benefits	**$ 891**	$ 741
Marketing	**321**	276
Communications and data processing	**173**	164
Supplies and equipment	**150**	135
Occupancy	**123**	119
Other non-interest expense:		
Professional services	**344**	249
Collections	**136**	151
Bankcard association assessments	**110**	82
Amortization of intangibles	**60**	56
Other	**196**	189
Total other non-interest expense	**846**	727
Total non-interest expense	**$ 2,504**	$ 2,162

[1] Includes transaction costs and merger-related expenses related to the ING Direct acquisition of $65 million, of which $37 million represented transaction costs. We provide additional information on the ING Direct acquisition in Note 2 Acquisitions.

Non-interest expense of $2.5 billion for the first quarter of 2012 increased by $342 million, or 16%, from the first quarter of 2011. The increase was primarily due to higher operating expenses related to our recent acquisitions, including an estimated $150 million of half-quarter operating expenses attributable to ING Direct, increased marketing expenditures, primarily related to reward products in our Credit Card business and higher infrastructure costs from our continued investments in our home loan business and growth in auto originations.

Income Taxes

We recorded an income tax provision based on income from continuing operations of $353 million (19.0% effective income tax rate) in the first quarter of 2012, compared with an income tax provision of $354 million (25.5% effective income tax rate) in the first quarter of 2011. The decrease in our effective tax rate in the first quarter of 2012 from the first quarter of 2011 was primarily due to the ING Direct bargain purchase gain of $594 million, which was non-taxable. In addition, we recorded tax benefits of $6 million and $42 million in the first quarter of 2012 and 2011, respectively, related to the resolution of certain discrete tax issues and audits. Our effective income tax rate, excluding both the impact of the non-taxable bargain purchase gain and the benefit from these discrete tax issues and audits, was 28.4% and 28.6% in the first quarter of 2012 and 2011, respectively.

We provide additional information on items affecting our income taxes and effective tax rate in our 2011 Form 10-K under Note 18 Income Taxes.

Loss from Discontinued Operations, Net of Tax

Loss from discontinued operations reflects ongoing costs, which primarily consist of mortgage loan repurchase representation and warranty charges, related to the mortgage origination operations of GreenPoint s wholesale mortgage banking unit, which we closed in 2007.

We recorded a pre-tax provision for mortgage repurchase losses of $169 million in the first quarter of 2012, of which $153 million ($97 million, net of tax) was included in discontinued operations. In comparison, we recorded a pre-tax provision for mortgage repurchase losses of $44 million in the first quarter of 2011, of which $39 million ($29 million, net of tax) was included in discontinued operations. The increase in the provision for

repurchase losses was primarily due to a GSE settlement to resolve present and future representation and warranty claims. We had already established an estimated reserve related to the GSE claims; however, we increased this reserve by $95 million in the first quarter of 2012 based on the final settlement amount, which we paid subsequent to the end of the first quarter of 2012.

We provide additional information on the provision for mortgage repurchase losses and the related reserve for potential representation and warranty claims in Consolidated Balance Sheet Analysis Potential Mortgage Representation and Warranty Liabilities.

BUSINESS SEGMENT FINANCIAL PERFORMANCE

Our principal operations are currently organized into three major business segments, which are defined based on the products and services provided or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. The operations of acquired businesses have been integrated into our existing business segments. Certain activities that are not part of a segment, such as management of our corporate investment portfolio and asset/liability management by our centralized Corporate Treasury group are included in the Other category.

The results of our individual businesses, which we report on a continuing operations basis, reflect the manner in which management evaluates performance and makes decisions about funding our operations and allocating resources. Our business segment results are intended to reflect each segment as if it were a stand-alone business. We use an internal management and reporting process to derive our business segment results. Our internal management and reporting process employs various allocation methodologies, including funds transfer pricing, to assign certain balance sheet assets, deposits and other liabilities and their related revenue and expenses directly or indirectly attributable to each business segment. See Note 20 Business Segments of our 2011 Form 10-K for information on the allocation methodologies used to derive our business segment results.

We may periodically change our business segments or reclassify business segment results based on modifications to our management reporting methodologies and changes in organizational alignment. In the first quarter of 2012, we re-aligned the reporting of our Commercial Banking business to reflect the operations on a product basis rather than by customer type. As a result of this re-alignment, we now report three product categories: commercial and multifamily real estate, commercial and industrial loans and small-ticket commercial real estate, which is a run-off portfolio. We previously reported four categories within our Commercial Banking business: commercial and multifamily real estate, middle market, specialty lending and small-ticket commercial real estate. Middle market and specialty lending related products are included in commercial and industrial loans. All tax-related commercial real estate investments, some of which were previously included in the Other segment, are now included in the commercial and multifamily real estate category of our Commercial Banking business. Prior period amounts have been recast to conform to the current period presentation.

We summarize our business segment results for the three months ended March 31, 2012 and 2011 in the tables below and provide a comparative discussion of these results. We also discuss changes in our financial condition and credit performance statistics as of March 31, 2012, compared with December 31, 2011. See Note 14 Business Segments of this Report for a reconciliation of our business segment results to our consolidated results. Information on the outlook for each of our business segments is presented above under Executive Summary and Business Outlook.

Credit Card Business

Our Credit Card business generated net income from continuing operations of $566 million in the first quarter of 2012, compared with $643 million in the first quarter of 2011. The primary sources of revenue for our Credit Card business are net interest income and non-interest income from customers and interchange fees. Expenses primarily consist of ongoing operating costs, such as salaries and associate benefits, communications and other technology expenses, supplies and equipment, occupancy costs, as well as marketing expenses.

Table of Contents

Table 7 summarizes the financial results of our Credit Card business, which is comprised of Domestic Card, including installment loans, and International Card operations, and displays selected key metrics for the periods indicated.

Table 7: Credit Card Business Results

	Three Months Ended March 31,		
(Dollars in millions)	2012	2011	Change
Selected income statement data:			
Net interest income[1]	**$ 1,992**	$ 1,941	**3%**
Non-interest income	**598**	674	**(11)**
Total revenue	**2,590**	2,615	**(1)**
Provision for credit losses[1]	**458**	450	**2**
Non-interest expense	**1,268**	1,178	**8**
Income from continuing operations before income taxes	**864**	987	**(12)**
Income tax provision	**298**	344	**(13)**
Income from continuing operations, net of tax	**$ 566**	$ 643	**(12)%**
Selected performance metrics:			
Average loans held for investment	**$ 62,432**	$ 60,586	**3%**
Average yield on loans held for investment[2]	**14.41%**	14.68%	**(27)bps**
Revenue margin[1] [3]	**16.59**	17.26	**(67)**
Net charge-off rate[1] [4]	**4.14**	6.13	**(199)**
Purchase volume[5]	**$ 34,498**	$ 27,797	**23%**

	March 31, 2012	December 31, 2011	Change
Selected period-end data:			
Loans held for investment	**$ 61,476**	$ 65,075	**(6)%**
30+ day delinquency rate[6]	**3.51%**	3.86%	**(35)bps**
Allowance for loan and lease losses[1]	**$ 2,671**	$ 2,847	**(6)%**

(1) Amounts attributable to Kohl s under the revenue and loss-sharing arrangement reduced interest income by $222 million, reduced the provision for credit losses by $193 million and reduced net charge-offs by $40 million in the first quarter of 2012. The expected loss reimbursement from Kohl s netted against our allowance for loan and lease losses was approximately $153 million and $139 million as of March 31, 2012 and December 31, 2011, respectively.

(2) Average yield on loans held for investment is calculated by dividing annualized interest income for the period by average loans held for investment during the period.

(3) Revenue margin is calculated by dividing revenues for the period by average loans held for investment during the period for the specified loan category.

(4) The net charge-off rate is calculated by dividing net charge-offs for the period by average loans held for investment during the period for the specified loan category.

(5) Consists of purchase transactions for the period, net of returns. Excludes cash advance transactions.

(6) The delinquency rate is calculated by loan category by dividing 30+ day delinquent loans as of the end of the period by period-end loans held for investment for the specified loan category. The 30+ day performing delinquency rate is the same as the 30+ day delinquency rate for our Credit Card business, as credit card loans remain on accrual status until the loan is charged-off.

Key factors affecting the results of our Credit Card business for the first quarter of 2012, compared with first quarter of 2011 included the following:

Net Interest Income: Net interest income increased by $51 million, or 3%, in the first quarter of 2012. The increase in net interest income was primarily attributable to loan growth. Loan yields were stable as lower yielding Kohl s loans were offset by higher yields across the rest of the portfolio.

Non-Interest Income: Non-interest income decreased by $76 million, or 11%, in the first quarter of 2012. The decrease is primarily driven by the $75 million reserve established in the first quarter of 2012 which reflects an upcoming reimbursement we expect to provide customers affected by certain cross-sell sale practices.

Provision for Credit Losses: The provision for credit losses related to our Credit Card business increased by $8 million to $458 million in the first quarter of 2012. The increase was primarily driven by a lower allowance release of $176 million in the first quarter of 2012 compared to $465 million in the first quarter of 2011 due to the expected stabilization of credit, which was mostly offset by improved net charge-offs of $646 million in the first quarter of 2012, compared with $929 million in the first quarter of 2011 due to improved credit performance across all of our Credit Card segment.

Non-Interest Expense: Non-interest expense increased by $90 million, or 8%, in the first quarter of 2012. The increase in non-interest expense was primarily attributable to increased marketing expenditures. In addition, operating costs increased primarily due to merger-related expenses from the HSBC Transaction.

Total Loans: Period-end loans in our Credit Card business decreased by $3.6 billion, or 6%, to $61.5 billion as of March 31, 2012, from $65.1 billion as of December 31, 2011. The decline reflected normal seasonal credit card pay downs, as well as the continued run-off of our installment loan portfolio.

Charge-off and Delinquency Statistics: The net charge-off rate decreased to 4.14% in the first quarter of 2012 from 6.13% in the first quarter of 2011. The 30+ day delinquency rate decreased to 3.51% as of March 31, 2012, from 3.86% as of December 31, 2011. The improvement in the net charge-off and delinquency rates reflects the impact of improved credit quality across our credit card portfolio, tighter underwriting standards implemented over the last several years and ongoing stabilization of credit performance in the portfolio.

Domestic Card Business

Domestic Card generated net income from continuing operations of $515 million in the first quarter of 2012, compared with net income from continuing operations of $654 million in the first quarter of 2011. Since our Domestic Card business currently accounts for the substantial majority of our Credit Card business, the key factors driving the results for this division are similar to the key factors affecting our total Credit Card business. The decrease in Domestic Card net income from continuing operations in the first quarter of 2012 compared with first quarter of 2011 was driven by: (1) an increase in the provision for credit losses due to a lower allowance release of $170 million in the first quarter of 2012 compared to a $574 million allowance release in the first quarter of 2011 which was partially offset by lower net charge-offs of $531 million in the first quarter of 2012 compared to $804 million in the first quarter of 2011, (2) an increase in non-interest expense primarily due to increased marketing expenses as we continue to experience growth opportunities in certain customer segments and (3) a decrease in non-interest income primarily as a result of a $75 million reserve build in cross-sell for anticipated customer refunds associated with past cross-selling activities.

Table of Contents

Table 7.1 summarizes the financial results for Domestic Card and displays selected key metrics for the periods indicated.

Table 7.1: Domestic Card Business Results

(Dollars in millions)	Three Months Ended March 31, 2012	2011	Change
Selected income statement data:			
Net interest income	**$ 1,713**	$ 1,651	**4%**
Non-interest income	**497**	583	**(15)**
Total revenue	**2,210**	2,234	**(1)**
Provision for credit losses	**361**	230	**57**
Non-interest expense	**1,052**	990	**6**
Income from continuing operations before income taxes	**797**	1,014	**(21)**
Income tax provision	**282**	360	**(22)**
Income from continuing operations, net of tax	**$ 515**	$ 654	**(21)%**
Selected performance metrics:			
Average loans held for investment	**$ 54,131**	$ 51,889	**4%**
Average yield on loans held for investment[1]	**14.11%**	14.42%	**(31)bps**
Revenue margin[2]	**16.33**	17.22	**(89)**
Net charge-off rate[3]	**3.92**	6.20	**(228)**
Purchase volume[4]	**$ 31,417**	$ 25,024	**(26)%**

	March 31, 2012	December 31, 2011	Change
Selected period-end data:			
Loans held for investment	**$ 53,173**	$ 56,609	**(6)%**
30+ day delinquency rate[5]	**3.25%**	3.66%	**(41)bps**
Allowance for loan and lease losses	**$ 2,205**	$ 2,375	**(7)%**

[1] Average yield on loans held for investment is calculated by dividing annualized interest income for the period by average loans held for investment during the period.

[2] Revenue margin is calculated by dividing revenues for the period by average loans held for investment during the period for the specified loan category.

[3] The net charge-off rate is calculated by dividing net charge-offs for the period by average loans held for investment during the period for the specified loan category.

[4] Consists of purchase transactions for the period, net of returns. Excludes cash advance transactions.

[5] The delinquency rate is calculated by loan category by dividing 30+ day delinquent loans as of the end of the period by period-end loans held for investment for the specified loan category. The 30+ day performing delinquency rate is the same as the 30+ day delinquency rate for our Credit Card business, as credit card loans remain on accrual status until the loan is charged-off.

International Card Business

Our International Card business generated net income from continuing operations of $51 million in the first quarter of 2012, compared with a net loss from continuing operations of $11 million in the first quarter of 2011. The increase in International Card net income in the first quarter of 2012 was driven primarily by: (1) a decrease in provision for loan losses as a result of an allowance release of $6 million in the first quarter of 2012 compared to an allowance build of $109 million in first quarter of 2011 due to the addition of the Hudson s Bay Company (HBC) loan portfolio, and lower net charge-offs of $115 million in the first quarter of 2012 compared to $125 million in the first quarter of 2011 attributable to the improvement in credit environment in Canada and the U.K. and (2) partially offset by an increase in non-interest expense of $28 million from higher operating expenses in both the U.K. and Canada.

Table of Contents

Table 7.2 summarizes the financial results for International Card and displays selected key metrics for the periods indicated.

Table 7.2: International Card Business Results

(Dollars in millions)	Three Months Ended March 31, 2012	2011	Change

Income from continuing operations, net of tax	**$ 51**	$ (11)	**564%**
Selected performance metrics:			
Average loans held for investment	**$ 8,301**	$ 8,697	**(5)%**
Average yield on loans held for investment[1]	**16.38%**	16.28%	**10 bps**
Revenue margin[2]	**18.31**	17.52	**79**
Net charge-off rate[3]	**5.52**	5.74	**(22)**
Purchase volume[4]	**$ 3,081**	$ 2,773	**11%**
	March 31, 2012	**December 31, 2011**	**Change**
Selected period-end data:			
Loans held for investment	**$ 8,303**	$ 8,466	**(2)%**
30+ day delinquency rate[5]	**5.14%**	5.18%	**(4)bps**
Allowance for loan and lease losses	**$ 466**	$ 472	**(1)%**

(1) Average yield on loans held for investment is calculated by dividing annualized interest income for the period by average loans held for investment during the period.

(2) Revenue margin is calculated by dividing revenues for the period by average loans held for investment during the period for the specified loan category.

(3) The net charge-off rate is calculated by dividing net charge-offs for the period by average loans held for investment during the period for the specified loan category.

(4) Consists of purchase transactions for the period, net of returns. Excludes cash advance transactions.

(5) The delinquency rate is calculated by loan category by dividing delinquent loans as of the end of the period by period-end loans held for investment for the specified loan category. The 30+ day performing delinquency rate is the same as the 30+ day delinquency rate for our Credit Card business, as credit card loans remain on accrual status until the loan is charged-off.

Consumer Banking Business

Our Consumer Banking business generated net income from continuing operations of $224 million in the first quarter of 2012, compared with net income from continuing operations of $215 million in the first quarter of 2011. The primary sources of revenue for our Consumer Banking business are net interest income from loans and deposits and non-interest income from customer fees. Expenses primarily consist of ongoing operating costs, such as salaries and associated benefits, communications and other technology expenses, supplies and equipment and occupancy costs.

20

Table of Contents

On February 17, 2012, we acquired ING Direct, and the substantial majority of the lending and retail deposit businesses acquired are reported in the Consumer Banking segment. The acquisition resulted in the addition of loans with carrying value of $40.4 billion and deposits of $84.4 billion at acquisition.

Table 8 summarizes the financial results of our Consumer Banking business and displays selected key metrics for the periods indicated.

Deposits	**176,007**	88,540	**99**
Loans serviced for others	**17,586**	17,998	**(2)**

(1) Loans held for investment includes loans acquired in the ING Direct and Chevy Chase Bank business combinations. The carrying value and outstanding unpaid principal balance of consumer banking acquired loans accounted for based on expected cash flows at acquisition was $42.7 billion and $44.3 billion as of March 31, 2012, respectively, and $4.2 billion and $5.2 billion, respectively, as of December 31, 2011. The average balance of consumer banking loans held for investment excluding the carrying value of acquired loans was $33.7 billion and $29.4 billion in the first quarter of 2012 and 2011, respectively.

(2) The net charge-off rate is calculated by loan category by dividing net charge-offs for the period by average loans held for investment during the period for the specified loan category.

(3) The delinquency rate is calculated by loan category by dividing delinquent loans as of the end of the period by period-end loans held for investment for the specified loan category.

(4) The 30+ day performing delinquency rate based on the contractual past due status for acquired loans was 3.08% as of March 31, 2012 and 2.94% as of December 31, 2011.

(5) Nonperforming loans generally include loans that have been placed on nonaccrual status and certain restructured loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulty. The nonperforming loan rate is calculated by loan category by dividing nonperforming loans as of the end of the period by period-end loans held for investment for the specified loan category.

(6) Nonperforming assets consist of nonperforming loans and real estate owned (REO). The nonperforming asset rate is calculated by loan category by dividing nonperforming assets as of the end of the period by period-end loans held for investment, REO, and other foreclosed assets for the specified loan category.

Net income generated by our Consumer Banking business of $224 million for the first quarter of 2012 represented an increase of $9 million over the first quarter of 2011. Key factors contributing to the increase in the results of our Consumer Banking business for the first quarter of 2012, compared with the first quarter of 2011 included the following:

Net Interest Income: Net interest income increased by $305 million, or 31%, in the first quarter of 2012. The increase was primarily attributable to the 64% increase in average loans held for investment due to higher originations in auto loans over the past twelve months as well as the acquisition of ING Direct home loans in the first quarter of 2012. The favorable impact more than offset the decline in loan yields, which was attributable to the lower yielding ING Direct portfolio.

Non-Interest Income: Non-interest income decreased by $10 million, or 5%, in the first quarter 2012. The decrease was primarily attributable to the implementation of the Dodd-Frank amendment related to debit interchange fees in late 2011. The decrease was partially offset by the addition of ING Direct deposits in the first quarter of 2012.

Provision for Credit Losses: The increase in the provision for credit losses was due to an allowance build of $66 million in the first quarter of 2012 primarily as a result of higher auto loan originations compared with an allowance release of $34 million in the same prior year quarter. The increase in provision was partially offset by improved net charge-offs attributable to continued improvement in the credit and economic conditions.

Non-Interest Expense: Non-interest expense increased by $203 million, or 27%, in the first quarter of 2012. The increase was largely attributable to the on-going operating expenses of ING Direct, the associated merger-related expenses for the acquisition, higher infrastructure expenditure resulting from continued investments in the home loan business and growth in auto originations.

Total Loans: Period-end loans held for investment in the Consumer Banking business grew by $41.0 billion, or 113%, to $77.3 billion as of March 31, 2012, from $36.3 billion as of December 31, 2011, primarily due to the acquisition of ING Direct home loans of $40.4 billion and increased originations in auto loans, partially offset by the continued run-off of our legacy home loan portfolios.

Deposits: Period-end deposits in the Consumer Banking business increased by $87.5 billion, or 99%, to $176.0 billion as of March 31, 2012, from $88.5 billion as of December 31, 2011, primarily due to the addition of ING Direct deposits of $84.4 billion and a slight

increase in deposits in our retail branch franchise.

Table of Contents

Charge-off and Delinquency Statistics: The net charge-off and delinquency rates for the Consumer Banking business, improved during the first quarter of 2012 as a result of the improved economic environment, the addition of the ING Direct home loans portfolio and continued credit improvement on new auto loan originations. The net charge-off rate decreased to 0.77% for the first quarter of 2012, down from 1.57% for the prior year quarter. The 30+ day delinquency rate, which was 2.25% as of March 31, 2012, has declined from a rate of 5.99% as of December 31, 2011.

Commercial Banking Business

Our Commercial Banking business generated net income from continuing operations of $210 million in the first quarter of 2012, compared with net income from continuing operations of $162 million in first quarter of 2011. The primary sources of revenue for our Commercial Banking business are net interest income from loans and deposits and non-interest income from customer fees. Expenses primarily consist of ongoing operating costs, such as salaries and associated benefits, communications and other technology expenses, supplies and equipment and occupancy costs. Because we have some tax-related commercial investments that generate tax-exempt income or tax credits, we make certain reclassifications to our Commercial Banking business results to present revenues on a taxable-equivalent basis.

(1) Loans held for investment includes loans acquired in the ING Direct and Chevy Chase Bank business combinations. The carrying value and outstanding unpaid principal balance of commercial banking acquired loans accounted for based on

Table of Contents

expected cash flows at acquisition was $470 million and $542 million as of March 31, 2012, respectively, and $479 million and $546 million, respectively, as of December 31, 2011. The average balance of commercial banking loans held for investment excluding the carrying value of acquired loans was $33.5 billion and $29.5 billion in the first quarter of 2012 and 2011, respectively.

(2) The net charge-off rate is calculated by loan category by dividing net charge-offs for the period by average loans held for investment during the period for the specified loan category.

(3) The nonperforming loan rate is calculated by loan category by dividing nonperforming loans as of the end of the period by period-end loans held for investment for the specified loan category.

(4) Nonperforming loans generally include loans that have been placed on nonaccrual status and certain restructured loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulty.

(5) The nonperforming asset rate is calculated by loan category by dividing nonperforming assets as of the end of the period by period-end loans held for investment, REO, and other foreclosed assets for the specified loan category.

(6) Nonperforming assets consist of nonperforming loans and REO.

Key factors affecting the results of our Commercial Banking business for the first quarter of 2012, compared with the first quarter of 2011 included the following:

Net Interest Income: Our Commercial Banking business experienced an increase in net interest income of $55 million, or 15% in the first quarter of 2012. The increase was primarily driven by higher deposit and loan balances.

Non-Interest Income: Non-interest income increased by $14 million, or 20% in the first quarter of 2012 largely attributable to growth in fees from ancillary services.

Provision for Credit Losses: The provision for credit losses decreased by $53 million in the first quarter of 2012. The significant reduction in the provision for credit losses was due to lower charge-offs and higher allowance release in the first quarter of 2012 of $79 million compared to the allowance release in the first quarter of 2011 of $45 million.

Non-Interest Expense: Non-interest expense increased by $49 million, or 23%, in the first quarter of 2012. The increase was due to increase in expenses due to higher originations in our commercial real estate and commercial and industrial businesses, expansion into new markets and infrastructure investments.

Total Loans: Period-end loans in the Commercial Banking business increased by $579 million, or 2%, in the first quarter of 2012 to $34.9 billion as of March 31, 2012, from $34.3 billion as of December 31, 2011. The increase was driven by stronger loan originations in the commercial and industrial and commercial real estate businesses, which was partially offset by the continued run-off of the small-ticket commercial real estate loan portfolio.

Deposits: Period-end deposits in the Commercial Banking business increased by $1.4 billion, or 5%, to $28.0 billion as of March 31, 2012 from $26.7 billion as of December 31, 2011, driven by our strategy to strengthen existing relationships and increase liquidity from commercial customers.

Charge-off Statistics: Credit metrics in our Commercial Banking business significantly improved in the first quarter of 2012 as a result of the improved economic environment. The net charge-off rate decreased to 0.19% in the first quarter of 2012 from 0.80% in the first quarter of 2011. The improvement in the net charge-off rate was attributable to improving credit trends and strengthening of underlying collateral values which is lowering loss severities and creating opportunities for recoveries on previously charged-off loans.

Table of Contents

CONSOLIDATED BALANCE SHEET ANALYSIS AND CREDIT PERFORMANCE

Total assets of $294.5 billion as of March 31, 2012 increased by $88.5 billion, or 43%, from $206.0 billion as of December 31, 2011. Total liabilities of $257.5 billion as of March 31, 2012, increased by $81.1 billion, or 46%, from $176.4 billion as of December 31, 2011. Stockholders equity increased by $7.3 billion during the first three months of 2012, to $37.0 billion as of March 31, 2012 from $29.7 billion as of December 31, 2011. The increase in stockholders equity was primarily attributable to our net income of $1.4 billion in the first quarter of 2012 and the $5.8 billion in equity issuances in the first quarter of 2012.

Following is a discussion of material changes in the major components of our assets and liabilities during the first three months of 2012.

Investment Securities

Our investment securities portfolio, which had a fair value of $60.8 billion and $38.8 billion, as of March 31, 2012 and December 31, 2011, respectively, consists of the following: U.S. Treasury and U.S. agency debt obligations; agency and non-agency mortgage-backed securities; other asset-backed securities collateralized primarily by credit card loans, auto loans, student loans, auto dealer floor plan inventory loans, equipment loans and home equity lines of credit; municipal securities; foreign government/agency bonds; covered bonds; and limited Community Reinvestment Act (CRA) equity securities. Our investment securities portfolio continues to be heavily concentrated in securities that generally have lower credit risk and high credit ratings, such as securities issued and guaranteed by the U.S. Treasury and government sponsored enterprises or agencies. Our investments in U.S. Treasury and agency securities, based on fair value, represented 72% of our total investment securities portfolio as of March 31, 2012, compared with 69% as of December 31, 2011.

All of our investment securities were classified as available for sale as of March 31, 2012 and reported in our consolidated balance sheet at fair value. Table 10 presents the amortized cost and fair value for the major categories of our investment securities as of March 31, 2012 and December 31, 2011.

Table 10: Investment Securities

	March 31, 2012		December 31, 2011	
(Dollars in millions)	Amortized Cost	Fair Value	Amortized Cost	Fair Value
U.S. Treasury debt obligations	**$ 2,048**	**$ 2,053**	$ 115	$ 124
U.S. Agency debt obligations[1]	**172**	**179**	131	138
Residential mortgage-backed securities (RMBS):

Non-agency	**4,069**	**3,946**	1,340	1,162
Total RMBS	**40,850**	**41,206**	26,320	26,650
Commercial mortgage-backed securities (CMBS):				
Agency[2]	**4,337**	**4,365**	697	711
Non-agency	**1,195**	**1,220**	459	476
Total CMBS	**5,532**	**5,585**	1,156	1,187
Asset-backed securities[3]	**10,207**	**10,239**	10,119	10,150
Other securities[4]	**1,508**	**1,548**	462	510
Total securities available for sale	**$ 60,317**	**$ 60,810**	$ 38,303	$ 38,759

(1) Primarily consists of debt securities issued by Fannie Mae and Freddie Mac with amortized costs of $130 million as of both March 31, 2012 and December 31, 2011, and fair values of $136 million and $137 million, as of March 31, 2012 and December 31, 2011, respectively.

(2) Consists of MBS issued by Fannie Mae, Freddie Mac and Ginnie Mae with amortized costs of $15.5 billion, $10.4 billion, and $15.2 billion and $12.3 billion $8.9 billion and $4.5 billion, respectively, as of March 31, 2012 and December 31, 2011, respectively, and fair values of $15.7 billion, $10.6 billion, and $15.3 billion and $12.6 billion, $9.1 billion and $4.5 billion, respectively, as of March 31, 2012 and December 31, 2011, respectively. The book value of Fannie Mae, Freddie Mac and Ginnie Mae investments exceeded 10% of our stockholders equity as of March 31, 2012.

(3) Consists of securities collateralized by credit card loans, auto dealer floor plan inventory loans and leases, auto loans, student loans, equipment loans, and other. The distribution among these asset types was approximately 75% credit card loans, 12% auto dealer floor plan inventory loans and leases, 6% auto loans, 2% student loans, 2% equipment loans, and 3% other as of March 31, 2012. In comparison, the distribution was approximately 75% credit card loans, 11% auto dealer floor plan inventory loans and leases, 6% auto loans, 4% student loans, 2% equipment loans, and 2% other as of December 31, 2011. Approximately 85% of the securities in our asset-backed security portfolio were rated AAA or its equivalent as of March 31, 2012, compared with 86% as of December 31, 2011.

(4) Consists of foreign government/agency bonds, covered bonds, municipal securities and equity investments, primarily related to CRA activities.

Investment securities increased by $22.1 billion, or 57%, in the first quarter of 2012 to $60.8 billion as of March 31, 2012, from $38.8 billion as of December 31, 2011. The increase was primarily attributable to the acquisition of ING Direct which included investment securities of $30.2 billion at acquisition.

We sold approximately $7.3 billion of investment securities, consisting predominantly of agency MBS and FDIC notes in the first quarter of 2012. We recorded a net gain of $11 million on the sale of these securities. We provide additional information in Market Risk Profile.

Unrealized gains and losses on our available-for-sale securities are recorded net of tax as a component of accumulated other comprehensive income (AOCI). We had gross unrealized gains of $721 million and gross unrealized losses of $228 million on available-for sale securities as of March 31, 2012, compared with gross unrealized gains of $683 million and gross unrealized losses of $227 million on available-for sale securities as of December 31, 2011. The substantial majority of the gross unrealized losses as of March 31, 2012 related to non-agency residential MBS. Of the $228 million gross unrealized losses as of March 31, 2012, $125 million related to securities that had been in a loss position for more than 12 months.

We recognized net OTTI on debt securities of $14 million in the first quarter of 2012. In comparison, we recognized net OTTI on investment securities of $3 million in the first quarter of 2011, which was due in part to the deterioration in the credit performance and outlook of certain non-agency securities as a result of continued weaknesses in the housing market.

Table of Contents

We provide additional information on our available-for-sale securities in Note 4 Investment Securities.

Credit Ratings

Our investment securities portfolio continues to be heavily concentrated in securities that generally have lower credit risk and high credit ratings, such as securities issued and guaranteed by the U.S. Treasury and government sponsored enterprises or agencies. Approximately 91% of our total investment securities portfolio was rated AA+ or its equivalent, or better as of both March 31, 2012 and December 31, 2011, while approximately 6% and 4% were below investment grade as of March 31, 2012 and December 31, 2011, respectively. We categorize the credit ratings of our investment securities based on the lowest credit rating as issued by the rating agencies S&P, Moody s Investors Service (Moody s) and Fitch Ratings (Fitch).

Table 11 provides information on the credit ratings of our non-agency residential MBS, non-agency commercial MBS and asset-backed securities, which accounted for the substantial majority of the unrealized losses related to our investment securities portfolio as of March 31, 2012 and December 31, 2011.

Table 11: Non-Agency Investment Securities Credit Ratings

	March 31, 2012				December 31, 2011			
(Dollars in millions)	**Amortized Cost**	**AAA**	**Other Investment Grade**	**Below Investment Grade or Not Rated**	**Amortized Cost**	**AAA**	**Other Investment Grade**	**Below Investment Grade or Not Rated**

Total Loans

Table 12 summarizes loans held for investment, net of the allowance for loan and lease losses, as of March 31, 2012 and December 31, 2011.

Table 12: Net Loans Held for Investment

	March 31, 2012			December 31, 2011		
(Dollars in millions)	**Total Loans Held For Investment**	**Allowance**	**Net Loans Held For Investment**	**Total Loans Held For Investment**	**Allowance**	**Net Loans Held For Investment**
Credit Card	**$ 61,476**	**$ 2,671**	**$ 58,805**	$ 65,075	$ 2,847	$ 62,228
Consumer Banking	**77,300**	**718**	**76,582**	36,315	652	35,663
Commercial Banking	**34,906**	**636**	**34,270**	34,327	715	33,612
Other	**140**	**35**	**105**	175	36	139
Total	**$ 173,822**	**$ 4,060**	**$ 169,762**	$ 135,892	$ 4,250	$ 131,642

Total loans held for investment increased by $37.9 billion, or 28%, in the first quarter of 2012 to $173.8 billion as of March 31, 2012, from $135.9 billion as of December 31, 2011. The increase was primarily attributable to the acquisition of ING Direct which included loans of $40.4 billion. Partially offsetting the increase in loans was the continued expected run-off of loans in businesses we exited or repositioned early in the economic recession, other loan pay downs and charge-offs. The run-off portfolios include installment loans in our Credit Card business, home loans in our Consumer Banking business and small-ticket commercial real estate loans in our Commercial Banking business. We provide additional information on the composition of our loan portfolio and credit quality below in Credit Risk Profile.

Deposits

Our deposits have become our largest source of funding for our operations and asset growth. Total deposits increased by $88.3 billion, or 69%, in the first quarter of 2012, to $216.5 billion as of March 31, 2012, from $128.2 billion as of December 31, 2011. The increase in deposits reflects the addition of $84.4 billion in deposits from the ING Direct acquisition and increased retail marketing efforts to attract new business and continued strategy to leverage our bank outlets to attract lower cost deposit funding. We provide additional information on the composition of our deposits, average outstanding balances, interest expense and yield below in Liquidity Risk Profile.

Senior and Subordinated Notes and Other Borrowings

Senior and subordinated notes and other borrowings decreased to $17.4 billion as of March 31, 2012, from $23.0 billion as of December 31, 2011. The $5.6 billion decrease in our debt, which excludes securitized debt obligations, was primarily attributable to an approximately $5.8 billion decrease in short-term FHLB advances offset by an increase of $1.0 billion in unsecured senior debt. We provide additional information on our borrowings in Note 9 Deposits and Borrowings.

Securitized Debt Obligations

Borrowings owed to securitization investors decreased by $1.0 billion to $15.5 billion as of March 31, 2012, from $16.5 billion as of December 31, 2011. This decrease was attributable to pay downs of the loans underlying the consolidated non-credit card securitization trusts and the scheduled maturities of the debt within our credit card securitization trusts.

Potential Mortgage Representation & Warranty Liabilities

In recent years, we acquired three subsidiaries that originated residential mortgage loans and sold them to various purchasers, including purchasers who created securitization trusts. These subsidiaries are Capital One Home Loans, which was acquired in February 2005; GreenPoint Mortgage Funding, Inc. (GreenPoint), which was acquired in December 2006 as part of the North Fork acquisition; and Chevy Chase Bank, which was acquired in February 2009 and subsequently merged into CONA.

In connection with their sales of mortgage loans, the subsidiaries entered into agreements containing varying representations and warranties about, among other things, the ownership of the loan, the validity of the lien securing the loan, the loan s compliance with any applicable loan criteria established by the purchaser, including underwriting guidelines and the ongoing existence of mortgage insurance, and the loan s compliance with applicable federal, state and local laws. The representations and warranties do not address the credit performance of the mortgage loans, but mortgage loan performance often influences whether a claim for breach of representation and warranty will be asserted and has an effect on the amount of any loss in the event of a breach of a representation or warranty.

Each of these subsidiaries may be required to repurchase mortgage loans in the event of certain breaches of these representations and warranties. In the event of a repurchase, the subsidiary is typically required to pay the then unpaid principal balance of the loan together with interest and certain expenses (including, in certain cases, legal costs incurred by the purchaser and/or others). The subsidiary then recovers the loan or, if the loan has been foreclosed, the underlying collateral. The subsidiary is exposed to any losses on the repurchased loans after giving effect to any recoveries on the collateral. In some instances, rather than repurchase the loans, a subsidiary may agree to make a cash payment to make an investor whole on losses or to settle repurchase claims. In addition, our subsidiaries may be required to indemnify certain purchasers and others against losses they incur as a result of certain breaches of representations and warranties. In some cases, the amount of such losses could exceed the repurchase amount of the related loans.

Table of Contents

These subsidiaries, in total, originated and sold to non-affiliates approximately $111 billion original principal balance of mortgage loans between 2005 and 2008, which are the years (or vintages) with respect to which our subsidiaries have received the vast majority of the repurchase requests and other related claims.

Table 13 presents the original principal balance of mortgage loan originations, by vintage for 2005 through 2008, for the three general categories of purchasers of mortgage loans and the outstanding principal balance as of March 31, 2012 and December 31, 2011:

Table 13: Unpaid Principal Balance of Mortgage Loans Originated and Sold to Third Parties Based on Category of Purchaser

	Unpaid Principal Balance		Original Unpaid Principal Balance				
(Dollars in billions)	**March 31, 2012**	**December 31, 2011**	**Total**	**2008**	**2007**	**2006**	**2005**
Government sponsored enterprises (GSEs[1])	**$ 5**	$ 5	$ 11	$ 1	$ 4	$ 3	$ 3
Insured Securitizations	**6**	6	19		2	8	9
Uninsured Securitizations and Other	**27**	30	81	3	15	30	33
Total	**$ 38**	$ 41	$ 111	$ 4	$ 21	$ 41	$ 45

(1) GSEs include Fannie Mae and Freddie Mac.

Between 2005 and 2008, our subsidiaries sold an aggregate amount of $11 billion in original principal balance mortgage loans to the GSEs.

Of the $19 billion in original principal balance of mortgage loans sold directly by our subsidiaries to private-label purchasers who placed the loans into securitizations supported by bond insurance (Insured Securitizations), approximately $16 billion original principal balance was placed in securitizations as to which the monoline bond insurers have made repurchase requests or loan file requests to one of our subsidiaries (Active Insured Securitizations), and the remaining approximately $3 billion original principal balance was placed in securitizations as to which the monoline bond insurers have not made repurchase requests or loan file requests to one of our subsidiaries (Inactive Insured Securitizations). Insured Securitizations often allow the monoline bond insurer to act independently of the investors. Bond insurers typically have indemnity agreements directly with both the mortgage originators and the securitizers, and they often have super-majority rights within the trust documentation that allow them to direct trustees to pursue mortgage repurchase requests without coordination with other investors.

Because we do not service most of the loans our subsidiaries sold to others, we do not have complete information about the current ownership of the $81 billion in original principal balance of mortgage loans not sold directly to GSEs or placed in Insured Securitizations. We have determined based on information obtained from third-party databases that about $50 billion original principal balance of these mortgage loans are currently held by private-label publicly issued securitizations not supported by bond insurance (Uninsured Securitizations). In contrast with the bond insurers in Insured Securitizations, investors in Uninsured Securitizations often face a number of legal and logistical hurdles before they can direct a securitization trustee to pursue mortgage repurchases, including the need to coordinate with a certain percentage of investors holding the securities and to indemnify the trustee for any litigation it undertakes. An additional approximately $21 billion original principal balance of mortgage loans were initially sold to private investors as whole loans. Of this amount, we believe approximately $10 billion original principal balance of mortgage loans were ultimately purchased by GSEs. For purposes of our reserves-setting process, we consider these loans to be private-label loans rather than GSE loans. Various known and unknown investors purchased the remaining $10 billion original principal balance of mortgage loans in this category.

With respect to the $111 billion in original principal balance of mortgage loans originated and sold to others between 2005 and 2008, we estimate that approximately $38 billion in unpaid principal balance remains

outstanding as of March 31, 2012, approximately $15 billion in losses have been realized and approximately $10 billion in unpaid principal balance is at least 90 days delinquent. Because we do not service most of the loans we sold to others, we do not have complete information about the underlying credit performance levels for some of these mortgage loans. These amounts reflect our best estimates, including extrapolations where necessary. These extrapolations occur on the approximately $10 billion original principal balance of mortgage loans for which we do not have complete information about the current holders or the underlying credit performance. These estimates could change as we get additional data or refine our analysis.

The subsidiaries had open repurchase requests relating to approximately $2.3 billion original principal balance of mortgage loans as of March 31, 2012, compared with $2.1 billion as of December 31, 2011. As of March 31, 2012, the majority of new repurchase demands received over the last year and, as discussed below, the majority of our $1.1 billion reserve relates to the $27 billion of original principal balance of mortgage loans originally sold to the GSEs or to Active Insured Securitizations. Currently, repurchase demands predominantly relate to the 2006 and 2007 vintages. We have received relatively few repurchase demands from the 2008 and 2009 vintages. We believe this is because GreenPoint ceased originating mortgages in August 2007.

The following table presents information on pending repurchase requests by counterparty category and timing of initial repurchase request. The amounts presented are based on original loan principal balances.

Table 14: Open Pipeline All Vintages (all entities)[1]

(Dollars in millions) (All amounts are Original Principal Balance)	GSEs	Insured Securitizations	Uninsured Securitizations and Other	Total
Open claims as of December 31, 2010	$ 126	$ 832	$ 665	$ 1,623
Gross new demands received	196	359	131	686
Loans repurchased/made whole	(67)	(14)	(16)	(97)
Demands rescinded	(85)	(6)	(30)	(121)
Reclassifications[2]	6	72	(78)	
Open claims as of December 31, 2011	$ 176	$ 1,243	$ 672	$ 2,091
Gross new demands received	**107**	**50**	**172**	**329**
Loans repurchased/made whole	**(9)**	**(1)**	**(22)**	**(32)**
Demands rescinded	**(35)**		**(7)**	**(42)**
Reclassifications[2]		**1**	**(1)**	
Open claims as of March 31, 2012	**$ 239**	**$ 1,293**	**$ 814**	**$ 2,346**

(1) The open pipeline includes all repurchase requests ever received by our subsidiaries where either the requesting party has not formally rescinded the repurchase request and where our subsidiary has not agreed to either repurchase the loan at issue or make the requesting party whole with respect to its losses. Accordingly, repurchase requests denied by our subsidiaries and not pursued by the counterparty remain in the open pipeline. Moreover, repurchase requests submitted by parties without contractual standing to pursue repurchase requests are included within the open pipeline unless the requesting party has formally rescinded its repurchase request. Finally, the amounts reflected in this chart are the original principal balance amounts of the mortgage loans at issue and do not correspond to the losses our subsidiary would incur upon the repurchase of these loans.

(2) Represents adjustments to correct the counterparty category as of March 31, 2012 and December 31, 2011 for amounts that were misclassified. The reclassification had no impact on the total pending repurchase requests.

We have established representation and warranty reserves for losses associated with the mortgage loans sold by each subsidiary that we consider to be both probable and reasonably estimable, including both litigation and non-litigation liabilities. These reserves are reported in our consolidated balance sheets as a component of other liabilities. The reserve setting process relies heavily on estimates, which are inherently uncertain, and requires the application of judgment. We evaluate these estimates on a quarterly basis. We build our representation and warranty reserves through the provision for repurchase losses, which we report in our consolidated statements of

income as a component of non-interest income for loans originated and sold by Chevy Chase Bank and Capital One Home Loans and as a component of discontinued operations for loans originated and sold by GreenPoint. In establishing the representation and warranty reserves, we consider a variety of factors depending on the category of purchaser.

In establishing reserves for the $11 billion original principal balance of GSE loans, we rely on the historical relationship between GSE loan losses and repurchase outcomes to estimate: (1) the percentage of current and future GSE loan defaults that we anticipate will result in repurchase requests from the GSEs over the lifetime of the GSE loans; and (2) the percentage of those repurchase requests that we anticipate will result in actual repurchases. We also rely on estimated collateral valuations and loss forecast models to estimate our lifetime liability on GSE loans. This reserving approach to the GSE loans reflects the historical interaction with the GSEs around repurchase requests, and also includes anticipated repurchases resulting from mortgage insurance rescissions. The GSEs typically have stronger contractual rights than non-GSE counterparties because GSE contracts typically do not contain prompt notice requirements for repurchase requests or materiality qualifications to the representations and warranties.

Moreover, although we often disagree with the GSEs about the validity of their repurchase requests, we have established a negotiation pattern whereby the GSEs and our subsidiaries continually negotiate around individual repurchase requests, leading to the GSEs rescinding some repurchase requests and our subsidiaries agreeing in some cases to repurchase some loans or make the GSEs whole with respect to losses. Our lifetime representation and warranty reserves with respect to GSE loans are grounded in this history. Finally, as discussed in more detail below, one of our subsidiaries entered into a settlement with a GSE to resolve present and future repurchase claims in the first quarter of 2012. Our reserves allocated to the GSE segment reflect the amount of that settlement, which was paid after March 31, 2012.

For the $16 billion original principal balance in Active Insured Securitizations, our reserving approach also reflects our historical interaction with monoline bond insurers around repurchase requests. Typically, monoline bond insurers allege a very high repurchase rate with respect to the mortgage loans in the Active Insured Securitization category. In response to these repurchase requests, our subsidiaries typically request information from the monoline bond insurers demonstrating that the contractual requirements around a valid repurchase request have been satisfied. In response to these requests for supporting documentation, monoline bond insurers typically initiate litigation. Accordingly, our reserves within the Active Insured Securitization segment are not based upon the historical repurchase rate with monoline bond insurers, but rather upon the expected resolution of litigation with the monoline bond insurers. Every bond insurer within this category is pursuing a substantially similar litigation strategy either through active or probable litigation. Accordingly, our representation and warranty reserves for this category are litigation reserves. In establishing litigation reserves for this category each quarter, we consider current and future losses inherent within the securitization and apply legal judgment to the actual and anticipated factual and legal record to estimate the lifetime legal liability for each securitization. Our estimated legal liability for each securitization within this category assumes that we will be responsible for only a portion of the losses inherent in each securitization. Our litigation reserves with respect to both the U.S. Bank Litigation and the DBSP Litigation, in each case as referenced below, are contained within the Active Insured Securitization reserve category. Further, our litigation reserves with respect to indemnification risks from certain representation and warranty lawsuits brought by monoline bond insurers against third-party securitizations sponsors, where GreenPoint provided some or all of the mortgage collateral within the securitization but is not a defendant in the litigation, are also contained within this category.

For the $3 billion original principal balance of mortgage loans in the Inactive Insured Securitizations category and the $81 billion original principal balance of mortgage loans in the Uninsured Securitizations and other whole loan sales categories, we establish reserves by relying on our historical activity and repurchase rates to estimate repurchase liabilities over the next twelve (12) months. We do not believe we can estimate repurchase liability for these categories for a period longer than twelve (12) months because of the relatively irregular nature of repurchase activity within these categories. Some Uninsured Securitization investors from this category who

Table of Contents

have not made repurchase requests or filed representation and warranty lawsuits are currently suing investment banks and securitization sponsors under federal and/or state securities laws. Although we face some direct and indirect indemnity risks from these litigations, we generally have not established reserves with respect to these indemnity risks because we do not consider them to be both probable and reasonably estimable liabilities.

The aggregate reserves for all three subsidiaries were $1.1 billion as of March 31, 2012, as compared with $943 million as of December 31, 2011. We recorded a total provision for repurchase losses for our representation and warranty repurchase exposure of $169 million for the three months ended March 31, 2012, primarily driven by an increased reserve associated with a settlement between a subsidiary and a GSE to resolve present and future repurchase claims. This GSE settlement accounted for $95 million of the $169 million provision. The remainder of the provision is primarily driven by certain inactive insured securitizations becoming active insured securitizations in the first quarter.

During the first quarter of 2012, we had settlements of repurchase requests totaling $11 million that were charged against the reserve. The following table summarizes changes in our representation and warranty reserves for the three months ended March 31, 2012 and 2011, and for full year 2011:

Table 15: Changes in Representation and Warranty Reserve

(Dollars in millions)	Three Months Ended March 31, 2012	Three Months Ended March 31, 2011	Full Year 2011
Representation and warranty repurchase reserve, beginning of period[1]	**$ 943**	$ 816	$816
Provision for repurchase losses[2]	**169**	44	212
Net realized losses	**(11)**	(14)	(85)
Representation and warranty repurchase reserve, end of period[1]	**$ 1,101**	$ 846	$943

(1) Reported in our consolidated balance sheets as a component of other liabilities.
(2) The pre-tax portion of the provision for mortgage repurchase claims recognized in our consolidated statements of income as a component of non-interest income totaled $16 million and $5 million for the three months ended March 31, 2012 and 2011, respectively. The pre-tax portion of the provision for mortgage repurchase claims recognized in our consolidated statements of income as a component of discontinued operations totaled $153 million and $39 million, for the three months ended March 31, 2012 and 2011, respectively.

As indicated in the table below, most of the reserves relate to the $11 billion in original principal balance of mortgage loans sold directly to the GSEs and to the $16 billion in mortgage loans sold to purchasers who placed them into Active Insured Securitizations.

Table 16: Allocation of Representation and Warranty Reserve

(Dollars in millions, except for loans sold)	Reserve Liability March 31, 2012	Reserve Liability December 31, 2011	Loans Sold 2005 to 2008[1]
GSEs and Active Insured Securitizations	**$ 927**	$ 778	$ 27
Inactive Insured Securitizations and Others	**174**	165	84
Total	**$ 1,101**	$ 943	$ 111

(1) Reflects, in billions, the total original principal balance of mortgage loans originated by our subsidiaries and sold to third party investors between 2005 and 2008.

The adequacy of the reserves and the ultimate amount of losses incurred by our subsidiaries will depend on, among other things, actual future mortgage loan performance, the actual level of future repurchase and indemnification requests (including the extent, if any, to which Inactive Insured Securitizations and other

currently inactive investors ultimately assert claims), the actual success rates of claimants, developments in litigation, actual recoveries on the collateral and macroeconomic conditions (including unemployment levels and housing prices).

As part of our business planning processes, we have considered various outcomes relating to the potential future representation and warranty liabilities of our subsidiaries that are possible but do not rise to the level of being both probable and reasonably estimable outcomes that would justify an incremental accrual under applicable accounting standards. We believe that the upper end of the reasonably possible future losses from representation and warranty claims beyond the current accrual levels, including reasonably possible future losses relating to the US Bank Litigation, DBSP Litigation and the FHLB of Boston Litigation, could be as high as $1.5 billion, which is unchanged from the estimate provided as of December 31, 2011. Notwithstanding our ongoing attempts to estimate a reasonably possible amount of loss beyond our current accrual levels based on current information, it is possible that actual future losses will exceed both the current accrual level and our current estimated upper end of the amount of reasonably possible losses. There is still significant uncertainty regarding the numerous factors that may impact the ultimate loss levels, including, but not limited to, litigation outcomes, future repurchase claims levels, ultimate repurchase success rates and mortgage loan performance levels.

OFF-BALANCE SHEET ARRANGEMENTS AND VARIABLE INTEREST ENTITIES

In the ordinary course of business, we are involved in various types of arrangements with limited liability companies, partnerships or trusts that often involve special purpose entities and variable interest entities (VIEs). Some of these arrangements are not recorded on our consolidated balance sheets or may be recorded in amounts different from the full contract or notional amount of the arrangements, depending on the nature or structure of, and accounting required to be applied to, the arrangement. These arrangements may expose us to potential losses in excess of the amounts recorded in the consolidated balance sheets. Our involvement in these arrangements can take many forms, including securitization and servicing activities, the purchase or sale of mortgage-backed or other asset-backed securities in connection with our home loan portfolio and loans to VIEs that hold debt, equity, real estate or other assets.

Our continuing involvement in unconsolidated VIEs primarily consists of certain mortgage loan trusts and community reinvestment and development entities. The carrying amount of assets and liabilities of these unconsolidated VIEs was $2.4 billion and $340 million, respectively, as of March 31, 2012, and our maximum exposure to loss was $2.5 billion. We provide a discussion of our activities related to these VIEs in Note 7 Variable Interest Entities and Securitizations.

CAPITAL MANAGEMENT

The level and composition of our equity capital are determined by multiple factors, including our consolidated regulatory capital requirements and an internal risk-based capital assessment, and may also be influenced by rating agency guidelines, subsidiary capital requirements, the business environment, conditions in the financial markets and assessments of potential future losses due to adverse changes in our business and market environments.

Capital Standards and Prompt Corrective Action

Bank holding companies and national banks are subject to capital adequacy standards adopted by the Federal Reserve and the OCC, respectively. The capital adequacy standards set forth minimum risk-based and leverage capital requirements that are based on quantitative and qualitative measures of their assets and off-balance sheet items. Under the capital adequacy standards, bank holding companies and banks currently are required to maintain a total risk-based capital ratio of at least 8%, a Tier 1 risk-based capital ratio of at least 4%, and a Tier 1

leverage capital ratio of at least 4% (3% for banks that meet certain specified criteria, including excellent asset quality, high liquidity, low interest rate exposure and the highest regulatory rating) in order to be considered adequately capitalized.

National banks also are subject to prompt corrective action capital regulations. Under prompt corrective action regulations, a bank is considered to be well capitalized if it maintains a Tier 1 risk-based capital ratio of at least 6% (200 basis points higher than the above minimum capital standard), a total risk-based capital ratio of at least 10% (200 basis points higher than the above minimum capital standard), a Tier 1 leverage capital ratio of at least 5% and is not subject to any supervisory agreement, order or directive to meet and maintain a specific capital level for any capital reserve. A bank is considered to be adequately capitalized if it meets these minimum capital ratios and does not otherwise meet the well capitalized definition. Currently, prompt corrective action capital requirements do not apply to bank holding companies.

We also disclose Tier 1 common ratios, which are regulatory capital measures widely used by investors, analysts, rating agencies and bank regulatory agencies to assess the capital position of financial services companies. There is currently no mandated minimum or well capitalized standard for Tier 1 common; instead the risk-based capital rules state that voting common stockholders equity should be the dominant element within Tier 1 common capital. While these regulatory capital measures are widely used by investors, analysts and bank regulatory agencies to assess the capital position of financial services companies, they may not be comparable to similarly titled measures reported by other companies.

Table 17 provides a comparison of our capital ratios under the Federal Reserve s capital adequacy standards; and the capital ratios of the Banks under the OCC s capital adequacy standards as of March 31, 2012 and December 31, 2011. Table 18 provides the details of the calculation of our capital ratios.

Table 17: Capital Ratios Under Basel I[(1)]

	March 31, 2012			December 31, 2011		
(Dollars in millions)	Capital Ratio	Minimum Capital Adequacy	Well Capitalized	Capital Ratio	Minimum Capital Adequacy	Well Capitalized
Capital One Financial Corp.[(2)]						
Tier 1 common[(3)]	**11.9%**	**N/A**	**N/A**	9.7%	N/A	N/A
Tier 1 risk-based capital[(4)]	**13.9**	**4.0%**	**6.0%**	12.0	4.0%	6.0%
Total risk-based capital[(5)]	**16.5**	**8.0**	**10.0**	14.9	8.0	10.0
Tier 1 leverage[(6)]	**11.0**	**4.0**	**N/A**	10.1	4.0	N/A
Capital One Bank (USA) N.A.						
Tier 1 risk-based capital	**12.5%**	**4.0%**	**6.0%**	11.2%	4.0%	6.0%
Total risk-based capital	**16.5**	**8.0**	**10.0**	15.0	8.0	10.0
Tier 1 leverage	**10.9**	**4.0**	**5.0**	10.2	4.0	5.0
Capital One, N.A.						
Tier 1 risk-based capital	**11.9%**	**4.0%**	**6.0%**	11.0%	4.0%	6.0%
Total risk-based capital	**13.2**	**8.0**	**10.0**	12.2	8.0	10.0
Tier 1 leverage	**9.5**	**4.0**	**5.0**	8.7	4.0	5.0
ING Bank, fsb.						
Tier 1 risk-based capital	**31.5%**	**4.0%**	**6.0%**	N/A	N/A	N/A
Total risk-based capital	**31.5**	**8.0**	**10.0**	N/A	N/A	N/A
Tier 1 leverage	**9.4**	**4.0**	**5.0**	N/A	N/A	N/A

(1) Calculated under capital standards and regulations based on the international capital framework commonly known as Basel I.
(2) The regulatory framework for prompt corrective action does not apply to Capital One Financial Corp. because it is a bank holding company.
(3) Tier 1 common ratio is a regulatory capital measure calculated based on Tier 1 common equity divided by risk-weighted assets.
(4) Calculated based on Tier 1 capital divided by risk-weighted assets.
(5) Calculated based on Total risk-based capital divided by risk-weighted assets.
(6) Calculated based on Tier 1 capital divided by quarterly average total assets, after certain adjustments.

We exceeded minimum capital requirements and met the well capitalized ratio levels for total risk-based capital and Tier 1 risk-based capital under Federal Reserve rules for bank holding companies as of March 31, 2012. The Banks and ING Bank, fsb also exceeded minimum regulatory requirements under the OCC s applicable capital adequacy guidelines and were well capitalized under prompt corrective action requirements as of March 31, 2012 and December 31, 2011.

Table 18: Risk-Based Capital Components Under Basel I[(1)]

(Dollars in millions)	March 31, 2012	December 31, 2011
Total stockholders equity	**$ 36,950**	$ 29,666
Less: Net unrealized gains recorded in AOCI[(2)]	**(328)**	(289)
Net losses on cash flow hedges recorded in AOCI[(2)]	**70**	71
Disallowed goodwill and other intangible assets[(3)]	**(14,057)**	(13,855)
Disallowed deferred tax assets	**(902)**	(534)
Other	**(2)**	(2)
Tier 1 common capital	**21,731**	15,057
Plus: Tier 1 restricted core capital items[(4)]	**3,636**	3,635
Tier 1 risk-based capital	**25,367**	18,692
Plus: Long-term debt qualifying as Tier 2 capital	**2,438**	2,438
Qualifying allowance for loan and lease losses	**2,314**	1,979
Other Tier 2 components	**17**	23
Tier 2 risk-based capital	**4,769**	4,440
Total risk-based capital	**$ 30,136**	$ 23,132
Risk-weighted assets[(5)]	**$ 182,697**	$ 155,657

(1) Calculated under capital standards and regulations based on the international capital framework commonly known as Basel I.
(2) Amounts presented are net of tax.
(3) Disallowed goodwill and other intangible assets are net of related deferred tax liability.
(4) Consists primarily of trust preferred securities.
(5) Under regulatory guidelines for risk-based capital, on-balance sheet assets and credit equivalent amounts of derivatives and off-balance sheet items are assigned to one of several broad risk categories according to the obligor or, if relevant, the guarantor or the nature of any collateral. The aggregate dollar amount in each risk category is then multiplied by the risk weight associated with that category. The resulting weighted values from each of the risk categories are aggregated for determining total risk-weighted assets.

Under the Dodd-Frank Act, many trust preferred securities will cease to qualify for Tier 1 capital, subject to a three year phase-out period expected to begin in 2013.

In November 2011, the Federal Reserve finalized capital planning rules applicable to large bank holding companies like us (commonly referred to as Comprehensive Capital Analysis and Review or CCAR). Under the rules, bank holding companies with consolidated assets of $50.0 billion or more must submit capital plans to the Federal Reserve on an annual basis and must obtain approval from the Federal Reserve before making most capital distributions. The purpose of the rules is to ensure that large bank holding companies have robust, forward-looking capital planning processes that account for their unique risks and capital needs to continue operations through times of economic and financial stress. As part of its evaluation of a capital plan, the Federal Reserve will consider the comprehensiveness of the plan, the reasonableness of assumptions and analysis and methodologies used to assess capital adequacy and the ability of the bank holding company to maintain capital above each minimum regulatory capital ratio and above a Tier 1 common ratio of 5% on a pro forma basis under expected and stressful conditions throughout a planning horizon of at least nine quarters.

36

Table of Contents

In January 2012, we submitted our capital plan to the Board of Governors of the Federal Reserve as part of the 2012 Comprehensive Capital Analysis and Review. On March 13, 2012, the Company was informed that the Federal Reserve had no objection to the capital actions contained in the Company s capital plan submitted under CCAR.

Dividend Policy

The declaration and payment of dividends to our stockholders, as well as the amount thereof, are subject to the discretion of our Board of Directors and will depend upon our results of operations, financial condition, capital levels, cash requirements, future prospects and other factors deemed relevant by the Board of Directors. As a bank holding company, our ability to pay dividends is largely dependent upon the receipt of dividends or other payments from our subsidiaries. We provide additional information on our dividend policy in our 2011 Form 10-K under Part I Item 1. Business Supervision and Regulation Dividends, Stock Purchases and Transfer of Funds.

Regulatory restrictions exist that limit the ability of the Banks and ING Bank, fsb to transfer funds to our bank holding company. Funds available for dividend payments from COBNA, CONA and ING Bank, fsb based on the Earnings Limitation Test were $2.8 billion, $814 million and $196 million, respectively, as of March 31, 2012. Although funds are available for dividend payments from the Banks, we would execute a dividend from the Banks in consultation with the OCC. Applicable provisions that may be contained in our borrowing agreements or the borrowing agreements of our subsidiaries may limit our subsidiaries ability to pay dividends to us or our ability to pay dividends to our stockholders. There can be no assurance that we will declare and pay any dividends.

Issuance of Shares to ING Sellers

In exchange for the equity interests and assets and liabilities associated with the ING Direct acquisition, we issued 54,028,086 shares of Capital One common stock with a fair value of $2.6 billion on February 17, 2012.

Equity and Debt Offering

On March 20, 2012 we closed a public offering of 24,442,706 shares of our common stock which we sold to the underwriters at a per share price of $51.14 for net proceeds of approximately $1.24 billion. In addition, we issued $1.25 billion of our senior notes due 2015 in a public offering which closed on March 23, 2012. We used the net proceeds of these offerings along with cash sourced from current liquidity, to fund the consideration payable in connection with the acquisition of HSBC s U.S credit card business.

Settlement of Forward Sale Agreements

On February 16, 2012, we settled forward sale agreements that we entered into with certain counterparties acting as forward purchasers in connection with a public offering of shares of our common stock on July 19, 2011. Pursuant to the forward sale agreements, we issued 40 million shares of our common stock at settlement. After underwriter s discounts and commissions, the net proceeds to the company were at a forward sale price per share of $48.17 for a total of approximately $1.9 billion.

HSBC Acquisition U.S. Credit Card Business

We completed the transaction in which we acquired substantially all of the assets and assumed liabilities of HSBC s credit card and private-label credit card business in the United States (the HSBC Transaction) for a purchase price of $31.3 billion on May 1, 2012. In the HSBC Transaction, we acquired $28.2 billion of credit card receivables and $0.6 billion in other net assets. We used the net proceeds from the equity and debt offerings described above, along with cash sourced from current liquidity, to fund the cash consideration payable in connection with the acquisition of HSBC s U.S credit card business.

RISK MANAGEMENT

Overview

Risk management is an important part of our business model, as all financial institutions are exposed to a variety of business risks that can significantly affect their financial performance. Our business activities expose us to eight major categories of risks: strategic risk, reputational risk, compliance risk, legal risk, liquidity risk, credit risk, market risk and operational risk.

We discuss below our overall risk management principles, roles and responsibilities, framework and risk appetite. Following this section, we address in more detail the specific procedures, measures and analysis of the major categories of risks that we manage.

Risk Management Principles

Our risk management framework is intended to identify, assess and mitigate risks that affect or have the potential to affect our business. We target financial returns that compensate us for the amount of risk that we take and avoid excessive risk-taking. Our risk management framework consists of five key risk management principles:

- Individual businesses take and manage risk within established tolerance levels in pursuit of strategic, financial and other business objectives.

- Independent risk management organizations support individual businesses by providing risk management tools and policies and by aggregating risks; in some cases, risks are managed centrally.

- The Board of Directors and senior management review our aggregate risk position, establish the risk appetite and work with management to ensure conformance to policy and adherence to our adopted mitigation strategy.

- We employ a top risk identification system to maintain the appropriate focus on the risks and issues that may have the most impact and to identify emerging risks of consequence.

- Independent assurance functions, such as our Internal Audit and Credit Review teams, assess the governance framework and test transactions, business processes and procedures to provide assurance as to whether our risk programs are operating as intended.

For additional information on our risk management principles, see MD&A Risk Management in our 2011 Form 10-K.

CREDIT RISK PROFILE

Our loan portfolio accounts for the substantial majority of our credit risk exposure. Below we provide information about the composition of our loan portfolio, key concentrations and credit performance metrics.

We also engage in certain non-lending activities that may give rise to credit and counterparty settlement risk, including the purchase of securities for our investment securities portfolio, entering into derivative transactions to manage our market risk exposure and to accommodate customers, foreign exchange transactions and deposit overdrafts. We provide additional information on credit risk related to our investment securities portfolio under Consolidated Balance Sheet Analysis Investment Securities and credit risk related to derivative transactions in Note 10 Derivative Instruments and Hedging Activities.

Loan Portfolio Composition

We provide a variety of lending products. Our primary products include credit cards, auto loans, home loans and commercial loans. For information on our lending policies and procedures, including our underwriting criteria, for our primary loan products, please refer to the MD&A Credit Risk Profile section of our 2011 Form 10-K.

Table of Contents

Total loans that we manage consist of held-for-investment loans recorded on our balance sheet and loans held in our securitization trusts. Loans underlying our securitization trusts are reported on our consolidated balance sheets under restricted loans for securitization investors.

Table 19 presents the composition of our total loan portfolio, by business segments, as of March 31, 2012 and December 31, 2011.

Table 19: Loan Portfolio Composition

	March 31, 2012		December 31, 2011	
(Dollars in millions)	Amount	% of Total Loans	Amount	% of Total Loans
Credit Card business:				
Credit card loans:				
Domestic credit card loans	**$ 51,607**	**29.7%**	$ 54,682	40.3%
International credit card loans	**8,303**	**4.8**	8,466	6.2
Total credit card loans	**59,910**	**34.5**	63,148	46.5
Installment loans:				
Domestic installment loans	**1,566**	**0.9**	1,927	1.4
Total installment loans	**1,566**	**0.9**	1,927	1.4
Total credit card	**61,476**	**35.4**	65,075	47.9
Consumer Banking business:				
Auto	**23,568**	**13.5**	21,779	16.0
Home loan	**49,550**	**28.5**	10,433	7.7
Other retail	**4,182**	**2.4**	4,103	3.0
Total consumer banking	**77,300**	**44.4**	36,315	26.7
Commercial Banking business:[(1)]				
Commercial and multifamily real estate	**15,702**	**9.1**	15,736	11.6
Commercial and industrial	**17,761**	**10.2**	17,088	12.6
Total commercial lending	**33,463**	**19.3**	32,824	24.2
Small-ticket commercial real estate	**1,443**	**0.8**	1,503	1.1
Total commercial banking	**34,906**	**20.1**	34,327	25.3
Other:				
Other loans	**140**	**0.1**	175	0.1
Total loans	**$ 173,822**	**100.0%**	$ 135,892	100.0%

(1) Includes construction and land development loans totaling $2.1 billion and $2.2 billion as of March 31, 2012 and December 31, 2011, respectively.

Credit Risk Measurement

We closely monitor economic conditions and loan performance trends to manage and evaluate our exposure to credit risk. Trends in delinquency ratios are an indicator, among other considerations, of credit risk within our loan portfolios. The level of nonperforming assets represents another indicator of the potential for future credit losses. Accordingly, key metrics we track and use in evaluating the credit quality of our loan portfolio include delinquency and nonperforming asset rates, as well as charge-off rates and our internal risk ratings of larger balance, commercial loans. For information on our accounting policies regarding delinquencies, nonperforming status, charge-offs and TDRs for each of our loan categories, see Note 1 Summary of Significant Accounting Policies in our 2011 Form 10-K.

Table of Contents

The improvements we have experienced in our credit trends across all of our businesses are stabilizing and our credit performance is increasingly driven by seasonal trends. We present information in the section below on the credit performance of our loan portfolio, including the key metrics we use in tracking changes in the credit quality of our loan portfolio. See Note 5 Loans for additional information.

Delinquency Rates

Table 20 compares 30+ day performing loan delinquency rates, by loan category, as of March 31, 2012 and December 31, 2011. We also present total 30+ day delinquent loans.

Our 30+ day delinquency metrics include all held for investment loans that are 30 or more days past due, whereas our 30+ day performing delinquency metrics include loans that are 30 or more days past due and that are also currently classified as performing and accruing interest. The 30+ day delinquency and 30+ day performing delinquency metrics are the same for credit card loans, as we continue to classify credit card loans as performing until they are charged-off, generally when the loan is 180 days past due. However, the 30+ day delinquency and 30+ day performing delinquency metrics differ for other loan categories based on our policies for classifying loans as nonperforming.

The delinquency rates presented are calculated, by loan category, based on our total loan portfolio. We separately track and report the performance of acquired loans and exclude these loans from the numerator in calculating our net charge-off, delinquency, nonperforming loan and nonperforming asset rates.

Table 20: 30+ Day Delinquencies

	March 31, 2012				December 31, 2011			
	30+ Day Performing		30+ Day Total		30+ Day Performing		30+ Day Total	
(Dollars in millions)	Amount	Rate[1]	Amount	Rate[1]	Amount	Rate[1]	Amount	Rate[1]
Credit Card business:								
Domestic credit card and installment loans	**$ 1,730**	**3.25%**	**$ 1,730**	**3.25%**	$ 2,073	3.66%	$ 2,073	3.66%

Retail banking[2]	**34**	**0.80**	**92**	**2.20**	34	0.83	94	2.29
Total consumer banking[2]	**1,259**	**1.63**	**1,738**	**2.25**	1,625	4.47	2,176	5.99
Commercial Banking business:								
Commercial and multifamily real estate[2]	**232**	**1.48**	**401**	**2.55**	217	1.38	342	2.17
Commercial and industrial[2]	**162**	**0.91**	**226**	**1.27**	78	0.45	152	0.89
Small-ticket commercial real estate	**48**	**3.33**	**102**	**7.07**	104	6.94	141	9.38
Total commercial banking[2]	**442**	**1.27**	**729**	**2.09**	399	1.16	635	1.85
Other:								
Other loans	**17**	**12.09**	**48**	**34.29**	17	9.65	46	26.29
Total	**$ 3,875**	**2.23%**	**$ 4,672**	**2.69%**	$ 4,552	3.35%	$ 5,368	3.95%

(1) Delinquency rates are calculated by loan category by dividing 30+ day delinquent loans as of the end of the period by period-end loans held for investment for the specified loan category.

(2) The 30+ day performing delinquency rate, excluding acquired loans from the denominator, for home loan, retail banking, total consumer banking, commercial and multifamily real estate, commercial and industrial, and total commercial banking was 1.10%, 0.81%,3.63%,1.50%, 0.93% and 1.28%, respectively, as of March 31, 2012, compared with 1.47%, 0.84%, 5.06%, 1.40%, 0.46% and 1.18%, respectively, as of December 31, 2011.

Table of Contents

Table 21 presents an aging of 30+ day delinquent loans included in the above table.

Table 21: Aging of 30+ Day Delinquent Loans

(Dollars in millions)	March 31, 2012 Amount	March 31, 2012 % of Total Loans[1]	December 31, 2011 Amount	December 31, 2011 % of Total Loans[1]
Total loan portfolio	**$ 173,822**	**100.00%**	$ 135,892	100.00%
Delinquency status:				
30 59 days	**$ 2,047**	**1.18%**	$ 2,306	1.70%
60 89 days	**842**	**0.48**	1,092	0.80
90 + days	**1,783**	**1.03**	1,970	1.45
Total	**$ 4,672**	**2.69%**	$ 5,368	3.95%
Geographic region:				
Domestic	**$ 4,245**	**2.44%**	$ 4,930	3.63%
International	**427**	**0.25**	438	0.32
Total	**$ 4,672**	**2.69%**	$ 5,368	3.95%

(1) Calculated by dividing loans in each delinquency status category and geographic region as of the end of the period by the total loan portfolio.

Table 22 summarizes loans that were 90 days or more past due as to interest or principal and still accruing interest as of March 31, 2012 and December 31, 2011. These loans consist primarily of credit card accounts between 90 days and 179 days past due. As permitted by regulatory guidance issued by the FFIEC, we continue to accrue interest on credit card loans through the date of charge-off, typically in the period the account becomes 180 days past due. While credit card loans remain on accrual status until the loan is charged-off, we establish a reserve for finance charges and fees billed but not expected to be collected and exclude this amount from revenue.

Table 22: 90+ Days Delinquent Loans Accruing Interest

(Dollars in millions)	March 31, 2012 Amount	March 31, 2012 % of Total Loans	December 31, 2011 Amount	December 31, 2011 % of Total Loans

International	**192**	**0.11**	195	0.14
Total	**$ 1,080**	**0.62%**	$ 1,242	0.91%

(1) Delinquency rates are calculated by loan category by dividing 90+ day delinquent loans accruing interest as of the end of the period by period-end loans held for investment for the specified loan category.

(2) Includes credit card loans that continue to accrue finance charges and fees until charged-off at 180 days. The amounts reported for credit card loans are net of billed finance charges and fees that we do not expect to collect. The estimated uncollectible portion of billed finance charges and fees excluded from revenue totaled $123 million and $105 million in the first quarter of 2012 and 2011, respectively. The reserve for uncollectible billed finance charges and fees totaled $79 million as of March 31, 2012, and $74 million as of December 31, 2011.

(3) Calculated by dividing loans in each geographic region as of the end of the period by the total loan portfolio.

Table of Contents

Nonperforming Assets

Nonperforming assets consist of nonperforming loans and foreclosed property and repossessed assets. Nonperforming loans generally include loans that have been placed on nonaccrual status and certain restructured loans whose contractual terms have been restructured in a manner that grants a concession to a borrower experiencing financial difficulty. We do not report loans held for sale as nonperforming. In addition, we separately track and report acquired loans and disclose our delinquency and nonperforming loan rates with and without acquired loans.

Table 23 presents comparative information on nonperforming loans, by loan category, as of March 31, 2012 and December 31, 2011, and the ratio of nonperforming loans to our total loans. Nonperforming loans held for sale are excluded from nonperforming loans, as they are recorded at lower of cost or fair value.

Table 23: Nonperforming Loans and Other Nonperforming Assets[(1)(2)]

	March 31, 2012[(3)]		December 31, 2011	
(Dollars in millions)	Amount	% of Total HFI Loans	Amount	% of Total HFI Loans
Nonperforming loans held for investment:				
Consumer Banking business:				
Auto	**$ 61**	**0.26%**	$ 106	0.48%
Home loans	**445**	**0.90**	456	4.37
Retail banking	**85**	**2.03**	90	2.18
Total consumer banking	**591**	**0.77**	652	1.79

Other loans	**37**	**26.56**	35	20.42
Total nonperforming loans held for investment[(4)]	**$ 1,030**	**0.59%**	$ 1,059	0.78%
Other nonperforming assets:				
Foreclosed property[(5)]	**$ 326**	**0.19%**	$ 169	0.13%
Repossessed assets	**15**	**0.01**	20	0.01
Total other nonperforming assets	**341**	**0.20**	189	0.14
Total nonperforming assets	**$ 1,371**	**0.79%**	$ 1,248	0.92%

(1) The ratio of nonperforming loans as a percentage of total loans held for investment is calculated based on the nonperforming loans in each loan category divided by the total outstanding unpaid principal balance of loans held for investment in each loan category. The denominator used in calculating the nonperforming asset ratios consists of total loans held for investment and other nonperforming assets.

(2) The nonperforming loan ratios, excluding acquired loans from the denominator, for home loan, retail banking, total consumer banking, commercial and multifamily real estate, commercial and industrial, total commercial banking, and total nonperforming loans held for

investment were 6.29%, 2.05%, 1.70%, 1.47%, 0.65%, 1.17% and 0.79%, respectively, as of March 31, 2012, compared with 7.22%, 2.21%, 2.03%, 1.33%, 0.75%, 1.10% and 0.81%, respectively, as of December 31, 2011. The nonperforming asset ratio, excluding acquired loans, was 1.05% and 0.95% as of March 31, 2012 and December 31, 2011, respectively.

(3) We recognized interest income for loans classified as nonperforming of $12 million for the three months ended March 31, 2012. Interest income foregone related to nonperforming loans was $22 million for the three months ended

42

Table of Contents

March 31, 2012. Foregone interest income represents the amount of interest income that would have been recorded during the period for nonperforming loans as of the end of the period had the loans performed according to their contractual terms.

(4) Nonperforming loans as a percentage of loans held for investment, excluding credit card loans from the denominator, was 0.92% and 1.50% as of March 31, 2012 and December 31, 2011, respectively.

(5) Includes $252 million and $86 million of foreclosed properties related to acquired loans, as of March 31, 2012 and December 31, 2011, respectively.

Total nonperforming loans included, TDRs totaling $176 million and $170 million as of March 31, 2012 and December 31, 2011, respectively. The decrease in our nonperforming loan ratio to 0.59% as of March 31, 2012, from 0.78% as of December 31, 2011 was primarily attributable to the improvement in the credit quality our consumer banking loans.

Net Charge-Offs

Net charge-offs consist of the unpaid principal balance of loans held for investment that we determine are uncollectible, net of recovered amounts. We exclude accrued and unpaid finance charges and fees and fraud losses from charge-offs.

Table 24 presents our net charge-off amounts and rates, by business segment, for the three months ended March 31, 2012, and 2011. We provide information on charge-off amounts by loan category below in Table 26.

Table 24: Net Charge-Offs

	Three Months Ended March 31,			
	2012		2011	
(Dollars in millions)	Amount	Rate[(1)]	Amount	Rate[(1)]
Credit card[(2)]	$ 645	4.14%	$ 929	6.13%
Consumer banking[(3)]	109	0.77	134	1.57
Commercial banking[(3)]	16	0.19	60	0.80
Other	10	23.30	22	38.33
Total	$ 780	2.04%	$ 1,145	3.66%
Total excluding acquired loans	780	2.40	1,145	3.82
Average loans held for investment[(4)]	$ 152,900		$ 125,077	
Average loans held for investment (excluding acquired loans)[(4)]	129,833		119,772	

(1) Calculated for each loan category by dividing net charge-offs for the period by average loans held for investment during the period.

(2) Amounts attributable to Kohl s Department Stores (Kohl s) under the revenue and loss-sharing arrangement reduced interest income by $222 million, reduced the provision for credit losses by $193 million and reduced net charge-offs by $40 million in the first quarter of 2012. The expected loss reimbursement from Kohl s netted against our allowance for loan and lease losses was approximately $153 million and $139 million as of March 31, 2012 and December 31, 2011, respectively. See Note 2 Acquisitions for additional information.

(3) Excludes losses on acquired loans. We separately track and report these loans. We provide additional information on the acquired loans in Note 5 Loans.

(4) Loans held for investment includes loans acquired in the ING Direct and Chevy Chase Bank business combinations. The carrying value and outstanding unpaid principal balance of acquired loans accounted for based on expected cash flows at acquisition was $43.2 billion and $44.3 billion as of March 31, 2012, respectively, and $4.7 billion and $5.2 billion, respectively, as of December 31, 2011.

Loan Modifications and Restructurings

As part of our customer retention efforts, we may modify loans for certain borrowers who have demonstrated performance under the previous terms. As part of our loss mitigation efforts, we may make loan modifications to

a borrower experiencing financial difficulty that are intended to minimize our economic loss and avoid the need for foreclosure or repossession of collateral. We may provide short-term (three to twelve months) or long-term (greater than twelve months) modifications to improve the long-term collectability of the loan. Our most common types of modifications include a reduction in the borrower s initial monthly or quarterly principal and interest payment through an extension of the loan term, a reduction in the interest rate, or a combination of both. These modifications may result in our receiving the full amount due, or certain installments due, under the loan over a period of time that is longer than the period of time originally provided for under the terms of the loan. In some cases, we may curtail the amount of principal owed by the borrower. Loan modifications in which an economic concession has been granted to a borrower experiencing financial difficulty are accounted for and reported as TDRs. We also classify loan modifications that involve a trial period as TDRs.

Table 25 presents the loan balances as of March 31, 2012 and December 31, 2011 of loan modifications made as part of our loss mitigation efforts, all of which are considered to be TDRs. Table 25 excludes loan modifications that do not meet the definition of a TDR and acquired loans, which we track and report separately. We provide additional detail on acquired loans below under Acquired Loans.

Table 25: Loan Modifications and Restructurings[(1)]

(Dollars in millions)	March 31, 2012	December 31, 2011
Modified and restructured loans:		
Credit card[(2)]	**$ 867**	$ 898
Auto	**70**	58
Home loans	**102**	104
Retail banking	**77**	80
Commercial	**440**	426
Total	**$ 1,556**	$ 1,566
Status of modified and restructured loans:		
Performing	**$ 1,380**	$ 1,396
Nonperforming	**176**	170
Total	**$ 1,556**	$ 1,566

(1) Reflects modifications and restructuring of loans in our total loan portfolio. The total loan portfolio includes loans recorded on our balance sheet and loans held in securitization trusts.

(2) Amount reported reflects the total outstanding customer balance, which consists of unpaid principal balance, accrued interest and fees.

The vast majority of our credit card TDR loan modifications involve a reduction in the interest rate on the account and placing the customer on a fixed payment plan not exceeding 60 months. In some cases, the interest rate on a credit card account is automatically increased due to non-payment, late payment or similar events. We determine the effective interest rate for purposes of measuring impairment on modified loans that involve an increase and are considered to be a TDR based on the interest rate in effect immediately prior to the loan entering the modification program. In all cases, we cancel the customer s available line of credit on the credit card. If the cardholder does not comply with the modified payment terms, then the credit card loan agreement will revert back to its original payment terms, with the amount of any loan outstanding reflected in the appropriate delinquency category. The loan amount may then be charged-off in accordance with our standard charge-off policy.

The majority of our modified home loans involve a combination of an interest rate reduction, term extension or principal reduction. The vast majority of modified commercial loans include a reduction in interest rate or a term extension.

We provide additional information on modified loans accounted for as TDRs, including the performance of those loans subsequent to modification, in Note 5 Loans.

Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due from the borrower in accordance with the original contractual terms of the loan. Loans defined as individually impaired, based on applicable accounting guidance, include larger balance commercial nonperforming loans and TDR loans. We do not report nonperforming consumer loans that have not been modified in a TDR as individually impaired, as we collectively evaluate these smaller-balance homogenous loans for impairment in accordance with applicable accounting guidance. Loans held for sale are also not reported as impaired, as these loans are recorded at lower of cost or fair value. Impaired loans also exclude loans acquired because these loans were recorded at fair value upon acquisition.

Impaired loans, including TDRs, totaled $1.8 billion as of March 31, 2012 and December 31, 2011. TDRs accounted for $1.6 billion of impaired loans as of both March 31, 2012 and December 31, 2011. We provide additional information on our impaired loans, including the allowance established for these loans, in Note 5 Loans and Note 6 Allowance for Loan and Lease Losses.

Acquired Loans

Our portfolio of acquired loans consists of loans acquired in the ING Direct and Chevy Chase Bank transactions, which were recorded at fair value at the date of acquisition. Acquired loans increased to $43.2 billion as of March 31, 2012, from $4.7 billion as of December 31, 2011. Because these loans are recorded at fair value, no allowance for loan and lease losses was recorded for these loans as of the acquisition date. However, we regularly update the amount of expected principal and interest to be collected from these loans and evaluate the results on an aggregated pool basis for loans with common risk characteristics. Probable decreases in expected loan principal cash flows would trigger the recognition of impairment through our provision for credit losses. Probable and significant increases in expected cash flows would first reverse any previously recorded allowance for loan and losses, with any remaining increase in expected cash flows recognized prospectively in interest income over the remaining estimated life of the underlying loans. We increased the allowance related to this pool of loans by $13 million for the three months ended March 31, 2012. We recorded impairment through our provision for credit losses of $13 million for the three months ended March 31, 2012. The cumulative impairment recognized on acquired loans totaled $40 million as of March 31, 2012 and $27 million as of December 31, 2011. The credit performance of the remaining pools has generally been in line with our expectations, and, in some cases, more favorable than expected, which has resulted in the reclassification of amounts from the nonaccretable difference to the accretable yield.

The 30+ day performing delinquency rate for acquired loans, is calculated based on the contractual past due unpaid principal balance divided by the total outstanding unpaid principal balance of acquired loans as of the end of each period. The auto, home loan, retail banking and total consumer banking rates were 4.30%, 3.08%, 5.42% and 3.08%, respectively, as of March 31, 2012, compared with 5.31%, 2.93%, 2.20%, and 2.94%, respectively, as of December 31, 2011. The outstanding unpaid principal balance of the acquired loan portfolio as of March 31, 2012 was $44.3 billion compared with $5.2 billion as of December 31, 2011, respectively. We provide additional information on the acquired loans in Note 5 Loans.

Allowance for Loan and Lease Losses

Our allowance for loan and lease losses represents management s best estimate of incurred loan and lease credit losses inherent in our held-for-investment portfolio as of each balance sheet date. We do not maintain an allowance for held-for-sale loans or acquired loans that are performing in accordance with or better than our expectations as of the date of acquisition, as the fair values of these loans already reflect a credit component. The allowance for loan and lease losses is increased through the provision for credit losses and reduced by net charge-offs. The provision for credit losses, which is charged to earnings, reflects credit losses we believe have been incurred and will eventually be reflected over time in our charge-offs. Charge-offs of uncollectible amounts are deducted from the

Table of Contents

allowance and subsequent recoveries are added. We describe our process for determining our allowance for loan and lease losses in Note 1 Summary of Significant Accounting Policies in our 2011 Form 10-K.

Table 26, which displays changes in our allowance for loan and lease losses for the three months, ended March 31, 2012 and December 31, 2011, details, by loan type, the provision for credit losses recognized in our consolidated statements of income each period and the charge-offs recorded against our allowance for loan and lease losses.

Table 26: Summary of Allowance for Loan and Lease Losses

Table of Contents

(1) Excludes a negative provision for unfunded lending commitments of $6 million and $36 million for the three months ended March 31, 2012 and 2011, respectively.

(2) Amounts attributable to Kohl s Department Stores (Kohl s) under the revenue and loss-sharing arrangement reduced interest income by $222 million, reduced the provision for credit losses by $193 million and reduced net charge-offs by $40 million in the first quarter of 2012. The expected loss reimbursement from Kohl s netted against our allowance for loan and lease losses was approximately $153 million and $139 million as of March 31, 2012 and December 31, 2011, respectively. See Note 2 Acquisitions for additional information.

(3) Includes foreign translation adjustments of $11 million and $14 million for the three months ended March 31, 2012 and 2011, respectively.

Table 27 presents an allocation of our allowance for loan and lease losses by loan category as of March 31, 2012 and December 31, 2011.

Table 27: Allocation of the Allowance for Loan and Lease Losses

(Dollars in millions)	March 31, 2012 Amount	March 31, 2012 % of Total Loans[1]	December 31, 2011 Amount	December 31, 2011 % of Total Loans[1]

Total	**$ 4,060**	**2.34%**	$ 4,250	3.13%
Total allowance coverage ratios:				
Period-end loans	**$ 173,822**	**2.34%**	$ 135,892	3.13%
Nonperforming loans[2]	**1,030**	**394.17**	1,059	401.32
Allowance coverage ratios by loan category:				
Credit card (30 + day delinquent loans)	**$ 2,157**	**123.83%**	$ 2,511	113.38%
Consumer banking (30 + day delinquent loans)	**1,738**	**41.31**	2,176	29.96
Commercial banking (nonperforming loans)	**402**	**158.20**	372	192.20

(1)

Calculated based on the allowance for loan and lease losses attributable to each loan category divided by the outstanding balance of loans within the specified loan category.

(2) As permitted by regulatory guidance issued by the FFEIC, our policy is generally not to classify credit card loans as nonperforming. We accrue interest on credit card loans through the date of charge-off, typically in the period that the loan becomes 180 days past due. The allowance for loan and lease losses as a percentage of nonperforming loans, excluding the allowance related to our credit card loans, was 132.85% as of March 31, 2012 and 132.48% as of December 31, 2011.

Table of Contents

Our allowance for loan and lease losses decreased by $190 million during the first quarter of 2012 to $4.1 billion. The decrease in our allowance reflected the continued improvement in credit performance trends across our portfolios as a result of the slowly improving economy coupled with actions we have taken over the past several years to tighten our underwriting standards and exit certain portfolios. Our allowance as a percentage of our total loan portfolio also decreased to 2.34% as of March 31, 2012, from 3.13% as of December 31, 2011.

LIQUIDITY RISK PROFILE

We have established liquidity guidelines that are intended to ensure that we have sufficient asset-based liquidity to withstand the potential impact of deposit attrition or diminished liquidity in the funding markets. Our guidelines include maintaining an adequate liquidity reserve to cover our potential funding requirements and diversified funding sources to avoid over-dependence on volatile, less reliable funding markets. Our liquidity reserves consist of cash and cash equivalents and unencumbered available-for-sale securities. Table 28 below presents the composition of our liquidity reserves as of March 31, 2012 and December 31, 2011. Our liquidity reserves increased by $47.5 billion in the first quarter of 2012 to $83.3 billion as of March 31, 2012. This increase was primarily driven by an increase in available-for-sale securities from our acquisition of ING Direct and an increase in cash from our equity and debt offerings during the first quarter of 2012.

Table 28: Liquidity Reserves

(Dollars in millions)	March 31, 2012	December 31, 2011
Cash and cash equivalents	**$ 30,656**	$ 5,838
Securities available-for-sale[1]	**60,810**	38,759
Less: Pledged available-for-sale securities	**(8,215)**	(8,762)
Unencumbered available-for-sale securities	**52,595**	29,997
Total liquidity reserves	**$ 83,251**	$ 35,835

[1] The weighted average life of our available-for-sale securities was approximately 3.0 and 2.9 years as of March 31, 2012 and December 31, 2011, respectively.

Deposits

Our deposits provide a stable and relatively low cost of funds and are our largest source of funding. We have expanded our opportunities for deposit growth through direct and indirect marketing channels, our existing branch network and branch expansion. These channels offer a broad range of deposit products that include demand deposits, money market deposits, negotiable order of withdrawal (NOW) accounts, savings accounts and certificates of deposit. Table 29 presents the composition of our deposits by type as of March 31, 2012 and December 31, 2011.

Table 29: Deposits

(Dollars in millions)	March 31, 2012	December 31, 2011
Non-interest bearing	**$ 19,274**	$ 18,281
NOW accounts	**35,117**	15,038

Money market deposit accounts	**109,448**	46,496
Savings accounts	**32,159**	31,433
Other consumer time deposits	**13,969**	11,471
Total core deposits	**209,967**	122,719
Public fund certificates of deposit $100,000 or more	**77**	85
Certificates of deposit $100,000 or more	**5,135**	4,501
Foreign time deposits	**1,349**	921
Total deposits	**$ 216,528**	$ 128,226

Total deposits increased by $88.3 billion, or 69%, in the first quarter of 2012 to $216.5 billion as of March 31, 2012. The increase in deposits reflects the addition of $84.4 billion in deposits from the ING Direct acquisition and increased retail marketing efforts to attract new business and continued strategy to leverage our bank outlets to attract lower cost deposit funding. Of our total deposits, approximately $1.3 billion and $921 million were held in foreign banking offices as of March 31, 2012 and December 31, 2011, respectively. Large domestic denomination certificates of deposits of $100,000 or more represented $5.2 billion and $4.6 billion of our total deposits as of March 31, 2012 and December 31, 2011, respectively.

We have brokered deposits, which we obtained through the use of third-party intermediaries. Brokered deposits are included in money market deposit accounts and other consumer time deposits in Table 29 above. The Federal Deposit Insurance Corporation Improvement Act of 1991 limits the use of brokered deposits to well-capitalized insured depository institutions and, with a waiver from the Federal Deposit Insurance Corporation, to adequately capitalized institutions. COBNA, CONA and ING Bank, fsb were well-capitalized, as defined under the federal banking regulatory guidelines, as of March 31, 2012, and therefore permitted to maintain brokered deposits. Our brokered deposits totaled $12.5 billion, or 5.8% of total deposits, as of March 31, 2012. Brokered deposits totaled $13.0 billion, or 10% of total deposits, as of December 31, 2011. Based on our historical access to the brokered deposit market, we expect to replace maturing brokered deposits with new brokered deposits or direct deposits and branch deposits.

Short-Term Borrowings

We also have access to and utilize various other short-term borrowings to support our operations. These borrowings are generally in the form of federal funds purchased and resale agreements, most of which are overnight borrowings. Other short-term borrowings do not represent a significant portion of our overall funding.

Other Funding Sources

We also access the capital markets to meet our funding needs through the use of federal funds purchased and securities loaned or sold under agreements to repurchase, the issuance of senior and subordinated notes and other borrowings and, to a lesser extent, loan securitization transactions. In addition, we utilize advances from the FHLB for our funding needs. FHLB advances are secured by certain of our loan portfolios and investment securities.

Our debt, including federal funds purchased and securities loaned or sold under agreements to repurchase, senior and subordinated notes and other borrowings, such as FHLB advances, but excluding securitized debt obligations, totaled $17.4 billion as of March 31, 2012, decreased from $23.0 billion as of December 31, 2011. We had no open committed loan securitization conduit lines as of March 31, 2012. The $5.6 billion decrease in our debt, excluding securitized debt obligations, was primarily attributable to a $6.5 billion decrease in short-term borrowings, a decrease of $282 million due to the maturity of outstanding senior notes, and the proceeds of approximately $1.25 billion from the issuance of new senior notes. We participate in the federal funds market daily to take advantage of attractive offers and to keep a visible presence in the market, which is intended to ensure that we are able to access the federal funds market in a time of need. We expect monthly fluctuations in our borrowings, as borrowing amounts are highly dependent on our counterparties cash positions. Our FHLB membership is secured by our investment in FHLB stock, which totaled $802 million as of March 31, 2012.

Table of Contents

Table 30 presents our short-term borrowings and long-term debt and the maturity profile based on expected maturities as of March 31, 2012. We provide additional information on our short-term borrowings and long-term debt in Note 9 Deposits and Borrowings.

Table 30: Expected Maturity Profile of Short-term Borrowings and Long-term Debt

(Dollars in millions)	Up to 1 Year	> 1 Year to 2 Years	> 2 Years to 3 Years	> 3 Years to 4 Years	> 4 Years to 5 Years	> 5 Years	Total
Short-term borrowings:							
Federal funds purchased and securities loaned or sold under agreements to repurchase	$ 770						770
Total short-term borrowings	770						770
Long-term debt:							
Securitized debt obligations	5,116	3,065	1,662	905	2,678	2,048	15,474
Senior and subordinated notes:							
Unsecured senior debt	0	580	3,288	410	1,000	2,772	8,050
Unsecured subordinated debt	354	517	106	0	1,186	1,735	3,898
Total senior and subordinated notes	354	1,097	3,394	410	2,186	4,507	11,948
Other long-term borrowings:							
Junior subordinated debt	0	0	0	0	0	3,641	3,641
FHLB advances	12	34	932	19	20	35	1,052

Total long-term debt[1]	5,482	4,196	5,988	1,334	4,884	10,231	32,115
Total short-term borrowings and long-term debt	$ 6,252	4,196	5,988	1,334	4,884	10,231	32,885
Percentage of total	19%	13%	18%	4%	15%	31%	100%

(1) Includes unamortized discounts, premiums and other cost basis adjustments of $28.9 million as of March 31, 2012.

Borrowing Capacity

As of March 31, 2012, we had an effective shelf registration statement filed with the U.S. Securities & Exchange Commission (SEC) under which, from time to time, we may offer and sell an indeterminate aggregate amount of senior or subordinated debt securities, preferred stock, depository shares representing preferred stock, common stock, purchase contracts, warrants, units, trust preferred securities, junior subordinated debt securities, guarantees of trust preferred securities and certain back-up obligations. There is no limit under this shelf registration statement to the amount or number of such securities that we may offer and sell. Under SEC rules, the shelf registration statement, which we filed in May 2009, expires three years after filing. During the first quarter of 2012, we issued new senior notes in the total amount of $1.25 billion, due in 2015. We filed a new effective shelf registration statement with the SEC on April 30, 2012 which will expire three years from the filing date.

In addition to issuance capacity under the shelf registration statement, we also have access to FHLB Advances and Letters of Credit with a maximum borrowing capacity of $29.3 billion as of March 31, 2012. We had $1.3 billion outstanding as of March 31, 2012, and $28.0 billion still available to us to borrow against under this program. This funding source is non-revolving, and funding availability is subject to market conditions. The ability to draw down funding is based on membership status, and the amount is dependent upon the Banks ability to post collateral.

Table of Contents

Credit Ratings

Our credit ratings have a significant impact on our ability to access capital markets and our borrowing costs. Rating agencies base their ratings on numerous factors, including liquidity, capital adequacy, asset quality, quality of earnings and the probability of systemic support. Significant changes in these factors could result in different ratings. Our equity capital and funding strategies are designed, among other things, to maintain appropriate and stable unsecured debt ratings from the major credit ratings agencies, Moody s, S&P, Fitch and DBRS. Such ratings help to support our cost effective unsecured funding as part of our overall financing programs. Table 31 provides a summary of the credit ratings for the senior unsecured debt of Capital One Financial Corporation, COBNA and CONA as of March 31, 2012.

Table 31: Senior Unsecured Debt Credit Ratings

		March 31, 2012	
(Dollars or dollar equivalents in millions)	Capital One Financial Corporation	Capital One Bank (USA), N.A.	Capital One, N.A.
Moody s	**Baa1**	**A3**	**A3**
S&P	**BBB**	**BBB+**	**BBB+**
Fitch	**A-**	**A-**	**A-**
DBRS	**BBB****	**A***	**A***

* low
** high

As of April 30, 2012, Moody s and DBRS had us on a stable outlook, while S&P and Fitch had us on negative outlook.

MARKET RISK PROFILE

Market risk is inherent in the financial instruments associated with our operations and activities, including loans, deposits, securities, short-term borrowings, long-term debt and derivatives. Below we provide additional information about our primary sources of market risk, our market risk management strategies and measures used to evaluate our market risk exposure.

Primary Market Risk Exposures

Our primary sources of market risk include interest rate risk and foreign exchange risk.

Interest Rate Risk

Interest rate risk, which represents exposure to instruments whose yield or price varies with the level or volatility of interest rates, is our most significant source of market risk exposure. Banks are inevitably exposed to interest rate risk due to differences in the timing between the maturities or repricing of assets and liabilities. For example, if more assets are repricing than deposits and other borrowings when interest rates are declining, our earnings will decrease. Similarly, if more deposits and other borrowings are repricing than assets when interest rates are rising, our earnings will decrease. Interest rate risk also results from changes in customer behavior and competitors responses to changes in interest rates or other market conditions. For example, decreases in mortgage rates generally result in faster than expected prepayments, which may adversely affect earnings. Increases in interest rates, coupled with strong demand from competitors for deposits, may influence industry pricing. Such competition may affect customer decisions to maintain balances in the deposit accounts, which may require replacing lower cost deposits with higher cost alternative sources of funding.

Foreign Exchange Risk

Foreign exchange risk represents exposure to changes in the values of current holdings and future cash flows denominated in other currencies. The types of instruments exposed to this risk include investments in foreign

subsidiaries, foreign currency-denominated loans and securities, future cash flows in foreign currencies arising from foreign exchange transactions, foreign currency-denominated debt and various foreign exchange derivative instruments whose values fluctuate with changes in the level or volatility of currency exchange rates or foreign interest rates.

We are exposed to changes in foreign exchange rates, which may impact the earnings of our foreign operations. Our asset/liability management policy requires that we use derivatives to hedge material foreign currency denominated transactions to limit our earnings exposure to foreign exchange risk.

Market Risk Management

We employ several techniques to manage our interest rate and foreign currency risk, which include, but are not limited to, changing the maturity and re-pricing characteristics of our various assets and liabilities. Derivatives are one of the primary tools we use in managing interest rate and foreign exchange risk. We execute our derivative contracts in both over-the-counter and exchange-traded derivative markets. Although the majority of our derivatives are interest rate swaps, we also use a variety of other derivative instruments, including caps, floors, options, futures and forward contracts, to manage our interest rate and foreign currency risk. The outstanding notional amount of our derivative contracts decreased to $49.7 billion as of March 31, 2012, from $73.2 billion as of December 31, 2011. This decrease was primarily attributable to the termination of interest-rate swaps we entered into in the second half of 2011 to manage the anticipated impact of the ING Direct acquisition on our market risk exposure and regulatory capital requirements.

From the date we entered into the agreement to acquire ING Direct to early August 2011, interest rates declined substantially, which resulted in an increase in the estimated fair value of the ING Direct net assets and liabilities. In order to capture some of the anticipated benefits to regulatory capital on the closing date attributable to this decline in interest rates, in early August 2011, we entered into various interest-rate swap transactions with a total notional principal amount of approximately $23.8 billion. We subsequently rebalanced the hedge in October 2011 adding an additional $1.0 billion in notional principal for a total combined notional principal amount of approximately $24.8 billion. These combined swap transactions were intended to mitigate the effect of a rise in interest rates on the fair values of a significant portion of the ING Direct assets and liabilities during the period from when we entered into the swap transactions to the anticipated closing date of the ING Direct acquisition in early 2012. Although the interest-rate swaps represented economic hedges, they were not designated for hedge accounting under U.S. GAAP. Therefore, we recorded changes in the fair value of these interest-rate swaps in earnings.

In 2011, we recorded a mark-to-market loss of $277 million related to these interest-rate swaps, which was attributable to the decline in interest rates. In conjunction with the acquisition of ING Direct on February 17, 2012, we terminated the $24.8 billion in interest-rate swaps related to the acquisition and recorded an additional mark-to-market loss of $78 million in the first quarter of 2012 in our consolidated statement of income as a component of non-interest income. The cumulative mark-to-market loss on these interest-rate swaps from inception to termination totaled $355 million.

The fair value of the net assets acquired from ING Direct of $9.6 billion at acquisition exceeded the purchase price of $9.0 billion, resulting in the recognition of a bargain purchase gain of $594 million in the first quarter of 2012, which is reported separately under non-interest expense on our consolidated statement of income. A substantial portion of the assets acquired from ING Direct were mortgage-related assets, which generally decrease in value as interest rates rise and increase in value as interest rates fall. The bargain purchase gain was driven largely driven by a substantial decline in long-term interest rates between the period shortly after our announcement of the ING Direct acquisition and its closing, which resulted in an increase in the fair value of the acquired mortgage assets and the overall net fair value of assets acquired.

We believe the interest-rate swaps related to the ING Direct acquisition were effective in meeting our hedging objective. See Note 10 Derivative Instruments and Hedging Activities for additional information.

Market Risk Measurement

We have prescribed risk management policies and limits established by our Asset/Liability Management Committee. Our objective is to manage our asset/liability risk position and exposure to market risk in accordance with these policies and prescribed limits based on prevailing market conditions and long-term expectations. Because no single measure can reflect all aspects of market risk, we use various industry standard market risk measurement techniques and analyses to measure, assess and manage the impact of changes in interest rates and foreign exchange rates on our earnings and the economic value of equity.

We consider the impact on both earnings and economic value of equity in measuring and managing our interest rate risk. Our earnings sensitivity measure estimates the impact on net interest income and the valuation of our mortgage servicing rights, including derivative hedging activity, resulting from movements in interest rates. Our economic value of equity sensitivity measure estimates the impact on the net present value of our assets and liabilities, including derivative hedging activity, resulting from movements in interest rates. Our earnings sensitivity and economic value of equity measurements are based on our existing assets and liabilities, including derivatives, and do not incorporate business growth assumptions or projected plans for funding mix changes. We do, however, assess and factor into our interest rate risk management decisions the potential impact of growth assumptions, changing business activities and alternative interest rate scenarios, such as a steepening or flattening of the yield curve.

Under our current asset/liability management policy, our objective is to: (i) limit the potential decrease in our projected net interest income resulting from a gradual plus or minus 200 basis point change in forward rates to less than 5% over the next 12 months and (ii) limit the adverse change in the economic value of our equity due to an instantaneous parallel interest rate shock to spot rates of plus or minus 200 basis points to less than 12%. The federal funds rate remained at a target range of zero to 0.25% during the first quarter of 2012. Given the level of short-term rates as of March 31, 2012 and December 31, 2011, a scenario where interest rates would decline by 200 basis points is not plausible. In 2008, we temporarily revised our customary declining interest rate scenario of 200 basis points to a 50 basis point decrease, except in scenarios where a 50 basis point decline would result in a rate less than 0% (in which case we assume a rate scenario of 0%), to compensate for the continued low rate environment. Our current asset/liability management policy also includes the use of derivatives to hedge material foreign currency denominated transactions to limit our earnings exposure to foreign exchange risk.

Table 34 shows the estimated percentage impact on our adjusted projected net interest income and economic value of equity, calculated under our base case interest rate scenario, as of March 31, 2012 and December 31, 2011, resulting from selected hypothetical interest rate scenarios. Our adjusted projected net interest income consists of net interest income adjusted to include changes in the fair value of mortgage service rights, including related derivative hedging activity, and changes in the fair value of free-standing interest rate swaps. In measuring the sensitivity of interest rate movements on our adjusted projected net interest income, we assume a hypothetical gradual increase in interest rates of 200 basis points and a hypothetical gradual decrease of 50 basis points to forward rates over the next twelve months. In measuring the sensitivity of interest rate movements on our economic value of equity, we assume a hypothetical instantaneous parallel shift in the level of interest rates of plus 200 basis points and minus 50 basis points to spot rates in measuring the sensitivity of the valuation of our economic value of equity.

Table of Contents

Table 32: Interest Rate Sensitivity Analysis

		December 31, 2011	
(Dollars in millions)	March 31, 2012	Excluding ING Direct Swaps[1]	Including ING Direct Swaps
Impact on adjusted projected base-line net interest income:			
+ 200 basis points	**0.5%**	1.2%	13.7%
- 50 basis points	**(0.3)**	(0.5)	(3.9)
Impact on adjusted projected base-line net interest income:			
+ 200 basis points	**(1.4)**	(1.0)	3.2
- 50 basis points	**(0.9)**	(0.4)	(1.5)

[1] Calculated excluding the impact of the interest-rate swap transactions of approximately $24.8 billion entered into to mitigate some of the interest rate risk related to the ING Direct acquisition.

Because of the large but temporary impact of the ING Direct-related swap transactions on our standard interest rate risk reporting measures, we expanded our standard interest rate sensitivity analysis to present our interest rate risk measures as of December 31, 2011 both with and without the impact of the $24.8 billion of interest rate swaps described above. This presentation highlights changes in our core interest rate risk profile and the incremental impact of the ING Direct-related swaps on our core profile over the time period that the swaps were outstanding. Excluding the $24.8 billion swap transactions, our interest rate sensitivity measures reflect that we became less asset sensitive between December 31, 2011 and March 31, 2012. Our projected net interest income and economic value of equity sensitivity measures, both including and excluding the impact of the ING Direct related swap transactions, were within our prescribed asset/liability policy limits as of March 31, 2012 and December 31, 2011. As noted above, in conjunction with our close of the ING Direct acquisition on February 17, 2012, we terminated the ING Direct related swap transactions in February 2012.

The interest rate risk models that we use in deriving these measures incorporate contractual information, internally-developed assumptions and proprietary modeling methodologies, which project borrower and deposit behavior patterns in certain interest rate environments. Other market inputs, such as interest rates, market prices and interest rate volatility, are also critical components of our interest rate risk measures. We regularly evaluate, update and enhance these assumptions, models and analytical tools as we believe appropriate to reflect our best assessment of the market environment and the expected behavior patterns of our existing assets and liabilities.

Limitations of Market Risk Measures

There are inherent limitations in any methodology used to estimate the exposure to changes in market interest rates. The above sensitivity analyses contemplate only certain movements in interest rates and are performed at a particular point in time based on the existing balance sheet, and do not incorporate other factors that may have a significant effect, most notably future business activities and strategic actions that management may take to manage interest rate risk. Actual earnings and economic value of equity could differ from the above sensitivity analyses.

SUPERVISION AND REGULATION

We provide information on our supervision and regulation in our 2011 Form 10-K under Part I Item 1. Business Supervision and Regulation.

ACCOUNTING CHANGES AND DEVELOPMENTS

See Note 1 Summary of Significant Accounting Policies in our 2011 Form 10-K for information concerning recently issued accounting pronouncements, including those that we have not yet adopted and that will likely affect our consolidated financial statements.

Table of Contents

FORWARD-LOOKING STATEMENTS

From time to time, we have made and will make forward-looking statements, including those that discuss, among other things, strategies, goals, outlook or other non-historical matters; projections, revenues, income, expenses, capital measures, returns, accruals for claims in litigation and for other claims against us; earnings per share or other financial measures for us; future financial and operating results; our plans, objectives, expectations and intentions; the projected impact and benefits of the acquisition of ING Direct and the HSBC Transaction (collectively, the Transactions); and the assumptions that underlie these matters.

To the extent that any such information is forward-looking, it is intended to fit within the safe harbor for forward-looking information provided by the Private Securities Litigation Reform Act of 1995. Numerous factors could cause our actual results to differ materially from those described in such forward-looking statements, including, among other things:

- general economic and business conditions in the U.S., the U.K., Canada and our local markets, including conditions affecting employment levels, interest rates, consumer income and confidence, spending and savings that may affect consumer bankruptcies, defaults, charge-offs and deposit activity;
- an increase or decrease in credit losses (including increases due to a worsening of general economic conditions in the credit environment);
- the possibility that we may not fully realize the projected cost savings and other projected benefits of the Transactions;
- difficulties and delays in integrating the assets and businesses acquired in the Transactions;
- business disruption following the Transactions;
- diversion of management time on issues related to the Transactions, including integration of the assets and businesses acquired;
- reputational risks and the reaction of customers and counterparties to the Transactions;
- disruptions relating to the Transactions negatively impacting our ability to maintain relationships with customers, employees and suppliers;
- changes in asset quality and credit risk as a result of the Transactions;
- the accuracy of estimates and assumptions we use to determine the fair value of assets acquired and liabilities assumed in the Transactions, and the potential for our estimates or assumptions to change as additional information becomes available and we complete the accounting analysis of the Transactions;

financial, legal, regulatory, tax or accounting changes or actions, including the impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act and the regulations promulgated thereunder;

developments, changes or actions relating to any litigation matter involving us;

the inability to sustain revenue and earnings growth;

increases or decreases in interest rates;

our ability to access the capital markets at attractive rates and terms to capitalize and fund our operations and future growth;

the success of our marketing efforts in attracting and retaining customers;

increases or decreases in our aggregate loan balances or the number of customers and the growth rate and composition thereof, including increases or decreases resulting from factors such as shifting product mix, amount of actual marketing expenses we incur and attrition of loan balances;

- the level of future repurchase or indemnification requests we may receive, the actual future performance of mortgage loans relating to such requests, the success rates of claimants against us, any developments in litigation and the actual recoveries we may make on any collateral relating to claims against us;
- the amount and rate of deposit growth;
- changes in the reputation of or expectations regarding the financial services industry or us with respect to practices, products or financial condition;
- any significant disruption in our operations or technology platform;
- our ability to maintain a compliance infrastructure suitable for our size and complexity;
- our ability to control costs;
- the amount of, and rate of growth in, our expenses as our business develops or changes or as it expands into new market areas;
- our ability to execute on our strategic and operational plans;
- any significant disruption of, or loss of public confidence in, the United States Mail service affecting our response rates and consumer payments;
- our ability to recruit and retain experienced personnel to assist in the management and operations of new products and services;
- changes in the labor and employment markets;
- fraud or misconduct by our customers, employees or business partners;
- competition from providers of products and services that compete with our businesses; and
- other risk factors listed from time to time in reports that we file with the SEC.

Any forward-looking statements made by or on behalf of Capital One speak only as of the date they are made or as of the date indicated, and Capital One does not undertake any obligation to update forward-looking statements as a result of new information, future events or otherwise. You should carefully consider the factors discussed above in evaluating these forward-looking statements. For additional information on factors that could materially influence forward-looking statements included in this report, see the risk factors in this report in Part II Item 1A. Risk Factors and in our 2011 Form 10-K in Part I Item 1A. Risk Factors.

Less: Intangible assets[1]	**(14,110)**	(13,908)
Tangible assets	**$ 280,067**	$ 191,806
Non-GAAP TCE Ratio		
Tangible common equity	**$ 22,840**	$ 15,758
Tangible assets	**280,067**	191,806
TCE ratio[2]	**8.2%**	8.2%
Regulatory Capital and Non-GAAP Tier 1 Common Equity Ratios		
Total stockholders equity	**$ 36,950**	$ 29,666
Less: Net unrealized gains recorded in AOCI[3]	**(328)**	(289)
Net losses on cash flow hedges recorded in AOCI[3]	**70**	71
Disallowed goodwill and other intangible assets[4]	**(14,057)**	(13,855)
Disallowed deferred tax assets	**(902)**	(534)
Other	**(2)**	(2)
Tier 1 common capital	**$ 21,731**	$ 15,057
Plus: Tier 1 restricted core capital items[5]	**3,636**	3,635
Tier 1 capital	**$ 25,367**	$ 18,692
Plus: Long-term debt qualifying as Tier 2 capital	**2,438**	2,438
Qualifying allowance for loan and lease losses	**2,314**	1,979
Other Tier 2 components	**17**	23
Tier 2 capital	**$ 4,769**	$ 4,440
Total risk-based capital[6]	**$ 30,136**	$ 23,132
Risk-weighted assets[7]	**$ 182,697**	$ 155,657

Tier 1 common ratio[8]	**11.9%**	9.7%
Tier 1 risk-based capital ratio[9]	**13.9%**	12.0%
Total risk-based capital ratio[10]	**16.5%**	14.9%

[1] Includes impact from related deferred taxes.
[2] Calculated based on tangible common equity divided by tangible assets.
[3] Amounts presented are net of tax.
[4] Disallowed goodwill and other intangible assets are net of related deferred tax liability.
[5] Consists primarily of trust preferred securities.
[6] Total risk-based capital equals the sum of Tier 1 capital and Tier 2 capital.

(7) Calculated based on prescribed regulatory guidelines.
(8) Tier 1 common ratio is a regulatory capital measure calculated based on Tier 1 common capital divided by risk-weighted assets.
(9) Tier 1 risk-based capital ratio is a regulatory capital measure calculated based on Tier 1 capital divided by risk-weighted assets.
(10) Total risk-based capital ratio is a regulatory capital measure calculated based on total risk-based capital divided by risk-weighted assets.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company

Capital One Financial Corporation, which was established in 1995, is a diversified financial services holding company headquartered in McLean, Virginia. Capital One Financial Corporation and its subsidiaries (the Company) offer a broad array of financial products and services to consumers, small businesses and commercial clients through branches, the internet and other distribution channels. Our principal subsidiaries include Capital One Bank (USA), National Association (COBNA), Capital One, National Association (CONA) and ING Bank, fsb. The Company and its subsidiaries are hereafter collectively referred to as we, us or our. CONA and COBNA are hereafter collectively referred to as the Banks. As one of the 10 largest banks in the United States based on deposits, we serve banking customers across the U.S. through the internet and through branch locations primarily in New York, New Jersey, Texas, Louisiana, Maryland, Virginia and the District of Columbia. In addition to bank lending and depository services, we offer credit and debit card products, mortgage banking and treasury management services. We offer our products outside of the United States principally through operations in the United Kingdom and Canada.

In 2011, we entered into a purchase and sale agreement with ING Groep N.V., ING Bank N.V., ING Direct N.V., ING Direct Bancorp (collectively, the ING Sellers), under which we would acquire substantially all of the ING Sellers ING Direct business in the United States (ING Direct). On February 17, 2012, we closed the acquisition of ING Direct, which included (i) the acquisition of all the equity interests of ING Bank, fsb, (ii) the acquisition of all the equity interests of each of WS Realty, LLC and ING Direct Community Development LLC and (iii) the acquisition of certain other assets and the assumption of certain other liabilities of ING Direct Bancorp. See Note 2 Acquisitions for additional information related to the ING Direct acquisition.

Our principal operations are organized into three primary business segments, which are defined based on the products and services provided, or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. In the first quarter of 2012, we re-aligned the reporting of our Commercial Banking business to reflect the operations on a product basis rather than by customer type. We provide additional information on the realignment of our Commercial Banking business segment below under Business Segment Results and in Note 14 Business Segments of this Report.

Basis of Presentation and Use of Estimates

The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States (U.S. GAAP) for interim financial information and should be read in conjunction with the audited consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2011 (2011 Form 10-K). Certain financial information that is normally included in annual financial statements prepared in conformity with U.S. GAAP, but is not required for interim reporting purposes, has been condensed or omitted. In the opinion of management, all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of our interim unaudited financial statements have been reflected.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and related disclosures. These estimates are based on information available as of the date of the consolidated financial statements. While management makes its best judgment, actual amounts or results could differ from these estimates. Interim period results may not be indicative of results for the full year.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Principles of Consolidation

The consolidated financial statements include the accounts of Capital One Financial Corporation and all other entities in which we have a controlling financial interest. All significant intercompany accounts and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the current period presentation.

Significant Accounting Policies

We provide a summary of our significant accounting policies in our 2011 Form 10-K under Notes to Consolidated Financial Statements Note 1 Summary of Significant Accounting Policies. Below we describe accounting standards that we adopted in 2012 and recently issued accounting standards that we have not yet adopted.

Accounting Standards Adopted in 2012

Goodwill Impairment

In September 2011, the FASB issued guidance that is intended to simplify goodwill impairment testing by providing entities with the option to first assess qualitatively whether it is necessary to perform the two-step quantitative analysis currently required. If an entity chooses to perform a qualitative assessment and determines that it is more likely than not that the fair value of a reporting unit is less than its carrying amount, the quantitative two-step goodwill impairment test is required. Otherwise, goodwill is deemed to be not impaired and no further evaluation analysis would be necessary. The amended goodwill impairment guidance does not affect the manner in which a company estimates fair value. The amended guidance was effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011, with early adoption permitted. We adopted the amended guidance on January 1, 2012. We had $13.6 billion in goodwill as of March 31, 2012, the value of which was not affected by the adoption of this standard.

Presentation of Comprehensive Income

In June 2011, the FASB issued new accounting guidance that revises the manner in which comprehensive income is required to be presented in financial statements. The new guidance requires companies to present the components of net income and other comprehensive income either as one continuous statement or as two consecutive statements. The guidance eliminates the option to present components of other comprehensive income in the statement of changes in stockholders equity. It does not change the items which must be reported in other comprehensive income, how such items are measured or when they must be reclassified from other comprehensive income to net income. The guidance requires retrospective application and was effective for interim and annual periods beginning on or after December 15, 2011. We adopted the guidance in the first quarter of 2012 and elected to present other comprehensive income in a separate statement immediately following our consolidated statement of income. Our adoption of the guidance had no effect on our financial condition, results of operations or liquidity since it impacts presentation only**.**

Fair Value Measurement: Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and International Financial Reporting Standards (IFRS)

In May 2011, the FASB issued amended guidance on fair value that is intended to provide a converged fair value framework for U.S. GAAP and IFRS. While the amended guidance continues to define fair value as an exit price, it changes some fair value measurement principles and expands the existing disclosure requirements for fair

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

value measurements. The amended guidance was effective for public entities during interim and annual periods beginning after December 15, 2011, with early adoption prohibited. The new guidance requires prospective application and disclosure in the period of adoption of the change, if any, in valuation techniques and related inputs resulting from application of the amendments and quantification of the total effect, if practicable. We adopted the amended guidance in the first quarter of 2012. The change in fair value measurement principles did not result in any changes to the fair value of our assets or liabilities carried at fair value and thus, had no effect on our financial condition, results of operations or liquidity. The new disclosures required by the amended guidance are included in Note 13 Fair Value of Financial Instruments .

Transfers and Servicing: Reconsideration of Effective Control for Repurchase Agreements

In April 2011, the FASB issued an amendment to the guidance for transfers and servicing with regard to repurchase agreements and other agreements that both entitle and obligate a transferor to repurchase or redeem financial assets before their maturity. This amendment removes the criterion related to collateral maintenance from the transferor s assessment of effective control. It focuses the assessment of effective control on the transferor s rights and obligations with respect to the transferred financial assets and not whether the transferor has the practical ability to perform in accordance with those rights or obligations. We adopted the amended guidance on January 1, 2012 which did not have a material impact on our consolidated financial statements.

Recently Issued but Not Yet Adopted Accounting Standards

Offsetting Financial Assets and Liabilities

In December 2011, the FASB issued guidance intended to enhance current disclosure requirements on offsetting financial assets and liabilities. The new disclosures will enable financial statement users to compare balance sheets prepared under U.S. GAAP and IFRS, which are subject to different offsetting models. Upon adoption, entities will be required to disclose both gross and net information about instruments and transactions eligible for offset in the balance sheet as well as instruments and transactions subject to an agreement similar to a master netting arrangement. The disclosures will be required irrespective of whether such instruments are presented gross or net on the balance sheet. The guidance is effective for annual and interim reporting periods beginning on or after January 1, 2013, with comparative retrospective disclosures required for all periods presented. Our adoption of the guidance will have no effect on our financial condition, results of operations or liquidity since it impacts disclosures only.

NOTE 2 ACQUISITIONS

We regularly explore opportunities to enter into strategic partnership agreements or acquire financial services companies and businesses to expand our distribution channels and grow our customer base. We may structure these transactions with both an initial payment and later contingent payments tied to future financial performance. In some partnership agreements, we may enter into collaborative risk-sharing arrangements that provide for revenue and loss sharing. We provide information on our accounting for acquisitions and partnership agreements in Note 2 Acquisitions and Restructuring Activities of our 2011 Form 10-K.

2012 Acquisitions

ING Direct

On June 16, 2011, we entered into a purchase and sale agreement with ING Sellers, under which we would acquire ING Direct. On February 17, 2012, we closed the acquisition of ING Direct, which included (i) the

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

acquisition of all the equity interests of ING Bank, fsb, (ii) the acquisition of all equity interests of each of WS Realty LLC and ING Direct Community Development LLC and (iii) the acquisition of certain other assets and the assumption of certain other liabilities of ING Direct Bancorp. Headquartered in Wilmington, Delaware, ING Direct is the largest direct bank in the United States. The ING Direct acquisition strengthens our customer franchise and brand and adds over seven million customers and approximately $84.4 billion in deposits to our Consumer Banking segment. With the ING Direct acquisition, we have grown to become the sixth largest depository institution and the largest direct banking institution in the United States.

The aggregate consideration paid by us in the ING Direct acquisition was approximately $6.3 billion in cash and 54,028,086 shares of Capital One common stock with a fair value of approximately $2.6 billion as of the acquisition date of February 17, 2012. We used current liquidity sources as well as proceeds from public debt and equity offerings described below to fund the cash consideration.

In the third quarter of 2011, we closed a public offering of four different series of our senior notes for total cash proceeds of approximately $3.0 billion and a public underwritten offering of 40 million shares of our common stock, subject to forward sale agreements. We settled the forward sale agreements entirely by physical delivery of shares of common stock in exchange for cash proceeds from the forward purchasers of approximately $1.9 billion on February 16, 2012. We incurred direct costs, including attorney, investment banking, consulting and accounting fees, related to the public offering of our common stock of $73 million, which were offset against the net proceeds at settlement and deferred.

We also incurred transaction costs related to the ING Direct acquisition totaling $62 million as of March 31, 2012, of which $25 million was recognized in 2011 and $37 million was recognized in the first quarter of 2012 and reported in our consolidated statement of income as a component of non-interest expense. These transaction costs do not include other merger-related expenses, such as integration costs.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Accounting for ING Direct Acquisition

The ING Direct acquisition was accounted for under the acquisition method of accounting, which requires, among other things, that we allocate the purchase price to the assets acquired and liabilities assumed based on their fair values as of the acquisition date. The following table summarizes our allocation of the ING Direct purchase price to the fair values of assets acquired and liabilities assumed.

(Dollars in millions)	Fair Value
Purchase price:	
Cash	$ 6,321
Fair value of Capital One common stock issued (54,028,086 shares)	2,638
Aggregate consideration transferred	8,959
Allocation of purchase price to net assets acquired:	
Assets:	
Cash and due from banks	$ 20,061
Investments	30,237
Loans held for investment	40,042
Loans held for sale	367
Premises and equipment	245
Accrued interest receivable[1]	170
Identifiable intangible assets	358
Other assets[1]	2,854
Total assets	94,334
Liabilities:	
Interest payable	31
Interest-bearing deposits	84,410
Other borrowings	6
Other liabilities[3]	334
Total liabilities	84,781
Net assets acquired	$ 9,553
Bargain purchase gain	$ 594

[1] Includes $79 million of accrued interest receivable attributable to loans held for investment.
[2] Other assets include $801 million of deferred tax assets, net of a valuation allowance of $8 million, as of the acquisition date.
[3] Other liabilities include $181 million of deferred tax liabilities as of the acquisition date.

The fair value of the net assets acquired from ING Direct of $9.6 billion at acquisition exceeded the purchase price of $9.0 billion, resulting in the recognition of a bargain purchase gain of $594 million, which is reported as a component of non-interest income on our consolidated statement of income for the first quarter of 2012. A substantial portion of the assets acquired from ING Direct were mortgage-related assets, which generally decrease in value as interest rates rise and increase in value as interest rates fall. The bargain purchase gain was driven largely

by a substantial decline in long-term interest rates between the period shortly after our announcement of the ING Direct acquisition and its closing, which resulted in an increase in the fair value of the acquired mortgage assets and the overall net fair value of assets acquired. Further, the purchase and sale agreement did not include a mechanism to adjust the purchase price to reflect the increase to the fair value of the net assets acquired.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

ING Direct Results

Our results for the first quarter of 2012 include the operations of ING Direct from the acquisition date of February 17, 2012, through the end of the quarter. The table below presents some of the impact of ING Direct on our results of operations for the first quarter of 2012. The table also includes condensed pro forma information on our combined results of operations as they may have appeared assuming the ING Direct acquisition had been completed on January 1, 2011. Included in the pro forma results are adjustments to reflect the impact of amortizing certain purchase accounting adjustments, such as the amortization of intangible assets and the accretion of interest income on certain acquired loans. Because the bargain purchase gain recognized at acquisition is a nonrecurring item, it is excluded from the pro forma results to present the information on a more comparative basis.

(Dollars in millions)	ING Direct Impact[1] Three Months Ended March 31, 2012	Combined Pro Forma Results[2] Three Months Ended March 31, 2012	2011
Revenue[3]	$ 237	$ 5,151	$ 5,280
Income from continuing operations, net of tax	37	948	1,104

(1) Reflects the approximate half-quarter impact of ING Direct on our results of operations in the first quarter of 2012.
(2) Reflects the combined pro forma results of operations of ING Direct and Capital One assuming the acquisition had occurred on January 1, 2011.
(3) Consists of net interest income and non-interest income.

The pro forma condensed combined financial information is presented for illustrative purposes only and does not indicate the actual combined financial results had the closing of ING Direct been completed on January 1, 2011, nor is the information indicative of the results of operations in future periods. The pro forma condensed combined financial information does not reflect the impact of possible business model changes nor does it consider any potential impacts of market conditions, expense efficiencies or other factors.

NOTE 3 DISCONTINUED OPERATIONS

Shutdown of Mortgage Origination Operations of Wholesale Mortgage Banking Unit

In the third quarter of 2007, we closed the mortgage origination operations of our wholesale mortgage banking unit, acquired by us in December 2006 as part of the North Fork acquisition. The results of the mortgage origination operations and wholesale banking unit have been accounted for as a discontinued operation and therefore not included in our results from continuing operations for the three months ended March 31, 2012 and 2011. We have no significant continuing involvement in these operations.

The following table summarizes the results from discontinued operations related to the closure of our wholesale mortgage banking unit:

(Dollars in millions)	Three Months Ended March 31, 2012	2011
Net interest expense	**$ 0**	$ 0
Non-interest expense	**(161)**	(25)
Loss from discontinued operations before taxes	**(161)**	(25)
Income tax benefit	**59**	9
Loss from discontinued operations, net of taxes	**$ (102)**	$ (16)

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The loss from discontinued operations includes an expense of $153 million ($97 million net of tax) and $39 million ($29 million net of tax) for the three months ended March 31, 2012 and 2011, respectively, attributable to provisions for mortgage loan repurchase losses related to representations and warranties provided on loans previously sold to third parties by the wholesale banking unit. The increase in the provision for mortgage loan repurchase losses was largely due to the Government Sponsored Enterprise (GSE) settlement which is described in more detail in Note 15 Commitment, Contingencies, and Guarantees .

The discontinued mortgage origination operations of our wholesale home loan banking unit had remaining assets of $304 million as of both March 31, 2012 and December 31, 2011, which consisted primarily of income tax receivables. Liabilities totaled $832 million and $680 million as of March 31, 2012 and December 31, 2011, respectively consisting primarily of reserves for representations and warranties on loans previously sold to third parties.

NOTE 4 INVESTMENT SECURITIES

Our investment securities portfolio, which had a fair value of $60.8 billion and $38.8 billion, as of March 31, 2012 and December 31, 2011, respectively, consists of U.S. Treasury and U.S. agency debt obligations; agency and non-agency residential and commercial mortgage-backed securities; other asset-backed securities collateralized primarily by credit card loans, auto loans and leases, student loans, auto dealer floor plan inventory loans and leases, equipment loans, and other; municipal securities; foreign government/agency bonds; covered bonds; and limited Community Reinvestment Act (CRA) equity securities. Our investment securities increased by $22.1 billion, or 57%, in the first quarter of 2012 which was primarily attributable to the acquisition of ING Direct which included investment securities of $30.2 billion at acquisition. Our investment securities portfolio continues to be concentrated in securities that generally have lower credit risk and high credit ratings, such as securities issued and guaranteed by the U.S. Treasury and government sponsored enterprises or agencies. Our investments in U.S. Treasury and agency securities, based on fair value, represented 72% of our total investment securities portfolio as of March 31, 2012, compared with 69% as of December 31, 2011.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Securities Amortized Cost and Fair Value

All of our investment securities were classified as available-for-sale as of March 31, 2012 and December 31, 2011, and are reported in our consolidated balance sheet at fair value. The following tables present the amortized cost, fair values and corresponding gross unrealized gains (losses), by major security type, for our investment securities as of March 31, 2012 and December 31, 2011. The gross unrealized gains (losses) related to our available-for-sale securities are recorded, net of tax, as a component of accumulated other comprehensive income (AOCI).

Asset-backed securities (ABS[(5)])	10,119	45	0	(14)	(14)	10,150
Other[(6)]	462	51	0	(3)	(3)	510
Total securities available for sale	$ 38,303	$ 683	$ (170)	$ (57)	$ (227)	$ 38,759

(1) Represents the amount of cumulative non-credit other-than-temporary impairment (OTTI) losses recorded in AOCI. These losses are included in total gross unrealized losses.

(2) Represents the amount of cumulative gross unrealized losses on securities for which we have not recognized OTTI.

(3) Primarily consists of debt securities issued by Fannie Mae and Freddie Mac, which had an amortized cost of $130 million at both March 31, 2012 and December 31, 2011, and fair value of $136 million and $137 million, as of March 31, 2012 and December 31, 2011, respectively.

(4) Consists of mortgage-backed securities issued by Fannie Mae, Freddie Mac and Ginnie Mae with an amortized cost of $15.5 billion, $10.4 billion and $15.2 billion and $12.3 billion, $8.9 billion and $4.5 billion, as of March 31, 2012 and December 31, 2011, respectively, and fair value of $15.7 billion, $10.6 billion and $15.3 billion and $12.6 billion, $9.1 billion and $4.5 billion, as of March 31, 2012 and December 31, 2011, respectively. The book value of Fannie Mae, Freddie Mac and Ginnie Mae investments exceeded 10% of our stockholders equity as of March 31, 2012 and December 31, 2011, respectively.

(5) Consists of securities collateralized by credit card loans, auto dealer floor plan inventory loans and leases, auto loans, student loans, equipment loans, and other. The distribution among these asset types was approximately 75% credit card loans, 12% auto dealer floor plan inventory loans and leases, 6% auto loans, 2% student loans, 2% equipment loans, and 3% other as of March 31, 2012. In comparison, the distribution was approximately 75% credit card loans, 11% auto dealer floor plan inventory loans and leases, 6% auto loans, 4% student loans, 2% equipment loans, and 2% other as of December 31, 2011. Approximately 85% of the securities in our asset-backed security portfolio were rated AAA or its equivalent as of March 31, 2012, compared with 86% as of December 31, 2011.

(6) Consists of foreign government/agency bonds, covered bonds, municipal securities and equity investments, primarily related to CRA activities.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The gross unrealized losses on our available-for-sale securities of $228 million as of March 31, 2012 relate to 979 individual securities. Our investments in non-agency MBS and non-agency asset-backed securities accounted for $174 million, or 76%, of total gross unrealized losses as of March 31, 2012. Of the $228 million gross unrealized losses as of March 31, 2012, $125 million related to securities that had been in a loss position for more than 12 months. We conduct periodic reviews of all securities with unrealized losses to assess whether the impairment is other-than-temporary. Based on our assessments, we have recorded OTTI for a portion of our non-agency residential MBS, which is discussed in more detail later in this footnote.

Maturities and Yields of Securities Available for Sale

The following table summarizes the remaining scheduled contractual maturities, assuming no prepayments, of our investment securities as of March 31, 2012:

	March 31, 2012	
(Dollars in millions)	Amortized Cost	Fair Value
Due in 1 year or less	$ 4,764	$ 4,775
Due after 1 year through 5 years	8,589	8,631
Due after 5 years through 10 years	3,154	3,210
Due after 10 years[1]	43,810	44,194
Total	$ 60,317	$ 60,810

[1] Investments with no stated maturities, which consist of equity securities, are included with contractual maturities due after 10 years.

(1) Average yields are calculated based on the amortized cost of each security.

(2) Consists of debt securities issued by Fannie Mae and Freddie Mac.

(3) Consists of mortgage-backed securities issued by Fannie Mae, Freddie Mac and Ginnie Mae.

(4) Yields of tax-exempt securities are calculated on a fully taxable-equivalent (FTE) basis.

Other-Than-Temporary Impairment

We evaluate all securities in an unrealized loss position at least quarterly, and more often as market conditions require, to assess whether the impairment is other-than-temporary. Our OTTI assessment is a subjective process requiring the use of judgments and assumptions. Accordingly, we consider a number of qualitative and quantitative criteria in our assessment, including the extent and duration of the impairment; recent events specific to the issuer and/or industry to which the issuer belongs; the payment structure of the security; external credit ratings and the failure of the issuer to make scheduled interest or principal payments; the value of underlying collateral; our intent and ability to hold the security; and current market conditions.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

We assess, measure, and recognize OTTI in accordance with the accounting guidance for recognition and presentation of OTTI. Under this guidance, if we determine that impairment on our debt securities is other-than-temporary and we have made the decision to sell the security, or it is more likely than not that we will be required to sell the security prior to recovery of its amortized cost basis, we recognize the entire portion of the impairment in earnings. If we have not made a decision to sell the security and we do not expect that we will be required to sell the security prior to recovery of the amortized cost basis, we recognize only the credit component of OTTI in earnings. The remaining unrealized loss due to factors other than credit, or the non-credit component, is recorded in AOCI. We determine the credit component based on the difference between the security s amortized cost basis and the present value of its expected future cash flows, discounted based on the purchase yield. The non-credit component represents the difference between the security s fair value and the present value of expected future cash flows.

The following table summarizes other-than-temporary impairment losses on debt securities recognized in earnings for the three months ended March 31, 2012 and 2011:

	Three Months Ended March 31,	
(Dollars in millions)	**2012**	**2011**
Total OTTI losses	**$ 4**	$ 23
Portion of OTTI impairment losses recorded in AOCI	**10**	(20)
Net OTTI losses recognized in earnings	**$ 14**	$ 3

As indicated in the table above, we recorded credit related losses in earnings totaling $14 million and $3 million for the three months ended March 31, 2012 and 2011, respectively. The cumulative non-credit related portion of OTTI on these securities recorded in AOCI totaled $116 million and $111 million for the three months ended March 31, 2012 and 2011, respectively. We estimate the portion of loss attributable to credit using a discounted cash flow model, and we estimate the expected cash flows from the underlying collateral using industry-standard third party modeling tools. These tools take into consideration security specific delinquencies, product specific delinquency roll rates and expected severities. Key assumptions used in estimating the expected cash flows include default rates, loss severity and prepayment rates. Assumptions used can vary widely based on the collateral underlying the securities and are influenced by factors such as collateral type, loan interest rate, geographical location of the borrower, and borrower characteristics.

We believe the gross unrealized losses related to all other securities of $112 million and $57 million as of March 31, 2012 and December 31, 2011, respectively, are attributable to issuer specific credit spreads and changes in market interest rates and asset spreads. Therefore, we currently do not expect to incur credit losses related to these securities. In addition, we have no intent to sell these securities with unrealized losses and it is not more likely than not that we will be required to sell these securities prior to recovery of the amortized cost. Accordingly, we have concluded that the impairment on these securities is not other-than-temporary.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The table below presents activity for the three months ended March 31, 2012 and 2011, related to the credit component of OTTI recognized in earnings on investment debt securities for which a portion of the OTTI losses, the non-credit component, was recorded in AOCI:

	Three Months Ended March 31,	
(Dollars in millions)	**2012**	**2011**
Credit loss component, beginning of period	**$ 68**	$ 49
Additions:		
Initial credit impairment	**1**	1
Subsequent credit impairment	**13**	2
Total additions	**14**	3
Reductions:		
Sales of credit-impaired securities	**(0)**	(2)
Total reductions	**(0)**	(2)
Ending balance	**$ 82**	$ 50

AOCI, Net of Taxes, Related to Securities Available for Sale

The table below presents the changes in AOCI, net of taxes, related to our available-for-sale securities. The net unrealized gains (losses) represent the fair value adjustments recorded on available-for-sale securities, net of tax, during the period. The net reclassification adjustment for net realized losses (gains) represent the amount of those fair value adjustments, net of tax, that were recognized in earnings due to the sale of an available-for-sale security or the recognition of an other-than-temporary impairment loss.

	Three Months Ended March 31,	
(Dollars in millions)	**2012**	**2011**
Beginning balance AOCI related to securities available for sale, net of tax[1]	**$ 286**	$ 369
Net unrealized holding gains (losses), net of tax[2]	**14**	(55)
Net realized losses (gains) reclassified from AOCI into earnings, net of tax[3]	**10**	(3)
Ending balance AOCI related to securities available for sale, net of tax	**$ 310**	$ 311

[1] Net of tax benefit of $157 million and $203 million for the three months ended March 31, 2012 and 2011, respectively.
[2] Net of tax benefit (expense) of $8 million and $(30) million for the three months ended March 31, 2012 and 2011, respectively.
[3] Net of tax (benefit) expense of $5 million and $(2) for the three months ended March 31, 2012 and 2011, respectively.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Realized Gains and Losses on Securities Available for Sale

The following table presents the gross realized gains and losses on the sale and redemption of available-for-sale securities recognized in earnings for the three months ended March 31, 2012 and 2011. The gross realized investment losses presented below exclude credit losses recognized in earnings attributable to OTTI. We sold approximately $7.3 billion and $846 million of investment securities for the three months ended March 31, 2012 and 2011, respectively. These sales resulted in net gains of $11 million and $3 million for the three months ended March 31, 2012 and 2011, respectively.

(Dollars in millions)	Three Months Ended March 31, 2012	2011
Gross realized investment gains	**$ 17**	$ 5
Gross realized investment losses	**(6)**	(2)
Net realized gains	**$ 11**	$ 3
Total proceeds from sales	**$ 7,337**	$ 846

Securities Pledged

As part of our liquidity management strategy, we pledge securities to secure borrowings from the Federal Home Loan Bank (FHLB) and the Federal Reserve Bank. We also pledge securities to secure trust and public deposits and for other purposes as required or permitted by law. We pledged securities with a fair value of $8.2 billion and $8.8 billion as of March 31, 2012 and December 31, 2011, respectively.

Securities Acquired

In connection with the acquisition of ING Direct on February 17, 2012, we acquired debt securities with a fair value of $30.2 billion. We concluded that a portion of the debt securities we acquired from ING Direct had some evidence of credit deterioration for which it is probable at the date of acquisition that we will not collect all contractually required principal and interest payments. These debt securities are considered credit impaired debt securities. The ING Direct debt securities we concluded were credit impaired had contractual outstanding unpaid principal and interest balance at acquisition of $5.6 billion and estimated fair value of $2.9 billion.

In determining the fair value of the credit impaired debt securities at acquisition, we employed a methodology consistent with how we derive the fair value for our existing available-for-sale securities population. That is, we utilized third party pricing services to obtain fair value measures for these securities. The techniques used by these pricing services utilize observable market data to the extent available. Pricing models may be used, which can vary by asset class and may incorporate available trade, bid and other market information. Across asset classes, information such as trader/dealer input, credit spreads, forward curves, and prepayment speeds are used to help determine appropriate valuations. Because many fixed income securities do not trade on a daily basis, the evaluated pricing applications may apply available information through processes such as benchmarking curves, like securities, sector groupings, and matrix pricing to prepare valuations. In addition, model processes are used by the pricing services to develop prepayment and interest rate scenarios.

We validated the pricing obtained from the primary pricing providers through comparison of pricing to additional sources, including other pricing services, dealer pricing indications in transaction results, and other internal sources. Pricing variances among different pricing sources were analyzed and validated.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The difference between contractually required payments due and the cash flows we expect to collect at acquisition, considering the impact of prepayments, is referred to as the nonaccretable difference. The nonaccretable difference, which is neither accreted into income nor recorded on our consolidated balance sheet, reflects estimated future credit losses expected to be incurred over the life of the security. The excess of cash flows expected to be collected over the estimated fair value of credit impaired debt securities is referred to as the accretable yield. This amount is not recorded on our consolidated balance sheet, but is accreted into interest income over the remaining life of the security using the effective interest method.

Subsequent to acquisition, we complete quarterly evaluations of expected cash flows. Decreases in expected cash flows attributable to credit will result in an other-than-temporary impairment. Increases in expected cash flows are recognized prospectively over the remaining life of the security through adjustment to the accretable yield.

For acquired debt securities that are not deemed impaired at acquisition, subsequent to acquisition we recognize unamortized premiums and discounts in interest income over the contractual life of the security using the effective interest method.

Initial Fair Value and Accretable Yield of Acquired Credit Impaired Debt Securities

The table below displays the contractually required principal and interest cash flows expected to be collected and the fair value at acquisition related to the ING Direct credit-impaired debt securities we acquired. The table also displays the nonaccretable difference and the accretable yield at acquisition.

At Acquisition on February 17, 2012

	Purchased Credit-Impaired Securities
Contractually outstanding principal and interest at acquisition	$ 5,646
Less: Nonaccretable difference (expected principal losses of $1,103 million and foregone interest of $157 million)	(1,260)
Cash flows expected to be collected at acquisition[1]	4,386
Less: Accretable yield	(1,474)
Fair value of securities acquired	$ 2,912

[1] Represents undiscounted expected principal and interest cash flows at acquisition.

NOTE 5 LOANS

Loan Portfolio Composition

Our total loan portfolio consists of loans we own and loans underlying our securitization trusts. The table below presents the composition of our held-for investment loan portfolio, including restricted loans for securitization investors, as of March 31, 2012 and December 31, 2011. Our loan portfolio consists of credit card, consumer banking and commercial banking loans. Credit card loans consist of domestic and international credit card loans as well as installment loans. Consumer banking loans consist of auto, home, and retail banking loans. Commercial banking loans consist of commercial and multifamily real estate, commercial and industrial and small-ticket commercial real estate loans.

(Dollars in millions)	March 31, 2012	December 31, 2011
Credit card business:		
Domestic credit card loans	**$ 51,607**	$ 54,682
International credit card loans	**8,303**	8,466
Total credit card loans	**59,910**	63,148
Domestic installment loans	**1,566**	1,927
Total installment loans	**1,566**	1,927
Total credit card	**61,476**	65,075
Consumer Banking business:		
Auto	**23,568**	21,779
Home loan	**49,550**	10,433
Other retail	**4,182**	4,103

Commercial Banking business:[(1)]		
Commercial and multifamily real estate	**15,702**	15,736
Commercial and industrial	**17,761**	17,088
Total commercial lending	**33,463**	32,824
Small-ticket commercial real estate	**1,443**	1,503
Total commercial banking	**34,906**	34,327
Other:		
Other loans	**140**	175

Total loans	**$ 173,822**	$ 135,892

(1) Includes construction loans and land development loans totaling $2.1 billion and $2.2 billion as of March 31, 2012 and December 31, 2011, respectively.

Credit Quality

We closely monitor economic conditions and loan performance trends to manage and evaluate our exposure to credit risk. Trends in delinquency ratios are an indicator, among other considerations, of credit risk within our loan portfolios. The level of nonperforming assets represents another indicator of the potential for future credit losses. Accordingly, key metrics we track and use in evaluating the credit quality of our loan portfolio include delinquency and nonperforming asset rates, as well as charge-off rates and our internal risk ratings of larger balance, commercial loans.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The following table summarizes the payment status of loans in our total loan portfolio, including an aging of delinquent loans, loans 90 days or more past due continuing to accrue interest and loans classified as nonperforming. We present information below on the credit performance of our loan portfolio, by major loan category, including key metrics that we use in tracking changes in the credit quality of each of our loan portfolios. The delinquency aging includes all past due loans, both performing and nonperforming, as of March 31, 2012 and December 31, 2011.

Loans 90 days or more past due totaled approximately $1.8 billion and $2.0 billion as of March 31, 2012 and December 31, 2011, respectively. Loans classified as nonperforming totaled $1.0 billion and $1.1 billion as of March 31, 2012 and December 31, 2011, respectively.

(1) Acquired loans include loans acquired and accounted for under the accounting guidance for loans acquired in a transfer including business combinations. These loans are subsequently accounted for based on the acquired loan s expected cash flows. Excludes loans subsequently accounted for based on the acquired loan s contractual cash flows.

(2) Acquired loans are excluded from loans reported as 90 days and still accruing interest and nonperforming loans

Credit Card

Our credit card loan portfolio is generally highly diversified across millions of accounts and multiple geographies without significant individual exposures. We therefore generally manage credit risk on a portfolio basis. The risk in our credit card portfolio is correlated with broad economic trends, such as unemployment rates, gross domestic product (GDP) growth, and home values, as well as customer liquidity, which can have a material effect on credit performance. The primary factors we assess in monitoring the credit quality and risk of our credit card portfolio are delinquency and charge-off trends, including an analysis of the migration of loans between delinquency categories over time. The table below displays the geographic profile of our credit card loan portfolio and delinquency statistics as of March 31, 2012 and December 31, 2011. We also present comparative net-charge offs for the first quarter of 2012 and 2011.

International credit card	114	5.52	125	5.74
Total[3]	$ 645	4.14%	$ 929	6.13%

(1) Percentages by geographic region within the domestic and international credit card portfolios are calculated based on the total held-for-investment credit card loans as of the end of the reported period.

(2) Delinquency rates calculated by dividing delinquent credit card loans by the total balance of credit card loans held for investment as of the end of the reported period.

(3) Calculated by dividing net charge-offs by average credit card loans held for investment during 2012 and 2011.

The 30+ day delinquency rate for our entire credit card loan portfolio, decreased to 3.51% as of March 31, 2012, from 3.86% as of December 31, 2011, reflecting strong underlying credit improvement trends.

Consumer Banking

Our consumer banking loan portfolio consists of auto, home loan and retail banking loans. Similar to our credit card loan portfolio, the risk in our consumer banking loan portfolio is correlated with broad economic trends, such as unemployment rates, gross domestic product (GDP) growth, and home values, as well as customer liquidity, which can have a material effect on credit performance. Delinquency, nonperforming loans and charge-off trends are key factors we assess in monitoring the credit quality and risk of our consumer banking loan portfolio. The table below displays the geographic profile of our consumer banking loan portfolio, including acquired loans. We also present the delinquency and nonperforming loan rates of our consumer banking loan portfolio, excluding acquired loans, as of March 31, 2012 and December 31, 2011, and net-charge offs for the quarter ended March 31, 2012 and 2011.

(1) Percentages by geographic region are calculated based on the total held-for-investment consumer banking loans as of the end of the reported period.

(2) Credit performance statistics exclude acquired loans, which were recorded at fair value at acquisition. Although acquired loans may be contractually delinquent, we separately track these loans and do not include them in our delinquency and nonperforming loan statistics as the fair value recorded at acquisition included an estimate of credit losses expected to be realized over the remaining lives of the loans.

(3) Calculated by dividing net charge-offs by average loans held for investment for the first quarter of 2012 and 2011.

Home Loan

Our home loan portfolio consists of both first-lien and second-lien residential mortgage loans. In evaluating the credit quality and risk of our home loan portfolio, we continually monitor a variety of mortgage loan characteristics that may affect the default experience on our overall home loan portfolio, such as vintage, geographic concentrations, lien priority and product type. Certain loan concentrations have experienced higher delinquency rates as a result of the significant decline in home prices since the home price peak in 2006 and rise in unemployment. These loan concentrations include loans originated during 2008, 2007 and 2006 in an environment of decreasing home sales, broadly declining home prices and more relaxed underwriting standards and loans on properties in Arizona, California, Florida and Nevada, which have experienced the most severe decline in home prices. The following table presents the distribution of our home loan portfolio as of March 31, 2012 and December 31, 2011, based on selected key risk characteristics.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Commercial Banking

We evaluate the credit risk of commercial loans individually and use a risk-rating system to determine the credit quality of our commercial loans. We assign internal risk grades to loans based on relevant information about the ability of borrowers to service their debt. In determining the risk rating of a particular loan, among the factors considered are the borrower s current financial condition, historical credit performance, projected future credit performance, prospects for support from financially responsible guarantors, the estimated realizable value of any collateral and current economic trends. The ratings scale based on our internal risk-rating system is as follows:

Noncriticized: Loans that have not been designated as criticized, frequently referred to as pass loans.

Criticized performing: Loans in which the financial condition of the obligor is stressed, affecting earnings, cash flows or collateral values. The borrower currently has adequate capacity to meet near-term obligations; however, the stress, left unabated, my result in deterioration of the repayment prospects at some future date.

Criticized nonperforming: Loans that are not adequately protected by the current sound worth and paying capacity of the obligor or the collateral pledged, if any. Loans classified as criticized nonperforming have a well-defined weakness, or weaknesses, which jeopardize the repayment of the debt. These loans are characterized by the distinct possibility that we will sustain a credit loss if the deficiencies are not corrected.

We use our internal risk-rating system for regulatory reporting, determining the frequency of review of the credit exposures and evaluation and determination of the allowance for commercial loans. Loans of $1 million or more designated as criticized performing and criticized nonperforming are reviewed quarterly by management for further deterioration or improvement to determine if they are appropriately classified/graded and whether impairment exists. All other loans greater than $1 million are specifically reviewed at least annually to determine the appropriate loan grading. In addition, during the renewal process of any loan, as well if a loan becomes past due, we evaluate the risk rating.

CAPITAL ONE FINANCIAL CORPORATION

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

TDR loans accounted for $1.6 billion of impaired loans as of March 31, 2012 and December 31, 2011, respectively. Consumer TDR loans classified as performing totaled $1.1 billion, respectively, as of March 31, 2012, and December 31, 2011. Commercial TDR loans classified as performing totaled $310 million, and $305 million, respectively, as of March 31, 2012 and December 31, 2011.

As part of our loan modifications to borrowers experiencing financial difficulty, we may provide multiple concessions to minimize our economic loss and improve long-term loan performance and collectability. The following tables present the types, amounts and financial effects of loans modified and accounted for as troubled debt restructurings during the period:

	March 31, 2012						
		Reduced Interest Rate		Term Extension		Balance Reduction	
(Dollars in millions)	Total Loans Modified[1]	% of TDR Activity[2][8]	Average Rate Reduction[3]	% of TDR Activity[4][8]	Average Term Extension (Months)[5]	% of TDR Activity[6][8]	Gross Balance Reduction[7]

Total	$ 213	67%	15.15%	42%	15	0%	$ 0

(1) Represents total loans modified and accounted for as a TDR during the period. Paydowns, charge-offs and any other changes in the loan carrying value subsequent to the loan entering TDR status are not reflected.
(2) Percentage of loans modified and accounted for as a TDR during the period that were granted a reduced interest rate.
(3) Weighted average interest rate reduction for those loans that received an interest rate concession.
(4) Percentage of loans modified and accounted for as a TDR during the period that were granted a maturity date extension.

(5) Weighted average change in maturity date for those loans that received a maturity date extension.

(6) Percentage of loans modified and accounted for as a TDR during the period that were granted forgiveness or forbearance of a portion of their balance.

(7) Total amount of forgiven or forborne balances.

(8) Due to multiple concessions granted to some troubled borrowers, percentages may total more than 100% for certain loan types.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

TDR Subsequent Payment Defaults of Completed TDR Modifications

The following table presents the type, number and amount of loans accounted for as TDRs that experienced a payment default during the period and had completed a modification event in the twelve months prior to the payment default. A payment default occurs if the loan is either 90 days or more delinquent or the loan has been charged-off as of the end of the period presented.

	March 31, 2012	
(Dollars in millions)	Number of contracts	Total Loans

Total	21,659	$ 97

[1] The regulatory regime in the United Kingdom (U.K.) requires U.K. credit card businesses to accept payment plan proposals even when the proposed payments are less than the contractual minimum amount. As a result, loans entering long-term TDR payment programs in the U.K. typically continue to age and ultimately charge-off even when fully in compliance with the TDR program terms.

Acquired Loans

Acquired loans consist of the substantial majority of loans acquired in the Chevy Chase Bank and ING Direct business combinations, which we recorded at fair value at acquisition and accounted for under applicable accounting guidance. This accounting methodology takes into consideration estimated credit losses expected to be realized over the remaining lives of the loans. This accounting methodology is applicable to purchase credit-impaired loans which are not otherwise scoped out of the guidance, however, we also made a policy election to account for

certain non-credit impaired loans under the same guidance.

Initial Fair Value and Accretable Yield of Acquired Loans

At acquisition of ING Direct, we estimated the cash flows we expected to collect on these loans. Under the accounting guidance for loans acquired in a transfer, including a business combination, the difference between the contractually required payments and the cash flows expected to be collected at acquisition is referred to as the

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

nonaccretable difference. This difference is neither accreted into income nor recorded on our consolidated balance sheet. We apply judgmental prepayment assumptions to both contractually required payments and cash flows expected to be collected at acquisition. The excess of cash flows expected to be collected over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loan, or pool of loans, using the effective yield method. The table below displays the contractually required principal and interest, cash flows expected to be collected and fair value at acquisition related to the ING Direct loans we acquired that are accounted for based on expected cash flows. The table also displays the nonaccretable difference and the accretable yield at acquisition.

	At Acquisition on February 17, 2012		
(Dollars in millions)	**Total**	**Impaired Loans**	**Non-Impaired Loans**
Contractually required principal and interest at acquisition	$ 50,649	$ 3,605	$ 47,044
Less: Nonaccretable difference	(4,443)	(2,343)	(2,100)
Cash flows expected to be collected at acquisition[1]	46,206	1,262	44,944
Less: Accretable yield	(6,644)	(94)	(6,550)
Fair value of loans acquired[2][3]	$ 39,562	$ 1,168	$ 38,394

(1) Represents undiscounted expected principal and interest cash flows at acquisition.

(2) A portion of the loans acquired in connection with the ING Direct acquisition is accounted for based on the loan s contractual cash flows rather than the expected cash flows. These loans, which had an estimated fair value at acquisition of $559 million, are not included in the above tables. The contractual cash flows for these loans at acquisition was $858 million of which we do not expect to collect $15 million.

(3) A portion of the loans acquired in connection with the ING Direct acquisition was classified as held for sale. These loans, which had an estimated fair value at acquisition of $367 million, are not included in the above tables. The contractual cash flows for these loans at acquisition was $384 million, of which we do not expect to collect $16 million.

Outstanding Balance and Carrying Value of Acquired Loans

The table below presents the outstanding contractual balance and the carrying value of the ING Direct and Chevy Chase Bank acquired loans as of March 31, 2012 and December 31, 2011:

	March 31, 2012			December 31, 2011		
(Dollars in millions)	**Total**	**Impaired Loans**	**Non-Impaired Loans**	**Total**	**Impaired Loans**	**Non-Impaired Loans**
Contractual balance	**$ 45,434**	**$ 6,866**	**$ 38,568**	$ 5,751	$ 4,565	$ 1,186
Carrying value[1]	**$ 43,176**	**$ 4,537**	**$ 38,639**	$ 4,658	$ 3,576	$ 1,082

(1) Includes $40 million and $27 million of cumulative impairment recognized as of March 31, 2012 and December 31, 2011, respectively.

Changes in Accretable Yield of Acquired Loans

Subsequent to acquisition, we are required to periodically evaluate our estimate of cash flows expected to be collected. These evaluations, performed quarterly, require the continued use of key assumptions and estimates, similar to the initial estimate of fair value. Subsequent changes in the estimated cash flows expected to be collected may result in changes in the accretable yield and nonaccretable difference or reclassifications from nonaccretable yield to accretable. Increases in the cash flows expected to be collected will generally result in an

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

increase in interest income over the remaining life of the loan or pool of loans. Decreases in expected cash flows due to further credit deterioration will generally result in an impairment charge recognized in our provision for loan and lease losses, resulting in an increase to the allowance for loan losses. We increased the allowance related to these pools of loans by $13 million for the three months ended March 31, 2012. We recorded impairment through our provision for credit losses of $13 million and $8 million for the first three months of 2012 and 2011, respectively, related to acquired loans. The cumulative impairment recognized on acquired loans totaled $40 million as of March 31, 2012 and $27 million as of December 31, 2011.

The following table presents changes in the accretable yield related to the acquired ING Direct and Chevy Chase Bank loans:

(Dollars in millions)	Total	Impaired Loans	Non-Impaired Loans
Accretable yield as of December 31, 2010	$ 2,012	$ 1,754	$ 258
Accretion recognized in earnings	(431)	(365)	(66)
Reclassifications from nonaccretable difference for loans with improvement in expected cash flows[1]	237	232	5
Reductions in accretable yield for non-credit related changes in expected cash flows[2]	(66)	(55)	(11)
Accretable yield as of December 31, 2011	**1,752**	**1,566**	**186**
Acquired Loans Accretable Yield	**6,644**	**94**	**6,550**
Accretion recognized in earnings	**(297)**	**(80)**	**(217)**
Reclassifications from nonaccretable difference for loans with improvement in expected cash flows[1]	**4**	**4**	**(0)**
Reductions in accretable yield for non-credit related changes in expected cash flows[2]	**2**	**(3)**	**5**
Accretable yield as of March 31, 2012	**$ 8,105**	**$ 1,581**	**$ 6,524**

(1) Represents increases in accretable yields for those pools with increases primarily the result of improved credit performance.
(2) Represents changes in accretable yields for those pools with reductions driven primarily by changes in prepayment levels.

Unfunded Lending Commitments

We manage the potential risk in credit commitments by limiting the total amount of arrangements, both by individual customer and in total, by monitoring the size and maturity structure of these portfolios and by applying the same credit standards for all of our credit activities. Unused credit card lines available to our customers totaled $200.3 billion and $206.0 billion as of March 31, 2012 and December 31, 2011, respectively. While these amounts represented the total available unused credit card lines, we have not experienced, and do not anticipate, that all of our customers will access their entire available line at any given point in time.

In addition to available unused credit card lines, we enter into commitments to extend credit that are legally binding conditional agreements having fixed expirations or termination dates and specified interest rates and purposes. These commitments generally require customers to maintain certain credit standards. Collateral requirements and loan-to-value ratios are the same as those for funded transactions and are established based on management s credit assessment of the customer. These commitments may expire without being drawn upon.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Therefore, the total commitment amount does not necessarily represent future funding requirements. The outstanding unfunded commitments to extend credit other than credit card lines were approximately $17.9 billion and $14.8 billion as of March 31, 2012 and December 31, 2011, respectively.

We maintain a reserve for unfunded loan commitments and letters of credit to absorb estimated probable losses related to these unfunded credit facilities in other liabilities, on our consolidated balance sheets. Our reserve for unfunded loan commitments and letters of credit was $60 million and $66 million as of March 31, 2012 and December 31, 2011, respectively. See Note 6 Allowance for Loan and Lease Losses below for additional information.

NOTE 6 ALLOWANCE FOR LOAN AND LEASE LOSSES

We maintain an allowance for loan and lease losses (the allowance) that represents management s best estimate of incurred loan and lease credit losses inherent in our held-for-investment portfolio as of each balance sheet date. We do not maintain an allowance for held for sale loans or acquired loans that are performing in accordance with or better than our expectations as of the date of acquisition, as the fair values of these loans already reflect a credit component.

In addition to the allowance for loan and lease losses, we also estimate probable losses related to unfunded lending commitments, such as letters of credit and financial guarantees, and binding unfunded loan commitments. The provision for unfunded lending commitments is included in the provision for credit losses on our consolidated statements of income and the related reserve for unfunded lending commitments is included in other liabilities on our consolidated balance sheets. See Note 1 Summary of Significant Accounting Policies in our 2011 Form 10-K for a description of the methodologies and policies for determining our allowance for loan and lease losses for each of our loan portfolio segments.

Allowance for Loan and Lease Losses Activity

The allowance for loan and lease losses is increased through the provision for credit losses and reduced by net charge-offs. The provision for credit losses, which is charged to earnings, reflects credit losses we believe have been incurred and will eventually be reflected over time in our charge-offs. Charge-offs of uncollectible amounts are deducted from the allowance and subsequent recoveries are included. The table below summarizes changes in the allowance for loan and lease losses, by portfolio segment, for the three months ended March 31, 2012 and 2011:

	Three Months Ended March 31, 2012

(1) Other consists of our discontinued GreenPoint mortgage operations loan portfolio and our community redevelopment loan portfolio.
(2) The reduction in the provision for credit losses attributable to Kohl s was $193 million for the first three months of 2012. Loss sharing amounts attributable to Kohl s reduced charge-offs by $40 million for the first three months of 2012. The expected reimbursement from Kohl s netted in our allowance for loan and lease losses was approximately $153 million as of March 31, 2012.

Components of Allowance for Loan and Lease Losses by Impairment Methodology

The table below presents the components of our allowance for loan and lease losses, by loan category and impairment methodology, and the recorded investment of the related loans as of March 31, 2012 and December 31, 2011:

	March 31, 2012							
(Dollars in millions)	Credit Card	Auto	Consumer Home Loan	Retail Banking	Total Consumer	Commercial	Other	Total
Allowance for loan and lease losses by impairment methodology:

(1) The formula-based component of the allowance for credit card and other consumer loans that we collectively evaluate for impairment is based on a statistical calculation supplemented by judgment and interpretation. The formula-based component of the allowance for commercial loans that we collectively evaluate for impairment is based on our historical loss experience for loans with similar characteristics and consideration of credit quality supplemented by management judgment and interpretation.

(2) The asset specific component of the allowance for smaller-balance impaired loans is calculated on a pool basis using historical loss experience for the respective class of assets. The asset-specific component of the allowance for larger-balance, commercial loans is individually calculated for each loan.

NOTE 7 VARIABLE INTEREST ENTITIES AND SECURITIZATIONS

In the normal course of business, we enter into various types of transactions with entities that are considered to be variable interest entities (VIEs). Historically, our primary involvement with VIEs related to our securitization transactions in which we transferred assets from our balance sheet to securitization trusts. These securitization trusts typically meet the definition of a VIE. We generally securitized credit card loans, auto loans, home loans and installment loans, which provided a source of funding for us and as a means of transferring a certain portion of the economic risk of the loans or debt securities to third parties.

Under revised consolidation accounting guidance that became effective on January 1, 2010, the entity that has a controlling financial interest in a VIE is referred to as the primary beneficiary and is required to consolidate the VIE. As a result of this guidance, the vast majority of the VIEs in which we are involved have been consolidated in our financial statements.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Summary of Consolidated and Unconsolidated VIEs

The table below presents a summary of VIEs, aggregated based on VIEs with similar characteristics, in which we had continuing involvement or held a variable interest as of March 31, 2012 and December 31, 2011. We separately present information for consolidated and unconsolidated VIEs.

For consolidated VIEs, we present the carrying amount of assets and liabilities reflected on our consolidated balance sheets. The assets of consolidated VIEs primarily consist of cash and loans, which we report on our consolidated balance sheets under restricted cash for securitization investors and restricted loans for securitization investors, respectively. The assets of a particular VIE are the primary source of funds to settle its obligations. The creditors of the VIEs typically do not have recourse to the general credit of our company. The liabilities primarily consist of debt securities issued by the VIEs, which we report under securitized debt obligations. For unconsolidated VIEs, we present the carrying amount of assets and liabilities reflected on our consolidated balance sheets and our maximum exposure to loss. Our maximum exposure to loss is estimated based on the unlikely event that all of the assets in the VIEs became worthless and we were required to meet our maximum remaining funding obligations.

[1] The carrying amount of assets of unconsolidated securitization-related VIEs consists of retained interests and letters of credit related to manufactured housing securitizations and are reported on our consolidated balance sheets under accounts receivable from securitizations. Mortgage servicing rights related to unconsolidated VIEs are reported on our consolidated balance sheets under other assets. See Note 8 Goodwill and Other Intangible Assets for additional information on our mortgage servicing rights.

[2] The carrying amount of liabilities of securitization related VIEs is comprised of obligations to fund negative amortization bonds associated with the securitization of option arm mortgage loans (option-ARMs) and obligations on certain swap agreements associated with the securitization of manufactured housing loans.

[3] The maximum exposure to loss represents the amount of loss we would incur in the unlikely event that all of our assets in the VIE become worthless and we were required to meet our maximum remaining funding obligations.

[4] Represents the gross assets and liabilities owned by the VIE which included seller s interest and retained and repurchased notes held by other related parties.

Securitization Related VIEs

We historically have securitized credit card loans, auto loans, home loans and installment loans. In a securitization transaction, assets from our balance sheet are transferred to a trust we establish, which typically meets the definition of a VIE. The trust then issues various forms of interests in those assets to investors. We typically receive cash proceeds and/or other interests in the securitization trust for the assets we transfer. If the transfer of the assets to an unconsolidated securitization trust qualifies as a sale, we remove the assets from our consolidated balance sheet and recognize a gain or loss on the transfer. Alternatively, if the transfer does not qualify as a sale but instead is considered a secured borrowing or the transfer of assets is to a consolidated VIE, the assets remain on our consolidated financial statements and we record an offsetting liability for the proceeds received.

Our continuing involvement in the majority of our securitization transactions consists primarily of holding certain retained interests and acting as the primary servicer. We also may be required to repurchase receivables from the trust if the outstanding balance of the receivables falls to a level where the cost exceeds the benefits of servicing such receivables. We also may have exposure associated with contractual obligations to repurchase previously transferred loans due to breaches of representations and warranties. See Note 15 Commitments, Contingencies and

Guarantees for information related to reserves we have established for our potential mortgage representation and warranty exposure.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The table below presents the securitization-related VIEs in which we had continuing involvement as of March 31, 2012 and December 31, 2011:

	Non-Mortgage			Mortgage		
(Dollars in millions)	**Credit Card**	**Auto Loan**	**Other Loan**	**Option Arm**	**GreenPoint HELOCs**	**GreenPoint Manufactured Housing**
March 31, 2012:						
Securities held by third-party investors	**$ 15,460**	**$ 0**	**$ 14**	**$ 3,032**	**$ 193**	**$ 1,214**
Receivables in the trust	**44,874**	**0**	**21**	**3,135**	**193**	**1,220**
Cash balance of spread or reserve accounts	**17**	**0**	**0**	**8**	**0**	**169**
Retained interests	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**	**Yes**
Servicing retained	**Yes**	**Yes**	**Yes**	**Yes(1)**	**Yes(1)**	**No(3)**
Amortization event[4]	**No**	**No**	**No**	**No**	**Yes(2)**	**No**
December 31, 2011:						
Securities held by third-party investors	$ 16,428	$ 75	$ 24	$ 3,122	$ 206	$ 1,247
Receivables in the trust	47,537	77	36	3,228	206	1,254
Cash balance of spread or reserve accounts	17	12	0	8	0	172
Retained interests	Yes	Yes	Yes	Yes	Yes	Yes
Servicing retained	Yes	Yes	Yes	Yes(1)	Yes(1)	No(3)
Amortization event[4]	No	No	No	No	Yes(2)	No

(1) We continue to service some of the outstanding balance of securitized mortgage receivables.
(2) See information below regarding on-going involvement in the GreenPoint Home Equity Line of Credit (HELOC) securitizations.
(3) The manufactured housing securitizations are serviced by a third party. For two of the deals, that third party works in the capacity of subservicer with Capital One being the Master Servicer.
(4) Amortization events vary according to each specific trust agreement but generally are triggered by declines in performance or credit metrics such as charge-off rates or delinquency rates below certain predetermined thresholds. Generally, the occurrence of an amortization event changes the sequencing and amount of trust related cash flows to the benefit of senior noteholders.

Non-Mortgage Securitizations

As of March 31, 2012 and December 31, 2011, we were deemed to be the primary beneficiary of all of our non-mortgage securitization trusts. Accordingly, all of these trusts have been consolidated in our financial statements. For additional information on our principal involvement with non-mortgage securitization trusts and the impact of the consolidation of these trusts on our financial statements, see Note 1 Summary of Significant Accounting Policies and Note 7 Variable Interest Entities and Securitizations of our 2011 Form 10-K.

Mortgage Securitizations

Option-ARM Loans

We had previously securitized option-ARM mortgage loans by transferring the mortgage loans to securitization trusts that had issued mortgage-backed securities to investors. The outstanding balance of debt securities held by third-party investors related to our mortgage loan securitization trusts was $3.0 billion as of March 31, 2012 and $3.1 billion as of December 31, 2011.

We continue to service some of the outstanding balance of securitized mortgage receivables. We also retain rights to future cash flows arising from the receivables, the most significant being certificated interest-only bonds

105

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

issued by the trusts. We generally estimate the fair value of these retained interests based on the estimated present value of expected future cash flows from securitized and sold receivables, using our best estimates of the key assumptions which include credit losses, prepayment speeds and discount rates commensurate with the risks involved. We do not consolidate these trusts because we do not have the right to receive benefits that could potentially be significant nor the obligation to absorb losses that could potentially be significant to the trusts.

In connection with the securitization of certain option-ARM loans, a third party is obligated to advance a portion of any negative amortization resulting from monthly payments that are less than the interest accrued for that payment period. We have an agreement in place with the third party that mirrors this advance requirement. The amount advanced is tracked through mortgage-backed securities retained as part of the securitization transaction. As the borrowers make principal payments, these securities receive their net pro rata portion of those payments in cash, and advances of negative amortization are refunded accordingly. As advances occur, we record an asset in the form of negative amortization bonds, which are held at fair value in other assets. We have also entered into certain derivative contracts related to the securitization activities. These are classified as free standing derivatives, with fair value adjustments recorded in non-interest income. See Note 10 Derivative Instruments and Hedging Activities for further details on these derivatives.

GreenPoint Mortgage HELOCs

Our discontinued wholesale mortgage banking unit, GreenPoint, previously sold home equity lines of credit in whole loan sales and subsequently acquired a residual interest in certain trusts which securitized some of those loans. As the residual interest holder, GreenPoint is required to fund advances on the home equity lines of credit when certain performance triggers are met due to deterioration in asset performance. We had funded $28 million in advances as of March 31, 2012, all of which was expensed as funded. Our unfunded commitment related to these residual interests was $9 million as of March 31, 2012. We have not consolidated these trusts because the residual certificates did not provide the obligation to absorb losses or the right to receive benefits that could potentially be significant to the trusts.

GreenPoint Mortgage Manufactured Housing

We retain the primary obligation for certain provisions of corporate guarantees, recourse sales and clean-up calls related to the discontinued manufactured housing operations of GreenPoint Credit LLC (GPC) which was sold to a third party in 2004. Although we are the primary obligor, recourse obligations related to former GPC whole loan sales, commitments to exercise mandatory clean-up calls on certain GPC securitization transactions and servicing were transferred to a third party in the sale transaction. We do not consolidate the trusts used for the securitization of manufactured housing loans because we do not have the power to direct the activities that most significantly impact the economic performance of the trusts since we no longer service the loans.

We were required to fund letters of credit in 2004 to cover losses, and are obligated to fund future amounts under swap agreements for certain transactions. We have the right to receive any funds remaining in the letters of credit after the securities are released. The amount available under the letters of credit was $169 million and $172 million as of March 31, 2012 and December 31, 2011, respectively. The fair value of the expected residual balances on the funded letters of credit was $51 million as of March 31, 2012 and December 31, 2011, and is included in other assets on the consolidated balance sheet. Our maximum exposure under the swap agreements was $22 million and $23 million as of March 31, 2012 and December 31, 2011, respectively. The value of our obligations under these swaps was $14 million and $12 million as of March 31, 2012 and December 31, 2011, respectively and is recorded in other liabilities on our consolidated balance sheet.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The unpaid principal balance of manufactured housing securitization transactions where we are the residual interest holder was $1.2 billion and $1.3 billion as of March 31, 2012 and December 31, 2011, respectively. In the event the third party does not fulfill on its obligations to exercise the clean-up calls on certain transactions, the obligation reverts to us and we would assume approximately $420 million of loans receivable upon our execution of the clean-up call with the requirement to absorb any losses on the loans receivable. There have been no instances of non-performance to date by the third party.

We monitor the underlying assets for trends in delinquencies and related losses and reviews the purchaser s financial strength as well as servicing performance. These factors are considered in assessing the adequacy of the liabilities established for these obligations and the valuations of the assets.

Retained Interests in Unconsolidated Securitizations

Accounts Receivable from Securitizations

Retained interests in unconsolidated securitizations are included in accounts receivable from securitizations on our consolidated balance sheets. These retained interests consist of interest-only strips, retained tranches, cash collateral accounts, cash reserve accounts and unpaid interest and fees on the third-party investors portion of the transferred principal receivables.

The following table provides details of accounts receivable from securitizations as of March 31, 2012 and December 31, 2011:

(Dollars in millions)	March 31, 2012	December 31, 2011
Interest-only strip classified as trading	**$ 65**	$ 63
Retained interests classified as trading:		
Retained notes	**23**	23
Cash collateral	**8**	8
Total retained interests classified as trading	**31**	31
Total accounts receivable from securitizations	**$ 96**	$ 94

We may retain tranches in certain of the securitization transactions which are considered to be higher investment grade securities and subject to lower risk of loss. Those retained tranches are classified as available-for-sale securities, and changes in the estimated fair value are recorded in other comprehensive income.

The components of the net gains (losses) recognized as a result of changes in the fair value of retained interests are presented below:

(Dollars in millions)	Three Months Ended March 31, 2012	2011
Interest only strip valuation changes	**$ 2**	$ (3)
Fair value adjustments related to spread accounts	**11**	12
Fair value adjustments related to investors accrued interest receivable	**0**	0

Fair value adjustments related to retained subordinated notes	**(4)**	18
Net gain recognized in earnings	**$ 9**	$ 27

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The changes in the fair value of retained interests are primarily driven by rate assumption changes and volume fluctuations. All of these retained residual interests are subject to loss in the event assumptions used to determine the estimated fair value do not prevail, or if borrowers default on the related securitized receivables and our retained subordinated tranches are used to repay investors. See the table below for key assumptions and sensitivities for retained interest valuations.

Key Assumptions and Sensitivities for Retained Interest Valuations

The key assumptions used in determining the fair value of the interest-only strip and other retained residual interests include the weighted average ranges for principal payment rates, lives of receivables and discount rates, all of which are included in the following table. The principal repayment rate assumptions were determined using actual and forecast trust principal payment rates based on the collateral. The lives of receivables were determined as the number of months necessary to repay the investors given the principal payment rate assumptions. The discount rates were determined using primarily trust specific statistics and forward rate curves, and were reflective of what market participants would use in a similar valuation. Additionally, accrued interest receivable, cash reserve and spread accounts were discounted over the estimated life of the assets.

If these assumptions are not met, or if they change, the interest-only strip, retained interests and related servicing and securitizations income would be affected. The following adverse changes to the key assumptions and estimates are hypothetical and should be used with caution. As the figures indicate, any change in fair value based on a 10% or 20% variation in assumptions cannot be extrapolated because the relationship of a change in assumption to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair value of the interest-only strip is calculated independently from any change in another assumption. However, changes in one factor may result in changes in other factors, which might magnify or counteract the sensitivities.

For the periods ending March 31, 2012 and December 31, 2011, the assumptions and sensitivities shown below include all off-balance sheet securitizations:

(Dollars in millions)	March 31, 2012		December 31, 2011	
Interest-only strip retained interests	**$**	**111**(1)	$	110(1)
Weighted average life for receivables (months)		**61**		70
Principal repayment rate (weighted average rate)	**11.7**	**12.6%**	12.2	17.1%
Impact on fair value of 10% adverse change	**$**	**(2)**	$	15
Impact on fair value of 20% adverse change		**(5)**		(5)
Discount rate (weighted average rate)	**25.1**	**42.2%**	25.0	42.2%
Impact on fair value of 10% adverse change	**$**	**(6)**	$	(7)
Impact on fair value of 20% adverse change		**(12)**		(13)

(1) Does not include liquidity swap related to the negative amortization bonds of $(15) million and $(16) million as of March 31, 2012 and December 31, 2011, respectively.

Static pool credit losses were calculated by summing the actual and projected future credit losses and dividing them by the original balance of each pool of assets. Due to the short-term revolving nature of the loan receivables, the weighted average percentage of static pool credit losses was not considered materially different from the assumed charge-off rates used to determine the fair value of the retained interests.

We act as a servicing agent and receive contractual servicing fees of between 0.375% and 1% of the investor principal outstanding, based upon the type of assets serviced. For off-balance sheet securitizations, we generally did not record material servicing assets or liabilities for these rights since the contractual servicing fee approximates market rates.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Cash Flows Related to the Unconsolidated Securitizations

The following provides the details of the cash flows related to securitization transactions that qualified as off-balance sheet for the three months ended March 31, 2012 and 2011:

(Dollars in millions)	Three Months Ended March 31, 2012	2011
Servicing fees received	**$ 7**	$ 7
Cash flows received on retained interests[(1)]	**10**	12

[(1)] Includes all cash receipts of excess spread and other payments (excluding servicing fees) from the program.

Supplemental Loan Information

The table below displays the unpaid principal balance of off-balance sheet single-family residential loans we serviced as of March 31, 2012 and December 31, 2011. We also display the unpaid principal balance of loans past due 90 days or more as of March 31, 2012 and December 31, 2011. Net credit losses associated with these loans totaled $9 million and $7 million for the three months ended March 31, 2012 and 2011, respectively.

(Dollars in millions)	March 31, 2012	December 31, 2011
Total principal amount of loans	**$ 1,185**	$ 1,220
Principal amount of loans past due 90 days or more	**225**	223

Other VIEs

Affordable Housing Entities

As part of our community reinvestment initiatives, we invest in private investment funds that make equity investments in multi-family affordable housing properties. We receive affordable housing tax credits for these investments. The activities of these entities are financed with a combination of invested equity capital and debt. For those investment funds considered to be VIEs, we are not required to consolidate if we do not have the power to direct the activities that most significantly impact the economic performance of those entities. We record our interests in these unconsolidated VIEs in loans held for investment, other assets and other liabilities. As of March 31, 2012 and December 31, 2011 our interests consisted of assets of approximately $2.1 billion and $2.0 billion, respectively. Our maximum exposure to these entities is limited to our variable interests in the entities and is $2.1 billion as of March 31, 2012. The creditors of the VIEs have no recourse to our general credit and we do not provide additional financial or other support during the period that we were not previously contractually required to provide. The total assets of the unconsolidated investment funds that were VIEs at March 31, 2012 and December 31, 2011 were approximately $9.4 billion and $8.4 billion, respectively.

Entities that Provide Capital to Low-Income and Rural Communities

We hold variable interests in entities (Investor Entities) that invest in community development entities (CDEs) that provide debt financing to businesses and non-profit entities in low-income and rural communities. Variable interests in the CDEs held by the consolidated Investor Entities are also our variable interests. The activities of the Investor Entities are financed with a combination of invested equity capital and debt. The activities of the CDEs are financed solely with invested equity capital. We receive federal and state tax credits for these investments. We

consolidate the VIEs in which we have the power to direct the activities that most

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

significantly impact the VIE s economic performance and the obligation to absorb losses or right to receive benefits that could be potentially significant to the VIE. We have also consolidated other investments and CDEs that we do not consider VIEs. The assets of the VIEs that we consolidated at both March 31, 2012 and December 31, 2011 totaled approximately $258 million. The assets of the consolidated VIEs are reflected on our consolidated balance sheets in cash, loans held for investment, interest receivable and other assets. The liabilities are reflected in other liabilities.

The total assets of the VIEs that we held an interest in, but were not required to consolidate as of both March 31, 2012 and December 31, 2011 totaled approximately $6 million. Our interests in these unconsolidated VIEs are reflected on our consolidated balance sheets in loans held for investment and other assets. Our maximum exposure to these entities is limited to our variable interest of $6 million as of March 31, 2012. The creditors of the VIEs have no recourse to our general credit. We have not provided additional financial or other support during the period that we were not previously contractually required to provide.

Other

We have a variable interest in Capital One Financial Advisors, LLC which we consolidate as we have the power to direct the activities that most significantly impact the VIE s economic performance and the obligation to absorb losses or the right to receive benefits that could be potentially significant to the VIE. The assets of the VIE that we consolidated totaled approximately $1 million as of March 31, 2012 and December 31, 2011. The assets are consolidated in our balance sheet in cash and other assets.

We also have a variable interest in a trust that has a royalty interest in certain oil and gas properties. The activities of the trust are financed solely with debt. The total assets of the trust were $293 million and $309 million as of March 31, 2012 and December 31, 2011, respectively. We were not required to consolidate the trust because we do not have the power to direct the activities of the trust that most significantly impact the trust s economic performance. Our retained interest in the trust, which totaled approximately $132 million and $139 million as of March 31, 2012 and December 31, 2011, respectively, is reflected on our consolidated balance sheets under loans held for investment. Our maximum exposure is limited to our variable interest of $132 million as of March 31, 2012. The creditors of the trust have no recourse to our general credit. We have not provided additional financial or other support during the period that we were not previously contractually required to provide.

NOTE 8 GOODWILL AND OTHER INTANGIBLE ASSETS

The table below displays the components of goodwill and other intangible assets, including mortgage servicing rights, as of March 31, 2012 and December 31, 2011:

(Dollars in millions)	March 31, 2012	December 31, 2011
Goodwill	**$ 13,595**	$ 13,592
Other intangible assets:		
Core deposit intangibles[1]	**642**	479
Contract intangibles[2]	**47**	50
Purchased credit card relationship intangibles[3]	**47**	52
Lease intangibles	**20**	21
Trust intangibles	**4**	5
Other[4]	**147**	3
Total other intangible assets	**907**	610
Total goodwill and other intangible assets	**$ 14,502**	$ 14,202
Mortgage servicing rights	**$ 95**	$ 93

(1) Includes core deposit intangibles with net carrying value of $202 million related to the acquisition of ING Direct in the first quarter of 2012.

(2) Relates to the acquisition of the HBC portfolio in the first quarter of 2011.

(3) Relates to the acquisitions of the HBC credit card portfolio in the first quarter of 2011 and the Kohl s private-label credit card portfolio in the second quarter of 2011.

(4) Includes brokerage relations intangibles with a net carrying value of $81 million, trade mark/name intangibles with a net carrying value of $46 million, and non-compete intangibles with a net carrying value of $16 million, all of which related to the acquisition of ING Direct in the first quarter of 2012.

Goodwill

In accordance with accounting guidance, goodwill is not amortized but is tested for impairment at the reporting unit level, which is at the operating segment level or one level below an operating segment. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value. Goodwill is required to be tested for impairment annually and between annual tests if events or circumstances change, such as adverse changes in the business climate, that would more likely than not reduce the fair value of the reporting unit below its carrying value. Goodwill is assigned to one or more reporting units at the date of acquisition. Our reporting units are Domestic Credit Card, International Credit Card, Auto Finance, other Consumer Banking and Commercial Banking. As of March 31, 2012 and December 31, 2011, goodwill of $13.6 billion was included in the accompanying consolidated balance sheets. There were no events requiring an interim impairment test and there has been no goodwill impairment recorded for the three months ended March 31, 2012. The goodwill impairment test, performed at October 1 of each year, is a two-step test. The first step identifies whether there is potential impairment by comparing the fair value of a reporting unit to the carrying amount, including goodwill. If the fair value of a reporting unit is less than its carrying amount, the second step of

the impairment test is required to measure the amount of any impairment loss.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The following table presents a summary of changes in goodwill by segment, during the first quarter of 2012.

(Dollars in millions)	Credit Card	Consumer	Commercial	Total
Total Company				
Balance as of December 31, 2011	$ 4,691	$ 4,583	$ 4,318	$ 13,592
Acquisitions	**0**	**0**	**0**	**0**
Other adjustments	**3**	**0**	**0**	**3**
Balance as of March 31, 2012	**$ 4,694**	**$ 4,583**	**$ 4,318**	**$ 13,595**

Other Intangible Assets

In connection with our acquisitions, we recorded intangible assets which consisted of core deposit intangibles, trust intangibles, lease intangibles, and other intangibles, which are subject to amortization. The core deposit and trust intangibles reflect the estimated value of deposit and trust relationships. The lease intangibles reflect the difference between the contractual obligation under current lease contracts and the fair market value of the lease contracts at the acquisition date. The other intangible items relate to customer lists and brokerage relationships.

In connection with the acquisition of the credit card loan portfolios of Sony, HBC and Kohl s, we recognized purchased credit card relationship intangibles, representing the difference between the purchase price and the fair value of the credit card loans acquired. In connection with the January 7, 2011 acquisition of the HBC credit card portfolio, we also recognized a contract-based intangible asset of $70 million. The contract intangible represents the value attributable to future draws on future accounts. In connection with the February 17, 2012 acquisition of ING Direct, we recognized core deposit intangibles of $209 million and other intangibles of $149 million at acquisition.

The following table summarizes our intangible assets subject to amortization as of March 31, 2012 and December 31, 2011:

	March 31, 2012				
(Dollars in millions)	Carrying Amount of Assets	Accumulated Amortization	Currency valuation Adjustments	Net Carrying Amount	Remaining Amortization Period
Core deposit intangibles[1]	**$ 1,771**	**$ (1,129)**	**$ 0**	**$ 642**	**5.1 years**
Purchased credit card relationship intangibles[2]	**77**	**(30)**	**0**	**47**	**5.0 years**
Contract intangibles[3]	**70**	**(24)**	**1**	**47**	**5.8 years**
Lease intangibles	**54**	**(34)**	**0**	**20**	**20.2 years**

112

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(1) Includes core deposit intangibles with a net carrying value of $202 million related to the acquisition of ING Direct in the first quarter of 2012.

(2) Relates to the acquisitions of the HBC credit card portfolio in the first quarter of 2011 and the Kohl s private-label credit card portfolio in the second quarter of 2011.

(3) Relates to the acquisition of the existing HBC credit card portfolio in the first quarter of 2011.

(4) Includes brokerage relations intangibles with a net carrying value of $81 million, trade mark/name intangibles with a net carrying value of $46 million, and non-compete intangibles with a net carrying value of $16 million, all of which related to the acquisitions of ING Direct in the first quarter of 2012.

Intangible assets, which are reported in other assets on our consolidated balance sheets, are amortized over their respective estimated useful lives on an accelerated basis using the sum of the year s digits methodology. Intangible amortization expense, which is included in non-interest expense on our consolidated statements of income, totaled $62 million and $58 million for the three months ended March 31, 2012 and 2011, respectively. The weighted average amortization period for purchase accounting intangibles is 5.8 years as of March 31, 2012.

The following table summarizes the estimated future amortization expense for intangible assets as of March 31, 2012:

(Dollars in millions)	Estimated Future Amortization Amounts
2012 (remaining nine months)	$ **202**
2013	**224**
2014	**178**
2015	**123**
2016	**83**
Thereafter	**97**
Total	$ **907**

Mortgage Servicing Rights

MSRs are recognized at fair value when mortgage loans are sold or securitized in the secondary market and the right to service these loans is retained for a fee. MSRs are recorded at fair value and changes in fair value are recorded as a component of mortgage servicing and other income. We may enter into derivatives to economically hedge changes in fair value of MSRs. We have no other loss exposure on MSRs in excess of the recorded fair value.

We continue to operate the mortgage servicing business and to report the changes in the fair value of MSRs in continuing operations. To evaluate and measure fair value, the underlying loans are stratified based on certain risk characteristics, including loan type, note rate and investor servicing requirements.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The following table sets forth the changes in the fair value of MSRs during the three months ended March 31, 2012 and 2011:

	March 31,	
(Dollars in millions)	**2012**	**2011**
Balance at beginning of period	**$ 93**	$ 141
Originations	**4**	4
Change in fair value, net	**(2)**	(1)
Balance at end of period	**$ 95**	$ 144
Ratio of mortgage servicing rights to related loans serviced for others	**0.55%**	0.74%
Weighted average service fee	**0.28bps**	0.28bps

MSR fair value adjustments for the three months ended March 31, 2012 and 2011 included decreases of $3 million and $4 million, respectively, due to run-off and cash collections, and an increase of $1 million and $3 million, respectively, due to changes in the valuation inputs and assumptions.

The significant assumptions used in estimating the fair value of the MSRs as of March 31, 2012 and 2011 were as follows:

	March 31,	
	2012	**2011**
Weighted average prepayment rate (includes default rate)	**17.69%**	12.82%
Weighted average life (in years)	**5.06**	6.10
Discount rate	**13.45%**	11.78%

The increase in the weighted average prepayment rate and the corresponding decrease in weighted average life, were both driven by an increase in involuntary attrition due to market conditions and changes in model assumptions.

At March 31, 2012, the sensitivities to immediate 10% and 20% increases in the weighted average prepayment rates would decrease the fair value of mortgage servicing rights by $4.7 million and $9.1 million, respectively.

At March 31, 2012, the sensitivities to immediate 10% and 20% adverse changes in servicing costs would decrease the fair value of mortgage servicing rights by $8.1 million and $17.8 million, respectively.

As of March 31, 2012, our mortgage loan servicing portfolio consisted of mortgage loans with an aggregate unpaid principal balance of $65.0 billion, of which $17.6 billion was serviced for other investors. As of March 31, 2011, our mortgage loan servicing portfolio consisted of mortgage loans with an aggregate unpaid principal balance of $29.8 billion, of which $19.8 billion was serviced for other investors.

NOTE 9 DEPOSITS AND BORROWINGS

Customer Deposits

Our customer deposits, which are our largest source of funding for our operations and asset growth, consist of non-interest bearing and interest-bearing deposits, including demand deposits, money market deposits, negotiable order of withdrawal (NOW) accounts, savings accounts and certificates of deposit.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

As of March 31, 2012, we had $197.3 billion in interest-bearing deposits of which $5.2 billion represents large denomination certificates of $100,000 or more. As of December 31, 2011, we had $109.9 billion in interest-bearing deposits, of which $4.6 billion represents large denomination certificates of $100,000 or more.

Borrowings

We also access the capital markets to meet our funding needs through loan securitization transactions and the issuance of senior and subordinated debt. As of March 31, 2012, we had an effective shelf registration statement filed with the U.S. Securities & Exchange Commission (SEC) under which, from time to time, we may offer and sell an indeterminate aggregate amount of senior or subordinated debt securities, preferred stock, depository shares representing preferred stock, common stock, purchase contracts, warrants, units, trust preferred securities, junior subordinated debentures, guarantees of trust preferred securities and certain back-up obligations. There is no limit under this shelf registration statement to the amount or number of such securities that we may offer and sell. Under SEC rules, the shelf registration statement, which we filed in May 2009, expires three years after filing. We filed a new effective shelf registration statement with the SEC on April 30, 2012 which will expire three years from the filing date.

In addition to issuance capacity under the shelf registration statement, we have access to other borrowing programs, including advances from the FHLB. Our FHLB membership is secured by our investment in FHLB stock, which totaled $802 million and $362 million, as of March 31, 2012 and December 31, 2011, respectively.

Securitized Debt Obligations

We had $15.5 billion and $16.5 billion of securitized debt obligations as of March 31, 2012 and December 31, 2011, respectively, all of which were held by third party investors.

Senior and Subordinated Debt

As of March 31, 2012, we had $11.9 billion of senior and subordinated notes outstanding, which included $770 million in fair value hedging losses. As of December 31, 2011, we had $11.0 billion of senior and subordinated notes outstanding, including $823 million in fair value hedging losses. One senior note for $282.3 million matured during the three months ended March 31, 2012. During the first quarter of 2012, we issued senior notes in the total amount of $1.25 billion. The new senior notes are due in 2015.

See Note 10 Derivative Instruments and Hedging Activities for information about our fair value hedging activities.

Under a Senior and Subordinated Global Bank Note Program, COBNA has issued debt securities to both U.S. and non-U.S. lenders and raised funds in U.S. and foreign currencies. The Senior and Subordinated Global Bank Note Program had $807 million and $810 million outstanding at March 31, 2012 and December 31, 2011, respectively.

Junior Subordinated Debentures

We had $3.6 billion of outstanding junior subordinated debentures as of both March 31, 2012 and December 31, 2011. There were no junior subordinated borrowings that were called or matured during the three months ended March 31, 2012.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

FHLB Advances

We had outstanding FHLB advances, which are secured by our investment securities, residential home loan portfolio, multifamily loans, commercial real-estate loans and home equity lines of credit, totaling $1.1 billion and $6.9 billion as of March 31, 2012 and December 31, 2011, respectively.

Composition of Customer Deposits, Short-term Borrowings and Long-term Debt

The table below summarizes the components of our deposits, short-term borrowings and long-term debt as of March 31, 2012 and December 31, 2011. Our total short-term borrowings consist of federal funds purchased and securities loaned under agreements to repurchase and other short-term borrowings with an original contractual maturity of one year or less. Our long-term debt consists of borrowings with an original contractual maturity of greater than one year. The amounts presented for outstanding borrowings include unamortized debt premiums and discounts, net of fair value hedge accounting adjustments.

(Dollars in millions)	March 31, 2012	December 31, 2011
Deposits:		
Non-interest bearing deposits	**$ 19,274**	$ 18,281

NOTE 10 DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES

Use of Derivatives

We manage our asset/liability position and market risk exposure in accordance with prescribed risk management policies and limits established by our Asset Liability Management Committee and approved by our Board of Directors. Our primary market risk stems from the impact on our earnings and economic value of equity from changes in interest rates, and to a lesser extent, changes in foreign exchange rates. We manage our interest rate sensitivity through several approaches, which include, but are not limited to, changing the maturity and re-pricing characteristics of various balance sheet categories and by entering into interest rate derivatives. Derivatives are also utilized to manage our exposure to changes in

foreign exchange rates. Derivative instruments may be privately negotiated contracts, which are often referred to as over-the-counter (OTC) derivatives, or they may be listed and traded on an exchange. We execute our derivative contracts in both the OTC and exchange-traded derivative markets. In addition to interest rate swaps, we use a variety of other derivative instruments, including caps, floors, options, futures and forward contracts, to manage our interest rate and foreign currency risk. On a regular basis, we enter into customer-accommodation derivative transactions. We engage in these transactions as a service to our commercial banking customers to facilitate their risk management objectives. We typically offset the market risk exposure to our customer-accommodation derivatives through derivative transactions with other counterparties.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Accounting for Derivatives

We account for derivatives pursuant to the accounting standards for derivatives and hedging. The outstanding notional amount of our derivative contracts totaled $49.7 billion as of March 31, 2012, compared with $73.2 billion as of December 31, 2011, primarily due to the termination of the ING Direct acquisition hedges. The notional amount provides an indication of the volume of our derivatives activity and is used as the basis on which interest and other payments are determined; however, it is generally not the amount exchanged. Derivatives are recorded at fair value in our consolidated balance sheets. The fair value of a derivative represents our estimate of the amount at which a derivative could be exchanged in an orderly transaction between market participants. We report derivatives in a gain position, or derivative assets, in our consolidated balance sheets as a component of other assets. We report derivatives in a loss position, or derivative liabilities, in our consolidated balance sheets as a component of other liabilities. We report derivative asset and liability amounts on a gross basis based on individual contracts, which does not take into consideration the effects of master counterparty netting agreements or collateral netting. The fair value of derivative assets and derivative liabilities reported in our consolidated balance sheets was $1.7 billion and $490 million, respectively, as of March 31, 2012, compared with $1.9 billion and $987 million, respectively, as of December 31, 2011.

Our derivatives are designated as either qualifying accounting hedges or free-standing derivatives. Free-standing derivatives consist of customer-accommodation derivatives and economic hedges that we enter into for risk management purposes that are not linked to specific assets or liabilities or to forecasted transactions and, therefore, do not qualify for hedge accounting. Qualifying accounting hedges are designated as fair value hedges, cash flow hedges or net investment hedges.

Fair Value Hedges: We designate derivatives as fair value hedges to manage our exposure to changes in the fair value of certain financial assets and liabilities, which fluctuate in value as a result of movements in interest rates. Changes in the fair value of derivatives designated as fair value hedges are recorded in earnings together with offsetting changes in the fair value of the hedged item and any resulting ineffectiveness. Our fair value hedges consist of interest rate swaps that are intended to modify our exposure to interest rate risk on various fixed rate senior notes, subordinated notes, securitization debt, brokered certificates of deposits and U.S. agency investments. These hedges have maturities through 2019 and have the effect of converting some of our fixed rate debt, deposits and investments to variable rate.

Cash Flow Hedges: We designate derivatives as cash flow hedges to manage our exposure to variability in cash flows related to forecasted transactions. Changes in the fair value of derivatives designated as cash flow hedges are recorded as a component of AOCI, to the extent that the hedge relationships are effective, and amounts are reclassified from AOCI to earnings as the forecasted transactions occur. To the extent that any ineffectiveness exists in the hedge relationships, the amounts are recorded in current period earnings. Our cash flow hedges consist of interest rate swaps that are intended to hedge the variability in interest payments on some of our variable rate debt issuances and assets through 2017. These hedges have the effect of converting some of our variable rate debt and assets to a fixed rate. We also have entered into forward foreign currency derivative contracts to hedge our exposure to variability in cash flows related to foreign currency denominated debt.

Net Investment Hedges: We use net investment hedges, primarily forward foreign exchange contracts, to manage the exposure related to our net investments in consolidated foreign operations that have functional currencies other than the U.S. dollar. Changes in the fair value of net investment hedges are recorded in the translation adjustment component of AOCI. During the third quarter of 2011, we discontinued hedge accounting on our only net investment hedge. Therefore, we did not have any net investment hedges outstanding as of March 31, 2012.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Free-Standing Derivatives: We use free-standing derivatives, or economic hedges, to hedge the risk of changes in the fair value of residential MSRs, mortgage loan origination and purchase commitments and other interests held. We also categorize our customer-accommodation derivatives and the related offsetting contracts as free-standing derivatives. Changes in the fair value of free-standing derivatives are recorded in earnings as a component of other non-interest income.

Balance Sheet Presentation

The following table summarizes the fair value and related outstanding notional amounts of derivative instruments reported in our consolidated balance sheets as of March 31, 2012 and December 31, 2011. The fair value amounts are segregated by derivatives that are designated as accounting hedges and those that are not, and are further segregated by type of contract within those two categories.

valuation adjustments. We recorded a net cumulative credit risk valuation adjustment related to our derivative positions of $19 million and $23 million as of March 31, 2012 and December 31, 2011, respectively. See Derivative Counterparty Credit Risk below for additional information.

(2) Customer accommodation derivatives include those entered into with our commercial banking customers and those entered into with other counterparties to offset the market risk.

Upon the completion of the ING Direct acquisition in February 2012, we terminated the portfolio of interest-rate swaps we entered into in anticipation of the acquisition. These interest-rate swaps consisted of an initial notional amount of $23.8 billion and an additional notional amount of $1.0 billion resulting from subsequent rebalancing actions. The total cash payment at termination was $355 million. We recognized a mark-to-market loss of $78 million in earnings in the first quarter of 2012 related to these swaps.

Income Statement Presentation and AOCI

The following tables summarize the impact of derivatives and related hedged items on our consolidated statements of income and AOCI.

Fair Value Hedges and Free-Standing Derivatives

The net gains (losses) recognized in earnings related to derivatives in fair value hedging relationships and free-standing derivatives are presented below for the three months ended March 31, 2012 and 2011:

(Dollars in millions)	Three Months Ended March 31, 2012	2011
Derivatives designated as accounting hedges:		
Fair value interest rate contracts:		
Loss recognized in earnings on derivatives[1]	**$ (68)**	$ (149)
Gain recognized in earnings on hedged items[1]	**59**	154
Net fair value hedge ineffectiveness gain (loss)	**(9)**	5
Derivatives not designated as accounting hedges:		
Interest rate contracts covering:		
MSRs[1]	**(2)**	(1)
Customer accommodation[1]	**11**	8
Other interest rate exposures[1]	**(81)**	6
Total	**(72)**	13
Foreign exchange contracts[1]	**(13)**	(3)
Other contracts[1]	**(1)**	(3)
Total gain (loss) on derivatives not designated as accounting hedges	**(86)**	7
Net derivatives gain (loss) recognized in earnings	**$ (95)**	$ 12

(1) Amounts are recorded in our consolidated statements of income in other non-interest income.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Cash Flow and Net Investment Hedges

The table below shows the net gains (losses) related to derivatives designated as cash flow hedges and net investment hedges for the three months ended March 31, 2012 and 2011:

(Dollars in millions)	Three Months Ended March 31, 2012	Three Months Ended March 31, 2011
Gain (loss) recorded in AOCI:[1]		
Cash flow hedges:		
Interest rate contracts	**$ 6**	$ 7
Foreign exchange contracts	**(6)**	0
Subtotal	**0**	7
Net investment hedges:		
Foreign exchange contracts	**0**	(1)
Net derivatives gain recognized in AOCI	**$ 0**	$ 6

(Dollars in millions)	Three Months Ended March 31, 2012	Three Months Ended March 31, 2011
Gain (loss) recorded in earnings:		
Cash flow hedges:		
Gain (loss) reclassified from AOCI into earnings:		
Interest rate contracts[2]	**$ 9**	$ (12)
Foreign exchange contracts[3]	**(6)**	(2)
Subtotal	**3**	(14)
Gain (loss) recognized in earnings due to ineffectiveness:		
Interest rate contracts[3]	**0**	0
Foreign exchange contracts [3]	**0**	0
Subtotal	**0**	0
Net derivatives gain (loss) recognized in earnings	**$ 3**	$ (14)

(1) Amounts represent the effective portion.
(2) Amounts reclassified are recorded in our consolidated statements of income in interest income or interest expense.

(3) Amounts reclassified are recorded in our consolidated statements of income in other non-interest income.

We expect to reclassify net after-tax gains of $2 million recorded in AOCI as of March 31, 2012, related to derivatives designated as cash flow hedges to earnings over the next 12 months, which we expect to offset against the cash flows associated with the hedged forecasted transactions. The maximum length of time over which forecasted transactions were hedged was five years as of March 31, 2012. The amount we expect to reclassify into earnings may change as a result of changes in market conditions and ongoing actions taken as part of our overall risk management strategy.

Credit Default Swaps

We have credit exposure on credit default swap agreements that we entered into to manage our risk of loss on certain manufactured housing securitizations issued by GreenPoint Credit LLC in 2000. Our maximum credit exposure related to these swap agreements totaled $22 million and $23 million as of March 31, 2012 and

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

December 31, 2011, respectively. These agreements are recorded in our consolidated balance sheets as a component of other liabilities. The value of our obligations under these swaps was $14 million and $12 million as of March 31, 2012 and December 31, 2011, respectively. See Note 7 Variable Interest Entities and Securitizations for additional information about our manufactured housing securitization transactions.

Credit Risk-Related Contingency Features

Certain of our derivative contracts include provisions requiring that our debt maintain a credit rating of investment grade or above by each of the major credit rating agencies. In the event of a downgrade of our debt credit rating below investment grade, some of our derivative counterparties would have the right to terminate the derivative contract and close-out the existing positions. Other derivative contracts include provisions that would, in the event of a downgrade of our debt credit rating below investment grade, allow our derivative counterparties to demand immediate and ongoing full overnight collateralization on derivative instruments in a net liability position. Certain of our derivative contracts may allow, in the event of a downgrade of our debt credit rating of any kind, our derivative counterparties to demand additional collateralization on such derivative instruments in a net liability position. The fair value of derivative instruments with credit-risk-related contingent features in a net liability position was $56 million and $141 million as of March 31, 2012 and December 31, 2011, respectively. We were required to post collateral, consisting of a combination of cash and securities, totaling $165 million and $353 million as of March 31, 2012 and December 31, 2011, respectively. If our debt credit rating had fallen below investment grade, we would have been required to post additional collateral of $26 million and $39 million as of March 31, 2012 and December 31, 2011, respectively.

Derivative Counterparty Credit Risk

Derivative instruments contain an element of credit risk that arises from the potential failure of a counterparty to perform according to the contractual terms of the contract. Our exposure to derivative counterparty credit risk at any point in time is represented by the fair value of derivatives in a gain position, or derivative assets, assuming no recoveries of underlying collateral. To mitigate the risk of counterparty default, we maintain collateral agreements with certain derivative counterparties. These agreements typically require both parties to maintain collateral in the event the fair values of derivative financial instruments exceed established thresholds. We received cash collateral from derivatives counterparties totaling $848 million and $894 million as of March 31, 2012 and December 31, 2011, respectively. We also received securities from derivatives counterparties totaling $90 million as of March 31, 2012, which we have the ability to repledge. We posted cash collateral in accounts maintained by derivatives counterparties totaling $165 million and $353 million as of March 31, 2012 and December 31, 2011, respectively.

We record counterparty credit risk valuation adjustments on our derivative assets to properly reflect the credit quality of the counterparty. We consider collateral and legally enforceable master netting agreements that mitigate our credit exposure to each counterparty in determining the counterparty credit risk valuation adjustment, which may be adjusted in future periods due to changes in the fair value of the derivative contract, collateral and creditworthiness of the counterparty. The cumulative counterparty credit risk valuation adjustment recorded on our consolidated balance sheets as a reduction in the derivative asset balance was $19 million and $25 million as of March 31, 2012 and December 31, 2011, respectively. We also adjust the fair value of our derivative liabilities to reflect the impact of our credit quality. We calculate this adjustment by comparing the spreads on our credit default swaps to the discount benchmark curve. The cumulative credit risk valuation adjustment related to our credit quality recorded on our consolidated balance sheets as a reduction in the derivative liability balance was $1 million and $2 million as of March 31, 2012 and December 31, 2011, respectively.

NOTE 11 STOCKHOLDERS EQUITY

Accumulated Other Comprehensive Income (AOCI)

The following table presents the cumulative balances of accumulated other comprehensive income, net of deferred tax of $148 million and $142 million as of March 31, 2012 and December 31, 2011, respectively:

(Dollars in millions)	March 31, 2012	December 31, 2011
Net unrealized gains (losses) on securities[1]	**$ 288**	$ 294
Net unrecognized elements of defined benefit plans	**(43)**	(43)
Foreign currency translation adjustments	**6**	(49)
Unrealized losses on cash flow hedging instruments	**(25)**	(26)
Other-than-temporary impairment not recognized in earnings on securities	**44**	10
Initial application of measurement date provisions for postretirement benefits other than pensions	**(1)**	(1)
Initial application from adoption of consolidation standards	**(16)**	(16)
Total accumulated other comprehensive income	**$ 253**	$ 169

[1] Includes net unrealized gains (losses) on securities available for sale and retained subordinated notes. Unrealized losses not related to credit on other-than-temporarily impaired securities of $116 million (net of income tax of $74 million) and $170 million (net of income tax of $109 million) were reported in other comprehensive income as of March 31, 2012 and December 31, 2011, respectively.

NOTE 12 EARNINGS PER COMMON SHARE

The following table sets forth the computation of basic and diluted earnings per common share:

(Dollars and Shares in millions, except per share data)	Three Months Ended March 31, 2012	2011
Basic earnings per share		
Income from continuing operations, net of tax	**$ 1,505**	$ 1,032

Loss from discontinued operations, net of tax	**(102)**	(16)
Net income applicable to common equity	**1,403**	1,016
Dividends and undistributed earnings allocated to participating securities[1]	**(7)**	0
Net income available to common stockholders	**$ 1,396**	$ 1,016
Total weighted-average basic shares outstanding	**509**	454
Net income per share	**$ 2.74**	$ 2.24

123

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

(Dollars and Shares in millions, except per share data)	Three Months Ended March 31, 2012	2011
Diluted earnings per share[2]		
Net income available to common stockholders	**$ 1,396**	$ 1,016
Total weighted-average basic shares outstanding	**509**	454
Stock options, warrants, contingently issuable shares, and other	**4**	6
Total weighted-average diluted shares outstanding	**513**	460
Net income per share	**$ 2.72**	$ 2.21

(1) Includes undistributed earnings allocated to participating securities using the two-class method under the accounting guidance for computing earnings per share.

(2) Excluded from the computation of diluted earnings per share was 9.1 million and 9.6 million of awards, options or warrants, for the three months ended March 31, 2012 and 2011, respectively, because their inclusion would be antidilutive.

On February 16, 2012, we settled forward sale agreements that we entered into with certain counterparties acting as forward purchasers in connection with a public offering of shares of our common stock on July 19, 2011. Pursuant to the forward sale agreements, we issued 40 million shares of our common stock at settlement.

On February 17, 2012, as part of the consideration for the acquisition of ING Direct, we issued 54,028,086 shares of our common stock to the ING Sellers.

On March 20, 2012 we closed a public offering of 24,442,706 shares of our common stock which we sold to the underwriters at a per share price of $51.14 for net proceeds of approximately $1.24 billion.

NOTE 13 FAIR VALUE OF FINANCIAL INSTRUMENTS

Fair value is defined as the price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants on the measurement date (also referred to as an exit price). The fair value accounting guidance provides a three-level fair value hierarchy for classifying financial instruments. This hierarchy is based on whether the inputs to the valuation techniques used to measure fair value are observable or unobservable. Fair value measurement of a financial asset or liability is assigned to a level based on the lowest level of any input that is significant to the fair value measurement in its entirety. The three levels of the fair value hierarchy are described below:

Level 1:	Quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2:	Observable market-based inputs, other than quoted prices in active markets for identical assets or liabilities.

Level 3: Unobservable inputs.

The accounting guidance for fair value requires that we maximize the use of observable inputs and minimize the use of unobservable inputs in determining fair value. The accounting guidance for derivatives also provides for the irrevocable option to elect, on a contract-by-contract basis, to measure certain financial assets and liabilities at fair value at inception of the contract and record any subsequent changes in fair value into earnings. We had not made any material fair value option elections as of March 31, 2012 and December 31, 2011.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Level 1, 2 and 3 Valuation Techniques

Financial instruments are considered Level 1 when the valuation can be based on quoted prices in active markets for identical assets or liabilities. Level 2 financial instruments are valued using quoted prices for similar assets or liabilities, quoted prices in markets that are not active, or models using inputs that are observable or can be corroborated by observable market data of substantially the full term of the assets or liabilities. Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies or similar techniques, and at least one significant model assumption or input is unobservable and when determination of the fair value requires significant management judgment or estimation.

The following table displays our assets and liabilities measured on our consolidated balance sheets at fair value on a recurring basis as of March 31, 2012 and December 31, 2011:

(1) We do not offset the fair value of derivative contracts in a loss position against the fair value of contracts in a gain position. We also do not offset fair value amounts recognized for derivative instruments and fair value amounts recognized for the right to reclaim cash collateral or the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement.

(2) Does not reflect $19 million and $23 million recognized as a net valuation allowance on derivative assets and liabilities for non-performance risk as of March 31, 2012 and December 31, 2011, respectively. Non-performance risk is reflected in other assets/liabilities on the balance sheet and offset through the income statement in other income.

(3) Includes manufactured housing, swap and other transactions. See Note 7 Variable Interest Entities and Securitizations for additional information.

The determination of the classification of financial instruments in Level 2 or Level 3 of the fair value hierarchy is performed at the end of each reporting period. We consider all available information, including observable market data, indications of market liquidity and orderliness, and our understanding of the valuation techniques and significant inputs. Based upon the specific facts and circumstances of each instrument or instrument category, judgments are made regarding the significance of the Level 3 inputs to the instruments fair value measurement in its entirety. If Level 3 inputs are considered significant, the instrument is classified as Level 3. The process for determining fair value using unobservable inputs is generally more subjective and involves a high degree of management judgment and assumptions. During the first quarter of 2012, we had minimal movements between Levels 1 and 2.

Level 3 Instruments Only

Financial instruments are considered Level 3 when their values are determined using pricing models, which include comparison of prices from multiple sources, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is

unobservable or there is significant variability among

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

pricing sources. Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation. The tables below present reconciliation for all assets and liabilities measured and recognized at fair value on a recurring basis using significant unobservable inputs (Level 3). When assets and liabilities are transferred between levels, we recognize the transfer as of the end of the period.

(1) Gains (losses) related to Level 3 mortgage servicing rights are reported in other non-interest income, which is a component of non-interest income. Gains (losses) related to Level 3 derivative receivables and derivative payables are reported in other non-interest income, which is a component of non-interest income. Gains (losses) related to Level 3 retained interests in securitizations are reported in servicing and securitizations income, which is a component of non-interest income.

(2) The transfers out of Level 3 for the first quarter of March 31, 2012 were primarily driven by greater consistency amongst multiple pricing sources. The transfers into Level 3 was primarily driven by less consistency amongst vendor pricing on individual securities for non-agency MBS.

(3) The amount presented for unrealized gains (loss) for assets still held as of the reporting date primarily represents impairments for available-for-sale securities, accretion on certain fixed maturity securities, and change in fair value of derivative instruments. The impairments are reported in total other-than-temporary losses as a component of non-interest income.

We have a governance framework and a number of key controls that are intended to ensure that our fair value measurements are appropriate and reliable. Our governance framework provides for independent oversight and segregation of duties. Our control processes include review and approval of new transaction types, price verification and review of valuation judgments, methods, models, process controls and results. Groups independent from our trading and investing functions, including our Valuations Group and Valuations Advisory Committee, participate in the review and validation process.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Our Valuations Group performs periodic independent verification of fair value measurements by using independent analytics and other available market data to determine if assigned fair values are reasonable. For example, in cases where we rely on third party pricing services to obtain fair value measures, we analyze pricing variances among different pricing sources and validate the pricing used by comparing the information to additional sources, including dealer pricing indications in transaction results and other internal sources. Additional validation procedures performed by the Valuations Group include reviewing valuation inputs and assumptions, monitoring limits and acceptable variance thresholds between different pricing sources, and evaluating alternative methodologies and recommend improvements to valuation techniques. We perform due diligence reviews of the third party pricing services, including reviewing their pricing methodology and other control documentation. Additionally, on an on-going basis we may select a sample of securities and test their valuation by obtaining more detailed information about the pricing methodology, sources of information, and assumptions used to value the securities.

The Valuation Advisory Committee delegates the day-to-day valuation oversight to the Fair Value Committee. The Valuation Advisory Committee includes senior representation from business areas, our Enterprise Risk Oversight division and our Finance division. The purpose of the Valuations Advisory Committee is to inform the Chief Financial Officer on the reasonableness of fair valuations and to raise material risks or concerns, if any, concerning fair valuations. The Fair Value Committee regularly reviews and approves our valuation methodologies to ensure that our methodologies and practices are consistent with industry standards and adhere to regulatory and accounting guidance. The Chief Financial Officer determines when material issues or concerns regarding valuations shall be raised to the Audit and Risk Committee or other delegated committee of the Board of Directors.

The following presents the significant unobservable inputs relied upon to determine the fair values of our recurring Level 3 financial instruments. We utilize multiple third party pricing services to obtain fair value measures for our securities. Several of our third party pricing services are only able to provide unobservable input information for a limited number of securities due to software licensing restrictions. Other third party pricing services are able to provide unobservable input information for all securities for which they provide a valuation. As a result, the unobservable input information for the Available for Sale Securities presented below represents a composite summary of all information we are able to obtain for a majority of our securities. The unobservable input information for all other Level 3 financial instruments is based on the assumptions used in our internal valuation models.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

We are required to measure and recognize certain other financial assets at fair value on a nonrecurring basis in the consolidated balance sheet. These financial assets are not measured at fair value on an ongoing basis but are subject to fair value adjustments in certain circumstances (for example, when we evaluate impairment).

Loans Held For Sale

Loans held for sale are carried at the lower of aggregate cost, net of deferred fees, deferred origination costs and effects of hedge accounting, or fair value. The fair value of loans held for sale is determined using a discounted cash flow model or fair value of the underlying collateral, less the estimated cost to sell. Held for sale loans that are valued using a discounted cash flow are classified as Level 2. Loans that are valued using fair value less the estimated cost to sell have significant unobservable inputs and are classified as Level 3 under the fair value hierarchy. Fair value adjustments for loans held for sale are recorded in other non-interest expense in our consolidated statement of income.

Loans Held For Investment, Net

Loans held for investment are carried at the fair value of the underlying collateral, less the estimated cost to sell. Due to the use of unobservable inputs, loans held for investment are classified as Level 3 under the fair value hierarchy. Fair value adjustments for loans held for investment are recorded in provision for credit losses in the consolidated statement of income.

Foreclosed assets

Foreclosed assets are carried at the lower of its carrying amount or fair value less costs to sell. Due to the use of unobservable inputs, foreclosed assets are classified as Level 3 under the fair value hierarchy. Fair value adjustments for foreclosed assets are recorded in other non-interest expense in the consolidated statement of income.

Other Assets

Nonrecurring other assets measured at fair value consist of long-lived assets held for sale. These assets are recorded in other assets in our consolidated balance sheets. These assets are carried at the lower of their carrying amount or fair value less costs to sell. Due to the use of unobservable inputs, long-lived assets held for sale are classified as Level 3 under the fair value hierarchy. Fair value adjustments for other assets are recorded in other non-interest expense in the consolidated statement of income.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The following describes the valuation techniques used in estimating the fair value of our financial instruments as of March 31, 2012 and December 31, 2011. We applied the fair value provisions, to the financial instruments not recognized on the consolidated balance sheet at fair value, which include loans held for investment, interest receivable, non-interest bearing and interest bearing deposits, other borrowings, senior and subordinated notes, and interest payable. The provisions requiring us to maximize the use of observable inputs and to measure fair value using a notion of exit price were factored into our selection of inputs of our established valuation techniques.

Financial Assets

Cash and Cash Equivalents

The carrying amounts of cash and due from banks, federal funds sold and resale agreements and interest-bearing deposits at other banks approximate fair value.

Restricted Cash or Securitization Investors

The carrying amounts of restricted cash for securitization investors approximate their fair value due to their relatively short-term nature.

Securities Available For Sale

Quoted prices in active markets are used to measure the fair value of U.S. Treasury securities. For other investment categories, we utilize multiple third party pricing services to obtain fair value measures for the large majority of our securities. A pricing service may be considered as the primary pricing provider for certain types of securities, and the designation of the primary pricing provider may vary depending on the type of securities. The determination of the primary pricing provider is based on our experience and validation benchmark of the pricing service s performance in terms of providing fair value measurement for the various types of securities.

Certain securities available for sale are classified as Level 2 and 3, the majority of which are collateralized mortgage obligations and mortgage-backed securities. Classification indicates that significant valuation assumptions are not consistently observable in the market. When significant assumptions are not consistently observable, fair values are derived using the best available data. Such data may include quotes provided by a dealer, the use of external pricing services, independent pricing models, or other model-based valuation techniques such as calculation of the present values of future cash flows incorporating assumptions such as benchmark yields, spreads, prepayment speeds, credit ratings, and losses. The techniques used by the pricing services utilize observable market data to the extent available. Pricing models may be used, which can vary by asset class and may incorporate available trade, bid and other market information. Across asset classes, information such as trader/dealer input, credit spreads, forward curves, and prepayment speeds are used to help determine appropriate valuations. Because many fixed income securities do not trade on a daily basis, the evaluated pricing applications may apply available information through processes such as benchmarking curves, like securities, sector groupings, and matrix pricing to prepare valuations. In addition, model processes are used by the pricing services to develop prepayment and interest rate scenarios.

We validate the pricing obtained from the primary pricing providers through comparison of pricing to additional sources, including other pricing services, dealer pricing indications in transaction results, and other internal sources. Pricing variances among different pricing sources are analyzed and validated. Additionally, on an on-going basis we may select a sample of securities and test the third party valuation by obtaining more detailed information about the pricing methodology, sources of information, and assumptions used to value the securities.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The significant unobservable inputs used in the fair value measurement of our residential, asset-backed and commercial securities include yield, prepayment rate, default rate and loss severity in the event of default. Significant increases (decreases) in any of those inputs in isolation or combination would result in a significant change in fair value measurement. Generally, an increase in the yield assumption will result in a decrease in fair value measurement, however, an increase or decrease in prepayment rate, default rate or loss severity may have a different impact on the fair value given various characteristics of the security including the capital structure of the deal, credit enhancement for the security or other factors.

As of March 31, 2012, we saw further improvements in the market value of our portfolio holdings driven by lower interest rates and reduced risk premiums as compared to 2011. The increase in the amount of Level 3 securities was primarily driven by the increase in non-agency MBS securities due to acquisition of ING Direct securities portfolio.

Loans Held For Sale

Loans held for sale are carried at the lower of aggregate cost, net of deferred fees, deferred origination costs and effects of hedge accounting, or fair value. The fair value of loans held for sale is determined using current secondary market prices for portfolios with similar characteristics. The carrying amounts as of March 31, 2012 and December 31, 2011 approximate fair value.

Loans Held For Investment, Net

The fair values of credit card loans, installment loans, auto loans, home loans and commercial loans were estimated using a discounted cash flow method, a form of the income approach. Discount rates were determined considering rates at which similar portfolios of loans would be made under current conditions and considering liquidity spreads applicable to each loan portfolio based on the secondary market. The fair value of credit card loans excluded any value related to customer account relationships. The increase in fair value above carrying amount at March 31, 2012 was primarily due to a tightening of liquidity spreads and improved credit performance noted in our credit card, auto and commercial loan portfolios.

Interest Receivable

The carrying amount of interest receivable approximates the fair value of this asset due to its relatively short-term nature.

Accounts Receivable from Securitizations

Accounts receivable from securitizations include the interest-only strip, retained notes accrued interest receivable, cash reserve accounts and cash spread accounts for those securitization structures achieving off-balance sheet treatment. Refer to Note 7 Variable Interest Entities and Securitizations for discussion regarding the adoption of the new accounting consolidation standards on January 1, 2010. We use a valuation model that calculates the present value of estimated future cash flows. The model incorporates our estimate of assumptions market participants use in determining fair value, including estimates of payment rates, defaults, and discount rates including adjustments for liquidity, and contractual interest and fees. Other retained interests related to securitizations are carried at cost, which approximates fair value. The valuation technique for these securities is discussed in more detail in Note 7 Variable Interest Entities and Securitizations.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Derivative Assets

Most of our derivatives are not exchange traded, but instead traded in over the counter markets where quoted market prices are not readily available. The fair value derived for those derivatives using models that use primarily market observable inputs, such as interest rate yield curves, credit curves, option volatility and currency rates are classified as Level 2. Any derivative fair value measurements using significant assumptions that are unobservable are classified as Level 3, which include interest rate swaps whose remaining terms do not correlate with market observable interest rate yield curves. The impact of counterparty non-performance risk is considered when measuring the fair value of derivative assets. These derivatives are included in other assets on the balance sheet.

We validate the pricing obtained from the internal models through comparison of pricing to additional sources, including external valuation agents and other internal sources. Pricing variances among different pricing sources are analyzed and validated.

Mortgage Servicing Rights

MSRs do not trade in an active market with readily observable prices. Accordingly, we determine the fair value of MSRs using a valuation model that calculates the present value of estimated future net servicing income. The model incorporates assumptions that market participants use in estimating future net servicing income, including estimates of prepayment spreads, discount rate, cost to service, contractual servicing fee income, ancillary income and late fees. We record MSRs at fair value on a recurring basis. Fair value measurements of MSRs use significant unobservable inputs and, accordingly, are classified as Level 3. The valuation technique for these securities is discussed in more detail in Note 8 Goodwill and Other Intangible Assets.

Financial liabilities

Interest Bearing Deposits

The fair value of other interest-bearing deposits was determined based on discounted expected cash flows using discount rates consistent with current market rates for similar products with similar remaining terms.

Non-Interest Bearing Deposits

The carrying amount of non-interest bearing deposits approximates fair value.

Senior and Subordinated Notes

We engage multiple third party pricing services in order to estimate the fair value of senior and subordinated notes. The pricing service utilizes a pricing model that incorporates available trade, bid and other market information. It also incorporates spread assumptions, volatility assumptions and relevant credit information into the pricing models.

Securitized Debt Obligations

We utilized multiple third party pricing services to obtain fair value measures for the large majority of our securitized debt obligations. The techniques used by the pricing services utilize observable market data to the extent available; and pricing models may be used which incorporate available trade, bid and other market

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

information as described in the above section. We used internal pricing models, discounted cash flow models or similar techniques to estimate the fair value of certain securitization trusts where third party pricing was not available.

Other Borrowings

The carrying amount of federal funds purchased and repurchase agreements, FHLB advances, and other short-term borrowings approximates fair value. The fair value of junior subordinated borrowings was estimated using the same methodology as described for senior and subordinated notes. The fair value of other borrowings was determined based on trade information for bonds with similar duration and credit quality, adjusted to incorporate any relevant credit information of the issuer. The increase in fair value of other borrowings above carrying values at March 31, 2012 was primarily due to interest rate spreads across the industry.

Interest Payable

The carrying amount of interest payable approximates the fair value of this liability due to its relatively short-term nature.

Derivative Liabilities

Most of our derivatives are not exchange traded, but instead traded in over the counter markets where quoted market prices are not readily available. The fair value of those derivatives, derived using models that use primarily market observable inputs, such as interest rate yield curves, credit curves, option volatility and currency rates, are classified as Level 2. Any derivative fair value measurements using significant assumptions that are unobservable are classified as Level 3, which include interest rate swaps whose remaining terms do not correlate with market observable interest rate yield curves. The impact of counterparty non-performance risk is considered when measuring the fair value of derivative assets. These derivatives are included in other liabilities on the consolidated balance sheets.

We validate the pricing obtained from the internal models through comparison of pricing to additional sources, including external valuation agents and other internal sources. Pricing variances among different pricing sources are analyzed and validated.

Commitments to extend credit and letters of credit

These financial instruments are generally not sold or traded. The fair value of the financial guarantees outstanding and included in other liabilities as of March 31, 2012 and December 31, 2011 that have been issued since January 1, 2003 was $3 million and $4 million, respectively. The estimated fair values of extensions of credit and letters of credit are not readily available. However, the fair value of commitments to extend credit and letters of credit is based on fees currently charged to enter into similar agreements with comparable credit risks and the current creditworthiness of the counterparties. Commitments to extend credit issued by us are generally short-term in nature and, if drawn upon, are issued under current market terms and conditions for credits with comparable risks. At March 31, 2012 and December 31, 2011, there was no material unrealized appreciation or depreciation on these financial instruments.

Note 14 BUSINESS SEGMENTS

Our principal operations are currently organized into three major business segments, which are defined based on the products and services provided or the type of customer served: Credit Card, Consumer Banking and Commercial Banking. The operating results of acquired businesses have been included in our existing business

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

segments. The substantial majority of the operations of ING Direct are reflected in Consumer Banking business results. Certain activities that are not part of a segment, such as management of our corporate investment portfolio and asset/liability management by our centralized Corporate Treasury group are included in the Other category.

The results of our individual businesses, which we report on a continuing operations basis, reflect the manner in which management evaluates performance and makes decisions about funding our operations and allocating resources. Our business segment results are intended to reflect each segment as if it were a stand-alone business. We use an internal management and reporting process to derive our business segment results. Our internal management and reporting process employs various allocation methodologies, including funds transfer pricing, to assign certain balance sheet assets, deposits and other liabilities and their related revenue and expenses directly or indirectly attributable to each business segment. See Note 20 Business Segments of our 2011 Form 10-K for information on the allocation methodologies used to derive our business segment results.

We may periodically change our business segments or reclassify business segment results based on modifications to our management reporting methodologies and changes in organizational alignment. In the first quarter of 2012, we re-aligned the reporting of our Commercial Banking business to reflect the operations on a product basis rather than by customer type. As a result of this re-alignment, we now report three product categories: commercial and multifamily real estate, commercial and industrial loans and small-ticket commercial real estate, which is a run-off portfolio. We previously reported four categories within our Commercial Banking business: commercial and multifamily real estate, middle market, specialty lending and small-ticket commercial real estate. Middle market and specialty lending related products are included in commercial and industrial loans. All tax-related commercial real estate investments, some of which were previously included in the Other segment, are now included in the commercial and multifamily real estate category of our Commercial Banking business. Because these tax-related commercial investments generate tax-exempt income or tax credits, we present the related revenue on a taxable-equivalent basis. Prior period amounts have been recast to conform to the current period presentation.

Segment Results and Reconciliation

The following tables provide a summary of our business segment results for the three months ended March 31, 2012 and 2011 and selected balance sheet data as of March 31, 2012 and December 31,2011. Total consolidated assets are not allocated among our business segments in the information that is reviewed by our chief operating decision maker. The total of our business segment results and Other category, does not differ from our total consolidated reported results.

NOTE 15 COMMITMENTS, CONTINGENCIES AND GUARANTEES

Letters of Credit

We issue letters of credit (financial standby, performance standby and commercial) to meet the financing needs of our customers. Standby letters of credit are conditional commitments issued by us to guarantee the performance of a customer to a third party in a borrowing arrangement. Commercial letters of credit are short-term commitments issued primarily to facilitate trade finance activities for customers and are generally collateralized by the goods being shipped to the client. Collateral requirements are similar to those for funded transactions and are established based on management s credit assessment of the customer. Management conducts regular reviews of all outstanding letters of credit and customer acceptances, and the results of these reviews are considered in assessing the adequacy of our allowance for loan and lease losses.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

We had contractual amounts of standby letters of credit and commercial letters of credit of $1.8 billion and $1.9 billion as of March 31, 2012 and December 31, 2011. As of March 31, 2012, financial guarantees had expiration dates ranging from 2012 to 2023. The fair value of the guarantees outstanding which we included in our consolidated balance sheets in other liabilities was $3 million as of March 31, 2012.

Contingent Payments Related to Acquisitions and Partnership Agreements

Certain of our acquisition and partnership agreements include contingent payment provisions in which we agree to provide future payments, up to a maximum amount, based on certain performance criteria. Our contingent payment arrangements are generally based on the difference between the expected credit performance of specified loan portfolios as of the date of the applicable agreement and the actual future performance. To the extent that actual losses associated with these portfolios are less than the expected level, we agree to share a portion of the benefit with the seller. The maximum contingent payment amount related to our acquisitions totaled $330 million as of March 31, 2012. The actual payment amount related to $30 million of this balance will be determined as of September 30, 2012. The actual payment amount related to the remaining $300 million of this balance will be determined as of December 31, 2013. We recognized expense related to contingent payment arrangements of $12 million in Q1 2012. As such, we had a liability for contingent payments related to these arrangements of $100 million and $88 million as of March 31, 2012 and December 31, 2011, respectively.

Potential Mortgage Representation & Warranty Liabilities

In recent years, we acquired three subsidiaries that originated residential mortgage loans and sold them to various purchasers, including purchasers who created securitization trusts. These subsidiaries are Capital One Home Loans, which was acquired in February 2005; GreenPoint Mortgage Funding, Inc. (GreenPoint), which was acquired in December 2006 as part of the North Fork acquisition; and Chevy Chase Bank, which was acquired in February 2009 and subsequently merged into CONA.

In connection with their sales of mortgage loans, the subsidiaries entered into agreements containing varying representations and warranties about, among other things, the ownership of the loan, the validity of the lien securing the loan, the loan s compliance with any applicable loan criteria established by the purchaser, including underwriting guidelines and the ongoing existence of mortgage insurance, and the loan s compliance with applicable federal, state and local laws. The representations and warranties do not address the credit performance of the mortgage loans, but mortgage loan performance often influences whether a claim for breach of representation and warranty will be asserted and has an effect on the amount of any loss in the event of a breach of a representation or warranty.

Each of these subsidiaries may be required to repurchase mortgage loans in the event of certain breaches of these representations and warranties. In the event of a repurchase, the subsidiary is typically required to pay the then unpaid principal balance of the loan together with interest and certain expenses (including, in certain cases, legal costs incurred by the purchaser and/or others). The subsidiary then recovers the loan or, if the loan has been foreclosed, the underlying collateral. The subsidiary is exposed to any losses on the repurchased loans after giving effect to any recoveries on the collateral. In some instances, rather than repurchase the loans, a subsidiary may agree to make a cash payment to make an investor whole on losses or to settle repurchase claims. In addition, our subsidiaries may be required to indemnify certain purchasers and others against losses they incur as a result of certain breaches of representations and warranties. In some cases, the amount of such losses could exceed the repurchase amount of the related loans.

These subsidiaries, in total, originated and sold to non-affiliates approximately $111 billion original principal balance of mortgage loans between 2005 and 2008, which are the years (or vintages) with respect to which our subsidiaries have received the vast majority of the repurchase requests and other related claims.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The following table presents the original principal balance of mortgage loan originations, by vintage for 2005 through 2008, for the three general categories of purchasers of mortgage loans and the outstanding principal balance as of March 31, 2012 and December 31, 2011:

Unpaid Principal Balance of Mortgage Loans Originated and Sold to Third Parties Based on Category of Purchaser

	Unpaid Principal Balance		Original Unpaid Principal Balance				
(Dollars in billions)	**March 31, 2012**	**December 31, 2011**	**Total**	**2008**	**2007**	**2006**	**2005**
Government sponsored enterprises (GSEs[1])	**$ 5**	$ 5	$ 11	$ 1	$ 4	$ 3	$ 3
Insured Securitizations	**6**	6	19	0	2	8	9
Uninsured Securitizations and Other	**27**	30	81	3	15	30	33
Total	**$ 38**	$ 41	$ 111	$ 4	$ 21	$ 41	$ 45

[1] GSEs include Fannie Mae and Freddie Mac.

Between 2005 and 2008, our subsidiaries sold an aggregate amount of $11 billion in original principal balance mortgage loans to the GSEs.

Of the $19 billion in original principal balance of mortgage loans sold directly by our subsidiaries to private-label purchasers who placed the loans into securitizations supported by bond insurance (Insured Securitizations), approximately $16 billion original principal balance was placed in securitizations as to which the monoline bond insurers have made repurchase requests or loan file requests to one of our subsidiaries (Active Insured Securitizations), and the remaining approximately $3 billion original principal balance was placed in securitizations as to which the monoline bond insurers have not made repurchase requests or loan file requests to one of our subsidiaries (Inactive Insured Securitizations). Insured Securitizations often allow the monoline bond insurer to act independently of the investors. Bond insurers typically have indemnity agreements directly with both the mortgage originators and the securitizers, and they often have super-majority rights within the trust documentation that allow them to direct trustees to pursue mortgage repurchase requests without coordination with other investors.

Because we do not service most of the loans our subsidiaries sold to others, we do not have complete information about the current ownership of the $81 billion in original principal balance of mortgage loans not sold directly to GSEs or placed in Insured Securitizations. We have determined based on information obtained from third-party databases that about $50 billion original principal balance of these mortgage loans are currently held by private-label publicly issued securitizations not supported by bond insurance (Uninsured Securitizations). In contrast with the bond insurers in Insured Securitizations, investors in Uninsured Securitizations often face a number of legal and logistical hurdles before they can direct a securitization trustee to pursue mortgage repurchases, including the need to coordinate with a certain percentage of investors holding the securities and to indemnify the trustee for any litigation it undertakes. An additional approximately $21 billion original principal balance of mortgage loans were initially sold to private investors as whole loans. Of this amount, we believe approximately $10 billion original principal balance of mortgage loans were ultimately purchased by GSEs. For purposes of our reserves-setting process, we consider these loans to be private-label loans rather than GSE loans. Various known and unknown investors purchased the remaining $10 billion original principal balance of mortgage loans in this category.

With respect to the $111 billion in original principal balance of mortgage loans originated and sold to others between 2005 and 2008, we estimate that approximately $38 billion in unpaid principal balance remains outstanding as of March 31, 2012, approximately $15 billion in losses have been realized and approximately $10

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

billion in unpaid principal balance is at least 90 days delinquent. Because we do not service most of the loans we sold to others, we do not have complete information about the underlying credit performance levels for some of these mortgage loans. These amounts reflect our best estimates, including extrapolations where necessary. These extrapolations occur on the approximately $10 billion original principal balance of mortgage loans for which we do not have complete information about the current holders or the underlying credit performance. These estimates could change as we get additional data or refine our analysis.

The subsidiaries had open repurchase requests relating to approximately $2.3 billion original principal balance of mortgage loans as of March 31, 2012, compared with $2.1 billion as of December 31, 2011. As of March 31, 2012, the majority of new repurchase demands received over the last year and, as discussed below, the majority of our $1.1 billion reserve relates to the $27 billion of original principal balance of mortgage loans originally sold to the GSEs or to Active Insured Securitizations. Currently, repurchase demands predominantly relate to the 2006 and 2007 vintages. We have received relatively few repurchase demands from the 2008 and 2009 vintages. We believe this is because GreenPoint ceased originating mortgages in August 2007.

The following table presents information on pending repurchase requests by counterparty category and timing of initial repurchase request. The amounts presented are based on original loan principal balances.

Open Pipeline All Vintages (all entities)[1]

(Dollars in millions) (All amounts are Original Principal Balance)	GSEs	Insured Securitizations	Uninsured Securitizations and Other	Total
Open claims as of December 31, 2010	$ 126	$ 832	$ 665	$ 1,623
Gross new demands received	196	359	131	686
Loans repurchased/made whole	(67)	(14)	(16)	(97)
Demands rescinded	(85)	(6)	(30)	(121)
Reclassifications[2]	6	72	(78)	0
Open claims as of December 31, 2011	$ 176	$ 1,243	$ 672	$ 2,091
Gross new demands received	**107**	**50**	**172**	**329**
Loans repurchased/made whole	**(9)**	**(1)**	**(22)**	**(32)**
Demands rescinded	**(35)**	**0**	**(7)**	**(42)**
Reclassifications[2]	**0**	**1**	**(1)**	**0**
Open claims as of March 31, 2012	**$ 239**	**$ 1,293**	**$ 814**	**$ 2,346**

(1) The open pipeline includes all repurchase requests ever received by our subsidiaries where either the requesting party has not formally rescinded the repurchase request and where our subsidiary has not agreed to either repurchase the loan at issue or make the requesting party whole with respect to its losses. Accordingly, repurchase requests denied by our subsidiaries and not pursued by the counterparty remain in the open pipeline. Moreover, repurchase requests submitted by parties without contractual standing to pursue repurchase requests are included within the open pipeline unless the requesting party has formally rescinded its repurchase request. Finally, the amounts reflected in this chart are the original principal balance amounts of the mortgage loans at issue and do not correspond to the losses our subsidiary would incur upon the repurchase of these loans.

(2) Represents adjustments to correct the counterparty category as of March 31, 2012 and December 31, 2011 for amounts that were misclassified. The reclassification had no impact on the total pending repurchase requests.

We have established representation and warranty reserves for losses associated with the mortgage loans sold by each subsidiary that we consider to be both probable and reasonably estimable, including both litigation and non-litigation liabilities. These reserves are reported in our consolidated balance sheets as a component of other liabilities. The reserve setting process relies heavily on estimates, which are inherently uncertain, and requires the application of judgment. We evaluate these estimates on a quarterly basis. We build our representation and warranty

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

reserves through the provision for repurchase losses, which we report in our consolidated statements of income as a component of non-interest income for loans originated and sold by Chevy Chase Bank and Capital One Home Loans and as a component of discontinued operations for loans originated and sold by GreenPoint. In establishing the representation and warranty reserves, we consider a variety of factors depending on the category of purchaser.

In establishing reserves for the $11 billion original principal balance of GSE loans, we rely on the historical relationship between GSE loan losses and repurchase outcomes to estimate: (1) the percentage of current and future GSE loan defaults that we anticipate will result in repurchase requests from the GSEs over the lifetime of the GSE loans; and (2) the percentage of those repurchase requests that we anticipate will result in actual repurchases. We also rely on estimated collateral valuations and loss forecast models to estimate our lifetime liability on GSE loans. This reserving approach to the GSE loans reflects the historical interaction with the GSEs around repurchase requests, and also includes anticipated repurchases resulting from mortgage insurance rescissions. The GSEs typically have stronger contractual rights than non-GSE counterparties because GSE contracts typically do not contain prompt notice requirements for repurchase requests or materiality qualifications to the representations and warranties.

Moreover, although we often disagree with the GSEs about the validity of their repurchase requests, we have established a negotiation pattern whereby the GSEs and our subsidiaries continually negotiate around individual repurchase requests, leading to the GSEs rescinding some repurchase requests and our subsidiaries agreeing in some cases to repurchase some loans or make the GSEs whole with respect to losses. Our lifetime representation and warranty reserves with respect to GSE loans are grounded in this history. Finally, as discussed in more detail below, one of our subsidiaries entered into a settlement with a GSE to resolve present and future repurchase claims in the first quarter of 2012. Our reserves allocated to the GSE segment reflect the amount of that settlement which was paid after March 31, 2012.

For the $16 billion original principal balance in Active Insured Securitizations, our reserving approach also reflects our historical interaction with monoline bond insurers around repurchase requests. Typically, monoline bond insurers allege a very high repurchase rate with respect to the mortgage loans in the Active Insured Securitization category. In response to these repurchase requests, our subsidiaries typically request information from the monoline bond insurers demonstrating that the contractual requirements around a valid repurchase request have been satisfied. In response to these requests for supporting documentation, monoline bond insurers typically initiate litigation. Accordingly, our reserves within the Active Insured Securitization segment are not based upon the historical repurchase rate with monoline bond insurers, but rather upon the expected resolution of litigation with the monoline bond insurers. Every bond insurer within this category is pursuing a substantially similar litigation strategy either through active or probable litigation. Accordingly, our representation and warranty reserves for this category are litigation reserves. In establishing litigation reserves for this category each quarter, we consider current and future losses inherent within the securitization and apply legal judgment to the actual and anticipated factual and legal record to estimate the lifetime legal liability for each securitization. Our estimated legal liability for each securitization within this category assumes that we will be responsible for only a portion of the losses inherent in each securitization. Our litigation reserves with respect to both the U.S. Bank Litigation and the DBSP Litigation, in each case as referenced below, are contained within the Active Insured Securitization reserve category. Further, our litigation reserves with respect to indemnification risks from certain representation and warranty lawsuits brought by monoline bond insurers against third-party securitizations sponsors, where GreenPoint provided some or all of the mortgage collateral within the securitization but is not a defendant in the litigation, are also contained within this category.

For the $3 billion original principal balance of mortgage loans in the Inactive Insured Securitizations category and the $81 billion original principal balance of mortgage loans in the Uninsured Securitizations and other whole loan sales categories, we establish reserves by relying on our historical activity and repurchase rates to estimate

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

repurchase liabilities over the next twelve (12) months. We do not believe we can estimate repurchase liability for these categories for a period longer than twelve (12) months because of the relatively irregular nature of repurchase activity within these categories. Some Uninsured Securitization investors from this category who have not made repurchase requests or filed representation and warranty lawsuits are currently suing investment banks and securitization sponsors under federal and/or state securities laws. Although we face some direct and indirect indemnity risks from these litigations, we generally have not established reserves with respect to these indemnity risks because we do not consider them to be both probable and reasonably estimable liabilities.

The aggregate reserves for all three subsidiaries were $1.1 billion as of March 31, 2012, as compared with $943 million as of December 31, 2011. We recorded a total provision for repurchase losses for our representation and warranty repurchase exposure of $169 million for the three months ended March 31, 2012, primarily driven by an increased reserve associated with a settlement between a subsidiary and a GSE to resolve present and future repurchase claims. This GSE settlement accounted for $95 million of the $169 million provision. The remainder of the provision is primarily driven by certain inactive insured securitizations becoming active insured securitizations in the first quarter.

During the first quarter of 2012, we had settlements of repurchase requests totaling $11 million that were charged against the reserve. The table below summarizes changes in our representation and warranty reserves for the three months ended March 31, 2012 and 2011, and for full year 2011:

Changes in Representation and Warranty Reserves

(Dollars in millions)	Three Months Ended March 31, 2012	Three Months Ended March 31, 2011	Full Year 2011
Representation and warranty repurchase reserve, beginning of period[1]	**$ 943**	$ 816	$ 816
Provision for repurchase losses[2]	**169**	44	212
Net realized losses	**(11)**	(14)	(85)
Representation and warranty repurchase reserve, end of period[1]	**$ 1,101**	$ 846	$ 943

(1) Reported in our consolidated balance sheets as a component of other liabilities.

(2) The pre-tax portion of the provision for mortgage repurchase claims recognized in our consolidated statements of income as a component of non-interest income totaled $16 million and $5 million for the three months ended March 31, 2012 and 2011, respectively. The pre-tax portion of the provision for mortgage repurchase claims recognized in our consolidated statements of income as a component of discontinued operations totaled $153 million and $39 million, for the three months ended March 31, 2012 and 2011, respectively.

As indicated in the table below, most of the reserves relate to the $11 billion in original principal balance of mortgage loans sold directly to the GSEs and to the $16 billion in mortgage loans sold to purchasers who placed them into Active Insured Securitizations.

Allocation of Representation and Warranty Reserves

(Dollars in millions, except for loans sold)	Reserve Liability March 31, 2012	Reserve Liability December 31, 2011	Loans Sold 2005 to 2008[1]
GSEs and Active Insured Securitizations	**$ 927**	$ 778	$ 27
Inactive Insured Securitizations and Others	**174**	165	84

Total	**$ 1,101**	$ 943	$ 111

(1) Reflects, in billions, the total original principal balance of mortgage loans originated by our subsidiaries and sold to third party investors between 2005 and 2008.

Table of Contents

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

The adequacy of the reserves and the ultimate amount of losses incurred by our subsidiaries will depend on, among other things, actual future mortgage loan performance, the actual level of future repurchase and indemnification requests (including the extent, if any, to which Inactive Insured Securitizations and other currently inactive investors ultimately assert claims), the actual success rates of claimants, developments in litigation, actual recoveries on the collateral and macroeconomic conditions (including unemployment levels and housing prices).

As part of our business planning processes, we have considered various outcomes relating to the potential future representation and warranty liabilities of our subsidiaries that are possible but do not rise to the level of being both probable and reasonably estimable outcomes that would justify an incremental accrual under applicable accounting standards. We believe that the upper end of the reasonably possible future losses from representation and warranty claims beyond the current accrual levels, including reasonably possible future losses relating to the US Bank Litigation, DBSP Litigation and the FHLB of Boston Litigation, could be as high as $1.5 billion, which is unchanged from the estimate provided as of December 31, 2011. Notwithstanding our ongoing attempts to estimate a reasonably possible amount of loss beyond our current accrual levels based on current information, it is possible that actual future losses will exceed both the current accrual level and our current estimated upper-end of the amount of reasonably possible losses. There is still significant uncertainty regarding the numerous factors that may impact the ultimate loss levels, including, but not limited to, litigation outcomes, future repurchase claims levels, ultimate repurchase success rates and mortgage loan performance levels.

Litigation

In accordance with the current accounting standards for loss contingencies, we establish reserves for litigation related matters when it is probable that a loss associated with a claim or proceeding has been incurred and the amount of the loss can be reasonably estimated. Litigation claims and proceedings of all types are subject to many uncertain factors that generally cannot be predicted with assurance. Below we provide a description of material legal proceedings and claims.

For some of the matters disclosed below, we are able to determine estimates of potential future outcomes that are not probable and reasonably estimable outcomes justifying either the establishment of a reserve or an incremental reserve build, but which are reasonably possible outcomes. For other disclosed matters, such an estimate is not possible at this time. For those matters where an estimate is possible, excluding the reasonably possible future losses relating to the U.S. Bank Litigation, the DBSP Litigation, and the FHLB of Boston Litigation because reasonably possible losses with respect to those litigations are included within the range of reasonably possible representation and warranty liabilities discussed above, management currently estimates the aggregate high end of the range of possible loss is $50 million to $175 million. Notwithstanding our attempt to estimate a reasonably possible range of loss beyond our current accrual levels for some litigation matters based on current information, it is possible that actual future losses will exceed both the current accrual level and the range of reasonably possible losses disclosed here. Given the inherent uncertainties involved in these matters, and the very large or indeterminate damages sought in some of these matters, there is significant uncertainty as to the ultimate liability we may incur from these litigation matters and an adverse outcome in one or more of these matters could be material to our results of operations or cash flows for any particular reporting period.

Interchange Litigation

In 2005, a number of entities, each purporting to represent a class of retail merchants, filed antitrust lawsuits (the Interchange Lawsuits) against MasterCard and Visa and several member banks, including our subsidiaries and us, alleging among other things, that the defendants conspired to fix the level of interchange fees. The complaints seek injunctive relief and civil monetary damages, which could be trebled. Separately, a number of large

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

merchants have asserted similar claims against Visa and MasterCard only. In October 2005, the class and merchant Interchange Lawsuits were consolidated before the U.S. District Court for the Eastern District of New York for certain purposes, including discovery. Fact and expert discovery have closed. The parties have briefed and presented oral argument on motions to dismiss, class certification and motions for summary judgment and are awaiting decisions from the court.

The defendant banks are members of Visa U.S.A., Inc. (Visa). As members, our subsidiary banks have indemnification obligations to Visa with respect to final judgments and settlements of certain litigation against Visa. In the first quarter of 2008, Visa completed an IPO of its stock. With IPO proceeds, Visa established an escrow account for the benefit of member banks to fund certain litigation settlements and claims, including the Interchange Lawsuits. As a result, in the first quarter of 2008, we reduced our Visa-related indemnification liabilities of $91 million recorded in other liabilities with a corresponding reduction of other non-interest expense. We made an election in accordance with the accounting guidance for fair value option for financial assets and liabilities on the indemnification guarantee to Visa, and the fair value of the guarantee at December 31, 2011 and March 31, 2012 was zero. In January 2011, we entered into a MasterCard Settlement and Judgment Sharing Agreement, along with other defendant banks, which apportions between MasterCard and its member banks any costs and liabilities of any judgment or settlement arising from the Interchange Lawsuits.

In March 2011, a furniture store owner, on behalf of himself and other merchants who accept Visa and MasterCard branded credit cards, filed a class action in the Supreme Court of British Columbia (Vancouver Registry) against the Visa and MasterCard membership associations related to credit card interchange fees. In May 2011, another merchant, on behalf of himself and other merchants who accept Visa and MasterCard branded credit cards, filed a class action in the Ontario Superior Court of Justice (Toronto Region) asserting the same alleged violations of law related to credit card interchange fees and network rules. In April, 2012, Capital One Financial Corporation was included as a defendant, along with several other member banks, to an existing class action against Visa and MasterCard that is pending in the Superior Court of Quebec (District of Montreal) and brought by a merchant corporation on behalf of itself and other merchants that accept Visa and MasterCard branded credit cards. All three class actions name Visa and MasterCard and a number of member banks, including Capital One Financial Corporation. Capital One Bank (Canada Branch), which was not named as a defendant, issues only MasterCard branded credit cards in Canada. The class action complaints allege that the associations and member banks are liable for civil conspiracy, unjust enrichment, constructive trust and unlawful interference with economic interests and violated Canadian anti-competition laws by (a) conspiring to fix supra-competitive interchange fees and merchant discounts, and (b) requiring participation in the respective networks and adherence to Visa and MasterCard Rules to acceptance of payment guarantee services.

Late Fees Litigation

In 2007, a number of individual plaintiffs, each purporting to represent a class of cardholders, filed antitrust lawsuits in the U.S. District Court for the Northern District of California against several issuing banks, including us. These lawsuits allege, among other things, that the defendants conspired to fix the level of late fees and over-limit fees charged to cardholders, and that these fees are excessive. In May 2007, the cases were consolidated for all purposes, and a consolidated amended complaint was filed alleging violations of federal statutes and state law. The amended complaint requests civil monetary damages, which could be trebled, and injunctive relief. In November 2007, the court dismissed the amended complaint. Plaintiffs appealed that order to the Ninth Circuit Court of Appeals. The plaintiffs appeal challenges the dismissal of their claims under the National Bank Act, the Depository Institutions Deregulation Act of 1980 and the California Unfair Competition Law (the UCL), but not their antitrust conspiracy claims. In June 2009, the Ninth Circuit Court of Appeals stayed the matter pending the bankruptcy proceedings of one of the defendant financial institutions. On January 4, 2012, the Ninth Circuit Court of Appeals entered an additional order continuing the stay of the matter pending the bankruptcy proceedings.

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

Credit Card Interest Rate Litigation

In July 2010, the U.S. Court of Appeals for the Ninth Circuit reversed a dismissal entered in favor of COBNA in Rubio v. Capital One Bank, which was filed in the U.S. District Court for the Central District of California in 2007. The plaintiff in Rubio alleges in a putative class action that COBNA breached its contractual obligations and violated the Truth In Lending Act (the TILA) and the UCL when it raised interest rates on certain credit card accounts. The plaintiff seeks damages, restitution, attorney s fees and an injunction against future rate increases. The District Court granted COBNA s motion to dismiss all claims as a matter of law prior to any discovery. On appeal, the Ninth Circuit reversed the District Court s dismissal with respect to the TILA and UCL claims, remanding the case back to the District Court for further proceedings. The Ninth Circuit upheld the dismissal of the plaintiff s breach of contract claim, finding that COBNA was contractually allowed to increase interest rates. In September 2010, the Ninth Circuit denied COBNA s Petition for Panel Rehearing and Rehearing En Banc. In January 2011, COBNA filed a writ of certiorari with the United States Supreme Court, seeking leave to appeal the Ninth Circuit s ruling. On April 4, 2011, the United States Supreme Court denied Capital One s writ of certiorari, and as a result, the Ninth Circuit remanded the case back to the District Court to begin discovery. The parties have briefed plaintiff s motion for class certification and await oral argument before the Court.

The Capital One Bank Credit Card Interest Rate Multi-district Litigation matter involves similar issues as Rubio. This multi-district litigation matter was created as a result of a June 2010 transfer order issued by the United States Judicial Panel on Multi-district Litigation (MDL), which consolidated for pretrial proceedings in the U.S. District Court for the Northern District of Georgia two pending putative class actions against COBNA Nancy Mancuso, et al. v. Capital One Bank (USA), N.A., et al., (E.D. Virginia); and Kevin S. Barker, et al. v. Capital One Bank (USA), N.A., (N.D. Georgia), A third action, Jennifer L. Kolkowski v. Capital One Bank (USA), N.A., (C.D. California) was subsequently transferred into the MDL. On August 2, 2010, the plaintiffs in the MDL filed a Consolidated Amended Complaint. The Consolidated Amended Complaint alleges in a putative class action that COBNA breached its contractual obligations, and violated the TILA, the California Consumers Legal Remedies Act, the UCL, the California False Advertising Act, the New Jersey Consumer Fraud Act, and the Kansas Consumer Protection Act when it raised interest rates on certain credit card accounts. The MDL plaintiffs seek statutory damages, restitution, attorney s fees and an injunction against future rate increases. Fact discovery is now closed. On August 8, 2011, Capital One filed a motion for summary judgment, which remains pending with the court.

Mortgage Repurchase Litigation

On February 5, 2009, GreenPoint was named as a defendant in a lawsuit commenced in the Supreme Court of the State of New York, New York County, by U.S. Bank National Association, Syncora Guarantee Inc. (formerly known as XL Capital Assurance Inc.) and CIFG Assurance North America, Inc. (the U.S. Bank Litigation). Plaintiffs allege, among other things, that GreenPoint breached certain representations and warranties in two contracts pursuant to which GreenPoint sold approximately 30,000 mortgage loans having an aggregate original principal balance of approximately $1.8 billion to a purchaser that ultimately transferred most of these mortgage loans to a securitization trust. Some of the securities issued by the trust were insured by two of the plaintiffs. Plaintiffs have alleged breaches of representations and warranties with respect to certain specific mortgage loans. Plaintiffs seek unspecified damages and an order compelling GreenPoint to repurchase the entire portfolio of 30,000 mortgage loans based on alleged breaches of representations and warranties relating to a limited sampling of loans in the portfolio, or, alternatively, the repurchase of specific mortgage loans to which the alleged breaches of representations and warranties relate. On March 3, 2010, the Court granted GreenPoint s motion to dismiss with respect to plaintiffs Syncora and CIFG and denied the motion with respect to U.S. Bank. In March 2010, GreenPoint answered the complaint with respect to U.S. Bank, denying the allegations, and filed a counterclaim

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

against U.S. Bank alleging breach of covenant of good faith and fair dealing. In April 2010, plaintiffs U.S. Bank, Syncora, and CIFG filed an amended complaint seeking, among other things, the repurchase remedies described above and indemnification for losses suffered by Syncora and CIFG. GreenPoint filed a motion to dismiss the amended complaint. In January 2011, the Court instructed plaintiffs to seek leave of court to file an amended complaint supported by an evidentiary showing of merit. Plaintiffs filed their motion for leave in June 2011, GreenPoint opposed the motion, and the court heard arguments on the motion in January 2012. On February 28, 2012, the Court denied plaintiff s motion for leave to an amended complaint and dismissed Syncora and CIFG with prejudice. Syncora and CIFG have appealed the ruling. As noted above, GreenPoint has established reserves with respect to its probable and reasonably estimable legal liability from the U.S. Bank Lawsuit, which reserves are included within the overall representation and warranty reserve. Also as noted above, GreenPoint has exposure to loss in excess of the amount established within the overall representation and warranty reserve because GreenPoint has not established reserves with respect to the portfolio-wide repurchase claim on the basis that the claim is not considered probable and reasonably estimable. In the event GreenPoint is obligated to repurchase all 30,000 mortgage loans under the portfolio-wide repurchase claim, GreenPoint would incur the current and future economic losses inherent in the portfolio. With respect to the mortgage loan portfolio at issue in the U.S. Bank Litigation, we believe approximately $865 million of losses have been realized and approximately $276 million in mortgage loans are still outstanding, of which approximately $30 million are more than 90 days delinquent, including foreclosures and REO.

In September 2010, DB Structured Products, Inc. (DBSP) named GreenPoint in a third-party complaint, filed in the New York County Supreme Court, alleging breach of contract and seeking indemnification (the DBSP Litigation). In the underlying suit, Assured Guaranty Municipal Corp. (AGM) sued DBSP for alleged breaches of representations and warranties made by DBSP with respect to certain residential mortgage loans that collateralize a securitization insured by AGM and sponsored by DBSP (the Underlying Lawsuit). DBSP purchased the HELOC loans from GreenPoint in 2006. The entire securitization is comprised of about 6,200 mortgage loans with an aggregate original principal balance of approximately $353 million. DBSP asserts that any liability it faces lies with GreenPoint, alleging that DBSP s representations and warranties to AGM are substantially similar to the representations and warranties made by GreenPoint to DBSP. GreenPoint filed a motion to dismiss the complaint in October 2010, which the court denied on July 25, 2011. The parties are currently engaged in discovery. As noted above, GreenPoint has established reserves with respect to its estimated probable and reasonable estimable legal liability from the DBSP Litigation, which reserves are included within the overall representation and warranty reserve. Also as noted above, GreenPoint has not established a reserve with respect to any portfolio-wide repurchase claim, but in the event GreenPoint is obligated to indemnify DBSP for the repurchase of all 6,200 mortgage loans, GreenPoint would incur the current and future economic losses inherent in the securitization. With respect to these loans, we believe approximately $150 million of losses have been realized and approximately $43 million in mortgage loans are still outstanding, of which approximately $2 million are more than 90 days delinquent, including foreclosures and REO.

SEC Investigation

Since July 2009, we have been providing documents and information in response to an inquiry by the Staff of the SEC. In the first quarter of 2010, the SEC issued a formal order of investigation with respect to this inquiry. Although the order, as is generally customary, authorizes a broader inquiry by the Staff, we believe that the investigation is focused largely on our method of determining the loan loss reserves for our auto finance business for certain quarterly periods in 2007. We are cooperating fully with the Staff s investigation.

Checking Account Overdraft Litigation

In May 2010, Capital One Financial Corporation and COBNA were named as defendants in a putative class action named Steen v. Capital One Financial Corporation, et al., filed in the U.S. District Court for the Eastern

CAPITAL ONE FINANCIAL CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) (Continued)

District of Louisiana. Plaintiff challenges our practices relating to fees for overdraft and non-sufficient funds fees on consumer checking accounts. Plaintiff alleges that our methodology for posting transactions to customer accounts is designed to maximize the generation of overdraft fees, supporting claims for breach of contract, breach of the covenant of good faith and fair dealing, unconscionability, conversion, unjust enrichment and violations of state unfair trade practices laws. Plaintiff seeks a range of remedies, including restitution, disgorgement, injunctive relief, punitive damages and attorneys fees. In May 2010, the case was transferred to the Southern District of Florida for coordinated pre-trial proceedings as part of a multi-district litigation (MDL) involving numerous defendant banks, In re Checking Account Overdraft Litigation. In January 2011, plaintiffs filed a second amended complaint against CONA in the MDL court. In February 2011, CONA filed a motion to dismiss the second amended complaint. On March 21, 2011, the MDL court granted the motion to dismiss claims of breach of the covenant of good faith and fair dealing under Texas law, but denied the motion to dismiss in all other respects. On April 18, 2011, CONA moved for reconsideration of those portions of the court s ruling denying its motion to dismiss, and on June 7, 2011, CONA moved for certification of an interlocutory appeal. The MDL court denied the motion to reconsider on June 23, 2011, and denied the motion for interlocutory appeal on July 13, 2011. The parties have been engaged in discovery since May, 2011.

Patent Litigation

On February 23, 2011, Capital One Financial Corporation, Capital One, N.A., and Capital One Bank (USA), N.A. (collectively, Capital One), were named as defendants, along with several other banks, in a patent infringement lawsuit filed by DataTreasury Corporation (DataTreasury) in the United States District Court for the Eastern District of Texas. DataTreasury alleges that Capital One and the other banks willfully infringed certain patents relating to remote image capture with centralized processing and storage. Capital One was served with the complaint on April 5, 2011, and filed an answer on May 26, 2011. On August 30, 2011, Capital One joined other defendants in filing a Motion to Transfer Venue from the U.S. District Court for the Eastern District of Texas, Tyler Division to the Southern District of Texas, Houston Division. That motion was denied by the trial court on January 30, 2012. All of the defendants have sought an appeal to the United States Court of Appeals for the Federal Circuit on the venue issue, which in currently in the briefing stage. The parties are also engaged in discovery.

FHLB Securities Litigation

On April 20, 2011, the Federal Home Loan Bank of Boston (the FHLB of Boston) filed suit against dozens of mortgage industry participants in Massachusetts Superior Court, alleging, among other things, violations of Massachusetts state securities laws in the sale and marketing of certain residential mortgage-backed securities (the FHLB of Boston Litigation). Capital One Financial Corporation and Capital One, National Association are named in the complaint as alleged successors in interest to Chevy Chase Bank, which allegedly marketed some of the mortgage-backed securities at issue in the litigation. The FHLB of Boston seeks rescission, unspecified damages, attorneys fees, and other unspecified relief. The case was removed to the United States District Court for the District of Massachusetts in May 2011, and plaintiff subsequently filed a motion to remand the matter to state court. On March 9, 2012, the court denied plaintiff s motion to remand.

Other Pending and Threatened Litigation

In addition, we are commonly subject to various pending and threatened legal actions relating to the conduct of our normal business activities. In the opinion of management, the ultimate aggregate liability, if any, arising out of all such other pending or threatened legal actions will not be material to our consolidated financial position or our results of operations.

NOTE 16 SUBSEQUENT EVENTS

On August 10, 2011, we entered into a purchase and sale agreement (the Purchase Agreement) with HSBC Finance Corporation, HSBC USA Inc. and HSBC Technology and Services (USA) Inc. (collectively, HSBC), to acquire substantially all of the assets and assume liabilities of HSBC s credit card and private-label credit card business in the United States (other than the HSBC Bank USA, National Association consumer credit card program and certain other retained assets and liabilities) (the HSBC Transaction). On May 1, 2012, we closed the HSBC Transaction, which included (i) the acquisition of HSBC s domestic credit card portfolio, (ii) its on-going private label and co-branded partnerships, and (iii) other assets, including infrastructure and capabilities. At closing, we acquired approximately 27 million new active accounts and approximately $28.2 billion in credit card receivables and approximately $0.6 billion in other net assets. The HSBC Transaction enhances the existing franchise and scale in the Domestic Card business and accelerates our achievement of a leading position in retail credit card partnerships.

In exchange for the assets and liabilities acquired in the HSBC Transaction, we transferred consideration of approximately $31.3 billion in cash to HSBC, which included a $2.5 billion premium. We financed the acquisition through a combination of existing cash, including cash acquired from the ING Direct acquisition, sale of securities held as available-for-sale, as well as public debt and equity offerings executed in March 2012. Given the limited time between the acquisition date and the issuance of our consolidated financial statements for March 31, 2012, the allocation of the purchase price of the HSBC Transaction based on the fair value of assets acquired and liabilities assumed as of May 1, 2012 has not yet been completed and we do not have final information regarding the total costs associated with the debt and equity offerings. We are in the process of gathering this information as well as assembling and assessing information to assist us in determining the required fair value measures at acquisition. We expect to substantially complete the initial accounting for the HSBC Transaction, including the purchase price allocation, during the second quarter of 2012. We will begin reporting the results, including the impact of the HSBC Transaction, for the period, from the date of closing of the HSBC Transaction, in our unaudited consolidated financial statements in the second quarter of 2012. We also will provide the following additional information, which is currently not available to us, in our second quarter 2012 unaudited consolidated financial statements:

- total acquisition-related costs, including the costs associated with the debt and equity offerings that occurred in March 2012;
- comparative consolidated pro forma revenue and net income results as if the acquisition of HSBC had occurred as of January 1, 2011;
- the fair value, gross contractually required payments, best estimate as of the acquisition date of the required payments that are not expected to be collected, and other information related to acquired loans;
- the amounts recorded at acquisition for each major class of assets acquired and liabilities assumed;
- the nature, amounts recognized and measurement basis of assets and liabilities arising from contingencies recognized at acquisition; and

qualitative and quantitative information related to any goodwill or bargain purchase gain recorded at acquisition.

CAPITAL ONE FINANCIAL CORPORATION

Item 3. Quantitative and Qualitative Disclosures about Market Risk

For a discussion of the quantitative and qualitative disclosures about market risk, see Part I Item 2. MD&A Market Risk Management.

Item 4. Controls and Procedures

Overview

We are required under applicable laws and regulations to maintain controls and procedures, which include disclosure controls and procedures as well as internal control over financial reporting, as further described below.

(a) Disclosure Controls and Procedures

Disclosure Controls and Procedures

Disclosure controls and procedures refer to controls and other procedures designed to provide reasonable assurance that information required to be disclosed in our financial reports is recorded, processed, summarized and reported within the time periods specified by SEC rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding our required disclosure. In designing and evaluating our disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and we must apply judgment in evaluating and implementing possible controls and procedures.

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15 of the Securities Exchange Act of 1934 (the Exchange Act), our management, including the Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act) as of March 31, 2012, the end of the period covered by this Report. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of March 31, 2012, at a reasonable level of assurance, in recording, processing, summarizing and reporting information required to be disclosed within the time periods specified by the SEC rules and forms.

(b) Changes in Internal Control Over Financial Reporting

We regularly review our disclosure controls and procedures and make changes intended to ensure the quality of our financial reporting. On February 17, 2012, we completed our acquisition of ING Direct, and as a result, we extended our oversight and monitoring processes that support our internal control over financial reporting during the first quarter of 2012, to include the operations of ING Direct. Otherwise, there were no changes in our internal control over financial reporting during the first quarter of 2012 which have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. Legal Proceedings

The information required by Item 1 is included in Note 15 Commitments, Contingencies and Guarantees.

Item 1A. Risk Factors

We are not aware of any material changes from the risk factors set forth under Part I Item 1A. Risk Factors in our 2011 Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table shows shares of our common stock we repurchased during the first quarter of 2012:

(Dollars in millions, except per share information)	Total Number of Shares Purchased[1]	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Amount That May Yet be Purchased Under the Plan or Program
January 1-31, 2012	664,091	$ 46.04		$
February 1-29, 2012	230,432	46.00		
March 1-31, 2012	34,503	46.20		
Total	929,026	46.04		

[1] Shares purchased represent shares purchased and share swaps made in connection with stock option exercises and the withholding of shares to cover taxes on restricted stock lapses.

As previously disclosed on a Current Report on Form 8-K filed with the Securities and Exchange Commission on February 17, 2012, in connection with the acquisition of ING Direct, we issued 54,028,086 shares of common stock to ING Bank N.V. in reliance on the exemption from registration provided by Section 4(2) of the Securities Act of 1933, as amended. See Note 2 Acquisitions in this report for additional information.

Item 3. Defaults upon Senior Securities

None.

Item 5. Other Information

None.

Item 6. Exhibits

An index to exhibits has been filed as part of this report beginning on page E-1 and is incorporated herein by reference.
