New York City-Subseries A-6 (FSA Insured), 0.180%, due 07/01/09 ⁵ (cost \$6,780,000)	Aa3	A-1	6,780,000	6,780,000
Total investments (cost \$483,508,109) 170.24%				<u>468,315,849</u>
Liabilities in excess of other assets (13.90)%				<u>(38,221,398)</u>
Liquidation value of auction preferred shares (56.34)%				<u>(155,000,000)</u>
Net assets applicable to common shareholders 100.00%				<u>275,094,451</u>

Aggregate cost for federal income tax purposes was \$444,274,924; and net unrealized depreciation consisted of:

Gross unrealized appreciation	\$ 3,463,652
Gross unrealized depreciation	(19,262,727)
Net unrealized depreciation	<u>\$(15,799,075)</u>

The difference between book-basis and tax-basis unrealized appreciation/depreciation of investments is attributable to the tax treatment of certain tender option bond transactions.

¹ Security subject to Alternative Minimum Tax.

² Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities, which represent 20.11% of net assets as of June 30, 2009, are considered liquid and may be resold in transactions exempt from registration, normally to qualified institutional buyers.

³ Security represents underlying bond transferred to a special-purpose entity established in a tender option bond transaction in which the Fund acquired the inverse floater. These securities serve as collateral in a financing transaction. As of June 30, 2009, the aggregate principal amount of the inverse floaters and the floating rate notes are \$13,285,000 and \$39,840,000, respectively.

⁴ Floating rate security. The interest rate shown is the current rate as of June 30, 2009.

Edgar Filing: INSURED MUNICIPAL INCOME FUND INC - Form N-Q

⁵ Variable rate demand notes are payable on demand. The maturity dates shown are the next interest rate reset dates. The interest rates shown are the current rates as of June 30, 2009.

6 The Fund calculates its net asset value based on the current market value, where available, for its portfolio securities. The Fund normally obtains market values for its securities from independent pricing sources and broker-dealers. Independent pricing sources may use last reported sale prices, current market quotations or valuations from computerized matrix systems that derive values based on comparable securities. A matrix system incorporates parameters such as security quality, maturity and coupon, and/or research and evaluations by its staff, including review of broker-dealer market price quotations, if available, in determining the valuation of the portfolio securities. If a market value is not available from an independent pricing source for a particular security, that security is valued at fair value as determined in good faith by or under the direction of the Fund's Board of Directors (the Board). Various factors may be reviewed in order to make a good faith determination of a security's fair value. These factors may include, but are not limited to, the type and cost of the security; contractual or legal restrictions on resale of the security; relevant financial or business developments of the issuer; actively traded similar or related securities; conversion or exchange rights on the security; related corporate actions; and changes in overall market conditions. If events occur that materially affect the value of securities between the close of trading in those securities and the close of regular trading on the New York Stock Exchange, the securities are fair valued. The amortized cost method of valuation, which approximates market value, generally is used to value short-term debt instruments with sixty days or less remaining to maturity, unless the Board or its delegate determines that this does not represent fair value. Securities traded in the over-the-counter (OTC) market are valued at the last bid price available on the valuation date prior to valuation.

On April 1, 2008, the Fund adopted the Financial Accounting Standards Board (FASB) *Statement of Financial Accounting Standards No. 157, Fair Value Measurements* (FAS 157). FAS 157 requires disclosure surrounding the various inputs that are used in determining the value of the Fund's investments. These inputs are summarized into the three broad levels listed below:

Level 1 Quoted prices in active markets for identical investments.

Level 2 Other significant observable inputs, including but not limited to, quoted prices for similar investments, interest rates, prepayment speeds and credit risks.

Level 3 Unobservable inputs inclusive of the Fund's own assumptions in determining the value of investments.

The following is a summary of the inputs used as of June 30, 2009 in valuing the Portfolio's investments.

	Quoted prices in active markets for identical investments (Level 1)	Significant other observable inputs (Level 2)	Unobservable inputs (Level 3)	Total
Long-term municipal bonds	\$	\$461,535,849	\$	\$461,535,849
Short-term municipal note		6,780,000		6,780,000
