- 6.17% increase in wages since May 2012 and of 8.00% since May 2013, and also the implementation of the Company's new career and wage plan, with an impact of approximately R\$31.0 million;
- R\$6.5 million upturn in the provision for the Defined Benefit Plan, arising from changes in actuarial assumptions;
- Provision referring to TAC (Conduct Adjustment Term) of retirees increased by R\$2.8 million, mainly due to wage adjustments in the period; and
- R\$2.8 million increase in overtime pay, mainly due to wage adjustment in the period.

5.2. Supplies

In 2Q13, expenses with supplies increased by R\$6.2 million or 14.4%, when compared to the previous year, from R\$43.2 million to R\$49.4 million, mostly due to: (i) preventive and corrective maintenance in several water and sewage systems, in the amount of R\$2.5 million; (ii) water and sewage network maintenance, in the amount of R\$1.2 million; and (iii) fuel and lubricants, in the amount of R\$0.5 million.

5.3. Treatment supplies

Treatment supplies expenses in 2Q13 were R\$3.8 million or 7.4% higher than in 2Q12, from R\$51.4 million to R\$55.2 million. The main factors for this variation were:

- Increase of R\$2.9 million due to the higher consumption of aluminum polychloride in the Jundiaí, Taiaçupeba, Guarapiranga and Rio Grande dams, ensuring better water quality in these reservoirs;
- Higher consumption of sodium hypochlorite, with an increase of R\$2.2 million, due to the use of this product in replacement of "Cloro Gas" in the Hortolândia, Paulínia, Indaiá and Rio Grande water treatment station, due to higher efficiency in water treatment and higher handling operational security;

Comments on the Company's Performance

- Higher consumption of aluminum sulfate, with an increase of R\$1.2 million, due to higher consumption of this product at the Taiaçupeba water treatment station, aiming at reducing the concentration of iron and manganese in water, associated with price adjustments; and
- Increase of R\$1.7 million from the consumption of products, such as: (i) hydrogen peroxide, due to the odor increase in several sewage pumping stations in the Baixada Santista region; and (ii) oxygen, due to the increase in the average flow in the Taubaté/Tremembé Sewage Treatment Stations.

The increases mentioned above were offset, specially, by the lower consumption of coal activated at the Taiaçupeba, ABV and Guaraú water treatment stations, due to better climate conditions and water quality, resulting in R\$7.5 million decrease.

5.4. Services

In 2Q13 this item grew R\$42.5 million or 16.8%, from R\$252.6 million in 2Q12 to R\$295.1 million in 2Q13. The main factors were:

- Increase in the estimated services expenses, in the amount of R\$12.2 million, due to the reversal of provisions in the amount of R\$6.5 million in 2Q12 and the increase in the estimated expense in the amount of R\$5.7 million in 2Q13;
- Preventive and corrective maintenance in the water and sewage systems in the amount of R\$9.0 million;
- Maintenance in the water and sewage network connections, in the amount of R\$5.9 million, due to the intensification of services in several areas of the São Paulo Metropolitan Region, and to price adjustment referring to the Global Sourcing contract;
- Hydrometer reading and bill delivery expenses in the amount of R\$2.9 million, as a result of the new contracts and price adjustment in the São Paulo Metropolitan Region;

- Paving services and replacement of sidewalks in the amount of R\$2.9 million, related to the Corporate Program for Water Loss Reduction; and
- Maintenance of properties and facilities, in the amount of R\$1.8 million.

5.5. Electric power

This item decreased R\$14.6 million, or 9.9%, from R\$147.6 million in 2Q12 to R\$133.0 million in 2Q13, due to the average decrease of approximately 22.7% in the Tariff for the Use of Distribution System (TUSD), as a consequence of Provisional Presidential Decree 579/12 and Law 12,783/13, resulting in a decrease of R\$17.5 million. The decrease mentioned above was partially offset by a 15.4% increase in the tariffs of the free market, resulting in an increase of R\$3.9 million in the period.

5.6. General expenses

General expenses increased R\$62.6 million or 50.6%, from R\$123.7 million in 2Q12 to R\$186.3 million in 2Q13, due to:

- Provision for lawsuits, in the amount of R\$49.0 million, mainly related to environmental contingencies in the amount of R\$25.6 million in 2Q13; and reversal of provisions with suppliers in 2Q12, in the amount of R\$ 29.9 million; and

- Provision for payment to the Municipal Fund for Sanitation Environment and Infrastructure, pursuant to the Service Agreement with the São Paulo Municipal Government, in the amount of R\$6.4 million, as a result of the increase in revenues.

5.7. Depreciation and Amortization

Depreciation and amortization increased R\$19.7 million or 11.1%, from R\$177.0 million in 2Q12 to R\$196.7 million in 2Q13, due to the transfer of works to the operating intangible asset, with a net increase of R\$ 2.1 billion.

5.8. Credit write-offs

Credit write-offs decreased R\$17.8 million or 48.6%, from R\$36.6 million in 2Q12 to R\$18.8 million in 2Q13, chiefly due to the reversal of provisions in the amount of R\$15.3 million referring to installment agreements settled.

- Decrease in interest and charges on international loans and financing due to the lower appreciation of the Yen versus the Brazilian Real in 2Q13 (4.2%), when compared to the appreciation of 14.6% recorded in 2Q12; and

The effect on the monetary variation on liabilities in 2Q13 was R\$76.8 million lower than in 2Q12, specially:

- Decrease in the exchange rate variation on loans and financing, in the amount of R\$80.0 million, due to: (i) the lower appreciation of the Yen versus the Brazilian Real in 2Q13 (4.2%), compared with 14.6% appreciation in 2Q12; and (ii) the lower appreciation of the US Dollar versus the Brazilian Real in 2Q13 (10.0%) when compared to the 10.9% appreciation recorded in 2Q12;
- Decrease in other monetary/exchange variation in the amount of R\$4.2 million due to provision for customer lawsuits in the amount of R\$4.7 million; and

- Increase in the expenses related to monetary variation on domestic loans and financing, in the amount of R\$7.5 million, due to the 17th debenture issue in February 2013.

6.2.2. Monetary variation on assets

Monetary variation on assets increased by R\$10.6 million in 2Q13, chiefly due to updates on installments agreements.

7. Income tax and social contribution

1. OPERATIONS

Companhia de Saneamento Básico do Estado de São Paulo ("SABESP" or the "Company") is a mixed-capital company headquartered in São Paulo, at Rua Costa Carvalho, 300, CEP 05429-900, controlled by the São Paulo State Government. The Company is engaged in the provision of basic and environmental sanitation services in the State of São Paulo, as well as it supplies treated water on a wholesale basis.

In addition to providing basic sanitation services in the State of São Paulo, SABESP may perform these activities in other states and countries, and can operate in drainage, urban cleaning, solid waste handling and energy markets. The objective set in the new vision of SABESP is to be recognized as the company that ensured universal access to water and sewage services in its marketplace, focused on the customer, and in a sustainable and competitive manner, with excellence in environmental solutions.

On June 30, 2013, the Company operated water and sewage services in 363 municipalities of the State of São Paulo. Most of these municipalities operations are based on 30-year concession agreements.

SABESP is not temporarily operating in some municipalities due to judicial orders under ongoing lawsuits: Iperó, Cajobi, Álvares Florense, Macatuba and Embaúba, whose carrying amount of these municipalities' intangible assets was R\$11,365 on June 30, 2013.

On June 30, 2013, a total of 63 concessions had expired and are being negotiated. From 2013 to 2034, 38 concessions will expire. Management believes that all concessions expired and not yet renewed will result in new contracts, disregarding the risk of discontinuity in the provision of municipal water supply and sewage services. By June 30, 2013, a total of 262 program and metropolitan contracts were signed (258 contracts on December 31, 2012).

On June 30, 2013, the carrying amount of intangible assets used in the 63 concessions of the municipalities under negotiation totaled R\$5,841,272, accounting for 25.52% of total, and the related gross revenue totaled R\$ 950,659, million in the six-month period ended June 30, 2013, accounting for 16.45% of total.

The Company's operations are concentrated in the municipality of São Paulo, which represents 51.15% of the gross revenue on June 30, 2013 (52.03% in June 2012) and 42.94% of intangible assets (43.51% in December 2012).

On June 23, 2010, the State of São Paulo through its Governor, the Municipality of São Paulo represented by its mayor, the Company and the regulatory agency "Sanitation and Energy Regulatory Agency – ARSESP" as intervening and consenting parties signed an agreement to share the responsibility for water supply and sewage services to the Municipality of São Paulo based on a 30-year concession agreement. This agreement is extendable for another 30 years, pursuant to the law. This agreement sets forth SABESP as the exclusive service provider and designates ARSESP as regulator, establishing prices, controlling and monitoring services.

- ii. capture, transport and treat of water;
- iii. collect, transport, treatment and final dispose of sanitary sewage; and

In the municipality of Santos, in the Santos coast region, which has a significant population, the Company operates under an authorization by public deed, a situation similar to other municipalities in that region and in the Ribeira valley, where the Company started to operate after the merger of companies composing it. As of June 30, 2013 the carrying amount of the municipality of Santos’ intangible assets was R\$333,513 (R\$328,693 in December 2012) and gross revenue for the six-month period ended June 30, 2013 was R\$124,077 (R\$108,578 in June 2012).

Article 58 of Law 11,445/07 determines that precarious and overdue concessions, as well as those effective for an undetermined period of time, including those that do not have an instrument formalizing them, will be valid until December 31, 2010. However, Article 2 of Law 12,693 of July 24, 2012 allows program agreements to be executed until December 31, 2016.

The Company’s Management understands that the concession agreements not yet renewed are valid and will be governed by Laws 8,987/95 and 11,445/07, including those municipalities served without an agreement.

Public deeds are valid and governed by the Brazilian Civil Code.

The Company's shares have been listed in the *Novo Mercado* (New Market) segment of BM&FBOVESPA (the São Paulo Stock Exchange) since April 2002 and on the New York Stock Exchange (NYSE) as American Depositary Receipts ("ADRs") since May 2002.

Since 2008, the Company has been setting up partnerships with other companies, which resulted in the following companies: Sesamm, Águas de Andradina, Saneaqua Mairinque, Aquapolo Ambiental, Águas de Castilho and Attend Ambiental. Although SABESP has no majority interest in the capital stock of these companies, the shareholders' agreements provide for the power of veto and casting vote in certain issues jointly with associates, indicating the shared control in the management of investees.

Notes to the Financial Statements

2. BASIS OF PREPARATION AND PRESENTATION OF QUARTERLY FINANCIAL INFORMATION

(i) Presentation of Quarterly Financial Information

The quarterly financial information as of June 30, 2013 was prepared based on CPC 21 – Interim Financial Reporting and the international standard IAS 34 – Interim Financial Reporting issued by the International Accounting Standards Board (IASB), applicable to the preparation of the Quarterly Information Form– ITR, which are consistently presented with the standards issued by CVM. Therefore, this ITR considers the Circular Official Letter CVM/SNC/SEP 003 of April 28, 2011 which allows that entities report selected notes to the financial statements, in cases of redundant information already disclosed in the Annual Financial Statements. The quarterly financial information for the period ended June 30, 2013, therefore, does not include all the notes and reporting required by the CPC (“Brazilian Accounting Pronouncements Committee”) for the annual financial statements and, accordingly, must be read together with the financial statements under CPC and IFRS for the year ended December 31, 2012.

2.1 Accounting policies

The accounting policies used in the preparation of the quarterly financial information for the quarter ended June 30, 2013 are consistent with those used to prepare the Annual Financial Statements for the year ended December 31, 2012, except for the effects of new accounting practices adopted as of January 1, 2013, described hereinbelow. These policies are disclosed in Note 3 to the Annual Financial Statements.

As of January 1, 2013, new standards, amendments and interpretations of accounting standards became effective. This quarterly financial information already includes the adoption of these amendments and shows their effects on a retrospective basis.

The adoption of CPCs 19(R2) and 33(R1) for the year ended December 31, 2012 resulted in the following adjustments:

(a) Adoption of CPC 19(R2)

The Company adopted CPC 19(R2). This change altered the method of consolidation: from proportional consolidation to equity method of accounting.

Notes to the Financial Statements

The adoption of CPC 19(R2) resulted in changes in the consolidation of the Company's investments in Sesamm – Serviços de Saneamento de Mogi Mirim S/A, Águas de Andradina S.A., Águas de Castilho, Saneaqua Mairinque S.A., Aquapolo Ambiental S.A. and Attend Ambiental S/A.

(b) Adoption of CPC 33 (R1)

The Company adopted CPC 33(R1). The Company's accounting practice up to December 31, 2012 consisted of recording actuarial gains and losses using the corridor method, in which gains and losses from changes in actuarial assumptions were only recognized in profit or loss as they surpass the corridor value and amortized during the estimated average remaining working life of population with the benefits. Therefore, actuarial gains and losses measured in a certain period were not immediately recognized. With this method, the value recognized in liabilities differs from the estimated present value of obligations through unrecognized actuarial gains and losses.

With the adoption of the new accounting standard, SABESP now recognizes in the statement of financial position the total effect from actuarial losses net of income tax and social contribution, with a corresponding entry to the statement of other comprehensive income, not being recorded in income statement. Such accounting method was applied in the quarterly financial information for 2013, with a retrospective effect in the Company's financial statements for the year ended December 31, 2012 and the opening balance as of January 1, 2012.

Deferred income tax and social contribution were recorded only for the G1 plan, because G0 plan expenses are deemed undeductible.

Below, the reconciliation of the new asset and liability balances of the actuarial obligations for the year ended December 31, 2012 and the opening balance of January 1, 2012, affected by the change in the

The adoption of CPC 33 (R1) did not result in adjustments to the statements of income and cash flows presented in this quarterly financial information.

3. FINANCIAL RISK MANAGEMENT**3.1 Financial risk factors**

The Company's activities are affected by the Brazilian economic scenario, making it exposed to market risks, such as exchange rate, interest rate, credit risk and liquidity risk. The Company's financial risk management is focused on the unpredictability of financial markets and seeks to minimize the potential for adverse effects on the Company's financial performance.

The Company has not utilized derivative instruments in any of the reported periods.

(a) Market risk

Foreign exchange risk

SABESP's foreign exchange exposure implies market risks associated with Brazilian Real currency fluctuations against the US dollar and Yen. SABESP's foreign currency-denominated liabilities include US dollar and Yen-denominated loans.

In case of Brazilian Real depreciation in relation to foreign currency in which the debt is denominated, SABESP will incur in monetary loss in relation to such debt.

(CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE)

ITR — Quarterly Information Form — June 30, 2013 — CIA SANEAMENTO BÁSICO ESTADO SÃO PAULO **Version: 1**

Notes to the Financial Statements

SABESP's specific foreign exchange risks are related to exposures caused by its current and non-current debts denominated in foreign currency.

The management of SABESP's foreign exchange exposure considers several current and projected economic factors, besides market conditions.

This risk arises from the possibility that the Company may incur losses due to exchange rate fluctuations that would impact liability balances of foreign currency-denominated loans and financing raised in the market and related financial expenses. The Company does not maintain hedge or swap contracts or any derivative financial instrument to protect against this risk, but conducts an active management of debt, taking advantage of opportunities to change expensive debts with "cheaper" debts, reducing the cost through early maturity.

A significant amount of the Company's financial debt is denominated in U.S. dollar and Yen, in the total amount of R\$3,489,462 on June 30, 2013 (R\$3,231,183 in December 2012). Below, the Company's exposure to foreign exchange risk:

	December 31, 2012			
	June 30, 2013		(Restated)	
	Foreign currency	R\$	Foreign currency	R\$
Loans and financing – US\$	1,137,557	2,520,371	1,136,274	2,321,976
Loans and financing – Yen	42,534,714	949,800	37,535,650	890,346
Interest and charges from loans and financing – US\$		13,366		12,487
Interest and charges from loans and financing – Yen		5,925		6,374
Total exposure		3,489,462		3,231,183

Financing cost	(16,304)	(15,422)
Total loans in foreign currency	3,473,158	3,215,761

As at June 30, 2013, if the Brazilian Real had depreciated or appreciated by 10% against the US dollar and Yen with all other variables held constant, effects on results before taxes on June 30, 2013 would have been R\$348,946 (R\$323,118 in the year ended December 31, 2012) lower or higher, mainly as a result of foreign exchange losses or gains on the translation of foreign currency-denominated loans.

Scenario I below presents the effect in the income statements for the next 12 months, considering the projected rates of the U.S. dollar and the Yen. Considering the other variables as remaining constant, the impacts for the next 12 months are shown in scenarios II and III with possible depreciation of 25% and 50%, respectively, in the Brazilian Real.

(iii) TJLP - (*Taxa de Juros a Longo Prazo*), a long-term interest rate index

(iv) IPCA - (*Índice Nacional de Preços ao Consumidor Amplo*), a consumer price index

(v) LIBOR - London Interbank Offered Rate

Another risk to which the Company is exposed, is the mismatch of the monetary restatement indices of its debts with those of its service revenues. Water supply and sewage services tariff adjustments do not necessarily follow the increases in adjustment indexes for loans, financing and interest rates affecting the Company's debt.

As at June 30, 2013, if interest rates on loans denominated in Brazilian *reais* had been 100 basis points higher or lower with all other variables held constant, the effects on profit for the six-month period ended June 30, 2013 before taxes would have been R\$65,787 (R\$67,015 for the year ended December 31, 2012) lower or higher, mainly as a result of a lower or higher interest expense on floating rate loans.

(b) Credit risk

The credit risk arises from cash and cash equivalents, deposits in banks and financial institutions, as well as credit exposures to customers, including outstanding accounts receivable, restricted cash, accounts receivable from related parties and indemnities. The Company is required by law to invest its funds with Banco do Brasil. Credit risk exposure is mitigated by sales to a dispersed customer base.

The maximum exposure to credit risk at the reporting date is the carrying amount of instruments classified as cash equivalents, deposits in banks and financial institutions, restricted cash, trade accounts receivable and accounts receivable from related parties. (See notes 5, 6, 7 and 8).

Notes to the Financial Statements

Regarding the financial assets held with financial institutions, the credit quality that is not past due or subject to provision for impairment can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates. The credit quality of counterparties which are banks, such as deposits and financial investments, the Company considers the lower rating of the counterparty published by three main international rating agencies (Moody's, Fitch and S&P), according to the internal market risk management policy:

	June 30, 2013	December 31, 2012 (Restated)
Cash at bank and short-term bank deposits		
AAA(bra)	1,667,416	1,913,893
Others (*)	1,671	2,081
	1,669,087	1,915,974

(*)This category includes current accounts and investment funds in banks which have no credit rating information available.

The available credit rating information of the banks in which the Company made transactions during the period is as follows:

<u>Counterparty</u>	<u>Fitch</u>	<u>Moody's</u>	<u>Standard Poor's</u>
Banco do Brasil S.A.	AAA (bra)	Aaa.br	brAAA

Banco Santander Brasil S.A.	AAA (bra)	Aaa.br	brAAA
Federal Savings Bank	AAA (bra)	Aaa.br	-
Banco Bradesco S.A.	AAA (bra)	Aaa.br	brAAA
Itaú Unibanco Holding S.A.	AAA (bra)	Aaa.br	brAAA

For financial assets corresponding to trade accounts receivable, the Company's credit risk is minimized, since the customer base is diversified.

(c) Liquidity risk

The Company's liquidity is primarily reliant upon cash provided by operating activities, loans from Brazilian Federal and State governmental financial institutions, and financing in the domestic and international capital markets. The liquidity risk management considers the assessment of its liquidity requirements to ensure it has sufficient cash to meet its investment and capital expenditures needs, as well as the payment of debts.

The funds held by the Company are invested in interest-bearing current accounts, time deposits, short-term deposits and securities, selecting instruments with appropriate maturity or liquidity sufficient to provide margin as determined by projections mentioned above.

Notes to the Financial Statements**3.2 Capital management**

The Company's objectives when managing capital are ensure its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders, and to maintain an optimal capital structure to reduce the cost of capital.

The Company monitors capital based on the financial leverage ratios. This ratio corresponds to net debt divided by total capital. Net debt corresponds to total loans and financing less cash and cash equivalents. Total capital is calculated as total equity as shown in the statement of financial position plus net debt.

	June 30, 2013	December 31, 2012 (Restated)
Total loans and financing	9,026,478	8,875,255

On June 30, 2013, the leverage ratio did not change over December 31, 2012.

3.3 Fair value estimates

We assume that balances of trade accounts receivable (current) and trade accounts payable by carrying amount approximate their fair values, considering the short maturity. Long-term trade accounts receivable also approximate their fair values, as they will be adjusted by inflation and/or will bear contractual interest rates over time.

3.4 Financial instruments

On June 30, 2013 and December 31, 2012, the Company did not have financial assets classified in categories of fair value through profit or loss, held to maturity and held for sale. The Company's financial instruments included in the loans and receivables category comprise cash and cash equivalents, receivables from customers, receivables from related parties, other accounts receivable, receivables from Water National Agency - ANA, contractors and suppliers, loans and financing, interest on equity payable, accounts payable from public-private partnership - PPP and program contract commitments, which are non-derivative financial assets and liabilities with fixed or determinable payments, not quoted in an active market.

The estimated fair values of financial instruments are as follows:

To obtain fair value of loans and financing, the following criteria have been adopted:

(i) Agreements with Banco do Brasil and CEF (Brazilian Federal Savings Bank) were projected until final maturity, at contractual rates (projected TR + spread) and discounted at present value by TR x DI, both rates were obtained from BM&F.

(ii) Debentures were projected until the final maturity date according to contractual rates (IPCA, DI, TJLP or TR), and discounted at present value considering the future interest rate published by ANBIMA in the secondary market, or equivalent market rates, or the Company securities traded in the Brazilian market.

(iii) BNDES (Brazilian Development Bank) loans are financial instruments measured by face value and restated until maturity date and are indexed by long term interest rate – TJLP.

These loans have specific characteristics and the conditions defined in the loan agreements with BNDES between independent parties, and reflect the conditions for those types of loan. In Brazil, a consolidated market of long-term debts does not exist with the same characteristics of BNDES loans, the offering of credit to the entities in general, with this long-term characteristic, usually is restricted to BNDES.

(iv) Other financing in local currency are considered by carrying amount till mature date, discounted to present value at futures interest rate published by BM&FBovespa.

(v) Agreements with IDB, IBRD, were projected until final maturity in origin currency, applying interest rates contracted, discounted at present value at Libor futures rate, obtained from Bloomberg. Eurobonds were priced at market value through quotes published by Bloomberg. All the amounts obtained were translated into Brazilian *reais* at the exchange rate as of June 30, 2013.

Notes to the Financial Statements

(vi) Agreements with JICA, were projected until final maturity in origin currency, using interest rates contracted and discounted at present value, at Tibor futures rate obtained from Bloomberg. The amounts obtained were translated into Brazilian reais at the exchange rate as of June 30, 2013.

(vii) Leasing is an instrument measured by face value restated until maturity date, whose characteristic is the indexation by fixed contractual rate, which is a specific type, not compared to any other market rate. Thus, the Company discloses as market capitalization, the amount recorded on June 30, 2013.

Considering the nature of the Company's other financial instruments, assets and liabilities, the balances recognized in the statements of financial position are close to the fair values, taking into consideration the maturity terms close to the reporting date, a comparison between contractual interest rate and market interest in similar operations at the end of the reporting period, and its nature and maturity terms.

4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGMENTS

(c) Agreements for the use of reservoirs

EMAE – Empresa Metropolitana de Águas e Energia S.A. claims the credit and financial compensation for the use of water from Guarapiranga and Billings reservoirs, used by SABESP in its operations, as well as the reimbursement of damages related to the failure to pay appropriately.

The Company understands that no amounts are due for the use of these reservoirs, but already participates in its maintenance costs. Should these reservoirs not be available for use to the Company, maybe it would be necessary to collect water in more distant places, having the risk of being unfeasible to properly rendering services in the region, besides increasing borrowing cost.

Three proceedings were filed by EMAE, two of them are writs of prevention to toll statute of limitation and another one to file arbitration commitment, by force of an arbitration clause in the agreement entered into between the São Paulo State Government and former Light, in 1958.

The plaintiff understands that diverging opinions between Light and SABESP should be resolved at the Court of Arbitration, which was disputed by SABESP, which in turn claims it is not bound to an agreement in which it is not party.

In February 2013, the arbitration commitment was established, decision of which was challenged by appeal which is pending judgment.

As such appeal has no suspensive effect, EMAE filed a request for arbitration proceeding with Amcham Arbitration Center. In July, SABESP through an interlocutory appeal, obtained suspension of decision which sentenced the filing of arbitration proceeding until the judgment on the pending appeal.

The Arbitration Panel took cognizance of the decision and suspended the proceeding.

SABESP will adopt the legal means with the courts of appeals and arbitration to defend its thesis.

The Company deems this case as possible loss. The amount involved could not be calculated due to the fact that the request had not been defined, which is for now indeterminate.

(d) agreements with reduced tariffs with State and Municipal Government Entities which adhered to the Water Rational Use Program (PURA)

The Company has signed agreements with government entities related to the State Government and municipalities where it operates that benefit from a reduction of 25% in the tariff of water supply and sewage services when they are in performance. These agreements provide for the implementation of the rational water use program, which takes into consideration the reduction in water consumption.

Notes to the Financial Statements

(i) Customer claims

Approximately 1,520 lawsuits were filed by commercial customers, which claim that their tariffs should correspond to other consumer categories, and 700 lawsuits which claim a reduction in the sewage tariff due to losses in the system, consequently requesting the refund of amounts charged by the Company. The Company was granted both favorable and unfavorable final decisions at several court levels and recognized provisions when the chances of losses are probable. The R\$10,117 increase in the lawsuits classified as probable loss (net of escrow deposits) relates to the filling of new lawsuits and interest, fees and inflation adjustments on amounts involving lawsuits in progress, partially offset by payments made in the year and revisions of expectations caused by favorable decisions to the Company in 2013.

(ii) Supplier claims

Suppliers' claims include lawsuits filed by some suppliers alleging underpayment of inflation adjustment, withholding of amounts related to the understated inflation rates deriving from the Brazilian Real economic plan, and the economic and financial imbalance of the agreements. These lawsuits are in progress at different courts and a provision is recognized when the chances of losses are probable. The R\$7,174 increase in the lawsuits classified as probable loss (net of escrow deposits) mainly relates to interest rates, fees, and adjustments of amounts involving lawsuits in progress.

(iii) Other civil claims

These refer mainly to indemnities for property damage, pain and suffering, and loss of profits allegedly caused to third parties, filed at different court levels, duly accrued when classified as probable losses. The

R\$24,304 decrease, for lawsuits with probable chances of loss (net of escrow deposits), was mainly due to the dismissal of several lawsuits and expectation reviews caused by favorable decisions to the Company, during 2013.

(iv) Tax claims

Tax contingencies refers mainly to issues related to tax collections challenged due to differences in the interpretation of legislation by the Company's Management, accrued when classified as probable loss. The R\$5,011 decrease, for lawsuits with probable chances of loss (net of escrow deposits), was mainly due to favorable decisions to the Company.

(v) Labor claims

The Company is a party to several labor lawsuits, involving issues such as overtime, shift schedule, health hazard premium and hazardous duty premium, prior notice, job deviation, salary parity, and others. Part of the amount involved is in provisional or final execution at various court levels, and thus is classified as probable loss and accordingly, accrued. The R\$14,853 decrease in lawsuits with probable chances of loss (net of escrow deposits) mainly refers to payments made in the year, partially offset by the addition in the estimates and adjustments of amounts involving lawsuits in progress.

The amounts accrued represent the best estimate of the Company at this moment, however, may differ from the amount to be disbursed as indemnity to alleged damages, in view of the current stage of referred proceedings. The R\$48,340 increase in the lawsuits with probable chances of loss (net of escrow deposits) mainly refers to the addition in the estimates of lawsuits and agreements in progress.

Introduction

We have reviewed the accompanying interim financial information of Companhia de Saneamento Básico do Estado de São Paulo - SABESP (the “Company”) included in the Interim Financial Information Form (ITR), for the quarter ended June 30, 2013, which comprises the balance sheet as of June 30, 2013 and the related statements of income and other comprehensive income for the three and six-months period then ended and changes in equity and of cash flows for the six-month period then ended, including the explanatory notes.

The Company’s Management is responsible for the preparation of the interim financial information in accordance with technical pronouncement CPC 21 (R1) - Interim Financial Information and with international standard IAS 34 - Interim Financial Reporting, issued by the International Accounting Standards Board - IASB, as well as for the presentation of such information in accordance with the standards issued by the Brazilian Securities and Exchange Commission (CVM), applicable to the preparation of Interim Financial Information (ITR). Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of review

We conducted our review in accordance with Brazilian and international standards on review of interim financial information (NBC TR 2410 and ISRE 2410 - Review of Interim Financial Information Performed by the Independent Auditor of the Entity, respectively). A review of interim financial information consists of making inquiries, primarily

of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with standards on auditing and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion on the interim financial information

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1) and international standard IAS 34, applicable to the preparation of Interim Financial Information (ITR), and presented in accordance with the standards issued by the CVM.
