- The **prepaid customer base** contracted 16.3% in 3Q16 over 3Q15, due to the continuous adoption of a restrictive policy for the disconnection of inactive clients within the limits established by Anatel, mainly during the 4Q15, underlying the Company's focus on rationality and profitability.
- The access base continued to expand in the **machine-to-machine (M2M)** market, reaching 4.8 million customers in September, 16.2% up on 3Q15. On the other hand, the dongle market continued to shrink, with the disconnection of 717 thousand clients, 22.9% down on 3Q15.
- **Total ARPU** moved up by 14.9% y-o-y, fueled by the performance of **data ARPU**, which strongly increased in 3Q16 over 3Q15 (+35.0%). Excluding MTR reductions in the period, total ARPU posted annual growth of 17.2%.

**Note:** From this quarter on, for a better understanding of the business and to better reflect the results of our digital initiatives, all revenues coming from digital services and VAS were allocated within the same line. To this purpose and, for comparative reasons, there has been some reallocation in historical information. Please refer to our website ([www.telefonica.com.br/ir](http://www.telefonica.com.br/ir)) for the complete historical information on years 2015 and 2016.

Net mobile revenue rose 2.7% in 3Q16 over 3Q15, thanks to the higher mobile service revenue, up 4.9% y-o-y, influenced by the higher data and digital services revenue, partially offset by the lower revenue from the sale of handsets (-27.2% y-o-y) and voice, the latter affected by the effect from MRT reductions in February 2016. Excluding the regulatory effect, third-quarter mobile services revenue would have increased by 7.0% y-o-y.

**Outgoing voice** revenue reduced by 9.5% over 3Q15, reflecting the growing replacement by mobile internet, which more than offsets this reduction. The prepaid was also impacted by the volume of recharges in the period, which fell 8.2% y-o-y, influenced by macroeconomic conditions, although this line already shows a recovery trend. In 3Q16 over 2Q16, recharges grew 1.8%.

**Interconnection** revenue contracted by 31.0% y-o-y in 3Q16, mainly due to the MTR tariff reduction in February 2016 (-33.8%). With the normalization of this effect, interconnection revenue fell 0.7% in 3Q16.

**Data and digital services** revenue increased 23.3% y-o-y and continued to be the main source of the Company's revenue growth, due to the strategy focused on data. The factors contributing to this growth were the upselling of data bundles, both in postpaid and prepaid offers, and the higher penetration of smartphones and webphones in our customer base. In 3Q16, data and digital services revenue already represented 58.9% of net mobile services revenue, up by 8.8 p.p. y-o-y.

**SMS** revenue declined by 10.6% over 3Q15, due to the reduction in promotional SMS volume.

**Mobile internet** revenue moved up by 36.4% y-o-y, also increasing over the previous quarter, and accounted for 73.9% of data revenue in 3Q16. This performance is directly linked to the growth in postpaid data accesses, especially in 4G plans, the increased sale of stand-alone data packages and the growth of the smartphone customer base. At the close of 3Q16, 77.6% of our customer base already had smartphones or webphones, equivalent to a 4.7 p.p. increase over 3Q15.

**Digital services** revenue moved up by 2.8% in 3Q16 over 3Q15, due to the higher use of digital services. Applications such as Vivo Música and Nuvem do Jornaleiro, and services of educational platforms, such as Kantoo, and safety platforms, such as Vivo Sync and Vivo Segurança online, continue registering positive performance. In addition, the strong performance of Vivo Ads reflects the Company's strategy to encourage consumption of premium VAS.

**Other services** revenue totaled R\$1.1 million, 97.1% down on 3Q15, influenced by the recovery of taxes on disputed invoices in 3Q15.

**Mobile handset revenue** fell 27.2% y-o-y, due to the sales strategy focused on higher-value customers, particularly in the corporate business.

- The **fixed base** totaled 23,707 thousand accesses in 3Q16, 2.3% down on 3Q15, mainly influenced by the performance of voice and Pay TV accesses.
- **Fixed voice accesses** totaled 14,634 thousand in 3Q16, 4.0% down over 3Q15, mainly reflecting the substitution of voice by data. Voice ARPU moved down by 4.3% y-o-y, due to the negative impact of VC reductions and the fixed-to-mobile substitution.
- **Fixed broadband accesses** registered 7.3 million customers in 3Q16, 1.8% up on 3Q15. The FTTx client base grew 8.6% y-o-y, already totaling 4,117 thousand accesses, 719 thousand of which in FTTH technology, 33.6% up y-o-y. The penetration of the UBB customer base reached 56.3% of total broadband accesses, 8.6% higher than in 3Q15, fueling the ARPU, which increased by 7.8% y-o-y in 3Q16.
- **Pay TV accesses** declined by 3.7% y-o-y, closing the third quarter with 1,762 thousand subscribers and a market share of 9.3% in August. IPTV accesses grew 38.5% in 3Q16 over 3Q15, while TV ARPU increased 12.4%, reflecting the Company's strategy of focusing on higher-value clients.

**Note:** Fixed Net Revenue includes revenue from the FWT solution (“Vivo Fixo”). Broadband revenue includes residential clients and SME.

Net revenue from the fixed business fell 1.4% in 3Q16 over 3Q15, impacted by fixed to mobile tariff (VC) reductions and the reduction in fixed interconnection (TU-RL and TU-RIU), both in February 2016, partially offset by the increase in broadband, corporate data and IT and Pay TV revenues. Excluding the negative effect from tariff reductions, the variation in net fixed services revenue was 1.2%.

**Voice** revenue fell 7.9% in 3Q16 over 3Q15, chiefly influenced by the lower B2B traffic. Excluding VC reductions (-20.6%), voice revenue fell 4.8% y-o-y.

**Interconnection** revenue moved down by 51.2% over 3Q15, due to the reduction in TU-RL (-65.9%) and TU-RIU (-21.3%) in February 2016. Excluding this effect, interconnection revenue reduced 8.3%.

**Broadband** revenue moved up by 10.0% y-o-y, fueled by the growth in the ultra-broadband revenue, which accounted for approximately 60% of broadband revenues in the period and increased by 19.3% y-o-y, reflecting the Company’s efforts to increase the base and the migration of clients to higher speeds, expanding fiber accesses, whose ARPU is higher.

**Corporate data and IT** revenue increased 12.0% over 3Q15, due to larger revenues coming from new contracts in wholesale and corporate.

**Pay TV** revenue grew 9.3% in 3Q16 over 3Q15. The Company continued with its selective strategy for this service, focusing on higher-value products, such as IPTV, in order to improve customer experience and boost the profitability of the

subscriber base.

**Other services** revenue fell 19.7% y-o-y, mainly influenced by the reduced sale of equipment to large corporate clients.

The Company's operating costs excluding depreciation and amortization expenses totaled R\$7,283.1 million in 3Q16, 2.2% down on 3Q15. Excluding the non-recurring effect from the corporate restructuring in 3Q15 (R\$19.2 million), costs fell 1.9% y-o-y, in a period when inflation was 8.5% (IPCA). Recurring operating costs remained virtually stable over the previous quarter (+1.0%), already excluding the effect from the provision for the corporate restructuring in 2Q16.

**Personnel costs** increased 5.5% compared to the previous year, mainly due to the insourcing of field and call center employees, in addition to the effect from the collective bargaining agreement. This insourcing was aimed at improving the experience of higher-value customers and increasing productivity, while reducing costs with third-party services. Excluding the R\$19.2 million in non-recurring costs related to the corporate restructuring in 3Q15, personnel costs grew 7.9%, still below the period's inflation.

The **cost of services rendered** remained virtually stable in 3Q16 (+0.4% y-o-y), positively influenced by MTR and TU-RL/TU-RIU reductions in February 2016. Excluding this effect, the y-o-y increase was 6.1%. This variation is mainly explained by the increased expenditures related to network expansion, partially offset by the lower expenses with electricity and the insourcing of field employees.

**Cost of goods sold (COGS)** reduced 25.5% in 3Q16 over 3Q15, reflecting the Company's focus on higher-value clients and profitability.

**Selling expenses** fell 2.2% y-o-y in the third quarter, due to the Company's commercial rationality, the capture of synergies and the gradual improvement in macroeconomic conditions.

**Provisions for bad debt** closed 3Q16 at R\$342.6 million, 1.9% down on 3Q15, reflecting the effectiveness of collection initiatives, the efficiency in identifying client's risk profile and the strict credit granting criteria adopted by the Company. In the third quarter, default accounted for 3.2% of net operating revenue, 0.1 p.p. down y-o-y. In comparison with the previous quarter, provisions for bad debt moved up by 8.1%, essentially due to the higher default in B2B.

**Third-party services** posted y-o-y reduction of 1.7% in 3Q16, influenced by lower costs with commissions and sales promoters in retail stores as of 2Q16 and by lower expenses with publicity and marketing, thanks to the synergies generated with the unification of the brands as of April 2016, eliminating communication redundancies due to the reduction in the number of advertising agencies and the renegotiation of contracts. In addition, costs with call center services declined due to lower volume of calls to call center driven by digitalization, simplification of offers and improved customer experience.

Third-quarter **general and administrative expenses** increased by 10.7% y-o-y, chiefly influenced by the higher expenses with IT development and integration, as part of the incorporation process of GVT.

**Other net operating revenues (expenses)** totaled an expense of R\$149.3 million in 3Q16, 18.4% down on 3Q15, mainly as a result of lower civil contingencies in the period.

## Ebitda

**EBITDA** (earnings before interest, taxes, depreciation and amortization) totaled R\$3,410.3 million in 3Q16, 8.8% up on 3Q15. Excluding expenses of R\$19.2 million related to the corporate restructuring in 3Q15, growth came to 8.1% y-o-y, mainly due to the cost efficiency measures adopted by the Company and the capture of synergies from the acquisition of GVT.

The **EBITDA margin** reached 31.9%, with a y-o-y increase of 2.3 p.p. Comparing with the 3Q15 **recurring EBITDA margin**, the increase came to 2.1 p.p., reflecting the Company's focus on profitability.

(\*) Amortization of intangible assets generated by the incorporation of Vivo as of 2Q11 and of GVT as of 2Q15.

The **Depreciation and Amortization** line expanded 8.5% y-o-y, particularly justified by the increase in fixed assets, reflecting the higher investments made by the Company in recent years, in addition to amortizations of software and spectrum licenses.

**Net financial expenses** increased by 14.6% (R\$37.8 million) in 3Q16 over 3Q15, influenced by the higher expense with the monetary indexation of contingencies.

In 9M16, net financial expenses grew 1.2% y-o-y (R\$10.8 million), particularly due to the higher expense with the monetary indexation of contingencies, partially offset by the higher financial losses in 3Q15 related to the foreign exchange variation on GVT's loans and financing denominated in foreign currency, whose result was negatively impacted by the appreciation of the Euro against the Real.

## Net Income

**Net income** totaled R\$952.7 million in 3Q16, 9.6% up on 3Q15, particularly influenced by the improved operating result in 3Q16.

In the first nine months of 2016, net income amounted to R\$2,870.4 million, 29.5% up on 9M15, driven by the stronger EBITDA and non-recurrent sale of towers in 1Q16.

Capex ex. licenses / Net operating revenue	18.2%	20.1%	16.8%	16.4%	19.0%

Third-quarter **capex** amounted to R\$2,126.4 million. Excluding the amount related to the 2.5GHz licenses acquired in the auction of radiofrequency leftovers held by Anatel on December 17, 2015 totaling R\$185.5 million, third-quarter capex reached R\$1,941.0 million (-8.6% y-o-y), accounting for 18.2% of net operating revenue. In 2016, the Company invested 16.4% of revenues, reflecting the successful implementation of efficiency initiatives and the capture of synergies, while we expect acceleration in capex execution in 4Q16.

The majority of investments went to the expansion of network capacity and 4G coverage as well as the increase in FTTX penetration.
