ASCENT SOLAR TECHNOLOGIES, INC.

(A Development Stage Company)

NOTES TO CONDENSED FINANCIAL STATEMENTS

(Unaudited)

NOTE 1. ORGANIZATION

Ascent Solar Technologies, Inc. ("Ascent" or "the Company") was incorporated on October 18, 2005 from the separation by ITN Energy Systems, Inc. ("ITN") of its Advanced Photovoltaic Division and all of that division's key personnel and core technologies. ITN, a private company incorporated in 1994, is an incubator dedicated to the development of thin-film, photovoltaic ("PV"), battery, fuel cell and nano technologies. Through its work on research and development contracts for private and governmental entities, ITN developed proprietary processing and manufacturing know-how applicable to PV products generally, and to Copper-Indium-Gallium-diSelenide ("CIGS") PV products in particular. ITN formed Ascent to commercialize its investment in CIGS PV technologies. In January 2006, in exchange for 1,028,000 shares of common stock of Ascent, ITN assigned to Ascent certain CIGS PV technologies and trade secrets and granted to Ascent a perpetual, exclusive, royalty-free worldwide license to use, in connection with the manufacture, development, marketing and commercialization of CIGS PV to produce solar power, certain of ITN's existing and future proprietary and control technologies that, although non-specific to CIGS PV, Ascent believes will be useful in its production of PV modules for its target markets. Upon receipt of the necessary government approvals and pursuant to novation in early 2007, ITN assigned government-funded research and development contracts to Ascent and also transferred the key personnel working on the contracts to Ascent.

NOTE 2. BASIS OF PRESENTATION

The Company's activities to date have consisted substantially of raising capital, research and development, establishment and development of the Company's production plant and product development. Revenues to date have been primarily generated from the Company's governmental research and development contracts and have not been significant. The Company's planned principal operations to commercialize flexible photovoltaic ("PV") modules and PV integrated consumer electronics have commenced, but have generated limited revenue to date. Accordingly, the Company is considered to be in the development stage and has provided additional disclosure of inception to date activity in the Condensed Statements of Operations and Comprehensive Income (Loss) and Condensed Statements of Cash Flows.

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP) for interim financial information and in accordance with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, these interim financial statements do not include all of the information and footnotes typically found in U.S. GAAP audited annual financial statements. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair statement have been included. The Condensed Balance Sheet at December 31, 2012 has been derived from the audited financial statements as of that date but does not include all of the information and footnotes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. These condensed financial statements and notes should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Operating results for the three months ended March 31, 2013 are not necessarily indicative of the results that may be expected for the year ending December 31, 2013.

NOTE 3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company's significant accounting policies were described in Note 3 to the audited financial statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. There have been no significant

changes to these policies and no recent accounting pronouncements or changes in accounting pronouncements during the three months ended March 31, 2013 that are of significance or potential significance to the Company.

NOTE 4. LIQUIDITY AND CONTINUED OPERATIONS

As of March 31, 2013, the Company had \$6.9 million in cash and working capital of \$7.8 million. As discussed in Note 2, the Company is in the development stage and is currently incurring significant losses from operations as it works toward commercialization. The Company made cash payments of \$0.4 million in the three months ended March 31, 2013 for property, plant and equipment.

Table of Contents

The Company has commenced production at its manufacturing facility. The Company does not expect that sales revenue and cash flows will be sufficient to support operations and cash requirements until it has fully implemented its new consumer products strategy. Changes in the level of expected operating losses, the timing of planned capital expenditures or other factors may negatively impact cash flows and reduce current cash and investments faster than anticipated. During the first quarter of 2013 the Company used \$5.1 million in cash for operations, as compared to the prior quarter when \$4.8 million was used for operations. Absent any adjustments to expenses or significant additional financing, and without considering capital expenditures or significant increases in product sales at a positive margin, the Company's cash could be depleted during the third quarter 2013. In 2013 the Company expects to incur a base level of maintenance capital expenditures and relatively minor improvements to the existing asset base. The Company's primary significant long term obligation consists of a note payable of \$6.6 million to a financial institution secured by a mortgage on its headquarters and manufacturing building in Thornton, Colorado. Total payments of \$0.5 million, including principal and interest, will come due during the remainder of 2013. Additional projected product revenues are not anticipated to result in a positive cash flow position for the year 2013 overall. As such, cash liquidity sufficient for the year ending December 31, 2013 will require additional financing, or a significant decrease in the operating expenditures, or some combination thereof. The Company continues to accelerate sales and marketing efforts related to its consumer products strategy through increased hiring. The Company has begun activities related to securing additional financing through strategic or financial investors, but there is no assurance that the Company will be able to raise additional capital on acceptable terms or at all. If the Company's revenues do not increase rapidly, and/or additional financing is not obtained, the Company will be required to significantly curtail operations to reduce costs and/or sell assets. Such actions would likely have an adverse impact on the Company's future operations. On April 11, 2012, the Company received notice from The NASDAQ Stock Market ("Nasdaq") stating that because the Company had not regained compliance with the \$1.00 minimum bid price requirement for continued listing, the Company's common stock (listed on The Nasdaq Global Market) would be subject to delisting. On August 17, 2012, the Company received notification from The Nasdaq Listing Qualifications department that the Company had regained compliance with the minimum bid price requirement, and that the Company's noncompliance had been rectified. On December 5, 2012, the Company received notice from Nasdaq stating that it had again fallen out of compliance with the \$1.00 minimum bid price requirement for continued listing. This notice has no immediate effect on the listing of the Company's common stock on the Nasdaq Global Market. The Company has been provided an initial compliance period of 180 calendar days, or until June 3, 2013, for its closing bid price to meet or exceed \$1.00 per share for a minimum of 10 consecutive business days. The Company recently filed its Proxy Statement for the 2013 Annual Meeting, which included a proposal that would, if approved by the shareholders, authorize the Board to effect a reverse stock split of the Company's issued and outstanding common stock. The Board's implementation of a reverse stock could result in compliance with the \$1.00 minimum bid requirement, but may have other negative implications. There can be no assurance that the Company's plans to exercise diligent efforts to maintain the listing of its common stock on the Nasdaq Global Market will be successful. If not successful, there may be a negative impact on the Company's ability to raise capital through the equity markets.

NOTE 5. PROPERTY, PLANT AND EQUIPMENT

The following table summarizes property, plant and equipment as of March 31, 2013 and December 31, 2012:

	As of March 31, 2013	As of December 31, 2012
Building	\$5,820,509	\$ 5,820,735
Furniture, fixtures, computer hardware and computer software	435,267	426,517
Manufacturing machinery and equipment	33,009,092	32,847,052
Leasehold improvements	—	884,709
Net depreciable property, plant and equipment	39,264,868	39,979,013
Less: Accumulated depreciation and amortization	(13,374,218)	(12,725,298)
Net property, plant and equipment	\$25,890,650	\$ 27,253,715

The Company analyzes its long-lived assets for impairment, both individually and as a group, whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. During the quarter ended June 30, 2011, an impairment charge in the amount of approximately \$74.5 million was taken against Property, Plant and Equipment. This impairment, combined with a charge of approximately \$3.5 million taken against Deposits on manufacturing equipment, resulted in a total write-down of \$78.0 million in the quarter ended June 30, 2011. This write-down resulted in net assets of approximately \$32.2 million being recorded at fair value as of June 30, 2011. The fair value measurement for these assets relied primarily on Company-specific inputs and the Company's assumptions about the use of the assets, as observable

Table of Contents

inputs were not available. Accordingly, the Company determined that these fair value measurements reside primarily within Level 3 of the fair value hierarchy.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The Company uses fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Depreciation expense for the three months ended March 31, 2013 and 2012 was \$1,533,629 and \$1,441,262, respectively. Depreciation expense is recorded under “Research and development” expense and “Selling, general and administrative” expense in the Condensed Statements of Operations.

The Company incurred and capitalized interest costs related to the manufacturing facility building loan as follows during the three months ended March 31, 2013 and 2012:

	For the three months ended March 31,	
	2013	2012
Interest cost incurred	\$109,732	\$113,847
Interest cost capitalized	—	(46,331)
Interest expense, net	\$109,732	\$67,516

NOTE 6. INVENTORIES

Inventories consisted of the following at March 31, 2013 and December 31, 2012:

	As of March 31, 2013	As of December 31, 2012
Raw materials	\$1,751,613	\$ 1,794,224
Work in process	156,124	172,227
Finished goods	259,527	193,102
Total	\$2,167,264	\$ 2,159,553

NOTE 7. DEBT

On February 8, 2008, the Company acquired a manufacturing and office facility in Thornton, Colorado, for approximately \$5.5 million. The purchase was financed by a promissory note, deed of trust and construction loan agreement (the “Construction Loan”) with the Colorado Housing and Finance Authority (“CHFA”), which provided the Company borrowing availability of up to \$7.5 million for the building and building improvements. In 2009, the Construction Loan was converted to a permanent loan pursuant to a Loan Modification Agreement between the Company and CHFA (the “Permanent Loan”). The Permanent Loan, collateralized by the building, has an interest rate of 6.6% and the principal will be amortized through its term to January 2028. The Company will incur a prepayment penalty if the Permanent Loan is prepaid prior to December 31, 2015. Further, pursuant to certain negative covenants in the Permanent Loan, the Company may not, among other things, without CHFA’s prior written consent (which by the terms of the deed of trust is subject to a reasonableness requirement): create or incur additional indebtedness (other

than obligations created or incurred in the ordinary course of business); merge or consolidate with any other entity; or make loans or advances to the Company's officers, shareholders, directors or employees. The outstanding balance of the Permanent Loan was \$6,550,462 as of March 31, 2013.

Table of Contents

As of March 31, 2013, future principal payments on long-term debt are due as follows:

2013	\$200,327
2014	282,960
2015	302,210
2016	322,771
2017	344,730
Thereafter	5,097,464
	\$6,550,462

NOTE 8. STOCKHOLDERS' EQUITY

At March 31, 2013, the Company's authorized capital stock consisted of 125,000,000 shares of common stock, \$0.0001 par value, and 25,000,000 shares of preferred stock, \$0.0001 par value. Each share of common stock has the right to one vote.

Preferred stock, \$0.0001 par value per share, may be issued in classes or series. Designations, powers, preferences, rights, qualifications, limitations and restrictions are determined by the Company's Board of Directors.

In January 2013, the Company retained a consulting firm to provide certain consulting services relating to the retail distribution of the Company's consumer products. In exchange for the consulting services, the Company issued 240,000 unregistered shares of Common Stock to the consulting firm. Under the terms of the consulting agreement, the Company will hold the shares in escrow until January 2014. With this issuance, half of the shares vested immediately, and the remaining shares are expected to vest in January 2014.

As of March 31, 2013, the Company had 51,523,758 shares of common stock and no shares of preferred stock outstanding. The Company has not declared or paid any dividends through March 31, 2013.

NOTE 9. EQUITY PLANS AND SHARE-BASED COMPENSATION

Share-Based Compensation: The Company measures share-based compensation cost at the grant date based on the fair value of the award and recognizes this cost as an expense over the grant recipients' requisite service periods for all awards made to employees, officers, directors and consultants.

The share-based compensation expense recognized in the Condensed Statements of Operations was as follows:

	For the three months ended March 31,	
	2013	2012
Share-based compensation cost included in:		
Research and development	\$66,256	\$102,165
Selling, general and administrative	108,635	248,177
Total share-based compensation cost	\$174,891	\$350,342

The following table presents share-based compensation expense by type:

	For the three months ended March 31,	
	2013	2012
Type of Award:		
Stock Options	\$104,950	\$190,279
Restricted Stock Units and Awards	69,941	160,063
Total share-based compensation cost	\$174,891	\$350,342

Stock Options: The Company recognized share-based compensation expense for stock options of \$105,000 to officers, directors and employees for the three months ended March 31, 2013 related to stock option awards ultimately expected to vest.

Table of Contents

The weighted average estimated fair value of employee stock options granted for the three months ended March 31, 2013 and 2012 was \$0.48 and \$0.56 per share, respectively. Fair value was calculated using the Black-Scholes Model with the following assumptions:

	For the three months ended March 31,	
	2013	2012
Expected volatility	97%	103%
Risk free interest rate	1%	1%
Expected dividends	—	—
Expected life (in years)	5.2	5.2

Expected volatility is based on the historical volatility of the Company's stock. The risk-free rate of return is based on the yield of U.S. Treasury bonds with a maturity equal to the expected term of the award. Historical data is used to estimate forfeitures within the Company's valuation model. The Company's expected life of stock option awards is derived from historical experience and represents the period of time that awards are expected to be outstanding.

As of March 31, 2013, total compensation cost related to non-vested stock options not yet recognized was \$643,000 which is expected to be recognized over a weighted average period of approximately 2.1 years. As of March 31, 2013, 1,619,713 shares were vested or expected to vest in the future at a weighted average exercise price of \$2.02. As of March 31, 2013, 1,094,300 shares remained available for future grants under the Option Plan.

Restricted Stock: In addition to the stock options discussed above, the Company recognized share-based compensation expense related to restricted stock grants of \$70,000 for the three months ended March 31, 2013. The weighted average estimated fair value of restricted stock grants for the three months ended March 31, 2013 and 2012 was \$0.46 and \$0.56 per share, respectively.

Total unrecognized share-based compensation expense from unvested restricted stock as of March 31, 2013 was \$178,000 which is expected to be recognized over a weighted average period of approximately 0.7 years. As of March 31, 2013, 334,046 shares were expected to vest in the future. As of March 31, 2013, 749,017 shares remained available for future grants under the Restricted Stock Plan.

NOTE 10. RELATED PARTY TRANSACTIONS

TFG Radiant Investment Group Ltd. and its affiliates ("TFG Radiant") owns approximately 31% of the Company's outstanding common stock as of March 31, 2013. In February 2012 the Company announced the appointment of Victor Lee as President and Chief Executive Officer. Mr. Lee had served on the Company's Board of Directors since November 2011 and is currently the managing director of Tertius Financial Group Pte Ltd, the joint venture partner with Radiant Group in TFG Radiant. In April 2012 the Company appointed the Chairman of TFG Radiant, Mr. Winston Xu (aka Xu Biao), as a member of its Board of Directors.

In June 2012, the Company entered into a supply agreement and a contract manufacturing agreement with TFG Radiant. Under the terms of the contract manufacturing agreement, TFG Radiant will oversee certain aspects of the contract manufacturing process related to the Company's EnerPlex™ line of consumer products. The Company will compensate TFG Radiant for acting as general contractor in the contract manufacturing process. Under the supply agreement TFG Radiant intends to distribute the Company's consumer products in Asia. In December 2012, the Company entered into a consulting agreement with TFG Radiant for product design, product development and manufacturing coordinating activities provided by TFG Radiant to the Company in connection with the Company's new line of consumer electronic products. The services agreement has a one year term initially, and the services agreement may be terminated by either party upon 10 days prior written notice.

During the three months ended March 31, 2013, the Company made disbursements to TFG Radiant in the amount of \$517,000, consisting of \$200,000 for consulting fees and \$317,000 for finished goods received and deposits for

work-in process. In the third quarter of 2012, the Company recognized revenue in the amount of \$405,000 for products sold to TFG Radiant under the supply agreement. As of March 31, 2013 and December 31, 2012, the Company held \$508,000 and \$596,000, respectively, in receivables due from and deposits paid to TFG Radiant.

NOTE 11. COMMITMENTS AND CONTINGENCIES

10

Table of Contents

On October 21, 2011, the Company was notified that a complaint claiming \$3,048,701 for an investment banking fee (the “Lawsuit”) was filed by Jefferies & Company, Inc. (“Jefferies”) against the Company in New York State Supreme Court in the County of New York. In December 2010, Ascent and Jefferies entered into an engagement agreement (the “Fee Agreement”) pursuant to which Jefferies was hired to act as the Company's financial advisor in relation to certain potential transactions.

Ascent has paid Jefferies the fees it believes are owed under the Fee Agreement, which are a \$100,000 retainer and approximately \$49,000 of out-of-pocket expenses. The discovery process in the case is underway. Jefferies' motion for summary judgment has been denied. A trial date has not been set. Ascent believes that the Lawsuit is without merit. The Company intends to vigorously defend the Lawsuit.

This proceeding is subject to the uncertainties inherent in any litigation. It is subject to many uncertainties and to outcomes that are not predictable with assurance and that may not be known for an extended period of time. The Company records a liability in its financial statements for costs related to claims, including settlements and judgments, where the Company has assessed that a loss is probable and an amount can be reasonably estimated. It is not possible to predict the outcome for this legal proceeding. If the Lawsuit is determined adversely to the Company, the costs associated with this proceeding could have a material adverse effect on the Company's results of operations, financial position and/or cash flows of a future period.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion of our financial condition and results of operations should be read in conjunction with our unaudited financial statements and the notes to those financial statements appearing elsewhere in this Form 10-Q. This discussion and analysis contains statements of a forward-looking nature relating to future events or our future financial performance. As a result of many factors, our actual results may differ materially from those anticipated in these forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

Overview

We are a development stage company formed to commercialize flexible photovoltaic modules using our proprietary technology. Since our formation in October 2005, the majority of our cash outlays have gone toward the investment in capital equipment necessary to develop our manufacturing capabilities for producing the commercial products we envision and for research and development. For the three months ended March 31, 2013, we generated \$235,000 of revenue. Our product revenue was \$176,000 and our revenue from government research and development contracts was \$59,000. We do not consider this level of sales sufficient for exiting development stage.

Product revenue for the quarter reflects the shift in our sales strategy to focus on 1) geographic expansion 2) specific customer and market segments and 3) our dual offering of EnerPlex™ consumer products as well as off-grid applications employing our technology in a variety of end-use applications. Our geographic expansion includes new distribution and retail relationships in the Americas, Europe and Asia-Pacific Regions. Our results also reflect EnerPlex traction in segments including mobile accessories, consumer electronics and outdoor specialty gear. In our off-grid segment our co-development partners are ordering products for diverse applications in vehicle battery charging, military applications, specialty outdoor gear, transportation and aerospace applications. Our product roadmap includes the release of several complimentary products presented in a wide range of wattages which we expect will accelerate our sales traction in the markets noted above.

Our proprietary manufacturing process deposits multiple layers of materials, including a thin film of highly efficient Copper-Indium-Gallium-diSelenide (“CIGS”) semiconductor material, on a flexible, lightweight, plastic substrate using a roll-to-roll manufacturing process and then laser patterns the layers to create interconnected PV cells, or PV modules, in a process known as monolithic integration. We believe that our technology and manufacturing process, which results in a lighter, flexible module package, provides us with a unique market opportunity relative to both the

crystalline silicon (“c-Si”) based PV manufacturers that currently lead the PV market, as well as other thin film PV manufacturers that use substrate materials such as glass, stainless steel or other metals that can be heavier and more rigid than plastics. Due to the high durability of the monolithic integration employed by our technology, the capability to customize modules into different form factors and the industry leading light weight and flexibility provided by our modules, we believe there are numerous potential applications for our products.

We continue to accelerate our transition to a business model focusing on developing PV integrated consumer electronics. In June 2012, we launched our new line of consumer products under the EnerPlex brand, and introduced our first product, the Surfr™, a solar assisted case and charger for the Apple® iPhone® 4/4S smart phone featuring our ultra-light CIGS thin film

Table of Contents

technology. The charger incorporates our ultra-light and thin PV module into a sleek, protective iPhone 4/4S case, along with a thin battery. The charger adds minimal weight and size to an iPhone smart phone, yet provides supplemental charging when needed. In August we announced the launch of the second version of Surfr, a solar assisted charger for the Samsung® Galaxy S® III, which provides 85% additional battery life.

In December 2012, we launched the EnerPlex Kickr™ and EnerPlex Jumpr™ product series. The EnerPlex Kickr IV is an extremely portable, compact and durable solar charging device, approximately seven inches by seven inches when folded, and weighing only 316 grams, or less than half a pound. The Kickr IV provides 4.5 watt regulated power that can help charge phones, tablets, digital cameras, and other devices. The Kickr IV is ideal for outdoor activities such as camping, hiking and mountain climbing and daily city use. Complementing the Kickr IV is the Jumpr 4400 and the Jumpr 4800, rechargeable, portable battery packs providing from three to five complete charge cycles for a smart phone.

We continue to design and manufacture PV integrated consumer electronics, as well as portable power applications for commercial and military users, and we have adjusted our equipment utilization to meet our near term sales forecast. Products in these consumer oriented markets are priced based on the overall product value proposition as compared with directly competitive products or substitute products rather than on a cost per watt basis, typically used in commodity solar markets.

Our consumer products are available to customers through third party distributors and retailers and through our website at www.EnerPlex.biz, our retail website. In 2013, we plan to continue our expansion of distribution channels in the US and worldwide.

Commercialization and Manufacturing Strategy

We manufacture our products by affixing a thin CIGS layer to a flexible, plastic substrate using a large format, roll-to-roll process that permits us to fabricate our flexible PV modules in an integrated sequential operation. We use proprietary monolithic integration techniques that enable us to form complete PV modules with less or no costly back end assembly of inter cell connections. Traditional PV manufacturers assemble PV modules by bonding or soldering discrete PV cells together. This manufacturing step typically increases manufacturing costs and at times proves detrimental to the overall yield and reliability of the finished product. By reducing or eliminating this added step using our proprietary monolithic integration techniques, we believe that we can achieve cost savings in, and increase the reliability of, our PV modules. All tooling necessary for us to meet our near term production requirements is installed in our Thornton, Colorado plant. In 2012 we accelerated the change in strategy initiated in March 2011 when we revised our strategy to focus on applications for emerging and specialty markets, including off grid, military and defense and consumer oriented products.

On February 1, 2012, we announced the appointment of Victor Lee as President and Chief Executive Officer. Mr. Lee has served on our Board since November 2011. Mr. Lee is the managing director of Tertius Financial Group Pte Ltd, the joint venture partner with Radiant Group in TFG Radiant.

The addition of TFG Radiant as a major shareholder in August 2011 has significantly improved our capabilities on a number of fronts. TFG Radiant's domicile in China provides us access to high quality, low cost contract manufacturing in Asia through expansion of TFG Radiant existing relationships developed through many years of successful operation in China. Integrating these suppliers into our supply chain enables us to bring our products to market faster. TFG Radiant also provides a global product perspective that significantly improves the product design activities of our Thornton, Colorado designers as they collaborate with designers in Asia. We continue to integrate and improve the design-to-manufacture process where we manufacture modules in our US plant, ship them to Asia for completion into finished goods at low cost and then ship products to all markets we will serve. See Related Party Activity below.

We plan to continue the development of our current PV technology to increase module efficiency, improve our manufacturing tooling and process capabilities and reduce manufacturing costs. We also plan to continue to take advantage of research and development contracts to fund a portion of this development.

Related Party Activity

TFG Radiant Investment Group Ltd. and its affiliates ("TFG Radiant") owns approximately 31% of our outstanding common stock as of March 31, 2013. In February 2012, we announced the appointment of Victor Lee as President and

Chief Executive Officer. Mr. Lee had served on our Board of Directors since November 2011 and is currently the managing director of Tertius Financial Group Pte Ltd, the joint venture partner with Radiant Group in TFG Radiant. In April 2012, we appointed the Chairman of TFG Radiant, Mr. Winston Xu (aka Xu Biao), as a member of our Board of Directors.

related to our EnerPlex™ line of consumer products. We will compensate TFG Radiant for acting as general contractor in the contract manufacturing process. Under the supply agreement TFG Radiant intends to distribute our consumer products in Asia. In December 2012, we entered into a consulting agreement with TFG Radiant for product design, product development and manufacturing coordinating activities provided by TFG Radiant to us in connection with our new line of consumer electronic products. The services agreement has a one year term initially, and the services agreement may be terminated by either party upon 10 days prior written notice.

During the three months ended March 31, 2013, we made disbursements to TFG Radiant in the amount of \$517,000, consisting of \$200,000 for consulting fees and \$317,000 for finished goods received and deposits for work-in process. In the third quarter of 2012, we recognized revenue in the amount of \$405,000 for products sold to TFG Radiant under the supply agreement. As of March 31, 2013 and December 31, 2012, we held \$508,000 and \$596,000, respectively, in receivables due from and deposits paid to TFG Radiant.

Significant Trends, Uncertainties and Challenges

We believe that the significant trends, uncertainties and challenges that directly or indirectly affect our financial performance and results of operations include whether:

- we can generate customer acceptance of and demand for our products;
- we successfully ramp up commercial production on the equipment installed;
- our products are successfully and timely certified for use in our target markets;
- we successfully operate production tools to achieve the efficiencies, throughput and yield necessary to reach our cost targets;
- the products we design are saleable at a price sufficient to generate profits;
- our strategic alliance with TFG Radiant results in the design, manufacture and sale of sufficient products to achieve profitability;
- we raise sufficient capital to enable us to reach a level of sales sufficient to achieve profitability, on terms favorable to us;
- we are able to be successful in designing, manufacturing, marketing, distributing and selling our newly introduced line of consumer oriented products;
- we effectively manage the planned ramp up of our operations;
- we are able to maintain the listing of our common stock on the NASDAQ Global Market or Capital Market;
- we are able to achieve projected operational performance and cost metrics;
- we successfully develop and maintain strategic relationships with key partners, including OEMs, system integrators and distributors, who deal directly with end users in our target markets;
- we are able to enter into commercially viable licensing, joint venture, or other commercial arrangements; and
- raw materials are available to us on acceptable terms and in sufficient quantities.

Critical Accounting Policies and Estimates

Critical accounting policies used in reporting our financial results are reviewed by management on a regular basis. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities.

Processes used to develop these estimates are evaluated on an ongoing basis. Estimates are based on historical experience and various other assumptions that are believed to be reasonable for making judgments about the carrying value of assets and liabilities. Actual results may differ as outcomes from assumptions may change.

Our significant accounting policies were described in Note 3 to our audited financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012. There have been no changes to these policies that are of potential significance to us during the three months ended March 31, 2013.

Recent Accounting Pronouncements

Table of Contents

See Note 3, “Summary of Significant Accounting Policies,” in the Notes to Condensed Financial Statements. There are no new accounting pronouncements that are of significance or potential significance to us.

Results of Operations

Comparison of the Three Ended March 31, 2013 and 2012

Our activities to date have substantially consisted of raising capital, business and product development, research and development and the development of our production lines.

Revenues. Our revenues were \$235,000 for the three months ended March 31, 2013 compared to \$442,000 for the three months ended March 31, 2012, a decrease of \$207,000. Revenues for the three months ended March 31, 2013 include \$176,000 of product sales compared to \$10,000 for the three months ended March 31, 2012, an increase of \$165,000. Revenues earned on our government research and development contracts decreased by \$372,000 during the three months ended March 31, 2013, due to the winding down of several government contracts.

Research and development. Research and development costs were \$5,320,000 for the three months ended March 31, 2013 compared to \$4,390,000 for the three months ended March 31, 2012, an increase of \$930,000. Research and development costs include the costs incurred for production activities in our manufacturing facility and facility and equipment infrastructure costs. Research and development costs also include costs related to our governmental contracts. Costs related to production activities increased by \$1,232,000. The production cost increase was comprised of consulting and contract service costs of \$599,000, materials and equipment related costs of \$347,000, personnel related costs of \$333,000 and depreciation and amortization of \$82,000, offset by decreases in facility related costs of \$113,000 and stock option expense of \$24,000. Governmental research and development expenditures decreased by \$302,000 in the three months ended March 31, 2013. This decrease is the result of reductions in consulting and contract service costs of \$228,000, personnel related costs of \$41,000, materials and equipment related costs of \$15,000 and stock option expense of \$12,000.

Selling, general and administrative. Selling, general and administrative expenses were \$1,242,000 for the three months ended March 31, 2013 compared to \$1,494,000 for the three months ended March 31, 2012, a decrease of \$252,000. This decrease is comprised of personnel related costs of \$155,000, stock option expense of \$140,000, facility and IT related costs of \$70,000 and public company related costs of \$57,000, offset by an increase in consulting and contract services of 171,000.

Other Income / (Expense), net. Other Income / (Expense) was \$106,000 net expense for the three months ended March 31, 2013 compared to \$67,000 net expense for the three months ended March 31, 2012, an increase of \$39,000, primarily the result of an increase in interest expense.

Net Loss. Our Net Loss was \$6,434,000 for the three months ended March 31, 2013 compared to a Net Loss of \$5,510,000 for the three months ended March 31, 2012, an increase of \$924,000.

The increase in Net Loss can be summarized in variances in significant account activity as follows:

Table of Contents

	Decrease (increase) to Net Loss For the Three Months Ended March 31, 2013 Compared to the Three Months Ended March 31, 2012
Revenues	
Products	\$ 165,000
Government Contracts	(372,000)
Research and development costs	
Manufacturing research and development	(1,257,000)
Government research and development	291,000
Non-cash stock based compensation	36,000
Selling, general and administrative expenses	
Corporate selling, general and administrative	112,000
Non-cash stock based compensation	140,000
Other Income / (Expense), net	(39,000)
Increase to Net Loss	\$(924,000)

Liquidity and Capital Resources

As of March 31, 2013, we had approximately \$6.9 million in cash and cash equivalents and working capital of \$7.8 million. We are in the development stage and are currently incurring significant losses from operations as we work toward further commercialization.

We have commenced production at our manufacturing facility. We do not expect that sales revenue and cash flows will be sufficient to support operations and cash requirements until we have fully implemented our new consumer products strategy. Changes in the level of expected operating losses, the timing of planned capital expenditures or other factors may negatively impact cash flows and reduce current cash and investments faster than anticipated. During the first quarter of 2013 we used \$5.1 million in cash for operations. Absent any adjustments to expenses or significant additional financing, and without considering capital expenditures or significant increases in product sales at a positive margin, our cash could be depleted during the third quarter 2013. In 2013 we expect to incur a base level of maintenance capital expenditures and relatively minor improvements to the existing asset base. Our primary significant long term obligation consists of a note payable of \$6.6 million to a financial institution secured by a mortgage on our headquarters and manufacturing building in Thornton, Colorado. Total payments of \$0.5 million, including principal and interest, will come due in 2013. Additional projected product revenues are not anticipated to result in a positive cash flow position for the year 2013 overall. As such, cash liquidity sufficient for the year ending December 31, 2013 will require additional financing, or a significant decrease in the operating expenditures, or some combination thereof. We continue to accelerate sales and marketing efforts related to our consumer products strategy through increased hiring. We have begun activities related to securing additional financing through strategic or financial investors, but there is no assurance that we will be able to raise additional capital on acceptable terms or at all. If our revenues do not increase rapidly, and/or additional financing is not obtained, we will be required to significantly curtail operations to reduce costs and/or sell assets. Such actions would likely have an adverse impact on our future operations.

For the three months ended March 31, 2013, our cash used in operations was \$5.1 million compared to \$4.0 million for the three months ended March 31, 2012, an increase of \$1.1 million. The net loss in the first quarter of 2013, net of non-cash items depreciation and amortization and stock based compensation, was \$4.7 million, a slight increase as compared to the figure of \$3.7 million in 2012. Relatively minor differences in balance sheet accounts in 2013 and 2012 account for the remaining increase in cash used of \$0.1 million. In the first quarter of 2013,

expenditures for equipment purchases of \$0.4 million combined with negative operating cash flows of \$5.1 million were funded through the use of cash and cash equivalents held at December 31, 2012.

On April 11, 2012, we received notice from The NASDAQ Stock Market ("Nasdaq") stating that because we had not regained compliance with the \$1.00 minimum bid price requirement for continued listing, our common stock (listed on The Nasdaq Global Market) would be subject to delisting. On August 17, 2012, we received notification from The Nasdaq Listing Qualifications department that we had regained compliance with the minimum bid price requirement, and that our noncompliance had been rectified. On December 5, 2012, we received notice from Nasdaq stating that we had again fallen out of compliance with the \$1.00 minimum bid price requirement for continued listing. This notice has no immediate effect on the listing of our common stock on the Nasdaq Global Market. We have been provided an initial compliance period of 180 calendar days, or until June 3, 2013, for our closing bid price to meet or exceed \$1.00 per share for a minimum of 10 consecutive

Table of Contents

business days. We recently filed our Proxy Statement for our 2013 Annual Meeting, which included a proposal that would, if approved by the shareholders, authorize our Board to effect a reverse stock split of our issued and outstanding common stock. The Board's implementation of a reverse stock could result in compliance with the \$1.00 minimum bid requirement, but may have other negative implications. There can be no assurance that our plans to exercise diligent efforts to maintain the listing of its common stock on the Nasdaq Global Market will be successful. If not successful, there may be a negative impact on our ability to raise capital through the equity markets.

Contractual Obligations

The following table presents our contractual obligations as of March 31, 2013. Our long-term debt obligation is related to our building loan reflecting both principal and interest. Our purchase obligations include orders for equipment, inventory and operating expenses.

Contractual Obligations	Total	Payments Due by Year (in thousands)			
		Less Than 1 Year	1-3 Years	3-5 Years	More Than 5 Years
Long-term debt obligations	\$10,289	\$694	\$2,081	\$2,081	\$5,433
Operating lease obligations	52	52	—	—	—
Purchase obligations	1,232	1,232	—	—	—
Total	\$11,573	\$1,978	\$2,081	\$2,081	\$5,433

Off Balance Sheet Transactions

As of March 31, 2013, we did not have any off balance sheet arrangements as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

Item 3. Quantitative and Qualitative Disclosures About Market Risk**Foreign Currency Exchange Risk**

Historically, we have purchased manufacturing equipment internationally, which exposes us to foreign currency risk. From time to time we enter into foreign currency fair value hedges utilizing forward contracts designed to match scheduled contractual payments to equipment suppliers. Our objective is to fix the dollar amount of our foreign currency denominated manufacturing equipment purchases at the time of order. Although our hedging activity is designed to fix the dollar amount to be expended, the asset purchased is recorded at the spot foreign currency rate in effect as of the date of the payment to the supplier. The difference between the spot rate and the forward rate has been reported as gain or loss on forward contract. We cannot accurately predict future exchange rates or the overall impact of future exchange rate fluctuations on our business, results of operations and financial condition. All forward contracts entered into by us have been settled on the contract settlement dates, the last of which was settled in December 2009.

Although our reporting currency is the U.S. Dollar, we may conduct business and incur costs in the local currencies of other countries in which we may operate, make sales and buy materials. As a result, we are subject to currency translation risk. Further, changes in exchange rates between foreign currencies and the U.S. Dollar could affect our future net sales and cost of sales and could result in exchange losses.

Interest Rate Risk

Our exposure to market risks for changes in interest rates relates primarily to our cash equivalents. As of March 31, 2013, our cash equivalents consisted only of federally insured operating and savings accounts held with financial institutions. From time to time we hold money market funds, investments in U.S. government securities and high quality corporate securities. The primary objective of our investment activities is to preserve principal and provide liquidity on demand, while at the same time maximizing the income we receive from our investments without significantly increasing risk. The direct risk to us associated with fluctuating interest rates is limited to our investment portfolio and we do not believe that a change in interest rates will have a significant impact on our financial position, results of operations or cash flows.

Credit Risk

From time to time we hold certain financial and derivative instruments that potentially subject us to credit risk. These consist primarily of cash, cash equivalents, restricted cash, investments and foreign currency option contracts. We are exposed to credit losses in the event of nonperformance by the counter parties to our financial and derivative instruments. We place

Table of Contents

cash, cash equivalents, investments and forward foreign currency option contracts with various high-quality financial institutions, and exposure is limited at any one institution. We continuously evaluate the credit standing of our counter party financial institutions.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act of 1934, as amended (the “Exchange Act”) is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission (SEC) rules and forms. Our management, including our Chief Executive Officer and Chief Financial Officer, conducted an evaluation required by Rules 13a-15 and 15d-15 under the Exchange Act of the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15 and 15d-15 under the Exchange Act as of March 31, 2013. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that as of March 31, 2013, our disclosure controls and procedures were effective.

Changes in Internal Control over Disclosure and Reporting

There was no change in our internal control over financial reporting that occurred during the quarterly period ended March 31, 2013 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On October 21, 2011, we were notified that a complaint (the “Lawsuit”) was filed by Jefferies against us in state court located in the County and State of New York.

In December 2010, we and Jefferies entered into an engagement agreement (the “Fee Agreement”) pursuant to which Jefferies was hired to act as our financial advisor in relation to certain potential transactions. In the Lawsuit, Jefferies claims that it is entitled to receive an investment banking fee of \$3 million (plus expense reimbursement of approximately \$49,000) under the Fee Agreement in connection with the August 2011 investment and strategic alliance transaction (the “Financing”) between us and TFG Radiant.

At the August 12, 2011 closing of the Financing, we received aggregate proceeds of \$7,360,000 from the sale to TFG Radiant of 6,400,000 shares of our common stock (the “Tranche 1 Shares”) at a price of \$1.15 per share. TFG Radiant also received an option to purchase an additional 9,500,000 shares of Ascent stock (the “Tranche 2 Shares”) at a price of \$1.55 per share. We have not received any proceeds from the option for the Tranche 2 Shares because such option is not currently exercisable.

We have paid Jefferies the fees we believe are owed under the Fee Agreement, which are a \$100,000 retainer and approximately \$49,000 of out-of-pocket expenses. The discovery process in the case is underway. Jefferies' motion for summary judgment has been denied. A trial date has not been set. We believe that the Financing is not a covered transaction under the Fee Agreement and, accordingly, that the Lawsuit is without merit. We intend to vigorously defend the Lawsuit.

This proceeding is subject to the uncertainties inherent in any litigation. It is subject to many uncertainties and to outcomes that are not predictable with assurance and that may not be known for an extended period of time. We record a liability in our financial statements for costs related to claims, including future legal costs, settlements and judgments, where we have assessed that a loss is probable and an amount can be reasonably estimated. It is not possible to predict the outcome for this legal proceeding. If the Lawsuit is determined adversely to Ascent, the costs associated with this proceeding could have a material adverse effect on our results of operations, financial position or cash flows of a future period.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in the updated risk factors in our Annual Report on Form 10-K filed on March 14, 2013, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K filed on March 14, 2013 are not the only risks facing our company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

In January 2013, the Company retained a consulting firm to provide certain consulting services relating to the retail distribution of the Company's consumer products. In exchange for the consulting services, the Company issued 240,000 unregistered shares of Common Stock to the consulting firm. Under the terms of the consulting agreement, the Company will hold the shares in escrow until January 2014. With this issuance, half of the shares vested

immediately, and the remaining shares are expected to vest in January 2014.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Mine Safety Disclosures
