## MECHEL REPORTS THE FY2018 FINANCIAL RESULTS

Consolidated revenue – 312.6 bln rubles (+5% compared to FY2017)

EBITDA<sup>1</sup> – 75.7 bln rubles (-7% compared to FY2017)

Profit attributable to equity shareholders of Mechel PAO – 12.6 bln rubles

Moscow, Russia – March 21, 2019 – Mechel PAO (MOEX: MTLR, NYSE: MTL), a leading Russian mining and steel group, announces financial results for the FY 2018.

Mechel PAO’s Chief Executive Officer Oleg Korzhov commented:

“The Group finished the year 2018 with a year-on-year 5% increase in revenue and 9% increase in profit attributable to equity shareholders of Mechel PAO. EBITDA went down by 7% year-on-year.

“The revenue growth was due to positive price dynamics in steel and steelmaking commodity markets. EBITDA went down year-on-year because of a decline in the mining division’s product sale volumes due to railcar shortages in the second half of 2018 and the corresponding shift in the division’s focus to overcome the underrun of resource preparation for future mining. This decision enabled us to decrease accumulated product stocks and increase stripping works, which will have positive effect in the future. The negative impact of the decline in shipment volumes was partly made up by the favorable market situation, which enabled us to sell metallurgical coal at average prices exceeding levels of 2017.

“I would like to note another important event — by early 2019 we successfully refinanced our one-billion-dollar syndicated loan, which yielded extra finance income to the Group. Also, in 2018 our lenders wrote off 17.5 billion rubles in fines and penalties, which reduced our debt and had a positive impact on our profit for this period, which grew year-on-year even as we take into account the major negative effect from the ruble’s depreciation.”

## Consolidated Results For The Full Year 2018

Mln rubles	FY 2018	FY 2017	%	4Q’ 18	3Q’ 18	%
Revenue	312,574	299,113	5%	75,571	79,965	-5%

Profit						
attributable to equity shareholders of Mechel PAO	12,628	11,557	9%	1,631	6,304	-74%

Mechel PAO's Chief Financial Officer Nelli Galeeva commented:

“Consolidated EBITDA in 2018 amounted to 75.7 billion rubles, which is 7% less than in 2017. Profit attributable to equity shareholders of Mechel PAO grew by 9% year-on-year, due to increase in revenue as well as finance income from the write-off of fines and penalties, which resulted from our fulfilling the conditions of our debt's restructuring by Russian state-owned banks, and which totaled 17.5 billion rubles, as well as 13 billion rubles from restructuring the pre-export syndicated loan.

“Our finance expenses went down by 5.6 billion rubles, or 12%, year-on-year due to decrease of the Bank of Russia key interest rate as well as the Group's efforts to restructure debt and decrease debt costs. In 2018, our operating cash flow went up by 4.8 billion rubles to reach 68.1 billion, which is sufficient to ensure the Group's key operational needs and fulfilling our loan obligations in full.

“In mining segment, revenue from sales to third parties in 2018 amounted to 96.9 billion rubles, which is 3% less than in 2017 (100.1 billion rubles). This effect is due to the decrease in coal product sale volumes that was partially made up for by the growth of both global and domestic prices. The division's operating profit's decline by 32% and EBITDA's 26% decrease year-on-year was largely due to the slump in sales volume while production costs went up as we significantly increased stripping volumes necessary to restore and step up production.

<sup>1</sup> EBITDA - Adjusted EBITDA. Please find the calculation of the Adjusted EBITDA and other non-IFRS measures used here and hereafter in Attachment A.

---

“The favorable global trend of growing prices for our steel segment’s products continued its positive impact on the division’s results. This trend led to a 9% increase in revenue from third-party sales in this reporting period. In 2018 the segment profit attributable to equity shareholders of Mechel PAO amounted to 693 million rubles, as compared to 2017 recorded loss of 4.5 billion rubles.”

## Mining Segment

Mechel Mining Management OOO’s Chief Executive Officer Pavel Shtark noted:

“In the past year, the division focused on overcome the underrun of resource preparation for mining in order to restore our production and sales volumes. Stripping works on all the Group’s coal-mining assets went up by 25% year-on-year and more than by one and a half at Korshunov Mining Plant. We achieved this due to the technical upgrade program as well as bringing in contractors.

“Several of the division’s assets corrected their plans and decreased mining in late 2018 and early 2019 due to massive accumulated undistributed stock as a consequence of limitations in railcars supply. On one hand, it led to a decline in mining, but on the other enabled us to unload storages and optimize production and equipment repair costs, which are traditionally high in winter due to extremely low temperatures.

“This year the division’s assets will continue to renew their mining fleet. The contractors we have brought in to work at our assets also increase the number of machines involved in mining works. Considering the major work we have done last year to prepare reserves for mining, we expect our output to grow this year. The persistently high prices on the mining division’s products will also help us improve our financial results.”

## Steel Segment

Mechel-Steel Management Company OOO’s Chief Executive Officer Andrey Ponomarev noted:

“In 2018, market situation helped us significantly improve the division’s financial results as compared to 2017. At the same time, in this reporting period there were factors that capped the dynamics of our results. Last year’s extensive repair program led to a compelled decline in steel product sales. Still, we redirected output to favor more high value-added products.

Edgar Filing: Mechel PAO - Form 6-K

“This year, planned repairs and overhauls at the division’s facilities will continue. Also, we are launching new production lines and upgrading current ones which will enable us to expand our product range. Beloretsk Metallurgical Plant continues to master production of new types of multi-strand wire ropes, including polymer-coated ones. Izhstal is expanding the range of its circular-section long products, increasing production of hot-rolled steel with surface finishing, as well as working on a new assortment of low-tonnage castings. Chelyabinsk Metallurgical Plant is planning to upgrade its rolling mills to produce heat-hardened rebar, and to launch a series of measures to improve the plant’s ecological safety.”

Power Segment

Mechel Energo OOO’s Chief Executive Officer Petr Pashnin noted:

“The six-percent growth in the division’s sales revenue year-on-year was due to an increase in electricity sales on both the wholesale and retail markets. The growth of prices on the capacity market also had a positive impact on our revenue. At the same time, the scaling up in expenses on materials and higher transmission costs

Non-IFRS financial measures. This press release includes financial information prepared in accordance with International Financial Reporting Standards, or IFRS, as well as other financial measures referred to as non-IFRS. The non-IFRS financial measures should be considered in addition to, but not as a substitute for the information prepared in accordance with IFRS.

Adjusted EBITDA (EBITDA) represents profit (loss) attributable to equity shareholders of Mechel PAO before Depreciation and amortisation, Foreign exchange (gain) loss, net, Finance costs including fines and penalties on overdue loans and borrowings and finance lease payments, Finance income, Net result on the disposal of non-current assets, Impairment of goodwill and other non-current assets, Write-off of trade and other receivables, Allowance for expected credit losses on financial assets, Provision (reversal of provision) for doubtful accounts, Write-off of inventories to net realisable value, Net result on the disposal of subsidiaries, Profit (loss) attributable to non-controlling interests, Income tax expense (benefit), Effect of pension obligations, Other fines and penalties, Gain on restructuring and forgiveness of trade and other payables and write-off of trade and other payables with expired legal term and Other one-off items. Adjusted EBITDA margin is defined as adjusted EBITDA as a percentage of our Revenue. Our adjusted EBITDA may not be similar to EBITDA measures of other companies. Adjusted EBITDA is not a measurement under IFRS and should be considered in addition to, but not as a substitute for the information contained in our consolidated statement of profit (loss) and other comprehensive income. We believe that our adjusted EBITDA provides useful information to investors because it is an indicator of the strength and performance of our ongoing business operations, including our ability to fund discretionary spending such as capital expenditures, acquisitions and other investments and our ability to incur and service debt. While depreciation, amortisation and impairment of goodwill and other non-current assets are considered operating expenses under IFRS, these expenses primarily represent the non-cash current period allocation of costs associated with non-current assets acquired or constructed in prior periods. Our adjusted EBITDA calculation is commonly used as one of the bases for investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the metals and mining industry.
