North America's Railroad

NEWS RELEASE

CN reports Q4-2011 net income of C\$592 million, or C\$1.32 per diluted share, on best-ever quarterly revenue

Q4-2011 adjusted diluted EPS increased 20 per cent to C\$1.30 (1)

Full-year 2011 adjusted diluted EPS increased 15 per cent to C\$4.84 on record annual carloadings and revenues (1)

MONTREAL, Jan. 24, 2012 — CN (TSX: CNR) (NYSE: CNI) today reported its financial and operating results for the fourth quarter and year ended Dec. 31, 2011.

Fourth-quarter and full-year 2011 highlights

- Net income for the final quarter of 2011 was C\$592 million, or C\$1.32 per diluted share, versus fourth-quarter 2010 net income of C\$503 million, or C\$1.08 per diluted share.
- Adjusted Q4-2011 net income of C\$581 million increased by 16 per cent over comparable adjusted 2010 net income of C\$503 million, with Q4-2011 adjusted diluted earnings per share (EPS) of C\$1.30, up 20 per cent over adjusted diluted EPS of C\$1.08 for the final quarter of 2010. (1)
 - Operating income for the fourth quarter of 2011 increased eight per cent to C\$839 million.
- Fourth-quarter revenues increased 12 per cent to a best-ever C\$2,377 million, while carloadings grew by four per cent and revenue ton-miles increased three per cent.
- Fourth-quarter operating ratio was 64.7 per cent, a 1.3-point increase compared with 63.4 per cent for the 2010 final quarter.
- Full-year revenues increased nine per cent to a record C\$9,028 million, while full-year 2011 carloadings rose four per cent and revenue ton-miles increased five per cent.
 - 2011 free cash flow increased to C\$1,175 million from C\$1,122 million for 2010. (1)

Net income for full-year 2011 was C\$2,457 million, or C\$5.41 per diluted share, compared with 2010 net income of C\$2,104 million, or C\$4.48 per diluted share.

The financial results for both years included a number of items that affect the comparability of the results, including in 2011 an after-tax gain on the disposal of a segment of CN's Kingston subdivision known as the Lakeshore East of C\$254 million, or C\$0.55 per diluted share, and an after-tax gain of C\$38 million (C\$0.08 per diluted share) on the sale of the assets of IC RailMarine Terminal Company. Excluding items in both years, adjusted 2011 net income was C\$2,194 million, or C\$4.84 per diluted share, compared with 2010 adjusted net income of C\$1,973 million, or C\$4.20 per diluted share. Adjusted diluted EPS for 2011 increased by 15 per cent. (1)

Claude Mongeau, CN president and chief executive officer, said: “Solid operational and service performance helped CN deliver exceptional financial results for the fourth quarter and 2011 as a whole. Our broad-based service innovation benefited our customers and enabled us to grow our business faster than the overall economy and close the year with record carloadings and revenues. Moving forward, our goal of becoming a true supply chain enabler is the foundation of our commitment to deliver solid shareholder value.”

Foreign currency impact on results

Although CN reports its earnings in Canadian dollars, a large portion of its revenues and expenses is denominated in U.S. dollars. As such, the Company’s results are affected by exchange-rate fluctuations. On a constant currency basis that excludes the impact of fluctuations in foreign currency exchange rates, CN’s 2011 fourth-quarter net income would have been lower by C\$2 million (nil impact per diluted share), and its 12-month net income higher by C\$43 million, or C\$0.09 per diluted share. (1)

Positive 2012 outlook, increased dividend (2)

Mongeau said: “Although the economic recovery may be affected by global uncertainty, CN believes the gradual improvement in the North American economy will continue in 2012. Despite significant headwinds from additional pension expense of about C\$120 million in 2012, CN is aiming to achieve a growth of up to 10 per cent in diluted earnings per share (EPS) over adjusted diluted EPS of C\$4.84 for 2011. CN also expects to generate 2012 free cash flow in the order of C\$875 million, which is in line with 2011 excluding major asset sales.” (1)

Mongeau added: “With a strong balance sheet and solid prospects for earnings and free cash flow generation, I’m pleased to announce that our Board of Directors has approved a 15 per cent increase in CN’s 2012 quarterly common-share dividend.”

Fourth-quarter 2011 revenues and expenses

Revenues for the fourth quarter of 2011 increased by 12 per cent to C\$2,377 million. All but one of CN’s commodity groups experienced increased revenues: metals and minerals (30 per cent), intermodal (16 per cent), petroleum and chemicals (14 per cent), automotive (13 per cent), forest products (12 per cent), and grain and fertilizers (three per cent.) Coal revenues were flat. Revenue ton-miles increased three per cent over the fourth quarter of 2010, while rail freight revenue per revenue ton-mile increased by nine per cent.

Total operating expenses for the fourth quarter increased by 15 per cent to C\$1,538 million.

Full-year 2011 revenues and expenses

Revenues for the year increased by nine per cent to C\$9,028 million, mainly attributable to higher freight volumes, due to a modest improvement in the North American and global economies and to the Company’s performance above base market conditions in a number of segments; the impact of a higher fuel surcharge; and freight rate increases. These factors were partly offset by the negative translation impact of the stronger Canadian dollar on U.S.-dollar-denominated revenues in the first nine months of the year.

All commodity groups saw revenue increases for 2011: metals and minerals (17 per cent), intermodal (14 per cent), grain and fertilizers (seven per cent), petroleum and chemicals (seven per cent), forest products (seven per cent), automotive (six per cent), and coal (three per cent). Revenue ton-miles for the year increased by five per cent from 2010, while rail freight revenue per revenue ton-mile increased by four per cent.

Operating expenses for 2011 increased by nine per cent to C\$5,732 million, mainly due to higher fuel costs, purchased service and material expense, labor and fringe benefits expense as well as higher depreciation and amortization. These factors were partially offset by the positive translation impact of the stronger Canadian dollar on U.S.-dollar-denominated expenses, particularly in the first nine months of 2011, and lower casualty and other expense.

CN's operating ratio for 2011 was 63.5 per cent, compared with 63.6 per cent for 2010, a 0.1-point reduction.

- (1) Please see discussion and reconciliation of non-GAAP adjusted performance measures in the attached supplementary schedule, Non-GAAP Measures.
- (2) See Forward-Looking Statements for a summary of the key assumptions and risks regarding CN's 2012 outlook.

Forward-Looking Statements

Certain information included in this news release constitutes "forward-looking statements" within the meaning of the United States Private Securities Litigation Reform Act of 1995 and under Canadian securities laws. CN cautions that, by their nature, these forward-looking statements involve risks, uncertainties and assumptions. The Company cautions that its assumptions may not materialize and that current economic conditions render such assumptions, although reasonable at the time they were made, subject to greater uncertainty. Such forward-looking statements are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors which may cause the actual results or performance of the Company or the rail industry to be materially different from the outlook or any future results or performance implied by such statements. To the extent that CN has provided guidance that are non-GAAP financial measures, the Company may not be able to provide a reconciliation to the GAAP measures, due to unknown variables and uncertainty related to future results. Key assumptions used in determining forward-looking information are set forth below.

Key assumptions

CN made a number of economic and market assumptions in preparing its 2012 outlook. The Company is forecasting that North American industrial production for the year will increase by about three per cent. CN also expects U.S. housing starts to be around 700,000 units and U.S. motor vehicles sales to be approximately 13.5 million units for the year. In addition, CN is assuming the 2012/2013 grain crops in both Canada and the U.S. will be in line with five-year averages. With respect to the 2011/2012 crop, U.S. corn and soybean production is slightly below -- and exports are projected to be significantly below -- the prior year's crop. Canadian 2011/2012 grain production and export forecasts are moderately above the prior year's crop. With these assumptions, CN is targeting carload growth in the mid-single digit range, along with continued pricing improvement above inflation. CN assumes the Canadian-U.S. exchange rate to be around parity for 2012, and that the price of crude oil (West Texas Intermediate) for the year to be in the range of US\$100 per barrel. In 2012, CN plans to invest approximately C\$1.75 billion in capital programs, of which more than C\$1 billion will be targeted on track infrastructure to maintain a safe and fluid railway network. In addition, the

Company will invest in projects to support a number of productivity and growth initiatives.

Important risk factors that could affect the forward-looking statements include, but are not limited to, the effects of general economic and business conditions, industry competition, inflation, currency and interest rate fluctuations, changes in fuel prices, legislative and/or regulatory developments, compliance with environmental laws and regulations, actions by regulators, various events which could disrupt operations, including natural events such as severe weather, droughts, floods and earthquakes, labor negotiations and disruptions, environmental claims, uncertainties of investigations, proceedings or other types of claims and litigation, risks and liabilities arising from derailments, and other risks detailed from time to time in reports filed by CN with securities regulators in Canada and the United States. Reference should be made to “Management’s Discussion and Analysis” in CN’s annual and interim reports, Annual Information Form and Form 40-F filed with Canadian and U.S. securities regulators, available on CN’s website, for a summary of major risks.

CN assumes no obligation to update or revise forward-looking statements to reflect future events, changes in circumstances, or changes in beliefs, unless required by applicable Canadian securities laws. In the event CN does update any forward-looking statement, no inference should be made that CN will make additional updates with respect to that statement, related matters, or any other forward-looking statement.

CN – Canadian National Railway Company and its operating railway subsidiaries – spans Canada and mid-America, from the Atlantic and Pacific oceans to the Gulf of Mexico, serving the ports of Vancouver, Prince Rupert, B.C., Montreal, Halifax, New Orleans, and Mobile, Ala., and the key metropolitan areas of Toronto, Buffalo, Chicago, Detroit, Duluth, Minn./Superior, Wis., Green Bay, Wis., Minneapolis/St. Paul, Memphis, and Jackson, Miss., with connections to all points in North America. For more information on CN, visit the Company’s website at www.cn.ca.

Such statistical data and related productivity measures are based on estimated data available at such time and are subject to change as more complete information becomes available.

CANADIAN NATIONAL RAILWAY COMPANY
NON-GAAP MEASURES - unaudited

Adjusted performance measures

For the three months and year ended December 31, 2011, the Company reported adjusted net income of \$581 million, or \$1.30 per diluted share and \$2,194 million, or \$4.84 per diluted share, respectively. The adjusted figures for the three months and year ended December 31, 2011 exclude an income tax recovery of \$11 million (\$0.02 per diluted share) relating to certain fuel costs attributed to various wholly-owned subsidiaries' fuel consumption in prior periods. The adjusted figures for the year ended December 31, 2011 exclude a net deferred income tax expense of \$40 million (\$0.08 per diluted share) resulting from the enactment of state corporate income tax rate changes and other legislated state tax revisions, a gain on disposal of a segment of the Company's Kingston subdivision known as the Lakeshore East of \$288 million, or \$254 million after-tax (\$0.55 per diluted share) and a gain on disposal of substantially all of the assets of IC RailMarine Terminal Company of \$60 million, or \$38 million after-tax (\$0.08 per diluted share).

For the three months and year ended December 31, 2010, the Company reported adjusted net income of \$503 million, or \$1.08 per diluted share and \$1,973 million, or \$4.20 per diluted share, respectively. The adjusted figures for the year ended December 31, 2010 exclude a gain on disposal of a portion of the property known as the Oakville subdivision of \$152 million, or \$131 million after-tax (\$0.28 per diluted share).

Management believes that adjusted net income and adjusted earnings per share are useful measures of performance that can facilitate period-to-period comparisons, as they exclude items that do not necessarily arise as part of the normal day-to-day operations of the Company and could distort the analysis of trends in business performance. The exclusion of such items in adjusted net income and adjusted earnings per share does not, however, imply that such items are necessarily non-recurring. These adjusted measures do not have any standardized meaning prescribed by GAAP and may, therefore, not be comparable to similar measures presented by other companies. The reader is advised to read all information provided in the Company's 2011 Annual Consolidated Financial Statements, Notes thereto and Management's Discussion and Analysis (MD&A). The following tables provide a reconciliation of net income and earnings per share, as reported for the three months and year ended December 31, 2011 and 2010, to the adjusted performance measures presented herein.

In millions, except per share data	Three months ended December 31, 2011			Year ended December 31, 2011

Constant currency

Although CN conducts its business and reports its earnings in Canadian dollars, a large portion of revenues and expenses is denominated in US dollars. As such, the Company's results are affected by exchange-rate fluctuations. Financial results at "constant currency" allow results to be viewed without the impact of fluctuations in foreign currency exchange rates, thereby facilitating period-to-period comparisons in the analysis of trends in business performance. Measures at constant currency are considered non-GAAP measures and do not have any standardized meaning prescribed by GAAP and may, therefore, not be comparable to similar measures presented by other companies. Financial results at constant currency are obtained by translating the current period results denominated in US dollars at the foreign exchange rates of the comparable period of the prior year. The average foreign exchange rates for the three months and year ended December 31, 2011 were \$1.02 and \$0.99 per US\$1.00, respectively, and \$1.01 and \$1.03, respectively, for 2010.

On a constant currency basis, the Company's 2011 fourth quarter net income would have been lower by \$2 million (no impact per diluted share) and the twelve-month net income would have been higher by \$43 million, or \$0.09 per diluted share. The following table presents a reconciliation of 2011 net income as reported to net income on a constant currency basis:

In millions	Three months ended December 31, 2011		Year ended December 31, 2011	
	Reported	Constant Currency	Reported	Constant Currency
Net income	\$ 503	\$ 505	\$ 2,104	\$ 2,147

Edgar Filing: CANADIAN NATIONAL RAILWAY CO - Form 6-K

Net income, as reported	\$	592	\$	2,457
Adjustments:				
Negative (positive) impact due to the strengthening (weakening) Canadian dollar included in net income		(2)		39
Increase due to the strengthening Canadian dollar on additional year-over-year US\$ net income		-		4
Impact of foreign exchange using constant currency rates		(2)		43
Net income, on a constant currency basis	\$	590	\$	2,500

CANADIAN NATIONAL RAILWAY COMPANY
NON-GAAP MEASURES - unaudited

Free cash flow

The Company utilized \$153 million and generated \$1,175 million of free cash flow for the three months and year ended December 31, 2011, respectively, compared to generated free cash flow of \$184 million and \$1,122 million for the same periods in 2010, respectively. Free cash flow does not have any standardized meaning prescribed by GAAP and may, therefore, not be comparable to similar measures presented by other companies. The Company believes that free cash flow is a useful measure of performance as it demonstrates the Company's ability to generate cash after the payment of capital expenditures and dividends. The Company defines free cash flow as the sum of net cash provided by operating activities, adjusted for changes in the accounts receivable securitization program, if any, and in cash and cash equivalents resulting from foreign exchange fluctuations; and net cash used in investing activities, adjusted for changes in restricted cash and cash equivalents, if any, for the impact of major acquisitions, if any, and the payment of dividends, calculated as follows:

In millions	Three months ended December 31		Year ended December 31	
	2011	2010	2011	2010
Net cash provided by operating activities	\$ 591	\$ 1,055	\$ 2,976	\$ 2,999
Net cash used in investing activities	(619)	(747)	(1,729)	(1,383)
Net cash provided (utilized) before financing activities	(28)	308	1,247	1,616
Adjustments:				
Dividends paid	(144)	(125)	(585)	(503)
Change in restricted cash and cash equivalents	10	-	499	-
Effect of foreign exchange fluctuations on US dollar-denominated cash and cash equivalents	9	1	14	7
Change in accounts receivable securitization	-	-	-	2
Free cash flow	\$ (153)	\$ 184	\$ 1,175	\$ 1,122
