-

ITEM 2.02 Results of Operations and Financial Condition

On February 3, 2015, Pentair plc (the “Company”) issued a press release announcing its earnings for the fourth quarter of 2014 and a conference call in connection therewith. A copy of the release is attached hereto as Exhibit 99.1 and incorporated herein by reference.

This press release refers to certain non-GAAP financial measures (core sales, adjusted operating income, adjusted operating margins, adjusted earnings per share from continuing operations and free cash flow) and a reconciliation of those non-GAAP financial measures to the corresponding financial measures contained in the Company’s financial statements prepared in accordance with generally accepted accounting principles.

The 2014 adjusted operating income, adjusted operating margins and adjusted earnings per share from continuing operations eliminate certain targeted restructuring activities, certain expenses related to the redomicile of the Company, “mark-to-market” loss for pension and other post-retirement plans and certain tax items. The 2013 adjusted operating income, adjusted operating margins and adjusted earnings per share from continuing operations eliminate certain expenses incurred related to the merger with the Flow Control business of Tyco International Ltd., certain targeted restructuring activities, “mark-to-market” gain for pension and other post-retirement plans, impairments, certain expenses related to the redomicile of the Company, gain on the sale of businesses, certain tax items and interest expense.

We use the term “core sales” to refer to GAAP net sales excluding 1) the impact of currency translation and 2) the impact of revenue from acquired businesses recorded prior to the first anniversary of the acquisition less the amount of sales attributable to divested product lines not considered discontinued operations (“acquisition sales”). The portion of GAAP net sales attributable to currency translation is calculated as the difference between (a) the period-to-period change in net sales (excluding acquisition sales) and (b) the period-to-period change in net sales (excluding acquisition sales) after applying current period foreign exchange rates to the prior year period. We use the term “core sales growth” to refer to the measure of comparing current period core net sales with the corresponding period of the prior year. These non-GAAP measures may not be comparable to similarly titled measures reported by other companies.

Management utilizes these adjusted financial measures to assess the run-rate of its continuing operations against those of prior periods without the distortion of these factors. The Company believes that these non-GAAP financial measures will be useful to investors as well to assess the continuing strength of the Company’s underlying operations. The Company uses free cash flow to assess its cash flow performance. The Company believes free cash flow is an important measure of operating performance because it provides the Company and its investors a measurement of cash generated from continuing operations that is available to pay dividends and repay debt. In addition, free cash flow is used as criterion to measure and pay compensation-based incentives. The Company’s measure of free cash flow may not be comparable to similarly titled measures reported by other companies.

ITEM 9.01 Financial Statements and Exhibits

(a) Financial Statements of Businesses Acquired

Not applicable.

(b) Pro Forma Financial Information

Not applicable.

(c) Shell Company Transactions

Not applicable

(d) Exhibits

The following exhibit is provided as part of the information furnished under Item 2.02 of this Current Report on Form 8-K:

Exhibit	Description
99.1	Pentair plc press release dated February 3, 2015 announcing earnings results for the fourth quarter of 2014.

SIGNATURE
