Item 7.01 Regulation FD Disclosure.

On April 17, 2014, we issued a press release announcing the results of our annual shareholder meeting.

In addition, at the annual meeting of shareholders held on April 16, 2014, our Chief Operating Officer, David Hall, described certain operational details relating to specific wells and equipment in Alaska, including the following:

WMRU-8: We have drilled and completed the well and are planning to stimulate this well as soon as materials and equipment are available, hopefully over the next three weeks. The well was designed with an exploration leg into the Jurassic but was not completed in that formation.

Sabre: Although we are still in the process of compiling a cost estimate and authorization for expenditure (“AFE”), we expect that the preliminary gross cost to drill, test, and complete the first well in this prospect will be in the range of

approximately \$25 - 30 million.

Rig 36: We expect to close on the rig purchase of this rig in May 2014, and to then make improvements to it needed to drill the Sabre prospect. The estimated costs of the improvements will be approximately \$8 million.

Pursuant to General Instruction B.2 of Form 8-K, the information in this Item 7.01 of Form 8-K, including Exhibit 99.1, shall not be deemed "filed" for the purposes of Section 18 of the Securities Exchange Act of 1934 or otherwise be subject to the liabilities of that section, nor is it incorporated by reference into any filing of Miller Energy Resources, Inc. under the
