## Dear Shareholder

About this time one year ago, financial markets had been upended by sovereign debt turmoil in the United States and Europe as well as growing concerns about the future of the global economy. Since then, asset prices have waxed and waned in broad strokes as investors reacted to developments in Europe s financial situation, mixed US economic news and global central bank policy action.

After confidence crumbled in the third quarter of 2011, October brought improving economic data and more concerted efforts among European leaders toward stemming the region s debt crisis, gradually drawing investors back to the markets. Improving sentiment carried over into early 2012 as investors felt some relief from the world s financial woes. Volatility abated and risk assets (including stocks, commodities and high yield bonds) moved boldly higher through the first two months of 2012 while climbing Treasury yields pressured higher-quality fixed income assets.

Markets reversed course in the spring when Europe s debt problems boiled over once again. High levels of volatility returned as political instability in Greece threatened the country s membership in the euro zone. Spain faced severe deficit issues while the nation s banks clamored for liquidity. Yields on Spanish and Italian government debt rose to levels deemed unsustainable. European leaders conferred and debated vehemently over the need for fiscal integration among the 17 nations comprising the euro currency bloc as a means to resolve the crisis for the long term.

Alongside the drama in Europe, investors were discouraged by gloomy economic reports from various parts of the world. A slowdown in China, a key powerhouse for global growth, became particularly worrisome. In the United States, disappointing jobs reports dealt a crushing blow to sentiment. Risk assets sold off in the second quarter as investors again retreated to safe haven assets.

Despite the continuation of heightened market volatility, most asset classes enjoyed a robust summer rally. Global economic data continued to be mixed, but the spate of downside surprises seen in the second quarter began to recede and, outside of Europe, the risk of recession largely subsided. Central bank policy action has been a major driver of market sentiment in 2012. Investors anticipation for economic stimulus drove asset prices higher over the summer as the European Central Bank stepped up its efforts to support the region s troubled nations and the US Federal Reserve reiterated its readiness to take action if economic conditions warrant.

On the whole, most asset classes advanced during the reporting period. US large cap stocks delivered strong returns for the 12 months ended August 31, 2012, while small cap stocks and high yield bonds also performed well. Despite the risk-asset rally in recent months, higher-quality investments including tax-exempt municipal bonds and US Treasury bonds posted exceptional gains by historical standards and outperformed investment-grade corporate bonds. International and emerging equities, however, lagged other asset classes amid ongoing global uncertainty. Near-zero short term interest rates kept yields on money market securities near their all-time lows.

We know that investors continue to face a world of uncertainty and volatile markets, but we also believe these challenging times present many opportunities. We remain committed to working with you and your financial professional to identify actionable ideas for your portfolio. We encourage you to visit **www.blackrock.com/newworld** for more information.

Sincerely,

President, BlackRock Advisors, LLC

# THIS PAGE NOT PART OF YOUR FUND REPORT 3

# Fund Summary as of August 31, 2012 BlackRock Defined Opportunity Credit Trust

# **Investment Objective**

**BlackRock Defined Opportunity Credit Trust s (BHL) (the Fund**) primary investment objective is to provide high current income, with a secondary objective of long-term capital appreciation. The Fund seeks to achieve its investment objectives by investing substantially all of its assets in loan and debt instruments and loan-related and debt-related instruments (collectively credit securities). The Fund invests, under normal market conditions, at least 80% of its assets in any combination of the following credit securities: (i) senior secured floating rate and fixed rate loans; (ii) second lien or other subordinated or unsecured floating rate and fixed rate loans or debt; (iii) credit securities that are rated below investment grade quality; and (iv) investment grade corporate bonds. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objectives will be achieved.

# Portfolio Management Commentary

#### How did the Fund perform?

For the 12 months ended August 31, 2012, the Fund returned 17.12% based on market price and 13.94% based on net asset value ( NAV ). For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 22.06% based on market price and 14.37% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

Security selection among loan instruments across the credit quality spectrum had a positive impact on performance, with particular strength from the Fund s higher-quality non-investment grade loan holdings. From a sector perspective, security selection within the consumer services, electric and gaming segments benefited results. The Fund s tactical allocation to high yield bonds also boosted returns as the asset class outperformed loans and higher-duration fixed income instruments.

Conversely, on a sector basis, security selection in non-cable media, metals, and non-captive diversified financials detracted from performance during the period.

# Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality portions of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data along with global policy uncertainty and an overall weak outlook for global growth, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. The European Central Bank s long-term refinancing operations, introduced in December 2011, were supportive of risk markets in first half of 2012. However, this development did not have a significant influence on the Fund s view on risk within the loan market. More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macroeconomic risks.

#### Describe portfolio positioning at period end.

At period end, the Fund held 90% of its total portfolio in floating rate loan interests (bank loans), 7% in corporate bonds, with the remainder in asset-backed securities and common stocks. The Fund s largest sector exposures included healthcare, technology and wireless. The Fund ended the period with economic leverage at 30% of its total managed

assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

AUGUST 31, 2012 ANNUAL REPORT 5

Fund Summary as of August 31, 2012 BlackRock Diversified Income Strategies Fund, Inc.

# **Investment Objective**

**BlackRock Diversified Income Strategies Fund, Inc. s (DVF) (the Fund**) investment objective is to provide shareholders with high current income. The Fund seeks to achieve its investment objective by investing primarily in floating rate debt securities and instruments, including floating rate loans, bonds, certain preferred securities (including certain convertible preferred securities), notes or other debt securities or instruments which pay a floating or variable rate of interest until maturity. The Fund considers floating rate debt securities to include fixed rate debt securities held by the Fund where the Fund has entered into certain derivative transactions at either the portfolio level or with respect to an individual security held by the Fund, including interest rate swap agreements, in an attempt to convert the fixed rate payments it receives with respect to such securities into floating rate payments. The Fund may invest, under normal market conditions, a substantial portion of its assets in below investment grade quality securities. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

#### **Portfolio Management Commentary**

On May 23, 2012, the Board of Directors of DVF approved a plan of reorganization whereby BlackRock Floating Rate Income Strategies Fund, Inc. (FRA) will acquire all of the assets and assume all of the liabilities of DVF in exchange for newly issued shares of FRA in a merger transaction. At a shareholder meeting on September 13, 2012, DVF and FRA shareholders approved the plan of reorganization. The reorganization took place on October 5, 2012. **How did the Fund perform?** 

For the 12 months ended August 31, 2012, the Fund returned 14.97% based on market price and 14.08% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 22.06% based on market price and 14.37% based on NAV. All returns reflect reinvestment of dividends. The Fund s discount to NAV, which narrowed slightly during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. **What factors influenced performance?** 

Security selection among loan instruments across the credit quality spectrum had a positive impact on performance, with particular strength from the Fund s higher-quality non-investment grade loan holdings. From a sector perspective, security selection within the consumer services, electric and gaming segments benefited results. The Fund s tactical allocation to high yield bonds also boosted returns as the asset class outperformed loans and higher-duration fixed income instruments.

Conversely, on a sector basis, security selection in non-cable media and independent energy detracted from performance during the period.

# Describe recent portfolio activity.

During the period, the Fund maintained its focus on the higher quality portions of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data along with global policy uncertainty and an overall weak outlook for global growth, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. The European Central Bank s long-term refinancing operations, introduced in December 2011, were supportive of risk markets in first half of 2012. However, this development did not have a significant influence on the Fund s view on risk within the loan market.

# Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSR

More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macroeconomic risks.

# Describe portfolio positioning at period end.

At period end, the Fund held 87% of its total portfolio in floating rate loan interests (bank loans), 9% in corporate bonds, with the remainder in asset-backed securities, common stocks and other interests. The Fund s largest sector exposures included healthcare, technology and wireless. The Fund ended the period with economic leverage at 31% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

<sup>4</sup>Using the higher of S&P s or Moody s ratings. AUGUST 31, 2012 ANNUAL REPORT 7 Fund Summary as of August 31, 2012 BlackRock Floating Rate Income Strategies Fund, Inc.

## **Investment Objective**

**BlackRock Floating Rate Income Strategies Fund, Inc. s (FRA) (the Fund**) investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments. The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

#### **Portfolio Management Commentary**

On May 23, 2012, the Board of Directors of FRA approved separate plans of reorganization whereby FRA will acquire all of the assets and assume all of the liabilities of DVF and Floating Rate Income Strategies Fund II, Inc. (FRB and with DVF, each a Target Fund ) in exchange for newly issued shares of FRA in a merger transaction. At a shareholder meeting on September 13, 2012, each Target Fund s and FRA s shareholders approved their respective plan of reorganization. The reorganizations took place on October 5, 2012. **How did the Fund perform?** 

For the 12 months ended August 31, 2012, the Fund returned 21.74% based on market price and 13.91% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of 22.06% based on market price and 14.37% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on NAV. The following discussion relates to performance based on NAV. **What factors influenced performance?** 

Security selection among loan instruments in the middle and upper credit quality tiers had a positive impact on performance, with particular strength from the Fund s higher-quality non-investment grade loan holdings. From a sector perspective, security selection within the consumer services, electric and gaming segments benefited results. The Fund s tactical allocation to high yield bonds also boosted returns as the asset class outperformed loans and higher-duration fixed income instruments.

Conversely, on a sector basis, security selection among lower quality loan instruments detracted from performance during the period. On a sector basis, selection within non-cable media and paper had a negative impact on returns. **Describe recent portfolio activity.** 

During the period, the Fund maintained its focus on the higher quality portions of the loan market in terms of loan structure, liquidity and overall credit quality. Given mixed economic data along with global policy uncertainty and an overall weak outlook for global growth, the Fund remained cautious of lower-rated less-liquid loans. Instead, the Fund sought issuers with attractive risk-reward characteristics and superior fundamentals. The European Central Bank s long-term refinancing operations, introduced in December 2011, were supportive of risk markets in first half of 2012. However, this development did not have a significant influence on the Fund s view on risk within the loan market.

# Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSR

More specifically, the Fund continued to adhere to a strict investment discipline with the goal of pursuing yield while minimizing exposure to macroeconomic risks.

# Describe portfolio positioning at period end.

At period end, the Fund held 88% of its total portfolio in floating rate loan interests (bank loans), 10% in corporate bonds, with the remainder in asset-backed securities. The Fund s largest sector exposures included healthcare, technology and wireless. The Fund ended the period with economic leverage at 30% of its total managed assets. The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

<sup>4</sup>Using the higher of S&P s or Moody s ratings. AUGUST 31, 2012 ANNUAL REPORT 9 Fund Summary as of August 31, 2012 BlackRock Limited Duration Income Trust

## **Investment Objective**

**BlackRock Limited Duration Income Trust s (BLW) (the Fund**) investment objective is to provide current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in three distinct asset classes:

intermediate duration, investment grade corporate bonds, mortgage-related securities, asset-backed securities and US Government and agency securities;

senior, secured floating rate loans made to corporate and other business entities; and

US dollar-denominated securities of US and non-US issuers rated below investment grade and, to a limited extent, non-US dollar denominated securities of non-US issuers rated below investment grade.

The Fund s portfolio normally has an average portfolio duration of less than five years (including the effect of anticipated leverage), although it may be longer from time to time depending on market conditions. The Fund may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Fund s investment objective will be achieved.

#### **Portfolio Management Commentary**

#### How did the Fund perform?

For the 12 months ended August 31, 2012, the Fund returned 21.68% based on market price and 13.86% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 22.72% based on market price and 16.49% based on NAV. All returns reflect reinvestment of dividends. The Fund moved from a discount to NAV to a premium by period end, which accounts for the difference between performance based on NAV. The following discussion relates to performance based on NAV. **What factors influenced performance?** 

Security selection in the wireless, consumer services and electric sectors had a positive impact on the Fund s performance. The Fund s tactical exposure to equity securities proved beneficial as demand for riskier assets improved over the 12-month period.

The Fund differs from its Lipper category competitors, which invest primarily in high yield bonds, in that the Fund also invests in floating rate loan interests (bank loans), investment grade credits and securitized assets. While the Fund s allocations to these other asset classes did not detract from performance on an absolute basis, they underperformed high yield bonds for the period. Security selection in the non-cable media, independent energy and paper sectors hindered returns for the period.

#### Describe recent portfolio activity.

The 12-month period began with severe market volatility in reaction to headwinds from Europe s debt crisis and a possible US government shutdown. However, the environment shifted in December when the European Central Bank announced its program of long-term refinancing operations. As financial market conditions improved, the Trust selectively added back some risk in names with appealing risk-reward characteristics. Over the first eight months of 2012, the high yield market surged, prompting the Trust to moderate its risk profile. The Trust s view on high yield remained positive throughout this period; however, as average prices moved north of par for the market, the Trust became increasingly focused on higher-quality, income-oriented credit names with stable fundamentals and an

# Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSR

attractive coupon rate, since the potential for price appreciation had largely diminished. Given global growth concerns posing a persistent threat and fueling uncertainty, the Trust continued to favor issuers in mature industries that exhibit consistent cash flows and good earnings visibility and debt instruments that are backed by profitable assets. The Trust generally remained cautious of cyclical credits that tend to be more vulnerable to slower economic growth and/or macroeconomic weakness.

#### Describe portfolio positioning at period end.

At period end, the Fund held 46% of its total portfolio in corporate bonds, 34% in floating rate loan interests (bank loans) and 8% in non-agency mortgage-backed securities, with the remainder in US Government sponsored agency securities, asset-backed securities, common stocks and taxable municipal bonds. The Fund s largest sector exposures included healthcare, non-captive diversified financials and wireless. The Fund ended the period with economic leverage at 32% of its total managed assets.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

AUGUST 31, 2012 ANNUAL REPORT 11

# The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their common shares ( Common Shares ). However, these objectives cannot be achieved in all interest rate environments.

The Funds may utilize leverage by borrowing through a credit facility or through entering into reverse repurchase agreements. In general, the concept of leveraging is based on the premise that the financing cost of assets to be obtained from leverage, which will be based on short-term interest rates, will normally be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund s shareholders will benefit from the incremental net income.

The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV. However, in order to benefit shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, income to shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund s capitalization is \$100 million and it borrows for an additional \$30 million, creating a total value of \$130 million available for investment in long-term securities. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays borrowing costs and interest expense on the \$30 million of borrowings based on the lower short-term interest rates. At the same time, the securities purchased by the Fund with assets received from the borrowings earn income based on long-term interest rates. In this case, the borrowing costs and interest expense of the borrowings is significantly lower than the income earned on the Fund s long-term investments, and therefore the Fund s shareholders are the beneficiaries of the incremental net income.

If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup will be reduced or eliminated completely. Furthermore, if prevailing short-term interest rates rise above long-term interest rates, the yield curve has a negative slope. In this case, the Fund pays higher short-term interest rates whereas the Fund s total portfolio earns income based on lower long-term interest rates.

Furthermore, the value of the Funds portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Funds debt securities does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Funds NAVs positively or negatively in addition to the impact on Fund performance from leverage from borrowings discussed above.

The use of leverage may enhance opportunities for increased income to the Funds, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Funds NAVs, market prices and dividend rates than comparable portfolios without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Funds net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, each Fund s net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. Each Fund may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause a Fund to incur losses. The use of leverage may limit each Fund s ability to invest in certain types of securities or use certain types of hedging

# Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSR

strategies. Each Fund will incur expenses in connection with the use of leverage, all of which are borne by shareholders and may reduce income.

Under the Investment Company Act of 1940, as amended (the 1940 Act ), the Funds are permitted to issue senior securities representing indebtedness up to  $33^{1/3}\%$  of their total managed assets (each Fund s net assets plus the proceeds of any outstanding borrowings). If the Funds segregate liquid assets having a value not less than the repurchase price (including accrued interest), a reverse repurchase agreement will not be considered a senior security and therefore will not be subject to this limitation. In addition, each Fund voluntarily limits its aggregate economic leverage to 50% of its managed assets. As of August 31, 2012, the Funds had aggregate economic leverage from reverse repurchase agreements and/or borrowings through a credit facility as a percentage of their total managed assets as follows:

Percent of		
	Econ	omic
	Leve	rage
BHL	30	%
DVF	31	%
FRA	30	%
BLW	32	%

#### **Derivative Financial Instruments**

The Funds may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 2 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate and/or foreign currency exchange rate risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Funds ability to use a derivative financial instrument advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Fund to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Fund can realize on an investment, may result in lower dividends paid to shareholders or may cause a Fund to hold an investment that it might otherwise sell. The Funds investments in these instruments are discussed in detail in the Notes to Financial Statements.

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instrument. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities,

prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs) Level3 unobservable inputs based on the best information available in the circumstances, to the extent observable

inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instrument)

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instrument is based on the pricing transparency of the investment and derivative

financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund s investments and derivative financial instruments categorized in the disclosure hierarchy as of August 31, 2012:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed				
Securities			\$3,427,772	\$3,427,772
Common				
Stocks	\$420,455	\$572,596		993,051
Corporate				
Bonds		13,749,015		13,749,015
Floating Rate				
Loan				
Interests		155,684,119	10,204,028	165,888,147
Short-Term				
Securities.	\$2,326,441			2,326,441
Total	\$2,746,896	\$170,005,730	\$13,631,800	\$186,384,426
		\$170,005,730	\$13,631,800	

	Level 1	Level 2	Level 3	Total
Derivative Financial Instruments <sup>1</sup>				
Assets:				
Foreign currency				
exchange				
contracts		\$145		\$145
Liabilities:				
Foreign currency				
exchange				
contracts		(132,044)		(132,044)
Credit				
contracts		(66,320)		(66,320)
Total		\$(198,219)		\$(198,219)

<sup>1</sup>Derivative financial instruments are swaps and foreign currency exchange contracts. Swaps and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument.

Certain of the Fund s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of August 31, 2012, such assets and liabilities are categorized within the disclosure hierarchy as follows:

Level 1 Level 2 Level 3 Total

Assets: Foreign currency

at value	\$12,292			\$12,292
Liabilities:				
Loan payable		\$(55,000,000)	—	(55,000,000)
Total	\$12,292	\$(55,000,000)		\$(54,987,708)

There were no transfers between Level 1 and Level 2 during the year ended August 31, 2012.

See Notes to Financial Statements.

#### Schedule of Investments (concluded) BlackRock Defined Opportunity Credit Trust (BHL)

The following table summarizes the valuation techniques used and unobservable inputs developed by the BlackRock Global Valuation Methodologies Committee (Global Valuation Committee) to determine the fair value of certain of the Fund s Level 3 investments as of August 31, 2012:

Assets:	Value	Valuation Techniques	Unobservable Inputs <sup>1</sup>	Range of Unobservable Inputs	Weighted Average of Unobservable Inputs <sup>2</sup>
Floating Rate Loan		Market Comparable			
Interests	\$1,467,15	9Companies Cost	Yield N/A <sup>3</sup>	9.65%	9.65%
Total <sup>4</sup>	\$1,467,15	9			

<sup>1</sup>A change to the unobservable input may result in a significant change to the value of the investment as follows:

	Impact to	
Unobservable Input	Value if Input Increases	Value if Input Decreases
Yield	Decrease	Increase

<sup>2</sup>Unobservable inputs are weighted based on the value of the investments included in the range.

The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are <sup>3</sup>reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market

data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Fund.

Does not include Level 3 investments with values derived utilizing prices from recent prior transactions or third party <sup>4</sup>pricing information without adjustment for which such inputs are unobservable. See above valuation input table for values of such Level 3 investments. A significant change in third party pricing information could result in a significantly lower or higher value in such Level 3 investments.

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed	Common	Floating Rate	
	Securities	Stocks	Loan Interests	Total
Assets:				
Opening balance, as of August 31, 2011	\$2,378,561	\$106,534	\$10,822,191	\$13,307,286

Transfers into Level 3 <sup>5</sup> Transfers out of Level 3 <sup>6</sup> Accrued discounts/premiums	 37,938		812,985 (5,478,303) 21,250	812,985 (5,478,303) 59,188
Net realized gain (loss)	(38,467)	(503,772)	22,536	(519,703)
Net change in unrealized appreciation/depreciation <sup>7</sup>	143,076	397,245	195,347	735,668
Purchases	2,494,764		5,135,597	7,630,361
Sales	(1,588,100)	(7)	(1,327,575)	(2,915,682)
Closing Balance, as of August 31, 2012	\$3,427,772		\$10,204,028	\$13,631,800

As of August 31, 2011, the Fund used observable inputs in determining the value of certain investments. As of <sup>5</sup>August 31, 2012, the Fund used significant unobservable inputs in determining the value on the same investments. As a result, investments with a beginning of year value of \$812,985 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2011, the Fund used significant unobservable inputs in determining the value of certain investments. As of August 31, 2012, the Fund used observable inputs in determining the value on the same investments. As a result, investments with a beginning of year value of \$5,478,303 transferred from Level 3 to Level

2 in the disclosure hierarchy.

<sup>7</sup>Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on investments still held as of August 31, 2012 was \$249,362. See Notes to Financial Statements.

(a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.

(b) Variable rate security. Rate shown is as of report date.

(c)When-issued security. Unsettled when-issued transactions were as follows:

	Unrealized			
Counterparty	Value	Appreciation		
Credit Suisse Group AG	\$323,050			

(d)Non-income producing security.

(e)Convertible security.

(f)Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.

(g) Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.

(h)Represents a payment-in-kind security which may pay interest/dividends in additional par/shares.

(i) Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.

(j) Amount is less than \$500.

Warrants entitle the Fund to purchase a predetermined number of shares of common stock and are non-income (k)producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.

See Notes to Financial Statements.

Consolidated Schedule of Investments (continued) BlackRock Diversified Income Strategies Fund, Inc. (DVF)

Investments in issuers considered to be an affiliate of the Fund during the year ended August 31, 2012, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

	Shares Held at	Net	Shares Held at	
Affiliate	August 31, 2011	Activity	August 31, 2012	Income
BlackRock Liquidity				
Funds, TempFund,				
Institutional Class		1,177,221	1,177,221	\$588

(m) Represents the current yield as of report date.

Foreign currency exchange contracts as of August 31, 2012 were as follows:

Currency	Currency		Settlement	Unrealized
Purchased	Sold	Counterparty	Date	Depreciation
USD 62,671	GBP 40,000	Citigroup, Inc.	10/17/12	\$ (834)
USD 975,680	GBP 628,500	UBS AG	10/17/12	(22,138)
USD 2,900,716	EUR 2,366,000	Citigroup, Inc.	10/22/12	(76,773)
Total				\$ (99,745)

Credit default swaps on traded indexes buy protection outstanding as of August 31, 2012 were as follows:

Index	Pay Fixed Rate	Counterparty	Expiration Date	Notional Amount (000)	Unrealized Depreciation
Dow Jones CDX North America High Yield Index Series 18, Version 2	5.00%	JPMorgan Chase & Co.	6/20/1	7 USD 1,733	\$(70,339)

For Fund compliance purposes, the Fund s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by Fund management. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instrument. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities,

prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs) Level3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instrument)

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instrument is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund s investments and derivative financial instrument categorized in the disclosure hierarchy as of August 31, 2012:

	Level 1	Level 2	Level 3	Total
Assets:				
Investments:				
Long-Term Investments:				
Asset-Backed				
Securities			\$3,044,762	\$3,044,762

Securities	1,177,221			1,177,221
Total	\$2,306,432	\$177,574,117	\$18,523,431	\$198,403,980

	Level 1	Level 2	Level 3	Total
Derivative Financial Instruments <sup>1</sup>				
Liabilities:				
Foreign currency				
exchange				
contracts		\$(99,745)		\$(99,745)
Credit				
contracts		(70,339)		(70,339)
Total		\$(170,084)		\$(170,084)

Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and <sup>1</sup>options. Swaps, financial futures contracts and foreign currency exchange contracts are valued at the unrealized appreciation/depreciation on the instrument and options are shown at value.

Certain of the Fund s assets and liabilities are held at carrying amount, which approximates fair value for financial statement purposes. As of August 31, 2012 such assets and liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
Assets:	¢ 22.052			¢ 22.052
Cash	\$23,952			\$23,952
Foreign currency				
at value	29,476			29,476

Total	\$53,428	\$(60,000,000)	—	\$(59,946,572)

There were no transfers between Level 1 and Level 2 during the year ended August 31, 2012.

See Notes to Financial Statements.

#### Consolidated Schedule of Investments (concluded) BlackRock Diversified Income Strategies Fund, Inc. (DVF)

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Fund s Level 3 investments as of August 31, 2012:

Assets:	Value	Valuation Techniques	Unobservable Inputs <sup>1</sup>	Range of Unobservable Inputs	Weighted Average of Unobservable Inputs <sup>2</sup>
Common					
Stocks	\$1,128,312	Market Comparable Companies	EBITDA Multiple	5.9x	5.9x
			Forward EBITDA Multiple	4.6x	4.6x
Floating					
Rate Loan					
Interests	1,542,193	Market Comparable Companies	Yield	9.65%	9.65%
		Cost	N/A <sup>3</sup>		
Other					
Interests. Total <sup>4</sup>	1,633,649 \$4,304,154	Market Comparable Companies	Tangible Book Value Multiple	1.44x	1.44x

<sup>1</sup>A change to the unobservable input may result in a significant change to the value of the investment as follows:

	Impact to	
Unobservable Input	Value if Input Increases	Value if Input Decreases
EBITDA Multiple	Increase	Decrease
Forward EBITDA Multiple	Increase	Decrease
Tangible Book Value Multiple	Increase	Decrease
Yield	Decrease	Increase

<sup>2</sup>Unobservable inputs are weighted based on the value of the investments included in the range.

The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are

<sup>3</sup>reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Fund.

Does not include Level 3 investments with values derived utilizing prices from recent prior transactions or third party pricing information without adjustment for which such inputs are unobservable. See above valuation input table for values of such Level 3 investments. A significant change in third party pricing information could result in a significantly lower or higher value in such Level 3 investments.

# Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSR

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backec	l Common	Corporate	Floating Rate Loan	Other	
	Securities	Stocks	Bonds	Interests	Interests	Warrants 7
Assets:						
Opening balance, as of August 31, 2011	\$2,753,115	\$1,701,248	\$1,621,040	\$12,355,482	\$2,550,707	\$7 5
Transfers into Level 3 <sup>5</sup>		3		812,985		—
Transfers out of Level 3 <sup>6</sup>				(6,717,669)		—
Accrued discounts/premiums	38,599		2,251	25,434		—
Net realized gain (loss)	(48,393)	(523,489)	(2,483,821)	20,906	553,993	(107,610)
Net change in unrealized appreciation/depreciation <sup>7</sup> .	97,411	(178,802)	2,536,709	223,641	339,443	107,603
Purchases	2,575,485	136,539		5,994,593		
Sales	(2,371,455)	(7,182)	(1,501,459)	(902,131)	(1,081,752)	
Closing Balance, as of August 31, 2012	\$3,044,762	\$1,128,317	\$174,720	\$11,813,241	\$2,362,391	

As of August 31, 2011, the Fund used observable inputs in determining the value of certain investments. As of  $_5$  August 31, 2012, the Fund used significant unobservable inputs in determining the value on the same investments.

As a result, investments with a beginning of year value of \$812,988 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2011, the Fund used significant unobservable inputs in determining the value of certain investments. As of August 31, 2012, the Fund used observable inputs in determining the value on the same investments. As a result, investments with a beginning of year value of \$6,717,669 transferred from Level 3 to Level

2 in the disclosure hierarchy.

<sup>7</sup>Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations. The change in unrealized appreciation/depreciation on securities still held as of August 31, 2012 was \$647,964. See Notes to Financial Statements.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instrument. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets and liabilities See Notes to Financial Statements.

### Consolidated Schedule of Investments (continued) BlackRock Floating Rate Income Strategies Fund, Inc. (FRA)

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs) Level3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Fund s own assumptions used in determining the fair value of investments and derivative financial instrument)

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Fund s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The categorization of a value determined for investments and derivative financial instrument is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Fund s policy regarding valuation of investments and derivative financial instruments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following tables summarize the Fund s investments and derivative financial instrument categorized in the disclosure hierarchy as of August 31, 2012:

	Level 1	Level 2	Level 3	Total

Total	\$77,295	\$(117,000,000)		\$(116,922,705)

There were no transfers between levels during the year ended August 31, 2012.

See Notes to Financial Statements.

#### Consolidated Schedule of Investments (concluded) BlackRock Floating Rate Income Strategies Fund, Inc. (FRA)

The following table summarizes the valuation techniques used and unobservable inputs developed by the Global Valuation Committee to determine the value of certain of the Fund s Level 3 investments as of August 31, 2012:

Assets:	Value	Valuation Techniques	Unobservable Inputs <sup>1</sup>	Range of Unobservable Inputs	Weighted Average o Unobserv Inputs <sup>2</sup>
Common Stocks	\$ 6,034	Market Comparable Companies	EBITDA Multiple	5.0x	5.0x
			Illiquidity Discount	20%	20%
			Proforma Revenue Increase	37%	37%
Corporate Bonds	2,015,774	Market Comparable Companies	EBITDA Multiple	5.0x	5.0x
			Illiquidity Discount	20%	20%
			Proforma Revenue Increase	37%	37%
Floating Rate Loan Interests	4,420,404	Market Comparable Companies	Illiquidity Discount	50%	50%
			Yield	9.65%	9.65%
		Cost	N/A <sup>3</sup>		
Total <sup>4</sup>	\$6,442,212	2			

<sup>1</sup>A change to the unobservable input may result in a significant change to the value of the investment as follows:

	Impact to	Impact to		
Unobservable Input	Value if Input Increases	Value if Input Decreases		
EBITDA Multiple	Increase	Decrease		
Illiquidity Discount.	Decrease	Increase		
Proforma Revenue Increase	Increase	Decrease		
Yield	Decrease	Increase		

<sup>2</sup>Unobservable inputs are weighted based on the value of the investments included in the range.

The Fund fair values certain of its Level 3 investments using prior transaction prices (acquisition cost), although the transaction may not have occurred during the current reporting period. In such cases, these investments are generally privately held investments. There may not be a secondary market, and/or there are a limited number of investors. The determination to fair value such investments at cost is based upon factors consistent with the principles of fair value measurement that are reasonably available to the Global Valuation Committee, or its delegate. Valuations are

<sup>3</sup>reviewed utilizing available market information to determine if the carrying value should be adjusted. Such market data may include, but is not limited to, observations of the trading multiples of public companies considered comparable to the private companies being valued, financial or operational information released by the company, and/or news or corporate events that affect the investment. Valuations may be adjusted to account for company-specific issues, the lack of liquidity inherent in a nonpublic investment and the fact that comparable public companies are not identical to the investments being fair valued by the Fund.

Does not include Level 3 investments with values derived utilizing prices from recent prior transactions or third party pricing information without adjustment for which such inputs are unobservable. See above valuation input table for values of such Level 3 investments. A significant change in third party pricing information could result in a significantly lower or higher value in such Level 3 investments.

# Edgar Filing: BLACKROCK LTD DURATION INCOME TRUST - Form N-CSR

A reconciliation of Level 3 investments is presented when the Fund had a significant amount of Level 3 investments at the beginning and/or end of the year in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Asset-Backed	Common	Corporate	Floating Rate	Other	
	ASSU-Dacker		Corporate	Loan	Ould	
	Securities	Stocks	Bonds	Interests	Interests	Total
Assets:						
Opening balance, as of August 31, 2011	\$7,328,370	\$191,645	\$2,293,544	\$23,078,475	\$742,860	\$33,634,894
Transfers into Level 3 <sup>5</sup>	—			3,624,442		3,624,442
Transfers out of Level 3 <sup>6</sup>	—			(12,473,405)		(12,473,40
Accrued discounts/premiums	102,532		82,157	120,872		305,561
Net realized gain (loss)	(113,969)	(1,361,242)	(4,362,357)	40,452		(5,797,116
Net change in unrealized appreciation/depreciation <sup>7</sup>	369,528	1,177,556	4,597,146	(561,315)	92,905	5,675,820
Purchases	5,001,366		143,230	11,197,600		16,342,196
Sales	(5,644,185)	(1,925)	(398,516)	(1,846,602)		(7,891,228
Closing Balance, as of August 31, 2012.	\$7,043,642	\$6,034	\$2,355,204	\$23,180,519	\$835,765	\$33,421,164

As of August 31, 2011, the Fund used observable inputs in determining the value of certain investments. As of  $_{5}$  August 31, 2012, the Fund used significant unobservable inputs in determining the value on the same investments.

August 51, 2012, the Fund used significant unobservable inputs in determining the value of the same investments As a result, investments with a beginning of year value of \$3,624,442 transferred from Level 2 to Level 3 in the disclosure hierarchy.

As of August 31, 2011, the Fund used significant unobservable inputs in determining the value of certain investments. As of August 31, 2012, the Fund used observable inputs in determining the value on the same <sup>6</sup> investments. As a result, investments with a beginning of year value of \$12,473,405 transferred from Level 3 to

Level 2 in the disclosure hierarchy.

<sup>7</sup>The change in unrealized appreciation/depreciation on investments still held as of August 31, 2012 was \$(162,162). See Notes to Financial Statements.
