2SEMI-ANNUAL REPORT FEBRUARY 28, 2014	

Dear Shareholder

One year ago, US financial markets were improving despite a sluggish global economy, as easy monetary policy gave investors enough conviction to take on more risk in their portfolios. Slow but positive growth in the US was sufficient to support corporate earnings, while uncomfortably high unemployment reinforced expectations that the Federal Reserve would continue its aggressive monetary stimulus programs. International markets were more volatile given uneven growth rates and more direct exposure to macro risks such as the banking crisis in Cyprus and a generally poor outlook for European economies. Emerging markets significantly lagged the rest of the world amid fears over slowing growth and debt problems.

Global financial markets were rattled in May when then-Fed Chairman Bernanke mentioned the possibility of reducing (or tapering) the central bank is asset purchase programs comments that were widely misinterpreted as signaling an end to the Fed is zero-interest-rate policy. US Treasury yields rose sharply, triggering a steep sell-off across fixed income markets. (Bond prices move in the opposite direction of yields.) Equity prices also suffered as investors feared the implications of a potential end of a program that had greatly supported the markets. Markets rebounded in late June, however, when the Fed is tone turned more dovish, and improving economic indicators and better corporate earnings helped extend gains through most of the summer.

Although autumn brought mixed events, it was a surprisingly positive period for most asset classes. Early on, the Fed defied market expectations with its decision to delay tapering, but higher volatility returned in late September when the US Treasury Department warned that the national debt would soon breach its statutory maximum. The ensuing political brinksmanship led to a partial government shutdown, roiling global financial markets through the first half of October. Equities and other so-called risk assets managed to resume their rally when politicians engineered a compromise to reopen the government and extend the debt ceiling, at least temporarily.

The remainder of 2013 was generally positive for stock markets in the developed world, although investors continued to grapple with uncertainty about when and how much the Fed would scale back on stimulus. When the long-awaited taper announcement ultimately came in mid-December, the Fed reduced the amount of its monthly asset purchases but at the same time reaffirmed its commitment to maintaining low short-term interest rates. Markets reacted positively, as the taper signaled the Fed s perception of real improvement in the economy, and investors were finally relieved from the anxiety that had gripped them for quite some time.

The start of the new year brought another turn in sentiment, as heightened volatility in emerging markets and mixed US economic data caused global equities to weaken in January while bond markets found renewed strength. Although these headwinds persisted, equities were back on the rise in February thanks to positive developments in Washington, DC. For one, Congress extended the nation s debt ceiling through mid-March 2015, thereby reducing some degree of fiscal uncertainty for the next year. Additionally, investors were encouraged by market-friendly comments in new Fed Chair Janet Yellen s Congressional testimony, giving further assurance that short-term rates would remain low for a prolonged period.

While accommodative monetary policy was the main driver behind positive market performance over the period, it was also a key cause of investor uncertainty. Developed market stocks were the strongest performers for the six- and 12-month periods ended February 28. In contrast, emerging markets were weighed down by uneven growth, high levels of debt and severe currency weakness, in addition to the broader concern about reduced global liquidity. The anticipation of Fed tapering during 2013 pressured US Treasury bonds and other high-quality fixed income sectors, including tax-exempt municipals and investment grade corporate bonds. High yield bonds, to the contrary, benefited from income-oriented investors—search for yield in the low-rate environment. Short-term interest rates remained near zero, keeping yields on money market securities close to historic lows.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to move freely as market conditions change over time. We encourage you to talk with your financial advisor and visit **www.blackrock.com** for further insight about investing in today s world.

Sincerely,

Rob Kapito

President, BlackRock Advisors, LLC

Trust Summary as of February 28, 2014 **Trust Overview**

BlackRock Core Bond Trust

BlackRock Core Bond Trust s (BHK) (the Trust) investment objective is to provide current income and capital appreciation. The Trust seeks to achieve its investment objective by investing at least 75% of its assets in bonds that are investment grade quality at the time of investment. The Trust s investments will include a broad range of bonds, including corporate bonds, US government and agency securities and mortgage-related securities. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2014, the Trust returned 10.82% based on market price and 8.32% based on NAV. For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 9.61% based on market price and 6.45% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Fixed income markets experienced a rally over the six-month period that was only temporarily suspended at the beginning of 2014 due to investors—concern over softening US economic data, which appeared to be mostly driven by unusually harsh weather conditions. In addition, certain risk assets, including emerging market debt, were negatively impacted by the tightening of global liquidity as the Fed continued to reduce the size of its asset purchase program. The largest contributors to the Trust—s performance were positions in corporate credit, specifically high yield and capital securities, as well as commercial mortgage-backed securities (CMBS). The Trust—s exposure to asset-backed securities (ABS) and, to a lesser extent, sovereign-related debt had a positive impact on returns. Based on the view that short-term rates would remain low, the Fund maintained its leverage to augment income

Conversely, the Trust s holdings of US Treasury securities detracted from performance as interest rates increased (bond prices fall as rates rise) toward the end of 2013 amid anticipation that the Fed would soon begin reducing its asset purchase program. The Trust s long duration bias (greater sensitivity to interest rate movements) and yield curve positioning hindered results for the period.

Describe recent portfolio activity.

generation throughout the period.

The Trust s allocations remained consistent throughout the six-month period, with its largest position in investment grade and high yield corporate credit, followed by allocations to securitized credits, specifically, ABS and CMBS. **Describe portfolio positioning at period end.**

At period end, the Trust maintained diversified exposure to non-government spread sectors including investment grade credit, high yield credit, CMBS, ABS and non-agency residential mortgage-backed securities (MBS). The Trust also held exposure to government-related sectors including US Treasury securities, agency debt and agency MBS. The Trust ended the period with a long duration profile.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

SEMI-ANNUAL REPORT FEBRUARY 28, 2014 5

Trust Summary as of February 28, 2014 **Trust Overview**

BlackRock Corporate High Yield Fund, Inc.

BlackRock Corporate High Yield Fund, Inc. s (HYT) (the Trust) primary investment objective is to provide shareholders with current income. The Trust secondary investment objective is to provide shareholders with capital appreciation. The Trust seeks to achieve its objectives by investing, under normal market conditions, at least 80% of its assets in domestic and foreign high yield securities, including high yield bonds (commonly referred to as junk bonds), corporate loans, convertible debt securities and preferred securities which are below investment grade quality. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objectives will be achieved.

Portfolio Management Commentary

On June 5, 2013, the Board of Directors of the Trust approved separate plans of reorganization whereby the Trust would acquire all of the assets and assume all of the liabilities of BlackRock Corporate High Yield Fund, Inc. (COY), BlackRock Corporate High Yield Fund V, Inc. (HYV), BlackRock High Income Shares (HIS) and BlackRock High Yield Trust (BHY) (each a Target Fund) in exchange for newly issued shares of the Trust in a reorganization transaction. At a shareholder meeting on October 11, 2013, each Target Fund s shareholders approved their respective plan of reorganization and the Trust s shareholders approved the issuance of Trust shares in connection with each reorganization. The reorganizations took place on November 18, 2013. On February 28, 2014, the Trust changed its name from BlackRock Corporate High Yield Fund VI, Inc. to BlackRock Corporate High Yield Fund, Inc.

How did the Trust perform?

For the six-month period ended February 28, 2014, the Trust returned 15.24% based on market price and 11.46% based on NAV. For the same period, the closed-end Lipper High Yield Funds (Leveraged) category posted an average return of 12.50% based on market price and 10.48% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV. What factors influenced performance?

The Trust benefited from a tactical allocation to equities that were selected for their total return characteristics versus lower-quality bonds, which tend to exhibit more equity-like risks. In particular, equity positions in General Motors Co., The Goodyear Tire & Rubber Co. and American Capital Ltd. were notable contributors. Also adding to performance was security selection within floating rate loan interests, which the Trust purchased as an alternative to higher-quality, short-dated high yield bonds. Although the bank loan sector underperformed high yield during the period, the Trust benefited from idiosyncratic risk associated with holdings of select loan names in the gaming and lodging industries.

Detracting from performance was the Trust s exposure to names in the electric and metals & mining industries. Additionally, positions in put options for the purpose of managing equity market risk had a negative impact on returns as the equity market rally persisted during the period.

Describe recent portfolio activity.

The Trust actively managed risk throughout the six-month period. We generally shifted to more moderate risk positions by the end of the period as the overall risk-reward profile of the market, specifically in high yield, continued to shift away from the cheap prices of the last few years. Broadly speaking, the Trust s investment decisions were focused on individual credits or issuers, rather than sub-sectors. The Trust s core credit positioning continued to focus on income-oriented names with good earnings visibility and strong asset protection. These positions largely represent the income component of the Trust, although there were also cases where a specific catalyst or idiosyncratic characteristic enhanced the credit s attractiveness. The Trust maintained a bias toward credits with shorter duration

(lower sensitivity to interest rate movements) and expressed this view through holdings in bank loans as well as other non-bond assets. The Trust also held exposure to equities and equity-like instruments while managing equity market risk through the use of put options.

Describe portfolio positioning at period end.

At period end, the Trust held 75% of its total portfolio in corporate bonds, 13% in floating rate loan interests (bank loans) and 9% in common stocks, with the remainder invested in preferred securities and asset-backed securities. The Trust s highest-conviction holdings included HD Supply, Inc. (building materials), American Capital Ltd. (non-captive diversified financials) and Ally Financial, Inc. (banking).

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2014, the Trust returned 11.69% based on market price and 8.54% based on NAV. For the same period, the closed-end Lipper Corporate BBB-Rated Debt Funds (Leveraged) category posted an average return of 9.61% based on market price and 6.45% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

What factors influenced performance?

Fixed income markets experienced a rally over the six-month period that was only temporarily suspended at the beginning of 2014 due to investors—concern over softening US economic data, which appeared to be mostly driven by unusually harsh weather conditions. In addition, certain risk assets, including emerging market debt, were negatively impacted by the tightening of global liquidity as the Fed continued to reduce the size of its asset purchase program. The Trust benefited from the generally positive market environment, with positions in high yield and investment grade corporate credit being the largest contributors to returns. Exposure to securitized assets, including asset-backed securities (ABS) and commercial mortgage-backed securities (CMBS) also had a positive impact on performance. Positions in sovereign-related debt enhanced results for the period.

Based on the view that short-term rates would remain low, the Trust maintained its leverage to augment income generation throughout the period.

Conversely, the Trust s holdings of US Treasury securities detracted from performance as interest rates increased (bond prices fall as rates rise) toward the end of 2013 amid anticipation that the Fed would soon begin reducing its asset purchase program. Exposure to emerging market debt generated negative returns as these assets experienced heavy selling pressure amid tighter liquidity conditions in the US. The Trust s long duration bias (greater sensitivity to interest rate movements) and yield curve positioning hindered results for the period.

Describe recent portfolio activity.

The Trust s allocations remained consistent throughout the six-month period, with its largest position in investment grade and high yield corporate credit, followed by allocations to securitized credits, specifically, ABS and CMBS. **Describe portfolio positioning at period end.**

At period end, the Trust maintained diversified exposure to non-government spread sectors including investment grade credit, high yield credit, CMBS, ABS and non-agency residential mortgage-backed securities (MBS). Trust Summary as of February 28, 2014

BlackRock Income Trust, Inc.

Trust Overview

BlackRock Income Trust, Inc. s (BKT) (the Trust) investment objective is to manage a portfolio of high-quality securities to achieve both preservation of capital and high monthly income. The Trust seeks to achieve its investment objective by investing at least 65% of its assets in mortgage-backed securities. The Trust invests at least 80% of its assets in securities that are (i) issued or guaranteed by the US government or one of its agencies or instrumentalities or (ii) rated at the time of investment either AAA by S&P or Aaa by Moody s. The Trust may invest directly in such securities or synthetically through the use of derivatives.

No assurance can be given that the Trust s investment objective will be achieved.

Portfolio Management Commentary

How did the Trust perform?

For the six-month period ended February 28, 2014, the Trust returned 6.66% based on market price and 3.29% based on NAV. For the same period, the closed-end Lipper US Mortgage Funds category posted an average return of 10.37% based on market price and 6.88% based on NAV. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The following discussion relates to performance based on NAV.

Fixed income markets experienced a rally over the six-month period that was only temporarily suspended at the beginning of 2014 due to investors—concern over softening US economic data, which appeared to be mostly driven by unusually harsh weather conditions. In addition, certain risk assets, including emerging market debt, were negatively impacted by the tightening of global liquidity as the Fed continued to reduce the size of its asset purchase program. Contributing positively to the Trust—s performance was exposure to securitized assets, specifically, agency collateralized mortgage obligations (CMOs) and agency mortgage derivatives (including interest-only and principal-only securities). The Trust also benefited from exposure to Alt-A (riskier than prime, but less risky than subprime) and prime non-agency residential mortgage-backed securities (MBS) as well as commercial mortgage-backed securities (CMBS) as spreads tightened through most of the period.

Conversely, the Trust sholdings of US Treasury securities detracted from performance as interest rates increased toward the end of 2013 amid anticipation that the Fed would soon begin reducing its asset purchase program. Additionally, the Trust s low exposure to 15- and 30-year agency pass-through mortgage-backed securities (MBS) represented a missed opportunity as these issues performed well during the period.

The Trust uses interest rate derivatives including futures, options, swaps and swaptions, mainly for the purpose of managing duration (sensitivity to interest rate movements), convexity and yield curve positioning. During the period, the Trust held short positions on US Treasuries in order to manage the duration profile of the portfolio. These positions were beneficial to the Trust s performance during certain periods of rising interest rates; however, for the six-month period as a whole, the Trust s derivatives holdings had a negative impact on returns.

Describe recent portfolio activity.

During the six-month period, the Trust increased overall exposure to agency MBS. Within agency MBS, the Trust reduced exposure to 30-year pass-through issues in favor of agency CMO securities exhibiting attractive spreads, strong income and a low risk profile.

Describe portfolio positioning at period end.

As of period end, the Trust maintained exposure to high quality agency MBS with varying maturities and coupon rates. The Trust continued to favor agency CMOs while holding low exposure to 15- and 30-year agency pass-through issues. The Trust also held small allocations to asset-backed securities, non-agency MBS and CMBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and net asset value (NAV) of their common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which will be based on short-term interest rates, will normally be lower than the income earned by a Trust on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trust s shareholders will benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust s financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with the proceeds from leverage earn income based on longer-term interest rates. In this case, the Trust s costs of leverage are significantly lower than the income earned on the Trust s longer-term investments acquired from leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit Common Shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed the Trust's return on assets purchased with leverage proceeds, income to shareholders will be lower than if the Trust had not used leverage. Furthermore, the value of the Trust's portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Trust's obligations under its leverage arrangement generally does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust's NAVs positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that a Trust's intended leveraging strategy will be successful.

Leverage also will generally cause greater changes in the Trusts NAVs, market prices and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the net asset value and market price of a Trust s Common Shares than if the Trust were not leveraged. In addition, the Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trust to incur losses. The use of leverage may limit the Trust s ability to invest in certain types of securities or use certain types of hedging strategies. The Trust will incur expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares

Each Trust may utilize leverage through a credit facility or reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Trust is permitted to issue debt up to 33% of their total managed assets. A Trust may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act. In addition, a Trust may also be subject to certain asset coverage, leverage or portfolio composition requirements imposed by its credit facility, which may be more stringent than those imposed by the 1940 Act.

Derivative Financial Instruments

The Trusts may invest in various derivative financial instruments, including financial futures contracts, foreign currency exchange contracts, options and swaps, as specified in Note 4 of the Notes to Financial Statements, which may constitute forms of economic leverage. Such derivative financial instruments are used to obtain exposure to a security, index and/or market without owning or taking physical custody of securities or to hedge market, equity, credit, interest rate, foreign currency exchange rate and/or other risks. Derivative financial instruments involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the derivative financial instrument. The Trusts ability to use a derivative financial instrument successfully depends on the investment advisor s ability to predict pertinent market movements accurately, which cannot be assured. The use of derivative financial instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio investments at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment, may result in lower dividends paid to shareholders and/or may cause a Trust to hold an investment that it might otherwise sell. The Trusts investments in these

instruments are discussed in detail in the Notes to Financial Statements.

¹ Using S&P s rating of the issuer.

Fair Value Measurements Various inputs are used in determining the fair value of investments and derivative financial instruments. These inputs to valuation techniques are categorized into a disclosure hierarchy consisting of three broad levels for financial statement purposes as follows:

Level 1 unadjusted price quotations in active markets/exchanges for identical assets or liabilities that the Trust has the ability to access

Level 2 other observable inputs (including, but not limited to, quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments and derivative financial instruments)

The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). Accordingly, the degree of judgment exercised in determining fair value is greatest for instruments categorized in Level 3. The inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the fair value hierarchy classification is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

Changes in valuation techniques may result in transfers into or out of an assigned level within the disclosure hierarchy. In accordance with the Trust s policy, transfers between different levels of the fair value disclosure hierarchy are deemed to have occurred as of the beginning of the reporting period. The

² The maximum potential amount the Trust may pay should a negative credit event take place as defined under the terms of the agreement.

categorization of a value determined for investments and derivative financial instruments is based on the pricing transparency of the investment and derivative financial instrument and is not necessarily an indication of the risks associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and derivative financial instruments, please refer to Note 2 of the Notes to Financial Statements.

The following tables summarize the Trust s investments and derivative financial instruments categorized in the disclosure hierarchy as of February 28, 2014:

·	Le	vel 1	Leve	12		Level 3		Total

³ Derivative financial instruments are swaps, financial futures contracts, foreign currency exchange contracts and options written. Swaps, financial futures contracts and foreign currency exchange contracts

are valued at the unrealized appreciation/depreciation on the instrument and options written are shown at value.

See Notes to Financial Statements.

24 SEMI-ANNUAL REPORT FEBRUARY 28, 2014

BlackRock Core Bond Trust (BHK)

Schedule of Investments (concluded)

The carrying amount for certain of the Trust s assets and/or liabilities approximates fair value for financial statement purposes. As of February 28, 2014, such assets and/or liabilities are categorized within the disclosure hierarchy as follows:

	Level 1	Level 2	Level 3	Total
Assets:				
Cash	\$ 119,353			\$ 119,353
Foreign currency at value	9,163			9,163
Cash pledged as collateral				
for over-the-counter swaps	1,400,000			1,400,000
Cash pledged as collateral				
for reverse repurchase				
agreements	4,800,000			4,800,000
Cash pledged for centrally				
cleared swaps	1,475,000			1,475,000
Cash pledged for financial				
futures contracts	532,000			532,000
Liabilities:				
Reverse repurchase				
agreements		\$(166,332,986)		(166,332,986)
Total	\$ 8,335,516	\$(166,332,986)		\$(157,997,470)

There were no transfers between Level 1 and Level 2 during the six months ended February 28, 2014.

A reconciliation of Level 3 investments is presented when the Trust had a significant amount of Level 3 investments at the beginning and/or end of the period in relation to net assets. The following table is a reconciliation of Level 3 investments for which significant unobservable inputs were used in determining fair value:

	Common Stocks	sset-Backed Securities	(Corporate Bonds	Total
s:					
ng Balance, as of August 31, 2013 ers into Level 3	\$ 137,600	\$ 10,951,144	\$	6,284,125	\$ 17,372,
ers out of Level 31		(5,933,960)			(5,933,
ed discounts/premiums		(152,007)			(152,
alized gain (loss)		26,459			26,
ange in unrealized appreciation/depreciation ^{2,3}	5,160	121,778		76,000	202,
ases	-	•		-	-
		(1,976,553)			(1,976,
ng Balance, as of February 28, 2014 ange in unrealized appreciation/depreciation on	\$ 142,760	\$ 3,036,861	\$	6,360,125	\$ 9,539,
ments still held at February 28, 2014 ³	\$ 5,160	\$ 131,518	\$	76,000	\$ 212,

¹ As of August 31, 2013, the Trust used significant unobservable inputs in determining the value of certain investments. As of February 28, 2014, the Trust used observable inputs in determining the value of the

same investments. As a result, investments with a beginning of period value of \$5,933,960 transferred from Level 3 to Level 2 in the disclosure hierarchy.

- ² Included in the related net change in unrealized appreciation/depreciation in the Statements of Operations.
- ³ Any difference between Net change in unrealized appreciation/depreciation and Net change in unrealized appreciation/depreciation on investments still held at February 28, 2014 is generally due to investments no longer held or categorized as Level 3 at period end.

The Trust s investments that are categorized as Level 3 were valued utilizing third party pricing information without adjustment. Such valuations are based on unobservable inputs. A significant change in third party information inputs could result in a significantly lower or higher value of such Level 3 investments.

See Notes to Financial Statements.

Total Investments (Cost \$2,261,219,387) 138.5%

Liabilities in Excess of Other Assets (38.5)%

- (a) Non-income producing security.
- (b) Represents a payment-in-kind security which may pay interest/dividends in additional par/shares and/or in cash. Rates shown are the current rate and possible payment rates.
- (c) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (d) Variable rate security. Rate shown is as of report date.
- (e) Convertible security.

(Cost \$38,133) 0.0%

Net Assets 100.0%

- (f) Zero-coupon bond.
- (g) Security is perpetual in nature and has no stated maturity date.
- (h) When-issued security. Unsettled when-issued transactions were as follows:

Counterparty	Value	Unrealized Appreciation
Bank of America N.A.	\$ 742,775	\$12,775

2,354,271,781

\$1,699,996,803

(654,274,978)

Barclays Capital, Inc.	\$1,203,528	\$23,528
Goldman Sachs & Co.	\$ 643,180	\$18,026
Jefferies LLC	\$2,544,100	\$74,100

- All or a portion of security has been pledged as collateral in connection with outstanding swaps.
- Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- Issuer filed for bankruptcy and/or is in default of principal and/or interest payments.
- Other interests represent beneficial interests in liquidation trusts and other reorganization or private entities.
- Warrants entitle the Trust to purchase a predetermined number of shares of common stock and are (m) non-income producing. The purchase price and number of shares are subject to adjustment under certain conditions until the expiration date, if any.
- Investments in issuers considered to be an affiliate of the Trust during the six months ended February 28, 2014, for purposes of Section 2(a)(3) of the 1940 Act, were as follows:

Affiliate	Shares Held at August 31\$ha 2013 Purch	ires Shares nased Sold	Shares Held at February 28, 2014	Value at February 28, 2014	Income	Realized Gain
BlackRock Liquidity Funds, TempFund, Institutional Class iShares MSCI EAFE ETF ²	1,737,587 18,790	(1,580,374) ¹ (18,790)	157,213	\$157,213	\$634	\$61,883
Represents net shares sold.	t as of report					

No longer held by the Trust as of report date.

(o) Represents the current yield as of report date.

For Trust compliance purposes, the Trust s industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment advisor. These definitions may not apply for purposes of this report, which may combine such industry sub-classifications for reporting ease.
