Notes to Consolidated Financial Statements

June 30, 2013

(Unaudited)

Note 1. Summary of Significant Accounting Policies

Certain information and note disclosures normally included in the unaudited consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles ("GAAP") have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Stewardship Financial Corporation Annual Report on Form 10-K for the fiscal year ended December 31, 2012, filed with the SEC on March 28, 2013 (the "2012 Annual Report").

The interim unaudited consolidated financial statements included herein have been prepared in accordance with instructions for Form 10-Q and the rules and regulations of the SEC and, therefore, do not include information or footnotes necessary for a complete presentation of consolidated financial condition, results of operations, and cash flows in conformity with GAAP. However, all adjustments, consisting only of normal recurring adjustments, which in the opinion of management are necessary for a fair presentation of the interim consolidated financial statements, have been included. The results of operations for the three and six months ended June 30, 2013 are not necessarily indicative of the results which may be expected for the entire year.

Principles of consolidation

The consolidated financial statements include the accounts of Stewardship Financial Corporation and its wholly-owned subsidiary, Atlantic Stewardship Bank (the "Bank"), together referred to as "the Corporation". The Bank includes its wholly-owned subsidiaries, Stewardship Investment Corporation, Stewardship Realty LLC, Atlantic Stewardship Insurance Company, LLC and several other subsidiaries formed to hold title to properties acquired through foreclosure or deed in lieu of foreclosure. The Bank's subsidiaries have an insignificant impact on the Bank's daily operations. All intercompany accounts and transactions have been eliminated in the consolidated financial statements. Certain prior period amounts have been reclassified to conform to the current presentation.

The consolidated financial statements of the Corporation have been prepared in conformity with GAAP. In preparing the consolidated financial statements, management is required to make estimates and assumptions, based on available

information, that affect the amounts reported in the consolidated financial statements and disclosures provided. Actual results could differ significantly from those estimates.

Material estimates

Material estimates that are particularly susceptible to significant changes relate to the determination of the allowance for loan losses. Management believes that the allowance for loan losses is adequate. While management uses available information to recognize probable incurred losses on loans, future additions to the allowance for loan losses may be necessary based on changes in economic conditions in the market area.

Adoption of New Accounting Standards

In February 2013, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2013-02, "Comprehensive Income – Reporting Amounts Reclassified Out of Accumulated Other Comprehensive Income". This ASU requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the financial statement where net income is presented or in the accompanying notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. For other amounts that are not required under GAAP to be reclassified in their entirety to net income, an entity is required to cross-reference to other disclosures required under GAAP that provide additional detail about those amounts. The standard is effective prospectively for reporting periods, including interim periods, beginning after December 15, 2012. The adoption of the standard did not have a material effect on the Corporation's consolidated financial statements.

<u>Index</u>

In December 2011, the FASB issued ASU No. 2011-11, "Balance Sheet (Topic 210): "Disclosures about Offsetting Assets and Liabilities," This ASU requires an entity to disclose both gross and net information about financial instruments, such as sales and repurchase agreements and reverse sale and repurchase agreements and securities borrowing/lending arrangements, and derivative instruments that are eligible for offset in the statement of financial position and/or subject an enforceable master netting arrangement or similar agreement regardless of whether they are presented net in the financial statements. The standard is effective for annual and interim periods beginning on January 1, 2013, and it is required to be applied retrospectively. The adoption of the standard did not have a material impact on the Corporation's consolidated financial statements.

Note 2. Securities – Available-for-sale and Held to Maturity

The fair value of the available-for-sale securities and the related gross unrealized gains and losses recognized in accumulated other comprehensive income were as follows:

	June 30, 2013 Amortized Cost	Gross Unr Gains	ealized Losses	Fair Value

While there were no cash proceeds realized from calls of securities held to maturity for the three months ended June 30, 2013, cash proceeds realized from calls of securities held to maturity for the six months ended June 30, 2013 were \$250,000. Cash proceeds realized from calls of securities held to maturity for the three and six months ended June 30, 2012 were \$2,500,000 and \$3,105,000, respectively. There were no gross gains and no gross losses realized on calls during the three and six months ended June 30, 2013. Gross gains of \$7,000 were realized on calls for both the three and six months ended June 30, 2012. There were no gross losses realized on calls during the three and six months ended June 30, 2012.

The following table presents the amortized cost and fair value of the debt securities portfolio by contractual maturity. As issuers may have the right to call or prepay obligations with or without call or prepayment premiums, the actual maturities may differ from contractual maturities. Securities not due at a single maturity date, such as mortgage-backed securities and asset-backed securities, are shown separately.

Other-Than-Temporary-Impairment

At June 30, 2013, there were no securities in a continuous loss position for 12 months or longer. The Corporation's unrealized losses are primarily due to market interest rate conditions. These securities have not been considered other than temporarily impaired as scheduled principal and interest payments have been made and management anticipates

collecting the entire principal balance as scheduled. Because the decline in fair value is attributable to changes in market conditions, and not credit quality, and because the Corporation does not have the intent to sell these securities and it is likely that it will not be required to sell the securities before their anticipated recovery, the Corporation does not consider these securities to be other-than-temporarily impaired at June 30, 2013.

<u>Index</u>

Note 3. Loans and Nonperforming Loans

At June 30, 2013 and December 31, 2012, respectively, the loan portfolio consisted of the following:

	June 30, 2013	December 31, 2012
Commercial:		
Secured by real estate	\$54,844,000	\$58,160,000
Other	28,132,000	31,254,000

Troubled Debt Restructurings

At June 30, 2013 and December 31, 2012, the Corporation had \$11.4 million and \$11.7 million, respectively, of loans whose terms have been modified in troubled debt restructurings. Of these loans, \$10.2 million and \$10.4 million were performing in accordance with their new terms at June 30, 2013 and December 31, 2012, respectively. The remaining

troubled debt restructurings are reported as nonaccrual loans. Specific reserves of \$301,000 and \$246,000 have been allocated for the troubled debt restructurings at June 30, 2013 and December 31, 2012, respectively. As of June 30, 2013 and December 31, 2012, the Corporation has committed \$120,000 and \$241,000 respectively, of additional funds to a single customer with an outstanding construction loan that is classified as a troubled debt restructuring.

In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Corporation's internal underwriting policy.

The following table presents loans, by class, that were modified as troubled debt restructurings that occurred during the three and six months ended June 30, 2013:

Index

	For the three months ended June 30,

Commercial:				
Secured by real estate	\$	\$ —	2 \$ 226,000	\$ 226,000
Other	1 17,000	17,000	1 74,000	72,000
Total troubled debt restructurings	1 \$ 17,000	\$ 17,000	3 \$ 300,000	\$ 298,000

There were no loans modified as a trouble debt restructuring during the three months ended June 30, 2013. During the six months ended June 30, 2013, the term of one loan was modified as a troubled debt restructuring. The modification of the terms of this loan represents a term out of a remaining balance on a matured loan.

For the six months ended June 30, 2013, the troubled debt restructuring described above resulted in no change to the allowance for loan losses. Charge-offs for the six months ended June 30, 2012 related to troubled debt restructurings totaled \$250,000.

A loan is considered to be in payment default once it is contractually 90 days past due under the modified terms. In the six months ended June 30, 2013, there have been no troubled debt restructured loans that have defaulted since their modification.

Credit Quality Indicators

The Corporation categorizes certain loans into risk categories based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Corporation analyzes loans individually by classifying the loans as to credit risk. This analysis includes non-homogeneous loans, such as commercial, commercial real estate and commercial construction loans. This analysis is performed at the time the loan is originated and annually thereafter. The Corporation uses the following definitions for risk ratings.

Special Mention – A Special Mention asset has potential weaknesses that deserve management's close attention, which, if left uncorrected, may result in deterioration of the repayment prospects for the asset or the Bank's credit position at some future date. Special Mention assets are not adversely classified and do not expose the Bank to sufficient risk to warrant adverse classification. While potentially weak, the borrower is currently marginally acceptable and loss of principal or interest is not presently envisioned.

Substandard – Substandard loans are inadequately protected by the current net worth and paying capacity of the borrower or by the collateral pledged, if any. Loans so classified must have a well-defined weakness or weaknesses that jeopardize the repayment and liquidation of the debt. These loans are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected.

Doubtful – A Doubtful loan has all of the weaknesses inherent in those classified as Substandard with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently known facts, conditions, and values, highly questionable or improbable. The likelihood of loss is extremely high, but because of certain important and reasonably specific factors, an estimated loss is deferred until a more exact status can be determined.

Index

Loss – A loan classified Loss is considered uncollectible and of such little value that its continuance as an asset is not warranted. This classification does not necessarily mean that an asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off a basically worthless asset even though partial recovery may be effected in the future.

Loans not meeting the criteria above that are analyzed individually as part of the above described process are considered to be pass rated loans. As of June 30, 2013 and December 31, 2012, and based on the most recent analysis performed at those times, the risk category of loans by class is as follows:

	June 30, 2013					
	Pass	Special Mention	Substandard	Doubtful	Loss Total	
Commercial: Secured by real estate Other Commercial real estate Commercial construction Total	\$44,304,000 25,729,000 223,674,000 976,000 \$294,683,000	\$5,952,000 1,259,000 14,333,000 4,445,000 \$25,989,000	\$4,588,000 1,117,000 12,091,000 — \$17,796,000	\$— 27,000 2,121,000 — \$2,148,000	\$ — \$54,844,000 — 28,132,000 — 252,219,000 — 5,421,000 \$ — \$340,616,000	
	December 31, 2012					
	Pass	Special Mention	Substandard	Doubtful	Loss Total	
Commercial: Secured by real estate	Pass \$47,524,000	•	Substandard \$3,268,000	Doubtful	Loss Total \$ — \$58,160,000	

The Corporation considers the performance of the loan portfolio and its impact on the allowance for loans losses. For residential real estate and consumer loan segments, the Corporation also evaluates credit quality based on payment activity. The following table presents the recorded investment in residential real estate and consumer loans based on payment activity as of June 30, 2013 and December 31, 2012.

Note 4. Fair Value of Financial Instruments

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

The fair values of investment securities are determined by quoted market prices, if available (Level 1). For securities where quoted prices are not available, fair values of investment securities are determined by matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs). As the Corporation is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Corporation compares the prices received from the pricing service to a secondary pricing source. The Corporation's internal price verification procedures have not historically resulted in adjustment in the prices obtained from the pricing service.

The interest rate swaps are reported at fair values obtained from brokers who utilize internal models with observable market data inputs to estimate the values of these instruments (Level 2 inputs).

The Corporation measures impairment of collateralized loans and OREO based on the estimated fair value of the collateral less estimated costs to sell the collateral, incorporating assumptions that experienced parties might use in estimating the value of such collateral (Level 3 inputs). At the time a loan or OREO is considered impaired, it is valued at the lower of cost or fair value. Generally, impaired loans carried at fair value have been partially charged-off or receive specific allocations of the allowance for loan losses. OREO is initially recorded at fair value less estimated selling costs. Subsequent adjustments to the OREO carrying value are recorded in a specific valuation allowance for OREO. For collateral dependent loans and OREO, fair value is commonly based on real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, the net book value recorded for the collateral on the borrower's financial statements, or aging reports. Collateral is then adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the borrower and borrower's business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly.

Appraisals are generally obtained to support the fair value of collateral. Appraisals for both collateral-dependent impaired loans and other real estate owned are performed by licensed appraisers whose qualifications and licenses have been reviewed and verified by the Corporation. The Corporation utilizes a third party to order appraisals and, once received, review the assumptions and approaches utilized in the appraisal as well as the resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics.

Index

Real estate appraisals typically incorporate measures such as recent sales prices for comparable properties. In addition, appraisers may make adjustments to the sales price of the comparable properties as deemed appropriate based on the age, condition or general characteristics of the subject property. Management generally applies a 12% discount to real estate appraised values to cover disposition / selling costs and to reflect the potential price reductions in the market necessary to complete an expedient transaction and to factor in the impact of the perception that a transaction being completed by a bank may result in further price reduction pressure.

Assets and Liabilities Measured on a Recurring Basis

The following methods and assumptions were used to estimate the fair value of each class of financial instrument:

Cash and cash equivalents – The carrying amount approximates fair value and is classified as Level 1.

Securities available-for-sale and held to maturity – The methods for determining fair values were described previously.

Mortgage loans held for sale – Loans in this category have been committed for sale to third party investors at the current carrying amount resulting in a Level 2 classification.

Loans, net – Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential and commercial mortgages, commercial and other installment loans. The fair value of loans is estimated by discounting cash flows using estimated market discount rates which reflect the credit and interest rate risk inherent in the loans resulting in a Level 3 classification. Fair values estimated in this manner do

not fully incorporate an exit-price approach to fair value, but instead are based on a comparison to current market rates for comparable loans.

Accrued interest receivable – The carrying amount approximates fair value.

Deposits – The fair value of deposits, with no stated maturity, such as noninterest-bearing demand deposits, savings, NOW and money market accounts, is equal to the amount payable on demand resulting in a Level 1 classification. The fair value of certificates of deposit is based on the discounted value of cash flows resulting in a Level 2 classification. The discount rate is estimated using market discount rates which reflect interest rate risk inherent in the certificates of deposit.

FHLB-NY advances – With respect to FHLB-NY borrowings, the carrying amount of the borrowings which mature in one day approximates fair value. For borrowings with a longer maturity, the fair value is based on the discounted value of cash flows. The discount rate is estimated using market discount rates which reflect the interest rate risk and credit risk inherent in the term borrowings resulting in a Level 2 classification.

Securities sold under agreements to repurchase – The carrying value approximates fair value due to the relatively short time before maturity resulting in a Level 2 classification.

Subordinated debenture – The fair value of the subordinated debenture is based on the discounted value of the cash flows. The discount rate is estimated using market rates which reflect the interest rate and credit risk inherent in the debenture resulting in a Level 3 classification.

Index

Accrued interest payable – The carrying amount approximates fair value.

Interest rate swap – The fair value of derivatives are based on valuation models using observable market data as of the measurement date (Level 2).

Commitments to extend credit – The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present credit worthiness of the counter parties. At June 30, 2013 and December 31, 2012, the fair value of such commitments were not material.

Limitations

The preceding fair value estimates were made at June 30, 2013 and December 31, 2012 based on pertinent market data and relevant information on the financial instruments. These estimates do not include any premiums or discounts that could result from an offer to sell at one time the Corporation's entire holdings of a particular financial instrument or category thereof. Since no market exists for a substantial portion of the Corporation's financial instruments, fair value estimates were necessarily based on judgments with respect to future expected loss experience, current economic conditions, risk assessments of various financial instruments, and other factors. Given the subjective nature of these estimates, the uncertainties surrounding them and the matters of significant judgment that must be applied, these fair value estimates cannot be calculated with precision. Modifications in such assumptions could meaningfully alter these estimates.

Since these fair value approximations were made solely for on- and off-balance sheet financial instruments at June 30, 2013 and December 31, 2012, no attempt was made to estimate the value of anticipated future business. Furthermore, certain tax implications related to the realization of unrealized gains and losses could have a substantial impact on these fair value estimates and have not been incorporated into the estimates.

Note 5. Earnings (Loss) Per Share

Basic earnings (loss) per share is calculated by dividing net income (loss) available to common shareholders by the weighted average number of common shares outstanding during the period. Common stock equivalents are not included in the calculation. Diluted earnings (loss) per share is computed similar to that of basic earnings (loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if all potential dilutive common shares were issued.

The following reconciles the income (loss) available to common shareholders (numerator) and the weighted average common stock outstanding (denominator) for both basic and diluted earnings (loss) per share.

	Three Months Ended June 30,		Six Months June 30,	Ended
	2013	2012	2013	2012
Net income (loss)	\$461,000	\$(324,000)	\$1,283,000	\$452,000
Dividends on preferred stock	127,000	38,000	293,000	113,000
Net income (loss) available to common stockholders	\$334,000	\$(362,000)	\$990,000	\$339,000
Weighted average shares	5,934,549	5,902,167	5,932,774	5,897,266
Effect of dilutive stock options	N/A	N/A	N/A	N/A
Total weighted average dilutive shares	5,934,549	5,902,167	5,932,774	5,897,266
Basic earnings (loss) per common share	\$0.06	\$(0.06)	\$0.17	\$0.06
Diluted earnings (loss) per common share	\$0.06	\$(0.06)	\$0.17	\$0.06

Stock options to purchase 6,754 shares of common stock were not considered in computing diluted earnings per share the three and six months ended June 30, 2013 because they were antidilutive. For the three and six months ended June 30, 2012, stock options to purchase 62,937 and 63,714 shares of common stock, respectively, were not considered in computing diluted earnings per share of common stock because they were antidilutive.

Index

Note 6. Preferred Stock

In connection with the Corporation's participation in the U.S. Department of the Treasury's Small Business Lending Fund program ("SBLF"), a \$30 billion fund established under the Small Business Jobs Act of 2010 that encourages lending to small businesses by providing capital to qualified community banks with assets of less than \$10 billion, on September 1, 2011, the Corporation issued 15,000 shares of Senior Non-Cumulative Perpetual Preferred Stock, Series B (the "Series B Preferred Shares") to the Treasury for an aggregate purchase price of \$15 million, in cash.

Using the proceeds of the issuance of the Series B Preferred Shares, the Corporation simultaneously repurchased all 10,000 shares of its Fixed Rate Cumulative Perpetual Preferred Stock, Series A, having a liquidation preference of \$1,000 per share (the "Series A Preferred Shares") previously issued under the Treasury's Troubled Assets Relief Program ("TARP") Capital Purchase Program (the "CPP") for an aggregate purchase price of \$10,022,222, in cash, including accrued but unpaid dividends through the date of repurchase.

The terms of the newly-established Series B Preferred Shares provide for a liquidation preference of \$1,000 per share and impose restrictions on the Corporation's ability to declare or pay dividends or purchase, redeem or otherwise acquire for consideration, shares of the Corporation's Common Stock and any class or series of stock of the Corporation the terms of which do not expressly provide that such class or series will rank senior or junior to the Series B Preferred Shares as to dividend rights and/or rights on liquidation, dissolution or winding up of the Corporation. Specifically, the terms provide for the payment of a non-cumulative quarterly dividend, payable in arrears, which the Corporation accrues as earned over the period that the Series B Preferred Shares are outstanding. The dividend rate can fluctuate on a quarterly basis during the first ten quarters during which the Series B Preferred Shares are outstanding, based upon changes in the level of Qualified Small Business Lending ("QSBL" as defined in the Securities Purchase Agreement) from 1% to 5% per annum and, thereafter, for the eleventh through the first half of the nineteenth dividend periods, from 1% to 7%. In general, the dividend rate decreases as the level of the Bank's QSBL increases. In the event that the Series B Preferred Shares remain outstanding for more than four and one half years, the dividend rate will be fixed at 9%. Based upon the Bank's level of OSBL over a baseline level, the dividend rate for the initial dividend period was 1%. Such dividends are not cumulative but the Corporation may only declare and pay dividends on its Common Stock (or any other equity securities junior to the Series B Preferred Stock) if it has declared and paid dividends on the Series B Preferred Shares for the current dividend period and, if, after payment of such dividend, the dollar amount of the Corporation's Tier 1 Capital would be at least 90% of the Tier 1 Capital on the date of entering into the SBLF program, excluding any subsequent net charge-offs and any redemption of the Series B Preferred Shares (the "Tier 1 Dividend Threshold"). The Tier 1 Dividend Threshold is subject to reduction, beginning on the second anniversary of the issuance and ending on the tenth anniversary, by 10% for each 1% increase in OSBL over the baseline level.

In addition, the Series B Preferred Shares are non-voting except in limited circumstances. In the event that the Corporation has not timely declared and paid dividends on the Series B Preferred Shares for six dividend periods or more, whether or not consecutive, and shares of Series B Preferred Stock with an aggregate liquidation preference of at least \$25,000,000 are still outstanding, the Treasury may designate two additional directors to be elected to the Corporation's Board of Directors. Subject to the approval of the Bank's federal banking regulator, the Federal Reserve,

the Corporation may redeem the Series B Preferred Shares at any time at the Corporation's option, at a redemption price equal to the liquidation preference per share plus the per share amount of any unpaid dividends for the then-current period through the date of the redemption. The Series B Preferred Shares are includable in Tier I capital for regulatory capital.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Note Regarding Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain "forward looking statements" with respect to Stewardship Financial Corporation (the "Corporation") within the meaning of the Private Securities Litigation Reform Act of 1995, which forward looking statements may be identified by the use of such words as "believe," "expect," "anticipate," "should," "plan," "estimate," and "potential." Examples of forward-looking statements include, but are not limited to, estimates with respect to the financial condition, results of operations and business of the Corporation that are subject to various factors which could cause actual results to differ materially from these estimates. These factors include: changes in general, economic and market conditions, legislative and regulatory conditions, or the development of an interest rate environment that adversely affects the Corporation's interest rate spread or other income anticipated from operations and investments. As used in this Form 10-Q, "we", "us" and "our" refer to the Corporation and its consolidated subsidiary, Atlantic Stewardship Bank, depending on the context.

Critical Accounting Policies and Estimates

"Management's Discussion and Analysis of Financial Condition and Results of Operations," as well as disclosures found elsewhere in this Quarterly Report on Form 10-Q, are based upon the Corporation's consolidated financial statements, which have been prepared in conformity with U.S. generally accepted accounting principles ("GAAP"). The preparation of these financial statements requires the Corporation to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. Note 1 to the Corporation's Audited Consolidated Financial Statements for the year ended December 31, 2012 included in the 2012 Annual Report contains a summary of the Corporation's significant accounting policies. Management believes the Corporation's policy with respect to the methodology for the determination of the allowance for loan losses involves a higher degree of complexity and requires management to make difficult and subjective judgments, which often require assumptions or estimates about highly uncertain matters. Changes in these judgments, assumptions or estimates could materially impact results of operations. This critical accounting policy and its application are periodically reviewed with the Audit Committee and the Board of Directors.

The allowance for loan losses is based upon management's evaluation of the adequacy of the allowance, including an assessment of known and inherent risks in the loan portfolio, giving consideration to the size and composition of the loan portfolio, actual loan loss experience, level of delinquencies, detailed analysis of individual loans for which full collectability may not be assured, the existence and estimated net realizable value of any underlying collateral and guarantees securing the loans, and current economic and market conditions. Although management uses the best information available, the level of the allowance for loan losses remains an estimate, which is subject to significant judgment and short-term change. Various regulatory agencies, as an integral part of their examination process,

periodically review the Corporation's allowance for loan losses. Such agencies may require the Corporation to make additional provisions for loan losses based upon information available to them at the time of their examination. Furthermore, the majority of the Corporation's loans are secured by real estate in the State of New Jersey. Accordingly, the collectability of a substantial portion of the carrying value of the Corporation's loan portfolio is susceptible to changes in local market conditions and may be adversely affected should real estate values decline or the northern New Jersey area experience adverse economic changes. Future adjustments to the allowance for loan losses may be necessary due to economic, operating, regulatory and other conditions beyond the Corporation's control.

Financial Condition

Total assets were relatively unchanged, increasing only \$444,000 to \$688.8 million at June 30, 2013 from \$688.4 million at December 31, 2012. Cash and cash equivalents decreased \$6.7 million to \$14.3 million at June 30, 2013 from \$21.0 million at December 31, 2012, reflecting growth in the securities portfolio. Securities available-for-sale increased \$7.0 million to \$181.7 million while securities held to maturity decreased \$1.6 million to \$28.1 million. Net loans increased \$1.5 million to \$431.4 million at June 30, 2013 compared to \$429.8 million at December 31, 2012. Increases due to new loans originated were partially offset by regular principal payments and payoffs in the first six months of fiscal year 2013 as well as a \$146,000 net increase in the allowance for loan losses. Loans held for sale totaled \$2.1 million at June 30, 2013, an increase of \$1.3 million from \$784,000 at December 31, 2012.

Deposits totaled \$592.7 million at June 30, 2013, an increase of \$2.4 million from \$590.3 million at December 31, 2012. The growth in deposits consisted of a \$21.1 million increase in noninterest-bearing accounts partially offset by an \$18.7 million decrease in interest-bearing accounts.

Index

Results of Operations

General

The Corporation reported net income of \$461,000, or \$0.06 diluted earnings per common share for the three months ended June 30, 2013, compared to a net loss of \$324,000, or a \$0.06 loss per diluted per common share for the three months ended June 30, 2012. For the six months ended June 30, 2013, the Corporation reported net income of \$1.3 million, or \$0.17 diluted earnings per common share compared to net income of \$452,000 million, or \$0.06 per diluted common share, for the comparable prior year periods.

Net Interest Income

Net interest income, on a tax equivalent basis, for the three and six months ended June 30, 2013 was \$5.8 million and \$11.8 million, respectively, compared to \$6.1 million and \$12.3 million recorded in prior year periods. The net interest rate spread and net yield on interest-earning assets for the three months ended June 30, 2013 were 3.36% and 3.55%, respectively, compared to 3.47% and 3.69% for the three months ended June 30, 2012. For the six months ended June 30, 2013, the net interest rate spread and net yield on interest-earning assets were 3.46% and 3.66%, respectively, compared to 3.47% and 3.70% for the six months ended June 30, 2012. The net interest rate spread and net yield on interest-earning assets for the current year periods reflect a decline in loan interest rates and yields on securities as well as a decline in the interest rates on deposits. The Corporation continues in its efforts to proactively manage deposit costs in an effort to mitigate the lower asset yields earned. The reduced yields on assets primarily reflect lower yields on loans as well as on investment securities, reflective of the historically low market rates in the current environment.

The following table reflects the components of the Corporation's net interest income for the three and six months ended June 30, 2013 and 2012 including: (1) average assets, liabilities and stockholders' equity based on average daily balances, (2) interest income earned on interest-earning assets and interest expense paid on interest-bearing liabilities, (3) average yields earned on interest-earning assets and average rates paid on interest-bearing liabilities, and (4) net yield on interest-earning assets. Nontaxable income from investment securities and loans is presented on a tax-equivalent basis assuming a statutory tax rate of 34% for the periods presented. This was accomplished by adjusting non-taxable income upward to make it equivalent to the level of taxable income required to earn the same amount after taxes.

Index

For the three months ended June 30, 2013, total interest income, on a tax equivalent basis, decreased \$678,000 to \$6.8 million, or 9.1%, when compared to the same prior year period. The decrease was due to both a decrease in the average balance of interest-earning assets and a decrease in yields on interest-earning assets. Total interest income on a tax equivalent basis decreased \$1.3 million to \$13.8 million for the six months ended June 30, 2013, or 8.8%, compared to the same period for 2012. Consistent with the three month period, the decrease in the current six month period is due to a decrease in the overall yield on interest-earning assets and a decrease in the average interest-earning assets. The average rate earned on interest-earning assets was 4.14% and 4.26% for the three and six months ended June 30, 2013, respectively, compared to an average rate of 4.51% and 4.55% for the three and six months ended June 30, 2012. The decline in the asset yield reflects the effect of a prolonged low interest rate environment. Average interest-earning assets decreased \$5.3 million and \$13.5 million for the three and six months ended June 30, 2013 compared to the same prior year periods. The change in average interest-earning assets primarily reflects a decrease from the comparable prior year periods in average loans, which decreased \$4.1 million and \$10.8 million for the three and six months ended June 30, 2013, respectively.

Interest paid on deposits and borrowed money decreased \$399,000 and \$860,000 for the three and six months ended June 30, 2013, respectively, compared to the same periods for 2012. The decline is due to general decreases in rates paid on deposits and borrowings coupled with decreases in average interest-bearing liabilities. For the three months ended June 30, 2013, the total cost for interest-bearing liabilities declined to 0.78% representing a 26 basis point decline when compared to the same prior year period. The cost for deposits and borrowed money decreased 28 basis points from 1.08% for the six month period ended June 30, 2012 to 0.80% for the comparable period in 2013. The average balance of total interest-bearing deposits and borrowings decreased \$27.8 million and \$31.0 million for the three and six months ended June 30, 2013, respectively, from the comparable 2012 period. Average interest-bearing deposits decreased \$18.9 million and average borrowings decreased \$8.9 million for the three months ended June 30, 2013 when compared to the same prior year period. Likewise, for the six months ended June 30, 2013 the change in interest-bearing deposits and borrowings was comprised of a \$20.7 million decrease in average interest-bearing deposits and a \$10.3 million decrease in average borrowings.

Provision for Loan Losses

The Corporation maintains an allowance for loan losses at a level considered by management to be adequate to cover the probable incurred losses associated with its loan portfolio. On an ongoing basis, management analyzes the adequacy of this allowance by considering the nature and volume of the Corporation's loan activity, financial condition of the borrower, fair market value of the underlying collateral, and changes in general market conditions. Additions to the allowance for loan losses are charged to operations in the appropriate period. Actual loan losses, net of recoveries, serve to reduce the allowance. The appropriate level of the allowance for loan losses is based on estimates, and ultimate losses may vary from current estimates.

The loan loss provision totaled \$850,000 and \$2.5 million for the three and six months ended June 30, 2013, respectively, compared to \$2.9 million and \$4.7 million for the three and six months ended June 30, 2012, respectively. Nonaccrual loans of \$14.7 million at June 30, 2013 reflected a decrease from \$18.0 million of nonaccrual loans at December 31, 2012. The allowance for loan losses related to the impaired loans increased from \$266,000 at December 31, 2012 to \$525,000 at June 30, 2013. During the six months ended June 30, 2013, the Corporation

charged off \$2.4 million of loan balances and recovered \$130,000 in previously charged off loans compared to \$4.4 million and \$52,000, respectively, during the same period in 2012.

The current period loan loss provision primarily is indicative of continuing economic conditions that have contributed to an elevated level of loan delinquencies and the softness in the real estate market. The Corporation monitors its loan portfolio and intends to continue to provide for loan loss reserves based on its ongoing periodic review of the loan portfolio, charge-off activity and general market conditions.

See "Asset Quality" section below for a summary of the allowance for loan losses and nonperforming assets.

Noninterest Income

Noninterest income was \$995,000 and \$2.5 million for the three and six months ended June 30, 2013, respectively, compared to \$1.3 million and \$2.9 million for the prior year periods. For the three months ended June 30, 2013, there were no gains on sales of other real estate owned while noninterest income included \$370,000 of such gain for the three months ended June 30, 2012. Gains on sales of other real estate owned were \$126,000 for the six months ended June 30, 2013 compared to \$469,000 for the comparable prior year period. Gains on sales of mortgage loans totaled \$298,000 and \$460,000 for the three and six months ended June 30, 2013, respectively, compared to \$154,000 and \$565,000 for the three and six months ended June 30, 2012, respectively. For the six months ended June 30, 2013, noninterest income included \$2,000 from gains on calls and sales of securities compared to \$445,000 for the same prior year period. Noninterest income of \$537,000 was recorded as a result of a death benefit insurance payment received in early 2013.

Index

Noninterest Expense

Noninterest expenses for the three and six months ended June 30, 2013 increased to \$5.1 million and \$10.1 million compared to \$4.8 million and \$9.7 million in the comparable prior year periods. The majority of the increase in noninterest expenses has occurred in higher salary and employee benefits expense, reflective of increasing regulatory compliance and the attendant staffing necessary to oversee all compliance-related issues. In addition, the increase in salary and employee benefits expense is the result of an increased focus on commercial lending opportunities as well as costs associated with an enhanced credit review function.

Income Tax Expense

For the three months ended June 30, 2013, the Corporation recorded income tax expense of \$231,000 compared to an income tax benefit of \$159,000 for the three months ended June 30, 2012. For the six months ended June 30, 2013, income tax expense totaled \$217,000 representing an effective tax rate of 14.5% compared to income tax expense of \$147,000, or an effective tax rate of 24.5%, for the six months ended June 30, 2012. The current period tax expense reflects a decrease in our overall projected effective tax rate as a result of our tax exempt income, including the gain on life insurance proceeds, representing a larger percentage of pretax income.

Asset Quality

The Corporation's principal earning asset is its loan portfolio. Inherent in the lending function is the risk of deterioration in the borrowers' ability to repay loans under existing loan agreements. Management realizes that because of this risk, reserves are maintained to absorb probable incurred loan losses. In determining the adequacy of the allowance for loan losses, management of the Corporation considers the risks inherent in its loan portfolio and changes in the nature and volume of its loan activities, along with general economic and real estate market conditions. Although management attempts to establish a reserve sufficient to offset probable incurred losses in the portfolio, changes in economic conditions, regulatory policies and borrowers' performance could require future changes to the allowance.

Risk elements include nonaccrual loans, past due and restructured loans, potential problem loans, loan concentrations and other real estate owned. The following table shows the composition of nonperforming assets at the end of each of the last four quarters:

June 30, March 31, December 31, September 30, 2013 2012 2012

Edgar Filing: STEWARDSHIP FINANCIAL CORP - Form 10-Q

(Dollars in thousands)

Nonaccrual loans (1) Loans past due 90 days or more and accruing (2) Total nonperforming loans	\$14,716 — 14,716	\$ 17,479 50 17,529	\$ 18, 23° 18,		75 25,035
Other real estate owned Total nonperforming assets	1,072 \$15,788	876 \$ 18,405	1,0 \$ 19,		2,985 5 28,020
Performing restructured loans (3)	\$10,235	\$ 10,134	\$ 10,	.373 \$	5 7,176
Allowance for loan losses	\$10,787	\$ 11,512	\$ 10,	641 \$	12,598
Nonperforming loans to total gross loans	3.33 %		% 4.1		5.72 %
Nonperforming assets to total assets Allowance for loan losses to total gross loans	2.29 % 2.44 %		% 2.8 % 2.4		4.10 % 2.88 %
Allowance for loan losses to nonperforming loans	73.30 %	65.67	% 58.	31 %	50.32 %

⁽¹⁾ Generally represents loans as to which the payment of principal or interest is in arrears for a period of more than 90 days. Interest previously accrued on these loans and not yet paid is reversed and charged against income during the current period. Interest earned thereafter is only included in income to the extent that it is received in cash.

Index

- (2) Represents loans as to which payment of principal or interest is contractually past due 90 days or more but which are currently accruing income at the contractually stated rates. A determination is made to continue accruing income on those loans which are sufficiently collateralized and on which management believes all interest and principal owed will be collected.
- (3) Any restructured loans that are on nonaccrual status are only reported in nonaccrual loans and not also in restructured loans.

A loan is generally placed on nonaccrual when, based on current information and events, it is probable that the Corporation will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. The identification of nonaccrual loans reflects careful monitoring of the loan portfolio. The Corporation is focused on resolving the nonperforming loans and mitigating future losses in the portfolio. All delinquent loans continue to be reviewed by management.

At June 30, 2013, the nonaccrual loans were comprised of 43 loans, primarily commercial real estate loans, commercial loans and construction loans. While the Corporation maintains strong underwriting requirements, the number and amount of nonaccrual loans is a reflection of the prolonged weakened economic conditions and the corresponding effects it has had on our commercial borrowers and the current real estate environment. Certain loans, including restructured loans, are current, but in accordance with applicable guidance and other weakness concerns, management has continued to keep these loans on nonaccrual status.

During the six months ended June 30, 2013, nonaccrual loans have decreased \$3.3 million to \$14.7 million, since December 31, 2012. The decrease reflects payments received, payoffs, charge-offs and loans returned to an accrual status partially offset by new nonaccrual loans. The ratio of allowance for loan losses to nonperforming loans increased to 73.30% at June 30, 2013 from 58.31% at December 31, 2012. The ratio of allowance for loan losses to nonperforming loans is reflective of a detailed analysis and the probable losses to be incurred that we have identified with these nonperforming loans. This metric reflects both the effect of an increase in the allowance for loan losses and the decrease in nonaccrual loans.

Evaluation of all nonperforming loans includes the updating of appraisals and specific evaluation of such loans to determine estimated cash flows from business and/or collateral. We have assessed these loans for collectability and considered, among other things, the borrower's ability to repay, the value of the underlying collateral, and other market conditions to ensure the allowance for loan losses is adequate to absorb probable losses to be incurred. The majority of our nonperforming loans are secured by real estate collateral. While we have continued to record appropriate charge-offs, the existing underlying collateral coverage for a considerable portion of the nonperforming loans currently supports collection of a significant portion of our remaining principal.

For loans not included in nonperforming loans, at June 30, 2013, the level of loans past due 30-89 days was only \$249,000 compared to \$3.1 million at December 31, 2012. We will continue to monitor delinquencies for early identification of new problem loans. While not comprising a significantly large portion of the loan portfolio, a number of problem loans are commercial construction loans which have been affected by the struggling construction industry. As such, the entire commercial construction portfolio is being actively monitored.

The Corporation maintains an allowance for loan losses at a level considered by management to be adequate to cover the probable losses to be incurred associated with its loan portfolio. The Corporation's policy with respect to the methodology for the determination of the allowance for loan losses involves a high degree of complexity and requires management to make difficult and subjective judgments.

The adequacy of the allowance for loan losses is based upon management's evaluation of the known and inherent risks in the portfolio, consideration to the size and composition of the loan portfolio, actual loan loss experience, the level of delinquencies, detailed analysis of individual loans for which full collectability may not be assured, the existence and estimated net realizable value of any underlying collateral and guarantees securing the loans, and current economic and market conditions.

In establishing the allowance for loan losses, the Corporation utilizes a two-tier approach by (1) identifying problem loans and allocating specific loss allowances on such loans and (2) establishing a general loan loss allowance on the remainder of its loan portfolio. The Corporation maintains a loan review system that allows for a periodic review of its loan portfolio and the early identification of potential problem loans. Such a system takes into consideration, among other things, delinquency status, size of loans, type of collateral and financial condition of the borrowers.

Allocations of specific loan loss allowances are established for identified loans based on a review of various information including appraisals of underlying collateral. Appraisals are performed by independent licensed appraisers to determine the value of impaired, collateral-dependent loans. Appraisals are periodically updated to ascertain any further decline in value. General loan loss allowances are based upon a combination of factors including, but not limited to, actual loss experience, composition of the loan portfolio, current economic conditions and management's judgment.

Index

For the three and six months ended June 30, 2013, the provision for loan losses was \$850,000 and \$2.5 million, respectively, compared to \$2.9 million and \$4.7 million for the three and six months ended June 30 2012, respectively. The total allowance for loan losses of 2.44% of total loans was comparable to a ratio of 2.42% at December 31, 2012.

When management expects that some portion or all of a loan balance will not be collected, that amount is charged-off as a loss against the allowance for loan losses. For the three and six months ended June 30, 2013, net charge-offs were \$1.6 million and \$2.3 million, respectively. For the prior year three and six months ended June 30, 2012, net charge-offs were \$4.1 million and \$4.3 million, respectively. These charge-offs primarily reflect partial writedowns on nonaccrual loans due to the initial and ongoing evaluations of market values of the underlying real estate collateral in accordance with Accounting Standards Codification ("ASC") 310-40, and the prior year charge-offs are indicative of previously established reserves that were based on analysis of the discounted cash flows for non-real estate collateral dependent loans. Regardless of our actions of recording partial and full charge-offs on loans, we continue to aggressively pursue collection, including legal action.

While regular monthly payments continue to be made on many of the nonaccrual loans, certain charge-offs result, nevertheless, from the borrowers' inability to provide adequate documentation evidencing their ability to continue to service their debt. Therefore, consideration has been given to any underlying collateral and appropriate charge-offs recorded based, in general, on the deficiency of such collateral. In general, the charge-offs reflect partial writedowns and full charge-offs on nonaccrual loans due to the initial evaluation of market values of the underlying real estate collateral in accordance with ASC 310-40. Management believes the charge-off of these reserves provides a clearer indication of the value of nonaccrual loans. In addition to our actions of recording partial and full charge-offs on loans, we continue to aggressively pursue collection, including legal action.

At June 30, 2013 and December 31, 2012, the Corporation had \$11.4 million and \$11.7 million, respectively, of loans whose terms have been modified in troubled debt restructurings. Of these loans, \$10.2 million and \$10.4 million were performing in accordance with their new terms at June 30, 2013 and December 31, 2012, respectively. The remaining troubled debt restructures are reported as nonaccrual loans. Specific reserves of \$301,000 and \$246,000 were allocated for the troubled debt restructurings at June 30, 2013 and December 31, 2012, respectively. As of June 30, 2013 and December 31, 2012 the Corporation had committed \$120,000 and \$241,000 respectively, of additional funds to a single customer with an outstanding construction loan that is classified as a troubled debt restructuring.

As of June 30, 2013, there were \$24.1 million of other loans not included in the preceding table where credit conditions of borrowers, including real estate tax delinquencies, caused management to have concerns about the possibility of the borrowers not complying with the present terms and conditions of repayment and which may result in disclosure of such loans as nonperforming loans at a future date. These loans have been considered by management in conjunction with the analysis of the adequacy of the allowance for loan losses.

The Corporation's lending activities are concentrated in loans secured by real estate located in northern New Jersey. Accordingly, the collectability of a substantial portion of the Corporation's loan portfolio is susceptible to changes in

real estate market conditions in northern New Jersey.

Capital Adequacy

The Corporation is subject to capital adequacy guidelines promulgated by the Board of Governors of the Federal Reserve System ("FRB"). The Bank is subject to similar capital adequacy requirements imposed by the Federal Deposit Insurance Corporation. The FRB has issued regulations to define the adequacy of capital based upon the sensitivity of assets and off-balance sheet exposures to risk factors. Four categories of risk weights (0%, 20%, 50%, and 100%) were established to be applied to different types of balance sheet assets and off-balance sheet exposures. The aggregate of the risk-weighted items (risk-based assets) is the denominator of the ratio; the numerator of the ratio is risk-based capital. Under the regulations, risk-based capital has been classified into two categories. Tier 1 capital consists of common and qualifying perpetual preferred shareholders' equity less goodwill and other intangibles. Tier 2 capital consists of (a) the allowance for loan losses of up to 1.25% of risk-weighted assets, (b) the excess of qualifying preferred stock, (c) hybrid capital instruments, (d) debt, (e) mandatory convertible securities and (f) qualifying subordinated debt. Total qualifying capital consists of Tier 1 capital and Tier 2 capital less reciprocal holdings of other banking organizations' capital instruments, investments in unconsolidated subsidiaries and any other deductions as determined by the FRB (determined on a case-by-case basis or as a matter of policy after formal rule-making). However, the amount of Tier 2 capital may not exceed the amount of Tier 1 capital. At June 30, 2013, the minimum risk-based capital requirements to be considered adequately capitalized were 4% for Tier 1 capital and 8% for total capital.

Index

Federal banking regulators have also adopted leverage capital guidelines to supplement the risk-based measures. The leverage ratio under which a bank holding company must maintain a minimum level of Tier 1 capital to average total consolidated assets of at least 3% (in the case of a bank holding company that has the highest regulatory examination rating and is not contemplating significant growth or expansion) is determined by dividing Tier 1 capital as defined under the risk-based guidelines by average total assets (non-risk-adjusted) for the preceding three months. At June 30, 2013 the minimum leverage ratio requirement to be considered well capitalized was 4%. The following table summarizes the capital ratios for the Corporation and the Bank at June 30, 2013.

	Actual	Capital Adequa	•		To Be Well Capitalized Under Prompt Corrective Action Regulations	
Leverage ratio		p		8		
Corporation	8.99 %	6 4.00	%	N/A		
Bank	8.83 %	6 4.00	%	5.00	%	
Risk-based capital Tier I						
Corporation	13.43%	6 4.00	%	N/A		
Bank	13.19%	6 4.00	%	6.00	%	
Total						
Corporation	14.70%	6 8.00	%	N/A		
Bank	14.45%	6 8.00	%	10.00	%	

Liquidity and Capital Resources

The Corporation's primary sources of funds are deposits, amortization and prepayments of loans and mortgage-backed securities, maturities of investment securities and funds provided from operations. While scheduled loan and mortgage-backed securities amortization and maturities of investment securities are a relatively predictable source of funds, deposit flow and prepayments on loans and mortgage-backed securities are greatly influenced by market interest rates, economic conditions and competition. The Corporation's liquidity, represented by cash and cash equivalents, is a product of its operating, investing and financing activities.

The primary source of cash from operating activities is net income. Liquidity management is both a daily and long-term function of business management. Excess liquidity is generally invested in interest-earning cash accounts or short-term investments, such as federal funds sold.

Cash and cash equivalents decreased \$6.7 million during the first six months of 2013. Net operating and financing activities provided \$5.2 million and \$2.1 million, respectively, and investing activities used \$13.9 million.

We anticipate that the Corporation will have sufficient funds available to meet its current contractual commitments. Should we need temporary funding, the Corporation has the ability to borrow overnight with the Federal Home Loan Bank-NY ("FHLB-NY"). The overall borrowing capacity is contingent on available collateral to secure borrowings and the ability to purchase additional activity-based capital stock of the FHLB-NY. The Corporation may also borrow from the Discount Window of the Federal Reserve Bank of New York based on the market value of collateral pledged. In addition, the Corporation has available overnight variable repricing lines of credit with other correspondent banks totaling \$13.0 million on an unsecured basis.

<u>Index</u>

With respect to the payment of dividends on common stock, the Corporation has historically paid a quarterly cash dividend; however, management recognizes that the payment of future dividends could be impacted by losses or reduced earnings and the Corporation cannot assure the payment of future dividends. In addition, due to its participation in the United States Treasury's Small Business Lending Fund (the "SBLF") program, pursuant to which the Corporation issued 15,000 shares of Senior Non-Cumulative Perpetual Preferred Stock, Series B (the "Series B Preferred Shares") to the Treasury for a purchase price of \$15.0 million in cash, the Corporation may only declare and pay dividends on its common stock (or any other equity security junior to the Series B Preferred Stock) if it has declared and paid dividends on the Series B Preferred Stock for the current dividend period and, if after payment of such dividend, the dollar amount of the Corporation's Tier 1 Capital would be at least 90% of the Tier 1 Capital at the date of entering into the SBLF program excluding any subsequent charge-offs and any redemption of the Series B Preferred shares. On July 17, 2013, the Corporation announced that its Board of Directors had declared a \$0.01 per share cash dividend payable to shareholders of record as of August 1, 2013. The dividend is to be paid on August 15, 2013.

Not applicable to smaller reporting companies.

ITEM 4. Controls and Procedures

Evaluation of internal controls and procedures

Based on their evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, our principal executive officer and principal financial officer have concluded that our internal disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Controls over Financial Reporting

Pursuant to Rule 13a-15(d) under the Exchange Act, our management, with the participation of our principal executive officer and principal financial officer, has evaluated our internal controls over financial reporting and based upon such evaluation concluded that there were no changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended June 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
