EASTMAN CHEMICAL
COMPANY - EMN

Item 8.01. Other Events

On March 6, 2012, Eastman Chemical Company (the "Company") issued a press release announcing its election to change its method of accounting for actuarial gains and losses for its pension and other postretirement benefit ("OPEB") plans to a more preferable method as permitted under generally accepted accounting principles in the United States ("GAAP"). The new accounting method, adopted in first quarter 2012, will be retrospectively applied to the Company's financial results for all periods. In connection with the above change in accounting for pension and OPEB costs, management has also elected to change its method of accounting for certain related costs included in inventory to exclude the portion of pension and OPEB costs attributable to former employees (inactives) as a component of inventoriable costs and instead charge them directly to the cost of sales line item as a period cost.

The cumulative effect of the change on Retained Earnings as of December 31, 2011 (the most recent measurement date) is a decrease of approximately \$675 million, with the corresponding change reducing the Accumulated Other Comprehensive Loss. Under the newly adopted method of accounting for actuarial gains and losses for its pension and OPEB plans, the Company expects its 2012 pension and OPEB costs to be lower than previously anticipated by approximately \$75 million, pre-tax, excluding the impact of the fourth quarter mark-to-market adjustment. These lower costs are expected to result in an increase in the outlook for diluted earnings per share of approximately \$0.30 for full year 2012.

The text of the release announcing the election to change accounting policies is filed as Exhibit 99.01 to this Form 8-K, and is incorporated herein by reference.
