

GREAT SOUTHERN BANCORP INC
Form 10-Q
August 05, 2010

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES ACT OF 1934

For the Quarterly Period ended June 30, 2010

Commission File Number 0-18082

GREAT SOUTHERN BANCORP, INC.

(Exact name of registrant as specified in its charter)

Maryland
(State of Incorporation)

43-1524856
(IRS Employer Identification Number)

1451 E. Battlefield, Springfield, Missouri
(Address of Principal Executive Offices)

65804
(Zip Code)

(417) 887-4400
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of regulation S-T (§232.405 of this chapter) during the proceeding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of "accelerated filer," "large accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

(Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

(Do not check if a smaller reporting company)

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes / / No /X/

The number of shares outstanding of each of the registrant's classes of common stock: 13,434,425 shares of common stock, par value \$.01, outstanding at August 2, 2010.

GREAT SOUTHERN BANCORP, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1: BASIS OF PRESENTATION

The accompanying unaudited interim consolidated financial statements of Great Southern Bancorp, Inc. (the "Company" or "Great Southern") have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. The financial statements presented herein reflect all adjustments which are, in the opinion of management, necessary to fairly present the financial condition, results of operations and cash flows of the Company for the periods presented. Those adjustments consist only of normal recurring adjustments. Operating results for the three and six months ended June 30, 2010 and 2009 are not necessarily indicative of the results that may be expected for the full year. The consolidated statement of financial condition of the Company as of December 31, 2009, has been derived from the audited consolidated statement of financial condition of the Company as of that date.

Certain information and note disclosures normally included in the Company's annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for 2009 filed with the Securities and Exchange Commission.

NOTE 2: OPERATING SEGMENTS

The Company's banking operation is its only reportable segment. The banking operation is principally engaged in the business of originating residential and commercial real estate loans, construction loans, commercial business loans and consumer loans and funding these loans through deposits attracted from the general public and correspondent account relationships, brokered deposits and borrowings from the Federal Home Loan Bank ("FHLBank") and others. The operating results of this segment are regularly reviewed by management to make decisions about resource allocations and to assess performance.

Revenue from segments below the reportable segment threshold is attributable to three operating segments of the Company. These segments include insurance services, travel services and investment services. Selected information is not presented separately for the Company's reportable segment, as there is no material difference between that information and the corresponding information in the consolidated financial statements.

NOTE 3: COMPREHENSIVE INCOME

The FASB's Accounting Standards Codification ("FASB ASC") Topic 220 (Statement of Financial Accounting Standards No. 130, Reporting Comprehensive Income) requires the reporting of comprehensive income and its components. Comprehensive income is defined as the change in equity from transactions and other events and circumstances from non-owner sources, and excludes investments by and distributions to owners. Comprehensive income includes net income and other items of comprehensive income meeting the above criteria. The Company's only component of other comprehensive income is the unrealized gains and losses on available-for-sale securities.

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	Three Months Ended June 30,	
	2010	2009
	(In thousands)	
Net unrealized gain on available-for-sale securities	\$ 4,204	\$ 2,311
Net unrealized gain on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized	—	56
Less reclassification adjustment for gain included in net income	3,465	176
Other comprehensive income, before tax effect	739	2,191
Tax expense	259	767
Change in unrealized gain on available-for-sale securities, net of income taxes	\$ 480	\$ 1,424

	Six Months Ended June 30,	
	2010	2009
	(In thousands)	
Net unrealized gain on available-for-sale securities	\$ 3,602	\$ 13,790
Net unrealized loss on available-for-sale debt securities for which a portion of an other-than-temporary impairment has been recognized	(435)	(3,443)
Less reclassification adjustment for gain (loss) included in net income	3,465	(310)
Other comprehensive income (loss), before tax effect	(298)	10,657
Tax expense (benefit)	(104)	3,730
Change in unrealized gain (loss) on available-for-sale securities, net of income taxes	\$ (194)	\$ 6,927

The components of accumulated other comprehensive income, included in stockholders' equity, are as follows:

	At June 30,	
	2010	2009
Net unrealized gain on available-for-sale securities	\$ 18,203	\$ 10,390
	(809)	56

Net unrealized gain (loss) on available-for-sale debt securities for which

a portion of an other-than-temporary impairment has been recognized in income

		17,394		10,446
Tax expense		6,088		3,656
Net-of-tax amount	\$	11,306	\$	6,790

7

NOTE 4: RECENT ACCOUNTING PRONOUNCEMENTS

In July 2010, the FASB issued Accounting Standards Update No. (ASU) 2010-20, Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowances for Credit Losses. This Update requires expanded disclosures to help financial statement users understand the nature of credit risks inherent in a creditor's portfolio of financing receivables; how that risk is analyzed and assessed in arriving at the allowance for credit losses; and the changes, and reasons for those changes, in both the receivables and the allowance for credit losses. The disclosures should be prepared on a disaggregated basis and provide a roll-forward schedule of the allowance for credit losses and detailed information on financing receivables including, among other things, recorded balances, nonaccrual status, impairments, credit quality indicators, details for troubled debt restructurings and an aging of past due financing receivables. Disclosures required as of the end of a reporting period are effective for interim and annual reporting periods ending after December 15, 2010. Disclosures required for activity occurring during a reporting period are effective for interim and annual reporting periods beginning after December 15, 2010. This Update is not expected to have a material impact on the Company's financial position or results of operations.

In June 2010, the FASB issued a proposed statement to amend FASB ASC Subtopic 820, Fair Value Measurements and Disclosures. The purpose of the amendment is to align U.S. generally accepted accounting principles (GAAP) and International Financial Reporting Standards (IFRSs) for measuring fair value and disclosing such measurements. This would improve comparability of financial statements prepared in accordance with the different standards. Amendments to clarify or change GAAP would include: 1) limiting the highest and best use valuation premise to non-financial assets and liabilities, 2) an exception to the requirements in Topic 820 for fair value measurements of financial instruments managed within portfolios, 3) guidance for measuring the fair value of an instrument classified as equity, 4) a prohibition of the use of blockage factors when measuring the fair value of instruments classified as level 2 or level 3 within the fair value hierarchy, and 5) additional disclosures of fair value measurements including the effects of changing observable inputs used for level 3 measurements and categorization of assets and liabilities not reported at fair value in the statement of financial position into the levels of the fair value hierarchy. The proposed statement was released for comment through September 7, 2010. If adopted as proposed, the statement is not expected to have a material impact on the Company's financial position and results of operations.

In June 2010, the FASB issued a proposed statement on revenue recognition to align GAAP and IFRSs and to provide a simplified standard with fewer inconsistencies and more guidance that will improve comparability between entities. Under the proposal, revenue would be recognized based on contracts and allocated to performance obligations for goods and services at transaction prices which take into account factors such as collectability, time value of money, noncash consideration and consideration payable to the customer. The proposed statement was released for comment through October 22, 2010. If adopted as proposed, the statement is not expected to have a material impact on the Company's financial position and results of operations.

In May 2010, the FASB issued a proposed statement meant to reduce the complexity of accounting for financial instruments and improve comparability of financial statements between entities. The guidance would require most financial instruments to be accounted for using fair value in the statement of financial position. To aid users in their analyses of financial statements, both fair value information and amortized cost information would be presented on the face of the statement of financial position. Most changes to fair value would be recognized in net income and comprehensive income and thresholds for recognizing impairments on financial instruments would be eliminated. The proposal also includes changes to hedging requirements. When determining whether derivative instruments qualify for hedge accounting, qualitative rather than quantitative assessments would be used and the hedge effectiveness threshold would be lowered from "highly effective" to "reasonably effective". To improve consistency in assessing effectiveness, the shortcut and critical terms match methods of hedge accounting would be eliminated. Documentation of hedge effectiveness after the initial assessment would no longer be required. The

proposed statement was released for comment through September 30, 2010. If adopted as proposed, this statement is expected to have a material impact on the Company's financial position and results of operations.

In January 2010, the FASB issued ASU No. 2010-06, Improving Disclosures about Fair Value Measurements (FASB ASU 2010-09), which amends FASB ASC Subtopic 820-10, Fair Value Measurements and Disclosures. This Update requires new disclosures to show significant transfers in and out of Level 1 and Level 2 fair value measurements as well as discussion regarding the reasons for the transfers. It also clarifies existing disclosures requiring fair value measurement disclosures for each class of assets and liabilities. The Update describes a class as being a subset of assets and liabilities within a line item on the statement of financial condition which will require management judgment to designate. Use of the terminology "classes of assets and liabilities" represents an amendment from the

previous terminology “major categories of assets and liabilities”. Clarification is also provided for disclosures of Level 2 and Level 3 recurring and nonrecurring fair value measurements requiring discussion about the valuation techniques and inputs used. These provisions of the Update were effective for the Company’s financial statements as of January 1, 2010 and did not have a material impact on the Company’s financial position or results of operations. Another new disclosure requires an expanded reconciliation of activity in Level 3 fair value measurements to present information about purchases, sales, issuances and settlements on a gross basis rather than netting the amounts in one number. This requirement is effective for interim and annual reporting periods beginning after December 15, 2010 and is not expected to have a material impact on the Company’s financial position or results of operations.

In May 2009, the FASB issued proposed guidance impacting FASB ASC 829 (FASB Staff Position No. 157-f, Measuring Liabilities under FASB Statement No. 157). This proposed guidance would clarify the principles in FASB ASC 820 on the measurement of liabilities. This guidance, if adopted as it is currently written, will be effective for the first reporting period (including interim periods) beginning after issuance. In the period of adoption, entities must disclose any change in valuation technique resulting from the application of this guidance, and quantify its effect, if practicable. The FASB continues to deliberate this proposed guidance at this time.

In June 2008, the FASB issued an Exposure Draft of proposed guidance on disclosure of certain loss contingencies. This guidance would amend FASB ASC 450 (SFAS No. 5, Accounting for Contingencies) and FASB ASC 805 (SFAS 141(R)). The purpose of the proposed guidance is to improve the quality of financial reporting by expanding disclosures required about certain loss contingencies. Investors and other users of financial information have expressed concerns that current disclosures required in FASB ASC 450 do not provide sufficient information in a timely manner to assist users of financial statements in assessing the likelihood, timing, and amount of future cash flows associated with loss contingencies. If approved as written, this proposed guidance would expand disclosures about certain loss contingencies in the scope of FASB ASC 450 or FASB ASC 805. The FASB continues to deliberate this proposed guidance at this time.

NOTE 5: STOCKHOLDERS' EQUITY

Previously, the Company's stockholders approved the Company's reincorporation to the State of Maryland. Under Maryland law, there is no concept of "Treasury Shares." Instead, shares purchased by the Company constitute authorized but unissued shares under Maryland law. Accounting principles generally accepted in the United States of America state that accounting for treasury stock shall conform to state law. The cost of shares purchased by the Company has been allocated to Common Stock and Retained Earnings balances.

NOTE 6: EARNINGS PER SHARE

	Three Months Ended June 30,	
	2010	2009
	(In Thousands)	
Basic:		
Average shares outstanding	13,431	13,383
Net income available to common shareholders	\$ 4,977	\$ 2,316
Per share amount	\$ 0.37	\$ 0.17

Diluted:

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

Average shares outstanding	13,431	13,383
Net effect of dilutive stock options and warrants – based on the treasury stock method using average market price	617	498
Diluted shares	14,048	13,881
Net income available to common shareholders	\$ 4,977	\$ 2,316
Per share amount	\$ 0.35	\$ 0.17

Options to purchase 423,958 and 512,925 shares of common stock were outstanding during the three months ended June 30, 2010 and 2009, respectively, but were not included in the computation of diluted earnings per share for each period because the options' exercise price was greater than the average market price of the common shares.

	\$	16,125	\$	16,266

Certain investments in debt and marketable equity securities are reported in the financial statements at an amount less than their historical cost. Total fair value of these investments at June 30, 2010 and December 31, 2009, respectively, was approximately \$183,068,000 and \$139,985,000, which is approximately 24.2% and 17.9% of the Company's available-for-sale and held-to-maturity investment portfolio, respectively.

Based on evaluation of available evidence, including recent changes in market interest rates, credit rating information and information obtained from regulatory filings, management believes the declines in fair value for these debt securities are temporary at June 30, 2010.

The following table shows the Company's gross unrealized losses and fair value, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position at June 30, 2010 and December 31, 2009:

Description of Securities	June 30, 2010

Gross gains of \$3.5 million and \$203,000 and gross losses of \$0 and \$27,000 resulting from sales of available-for-sale securities were realized for the three months ended June 30, 2010 and 2009, respectively. Gross gains of \$3.5 million and \$357,000 and gross losses of \$0 and \$135,000 resulting from sales of available-for-sale securities were realized for the six months ended June 30, 2010 and 2009, respectively. Gains and losses on sales of securities are determined on the specific-identification method.

Other-than-temporary Impairment. Upon acquisition of a security, the Company decides whether it is within the scope of the accounting guidance for beneficial interests in securitized financial assets or will be evaluated for impairment under the accounting guidance for investments in debt and equity securities.

The accounting guidance for beneficial interests in securitized financial assets provides incremental impairment guidance for a subset of the debt securities within the scope of the guidance for investments in debt and equity securities. For securities where the security is a beneficial interest in securitized financial assets, the Company uses the beneficial interests in securitized financial asset impairment model. For securities where the security is not a beneficial interest in securitized financial assets, the Company uses debt and equity securities impairment model. The Company does not currently have securities within the scope of this guidance for beneficial interests in securitized financial assets.

The Company routinely conducts periodic reviews to identify and evaluate each investment security to determine whether an other-than-temporary impairment has occurred. The Company considers the length of time a security has been in an unrealized loss position, the relative amount of the unrealized loss compared to the carrying value of the security, the type of security and other factors. If certain criteria are met, the Company performs additional review and evaluation using observable market values or various inputs in economic models to determine if an unrealized loss

is other-than-temporary. The Company uses quoted market prices for marketable equity securities and uses broker pricing quotes based on observable inputs for equity investments that are not traded on a stock exchange. For non-agency collateralized mortgage obligations, to determine if the unrealized loss is other-than-temporary, the Company projects total estimated defaults of the underlying assets (mortgages) and multiplies that calculated amount by an estimate of realizable value upon sale in the marketplace (severity) in order to determine the projected collateral loss. The Company also evaluates any current credit enhancement underlying these securities to determine the impact on cash flows. If the Company determines that a given security position will be subject to a write-down or loss, the Company records the expected credit loss as a charge to earnings.

During the six months ended June 30, 2009, an other-than-temporary impairment loss of \$4.0 million was recognized in the Company's statement of income. Based on evaluations of investment securities during the six months ended June 30, 2010, none were determined to be other-than-temporarily impaired.

Credit Losses Recognized on Investments. Certain debt securities have experienced fair value deterioration due to credit losses, as well as due to other market factors, but are not otherwise other-than-temporarily impaired.

The following table provides information about debt securities for which only a credit loss was recognized in income and other losses are recorded in other comprehensive income.

	Accumulated Credit Losses
Credit losses on debt securities held	
April 1, 2010	\$2,983

NOTE 9: LOSS SHARING AGREEMENTS AND FDIC INDEMNIFICATION ASSET

On March 20, 2009, Great Southern Bank entered into a purchase and assumption agreement with loss share with the Federal Deposit Insurance Corporation (FDIC) to assume all of the deposits (excluding brokered deposits) and acquire certain assets of TeamBank, N.A., a full service commercial bank headquartered in Paola, Kansas. A detailed discussion of this transaction is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 8. Financial Statements and Supplementary Information."

The loans, commitments and foreclosed assets purchased in the TeamBank transaction are covered by a loss sharing agreement between the FDIC and Great Southern Bank which affords the Bank significant protection. Under the loss sharing agreement, the Bank will share in the losses on assets covered under the agreement (referred to as covered assets). On losses up to \$115.0 million, the FDIC has agreed to reimburse the Bank for 80% of the losses. On losses exceeding \$115.0 million, the FDIC has agreed to reimburse the Bank for 95% of the losses. Realized losses covered by the loss sharing agreement include loan contractual balances (and related unfunded commitments that were acquired), accrued interest on loans for up to 90 days, the book value of foreclosed real estate acquired, and certain direct costs, less cash or other consideration received by the Bank. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. The value of this loss sharing agreement was considered in determining fair values of loans and foreclosed assets acquired. The loss sharing agreement is subject to the Bank following servicing procedures as specified in the agreement with the FDIC. The expected reimbursements under the loss sharing agreement were recorded as an indemnification asset at their preliminary estimated fair value on the acquisition date. A discount was recorded in conjunction with the fair value of the acquired loans and the amount accreted to yield during the three and six months ended June 30, 2010 was \$400,000 and \$700,000, respectively. No reclassifications were made during the six months ended June 30, 2010 from nonaccretable discount to accretable discount.

On September 4, 2009, Great Southern Bank entered into a purchase and assumption agreement with loss share with the FDIC to assume all of the deposits and acquire certain assets of Vantus Bank, a full service thrift headquartered in

Sioux City, Iowa. A detailed discussion of this transaction is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 8. Financial Statements and Supplementary Information."

The loans, commitments and foreclosed assets purchased in the Vantus Bank transaction are covered by a loss sharing agreement between the FDIC and Great Southern Bank which affords the Bank significant protection. Under the loss sharing agreement, the Bank will share in the losses on assets covered under the agreement (referred to as covered assets). On losses up to \$102.0 million, the FDIC has agreed to reimburse the Bank for 80% of the losses. On losses exceeding \$102.0 million, the FDIC has agreed to reimburse the Bank for 95% of the losses. Realized losses covered

by the loss sharing agreement include loan contractual balances (and related unfunded commitments that were acquired), accrued interest on loans for up to 90 days, the book value of foreclosed real estate acquired, and certain direct costs, less cash or other consideration received by the Bank. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. The value of this loss sharing agreement was considered in determining fair values of loans and foreclosed assets acquired. The loss sharing agreement is subject to the Bank following servicing procedures as specified in the agreement with the FDIC. The expected reimbursements under the loss sharing agreement were recorded as an indemnification asset at their preliminary estimated fair value on the acquisition date. A discount was recorded in conjunction with the fair value of the acquired loans and the amount accreted to yield during the three and six months ended June 30, 2010 was \$300,000 and \$550,000, respectively. No reclassifications were made during the six months ended June 30, 2010 from nonaccretable discount to accretable discount.

At the time of these acquisitions, the Company determined the fair value of the loan portfolios based on several assumptions. Factors considered in the valuations were projected cash flows for the loans, type of loan and related collateral, classification status, fixed or variable interest rate, term of loan, current discount rates and whether or not the loan was amortizing. Loans were grouped together according to similar characteristics and were treated in the aggregate when applying various valuation techniques. Management also estimated the amount of credit losses that were expected to be realized for the loan portfolios. The discounted cash flow approach was used to value each pool of loans. For non-performing loans, fair value was estimated by calculating the present value of the recoverable cash flows using a discount rate based on comparable corporate bond rates. This valuation of the acquired loans is a significant component leading to the valuation of the loss sharing assets recorded.

The loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans should the Bank choose to dispose of them. Fair value was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool (as discussed above) and the loss sharing percentages outlined in the Purchase and Assumption Agreement with the FDIC. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. The loss sharing asset is also separately measured from the related foreclosed real estate.

TeamBank FDIC Indemnification Asset. The following table presents the balance of the FDIC indemnification asset related to the TeamBank transaction at June 30, 2010. Expected cash flows and the present value of future cash flows related to these assets have not changed materially since the analysis performed at acquisition on March 20, 2009. Gross loan balances (due from the borrower) were reduced approximately \$163.8 million since the transaction date through repayments by the borrower, transfers to foreclosed assets or charge-offs to customer loan balances.

NOTE 11: FAIR VALUE MEASUREMENT

ASC Topic 820, Fair Value Measurements, defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Topic 820 also specifies a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

- Quoted prices in active markets for identical assets or liabilities (Level 1): Inputs that are quoted unadjusted prices in active markets for identical assets that the Company has the ability to access at the measurement date. An active market for the asset is a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis.
- Other observable inputs (Level 2): Inputs that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity including quoted prices for similar assets, quoted prices for securities in inactive markets and inputs derived principally from or corroborated by observable market data by correlation or other means.
- Significant unobservable inputs (Level 3): Inputs that reflect assumptions of a source independent of the reporting entity or the reporting entity's own assumptions that are supported by little or no market activity or observable inputs.

Financial instruments are broken down as follows by recurring or nonrecurring measurement status. Recurring assets are initially measured at fair value and are required to be remeasured at fair value in the financial statements at each reporting date. Assets measured on a nonrecurring basis are assets that, due to an event or circumstance, were required to be remeasured at fair value after initial recognition in the financial statements at some time during the reporting period.

The following is a description of inputs and valuation methodologies used for assets recorded at fair value on a recurring basis and recognized in the accompanying balance sheets at June 30, 2010, as well as the general

classification of such assets pursuant to the valuation hierarchy.

Securities Available for Sale. Investment securities available for sale are recorded at fair value on a recurring basis. The fair values used by the Company are obtained from an independent pricing service, which represent either quoted market prices for the identical asset or fair values determined by pricing models, or other model-based valuation techniques, that consider observable market data, such as interest rate volatilities, LIBOR yield curve, credit spreads and prices from market makers and live trading systems. Recurring Level 1 securities include exchange traded equity securities. Recurring Level 2 securities include U.S. government agency securities, mortgage-backed securities, collateralized mortgage obligations, Small Business Administration (SBA) loan pools, state and municipal bonds, corporate bonds and equity securities. Inputs used for valuing Level 2 securities include observable data that may include dealer quotes, benchmark yields, market spreads, live trading levels and market consensus prepayment speeds,

among other things. Additional inputs include indicative values derived from the independent pricing service's proprietary computerized models. No securities were included in the category of Recurring Level 3 securities at or for the six months ended June 30, 2010.

Mortgage Servicing Rights. Mortgage servicing rights do not trade in an active, open market with readily observable prices. Accordingly, fair value is estimated using discounted cash flow models. Due to the nature of the valuation inputs, mortgage servicing rights are classified within Level 3 of the hierarchy.

	Fair value June 30, 2010	Fair value measurements at June 30, 2010, using		
		Quoted prices in active markets for identical assets (Level 1)	Other observable inputs (Level 2)	Significant unobservable inputs (Level 3)
(Dollars in thousands)				
U. S. government agencies	\$ 15,118	\$ -	\$ 15,118	\$ -
Collateralized mortgage obligations	42,360	-	42,360	-
Mortgage-backed securities	550,302	-	550,302	-
Small Business Administration loan pools	61,827	-	61,827	-
Corporate bonds	46	-	46	-
States and political subdivisions	66,974	-	66,974	-
Equity securities	2,392	592	1,800	-
Mortgage servicing rights	915	-	-	915

The Company considers transfers between the levels of the hierarchy to be recognized at the end of related reporting periods. From December 31, 2009 to June 30, 2010, no assets for which fair value is measured on a recurring basis transferred between any levels of the hierarchy.

The following is a reconciliation of the beginning and ending balances of recurring fair value measurements recognized in the accompanying balance sheet using significant unobservable (Level 3) inputs.

	Mortgage Servicing Rights (In thousands)
Balance, April 1, 2010	\$ 1,060
Additions, net of amortization	(145)
Balance, June 30, 2010	\$ 915

	Mortgage Servicing Rights (In thousands)
Balance, January 1, 2010	\$ 1,132
Additions, net of amortization	(217)
Balance, June 30, 2010	\$ 915

The following is a description of valuation methodologies used for financial assets and liabilities measured at fair value on a nonrecurring basis at June 30, 2010, as well as the general classification of such assets pursuant to the valuation hierarchy.

Loans Held for Sale. Mortgage loans held for sale are recorded at the lower of carrying value or fair value. The fair value of mortgage loans held for sale is based on what secondary markets are currently offering for portfolios with similar characteristics. As such, the Company classifies mortgage loans held for sale as Nonrecurring Level 2. Write-downs to fair value typically do not occur as the Company generally enters into commitments to sell individual mortgage loans at the time the loan is originated to reduce market risk. The Company typically does not have commercial loans held for sale.

Impaired Loans. A loan is considered to be impaired when it is probable that all of the principal and interest due may not be collected according to its contractual terms. Generally, when a loan is considered impaired, the amount of reserve required under FASB ASC 310, Receivables, (SFAS No. 114) is measured based on the fair value of the underlying collateral. The Company makes such measurements on all material loans deemed impaired using the fair value of the collateral for collateral dependent loans. The fair value of collateral used by the Company is determined by obtaining an observable market price or by obtaining an appraised value from an independent, licensed or certified appraiser, using observable market data. This data includes information such as selling price of similar properties and capitalization rates of similar properties sold within the market, expected future cash flows or earnings of the subject property based on current market expectations, and other relevant factors. In addition, management may apply selling and other discounts to the underlying collateral value to determine the fair value. If an appraised value is not available, the fair value of the impaired loan is determined by an adjusted appraised value including unobservable cash flows.

The Company records impaired loans as Nonrecurring Level 3. If a loan's fair value as estimated by the Company is less than its carrying value, the Company either records a charge-off of the portion of the loan that exceeds the fair value or establishes a reserve within the allowance for loan losses specific to the loan. Loans for which such charge-offs or reserves have been recorded are shown in the table below (net of reserves). In accordance with the provisions of FASB ASC 310 (SFAS No. 114), impaired loans with a carrying value of \$53.8 million, and an associated valuation reserve of \$8.0 million, were recorded at their fair value of \$45.8 million at June 30, 2010. Impaired loans of \$8.8 million at June 30, 2010, had no related allowance for loan losses assigned. Losses of \$11.8 million and \$4.5 million related to impaired loans were recognized in earnings through the provision for loan losses during the three months ended June 30, 2010 and 2009, respectively. Losses of \$14.9 million and \$8.8 million related to impaired loans were recognized in earnings through the provision for loan losses during the six months ended June 30, 2010 and 2009, respectively. At June 30, 2010, the Company had commercial loans of \$8.6 million that were modified in troubled debt restructurings and were performing in accordance with their modified terms.

Foreclosed Assets Held for Sale. Foreclosed assets held for sale are initially recorded at fair value less estimated cost to sell at the date of foreclosure. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less estimated cost to sell. Foreclosed assets held for sale are classified within Level 3 of the fair value hierarchy. The foreclosed assets represented in the table below have been re-measured subsequent to their initial transfer to foreclosed assets.

The following table presents the fair value measurements of assets measured at fair value on a nonrecurring basis and the level within the fair value hierarchy in which the fair value measurements fall at June 30, 2010:

Fair Value June 30,	Quoted Prices in	Fair Value Measurements Using	
		Significant Other	Significant Unobservable

Edgar Filing: GREAT SOUTHERN BANCORP INC - Form 10-Q

	2010	Active Markets for Identical Assets (Level 1)	Observable Inputs (Level 2)	Inputs (Level 3)
Loans held for sale	\$ 12,304	\$ ---	\$ 12,304	\$ ---
Impaired loans	37,060	---	---	37,060
Foreclosed assets held for sale	8,885	---	---	8,885

The following methods were used to estimate the fair value of all other financial instruments recognized in the accompanying balance sheet at amounts other than fair value:

Cash and Cash Equivalents and Federal Home Loan Bank Stock. The carrying amount approximates fair value.

Loans and Interest Receivable. The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Loans with similar characteristics are aggregated for purposes of the calculations. The carrying amount of accrued interest receivable approximates its fair value.

Deposits and Accrued Interest Payable. The fair value of demand deposits and savings accounts is the amount payable on demand at the reporting date, i.e., their carrying amounts. The fair value of fixed maturity certificates of deposit is estimated using a discounted cash flow calculation that applies the rates currently offered for deposits of similar remaining maturities. The carrying amount of accrued interest payable approximates its fair value.

Federal Home Loan Bank Advances. Rates currently available to the Company for debt with similar terms and remaining maturities are used to estimate fair value of existing advances.

Short-Term Borrowings. The carrying amount approximates fair value.

Subordinated Debentures Issued to Capital Trusts. The subordinated debentures have floating rates that reset quarterly. The carrying amount of these debentures approximates their fair value.

Structured Repurchase Agreements. Structured repurchase agreements are collateralized borrowings from a counterparty. In addition to the principal amount owed, the counterparty also determines an amount that would be owed by either party in the event the agreement is terminated prior to maturity by the Company. The fair values of the structured repurchase agreements are estimated based on the amount the Company would be required to pay to terminate the agreement at the balance sheet date.

Commitments to Originate Loans, Letters of Credit and Lines of Credit. The fair value of commitments is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date.

The following table presents estimated fair values of the Company's financial instruments. The fair values of certain of these instruments were calculated by discounting expected cash flows, which method involves significant judgments by management and uncertainties. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company does not know whether the fair values shown below represent values at which the respective financial instruments could be sold individually or in the aggregate.

The following disclosure relates to financial assets for which it is not practicable for the Company to estimate the fair value at June 30, 2010.

FDIC Indemnification Asset: As part of the 2009 Purchase and Assumption Agreements, Great Southern Bank and the FDIC entered into loss sharing agreements. These agreements cover realized losses on loans and foreclosed real estate.

Under the first agreement (TeamBank), the FDIC will reimburse the Bank for 80% of the first \$115 million in realized losses. The FDIC will reimburse the Bank 95% on realized losses that exceed \$115 million. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. This loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not transferable with the loans or foreclosed assets should the Bank choose to dispose of them. Fair value at the acquisition date (March 20, 2009) was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool and the loss sharing percentages. These cash flows were discounted to reflect the uncertainty of the

timing and receipt of the loss sharing reimbursement from the FDIC. This loss sharing asset is also separately measured from the related foreclosed real estate. At June 30, 2010, the carrying value of the FDIC indemnification asset was \$84.9 million. Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement. While this asset was recorded at its estimated fair value at March 20, 2009, it is not practicable to complete a fair value analysis of the entire portfolio of loans and foreclosed assets covered by the loss sharing agreement on a quarterly or annual basis.

Under the second agreement (Vantus Bank), the FDIC will reimburse the Bank for 80% of the first \$102 million in realized losses. The FDIC will reimburse the Bank 95% on realized losses that exceed \$102 million. This agreement extends for ten years for 1-4 family real estate loans and for five years for other loans. This loss sharing asset is measured separately from the loan portfolio because it is not contractually embedded in the loans and is not

transferable with the loans or foreclosed assets should the Bank choose to dispose of them. Fair value at the acquisition date (March 4, 2009) was estimated using projected cash flows available for loss sharing based on the credit adjustments estimated for each loan pool and the loss sharing percentages. These cash flows were discounted to reflect the uncertainty of the timing and receipt of the loss sharing reimbursement from the FDIC. This loss sharing asset is also separately measured from the related foreclosed real estate. At June 30, 2010, the carrying value of the FDIC indemnification asset was \$44.9 million. Although this asset is a contractual receivable from the FDIC, there is no effective interest rate. The Bank will collect this asset over the next several years. The amount ultimately collected will depend on the timing and amount of collections and charge-offs on the acquired assets covered by the loss sharing agreement. While this asset was recorded at its estimated fair value at September 4, 2009, it is not practicable to complete a fair value analysis of the entire portfolio of loans and foreclosed assets covered by the loss sharing agreement on a quarterly or annual basis.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Forward-Looking Statements

When used in this Quarterly Report on Form 10-Q and in future filings by the Company with the Securities and Exchange Commission (the "SEC"), in the Company's press releases or other public or shareholder communications, and in oral statements made with the approval of an authorized executive officer, the words or phrases "will likely result," "are expected to," "will continue," "is anticipated," "estimate," "project," "intends" or similar expressions are intended to identify "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are subject to certain risks and uncertainties including, among other things, (i) expected cost savings, synergies and other benefits from the Company's merger and acquisition activities might not be realized within the anticipated time frames or at all, and costs or difficulties relating to integration matters, including but not limited to customer and employee retention, might be greater than expected; (ii) changes in economic conditions, either nationally or in the Company's market areas; (iii) fluctuations in interest rates; (iv) the risks of lending and investing activities, including changes in the level and direction of loan delinquencies and write-offs and changes in estimates of the adequacy of the allowance for loan losses; (v) the possibility of other-than-temporary impairments of securities held in the Company's securities portfolio; (vi) the Company's ability to access cost-effective funding; (vii) fluctuations in real estate values and both residential and commercial real estate market conditions; (viii) demand for loans and deposits in the Company's market areas; (ix) legislative or regulatory changes, including without limitation the recently enacted Dodd-Frank Act (defined below), that adversely affect the Company's business; (x) monetary and fiscal policies of the Federal Reserve Board and the U.S. Government and other governmental initiatives affecting the financial services industry; (xi) results of examinations of the Company and the Bank by their regulators, including the possibility that the regulators may, among other things, require the Company to increase its allowance for loan losses or to write-down assets; (xii) the uncertainties arising from the Company's participation in the TARP Capital Purchase Program, including impacts on employee recruitment and retention and other business and practices, and uncertainties concerning the potential redemption by us of the U.S. Treasury's preferred stock investment under the program, including the timing of, regulatory approvals for, and conditions placed upon, any such redemption; (xiii) costs and effects of litigation, including settlements and judgments; and (xiv) competition. The Company wishes to advise readers that the factors listed above could affect the Company's financial performance and could cause the Company's actual results for future periods to differ materially from any opinions or statements expressed with respect to future periods in any current statements.

The Company does not undertake-and specifically declines any obligation-to publicly release the result of any revisions which may be made to any forward-looking statements to reflect events or circumstances after the date of

such statements or to reflect the occurrence of anticipated or unanticipated events.

Critical Accounting Policies, Judgments and Estimates

The accounting and reporting policies of the Company conform with accounting principles generally accepted in the United States and general practices within the financial services industry. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and the accompanying notes. Actual results could differ from those estimates.

Allowance for Loan Losses and Valuation of Foreclosed Assets

The Company believes that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than its other significant accounting policies. The allowance for loan losses is calculated with the objective of maintaining an allowance level believed by management to be sufficient to absorb estimated loan losses. Management's determination of the adequacy of the allowance is based on periodic evaluations of the loan portfolio and other relevant factors. However, this evaluation is inherently subjective as it requires material estimates of, including, among others, expected default probabilities, loss once loans default, expected commitment usage, the amounts and timing of expected future cash flows on impaired loans, value of collateral, estimated losses, and general amounts for historical loss experience.

The process also considers economic conditions, uncertainties in estimating losses and inherent risks in the loan portfolio. All of these factors may be susceptible to significant change. To the extent actual outcomes differ from management estimates, additional provisions for loan losses may be required that would adversely impact earnings in future periods. In addition, the Bank's regulators could require additional provisions for loan losses as part of their examination process.

Additional discussion of the allowance for loan losses is included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009, under the section titled "Item 1. Business - Allowances for Losses on Loans and Foreclosed Assets." Inherent in this process is the evaluation of individual significant credit relationships. From time to time certain credit relationships may deteriorate due to payment performance, cash flow of the borrower, value of collateral, or other factors. In these instances, management may have to revise its loss estimates and assumptions for these specific credits due to changing circumstances. In some cases, additional losses may be realized; in other instances, the factors that led to the deterioration may improve or the credit may be refinanced elsewhere and allocated allowances may be released from the particular credit. For the periods included in these financial statements, management's overall methodology for evaluating the allowance for loan losses has not changed significantly.

In addition, the Company considers that the determination of the valuations of foreclosed assets held for sale involves a high degree of judgment and complexity. The carrying value of foreclosed assets reflects management's best estimate of the amount to be realized from the sales of the assets. While the estimate is generally based on a valuation by an independent appraiser or recent sales of similar properties, the amount that the Company realizes from the sales of the assets could differ materially from the carrying value reflected in the financial statements, resulting in losses that could adversely impact earnings in future periods.

Carrying Value of FDIC-covered Loans and Indemnification Asset

The Company considers that the determination of the carrying value of loans acquired in the March 20, 2009 and September 4, 2009, FDIC-assisted transactions and the carrying value of the related FDIC indemnification assets involve a high degree of judgment and complexity. The carrying value of the acquired loans and the FDIC indemnification assets reflect management's best ongoing estimates of the amounts to be realized on each of these assets. The Company determined initial fair value accounting estimates of the assumed assets and liabilities in accordance with FASB ASC 805 (SFAS No. 141(R), Business Combinations). However, the amount that the Company realizes on these assets could differ materially from the carrying value reflected in its financial statements, based upon the timing of collections on the acquired loans in future periods. Because of the loss sharing agreements with the FDIC on these assets, the Company should not incur any significant losses. To the extent the actual values realized for the acquired loans are different from the estimates, the indemnification asset will generally be impacted in an offsetting manner due to the loss sharing support from the FDIC. Subsequent to the initial valuation, the Company continues to monitor identified loan pools and related loss sharing assets for changes in estimated cash flows projected for the loan pools, anticipated credit losses and changes in the accretable yield. Analysis of these variables requires

significant estimates and a high degree of judgment. See Note 9 “Loss Sharing Agreements and FDIC Indemnification Assets” included in Item 1 for additional information.

Goodwill and Intangible Assets

Goodwill and intangibles assets that have indefinite useful lives are subject to an impairment test at least annually and more frequently if circumstances indicate their value may not be recoverable. Goodwill is tested for impairment using a process that estimates the fair value of each of the Company’s reporting units compared with its carrying value. The Company defines reporting units as a level below each of its operating segments for which there is discrete financial information that is regularly reviewed. As of June 30, 2010, the Company has two reporting units to which goodwill

has been allocated – the Bank and the Travel division (which is a division of a subsidiary of the Bank). If the fair value of a reporting unit exceeds its carrying value, then no impairment is recorded. If the carrying value amount exceeds the fair value of a reporting unit, further testing is completed comparing the implied fair value of the reporting unit's goodwill to its carrying value to measure the amount of impairment. Intangible assets that are not amortized will be tested for impairment at least annually by comparing the fair values to those assets to their carrying values. At June 30, 2010, goodwill consisted of \$379,000 at the Bank reporting unit and \$875,000 at the Travel reporting unit. Other identifiable intangible assets that are subject to amortization are amortized on a straight-line basis over periods ranging from three to seven years. At June 30, 2010, the amortizable intangible assets consisted of core deposit intangibles of \$4.5 million at the Bank reporting unit and \$35,000 of non-compete agreements at the Travel reporting unit. These amortizable intangible assets are reviewed for impairment if circumstances indicate their value may not be recoverable based on a comparison of fair value.

Based on the Company's goodwill impairment analysis, management does not believe any of its goodwill or other intangible assets are impaired as of June 30, 2010. While the Company believes no impairment existed at June 30, 2010, different conditions or assumptions used to measure fair value of reporting units, or changes in cash flows or profitability, if significantly negative or unfavorable, could have a material adverse effect on the outcome of the Company's impairment evaluation in the future.

Current Economic Conditions

The current economic environment presents financial institutions with unprecedented circumstances and challenges which in some cases have resulted in large declines in the fair values of investments and other assets, constraints on liquidity and significant credit quality problems, including severe volatility in the valuation of real estate and other collateral supporting loans. The Company's financial statements have been prepared using values and information currently available to the Company.

Given the volatility of current economic conditions, the values of assets and liabilities recorded in the financial statements could change rapidly, resulting in material future adjustments in asset values, the allowance for loan losses, or capital that could negatively impact the Company's ability to meet regulatory capital requirements and maintain sufficient liquidity.

General

The profitability of the Company and, more specifically, the profitability of its primary subsidiary, Great Southern Bank (the "Bank"), depends primarily on its net interest income, as well as provisions for loan losses and the level of non-interest income and non-interest expense. Net interest income is the difference between the interest income the Bank earns on its loans and investment portfolio, and the interest it pays on interest-bearing liabilities, which consists mainly of interest paid on deposits and borrowings. Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities and the interest rates earned or paid on these balances. When interest-earning assets approximate or exceed interest-bearing liabilities, any positive interest rate spread will generate net interest income.

In the six months ended June 30, 2010, Great Southern's net loans decreased \$147.5 million, or 7.1%, from \$2.08 billion at December 31, 2009, to \$1.93 billion at June 30, 2010. A portion of the decrease in net loans was due to a \$67.2 million, or 15.8%, decrease in the loan portfolios acquired through the 2009 FDIC-assisted transactions, primarily through loan repayments. Excluding the reductions in these acquired portfolios, loans decreased by approximately \$80.3 million, with a decrease in outstanding construction loans of \$51.6 million, or 14.5%, and a decrease in commercial real estate loans of \$37.2 million, or 6.5%. As loan demand is affected by a variety of factors,

including general economic conditions, and because of the competition we face and our focus on pricing discipline and credit quality, we cannot be assured that our loan growth will match or exceed the level of increases achieved in prior years. Based upon the current lending environment and economic conditions, the Company does not expect to grow the overall loan portfolio significantly, if at all, at this time and the loan portfolio may continue to shrink due to net loan repayments. The Company's strategy continues to be focused on maintaining credit risk and interest rate risk at appropriate levels given the current credit and economic environments.

In addition, the level of non-performing loans and foreclosed assets may affect our net interest income and net income. While we did not have an overall high level of charge-offs on our non-performing loans prior to 2008, we generally do not accrue interest income on these loans and do not recognize interest income until the loans are repaid or interest payments have been made for a period of time sufficient to provide evidence of performance on the loans. Generally, the

higher the level of non-performing assets, the greater the negative impact on interest income and net income. We expect loan loss provision, non-performing assets and foreclosed assets to remain elevated. In addition, expenses related to the credit resolution process could also remain elevated.

In the six months ended June 30, 2010, Great Southern's available-for-sale securities decreased \$25.3 million, or 3.3%, from \$764.3 million at December 31, 2009, to \$739.0 million at June 30, 2010. The majority of this decrease was in mortgage-backed securities which decreased \$81.9 million, or 13.0%, primarily due to the sale of certain of these securities, resulting in gains of \$3.5 million which were recorded in non-interest income. Partially offsetting this decrease was the purchase of SBA loan pools which total \$61.8 million at June 30, 2010. Collateralized mortgage obligations also decreased \$9.4 million, or 18.1% due to principal reductions.

Great Southern had cash and cash equivalents of \$465.2 million at June 30, 2010 compared to \$444.6 million at December 31, 2009. Cash and cash equivalents increased significantly in 2009 primarily as a result of the FDIC-assisted transactions involving certain TeamBank and Vantus Bank assets and liabilities. Cash and cash equivalents also increased because of net loan repayments.

The Company attracts deposit accounts through its retail branch network, correspondent banking and corporate services areas, and brokered deposits. The Company then utilizes these deposit funds, along with Federal Home Loan Bank (FHLBank) advances and other borrowings, to meet loan demand. In the six months ended June 30, 2010, total deposit balances decreased \$106.9 million, or 3.9%. Interest-bearing transaction accounts increased \$109.9 million while non-interest-bearing checking accounts decreased \$13.2 million. Retail certificates of deposit decreased \$51.2 million while total brokered deposits decreased \$52.5 million. Great Southern Bank customer deposits totaling \$259.2 million and \$359.1 million, at June 30, 2010 and December 31, 2009, respectively, were part of the CDARS program which allows bank customers to maintain balances in an insured manner that would otherwise exceed the FDIC deposit insurance limit. The FDIC considers these customer accounts to be brokered deposits due to the fees paid in the CDARS program. The level of competition for deposits in our markets is high. While it is our goal to gain checking account and retail certificate of deposit market share in our branch footprint, we cannot be assured of this in future periods. In the second quarter of 2010, the Company allowed some of its relatively high-cost deposits and borrowings to mature without replacement through the use of a portion of its excess cash and cash equivalents to reduce interest expense.

Total brokered deposits, excluding the CDARS accounts discussed above, were \$216.6 million at June 30, 2010, down from \$269.2 million at December 31, 2009. The decrease was the result of \$77.6 million of reductions in CDARS purchased funds offset in part by \$25.0 million in new brokered deposits issued by the Company. These new brokered deposits will provide a low fixed rate of interest for the next three years. No interest rate swaps are associated with these brokered certificates. The majority of the Company's brokered certificates of deposit have fixed rates of interest and mature in 2011 and 2012.

Our ability to fund growth in future periods may also be dependent on our ability to continue to access brokered deposits and FHLBank advances. In times when our loan demand has outpaced our generation of new deposits, we have utilized brokered deposits and FHLBank advances to fund these loans. These funding sources have been attractive to us because we can create variable rate funding, if desired, which more closely matches the variable rate nature of much of our loan portfolio. While we do not currently anticipate that our ability to access these sources will be reduced or eliminated in future periods, if this should happen, the limitation on our ability to fund additional loans would adversely affect our business, financial condition and results of operations.

Our net interest income may be affected positively or negatively by market interest rate changes. A large portion of our loan portfolio is tied to the "prime rate" and adjusts immediately when this rate adjusts (without the effect of loan

interest rate floors, which are discussed below). We monitor our sensitivity to interest rate changes on an ongoing basis (see "Item III. Quantitative and Qualitative Disclosures About Market Risk").

The current level and shape of the interest rate yield curve poses challenges for interest rate risk management. The FRB last cut interest rates on December 16, 2008. Great Southern has a significant portfolio of loans which are tied to a "prime rate" of interest. Some of these loans are tied to some national index of "prime," while most are indexed to "Great Southern prime." The Company has elected to leave its "Great Southern prime rate" of interest at 5.00%. This does not affect a large number of customers, as a majority of the loans indexed to "Great Southern prime" are already at interest rate floors which are provided for in individual loan documents. But for the interest rate floors, a rate cut by the FRB generally would have an anticipated immediate negative impact on the Company's net interest income due to the large total balance of loans which generally adjust immediately as the Federal Funds rate adjusts.

Loans at their floor rates are subject to the risk that borrowers will seek to refinance elsewhere at the lower market rate, however. Because the Federal Funds rate is already very low, there may also be a negative impact on the Company's net interest income due to the Company's inability to lower its funding costs significantly in the current environment. Conversely, interest rate increases would normally result in increased interest rates on our prime-based loans. However, the interest rate floors in effect may limit the immediate increase in interest rates on these loans, thereby negatively impacting our net interest income.

The potentially negative impact of low loan interest rates since December 2008 was mitigated by the positive effects of the Company's loans which have interest rate floors. At June 30, 2010, the Company had a portfolio (excluding the loans acquired in the FDIC-assisted transactions) of prime-based loans totaling approximately \$771 million with rates that change immediately with changes to the prime rate of interest. Of this total, \$654 million also had interest rate floors. These floors were at varying rates, with \$129 million of these loans having floor rates of 7.0% or greater and another \$474 million of these loans having floor rates between 5.0% and 7.0%. At June 30, 2010, all of these loans were at their floor rates. During 2003 and 2004, the Company's loan portfolio had loans with rate floors that were much lower. However, since market interest rates were also much lower at that time, these loan rate floors went into effect and established a loan rate which was higher than the contractual rate would have otherwise been. This contributed to a loan yield for the entire portfolio which was approximately 139 and 55 basis points higher than the "prime rate of interest" at December 31, 2003 and 2004, respectively. As interest rates rose in the second half of 2004 and throughout 2005 and 2006, these interest rate floors were exceeded and the loans reverted back to their normal contractual interest rate terms. At December 31, 2005, the loan yield for the portfolio was approximately 8 basis points higher than the "prime rate of interest," resulting in lower interest rate margins. At December 31, 2006, the loan portfolio yield was approximately 5 basis points lower than the "prime rate of interest." During the latter portion of 2007 and throughout subsequent periods, as the "prime rate of interest" decreased, the Company's loan portfolio again had loans with rate floors that went into effect and established a loan rate which was higher than the contractual rate would have otherwise been. This contributed to a loan yield for the entire portfolio which was approximately 33 basis points higher than the "prime rate of interest" at December 31, 2007. The loan yield for the portfolio had increased to a level that was approximately 300 and 310 basis points higher than the national "prime rate of interest" at December 31, 2009 and December 31, 2008, respectively. The loan yield for the portfolio declined to a level that was approximately 286 basis points higher than the national "prime rate of interest" at June 30, 2010. While interest rate floors have had an overall positive effect on the Company's results, they do subject the Company to the risk that borrowers will elect to refinance their loans with other lenders. To the extent economic conditions improve, the risk that borrowers will seek to refinance their loans increases.

The Company's profitability is also affected by the level of its non-interest income and operating expenses. Non-interest income consists primarily of service charges and ATM fees, commissions earned by our travel, insurance and investment divisions, accretion income related to the FDIC-assisted acquisitions, late charges and prepayment fees on loans, gains on sales of loans and available-for-sale investments and other general operating income. In 2009, non-interest income was positively affected by the gains recognized on the FDIC-assisted transactions. On July 1, 2010, a federal rule went into effect which prohibits a financial institution from automatically enrolling customers in overdraft protection programs, on ATM and one-time debit card transactions, unless a consumer consents, or opts in, to the overdraft service. This new rule may adversely affect the amount of non-interest income we generate (see discussion in "Business Initiatives" below). Operating expenses consist primarily of salaries and employee benefits, occupancy-related expenses, expenses related to foreclosed assets, postage, FDIC deposit insurance, advertising and public relations, telephone, professional fees, office expenses and other general operating expenses.

Total non-interest income increased \$4.8 million in the three months ended June 30, 2010 when compared to the three months ended June 30, 2009. This increase was primarily due to gains of \$3.5 million recorded during the current period from sales of mortgage-backed securities, while during the 2009 period, securities transactions were

minimal. Other types of non-interest income such as commission income, deposit account charges and accretion of income related to the FDIC-assisted acquisitions also contributed to the current period increase. Details of these increases are provided in the “Results of Operations and Comparison for the Three and Six Months Ended June 30, 2010 and 2009” section of this Quarterly Report on Form 10-Q.

Total non-interest income decreased \$33.7 million in the six months ended June 30, 2010 when compared to the six months ended June 30, 2009. A significant increase in non-interest income in the 2009 period resulted from the one-time gain of \$43.9 million recorded from the assets acquired and liabilities assumed in the FDIC-assisted acquisition of TeamBank. This increase was partially offset by the impairment write-down in value of certain investments which totaled \$4.0 million in the 2009 period. During the 2010 period, no such impairment write-downs on investments were necessary, though gains of \$3.5 million were recorded from sales of mortgage-backed securities. Income

recorded due to the accretion of the discount related to the FDIC indemnification assets booked in connection with the 2009 acquisitions increased \$1.4 million in the current period. Additional income will be recognized in future periods as loans are collected from customers and as reimbursements of losses are collected from the FDIC, but we cannot estimate the timing of this income due to the variables associated with these transactions. Deposit account charges also increased as a result of the TeamBank and Vantus Bank transactions and overall growth in checking account deposits.

Total non-interest expense increased in the second quarter and first six months of 2010 compared to the same periods in 2009 due primarily to the costs of operating the former TeamBank and former Vantus Bank, including increased salaries and benefits and occupancy and equipment expenses in particular. Due to the increase in the level of foreclosed assets, foreclosure-related expenses have also increased significantly in 2010 compared to the same periods in 2009. In addition, non-interest expense increases related to the continued growth of the Company. In 2009, the Company opened banking centers in Creve Coeur, Mo. and Lee's Summit, Mo., and in 2010, the Company opened a banking center in Rogers, Ark.

In 2009, the FDIC significantly increased insurance premiums for all banks. This resulted in increased expense in both 2009 and 2010 for the Company due to higher assessable deposits and a higher assessment rate. Due to losses and projected losses to the deposit insurance fund, in addition to the regular quarterly deposit insurance assessments, the FDIC has, at times, imposed special assessments on all insured depository institutions. A special assessment was imposed in the second quarter of 2009 resulting in an additional \$1.7 million of insurance premiums expensed in 2009. In the fourth quarter of 2009, the FDIC adopted regulations that required insured depository institutions to prepay on December 30, 2009, their estimated quarterly risk-based assessments for the fourth quarter of 2009 and all of 2010, 2011 and 2012, along with their quarterly risk-based assessment for the fourth quarter of 2009. The FDIC collected the Company's prepaid assessments amounting to \$13.2 million on December 30, 2009. The prepaid assessments will be expensed over the three year period.

Effect of Federal Laws and Regulations

General. Federal legislation and regulation significantly affect the banking operations of the Company and the Bank, and have increased competition among commercial banks, savings institutions, mortgage banking enterprises and other financial institutions. In particular, the capital requirements and operations of regulated depository institutions such as the Company and the Bank have been and will be subject to changes in applicable statutes and regulations from time to time, which changes could, under certain circumstances, adversely affect the Company and/or the Bank.

Recent Legislation Impacting the Financial Services Industry. On July 21 2010, sweeping financial regulatory reform legislation entitled the "Dodd-Frank Wall Street Reform and Consumer Protection Act" (the "Dodd-Frank Act") was signed into law. The Dodd-Frank Act implements far-reaching changes across the financial regulatory landscape, including provisions that, among other things, will:

- Centralize responsibility for consumer financial protection by creating a new agency, the Bureau of Consumer Financial Protection, with broad rulemaking, supervision and enforcement authority for a wide range of consumer protection laws that would apply to all banks.
- Require new capital rules and apply the same leverage and risk-based capital requirements that apply to insured depository institutions to most bank holding companies.
- Require the federal banking regulators to seek to make their capital requirements countercyclical, so that capital requirements increase in times of economic expansion and decrease in times of economic contraction.
- Change the assessment base for federal deposit insurance from the amount of insured deposits to consolidated average assets less tangible capital.

- Increase the minimum ratio of net worth to insured deposits of the Deposit Insurance Fund from 1.15% to 1.35% and require the FDIC, in setting assessments, to offset the effect of the increase on institutions with assets of less than \$10 billion. As a result, this increase is expected to impose more deposit insurance cost on institutions with assets of \$10 billion or more.
- Provide for new disclosure and other requirements relating to executive compensation and corporate governance.
- Make permanent the \$250 thousand limit for federal deposit insurance and provide unlimited federal deposit insurance until January 1, 2013 for non-interest bearing demand transaction accounts at all insured depository institutions.

- Repeal the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts.
 - Increase the authority of the Federal Reserve Board to examine the Company and its non-bank subsidiaries.
- Require all bank holding companies to serve as a source of financial strength to their depository institution subsidiaries in the event such subsidiaries suffer from financial distress.

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company and the financial services industry more generally. Provisions in the legislation that affect deposit insurance assessments, and payment of interest on demand deposits could increase the costs associated with deposits. Provisions in the legislation that require revisions to the capital requirements of the Company and the Bank could require the Company and the Bank to seek additional sources of capital in the future.

Business Initiatives

In May 2010, the Company opened its first full-service retail banking center in Rogers, Ark. The banking center operates from the same office building as the Company's loan production office and Great Southern Travel agency.

On June 30, 2010, Great Southern Travel acquired Pathfinder Travel and Cruises in Olathe, Kan., marking its first office in the state of Kansas. The Company also operates a banking center in Olathe. The cost of this acquisition was not material.

Two other banking centers are expected to open later in 2010 as part of the Company's overall long-term plan to open two to three banking centers per year as market conditions warrant. The Company will build its first office in Forsyth, Mo., located at 15695 Highway 160. East of Branson, Mo., the banking center will complement the Company's four banking centers operating in this area.

A full-service banking center in Des Peres, Mo., is currently under construction and will be the Company's second location in the St. Louis metropolitan area. Located at 11689 Manchester, the banking center is approximately seven miles from the Company's Creve Coeur, Mo., office that opened in 2009. A loan production office and two Great Southern Travel offices also operate in the St. Louis market.

New overdraft regulations on ATM and certain debit card transactions were effective July 1, 2010, for new customers and will go into effect August 13, 2010, for existing customers. The new overdraft regulations are expected to adversely affect overdraft fees during the second half of 2010; however, the final financial impact is uncertain as communication with the affected customer base to determine their desire for overdraft services is ongoing. At this time, a significant number of affected customers have chosen to continue overdraft coverage. Based on our preliminary analysis, we expect the financial impact of this regulation may be a reduction in earnings per diluted common share of approximately \$0.01 to \$0.03 per quarter (based on the number of common shares outstanding at June 30, 2010).

Comparison of Financial Condition at June 30, 2010 and December 31, 2009

During the six months ended June 30, 2010, the Company decreased total assets by \$152.3 million to \$3.49 billion. Most of the decrease was attributable to decreases in net loans and securities available for sale, partially offset by increases in cash and cash equivalents. Net loans decreased \$147.5 million as compared to December 31, 2009, due in part to a \$67.3 million decrease in the acquired loan portfolios. Excluding loans covered in FDIC-assisted

transactions, outstanding construction loans and commercial real estate loans decreased \$51.6 million and \$37.2 million, respectively. The Company's strategy continues to be focused on maintaining credit risk and interest rate risk at appropriate levels given the current credit and economic environments. Aside from any potential future acquisitions, of which none are currently contemplated, the Company does not expect to grow the loan portfolio significantly at this time. Securities available for sale decreased \$25.3 million as compared to December 31, 2009, primarily because of sales and principal reductions in the Company's mortgage-backed securities which decreased \$81.9 million. Purchases of SBA loan pools partially offset this decrease and the balance of these securities was \$61.8 million at June 30, 2010. SBA loan pools were purchased for their variable interest rate characteristics and guarantee by the federal government, which makes them relatively low-risk investments. While there is no specifically stated goal, the available-for-sale securities portfolio has in recent quarters been approximately 15% to 20% of total assets. The available-for-sale securities portfolio was 21.2% and 21.0% of total assets at June 30, 2010 and December 31, 2009, respectively. These levels are on the high-side of recent averages because of the 2009 FDIC-assisted transactions and because of the

Company's efforts to maintain excess liquidity during uncertain economic times as discussed below in regard to cash and cash equivalents. Cash and cash equivalents increased \$20.6 million as compared to December 31, 2009 due to repayments of loans and investment securities. In some instances, the Company invested these excess funds in short-term cash equivalents that caused the Company to earn a small positive or a negative spread relative to the cost of funds. While the Company generally earned a positive spread on securities purchased, it was sometimes much smaller than the Company's overall net interest spread, having the effect of increasing net interest income but negatively affecting net interest margin in 2009 and 2010. The Company expects that it may maintain a higher level of cash and cash equivalents for the time being as excess liquidity in these uncertain times for the U.S. economy and the banking industry, subject to funding activities which are discussed below, and recognizing that this will continue to have the effect of suppressing net interest margin and net interest income.

Total liabilities decreased \$157.8 million from December 31, 2009 to \$3.18 billion at June 30, 2010. The decrease was primarily attributable to decreases in deposits and securities sold under repurchase agreements with customers. Total deposits decreased \$106.9 million from December 31, 2009. Checking account balances totaled \$1.18 billion at June 30, 2010, up from \$1.08 billion at December 31, 2009. Interest-bearing checking accounts (mainly money market accounts) increased \$109.9 million and non-interest bearing checking accounts decreased \$13.2 million. Total brokered deposits (excluding CDARS customer account balances) were \$216.6 million at June 30, 2010, compared to \$269.1 million at December 31, 2009. CDARS purchased funds decreased \$77.5 million, partially offset by the issuance of \$25.0 million in new brokered certificates during the 2010 period. In addition, at June 30, 2010 and December 31, 2009, Great Southern Bank customer deposits totaling \$259.2 million and \$359.1 million, respectively, were part of the CDARS program which allows bank customers to maintain balances in an insured manner that would otherwise exceed the FDIC deposit insurance limit. The FDIC counts these deposits as brokered, but these are deposit accounts that we generate with customers in our local markets. Securities sold under reverse repurchase agreements with customers decreased \$60.9 million from December 31, 2009 as these balances fluctuate over time. FHLBank advances decreased slightly from the December 31, 2009 level. The level of FHLBank advances also fluctuates depending on growth in the Company's loan portfolio and other funding needs and sources available to the Company. Most of the Company's FHLBank advances are fixed-rate advances that cannot be repaid prior to maturity without incurring significant penalties.

Total stockholders' equity increased \$5.5 million from \$298.9 million at December 31, 2009 to \$304.4 million at June 30, 2010. The Company recorded net income of \$11.4 million for the six months ended June 30, 2010, common and preferred dividends declared were \$6.3 million and accumulated other comprehensive gain decreased \$194,000. The decrease in accumulated other comprehensive gain resulted from decreases in the fair value of the Company's available-for-sale investment securities. In addition, total stockholders' equity increased \$374,000 due to stock option exercises.

Our participation in the Capital Purchase Program ("CPP") of the U.S. Department of the Treasury (the "Treasury") currently precludes us from purchasing shares of the Company's stock or redeeming trust preferred securities without the Treasury's consent until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. Management has historically utilized stock buy-back programs from time to time as long as repurchasing the stock contributed to the overall growth of shareholder value. The number of shares of stock repurchased and the price paid is the result of many factors, several of which are outside of the control of the Company. The primary factors, however, are the number of shares available in the market from sellers at any given time and the price of the stock within the market as determined by the market.

Results of Operations and Comparison for the Three and Six Months Ended June 30, 2010 and 2009

General

Net income was \$5.8 million for the three months ended June 30, 2010 compared to net income of \$3.2 million for the three months ended June 30, 2009. This increase of \$2.6 million was primarily due to an increase in net interest income of \$5.6 million, or 26.0%, and an increase in non-interest income of \$4.8 million, or 51.5%, partially offset by an increase in provision for loan losses of \$5.2 million, or 76.5%, and an increase in provision for income taxes of \$1.7 million, or 193.3%. Net income available to common shareholders was \$5.0 million and \$2.3 million for the quarters ended June 30, 2010 and 2009, respectively.

Net income was \$11.4 million for the six months ended June 30, 2010 compared to net income of \$32.3 million for the six months ended June 30, 2009. This decrease of \$20.9 million was primarily due to a decrease in non-interest income of \$33.7 million, or 59.3%, an increase in non-interest expense of \$8.3 million, or 23.9%, and an increase in provision for loan losses of \$5.7 million, or 48.3%, partially offset by an increase in net interest income of \$14.6 million, or 37.5%, and a decrease in provision for income taxes of \$12.1 million, or 70.7%. Net income available to common shareholders was \$9.7 million and \$30.7 million for the six months ended June 30, 2010 and 2009, respectively.

Total Interest Income

Total interest income decreased \$359,000, or 0.9%, during the three months ended June 30, 2010 compared to the three months ended June 30, 2009. The decrease was due to decreased interest income on investments and other interest-earning assets, partially offset by increased interest income on loans. Interest income on investment securities and other interest-earning assets decreased because of much lower average rates of interest which were partially offset by higher average balances. The higher average balances were primarily a result of increased levels of securities and interest-earning deposits held for the purpose of liquidity and the securities and cash equivalents added from the FDIC-assisted transactions in the first and third quarters of 2009. Interest income for loans increased due to higher average balances, partially offset by slightly lower average rates of interest resulting from discounted loans added through the FDIC-assisted transactions in the first and third quarters of 2009 and the related yields earned.

Total interest income increased \$5.1 million, or 6.9%, during the six months ended June 30, 2010 compared to the six months ended June 30, 2009. The increase was due to increased interest income on loans partially offset by decreased interest income on investments and other interest-earning assets. Interest income on investment securities and other interest-earning assets decreased because of much lower average rates of interest which were offset by higher average balances. The higher average balances were primarily a result of increased levels of securities and interest-earning deposits held for the purpose of liquidity and the securities and cash equivalents added from the FDIC-assisted transactions in the first and third quarters of 2009. Interest income for loans increased due to higher average balances and consistent average rates of interest resulting from discounted loans added through the FDIC-assisted transactions in the first and third quarters of 2009 and the related yields earned.

Interest Income - Loans

During the three months ended June 30, 2010 compared to the three months ended June 30, 2009, interest income on loans increased due to higher average balances, partially offset by lower average interest rates. Interest income increased \$1.5 million as the result of higher average loan balances which increased from \$1.96 billion during the quarter ended June 30, 2009 to \$2.04 billion during the quarter ended June 30, 2010. The higher average balance resulted principally from the loans added at fair market value from the FDIC-assisted transactions, increasing loans overall, with the exception of decreased average balances of construction loans partially offsetting the increases. The

Bank's outstanding construction loan balance decreased significantly in recent periods, as many projects were completed in the past 12 to 18 months and demand for new construction loans has declined. As the projects relating to construction loans were completed and the loans moved to permanent financing, commercial real estate loans increased. The Bank's one- to four-family residential loan portfolio balance increased in 2009 and 2010 due to increased production by the Bank's mortgage division. The Bank generally sells fixed-rate one- to four-family residential loans in the secondary market and keeps variable-rate one- to four-family residential loans.

Interest income decreased \$552,000 as a result of lower average interest rates on loans. The average yield on loans decreased slightly from 6.48% during the three months ended June 30, 2009, to 6.41% during the three months ended June 30, 2010. Average loan rates were very similar in 2009 compared to 2010, as a result of market rates of interest, primarily the "prime rate" of interest, remaining flat during this period. During 2008, the "prime rate" decreased 4.00% to a rate of 3.25% at December 31, 2008, where the prime rate now remains. A large portion of the Bank's loan portfolio adjusts with changes to the "prime rate" of interest. The Company has a portfolio of prime-based loans which have interest rate floors. Beginning in 2008, the declining interest rates put these loan rate floors in effect and established a loan rate which was higher than the contractual rate would have otherwise been. Great Southern has a significant portfolio of loans which are tied to a "prime rate" of interest. Some of these loans are tied to some national index of "prime," while most are indexed to "Great Southern prime." The Company has elected to leave its "prime rate" of interest at 5.00% in light of the current highly competitive funding environment for deposits and wholesale funds. This does not affect a large number of customers as a majority of the loans indexed to "Great Southern prime" are already at interest rate floors, which are provided for in individual loan documents. In the three months ended June 30, 2010, the average yield on loans was 6.41% versus an average prime rate for the period of 3.25%, or a difference of a positive 316 basis points. In the three months ended June 30, 2009, the average yield on loans was 6.48% versus an average prime rate for the period of 3.25%, or a difference of a positive 323 basis points.

During the six months ended June 30, 2010 compared to the six months ended June 30, 2009, interest income on loans increased due to higher average balances and higher average interest rates. Interest income increased \$6.1 million as the result of higher average loan balances which increased from \$1.88 billion during the six months ended June 30, 2009 to \$2.07 billion during the six months ended June 30, 2010. The higher average balance resulted principally from the loans added at fair market value from the FDIC-assisted transactions, increasing loans overall, with the exception of decreased average balances of construction loans partially offsetting the increases. The Bank's outstanding construction loan balance has decreased significantly in recent periods, as many projects have been completed in the past 12 to 18 months and demand for new construction loans has declined. As the projects relating to construction loans were completed and the loans moved to permanent financing, commercial real estate loans increased. The Bank's one- to four-family residential loan portfolio balance increased in 2009 and 2010 due to increased production by the Bank's mortgage division, as discussed above.

Interest income increased \$382,000 as a result of higher average interest rates on loans. The average yield on loans increased slightly from 6.25% during the six months ended June 30, 2009, to 6.29% during the six months ended June 30, 2010. The reasons for relatively consistent average loan rates in the comparable six-month periods are the same as those described previously in the comparable three-month periods. In the six months ended June 30, 2010, the average yield on loans was 6.29% versus an average prime rate for the period of 3.25%, or a difference of a positive 304 basis points. In the six months ended June 30, 2009, the average yield on loans was 6.25% versus an average prime rate for the period of 3.25%, or a difference of a positive 300 basis points.

Interest Income - Investments and Other Interest-earning Assets

Interest income on investments and other interest-earning assets decreased in the three months ended June 30, 2010 compared to the three months ended June 30, 2009. Interest income decreased \$2.0 million as a result of a decrease in average interest rates from 3.53% during the three months ended June 30, 2009, to 2.81% during the three months ended June 30, 2010. In addition to the SBA loan pools, the majority of the securities added in 2009 and 2010 were backed by hybrid ARMs which have fixed rates of interest for a period of time (generally one to ten years) and then adjust annually. The actual amount of securities that will reprice and the actual interest rate changes on these securities are subject to the level of prepayments on these securities and the changes that actually occur in market interest rates (primarily treasury rates and LIBOR rates). Mortgage-backed securities are also subject to reduced yields due to more

rapid prepayments in the underlying mortgages. As a result, premiums on these securities may be amortized against interest income more quickly, thereby reducing the yield recorded. Interest income increased \$698,000 as a result of an increase in average balances from \$953 million during the three months ended June 30, 2009, to \$1.01 billion during the three months ended June 30, 2010. This increase was primarily in interest-earning deposits and available-for-sale SBA loan pools, where securities were needed for liquidity and pledging against deposit accounts under customer repurchase agreements. In addition, these SBA loan pools have rates that will reprice with changes to the prime rate of interest. On March 20, 2009 and September 4, 2009, the Company also acquired approximately \$112 million and \$23 million, respectively, of investment securities as part of two FDIC-assisted transactions. These investments were recorded at their fair values at the dates of acquisition with related market yields at that time.

Interest income on investments and other interest-earning assets decreased in the six months ended June 30, 2010 compared to the six months ended June 30, 2009. Interest income decreased by \$4.1 million as a result of a decrease in average interest rates from 3.83% during the three months ended June 30, 2009, to 2.95% during the three months ended June 30, 2010. The reasons for these changes in the comparable six-month periods are primarily the same as those described previously in the comparable three-month periods. In addition, the Federal Home Loan Mortgage Corporation purchased approximately \$30 million of delinquent loans in mortgage-backed securities pools owned by the Company in March 2010. This reduced the Company's income (through higher premium amortization levels) by \$400,000. Interest income increased \$2.8 million as a result of an increase in average balances from \$839 million during the six months ended June 30, 2009, to \$1.00 billion during the six months ended June 30, 2010. This increase was primarily in interest-earning deposits and available-for-sale SBA loan pools, where securities were needed for liquidity and pledging against deposit accounts under customer repurchase agreements.

In addition to the increase in securities, the Company has also increased interest-earning deposits and non-interest-earning cash equivalents, as additional liquidity was maintained in 2009 and 2010 due to uncertainty in the financial system and low loan demand. These deposits and cash equivalents earn very low (or no) yield and therefore negatively impact the Company's net interest margin. At June 30, 2010, the Company had cash and cash equivalents of \$465.2 million compared to \$444.6 million at December 31, 2009. For the three and six months ended June 30, 2010, compared to the same periods in 2009, the average balances of investment securities and other interest-earning assets increased by approximately \$53.2 million and \$161.1 million, respectively, due to excess funds for liquidity and the purchase of investment securities to pledge against public funds deposits, customer repurchase agreements and structured repo borrowings. While the Company earned a positive spread on these securities (leading to higher net interest income), it was much smaller than the Company's overall net interest spread, having the effect of reducing net interest margin. See "Net Interest Income" for additional information on the impact of this interest activity.

Total Interest Expense

Total interest expense decreased \$6.0 million, or 32.3%, during the three months ended June 30, 2010, when compared with the three months ended June 30, 2009, primarily due to a decrease in interest expense on deposits of \$4.8 million, or 32.3%, a decrease in interest expense on short-term and structured repo borrowings of \$975,000, or 55.0%, a decrease in interest expense on FHLBank advances of \$85,000, or 5.7% and a decrease in interest expense on subordinated debentures issued to capital trusts of \$60,000, or 29.7%.

Total interest expense decreased \$9.5 million, or 27.1%, during the six months ended June 30, 2010, when compared with the six months ended June 30, 2009, primarily due to a decrease in interest expense on deposits of \$8.2 million, or 28.3%, a decrease in interest expense on short-term and structured repo borrowings of \$1.5 million, or 45.8%, and a decrease in interest expense on subordinated debentures issued to capital trusts of \$177,000, or 38.9%, partially offset by an increase in interest expense on FHLBank advances of \$367,000, or 15.1%.

Interest Expense – Deposits

Interest expense on demand deposits increased \$871,000 due to an increase in average balances from \$586 million during the three months ended June 30, 2009, to \$898 million during the three months ended June 30, 2010. Average non-interest-bearing demand balances increased from \$184 million in the three months ended June 30, 2009, to \$258 million in the three months ended June 30, 2010. The increase in average balances on both types of demand deposits was primarily a result of the FDIC-assisted transactions completed in March and September of 2009, as well as organic growth in the Company's deposit base, particularly in interest-bearing checking accounts. Interest expense on demand deposits decreased \$319,000 due to a decrease in average rates from 1.09% during the three months ended

June 30, 2009, to 0.96% during the three months ended June 30, 2010. The average interest rates decreased due to lower overall market rates of interest throughout 2009 and the first six months of 2010. Market rates of interest on checking and money market accounts have been decreasing since late 2007 when the FRB began reducing short-term interest rates.

Interest expense on deposits decreased \$4.6 million as a result of a decrease in average rates of interest on time deposits from 3.24% during the three months ended June 30, 2009, to 2.05% during the three months ended June 30, 2010. Market rates of interest on new certificates have been decreasing since late 2007 when the FRB began reducing short-term interest rates. Interest expense on deposits decreased \$739,000 due to a decrease in average balances of time deposits from \$1.66 billion during the three months ended June 30, 2009, to \$1.56 billion during the three months ended June 30, 2010. A large portion of the Company's certificate of deposit portfolio matures within one year and so reprices fairly quickly; this is consistent with the portfolio over the past several years. The decrease in average balances on certificates of deposit was primarily a result of decreases in brokered certificates and CDARS purchased funds as the Company began redeeming them or replacing them with lower rate deposits in the latter quarters of 2009. In 2010, in some cases, the Company elected not to replace these funds as they matured.

Interest expense on demand deposits increased \$1.6 million due to an increase in average balances from \$541 million during the six months ended June 30, 2009, to \$874 million during the six months ended June 30, 2010. Average non-interest-bearing demand balances increased from \$164 million in the six months ended June 30, 2009, to \$253 million in the six months ended June 30, 2010. The increase in average balances on both types of demand deposits was primarily a result of the FDIC-assisted transactions completed in March and September of 2009, as well as organic growth in the Company's deposit base, particularly in interest-bearing checking accounts. Interest expense on demand deposits decreased \$430,000 due to a decrease in average rates from 1.11% during the six months ended June 30, 2009, to 0.97% during the six months ended June 30, 2010. The average interest rates decreased due to lower overall market rates of interest throughout 2009 and the first six months of 2010. Market rates of interest on checking and money market accounts have been decreasing since late 2007 when the FRB began reducing short-term interest rates.

Interest expense on deposits decreased \$11.1 million as a result of a decrease in average rates of interest on time deposits from 3.45% during the six months ended June 30, 2009, to 2.07% during the six months ended June 30, 2010. Market rates of interest on new certificates have been decreasing since late 2007 when the FRB began reducing short-term interest rates. Interest expense on deposits increased \$1.6 million due to an increase in average balances of time deposits from \$1.52 billion during the six months ended June 30, 2009, to \$1.62 billion during the six months ended June 30, 2010. The increase in average balances of time deposits was primarily a result of the FDIC-assisted transactions completed in March and September 2009.

As noted above, the Dodd-Frank Act repealed the federal prohibitions on the payment of interest on demand deposits, thereby permitting depository institutions to pay interest on business transaction and other accounts beginning July 21, 2011. Although the ultimate impact of this legislation on the Company has not yet been determined, the Company expects interest costs associated with demand deposits to increase as a result of competitor responses to this change.

Interest Expense - FHLBank Advances, Short-term Borrowings and Structured Repo Borrowings and Subordinated Debentures Issued to Capital Trusts

During the three months ended June 30, 2010 compared to the three months ended June 30, 2009, interest expense on FHLBank advances decreased due to lower average balances, partially offset by higher average interest rates. Interest expense on FHLBank advances decreased \$338,000 due to a decrease in average balances from \$201 million during the three months ended June 30, 2009, to \$168 million during the three months ended June 30, 2010. Interest expense on FHLBank advances increased \$253,000 due to an increase in average interest rates from 2.98% in the three months ended June 30, 2009, to 3.37% in the three months ended June 30, 2010. Average rates on advances increased because of the addition of advances assumed in the FDIC-assisted transaction completed in March of 2009. Certain of the advances assumed were paid off subsequent to June 30, 2009, causing the decrease in average balances while most of the remaining advances are fixed-rate and are subject to penalty if paid off prior to maturity.

During the six months ended June 30, 2010 compared to the six months ended June 30, 2009, interest expense on FHLBank advances increased due to higher average balances and higher average interest rates. Interest expense on FHLBank advances increased \$329,000 due to an increase in average interest rates from 2.97% in the six months ended June 30, 2009, to 3.37% in the six months ended June 30, 2010. Interest expense on FHLBank advances increased \$38,000 due to an increase in average balances from \$165 million during the six months ended June 30, 2009, to \$168 million during the six months ended June 30, 2010. Average balances and rates on advances increased because of the addition of advances assumed in the FDIC-assisted transaction completed in March of 2009. Most of the remaining advances are fixed-rate and are subject to penalty if paid off prior to maturity.

Interest expense on short-term and structured repo borrowings decreased \$733,000 due to a decrease in average rates on short-term borrowings from 1.70% in the three months ended June 30, 2009, to 0.91% in the three months ended

June 30, 2010. The average interest rates decreased due to lower overall market rates of interest in the second quarter of 2010 compared to the same period in 2009. Market rates of interest on short-term borrowings have trended downward since the fourth quarter of 2007 as the FRB decreased short-term interest rates and maintained the rates at historically low levels. Interest expense on short-term and structured repo borrowings decreased \$242,000 due to a decrease in average balances from \$418 million during the three months ended June 30, 2009, to \$353 million during the three months ended June 30, 2010. The decrease in balances of short-term borrowings was primarily due to decreases in securities sold under repurchase agreements with the Company's deposit customers which tend to fluctuate.

Interest expense on short-term and structured repo borrowings decreased \$1.2 million due to a decrease in average rates on short-term borrowings from 1.67% in the six months ended June 30, 2009, to 0.99% in the six months ended June 30, 2010. The average interest rates decreased due to lower overall market rates of interest in the first six months of 2010 compared to the same period in 2009. Market rates of interest on short-term borrowings have trended downward since the fourth quarter of 2007 as the FRB decreased short-term interest rates and maintained the rates at

historically low levels. Interest expense on short-term and structured repo borrowings decreased \$266,000 due to a decrease in average balances from \$400 million during the six months ended June 30, 2009, to \$365 million during the six months ended June 30, 2010. The decrease in balances of short-term borrowings was primarily due to decreases in securities sold under repurchase agreements with the Company's deposit customers which tend to fluctuate.

Interest expense on subordinated debentures issued to capital trusts decreased \$60,000 due to decreases in average rates from 2.62% in the three months ended June 30, 2009, to 1.84% in the three months ended June 30, 2010. As LIBOR rates decreased from the same period a year ago, the interest rates on these instruments also adjusted lower. The average rate of interest on these subordinated debentures decreased in 2010 as these liabilities pay a variable rate of interest that is indexed to LIBOR. These debentures are not subject to an interest rate swap; however, they are variable-rate debentures and bear interest at an average rate of three-month LIBOR plus 1.57%, adjusting quarterly.

Interest expense on subordinated debentures issued to capital trusts decreased \$177,000 due to decreases in average rates from 2.97% in the six months ended June 30, 2009, to 1.81% in the six months ended June 30, 2010. As LIBOR rates decreased from the same period a year ago, the interest rates on these instruments also adjusted lower. The average rate of interest on these subordinated debentures decreased in 2010 as these liabilities pay a variable rate of interest that is indexed to LIBOR.

Net Interest Income

Net interest income for the three months ended June 30, 2010 increased \$5.6 million to \$27.1 million compared to \$21.5 million for the three months ended June 30, 2009. Net interest margin was 3.57% in the three months ended June 30, 2010, compared to 2.97% in the three months ended June 30, 2009, an increase of 60 basis points. The Company's margin was positively impacted primarily by a change in the deposit mix and the ability to reduce interest rates on maturing time deposits. The addition of the TeamBank and Vantus Bank core deposits during 2009 provided a relatively lower-cost funding source, which allowed the Company to reduce some of its higher-cost funds. In the latter quarters of 2009, the Company redeemed brokered deposits or replaced them with lower rate deposits and as retail certificates of deposit matured they were renewed or replaced with retail certificates of deposit with lower market rates of interest. The transition from time deposits to transaction deposits continued into 2010 as lower-cost checking accounts increased while higher-cost CDARS accounts decreased. In the income portion of net interest margin, the TeamBank and Vantus Bank loans were recorded at their fair value at acquisition, which provided a current market yield on the portfolio. This combination of lower rates paid on deposits as the mix changed and repriced and growth in the loan portfolio compared to the year-ago quarter resulted in the increased net interest margin for the quarter ended June 30, 2010.

The Company's overall interest rate spread increased 60 basis points from 2.96% during the three months ended June 30, 2009, to 3.56% during the three months ended June 30, 2010. The gross change was due to an 89 basis point decrease in the weighted average rate paid on interest-bearing liabilities, partially offset by a 29 basis point decrease in the weighted average yield on interest-earning assets. The Company's overall net interest margin increased 60 basis points, or 20.2%, from 2.97% for the three months ended June 30, 2009, to 3.57% for the three months ended June 30, 2010. In comparing the two periods, the yield on loans decreased 7 basis points and the yield on investment securities and other interest-earning assets decreased 72 basis points. The rate paid on deposits decreased 103 basis points, the rate paid on short-term borrowings decreased 79 basis points, the rate paid on subordinated debentures issued to capital trusts decreased 78 basis points and the rate paid on FHLBank advances increased 39 basis points.

Net interest income for the six months ended June 30, 2010 increased \$14.6 million to \$53.7 million compared to \$39.1 million for the six months ended June 30, 2009. Net interest margin was 3.52% in the six months ended June 30, 2010, compared to 2.90% in the six months ended June 30, 2009, an increase of 62 basis points. In comparing the

two periods, the yield on loans increased four basis points while the yield on investment securities and other interest-earnings assets decreased 88 basis points. The rate paid on deposits decreased 116 basis points, the rate paid on short-term borrowings decreased 68 basis points, the rate paid on subordinated debentures issued to capital trusts decreased 116 basis points and the rate paid on FHLBank advances increased 40 basis points.

The Company's overall interest rate spread increased 67 basis points from 2.84% during the six months ended June 30, 2009, to 3.51% during the six months ended June 30, 2010. The gross change was due to a 98 basis point decrease in the weighted average rate paid on interest-bearing liabilities, partially offset by a 31 basis point decrease in the weighted average yield on interest-earning assets.

For additional information on net interest income components, refer to the "Average Balances, Interest Rates and Yields" table in this Quarterly Report on Form 10-Q.

Provision for Loan Losses and Allowance for Loan Losses

The provision for loan losses increased \$5.2 million, from \$6.8 million during the three months ended June 30, 2009, to \$12.0 million during the three months ended June 30, 2010. The provision for loan losses increased \$5.7 million, from \$11.8 million during the six months ended June 30, 2009, to \$17.5 million during the six months ended June 30, 2010. The allowance for loan losses increased \$434,000, or 1.1%, to \$40.5 million at June 30, 2010, compared to \$40.1 million at December 31, 2009. Net charge-offs were \$12.0 million in the three months ended June 30, 2010, versus \$4.4 million in the three months ended June 30, 2009. Net charge-offs were \$17.0 million in the six months ended June 30, 2010, versus \$8.4 million in the six months ended June 30, 2009. Seven relationships accounted for \$12.3 million of the net charge-off total for the six months ended June 30, 2010. At June 30, 2010, portions of two of these relationships were included in non-performing loans, portions of three relationships were included in potential problem loans and two relationships were both foreclosed and sold during the period. General market conditions, and more specifically, housing supply, absorption rates and unique circumstances related to individual borrowers and projects contributed to increased provisions and charge-offs. As properties were categorized as potential problem loans, non-performing loans or foreclosed assets, evaluations were made of the value of these assets with corresponding charge-offs as appropriate.

Management records a provision for loan losses in an amount it believes sufficient to result in an allowance for loan losses that will cover current net charge-offs as well as risks believed to be inherent in the loan portfolio of the Bank. The amount of provision charged against current income is based on several factors, including, but not limited to, past loss experience, current portfolio mix, actual and potential losses identified in the loan portfolio, economic conditions, regular reviews by internal staff and regulatory examinations.

Weak economic conditions, higher inflation or interest rates, or other factors may lead to increased losses in the portfolio and/or requirements for an increase in loan loss provision expense. Management long ago established various controls in an attempt to limit future losses, such as a watch list of possible problem loans, documented loan administration policies and a loan review staff to review the quality and anticipated collectability of the portfolio. More recently, additional procedures have been implemented to provide for more frequent management review of the loan portfolio based on loan size, loan type and delinquencies. Management determines which loans are potentially uncollectible, or represent a greater risk of loss, and makes additional provisions to expense, if necessary, to maintain the allowance at a satisfactory level.

Loans acquired in the March 20, 2009 and September 4, 2009, FDIC-assisted transactions are covered by loss sharing agreements between the FDIC and Great Southern Bank which afford Great Southern Bank significant protection from losses in the acquired portfolio of loans. The acquired loans were initially recorded at their estimated fair value, which incorporated estimated credit losses at the acquisition date. These loans are systematically reviewed by the Company to determine the risk of losses that may exceed those identified at the time of the acquisition. Techniques used in determining risk of loss are similar to the legacy Great Southern Bank portfolio, with most focus being placed on those loan pools which include the larger loan relationships and those loan pools which exhibit higher risk characteristics. Review of the acquired loan portfolio also includes meetings with customers, review of financial information and collateral valuations to determine if any additional losses are apparent.

The Bank's allowance for loan losses as a percentage of total loans, excluding loans covered by the FDIC loss sharing agreements, was 2.48%, 2.40% and 2.35% at June 30, 2010, March 31, 2010 and December 31, 2009, respectively. Management considers the allowance for loan losses adequate to cover losses inherent in the Company's loan portfolio

at June 30, 2010, based on recent reviews of the Company's loan portfolio and current economic conditions. If economic conditions remain weak or deteriorate significantly, it is possible that additional loan loss provisions would be required, thereby adversely affecting future results of operations and financial condition.

Non-performing Assets

Former TeamBank and Vantus Bank non-performing assets, including foreclosed assets, are not included in the totals and in the discussion of non-performing loans, potential problem loans and foreclosed assets below because losses from these assets are substantially covered under loss sharing agreements with the FDIC. In addition, FDIC-covered assets were recorded at their estimated fair values as of March 20, 2009, and September 4, 2009, respectively.

As a result of changes in balances and composition of the loan portfolio, changes in economic and market conditions that occur from time to time, and other factors specific to a borrower's circumstances, the level of non-performing assets will fluctuate.

Non-performing assets, excluding FDIC-covered non-performing assets, at June 30, 2010, were \$69.9 million, an increase of \$4.9 million from \$65.0 million at December 31, 2009. Non-performing assets, excluding FDIC-covered assets, as a percentage of total assets were 2.00% at June 30, 2010, compared to 1.79% at December 31, 2009. Compared to December 31, 2009, non-performing loans decreased \$2.9 million to \$23.6 million while foreclosed assets increased \$8.0 million to \$46.3 million. Construction and land development loans comprised \$9.1 million, or 38.6%, of the total \$23.6 million of non-performing loans at June 30, 2010, compared with \$8.6 million or 32.8% of the total \$26.5 million of non-performing loans at December 31, 2009.

Non-performing Loans. As of June 30, 2010 the total dollar amount of non-performing loans decreased \$2.9 million from December 31, 2009, to \$23.6 million. The following significant decreases to non-performing loans during the six months ended June 30, 2010 were caused by sales or transfers to the Foreclosed Assets category of properties collateralizing the following significant loan relationships:

- A \$2.8 million relationship secured primarily by the real estate of three car dealerships in Southwest Missouri. This relationship was charged down approximately \$273,000 prior to foreclosure of the real estate of two of the three car dealerships totaling \$1.7 million in the first quarter of 2010.
- A \$1.9 million loan relationship secured by a mini-storage facility located in Southwest Missouri and single family residences. The single family residences were sold at a loss of \$57,000 in the first quarter of 2010. The remainder of the relationship, secured by a mini storage facility, was charged down and subsequently sold by the borrower to a third party in the second quarter of 2010.
- A \$1.6 million loan relationship secured by an apartment complex, campground and commercial land located in Southwest Missouri. The apartment complex was foreclosed upon during the first quarter of 2010, and was sold during the second quarter of 2010. The commercial land was transferred to foreclosed assets during the second quarter of 2010. A portion of the relationship totaling \$800,000 and secured by the campground remains in non-performing loans and the borrower has declared bankruptcy.
- A \$1.4 million relationship secured by a subdivision and spec houses in the Branson, Mo. area. This relationship was charged down approximately \$138,000 prior to foreclosure in the first quarter of 2010.
- A \$1.4 million loan relationship secured by single family lots and residences located in Southwest Missouri. A portion of the relationship totaling \$600,000 and collateralized by lots was transferred to foreclosed assets in the second quarter of 2010. The borrower is working to rent or sell the remaining single family residences.

Offsetting these decreases were the following additions to non-performing loans:

- A \$1.4 million loan relationship secured primarily by apartment buildings located in Lake of the Ozarks, Mo.
- A \$1.1 million relationship secured by houses for sale or rental and a lot located in Southwest Missouri. This relationship was previously reported as totaling \$1.4 million at March 31, 2010, but during the quarter ended June

30, 2010, portions of the collateral were sold or transferred to foreclosed assets. The borrower is attempting to generate sufficient rental income from the remaining houses to service this debt.

- A \$1.1 million loan relationship secured by a residential lots and acreage located in Lake of the Ozarks, Mo. The borrower has been unable to generate lot sales or construction activity.

Other notable activity in the Non-performing Loans category included a \$2.1 million relationship secured by a motel located in Springfield, Mo. which was added to non-performing loans during the first quarter of 2010. The motel was sold by the borrower to a third party for \$1.5 million and the remainder of the relationship was charged off during the second quarter of 2010.

At June 30, 2010, four significant relationships totaled \$9.2 million or 39.1% of the non-performing loans category. The following relationship is included in this number and remains in this category from December 31, 2009:

- A \$5.6 million loan relationship secured primarily by commercial lots and acreage located in Northwest Arkansas. The slowdown in the real estate market has made it difficult for the borrower to market or develop the property.

Foreclosed Assets. Foreclosed assets increased a net \$7.8 million during the six months ended June 30, 2010, from \$38.5 million at December 31, 2009, to \$46.3 million at June 30, 2010. During the six months ended June 30, 2010, foreclosed assets increased primarily due to the addition of four relationships totaling \$9.1 million which are described below:

- A \$6.4 million relationship consisting of condominium units and land located near Branson, Mo.
- A \$1.7 million relationship (discussed above as a \$2.8 million relationship) consisting of the real estate of two car dealerships in Southwest Missouri.
- A \$1.0 million relationship (discussed above as a \$1.4 million relationship prior to a charge-off) consisting of a residential subdivision, a commercial subdivision, lots and spec houses in the Branson, Mo. area. Subsequent to foreclosure, two lots were sold, reducing the relationship by approximately \$300,000.

Partially offsetting the additions described above was a \$1.8 million relationship consisting of residential investment properties in the Joplin, Mo. area. During the six months ending June 30, 2010, \$1.1 million of this property was sold and no loss was incurred.

Other notable activity in the Foreclosed Assets category included the following:

- An \$8.2 million relationship consisting of condominium units and commercial land located near Lake of the Ozarks, Mo. was transferred to this category in the first quarter of 2010 and was sold in the second quarter of 2010.
- A \$5.7 million relationship consisting of condominium units located near Lake of the Ozarks, Mo. was transferred to this category in the first quarter of 2010 and was sold in the second quarter of 2010.

At June 30, 2010, ten separate relationships comprised \$26.8 million, or 57.8%, of the total foreclosed assets balance. In addition to the three new relationships described above, seven other of these relationships, listed below, were previously described more fully in the Company's December 31, 2009, Annual Report on Form 10-K under "Foreclosed Assets". During the six months ended June 30, 2010, the activity for these seven relationships included \$1.3 million in sales, partially offsetting the increases discussed above.

- A \$5.5 million asset relationship involving lots in nine subdivisions in the St. Louis, Mo., metropolitan area.
- A \$2.7 million asset relationship involving a residential development in the St. Louis, Mo., metropolitan area.
- A \$2.7 million asset relationship involving a mixed-use development in the St. Louis, Mo., metropolitan area.
- A \$2.1 million asset relationship involving a residential development in the Kansas City, Mo., metropolitan area.
- A \$1.7 million asset relationship involving commercial land to be developed into commercial lots in Northwest Arkansas.
- A \$1.7 million asset relationship involving a partially completed subdivision and commercial land in Southwest Missouri.
 - A \$1.3 million asset relationship involving an office building near Springfield, Mo.

Potential Problem Loans. Potential problem loans decreased \$8.0 million during the six months ended June 30, 2010, from \$50.5 million at December 31, 2009, to \$42.5 million at June 30, 2010. Potential problem loans are loans which management has identified as having possible credit problems that may cause the borrowers difficulty in complying with current repayment terms. These loans are not reflected in non-performing assets. During the six months ended June 30, 2010, potential problem loans decreased primarily due to the transfer of seven unrelated relationships totaling \$29.0 million to non-performing asset categories or performing status. These seven relationships include:

- A \$9.6 million relationship secured by condominium units and commercial land located near Lake of the Ozarks, Mo., which was transferred to non-performing assets and subsequently transferred to foreclosed assets. The relationship was charged-down approximately \$1.4 million at foreclosure during the first quarter of 2010, resulting in a transfer balance of \$8.2 million.
- A \$9.0 million relationship secured by condominium units and land located near Branson, Mo. This relationship was moved to non-performing loans during the second quarter of 2010. It was then charged down \$2.4 million at foreclosure, resulting in a transfer balance of \$6.4 million with \$200,000 remaining in non-performing loans.
- A \$5.6 million relationship secured by a residential complex in St. Louis, Mo. was returned to performing status during the second quarter of 2010 due to proven ability to make consistent payments.
- A \$2.1 million relationship (discussed above) secured by a motel located in Springfield, Mo., was transferred to non-performing loans.
- A \$1.7 million relationship (now a \$1.1 million relationship as discussed above) secured by spec houses and lots located in Southwest Missouri which was transferred to non-performing loans. During the first quarter of 2010, one loan included in this relationship was paid off due to the sale of the collateral, reducing the relationship \$170,000, and a charge-off of \$164,000 was also recorded.
- A \$1.0 million relationship secured by duplexes near Springfield, Mo., was foreclosed during the second quarter of 2010.

Offsetting the above decreases to Potential Problem Loans was the addition of the following eight unrelated relationships totaling \$22.8 million:

- A \$7.0 million relationship secured by a residential subdivision development located in Northwest Arkansas. The subdivision is complete; however, lot sales have been slow.
 - A \$6.6 million relationship secured by commercial land in Northwest Arkansas.
 - A \$1.8 million relationship secured by single family homes in the St. Louis, Mo. area.
- A \$1.8 million relationship secured by townhomes, a spec house, vacant lots, boat docks and equipment located in Lake of the Ozarks, Mo.
- A \$1.6 million relationship secured by a shopping center, lots and land located in Southwest Missouri. Vacancies in the shopping center have increased and the borrower has been unable to generate land sales.
- A \$1.5 million relationship secured primarily by subdivision lots and rental houses and duplexes in Southwest Missouri.
 - A \$1.3 million relationship secured by waterfront acreage in Lake of the Ozarks, Mo.
- A \$1.2 million relationship secured by a shopping center in Tennessee with cash flow issues due to vacancies.

Other notable activity in Potential Problem Loans included the addition of a \$2.0 million relationship secured by condominium units and land in Branson, Mo. in the first quarter of 2010. During the second quarter of 2010, a portion of this relationship totaling \$1.0 million was paid off while \$583,000 was foreclosed upon and subsequently sold with no loss incurred. One loan totaling \$390,000 remained after this activity and was transferred to non-performing loans.

At June 30, 2010, fourteen significant relationships accounted for \$37.9 million of the total Potential Problem Loan balance of \$42.5 million. Six significant relationships remain from December 31, 2009 and were previously described in the Company's December 31, 2009, Annual Report on Form 10-K under "Potential Problem Loans".

Non-interest Income

For the three months ended June 30, 2010, non-interest income increased \$4.8 million, or 51.5%, to \$14.1 million when compared to the three months ended June 30, 2009. The following items contributed to the increase:

Gains on securities: Gains of \$3.5 million were recorded during the current period due to sales of mortgage-backed securities, while during the 2009 period, securities transactions were minimal. Based on analyses of the securities portfolio, no impairment write-downs were necessary in the second quarter of 2010 or 2009.

Commission income: Commission income increased almost \$600,000 over the prior period due to increased activity for Great Southern Travel. Approximately one third of the increase was a non-recurring incentive commission related to airline ticket sales. The remainder of the increase was due to commissions earned on generally higher levels of corporate and leisure travel.

Deposit account charges: Income from deposit account charges and ATM and debit card usage fees increased \$522,000, or 11.5%, in the three months ended June 30, 2010, compared to the same period in 2009. A large portion of this increase was the result of the customers added in the 2009 FDIC-assisted acquisitions as well as organic growth in core deposits through the legacy Great Southern footprint.

Accretion of income related to 2009 acquisitions: Income of \$1.7 million was recorded in the current period due to the discount on the FDIC indemnification assets booked in connection with the 2009 acquisitions. This amount was up \$600,000 from \$1.1 million in the 2009 period. Additional income will be recognized in future periods as loans are collected from customers and as reimbursements of losses are collected from the FDIC, but we cannot estimate the timing of this income due to the variables associated with these transactions.

For the six months ended June 30, 2010, non-interest income decreased \$33.7 million, or 59.3%, to \$23.1 million when compared to the six months ended June 30, 2009. The following items contributed to the decrease:

FDIC-assisted acquisition: In the first half of 2009, a one-time gain of \$43.9 million was recorded related to the fair value accounting estimate of the TeamBank assets acquired and liabilities assumed from the FDIC on March 20, 2009. No similar transactions have occurred in 2010.

Interest rate swaps: The change in the fair value of certain interest rate swaps and the related change in fair value of hedged deposits resulted in \$1.2 million of income in the first half of 2009. This income was part of a 2005 accounting restatement in which approximately \$3.4 million (net of taxes) was charged against retained earnings in 2005. This charge was recovered in subsequent periods as interest rate swaps matured or were terminated by the swap counterparty. There was no impact in the first half of 2010 and there will be no impact in future periods.

Partially offsetting the decreases noted above for the six month period were the following items:

Securities impairments: During the first half of 2009, a \$4.0 million loss was recorded as a result of an impairment write-down in the value of certain available-for-sale equity investments, investments in bank trust preferred securities and an investment in a non-agency CMO. The Company continues to hold the majority of these securities in the available-for-sale category. Based on analyses of the securities portfolio for the first half of 2010, no additional impairment write-downs were necessary.

Gains on securities: Gains of \$3.5 million were recorded during the current period due to sales of mortgage-backed securities as discussed above.

Deposit account charges: Income from deposit account charges and ATM and debit card usage fees increased \$1.8 million, or 22.2%, in the first half of 2010, compared to the same period in 2009. A large portion of this increase was the result of the customers added in the 2009 FDIC-assisted acquisitions as well as organic growth in core deposits through the legacy Great Southern footprint.

Commission income: Commission income increased \$800,000 over the prior period due to increased activity for Great Southern Travel. A portion of the increase was a non-recurring incentive commission related to airline ticket sales as discussed above. The remainder of the increase was due to commissions earned on generally higher levels of corporate and leisure travel.

Non-interest Expense

For the three months ended June 30, 2010, non-interest expense increased \$800,000, or 4.0%, to \$20.8 million when compared to the three months ended June 30, 2009. The following items contributed to the increase:

Vantus Bank FDIC-assisted acquisition: The Company's increase in non-interest expense in the second quarter of 2010 compared to the same period in 2009 included expenses related to the September 2009 FDIC-assisted acquisition

of the assets and liabilities of Vantus Bank and its ongoing operation. In the three months ended June 30, 2010, non-interest expense associated with Vantus Bank was \$2.1 million. The largest expense increases were in the areas of salaries and benefits and occupancy and equipment expenses. In addition, other non-interest expenses related to the operation of other areas of the former Vantus Bank, such as lending and certain support functions, were absorbed in other pre-existing areas of the Company, resulting in increased non-interest expense.

New banking centers: The Company's increase in non-interest expense in the second quarter of 2010 compared to the same period in 2009 also related to the continued internal growth of the Company. The Company opened its second banking center in Lee's Summit, Mo., in late September 2009 and its first retail banking center in Rogers, Ark., in May 2010. In the three months ended June 30, 2010, non-interest expense associated with the operation of these locations was \$385,000.

Partially offsetting the above increases in non-interest expense for the second quarter of 2010 was an FDIC-imposed special assessment on all insured depository institutions based on assets minus Tier 1 capital as of June 30, 2009. The Company recorded an expense of \$1.7 million in the second quarter of 2009 related to the special assessment. Though the FDIC significantly increased insurance premiums for all banks in 2009, nearly doubling the regular quarterly deposit insurance assessments, no special assessment was required in the second quarter of 2010.

For the six months ended June 30, 2010, non-interest expense increased \$8.3 million, or 23.9%, to \$43.0 million when compared to the six months ended June 30, 2009. The following items contributed to the increase:

Vantus Bank FDIC-assisted acquisition: The Company's increase in non-interest expense in the first half of 2010 compared to the same period in 2009 included expenses related to the September 2009 FDIC-assisted acquisition of certain assets and liabilities of the former Vantus Bank and its ongoing operation, as discussed above. In the six months ended June 30, 2010, non-interest expense associated with Vantus Bank was \$4.4 million.

New banking centers: The Company's increase in non-interest expense in the first half of 2010 compared to the same period in 2009 also related to the continued internal growth of the Company through new banking centers in Lee's Summit, Mo. and Rogers Ark., as discussed above. In the six months ended June 30, 2010, non-interest expenses associated with the operation of these locations were \$477,000.

Salaries and benefits: As a result of integrating the operations of TeamBank and Vantus Bank and administration of the loss sharing portfolios as well as overall growth, the number of associates employed by the Company in operational and lending areas increased 48.6% over the last year. This in turn increased salaries and benefits paid by \$2.5 million in the first half of 2010 compared to 2009.

Net occupancy expense: As the Company's operations expanded in the last year, so did the costs incurred to use and maintain buildings and equipment. Excluding the effects of the Vantus Bank acquisition, net occupancy expenses increased \$400,000 for the first half of 2010 compared to the same period in 2009.

Foreclosure-related expenses: Due to increased levels of foreclosed assets, foreclosure-related expenses increased \$1.2 million in the six months ended June 30, 2010, compared to the same period in 2009.

Partially offsetting the above increases in non-interest expense were the following items:

TeamBank FDIC-assisted acquisition: Compared to the first half of 2009, salaries and benefits expenses relating to the FDIC-assisted acquisition of the assets and liabilities of TeamBank decreased \$1.0 million. This decrease was caused by retention and separation payments made in the 2009 period to former TeamBank employees whose positions were consolidated.

FDIC insurance premiums: The FDIC imposed a special assessment on all insured depository institutions based on assets minus Tier 1 capital as of June 30, 2009. As discussed above, the Company recorded an expense of \$1.7 million in the second quarter of 2009 related to the special assessment. No such assessment was required in the first half of 2010.

The Company's efficiency ratio for the quarter ended June 30, 2010, was 50.43% compared to 64.83% for the same quarter in 2009. The efficiency ratio in the second quarter of 2010 was positively impacted by lower rates on deposits resulting in an interest rate spread of 3.56% while the interest rate spread for the second quarter of 2009 was 2.96%. The efficiency ratio for the second quarter of 2010 was also positively impacted by the gains recorded on

securities sales. The Company's ratio of non-interest expense to average assets was relatively consistent, decreasing from 2.30% for the quarter ended June 30, 2009 to 2.26% for the quarter ended June 30, 2010.

The Company's efficiency ratio for the six months ended June 30, 2010, was 55.90% compared to 36.13% for the same period in 2009. The difference in the ratios from the current to prior periods was primarily due to the TeamBank-related one-time gain recorded in 2009. The Company's ratio of non-interest expense to average assets increased from 2.15% for the six months ended June 30, 2009, to 2.22% for the six months ended June 30, 2010 as a result of the increased expenses mentioned above.

Provision for Income Taxes

The Company's effective tax rate (as compared to the statutory federal tax rate of 35.0%) was 31.1% and 30.6%, respectively, for the three and six months ended June 30, 2010, due to additional tax-exempt investments and tax-exempt loans obtained in the FDIC-assisted transactions. The Company's effective tax rate was 22.1% for the three months ended June 30, 2009, due to lower overall taxable income for the quarter and tax-exempt interest income. The Company's effective tax rate was 34.6% for the six months ended June 30, 2009, due to significantly higher taxable income as a result of the gain recorded on the FDIC-assisted transaction in March 2009. In future periods, the Company expects its effective tax rate to be in the range of 30-34% of pre-tax income.

Average Balances, Interest Rates and Yields

The following tables present, for the periods indicated, the total dollar amounts of interest income from average interest-earning assets and the resulting yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates, and the net interest margin. Average balances of loans receivable include the average balances of non-accrual loans for each period. Interest income on loans includes interest received on non-accrual loans on a cash basis. Interest income on loans includes the amortization of net loan fees, which were deferred in accordance with accounting standards. Fees included in interest income were \$483,000 and \$456,000 for the three months ended June 30, 2010 and 2009, respectively. Fees included in interest income were \$907,000 and \$894,000 for the six months ended June 30, 2010 and 2009, respectively. Tax-exempt income was not calculated on a tax equivalent basis. The table does not reflect any effect of income taxes.

- (1) Of the total average balances of investment securities, average tax-exempt investment securities were \$63.0 million and \$68.3 million for the three months ended June 30, 2010 and 2009, respectively. In addition, average tax-exempt loans and industrial revenue bonds were \$45.8 million and \$38.7 million for the three months ended June 30, 2010 and 2009, respectively. Interest income on tax-exempt assets included in this table was \$2.7 million and \$2.6 million for the three months ended June 30, 2010 and 2009, respectively. Interest income net of disallowed interest expense related to tax-exempt assets was \$2.4 million and \$2.2 million for the three months ended June 30, 2010 and 2009, respectively.

Rate/Volume Analysis

The following tables present the dollar amounts of changes in interest income and interest expense for major components of interest-earning assets and interest-bearing liabilities for the periods shown. For each category of interest-earning assets and interest-bearing liabilities, information is provided on changes attributable to (i) changes in rate (i.e., changes in rate multiplied by old volume) and (ii) changes in volume (i.e., changes in volume multiplied by old rate). For purposes of this table, changes attributable to both rate and volume, which cannot be segregated, have been allocated proportionately to volume and rate. Tax-exempt income was not calculated on a tax equivalent basis.

Liquidity and Capital Resources

Liquidity is a measure of the Company's ability to generate sufficient cash to meet present and future financial obligations in a timely manner through either the sale or maturity of existing assets or the acquisition of additional funds through liability management. These obligations include the credit needs of customers, funding deposit withdrawals, and the day-to-day operations of the Company. Liquid assets include cash, interest-bearing deposits with financial institutions and certain investment securities and loans. As a result of the Company's management of the ability to generate liquidity primarily through liability funding, management believes that the Company maintains overall liquidity sufficient to satisfy its depositors' requirements and meet its customers' credit needs. At June 30, 2010, the Company had commitments of approximately \$55.9 million to fund loan originations, \$153.3 million of unused lines of credit and unadvanced loans, and \$16.6 million of outstanding letters of credit.

At June 30, 2010, the Company anticipates purchasing the real estate and furniture and fixtures of a majority of the branch locations currently being operated as a result of the FDIC-assisted transactions which took place during 2009 for an estimated \$21.3 million.

At June 30, 2010, the Company had committed to purchase a total of \$16.8 million of federal low income tax credits related to the construction of houses or apartments as part of three unrelated projects. The Company will invest \$11.8 million to acquire these credits. One of the principal developers of one of the projects is a director of the Company. The Company's investment to acquire these credits is consistent with pricing the Company has paid to acquire other tax credits from non-related parties.

Management continuously reviews the capital position of the Company and the Bank to ensure compliance with minimum regulatory requirements, as well as to explore ways to increase capital either by retained earnings or other means.

At June 30, 2010, the Company's total stockholders' equity was \$304.4 million, or 8.7% of total assets. At June 30, 2010, common stockholders' equity was \$248.1 million, or 7.1% of total assets, equivalent to a book value of \$18.47 per common share. Total stockholders' equity at December 31, 2009, was \$298.9 million, or 8.2% of total assets. At December 31, 2009, common stockholders' equity was \$242.9 million, or 6.7% of total assets, equivalent to a book value of \$18.12 per common share. Common stockholders' equity increased \$5.2 million, or 2.2%, in the six months ended June 30, 2010.

At June 30, 2010 and December 31, 2009, the Company's tangible common equity to total assets ratio was 7.0% and 6.5%, respectively. The Company's tangible common equity to total risk-weighted assets ratio was 12.4% at June 30, 2010, compared to 11.4% at December 31, 2009.

Banks are required to maintain minimum risk-based capital ratios. These ratios compare capital, as defined by the risk-based regulations, to assets adjusted for their relative risk as defined by the regulations. Guidelines require banks to have a minimum Tier 1 risk-based capital ratio, as defined, of 4.00%, a minimum total risk-based capital ratio of 8.00%, and a minimum 4.00% Tier 1 leverage ratio. To be considered "well capitalized," banks must have a minimum Tier 1 risk-based capital ratio, as defined, of 6.00%, a minimum total risk-based capital ratio of 10.00%, and a minimum Tier 1 leverage ratio of 5.00%. On June 30, 2010, the Bank's Tier 1 risk-based capital ratio was 13.69%, total risk-based capital ratio was 14.95% and the Tier 1 leverage ratio was 7.62%. As of June 30, 2010, the Bank was "well capitalized" as defined by the Federal banking agencies' capital-related regulations. The Federal Reserve Board has established capital regulations for bank holding companies that generally parallel the capital regulations for banks. On June 30, 2010, the Company's Tier 1 risk-based capital ratio was 15.83%, total risk-based capital ratio was 17.09% and the leverage ratio was 8.82%. As of June 30, 2010, the Company was "well capitalized" as defined by the Federal banking agencies' capital-related regulations.

On December 5, 2008, the Company completed a transaction to participate in the U.S. Treasury's voluntary Capital Purchase Program (CPP). The CPP, a part of the Emergency Economic Stabilization Act of 2009, is designed to provide capital to healthy financial institutions, thereby increasing confidence in the banking industry and increasing the flow of financing to businesses and consumers. At the time the Company was approved to participate in the CPP in December 2008, it exceeded all "well-capitalized" regulatory benchmarks and, as indicated above, it continues to exceed these benchmarks. The Company received \$58.0 million from the U.S. Treasury through the sale of 58,000 shares of the Company's newly authorized Fixed Rate Cumulative Perpetual Preferred Stock, Series A. The Company also issued to the U.S. Treasury a warrant to purchase 909,091 shares of common stock at \$9.57 per share.

The amount of preferred shares sold represents approximately 3% of the Company's risk-weighted assets as of September 30, 2008. Through its preferred stock investment, the Treasury will receive a cumulative dividend of 5% per year for the first five years, or \$2.9 million per year, and 9% per year thereafter. The preferred shares are callable at 100% of the issue price, subject to consultation by the U.S. Treasury with the Company's primary federal regulator. In addition, for a period of the earlier of three years or until these preferred shares have been redeemed by the Company or divested by the Treasury, the Company has certain limitations on dividends that may be declared on its common or preferred stock and is prohibited from repurchasing shares of its common or other capital stock or any trust preferred securities issued by the Company without the Treasury's consent.

At June 30, 2010, the held-to-maturity investment portfolio included \$141,000 of gross unrealized gains and no gross unrealized losses.

The Company's primary sources of funds are customer deposits, FHLBank advances, other borrowings, loan repayments, unpledged securities, proceeds from sales of loans and available-for-sale securities and funds provided from operations. The Company utilizes particular sources of funds based on the comparative costs and availability at the time. The Company has from time to time chosen not to pay rates on deposits as high as the rates paid by certain of its competitors and, when believed to be appropriate, supplements deposits with less expensive alternative sources of funds.

At June 30, 2010, the Company had these available secured lines and on-balance sheet liquidity:

Federal Home Loan Bank line	\$273.4 million
Federal Reserve Bank line	\$266.0 million
Interest-Bearing and Non-Interest-Bearing Deposits	\$465.2 million
Unpledged Securities	\$3.1 million

Statements of Cash Flows. During the six months ended June 30, 2010 and 2009, respectively, the Company had positive cash flows from investing activities. Cash flows from operating activities were positive for the six months ended June 30, 2010 and negative for the same period one year ago. Cash flows from financing activities were negative for the six months ended June 30, 2010 and positive for the same period one year ago.

Cash flows from operating activities for the periods covered by the Statements of Cash Flows have been primarily related to changes in accrued and deferred assets, credits and other liabilities, the provision for loan losses, depreciation, impairments of investment securities, gains on sales of investment securities, gains on the purchase of additional business units and the amortization of deferred loan origination fees and discounts (premiums) on loans and investments, all of which are non-cash or non-operating adjustments to operating cash flows. Net income adjusted for non-cash and non-operating items and the origination and sale of loans held for sale were the primary source of cash flows from operating activities. Operating activities provided cash flows of \$56.4 million during the six months ended June 30, 2010 and used cash flows of \$6.6 million during the six months ended June 30, 2009.

During the six months ended June 30, 2010, investing activities provided cash of \$140.6 million primarily due to the net increase in loans for the period. During the six months ended June 30, 2009, investing activities provided cash of \$187.7 million primarily due to the cash received from the purchase of an additional business unit and sales and maturities of investment securities.

Changes in cash flows from financing activities during the periods covered by the Statements of Cash Flows are due to changes in deposits after interest credited, changes in FHLBank advances, changes in short-term borrowings, and

changes in structured repurchase agreements, as well as dividend payments to stockholders. Financing activities used \$176.5 million during the six months ended June 30, 2010, and provided \$56.2 million during the six months ended June 30, 2009. Financing activities in the future are expected to primarily include changes in deposits, changes in FHLBank advances, changes in short-term borrowings and dividend payments to stockholders.

Dividends. During the three months ended June 30, 2010, the Company declared a common stock cash dividend of \$0.18 per share, or 51% of net income per common diluted share for that three month period, and paid a common stock cash dividend of \$0.18 per share (which was declared in March 2010). During the three months ended June 30, 2009, the Company declared a common stock cash dividend of \$0.18 per share (which was paid in July 2009), or 106% of net income per common diluted share for that three month period, and paid a common stock cash dividend of \$0.18 per share (which was declared in March 2009). During the six months ended June 30, 2010, the Company declared common stock cash dividends of \$0.36 per share, or 52% of net income

per common diluted share for that six month period, and paid common stock cash dividends of \$0.36 per share. During the six months ended June 30, 2009, the Company declared common stock cash dividends of \$0.36 per share, or 16% of net income per common diluted share for that six month period, and paid common stock cash dividends of \$0.36 per share. The Board of Directors meets regularly to consider the level and the timing of dividend payments. The dividend declared but unpaid as of June 30, 2010, was paid to shareholders on July 14, 2010. In addition, the Company paid preferred dividends as described below.

Our participation in the CPP currently precludes us from increasing our common stock cash dividend above \$0.18 per share per quarter without the consent of the Treasury until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As a result of the issuance of preferred stock to the Treasury pursuant to the CPP in December 2008, during the six months ended June 30, 2010, the Company paid preferred stock cash dividends of \$725,000 on February 16, 2010, and \$725,000 on May 17, 2010. During the six months ended June 30, 2009, the Company paid preferred stock cash dividends of \$564,000 on February 17, 2009, and \$725,000 on May 15, 2009. Quarterly payments of \$725,000 will be due through February 15, 2014, as long as the preferred stock is outstanding. Thereafter, for as long as the preferred stock remains outstanding, the preferred stock quarterly dividend payment will increase to \$1.3 million.

Common Stock Repurchases and Issuances. The Company has been in various buy-back programs since May 1990. During the three and six months ended June 30, 2010 and 2009, respectively, the Company did not repurchase any shares of its common stock. During the three and six months ended June 30, 2010, the Company issued 5,175 shares of stock at an average price of \$14.11 per share and 27,122 shares of stock at an average price of \$13.80 per share, respectively, to cover stock option exercises. During the three and six months ended June 30, 2009, the Company issued 4,762 shares of stock at an average price of \$13.68 per share to cover stock option exercises.

Our participation in the CPP currently precludes us from purchasing shares of the Company's stock without the Treasury's consent until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. Management has historically utilized stock buy-back programs from time to time as long as repurchasing the stock contributed to the overall growth of shareholder value. The number of shares of stock repurchased and the price paid is the result of many factors, several of which are outside of the control of the Company. The primary factors, however, are the number of shares available in the market from sellers at any given time and the price of the stock within the market as determined by the market.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Asset and Liability Management and Market Risk

A principal operating objective of the Company is to produce stable earnings by achieving a favorable interest rate spread that can be sustained during fluctuations in prevailing interest rates. The Company has sought to reduce its exposure to adverse changes in interest rates by attempting to achieve a closer match between the periods in which its interest-bearing liabilities and interest-earning assets can be expected to reprice through the origination of adjustable-rate mortgages and loans with shorter terms to maturity and the purchase of other shorter term interest-earning assets. Since the Company uses laddered brokered deposits and FHLBank advances to fund a portion of its loan growth, the Company's assets tend to reprice more quickly than its liabilities.

Our Risk When Interest Rates Change

The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

How We Measure the Risk to Us Associated with Interest Rate Changes

In an attempt to manage our exposure to changes in interest rates and comply with applicable regulations, we monitor Great Southern's interest rate risk. In monitoring interest rate risk we regularly analyze and manage assets and

liabilities based on their payment streams and interest rates, the timing of their maturities and their sensitivity to actual or potential changes in market interest rates.

The ability to maximize net interest income is largely dependent upon the achievement of a positive interest rate spread that can be sustained despite fluctuations in prevailing interest rates. Interest rate sensitivity is a measure of the difference between amounts of interest-earning assets and interest-bearing liabilities which either reprice or mature within a given period of time. The difference, or the interest rate repricing "gap," provides an indication of the extent to which an institution's interest rate spread will be affected by changes in interest rates. A gap is considered positive when the amount of interest-rate sensitive assets exceeds the amount of interest-rate sensitive liabilities repricing during the same period, and is considered negative when the amount of interest-rate sensitive liabilities exceeds the amount of interest-rate sensitive assets during the same period. Generally, during a period of rising interest rates, a negative gap within shorter repricing periods would adversely affect net interest income, while a positive gap within shorter repricing periods would result in an increase in net interest income. During a period of falling interest rates, the opposite would be true. As of June 30, 2010, Great Southern's internal interest rate risk models indicate a one-year interest rate sensitivity gap that is slightly negative. Generally, a rate increase by the FRB would be expected to have an immediate negative impact on Great Southern's net interest income. As the Federal Funds rate is now very low, the Company's interest rate floors have been reached on most of its "prime rate" loans. In addition, Great Southern has elected to leave its "Great Southern Prime Rate" at 5.00% for those loans that are indexed to "Great Southern Prime" rather than "Wall Street Journal Prime." While these interest rate floors and prime rate adjustments have helped keep the rate on our loan portfolio higher in this very low interest rate environment, they will also reduce the positive effect to our loan rates when market interest rates, specifically the "prime rate," begin to increase. The interest rate on these loans will not increase until the loan floors are reached and the "Wall Street Journal Prime" interest rate exceeds 5.00%. The operating environment has not been normal as interest costs for deposits and borrowings have been and continue to be elevated because of abnormal credit, liquidity and competitive pricing pressures; therefore, we expect the net interest margin will continue to be somewhat compressed. However, if rates remain generally unchanged in the short-term, we expect that our cost of funds will continue to decrease as we have redeemed some of our brokered deposits. In addition, a significant portion of our retail certificates of deposit mature in the next few months and we expect that they will be replaced with new certificates of deposit at lower interest rates.

Interest rate risk exposure estimates (the sensitivity gap) are not exact measures of an institution's actual interest rate risk. They are only indicators of interest rate risk exposure produced in a simplified modeling environment designed to allow management to gauge the Bank's sensitivity to changes in interest rates. They do not necessarily indicate the impact of general interest rate movements on the Bank's net interest income because the repricing of certain categories of assets and liabilities is subject to competitive and other factors beyond the Bank's control. As a result, certain assets and liabilities indicated as maturing or otherwise repricing within a stated period may in fact mature or reprice at different times and in different amounts and cause a change, which potentially could be material, in the Bank's interest rate risk.

In order to minimize the potential for adverse effects of material and prolonged increases and decreases in interest rates on Great Southern's results of operations, Great Southern has adopted asset and liability management policies to better match the maturities and repricing terms of Great Southern's interest-earning assets and interest-bearing liabilities. Management recommends and the Board of Directors sets the asset and liability policies of Great Southern which are implemented by the asset and liability committee. The asset and liability committee is chaired by the Chief Financial Officer and is comprised of members of Great Southern's senior management. The purpose of the asset and liability committee is to communicate, coordinate and control asset/liability management consistent with Great Southern's business plan and board-approved policies. The asset and liability committee establishes and monitors the volume and mix of assets and funding sources taking into account relative costs and spreads, interest rate sensitivity and liquidity needs. The objectives are to manage assets and funding sources to produce results that are consistent

with liquidity, capital adequacy, growth, risk and profitability goals. The asset and liability committee meets on a monthly basis to review, among other things, economic conditions and interest rate outlook, current and projected liquidity needs and capital positions and anticipated changes in the volume and mix of assets and liabilities. At each meeting, the asset and liability committee recommends appropriate strategy changes based on this review. The Chief Financial Officer or his designee is responsible for reviewing and reporting on the effects of the policy implementations and strategies to the Board of Directors at their monthly meetings.

In order to manage its assets and liabilities and achieve the desired liquidity, credit quality, interest rate risk, profitability and capital targets, Great Southern has focused its strategies on originating adjustable rate loans, and managing its deposits and borrowings to establish stable relationships with both retail customers and wholesale funding sources.

At times, depending on the level of general interest rates, the relationship between long- and short-term interest rates, market conditions and competitive factors, we may determine to increase our interest rate risk position somewhat in order to maintain or increase our net interest margin.

The asset and liability committee regularly reviews interest rate risk by forecasting the impact of alternative interest rate environments on net interest income and market value of portfolio equity, which is defined as the net present value of an institution's existing assets, liabilities and off-balance sheet instruments, and evaluating such impacts against the maximum potential changes in net interest income and market value of portfolio equity that are authorized by the Board of Directors of Great Southern.

ITEM 4. CONTROLS AND PROCEDURES

We maintain a system of disclosure controls and procedures (as defined in Rule 13(a)-15(e) under the Securities Exchange Act (the "Exchange Act")) that is designed to provide reasonable assurance that information required to be disclosed by us in the reports that we file under the Exchange Act is recorded, processed, summarized and reported accurately and within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate. An evaluation of our disclosure controls and procedures was carried out as of June 30, 2010, under the supervision and with the participation of our principal executive officer, principal financial officer and several other members of our senior management. Our principal executive officer and principal financial officer concluded that, as of June 30, 2010, our disclosure controls and procedures were effective in ensuring that the information we are required to disclose in the reports we file or submit under the Act is (i) accumulated and communicated to our management (including the principal executive officer and principal financial officer) to allow timely decisions regarding required disclosure, and (ii) recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms.

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended June 30, 2010, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

We do not expect that our internal control over financial reporting will prevent all errors and all fraud. A control procedure, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control procedure are met. Because of the inherent limitations in all control procedures, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected. These inherent limitations include the realities that judgments in decision-making can be faulty, and that breakdowns in controls or procedures can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by management override of the control. The design of any control procedure also is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control procedure, misstatements due to error or fraud may occur and not be detected.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

In the normal course of business, the Company and its subsidiaries are subject to pending and threatened legal actions, some for which the relief or damages sought are substantial. After reviewing pending and threatened litigation with counsel, management believes at this time that the outcome of such litigation will not have a material adverse effect on the results of operations or stockholders' equity. We are not able to predict at this time whether the outcome of such actions may or may not have a material adverse effect on the results of operations in a particular future period as the timing and amount of any resolution of such actions and its relationship to the future results of operations are not known.

Item 1A. Risk Factors

Recently enacted financial reform legislation will, among other things, tighten capital standards, create a new Consumer Financial Protection Bureau and result in new regulations that are expected to increase our costs of operations.

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") was signed into law. This new law will significantly change the current bank regulatory structure and affect the lending, deposit, investment, trading and operating activities of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many months or years.

Among the many requirements in the Dodd-Frank Act for new banking regulations is a requirement for new capital regulations to be adopted within 18 months. These regulations must be at least as stringent as, and may call for higher levels of capital than, current regulations. Generally, trust preferred securities will no longer be eligible as Tier 1 capital, but the Company's currently outstanding trust preferred securities will be grandfathered and its currently outstanding TARP preferred securities will continue to qualify as Tier 1 capital.

Certain provisions of the Dodd-Frank Act are expected to have a near term impact on us. For example, one year after the date of its enactment, the Dodd-Frank Act eliminates the federal prohibitions on paying interest on demand deposits, thus allowing businesses to have interest bearing checking accounts. Depending on competitive responses, this significant change to existing law could have an adverse impact on our interest expense. The Dodd-Frank Act also permanently increases the maximum amount of deposit insurance for banks to \$250,000 per depositor, retroactive to January 1, 2008, and non-interest bearing transaction accounts have unlimited deposit insurance through December 31, 2013.

The Dodd-Frank Act will require publicly traded companies to give stockholders a non-binding vote on executive compensation and so-called "golden parachute" payments, and authorize the Securities and Exchange Commission to promulgate rules that would allow stockholders to nominate their own candidates using a company's proxy materials. The legislation also directs the federal banking regulators to issue rules prohibiting incentive compensation that encourages inappropriate risks.

The Dodd-Frank Act creates a new Bureau of Consumer Financial Protection with broad powers to supervise and enforce consumer protection laws. The Bureau will have broad rule-making authority for a wide range of consumer protection laws that apply to all banks, including the authority to prohibit "unfair, deceptive or abusive acts and

practices.

Additional provisions of the Dodd-Frank Act are described in this report under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Effect of Federal Laws and Regulations-Recent Legislation Impacting the Financial Services Industry.”

50

Many aspects of the Dodd-Frank Act are subject to rulemaking and will take effect over several years, making it difficult to anticipate the overall financial impact on the Company. However, compliance with this new law and its implementing regulations will result in additional operating costs that could have a material adverse effect on our financial condition and results of operations.

Our strategy of pursuing acquisitions exposes us to financial, execution and operational risks that could adversely affect us.

We pursue a strategy of supplementing internal growth by acquiring other financial institutions that we believe will help us fulfill our strategic objectives and enhance our earnings. There are risks associated with this strategy, however, including the following:

- We may be exposed to potential asset quality issues or unknown or contingent liabilities of the banks, businesses, assets and liabilities we acquire. If these issues or liabilities exceed our estimates, our results of operations and financial condition may be materially negatively affected;
- Prices at which acquisitions can be made fluctuate with market conditions. We have experienced times during which acquisitions could not be made in specific markets at prices we considered acceptable and expect that we will experience this condition in the future;
- The acquisition of other entities generally requires integration of systems, procedures and personnel of the acquired entity into our company to make the transaction economically successful. This integration process is complicated and time consuming and can also be disruptive to the customers of the acquired business. If the integration process is not conducted successfully and with minimal effect on the acquired business and its customers, we may not realize the anticipated economic benefits of particular acquisitions within the expected time frame, and we may lose customers or employees of the acquired business. We may also experience greater than anticipated customer losses even if the integration process is successful;
- Great Southern Bank entered into loss sharing agreements with the FDIC as part of the TeamBank, N.A. and Vantus Bank transactions. These loss sharing agreements require that Great Southern Bank follow certain servicing procedures as specified in the agreement. A failure to follow these procedures or any other breach of the agreement by Great Southern Bank could result in the loss of FDIC reimbursement of losses on covered loans and other real estate owned, which could have a material negative affect on our financial condition and results of operations;
 - To finance an acquisition, we may borrow funds, thereby increasing our leverage and diminishing our liquidity, or raise additional capital, which could dilute the interests of our existing stockholders; and
- We completed two significant acquisitions during 2009 and have opened additional banking offices in recent years that enhanced our rate of growth. We may not be able to continue to sustain our past rate of growth or to grow at all in the future.

Other than as set forth above, there have been no material changes to the risk factors set forth in Part I, Item 1A of the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On November 15, 2006, the Company's Board of Directors authorized management to repurchase up to 700,000 shares of the Company's outstanding common stock, under a program of open market purchases or privately negotiated transactions. The plan does not have an expiration date. However, our participation in the CPP precludes us from purchasing shares of the Company's stock without the prior consent of the Treasury until the earlier of December 5, 2011 or our repayment of the CPP funds or the transfer by the Treasury to third parties of all of the shares of preferred stock we issued to the Treasury pursuant to the CPP. As indicated below, no shares were purchased during the second quarter of 2010.

	Total Number of Shares Purchased	Average Price Per Share	Total Number of Shares Purchased As Part of Publicly Announced Plan	Maximum Number of Shares that May Yet Be Purchased Under the Plan(1)
April 1, 2010 – April 30, 2010	---	\$ ----	---	396,562
May 1, 2010 – May 31, 2010	---	\$ ----	---	396,562
June 1, 2010 – June 30, 2010	---	\$ ----	---	396,562
	---	\$ ----	---	

(1) Amount represents the number of shares available to be repurchased under the plan as of the last calendar day of the month shown.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Reserved

Item 5. Other Information

None.

EXHIBIT INDEX

Exhibit No.	Description
(2)	Plan of acquisition, reorganization, arrangement, liquidation, or succession
(i)	The Purchase and Assumption Agreement, dated as of March 20, 2009, among Federal Deposit Insurance Corporation, Receiver of TeamBank, N.A., Paolo, Kansas, Federal Deposit Insurance Corporation and Great Southern Bank, previously filed with the Commission (File no. 000-18082) as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on March 26, 2009 is incorporated herein by reference as Exhibit 2.1.
(ii)	The Purchase and Assumption Agreement, dated as of September 4, 2009, among Federal Deposit Insurance Corporation, Receiver of Vantus Bank, Sioux City, Iowa, Federal Deposit Insurance Corporation and Great Southern Bank, previously filed with the Commission (File no. 000-18082) as Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on September 11, 2009 is incorporated herein by reference as Exhibit 2.1.
(3)	Articles of incorporation and Bylaws
(i)	The Registrant's Charter previously filed with the Commission as Appendix D to the Registrant's Definitive Proxy Statement on Schedule 14A filed on March 31, 2004 (File No. 000-18082), is incorporated herein by reference as Exhibit 3.1.
(iA)	The Articles Supplementary to the Registrant's Charter setting forth the terms of the Registrant's Fixed Rated Cumulative Perpetual Preferred Stock, Series A, previously filed with the Commission (File no. 000-18082) as Exhibit 3.1 to the Registrant's Current Report on Form 8-K filed on December 9, 2008, are incorporated herein by reference as Exhibit 3(i).
(ii)	The Registrant's Bylaws, previously filed with the Commission (File no. 000-18082) as Exhibit 3(ii) to the Registrant's Current Report on Form 8-K filed on October 23, 2007, is incorporated herein by reference as Exhibit 3.2.
(4)	Instruments defining the rights of security holders, including indentures

The Company hereby agrees to furnish the SEC upon request, copies of the instruments defining the rights of the holders of each issue of the Registrant's long-term debt.

The warrant to purchase shares of the Registrant's common stock dated December 5, 2008, previously filed with the Commission (File no. 000-18082) as Exhibit 4.2 to the Registrant's Current Report on Form 8-K filed on December 9, 2008, is incorporated herein by reference as Exhibit 4(i).

(9) Voting trust agreement

Inapplicable.

(10) Material contracts

The Registrant's 1989 Stock Option and Incentive Plan previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Annual Report on Form 10-K for the fiscal year ended June 30, 1990, is incorporated herein by reference as Exhibit 10.1.

The Registrant's 1997 Stock Option and Incentive Plan previously filed with the Commission (File no. 000-18082) as Annex A to the Registrant's Definitive Proxy Statement on Schedule 14A filed on September 18, 1997 is incorporated herein by reference as Exhibit 10.2.

The Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission (File No. 000-18082) as Annex A to the Registrant's Definitive Proxy Statement on Schedule 14A filed on April 14, 2003, is incorporated herein by reference as Exhibit 10.3.

The employment agreement dated September 18, 2002 between the Registrant and William V. Turner previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2003, is incorporated herein by reference as Exhibit 10.4.

The employment agreement dated September 18, 2002 between the Registrant and Joseph W. Turner previously filed with the Commission (File no. 000-18082) as Exhibit 10.4 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2003, is incorporated herein by reference as Exhibit 10.5.

The form of incentive stock option agreement under the Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission as Exhibit 10.1 to the Registrant's Current Report on Form 8-K (File no. 000-18082) filed on February 24, 2005 is incorporated herein by reference as Exhibit 10.6.

The form of non-qualified stock option agreement under the Registrant's 2003 Stock Option and Incentive Plan previously filed with the Commission as Exhibit 10.2 to the Registrant's Current Report on Form 8-K (File no. 000-18082) filed on February 24, 2005 is incorporated herein by reference as Exhibit 10.7.

A description of the current salary and bonus arrangements for 2010 for the Registrant's named executive officers previously filed with the Commission as Exhibit 10.8 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2009 is incorporated herein by reference as Exhibit 10.8.

A description of the current fee arrangements for the Registrant's directors previously filed with the Commission as Exhibit 10.9 to the Registrant's Annual Report on Form 10-K for the fiscal year ended December 31, 2009 is incorporated herein by reference as Exhibit 10.9.

The Letter Agreement, including Schedule A, and Securities Purchase Agreement, dated December 5, 2008, between the Registrant and the United States Department of the Treasury, previously filed with the Commission (File no. 000-18082) as Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed on December 8, 2008, is incorporated herein by reference as Exhibit 10.10.

The form of Compensation Modification Agreement and Waiver, executed by each of William V. Turner, Joseph W. Turner, Rex A. Copeland, Steven G. Mitchem, Douglas W. Marrs and Linton J. Thomason, previously filed with the Commission (File no. 000-18082) as Exhibit 10.2 to the Registrant's Current Report on Form 8-K filed on December 8, 2008, is incorporated herein by reference as Exhibit 10.11.

(11) Statement re computation of per share earnings

Included in Note 6 to the Consolidated Financial Statements.

(15) Letter re unaudited interim financial information

Inapplicable.

55

(18) Letter re change in accounting principles

Inapplicable.

(19) Report furnished to securityholders.

Inapplicable.

(22) Published report regarding matters submitted to vote of security holders

Inapplicable.

(23) Consents of experts and counsel

Inapplicable.

(24) Power of attorney

None.

(31.1) Rule 13a-14(a) Certification of Chief Executive Officer

Attached as Exhibit 31.1

(31.2) Rule 13a-14(a) Certification of Treasurer

Attached as Exhibit 31.2

(32) Certification pursuant to Section 906 of Sarbanes-Oxley Act of 2002 (18 U.S.C. Section 1350)

Attached as Exhibit 32.

(99) Additional Exhibits

None.
