### Notes to Financial Statements (unaudited)

-----

### 1. Significant Accounting Policies

The Adams Express Company (the Company) is registered under the Investment Company Act of 1940 as a diversified investment company. The Company's investment objectives as well as the nature and risk of its investment transactions are set forth in the Company's registration statement.

Security Valuation -- Investments in securities traded on a national security exchange are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments are valued at amortized cost. Written options are valued at the last sale price or last quoted asked price.

Affiliated Companies -- Investments in companies 5% or more of whose outstand-

ing voting securities are held by the Company are defined as "Affiliated Companies" in Section 2(a)(3) of the Investment Company Act of 1940.

Security Transactions and Investment Income -- Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

#### 2. Federal Income Taxes

The Company's policy is to distribute all of its taxable income to its shareholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities, including options, at March 31, 2001 was \$974,116,862, and net unrealized appreciation aggregated \$621,853,805, of which the related gross unrealized appreciation and depreciation were \$752,736,503 and \$130,882,698, respectively.

Distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, periodic reclassifications are made within the Company's capital accounts to reflect income and gains available for distribution under income tax regulations.

### 3. Investment Transactions

Purchases and sales of portfolio securities, other than options and short-term investments, during the three months ended March 31, 2001 were \$149,524,634 and \$153,990,913, respectively. The Company, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. Option transactions comprised an insignificant portion of operations during the period ended March 31, 2001. All investment decisions are made by a committee, and no one person is primarily responsible for making recommendations to that committee.

### 4. Capital Stock

The Company has 10,000,000 authorized and unissued preferred shares without par value.

The Company may purchase shares of its common stock from time to time at such prices and amounts as the Board of Directors may deem advisable. During the three months ended March 31, 2001, the Company purchased 365,300 shares of its common stock at a total cost of \$7,657,757 and a weighted average discount from net asset value of 10.0%, compared to purchases of 690,600 shares at a total cost of \$23,388,422 and a weighted average discount from net asset value of 14.9% for the same period in 2000.

The Company has an employee incentive stock option and stock appreciation rights plan which provides for the issuance of options and stock appreciation rights for the purchase of up to 2,610,146 shares of the Company's common stock at 100% of the fair market value at date of grant. Options are exercisable beginning not less than one year after the date of grant and extend and vest over ten years from the date of grant. Stock appreciation rights are exercisable beginning not less than two years after the date of grant and extend over the period during which the option is exercisable. The stock appreciation rights allow the holders to surrender their rights to exercise their options and receive cash or shares in an amount equal to the difference between the option price and the fair market value of the common stock at the date of surrender. Under the plan, the exercise price of the options and related stock

appreciation rights is reduced by the per share amount of capital gain paid by the Company during subsequent years. At the beginning of 2001, 339,403 options were outstanding, with a weighted average exercise price of \$8.1169 per share. During the three months ended March 31, 2001, the Company granted options including stock appreciation rights for 38,563 shares of common stock with a weighted average exercise price of \$21.00. Stock appreciation rights relating to 15,629 stock option shares were exercised at a weighted average market price of \$19.24 per share and the stock options relating to those rights, which had a weighted average exercise price of \$5.3121 per share, were cancelled. At March 31, 2001, there were outstanding exercisable options to purchase 126,511 common shares at \$3.7033-\$20.5417 per share (weighted average price of \$6.7414), and unexercisable options to purchase 235,826 common shares at \$3.7033-\$20.5417 per share (weighted average price of \$11.0833). The weighted average remaining contractual life of outstanding exercisable and unexercisable options is 3.7943 years and 6.1928 years, respectively. Total compensation expense recognized for the three months ended March 31, 2001 related to the stock options and stock appreciation rights plan was \$(727,865). At March 31, 2001, there were 1,272,022 shares available for future option grants.

#### 5. Retirement Plans

The Company provides retirement benefits for its employees under a non-contributory qualified defined benefit pension plan. The benefits are based on years of service and compensation during the last 36 months of employment. The Company's current funding policy is to contribute annually to the plan only those amounts that can be deducted for federal income tax purposes. The plan assets consist of investments in individual stocks, bonds and mutual funds.

The actuarially computed net pension cost credit for the three months ended March 31, 2001 was \$104,219, and consisted of service cost of \$51,103, interest cost of \$90,562, expected return on plan assets of \$224,278, and net amortization credit of \$21,606.

In determining the actuarial present value of the projected benefit obligation, the interest rate used for the weighted average discount rate was 7.5%, the expected rate of annual salary increases was 7.0%, and the long-term expected rate of return on plan assets was 8.0%.
