**U.S. SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549
FORM 10-Q
QUARTERLY REPORT PURSUANT TO SECTION 13 or 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934
For the Quarter ended July 2, 2010
Commission File Number 1-16137
GREATBATCH, INC.**

(Exact name of Registrant as specified in its charter)

Delaware

(State of incorporation)

16-1531026

(I.R.S. employer identification no.)

10000 Wehrle Drive

Clarence, New York

14031

(Address of principal executive offices)

(716) 759-5600

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

The number of shares outstanding of the Company's common stock, \$0.001 par value per share, as of August 10, 2010 was: 23,249,387 shares.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited****1. BASIS OF PRESENTATION**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information (Accounting Standards Codification (ASC) 270, *Interim Reporting*) and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information necessary for a fair presentation of financial position, results of operations, and cash flows in conformity with accounting principles generally accepted in the United States of America. Operating results for interim periods are not necessarily indicative of results that may be expected for the fiscal year as a whole. In the opinion of management, the condensed consolidated financial statements reflect all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation of the results of Greatbatch, Inc. and its wholly-owned subsidiary Greatbatch Ltd. (collectively

Greatbatch or the Company) for the periods presented. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales, expenses, and related disclosures at the date of the financial statements and during the reporting period. Actual results could differ materially from these estimates. The January 1, 2010 condensed consolidated balance sheet data was derived from audited consolidated financial statements but does not include all disclosures required by accounting principles generally accepted in the United States of America. For further information, refer to the consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the year ended January 1, 2010. The Company utilizes a fifty-two, fifty-three week fiscal year ending on the Friday nearest December 31st. For 52-week years, each quarter contains 13 weeks. The second quarter of 2010 and 2009 each contained 13 weeks and ended on July 2, and July 3, respectively.

2. SUPPLEMENTAL CASH FLOW INFORMATION

	Six Months Ended

Total amortizing intangible assets	\$ 133,010	\$ (51,963)	\$ 1,029	\$ 82,076

Aggregate amortization expense for the second quarter of 2010 and 2009 was \$2.4 million and \$2.6 million, respectively. Aggregate amortization expense for the six months ended July 2, 2010 and July 3, 2009 was \$4.8 million and \$5.3 million, respectively. As of July 2, 2010, annual amortization expense is estimated to be \$4.8 million for the remainder of 2010, \$9.6 million for 2011, \$9.4 million for 2012, \$8.7 million for 2013 and \$7.9 million for 2014.

The change in goodwill is as follows (in thousands):

	Greatbatch Medical	Electrochem	Total
At January 1, 2010	\$ 293,983	\$ 9,943	303,926
Foreign currency translation	(1,545)		(1,545)
At July 2, 2010	\$ 292,438	\$ 9,943	\$ 302,381

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited****5. DEBT**

Long-term debt is comprised of the following (in thousands):

	July 2, 2010	January 1, 2010
Revolving line of credit	\$ 98,000	\$ 98,000
2.25% convertible subordinated notes I		30,450
2.25% convertible subordinated notes II, due 2013	197,782	197,782
Unamortized discount	(32,061)	(36,810)
 Total debt	 263,721	 289,422
Less: current portion of long-term debt		(30,450)
 Total long-term debt	 \$ 263,721	 \$ 258,972

Revolving Line of Credit The Company has a senior credit facility (the Credit Facility) consisting of a \$235 million revolving credit facility, which can be increased to \$335 million upon the Company's request and approval by a majority of the lenders. The Credit Facility also contains a \$15 million letter of credit subfacility and a \$15 million swingline subfacility. In connection with the Electrochem Litigation described in Note 10 Commitments and Contingencies, the Company was required to bond the amount of the judgment and statutory interest in order to appeal. The Company satisfied this requirement by posting a bond, which required collateralization. The Company received approval from the lenders supporting the Credit Facility to increase the letter of credit subfacility by up to \$35 million for use only in connection with bonding the appeal of the Electrochem Litigation, of which \$23 million was being utilized as of July 2, 2010.

The Credit Facility is secured by the Company's non-realty assets including cash, accounts receivable and inventories, and has an expiration date of May 22, 2012 with a one-time option to extend to April 1, 2013 at the Company's option if no default has occurred. Interest rates under the Credit Facility are, at the Company's option, based upon the current prime or LIBOR rate plus a margin that varies with the Company's leverage ratio, as defined in the credit agreement for the Credit Facility. If interest is paid based upon the prime rate, the applicable margin is between minus 1.25% and 0.00%. If interest is paid based upon the LIBOR rate, the applicable margin is between 1.00% and 2.00%. The Company is required to pay a fee on its outstanding letter of credit equal to a margin between 1.125% and 2.125%, depending on the Company's leverage ratio, as defined in the credit agreement. The Company is also required to pay a commitment fee between 0.125% and 0.250% per annum on the unused portion of the Credit Facility based on the Company's leverage ratio, as defined in the credit agreement.

The Credit Facility contains limitations on the incurrence of indebtedness, liens and licensing of intellectual property, investments and certain payments. Except to the extent paid by the issuance of common stock of Greatbatch or paid out of cash on hand, the Credit Facility limits the amount paid for acquisitions in total to \$100 million. The restrictions on payments, among other things, limit repurchase of Greatbatch stock to \$60 million and limit the ability of the Company to make cash payments upon conversion of its convertible subordinated notes II. These limitations can be waived upon the Company's request and approval of a simple majority of the lenders.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

The Credit Facility requires the Company to maintain a ratio of adjusted EBITDA, as defined in the credit agreement, to interest expense of at least 3.00 to 1.00, and a total leverage ratio, as defined in the credit agreement, of not greater than 4.50 to 1.00. The calculation of adjusted EBITDA and leverage ratio exclude non-cash charges, as well as charges in connection with the Electrochem Litigation up to \$35 million. As of July 2, 2010, the Company was in compliance with all covenants.

The Credit Facility contains customary events of default. Upon the occurrence and during the continuance of an event of default, a majority of the lenders may declare the outstanding advances and all other obligations under the Credit Facility immediately due and payable.

The weighted average interest rate on borrowings under the Company's revolving line of credit as of July 2, 2010, which does not include the impact of the interest rate swaps described below, was 1.49% and resets based upon the six-month LIBOR rate. As of July 2, 2010, the Company had \$114 million of borrowing capacity available under the Credit Facility. This amount may vary from period to period based upon the debt levels of the Company as well as the level of EBITDA which impacts the covenant calculations described above. The interest rate on the \$23 million letter of credit outstanding as of July 2, 2010 was 1.125%.

Interest Rate Swaps The Company has entered into three receive floating, pay fixed interest rate swaps indexed to the six-month LIBOR rate. The objective of these swaps is to hedge against potential changes in cash flows on the Company's outstanding revolving line of credit, which is also indexed to the six-month LIBOR rate. No credit risk was hedged. The receive variable leg of the swap and the variable rate paid on the revolving line of credit bear the same rate of interest, excluding the credit spread, and reset and pay interest on the same dates. The Company intends to continue electing the six-month LIBOR as the benchmark interest rate on the debt being hedged. If the Company repays the debt, it intends to replace the hedged item with similarly indexed cash flows.

Information regarding the Company's outstanding interest rate swaps is as follows (dollars in thousands):

Instrument	Type of Hedge	Notional Amount	Start Date	End Date	Pay Fixed Rate	Current Receive Floating Rate	Fair Value July 2, 2010	Balance Sheet Location
Int. rate swap	Cash flow	\$ 80,000	3/5/2008	7/7/2010	3.09%	0.43%	\$ (30)	Other Current Liabilities
Int. rate swap	Cash flow	18,000	12/18/2008	12/18/2010	2.00%	0.75%	(105)	Other Current Liabilities
Int. rate swap	Cash flow	50,000	7/7/2010	7/7/2011	2.16%	6M LIBOR	(654)	Other Long-Term Liabilities
							\$ (789)	

The estimated fair value of the interest rate swap agreements represents the amount the Company would have to pay to terminate the contracts. No portion of the change in fair value of the interest rate swaps during the 2010 or 2009 periods was considered ineffective. The amount recorded as additional Interest Expense related to the interest rate swaps for the second quarter of 2010 and 2009 was \$0.6 million and \$0.3 million, respectively, and \$1.2 million and \$0.5 million, respectively, for the six months ended July 2, 2010 and July 3, 2009.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

Convertible Subordinated Notes In May 2003, the Company completed a private placement of \$170 million of 2.25% convertible subordinated notes, due June 15, 2013 (CSN I). In March 2007, the Company entered into separate, privately negotiated agreements to exchange \$117.8 million of CSN I for an equivalent principal amount of a new series of 2.25% convertible subordinated notes due 2013 (CSN II) (collectively the Exchange) at a 5% discount. The primary purpose of the Exchange was to eliminate the June 15, 2010 call and put option that was included in the terms of CSN I. In connection with the Exchange, the Company issued an additional \$80 million aggregate principal amount of CSN II at a price of \$950 per \$1,000 of principal. In December 2008, the Company entered into privately negotiated agreements under which it repurchased \$21.8 million in aggregate principal amount of its outstanding CSN I at \$845.38 per \$1,000 of principal. The primary purpose of this transaction was to retire the notes, which contained a put option exercisable on June 15, 2010, at a discount. During the second quarter of 2010 the holders of the remaining \$30.5 million of CSN I notes exercised their put option. These notes were repaid with cash on hand.

CSN II notes bear interest at 2.25% per annum, payable semi-annually, and are due on June 15, 2013. The holders may convert the notes into shares of the Company's common stock at a conversion price of \$34.70 per share, which is equivalent to a conversion ratio of 28.8219 shares per \$1,000 of principal. The conversion price and the conversion ratio will adjust automatically upon certain changes to the Company's capitalization. CSN II notes were issued at a price of \$950 per \$1,000 of principal. The fair value of CSN II as of July 2, 2010 was approximately \$177 million and is based on recent sales prices.

The effective interest rate of CSN II, which takes into consideration the amortization of the discount and deferred fees related to the issuance of these notes is 8.5%. The discount on CSN II is being amortized to the maturity date of the convertible notes utilizing the effective interest method. As of July 2, 2010, the carrying amount of the discount related to the CSN II conversion option value was \$27.1 million. As of July 2, 2010, the if-converted value of the CSN II notes does not exceed their principal amount as the Company's closing stock price of \$22.00 per share did not exceed the conversion price of \$34.70 per share.

The contractual interest and discount amortization for CSN II were as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
Contractual interest	\$ 1,113	\$ 1,113	\$ 2,225	\$ 2,225
Discount amortization	2,394	2,240	4,748	4,444

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

The notes are convertible at the option of the holders at such time as: (i) the closing price of the Company's common stock exceeds 150% of the conversion price of the notes for 20 out of 30 consecutive trading days; (ii) the trading price per \$1,000 of principal is less than 98% of the product of the closing sale price of common stock for each day during any five consecutive trading day period and the conversion rate per \$1,000 of principal; (iii) the notes have been called for redemption; (iv) the Company distributes to all holders of common stock rights or warrants entitling them to purchase additional shares of common stock at less than the average closing price of common stock for the ten trading days immediately preceding the announcement of the distribution; (v) the Company distributes to all holders of common stock any form of dividend which has a per share value exceeding 5% of the price of the common stock on the day prior to such date of distribution; (vi) the Company affects a consolidation, merger, share exchange or sale of assets pursuant to which its common stock is converted to cash or other property; (vii) the period beginning 60 days prior to but excluding June 15, 2013; and (viii) certain fundamental changes, as defined in the indenture agreement, occur or are approved by the Board of Directors.

Conversions in connection with corporate transactions that constitute a fundamental change require the Company to pay a premium make-whole amount, based upon a predetermined table as set forth in the indenture agreement, whereby the conversion ratio on the notes may be increased by up to 7.4 shares per \$1,000 of principal. The premium make-whole amount will be paid in shares of common stock upon any such conversion, subject to the net share settlement feature of the notes described below.

CSN II contains a net share settlement feature that requires the Company to pay cash for each \$1,000 of principal to be converted. Any amounts in excess of \$1,000 will be settled in shares of the Company's common stock, or at the Company's option, cash. The Company has a one-time irrevocable election to pay the holders in shares of its common stock, which it currently does not plan to exercise.

The notes are redeemable by the Company at any time on or after June 20, 2012, or at the option of a holder upon the occurrence of certain fundamental changes, as defined in the indenture agreement, affecting the Company. The notes are subordinated in right of payment to all of our senior indebtedness and effectively subordinated to all debts and other liabilities of the Company's subsidiaries.

Deferred Financing Fees The change in deferred financing fees is as follows (in thousands):

At January 1, 2010	\$ 3,028
Amortization during the period	(539)
At July 2, 2010	\$ 2,489

6. PENSION PLANS

The Company is required to provide its employees located in Switzerland and France certain defined pension benefits. These benefits accrue to employees based upon years of service, position, age and compensation. The defined benefit pension plan that provides benefits to the Company's employees located in Switzerland is a funded contributory plan while the pension plan that provides benefits to the Company's employees located in France is unfunded and noncontributory. The liability and corresponding expense related to these pension plans is based on actuarial computations of current and future benefits for employees. Pension expense is charged to current operating expenses.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

The change in net pension liability is as follows (in thousands):

At January 1, 2010	\$	3,974
Net periodic pension cost		478
Benefit payments		(460)
Foreign currency translation		(190)
At July 2, 2010	\$	3,802

Net pension cost is comprised of the following (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
Service cost	\$ 229	\$ 218	\$ 469	\$ 428
Interest cost	100	99	206	195
Amortization of net loss	6	32	11	62
Expected return on plan assets	(102)	(78)	(208)	(153)
Net pension cost	\$ 233	\$ 271	\$ 478	\$ 532

7. STOCK-BASED COMPENSATION

Compensation costs related to share-based payments for the three months ended July 2, 2010 and July 3, 2009 totaled \$1.7 million and \$1.0 million, respectively. Compensation costs related to share-based payments for the six months ended July 2, 2010 and July 3, 2009 totaled \$2.8 million and \$2.8 million, respectively. Stock-based compensation expense included in the Condensed Consolidated Statement of Cash Flows includes, when incurred, costs recognized for the annual share contribution to the Company's 401(k) Plan as well as for share-based payments.

The weighted average fair value and assumptions used to value options granted are as follows:

	Six Months Ended	
	July 2, 2010	July 3, 2009
Weighted average fair value	\$ 8.24	\$ 8.63
Risk-free interest rate	2.62%	2.02%

**(a) 2007 & 2008
facility
shutdowns and
consolidations.**

In the first quarter of 2007, the Company announced that it would close its Electrochem manufacturing

facility in
Canton, MA and
construct a new
81,000 square
foot
replacement
facility in
Raynham, MA.
This initiative
was not cost
savings driven
but capacity
driven and was
completed in the
first quarter of
2009.

In the second quarter of 2007, the Company announced that it would consolidate its corporate offices in Clarence, NY into its existing research and development center also in Clarence, NY after an expansion of that facility was complete. This expansion and relocation was completed in the third quarter of 2008.

During the second and third quarters of 2008, the Company reorganized and consolidated various general and administrative and research and development functions throughout the organization in order to optimize those resources with the businesses it acquired in 2007 and 2008.

Table of Contents

GREATBATCH, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited

In the second half of 2008, the Company ceased manufacturing at its facility in Suzhou, China (Electrochem), closed its leased manufacturing facility in Orchard Park, NY (Electrochem), and consolidated its Saignelegier, Switzerland manufacturing facility (orthopaedics). The operations of these facilities were relocated to existing facilities that had excess capacity.

In the fourth quarter of 2008, management approved a plan for the consolidation of its Teterboro, NJ (Electrochem manufacturing), Blaine, Minnesota (vascular manufacturing) and Exton, Pennsylvania (orthopaedics corporate office) facilities into existing facilities that had excess capacity. The Blaine, MN and Exton, PA consolidations were completed in the second quarter of 2009. The Teterboro, NJ initiative was substantially completed in the fourth quarter of 2009.

The total cost incurred for these facility shutdowns and consolidations was \$16.8 million and included the following:

- a. Severance and retention \$4.4 million;
- b. Production inefficiencies, moving and revalidation \$5.2 million;
- c. Accelerated depreciation and asset write-offs \$4.8 million;
- d. Personnel \$0.7 million; and
- e. Other \$1.7 million.

All categories of costs are considered to be cash expenditures, except accelerated depreciation and asset write-offs.

Costs incurred during 2010 relating to these initiatives primarily related to the Electrochem business segment. For the six months ended July 3, 2009, costs relating to these initiatives of \$1.4 million and \$2.1 million were included in the Greatbatch Medical and Electrochem business segments, respectively.

As a result of these consolidation initiatives, one Greatbatch Medical facility and one Electrochem facility are classified as held for sale as of July 2, 2010. These facilities are recorded at the lower of their carrying amount or estimated fair value less costs to sell. The fair value of these facilities is primarily determined by reference to recent sales data for comparable facilities taking into consideration recent offers, if any, received from prospective buyers of the facility, which is categorized as Level 2 in the fair value hierarchy. These facilities are expected to be sold within the next year and have a carrying value of \$3.6 million as of July 2, 2010 and are included in Other Current Assets in the Condensed Consolidated Balance Sheet. During the second quarter of 2010, the Company recognized a \$0.6 million write down related to its Electrochem facility, as the estimated fair value less costs to sell was below the recorded book value. During the first quarter of 2010, the Company sold its Saignelegier, Switzerland facility for \$1.1 million, which was previously classified as held for sale. No gain or loss was recognized during the period related to this facility.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

The change in accrued liabilities related to the 2007 & 2008 facility shutdowns and consolidations is as follows (in thousands):

	Severance and Retention	Production Inefficiencies, Moving and Revalidation	Accelerated Depreciation/ Asset Write- offs	Personnel	Other	Total
At January 2, 2009	\$ 594	\$	\$	\$	\$	\$ 594

Write-offs			(671)			(671)
Cash payments	(1,466)	(2,948)		(534)	(1,120)	(6,068)
At January 1, 2010	\$ 924	\$	\$	\$	\$	\$ 924
Restructuring charges		153	570	68	65	856
Write-offs			(570)			(570)
Cash payments	(924)	(153)		(68)	(65)	(1,210)
At July 2, 2010	\$	\$	\$	\$	\$	\$

(b) Integration costs. During 2010 and 2009, the Company incurred costs related to the integration of the companies acquired in 2007 and 2008. The integration initiatives include the implementation of the Oracle ERP system, training and compliance with Company policies as well as the implementation of lean manufacturing and six sigma initiatives.

These expenses are primarily for consultants, relocation and travel costs that will not be required after the integrations are completed.

(c) *Asset dispositions and other.* During 2010 and 2009, the Company recorded write-downs in connection with various asset disposals, which were partially offset by insurance proceeds received.

9. INCOME TAXES

The income tax provision for interim periods is determined using an estimate of the annual effective tax rate, adjusted for discrete items, if any, that are taken into account in the relevant period. Each quarter, the estimate of the annual effective tax rate is updated, and if the estimated effective tax rate changes, a cumulative adjustment is made. There is a potential for volatility of the effective tax rate due to several factors, including changes in the mix of the pre-tax income and the jurisdictions to which it relates, business acquisitions, settlements with taxing authorities and foreign currency fluctuations.

As discussed in Note 5 Debt, \$30.5 million of CSN I were put back to the Company during the second quarter of 2010. This transaction resulted in discharge of indebtedness (COD) income for tax purposes. Under the American Recovery and Reinvestment Tax Act of 2009, an election can be made to defer such COD income and begin recognizing over a 5 year period, beginning in 2014. At this time, it is the Company's intent to make this election, which is made with the filing of the 2010 tax return. As such, the tax liability associated with the COD income (approximately \$6 million) has been classified as non-current Deferred Income Taxes.

Table of Contents

GREATBATCH, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited

During the quarter ended July 2, 2010, there has been no change in the balance of unrecognized tax benefits. Approximately \$1.9 million of the balance of unrecognized tax benefits would favorably impact the effective tax rate (net of federal benefit on state issues), if recognized. It is reasonably possible that a reduction of approximately \$0.7 million of the balance of unrecognized tax benefits may occur within the next twelve months as a result of the expiration of applicable statutes of limitation.

10. COMMITMENTS AND CONTINGENCIES

Litigation The Company is a party to various legal actions arising in the normal course of business. While the Company does not believe, except as indicated below, that the ultimate resolution of any such pending actions will have a material adverse effect on its results of operations, financial position or cash flows, litigation is subject to inherent uncertainties. If an unfavorable ruling were to occur, there exists the possibility of a material adverse impact in the period in which the ruling occurs.

As previously reported, the Company is appealing the September 2009 jury verdict in the Input/Output Marine Systems action against the Company (Electrochem Litigation). During the third quarter of 2009, the Company accrued \$34.5 million in connection with this litigation. During the appeal process, interest on the judgment will accrue based upon the Louisiana statutory rate, which is currently 3.75% per annum. The amount of interest that has accrued on this judgment through July 2, 2010 is \$0.4 million.

The litigation previously reported in the Company's Annual Report on Form 10-K for the year ended on January 1, 2010 commenced against the Company by its insurance carrier that had been paying the cost of defense in the Electrochem Litigation has been settled. Under the terms of the settlement agreement, the insurer has no further obligation to defend the Company, but the Company has no obligation to reimburse the insurer for defense costs expended prior to the jury verdict.

With regard to the previously reported patent infringement action filed by Pressure Products Medical Supplies, Inc. ("Pressure Products"), in August 2010 the parties reached an agreement to settle the litigation. In exchange for a cash payment by the Company, Pressure Products will grant a covenant not to sue on the Company's FlowGuard[™] and OptiSeal[™] introducer products and dismiss its claims against the Company. No further material litigation charges are anticipated with regards to this litigation as a result of this settlement. As part of the settlement, the litigation commenced by the Company against Pressure Products also will be dismissed.

Product Warranties The Company generally warrants that its products will meet customer specifications and will be free from defects in materials and workmanship. The Company accrues its estimated exposure to warranty claims based upon recent historical experience and other specific information as it becomes available.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

The change in aggregate product warranty liability for the quarter is as follows (in thousands):

Beginning balance at April 2, 2010	\$	1,692
Additions to warranty reserve		340
Warranty claims paid		(436)
Ending balance at July 2, 2010	\$	1,596

Purchase Commitments Contractual obligations for purchase of goods or services are defined as agreements that are enforceable and legally binding on the Company and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Our purchase orders are normally based on our current manufacturing needs and are fulfilled by our vendors within short time horizons. We enter into blanket orders with vendors that have preferred pricing and terms, however these orders are normally cancelable by us without penalty. As of July 2, 2010, the total contractual obligation related to such expenditures is approximately \$10.4 million and will be financed by existing cash and cash equivalents or cash generated from operations over the next twelve months. We also enter into contracts for outsourced services; however, the obligations under these contracts were not significant and the contracts generally contain clauses allowing for cancellation without significant penalty.

Operating Leases The Company is a party to various operating lease agreements for buildings, equipment and software. Minimum future annual operating lease payments are \$1.5 million for the remainder of 2010; \$2.0 million in 2011; \$1.9 million in 2012; \$1.8 million in 2013; \$1.9 million in 2014 and \$6.4 million thereafter. The Company primarily leases buildings, which accounts for the majority of the future lease payments.

Foreign Currency Contracts In February 2009, the Company entered into forward contracts to purchase 10 million Mexican pesos per month from March 2009 to December 2009 at an exchange rate of 14.85 pesos per one U.S. dollar. These contracts were entered into in order to hedge the risk of peso-denominated payments associated with the operations at the Company's Tijuana, Mexico facility for 2009. These contracts were accounted for as cash flow hedges. The amount recorded as a reduction of Cost of Sales during the six months ended July 3, 2009 related to these forward contracts was \$0.2 million.

In December 2009, the Company entered into forward contracts to purchase 6.6 million Mexican pesos per month from January 2010 to December 2010 at an exchange rate of 13.159 pesos per one U.S. dollar. In February 2010, the Company entered into forward contracts to purchase an additional 3.3 million Mexican pesos per month from February 2010 to December 2010 at an exchange rate of 13.1595 pesos per one U.S. dollar. These contracts were entered into in order to hedge a portion of the risk of peso-denominated payments associated with the operations at the Company's Tijuana, Mexico facility for 2010 and are being accounted for as cash flow hedges. As of July 2, 2010, these contracts had a negative fair value of \$0.02 million, which is recorded within Accrued Expenses and Other Current Liabilities in the Condensed Consolidated Balance Sheet. The amount recorded as a reduction of Cost of Sales during the six months ended July 2, 2010 related to these forward contracts was \$0.3 million. No portion of the change in fair value of the Company's foreign currency contracts during the six months ended July 2, 2010 or July 3, 2009 was considered ineffective.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

Subsequent Event In July 2010, the Company entered into a forward contract to purchase 6.6 million Mexican pesos per month from January 2011 to December 2011 at an exchange rate of 13.2231 pesos per one U.S. dollar. This contract was entered into in order to hedge the risk of peso-denominated payments associated with a portion of the operations at the Company's Tijuana, Mexico facility for 2011 and will be accounted for as a cash flow hedge.

Self-Insured Medical Plan In an attempt to help offset the cost of rising health care expenses, in 2010, the Company began self-funding the medical insurance coverage for all of its U.S. based employees. The risk to the Company is being limited through the use of stop loss insurance which has annual deductibles in the amount of \$0.2 million per covered participant and \$9.9 million in the aggregate. The maximum benefit for aggregate losses is \$1.0 million and \$4.8 million for specific losses. As of July 2, 2010, the Company has \$2.2 million accrued related to the self-insurance of its medical plan, which is recorded as Accrued Expenses and Other Current Liabilities in the Condensed Consolidated Balance Sheet, and is based upon prior years claim history.

11. EARNINGS PER SHARE (EPS)

The following table illustrates the calculation of basic and diluted EPS (in thousands, except per share amounts):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
Numerator for basic EPS:				
Net income	\$ 7,788	\$ 6,562	\$ 13,335	\$ 13,226
Effect of dilutive securities:				
Interest expense on convertible notes and related deferred financing fees, net of tax	111	130	241	260
Numerator for diluted EPS	\$ 7,899	\$ 6,692	\$ 13,576	\$ 13,486
Denominator for basic EPS:				
Weighted average shares outstanding	23,058	22,960	23,051	22,887
Effect of dilutive securities:				
Convertible subordinated notes	630	756	693	756
Stock options and unvested restricted stock	238	139	202	257
Denominator for diluted EPS	23,926	23,855	23,946	23,900
Basic EPS				
	\$ 0.34	\$ 0.29	\$ 0.58	\$ 0.58
Diluted EPS				
	\$ 0.33	\$ 0.28	\$ 0.57	\$ 0.56

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

The diluted weighted average share calculations do not include the following securities, which are not dilutive to the EPS calculations:

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
Time-vested stock options, restricted stock and restricted stock units	1,118,000	1,289,000	1,372,000	1,314,000
Performance-vested stock options and restricted stock units	942,000	942,000	956,000	942,000

12. COMPREHENSIVE INCOME

The Company's comprehensive income as reported in the Condensed Consolidated Statements of Operations and Comprehensive Income includes net income, foreign currency translation gains (losses) and unrealized gains (losses) on cash flow hedges.

The Company translates all assets and liabilities of its foreign subsidiaries, where the U.S. dollar is not the functional currency, at the period-end exchange rate and translates income and expenses at the average exchange rates in effect during the period. The net effect of these translation adjustments is recorded in the condensed consolidated financial statements as comprehensive income (loss). Translation adjustments are not adjusted for income taxes as they relate to permanent investments in the Company's foreign subsidiaries.

The Company has designated its interest rate swaps and foreign currency contracts (See Notes 5 Debt and 10 Commitments and Contingencies) as cash flow hedges. Accordingly, the effective portion of any change in the fair value of these instruments is recorded in comprehensive income (loss), net of tax, and reclassified into earnings (Interest Expense Swaps, Cost of Sales FX Contracts) in the same period or periods during which the hedged transaction affects earnings. Gains and losses on the derivative representing hedge ineffectiveness are recognized in current earnings.

Accumulated other comprehensive income (loss) is comprised of the following (in thousands):

	Defined Benefit Pension Plan Liability	Cash Flow Hedges	Foreign Currency Translation Adjustment	Total Pre-Tax Amount	Tax	Net-of- Tax Amount
At January 1, 2010	\$ (1,455)	\$ (1,701)	\$ 4,334	\$ 1,178	\$ 970	\$ 2,148
Unrealized loss on cash flow hedges		(130)		(130)	46	(84)
Realized loss on cash flow hedges		1,021		1,021	(357)	664
Foreign currency translation loss			(4,654)	(4,654)		(4,654)
At July 2, 2010	\$ (1,455)	\$ (810)	\$ (320)	\$ (2,585)	\$ 659	\$ (1,926)

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited****13. FAIR VALUE MEASUREMENTS**

The following table provides information regarding assets and liabilities recorded at fair value in the Company's Condensed Consolidated Balance Sheet as of July 2, 2010 (in thousands):

Description	At July 2, 2010	Fair Value Measurements Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Asset held for sale	\$ 1,500	\$	\$ 1,500	\$
Liabilities				
Foreign currency contracts	\$ 21	\$	\$ 21	\$
Interest rate swaps	789		789	

Asset held for sale Assets held for sale are recorded at the lower of their carrying amount or estimated fair value less cost to sell. For the property written-down in the second quarter of 2010, the fair value was primarily determined by reference to recent offers received from prospective buyers of the facility. The Company's assets held for sale that are recorded at fair value are categorized in Level 2 of the fair value hierarchy.

Foreign currency contracts The fair value of foreign currency contracts are determined through the use of cash flow models that utilize observable market data inputs to estimate fair value. These observable market data inputs include foreign exchange rate and credit spread curves. In addition to the above, the Company receives fair value estimates from the foreign currency contract counterparty to verify the reasonableness of the Company's estimates. The Company's foreign currency contracts are categorized in Level 2 of the fair value hierarchy.

Interest rate swaps The fair value of interest rate swaps are determined through the use of cash flow models that utilize observable market data inputs to estimate fair value. These observable market data inputs include LIBOR and swap rates, and credit spread curves. In addition to the above, the Company receives fair value estimates from the interest rate swap counterparty to verify the reasonableness of the Company's estimates. The Company's interest rate swaps are categorized in Level 2 of the fair value hierarchy.

Convertible subordinated notes The fair value of the Company's convertible subordinated notes disclosed in Note 5 Debt were determined based upon recent third-party transactions for the Company's notes in an inactive market. The Company's convertible subordinated notes are valued for disclosure purposes utilizing Level 2 measurements of the fair value hierarchy.

Table of Contents**GREATBATCH, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS Unaudited**

Cost method investments The Company holds certain cost method investments that are measured at fair value on a non-recurring basis in periods subsequent to initial recognition. The fair value of a cost method investment is only estimated if there are identified events or changes in circumstances that indicate impairment may be present. The aggregate carrying amount of our cost method investments included in Other Assets was \$11.9 million as of July 2, 2010 and January 1, 2010.

14. BUSINESS SEGMENT, GEOGRAPHIC AND CONCENTRATION RISK INFORMATION

The Company operates its business in two reportable segments Greatbatch Medical and Electrochem Solutions (Electrochem). The Greatbatch Medical segment designs and manufactures components and devices for the CRM, neuromodulation, vascular and orthopaedics markets. Additionally, the Greatbatch Medical business offers value-added assembly and design engineering services for products that incorporate Greatbatch Medical components. Electrochem designs, manufactures and distributes electrochemical cells, battery packs and wireless sensors for demanding applications in markets such as energy, security, portable medical, environmental monitoring and more. The Company defines segment income from operations as sales less cost of sales including amortization and expenses attributable to segment-specific selling, general and administrative, research, development and engineering expenses, and other operating expenses. Segment income also includes a portion of non-segment specific selling, general and administrative expenses based on allocations appropriate to the expense categories. The remaining unallocated operating expenses are primarily corporate headquarters and administrative function expenses. The unallocated operating expenses along with other expense are not allocated to reportable segments. Transactions between the two segments are not significant. An analysis and reconciliation of the Company's business segment, product line and geographic information to the respective information in the condensed consolidated financial statements follows. Sales by geographic area are presented by allocating sales from external customers based on where the products are shipped to (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009

15. IMPACT OF RECENTLY ISSUED ACCOUNTING STANDARDS

In the normal course of business, management evaluates all new accounting pronouncements issued by the Financial Accounting Standards Board (FASB), Securities and Exchange Commission (SEC), Emerging Issues Task Force (EITF), American Institute of Certified Public Accountants (AICPA) or other authoritative accounting bodies to determine the potential impact they may have on the Company s Consolidated Financial Statements. Based upon this review, management does not expect any of the recently issued accounting pronouncements, which have not already been adopted, to have a material impact on the Company s Consolidated Financial Statements.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**Our Business**

We operate our business in two reportable segments – Greatbatch Medical and Electrochem Solutions (Electrochem). Greatbatch Medical designs and manufactures systems, components and devices for the cardiac rhythm management (CRM), neuromodulation, vascular and orthopaedics markets. Greatbatch Medical customers include large multi-national original equipment manufacturers (OEMs). Greatbatch Medical products include: 1) batteries, capacitors, filtered and unfiltered feedthroughs, engineered components and enclosures used in implantable medical devices (IMDs); 2) introducers, catheters, steerable sheaths and implantable stimulation leads; and 3) instruments and delivery systems used in hip and knee replacement, trauma and spine surgeries as well as hip, knee and shoulder implants. Additionally, Greatbatch Medical offers value-added assembly and design engineering services for medical systems and devices within the markets in which it operates.

Electrochem provides technology solutions for critical industrial applications, including customized battery power and wireless sensing systems. Originating from the lithium cell invented for the implantable pacemaker by our Company s founder, Wilson Greatbatch, Electrochem s technology and superior quality and reliability is utilized in markets world-wide.

Our Customers

Greatbatch Medical customers include leading OEMs, in alphabetical order here and throughout this report, such as Biotronik, Boston Scientific, DePuy, Johnson & Johnson, Medtronic, Smith & Nephew, Sorin Group, St. Jude Medical, Stryker and Zimmer. The nature and extent of our selling relationships with each OEM varies in terms of breadth of products purchased, purchased product volumes, length of contractual commitment, ordering patterns, inventory management and selling prices. During the six months ended July 2, 2010, Boston Scientific, Johnson & Johnson, Medtronic and St. Jude Medical collectively accounted for 61% of our total sales.

Table of Contents

The initial term of our supply agreement with Boston Scientific pursuant to which Boston Scientific purchases a certain percentage of the batteries, capacitors, filtered feedthroughs and case halves it uses in its IMDs ends on December 31, 2010. The agreement may be renewed for one or more four-year renewal terms upon mutual agreement of the parties. We are actively negotiating a follow-on agreement with targeted completion during 2010.

In June 2010, we extended our feedthrough agreement with St. Jude Medical through 2017. Under the terms of the agreement we are guaranteed 100% of St. Jude Medical's feedthrough and filtering business and 80% of their implantable pulse generator MRI filtered feedthrough business. This agreement demonstrates the close working relationship we have with our customers and more specifically, St. Jude Medical. Additionally, it is a testament to our quality and reliability as we have been named the exclusive supplier of this key component to St. Jude Medical's devices.

Our Electrochem customers operate in the energy, security, portable medical and environmental monitoring markets and include 3M, General Electric, Halliburton, Honeywell, Thales, Weatherford and Zoll Medical.

Financial Overview

Sales for the second quarter of 2010 were \$140.8 million compared to \$134.7 million in the comparable 2009 period. This 5% increase was primarily due to improvements in our vascular and Electrochem markets, which were negatively impacted in the 2009 period by customer inventory adjustments and a contraction in the underlying markets which have now begun to ease. For the first half of 2010, sales of \$273 million were consistent with the prior year period. We prepare our financial statements in accordance with generally accepted accounting principles in the United States of America (GAAP). Additionally, we consistently report and discuss in our quarterly earnings releases and investor presentations adjusted operating income and margin, adjusted net income and adjusted earnings per diluted share. These adjusted amounts consist of GAAP amounts excluding the following adjustments to the extent they occur during the period: (i) acquisition-related charges; (ii) facility consolidation; manufacturing transfer and system integration charges; (iii) asset write-down and disposition charges; (iv) litigation charges; (v) the non-cash impact of accounting changes and (vi) the income tax (benefit) related to these adjustments. We believe that reporting these amounts provides important supplemental information to our investors and creditors seeking to understand the financial and business trends relating to our financial condition and results of operations. Additionally, performance-based compensation of our executive management is determined utilizing these adjusted amounts. GAAP operating income for the second quarter of 2010 was \$17.3 million compared to \$12.5 million for the 2009 second quarter. Similarly, adjusted operating income was \$17.8 million, or 12.7% of sales, in the second quarter 2010, compared to \$14.9 million, or 11.1% of sales, for the comparable 2009 period. The increase in GAAP and adjusted operating income from the prior year was primarily due to higher revenue levels, as described above, partially offset by an increase in net research, development and engineering costs (RD&E), which, as expected, were higher in the current year period due to further investment in the development of new technologies, including systems level projects, in order to create long-term growth opportunities. Additionally, operating income benefited in the current period from a lower level of selling, general and administrative expenses (SG&A) due to our various consolidation and cost cutting initiatives.

Table of Contents

For the first six months of 2010, GAAP operating income was higher than the prior year period primarily due to lower consolidation and integration charges as those projects were substantially completed by the end of 2009. Adjusted operating income for the first six months of 2010 was consistent with the prior year period, as a higher level of RD&E costs was offset by lower SG&A expenses primarily due to the same reasons as discussed above.

A reconciliation of GAAP operating income to adjusted amounts is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
Operating income as reported	\$ 17,317	\$ 12,469	\$ 31,313	\$ 27,268
Adjustments:				
Consolidation costs	536	1,578	856	3,477
Integration expenses	8	717	130	1,580
Asset dispositions and other	(49)	129	501	170
Adjusted operating income	\$ 17,812	\$ 14,893	\$ 32,800	\$ 32,495
Adjusted operating margin	12.7%	11.1%	12.0%	11.8%

This higher level of GAAP and adjusted operating income for the 2010 periods was offset by a higher effective tax rate than the prior year periods due to the favorable impact of the resolution of tax audits during the 2009 second quarter and the expiration of the U.S. R&D tax credit at the end of 2009. As a result, GAAP diluted earnings per share (EPS) was \$0.57 per share for the first six months of 2010 compared to \$0.56 for the 2009 period. Similarly, adjusted diluted EPS was \$0.71 for the first six months of 2010 versus \$0.80 for the comparable 2009 period.

A reconciliation of GAAP net income and diluted EPS to adjusted amounts is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009

Adjusted net income	\$ 9,377	\$ 9,314	\$ 16,814	\$ 18,956
Adjusted diluted EPS	\$ 0.40	\$ 0.40	\$ 0.71	\$ 0.80
Number of shares	23,926	23,855	23,946	23,900

Table of Contents

Cash flows from operations for the first six months of 2010 were \$44.2 million compared to \$21.7 million for the 2009 period. The increase from the prior year is primarily due to our strategic initiatives designed to improve operational efficiency, as well as the timing of payments and lower consolidation and integrations costs. A portion of these cash flows from operations were used to repay the current portion of long-term debt of \$30 million, which came due during the second quarter of 2010. The Company currently expects that cash flow from operations for the remainder of 2010 will continue to be used to support routine capital expenditures and to further pay down debt as we continue to take steps to strengthen our balance sheet in order to support future internal growth.

Our CEO's View

Our revenue and operating results for the second quarter of 2010 reflect improvements across all of our product lines, as well as continued benefits from our diversification strategy and our various cost cutting initiatives. We were especially pleased with the growth we saw in our vascular and Electrochem markets, which are recovering from the difficult market conditions of 2009. As we look to the second half of the year, we remain on track to meet our previously stated guidance. With that said, further sequential growth may prove to be challenging given our seasonally slow third quarter, foreign currency headwinds, and that customers have stabilized their inventory levels.

Nevertheless, we continue to invest and take steps to deliver innovative solutions to our customers, including the continued development of systems level projects, which will be critical to our long-term growth and profitability. We remain confident in this strategy and continue to make significant progress towards the completion of these initiatives.

Government Regulation

In March 2010, President Obama signed into law the Patient Protection and Affordable Care Act and the Health Care and Education Affordability Reconciliation Act (collectively "Health Care Reform") legislating broad-based changes to the U.S. health care system. Health Care Reform could significantly impact our business operations and financial results, including higher or lower revenue, as well as higher employee medical costs and taxes. Many significant parts of the legislation will be phased in over the next eight years and require further guidance and clarification in the form of regulations. As a result, many of the impacts of Health Care Reform will not be known until those regulations are enacted, which we expect to occur over the next several years.

Product Development

Currently, we are developing a series of new products for customer applications in the CRM, neuromodulation, vascular, orthopaedics and Electrochem markets. Some of the key development initiatives include:

1. To develop complete system solutions for our OEM customers in the markets we operate in;
2. To continue development of MRI compatible leadwires and other neuromodulation products;
3. To continue development of higher energy/higher density capacitors;
4. To integrate Biomimetic coating technology with our therapy delivery devices;
5. To complete the design of next generation steerable catheters, sheaths and introducers;
6. To further develop minimally invasive surgical techniques for the orthopaedics industry;
7. To develop disposable instrumentation for the orthopaedics industry;
8. To provide wireless sensing solutions to Electrochem customers; and
9. To develop a charging platform for Electrochem's secondary offering.

Table of Contents

As a result of the investments we have made over the last two years, we are now in a position to provide our OEM customers with full system solutions. This includes providing comprehensive products and services, from development and regulatory submissions through manufacturing and supporting worldwide distribution. These systems are niche product solutions that complement our OEM customers' products and utilize our expertise and capabilities. This strategy includes partnering with our OEM customers, including sharing technology and resources, in order to bring these solutions to market. The benefits to our OEM customers include shortening the time to market for these products by accelerating the velocity of innovation, optimizing their supply chain and ultimately providing them with cost efficiencies.

As previously disclosed, on March 15, 2010 Greatbatch Medical received clearance from the U.S. Food and Drug Administration for its OptiSeal Valved PTFE Peelable Introducer. We have also received approval in Canada and OptiSeal is CE marked for distribution in Europe. OptiSeal represents the first 510(k) regulatory clearance received under the Greatbatch Medical brand and is a result of the significant investments made over the last few years.

OptiSeal represents the type of niche system level products that we are trying to provide. That is, products that are complementary to the core products of our customers and utilize our expertise and capabilities. OptiSeal was developed in collaboration with our OEM customers, leverages our technology and provides our customers with value-added innovative features.

We estimate that the market opportunity for the OptiSeal project is approximately \$10 - \$20 million of annual revenue. Additionally, it provides us with an opportunity for expansion into the vascular and peripheral access markets. In the second half of this year we expect to finalize distribution agreements with our customers and OptiSeal will begin to provide a return on the R&D investment we have made over the last two years.

We expect to be able to make additional product announcements later this year after 510(k) regulatory clearance is received. The initial product announcements are expected to center around systems we are developing for the vascular market but longer-term will include our CRM, neuromodulation, Orthopaedics and Electrochem markets. Ultimately our goal is to establish a cadence of system level product announcements similar to the OptiSeal Introducer program that will help us achieve our stated goal of growing revenue faster than the underlying markets we serve.

Cost Savings and Consolidation Efforts

In the 2010 and 2009 periods we recorded charges in Other Operating Expenses, Net in the Condensed Consolidated Statements of Operations related to cost savings and consolidation efforts initiated in 2007 and 2008. These initiatives were undertaken to improve our operational efficiencies and profitability. Additional information regarding the timing, cash flow and amount of future expenditures is set forth in Note 8 Other Operating Expenses, Net of the Notes to the Condensed Consolidated Financial Statements contained in this report.

Our Financial Results

We utilize a fifty-two, fifty-three week fiscal year ending on the Friday nearest December 31st. For 52-week years, each quarter contains 13 weeks. The second quarter of 2010 and 2009 ended on July 2, and July 3, respectively. The commentary that follows should be read in conjunction with our Condensed Consolidated Financial Statements and related notes and with the Management's Discussion and Analysis of Financial Condition and Results of Operations contained in our Form 10-K for the fiscal year ended January 1, 2010.

Table of Contents

The following table presents certain selected financial information derived from our Condensed Consolidated Financial Statements for the periods presented (dollars in thousands, except per share data):

	Three Months Ended				Six Months Ended

Table of Contents**Sales**

	Three Months Ended			Six Months Ended		
	July 2, 2010	July 3, 2009	% Change	July 2, 2010	July 3, 2009	% Change
Sales:						
Greatbatch Medical						
CRM/Neuromodulation	\$ 78,838	\$ 78,026	1%	\$ 155,763	\$ 155,293	0%
Vascular	11,007	9,152	20%	19,173	19,885	-4%
Orthopaedics	30,488	31,389	-3%	59,929	65,472	-8%
Total Greatbatch Medical	120,333	118,567	1%	234,865	240,650	-2%
Electrochem	20,462	16,158	27%	37,959	33,893	12%
Total sales	\$ 140,795	\$ 134,725	5%	\$ 272,824	\$ 274,543	-1%

Greatbatch Medical CRM and neuromodulation sales for the three and six months ended July 2, 2010 remained consistent with the prior year periods as the benefit of further adoption of the Company's Q series batteries, which empower new device features and reduce the overall size of medical devices were offset by lower feedthrough sales as the 2009 periods included the benefit of customer product launches.

Second quarter 2010 sales for the vascular product line increased 20% to \$11.0 million, compared to prior year sales of \$9.2 million. This increase was primarily due to higher introducer and catheter sales as customer inventory reduction programs, which began in 2009, are now complete and ordering patterns have returned to a more normalized rate. Vascular sales for the first six months of 2010 were 4% below the prior year due to the customer inventory reduction programs mentioned above.

Orthopaedics product line sales of \$30.5 million for the second quarter of 2010 were below the \$31.4 million for the comparable 2009 period and were negatively impacted by the decline in the euro during the period. Excluding this foreign currency exchange differential, which reduced sales by approximately \$1.0 million, orthopaedics revenues were consistent with the prior year. For the year-to-date period orthopaedics sales were 8% below the prior year period due to various customer inventory reduction programs due to lower procedure volumes. However, the impact of these customer inventory reduction initiatives and lower procedure volumes continued to ease during the quarter as orthopaedics sales increased 4% over the sequential first quarter 2010 period. We expect orthopaedics revenue to continue to be impacted by the lower euro exchange rate for the remainder of 2010 and seasonal slow-downs in the third quarter. However these fluctuations are not expected to materially impact our operating income.

Electrochem Second quarter 2010 sales for the Electrochem business segment were \$20.5 million compared to \$16.2 million in the second quarter of 2009. The increase from the prior year primarily related to the continued recovery in the energy and portable medical markets. The difficult market conditions experienced in 2009 began to ease in the first quarter 2010 and the second quarter of 2010 saw a restocking of customer inventory, which is not expected to continue in the next two quarters. These strong second quarter sales were also the main driver behind the 12% improvement in Electrochem sales during the first half of 2010 compared to the same period of 2009.

Table of Contents

2010 Sales Outlook At this time, we expect 2010 annual sales growth by product line to be as follows:
 CRM & Neuromodulation 2% to 5%

Vascular 3% to 7%

Orthopaedics 3% to 7%

Electrochem 0% to 5%

It is important to note that these annual sales growth rates are on a constant currency basis. As previously discussed, we expect orthopaedics revenue to continue to be negatively impacted by the lower euro foreign currency exchange rate for the remainder of 2010.

Gross Profit

Changes to gross profit as a percentage of sales from the prior year periods were primarily due to the following:

	Changes From Prior Year	
	Three Months	Six Months
Performance-based compensation ^(a)	0.3%	1.0%
Excess capacity ^(b)	-3.5%	-2.6%
Selling price ^(c)	-1.1%	-0.8%
Mix Change ^(d)	5.0%	3.9%
Other	0.8%	-0.8%
Total percentage point change to gross profit as a percentage of sales	1.5%	0.7%

(a) Amount represents lower performance-based compensation in comparison to the prior year, which is recorded based upon the results of the current period. Performance-based compensation was higher in the second quarter of 2010 versus the sequential first quarter 2010 as revenue and operating results improved. For the remainder of 2010, performance-based compensation is expected to increase as

operating results
continue to
improve.

- (b) Our gross profit percentage was negatively impacted from excess capacity costs driven by the lower volumes, primarily for the vascular and orthopaedics product lines, in comparison to the first half of 2009. In accordance with our inventory accounting policy, excess capacity costs are expensed. Excess capacity costs are expected to decrease as volumes improved in the second quarter of 2010.
- (c) Our gross profit percentage was negatively impacted due to contractual volume price reductions and price concessions made to our larger OEM customers on certain product lines. We expect this pricing pressure to continue in the future.
- (d) Our gross profit percentage was positively impacted from an increase in sales of higher margin products as

a percentage of total sales, mainly in CRM and neuromodulation and Electrochem products for the first six months of 2010 and vascular products during the second quarter of 2010.

We expect that our gross profit margin will continue around the second quarter 2010 level for the remainder of the year as sequential sales volume growth is expected to be challenging as discussed above. Over the long-term we expect our gross profit margin to improve as more system level products are introduced, which typically earn a higher margin.

- 32 -

Table of Contents**SG&A Expenses**

Changes to SG&A expenses from the prior year period were due to the following (in thousands):

	Changes From Prior Year	
	Three Months	Six Months
Personnel costs ^(a)	\$ 539	\$ (1,384)
Litigation related fees and charges ^(b)	(1,147)	(1,031)
Allowance for doubtful accounts ^(c)	(474)	(1,394)
Other	(333)	(641)
Net decrease in SG&A	\$ (1,415)	\$ (4,450)

(a) Amount represents the change in personnel costs from the 2009 period and includes the impact of performance-based compensation as well as our consolidation and cost cutting initiatives. Performance-based compensation varies based upon the results for the period and was higher in the second quarter of 2010 versus the sequential first quarter 2010 as revenue and operating results improved. For the remainder of 2010, performance-based compensation is expected to increase as operating results continue to improve.

(b)

Amounts represent the change in fees and charges incurred versus the 2009 period in connection with the patent infringement action filed by Pressure Products and the Electrochem Litigation discussed in Note 10

Commitments and Contingencies of the Notes to the Condensed Consolidated Financial Statements contained in this report.

- (c) Amounts primarily relate to lower losses incurred on uncollectible receivables compared to the 2009 period, which included higher Electrochem and orthopaedics write-offs due to the economic slowdown.

Throughout the remainder of 2010, we expect SG&A expenses to increase slightly from the current levels due to normal inflationary cost increases, investment in sales and marketing and higher performance-based compensation as our operating results improve.

RD&E Expenses, Net

Net RD&E costs are comprised of the following (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
Research and development costs	\$ 4,426	\$ 4,725	\$ 8,954	\$ 8,736
Engineering costs	8,804	6,333	16,817	12,779
Less cost reimbursements	(2,053)	(2,364)	(3,570)	(4,946)
Engineering costs, net	6,751	3,969	13,247	7,833

Total RD&E	\$ 11,177	\$ 8,694	\$ 22,201	\$ 16,569
------------	-----------	----------	-----------	-----------

Table of Contents

As expected, net RD&E expenses for the first two quarters of 2010 were above the comparable 2009 period due to further investment in the development of new technologies, including the development of systems level solutions. Additionally, during 2010 we received a lower level of customer cost reimbursements. These cost reimbursements can vary significantly from period to period due to the timing of the achievement of milestones on development projects. Excluding these customer cost reimbursements, RD&E was 9.4% of sales for the first six months of 2010 compared to 7.8% of sales in the comparable 2009 period. We anticipate that the higher level of RD&E investment will continue for the remainder of 2010 consistent with our long-term growth strategy. Our long-term growth strategy includes investing resources in new technologies, including system level solutions for our customers. This strategy also includes partnering with our OEM customers, including sharing technology and resources, in order to bring these solutions to market. The benefits to our OEM customers is that it will shorten their time to market by accelerating the velocity of innovation, optimizing their supply chain and ultimately providing them with cost efficiencies. The timeline for approval of our vascular market systems projects is shorter than for our other markets. As such, we anticipate making additional announcements, similar to the OptiSeal™ project discussed in the Product Development section of this report, over the next several quarters.

Other Operating Expenses, Net

Other operating expenses, net is comprised of the following (in thousands):

	Three Months Ended		Six Months Ended	
	July 2, 2010	July 3, 2009	July 2, 2010	July 3, 2009
2007 & 2008 facility shutdowns and consolidations ^(a)	\$ 536	\$ 1,578	\$ 856	\$ 3,477
Integration costs ^(b)	8	717	130	1,580
Asset dispositions and other ^(c)	(49)	129	501	170
	\$ 495	\$ 2,424	\$ 1,487	\$ 5,227

(a) In the 2010 and 2009 periods, we recorded charges related to our various cost savings and consolidation efforts initiated in 2007 and 2008. Over the long-term, we expect these initiatives to improve our operational efficiencies and profitability. During the second quarter of 2010, the Company

recognized a \$0.6 million write down related to its Electrochem facility, as the estimated fair value less costs to sell was below the recorded book value.

Additional information regarding the timing, cash flow and amount of future expenditures is discussed in Note 8 Other Operating Expenses, Net of the Notes to the Condensed Consolidated Financial Statements contained in this report. At this time, we have completed all of our publicly announced consolidation initiatives. However, we continually analyze our business to find ways to improve our operational efficiency and we expect to take additional steps to drive further improvements, particularly with respect to the

optimization of our orthopaedics product line.

During the current quarter, this optimization plan, which will be ongoing for the next several years, continued and was primarily focused on our Indianapolis, Indiana facility.

- (b) During the 2010 and 2009 periods, we incurred costs related to the integration of the companies acquired in 2007 and 2008. The integration initiatives include the implementation of the Oracle ERP system, training and compliance with policies, as well as the implementation of lean manufacturing and six sigma initiatives. The expenses are primarily for consultants, relocation and travel costs that will not be required after the integrations are completed.

(c) During the 2010 and 2009 periods, we recorded write-downs in connection with various asset disposals.

In 2010, consolidation and integration expenses are expected to be approximately \$4 to \$6 million.

Table of Contents***Interest Expense and Interest Income***

Interest expense and interest income for the first two quarters of 2010 were consistent with the same periods of 2009. Going forward, we expect interest expense to remain at current levels as the benefit of paying down our long-term debt with excess cash flow from operations is expected to be offset by increased discount amortization and interest expense associated with the Electrochem Litigation appeal. See Note 10 *Commitments and Contingencies* of the Notes to Condensed Consolidated Financial Statements in this report.

Other (Income) Expense, Net

Other (income) expense, net primarily includes the impact of foreign currency exchange rate fluctuations on transactions denominated in foreign currencies, which did not materially impact our results in the first two quarters of 2010 or 2009. The Company generally does not expect foreign currency exchange rate fluctuations to have a material impact on its net income.

Provision for Income Taxes

The effective tax rate for the three and six months ended July 2, 2010 was 35.0% compared to 19.4% and 26.0%, respectively, for the comparable 2009 periods. The current period rate reflects a tax benefit from having operations outside the U.S., which are taxed at rates lower than the U.S. statutory rate of 35%. This benefit was offset by the impact of non-deductible items and the absence of the research and development tax credit, which expired at the end of 2009. The second quarter 2009 tax rate also included the favorable impact of the resolution of tax audits. Pending legislation would retroactively reinstate the R&D tax credit to the beginning of 2010. This legislation, if enacted, would positively impact the effective tax rate in the period that it is enacted.

We believe that it is reasonably possible that a reduction of approximately \$0.7 million of the balance of unrecognized tax benefits may occur within the next twelve months as a result of the expiration of applicable statutes of limitation, which would positively impact our effective tax rate in the period of reduction.

Liquidity and Capital Resources

(Dollars in thousands)	As of	
	July 2, 2010	January 1, 2010
Cash and cash equivalents ^(a)	\$ 45,657	\$ 37,864
Working capital ^(a)	\$ 162,878	\$ 119,926
Current ratio ^(a)	2.6	1.9

(a) These increases primarily relate to the cash flow generated from operations of \$44.2 million for the first half of 2010 partially offset by net expenditures for property, plant and equipment of \$6.4 million. Additionally, our current ratio benefited from the \$30.5 million

payoff of the
current portion
of our long-term
debt that came
due during the
second quarter
of 2010.

- 35 -

Table of Contents

Revolving Line of Credit We have a senior credit facility (the Credit Facility) consisting of a \$235 million revolving line of credit, which can be increased to \$335 million upon our request and approval by a majority of the lenders. The Credit Facility also contains a \$15 million letter of credit subfacility and a \$15 million swingline subfacility. In connection with the Electrochem Litigation, we were required to bond the amount of the judgment and statutory interest in order to appeal. We satisfied this requirement by posting a bond, which required collateralization. We received approval from the lenders supporting our Credit Facility to increase the letter of credit subfacility by \$35 million for use only in connection with bonding the appeal of the Electrochem Litigation, of which \$23 million was being utilized as of July 2, 2010. The Credit Facility is secured by our non-realty assets including cash, accounts and notes receivable, and inventories, and has an expiration date of May 22, 2012 with a one-time option to extend to April 1, 2013 at our option if no default has occurred.

The Credit Facility is supported by a consortium of six banks with no bank controlling more than 25% of the facility. As of July 2, 2010, each bank supporting the Credit Facility has an S&P credit rating of at least BBB- or better, which is considered investment grade.

The Credit Facility requires us to maintain a ratio of adjusted EBITDA, as defined in the credit agreement, to interest expense of at least 3.00 to 1.00. For the twelve month period ending July 2, 2010, our ratio of adjusted EBITDA to interest expense, calculated in accordance with our credit agreement, was 9.3 to 1.00, well above the required limit. The Credit Facility also requires us to maintain a total leverage ratio, as defined in the credit agreement, of not greater than 4.50 to 1.00. As of July 2, 2010, our total leverage ratio, calculated in accordance with our credit agreement, was 3.04 to 1.00, well below the required limit. The calculation of adjusted EBITDA and leverage ratio exclude non-cash charges, as well as charges in connection with the Electrochem Litigation up to a limit of \$35 million.

The Credit Facility contains customary events of default. Upon the occurrence and during the continuance of an event of default, a majority of the lenders may declare the outstanding advances and all other obligations under the Credit Facility immediately due and payable. See Note 5 Debt of the Notes to Condensed Consolidated Financial Statements in this report for a more detailed description of the Credit Facility.

Based upon our current capital needs, we anticipate utilizing free cash flow (cash flow from operations less capital expenditures) to make principal payments on our long-term debt. In July 2010, we made an additional \$20 million payment on the outstanding balance under the Credit Facility. As of July 2, 2010, we had \$114 million of borrowing capacity available under the Credit Facility. This amount may vary from period to period based upon our debt and EBITDA levels, which impacts the covenant calculations. We believe that our cash flow from operations and the Credit Facility provide adequate liquidity to meet our short- and long- term funding needs.

Operating activities Cash flows from operations for the first six months of 2010 were \$44.2 million compared to \$21.7 million for the comparable 2009 period. The increase from the prior year is primarily due to our strategic initiatives designed to improve operational efficiency, as well as the timing of payments and lower consolidation and integrations costs.

Investing activities Net cash used in investing activities for the first six months of 2010 were \$5.6 million and was primarily related to maintenance capital expenditures. Our current expectation is that capital spending for the remainder of 2010 will be in the range of \$10 million to \$20 million, of which approximately half is discretionary in nature. These purchases relate to routine maintenance investments to support our internal growth, as well as additional investment in our orthopaedics business in order to further drive operational efficiencies.

We anticipate that cash on hand along with cash flow from operations and availability under our revolving line of credit will be sufficient to fund these capital expenditures. Going forward, we will continue to consider strategically targeted and opportunistic acquisitions.

Table of Contents

Financing activities Net cash used in financing activities for the first six months of 2010 were \$30.5 million. As expected, during the second quarter of 2010 the holders of the remaining \$30.5 million of CSN I notes exercised their put option. These notes were repaid with cash on hand. Going forward, we expect excess cash flow to be used to pay down amounts outstanding under our revolving line of credit and we made a \$20 million principal payment in July 2010.

Capital Structure As of July 2, 2010, our capital structure consisted of \$197.8 million of convertible subordinated notes, \$98.0 million of debt under our revolving line of credit and 23.2 million shares of common stock outstanding. Additionally, we had \$45.7 million in cash and cash equivalents, which is sufficient to meet our short-term operating cash needs. If necessary, we have access to \$114 million of borrowing capacity under our line of credit and are authorized to issue up to 100 million shares of common stock and 100 million shares of preferred stock. The market value of our outstanding common stock since our initial public offering has exceeded our book value; accordingly, we believe that if needed we can access public markets to raise additional capital. Our capital structure allows us to support our internal growth and provides liquidity for corporate development initiatives. We continually assess our financing facilities and capital structure to ensure liquidity and capital levels are sufficient to meet our strategic objectives. In the future, we may adjust our capital structure as funding opportunities present themselves.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements within the meaning of Item 303(a)(4) of Regulation S-K.

Contractual Obligations

The following table summarizes our significant contractual obligations at July 2, 2010:

CONTRACTUAL OBLIGATIONS	Total	Payments due by period			
		Remainder of 2010	2011 - 2012	2013 - 2014	After 2014
Debt obligations ^(a)	\$ 316,472	\$ 4,150	\$ 112,315	\$ 200,007	\$
Operating lease obligations ^(b)	15,451	1,501	3,935	3,609	6,406
Purchase obligations ^(b)	10,437	10,178	259		
Foreign currency contracts ^(b)	4,500	4,500			
Pension obligations ^(c)	10,632	412	1,975	2,272	5,973
	\$ 357,492	\$ 20,741	\$ 118,484	\$ 205,888	\$ 12,379

(a) Includes the annual interest expense on our convertible subordinated notes of 2.25%, which is paid semi-annually. Amounts also include the expected interest expense on the \$98.0 million outstanding on our line of credit

based upon the period end weighted average interest rate of 3.9%, which includes the impact of our interest rate swaps outstanding. See Note 5 Debt of the Notes to Condensed Consolidated Financial Statements in this report for additional information about our debt obligations.

- (b) See Note 10 Commitments and Contingencies of the Notes to Condensed Consolidated Financial Statements in this report for additional information about our operating lease, purchase obligations and foreign currency contracts.

Table of Contents

(c) See Note 6 Pension Plans of the Notes to Condensed Consolidated Financial Statements in this report for additional information about our pension plan obligations. These amounts do not include any potential future contributions to our pension plan that may be necessary if the rate of return earned on pension plan assets is not sufficient to fund the rate of increase of our pension liability. Future cash contributions may be required. As of January 1, 2010, the most recent valuation date, our actuarially determined pension benefit obligation exceeded the plans assets by \$4.0 million.

This table does not reflect \$3.4 million of unrecognized tax benefits as we are uncertain as to if or when such amounts may be settled. Refer to Note 9 Income Taxes of the Notes to Condensed Consolidated Financial Statements in this report for additional information about these unrecognized tax benefits. Additionally, the table does not include any potential payments that may be due in connection with the Electrochem Litigation (See Note 10 Commitments and

Contingencies of the Notes to Condensed Consolidated Financial Statements contained in this report).

In an attempt to help offset the cost of rising health care expenses, beginning in 2010, we began self-funding the medical insurance coverage for all of our U.S. based employees. Our risk is being limited through the use of stop loss insurance which has deductibles in the amount of \$0.2 million per covered participant and \$9.9 million in the aggregate per year. The maximum benefit for aggregate losses is \$1.0 million and \$4.8 million for specific losses. As of July 2, 2010, we have \$2.2 million accrued related to the self-insurance of our medical plan, which is recorded as Accrued Expenses and Other Current Liabilities in the Condensed Consolidated Balance Sheet and is not included in the contractual obligations table above.

Impact of Recently Issued Accounting Standards

In the normal course of business, we evaluate all new accounting pronouncements issued by the Financial Accounting Standards Board (FASB), Securities and Exchange Commission (SEC), Emerging Issues Task Force (EITF), American Institute of Certified Public Accountants (AICPA) or other authoritative accounting body to determine the potential impact they may have on our Consolidated Financial Statements. Based upon this review, we do not expect any of the recently issued accounting pronouncements, which have not already been adopted, to have a material impact on the Company s Consolidated Financial Statements.

Forward-Looking Statements

Some of the statements contained in this report and other written and oral statements made from time to time by us and our representatives are not statements of historical or current fact. As such, they are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We have based these forward-looking statements on our current expectations, which are subject to known and unknown risks, uncertainties and assumptions. They include statements relating to:

future sales, expenses and profitability;

the future development and expected growth of our business and the markets we operate in;
our ability to successfully execute our business model and our business strategy;

our ability to identify trends within the implantable medical devices, medical components, and Electrochem markets and to offer products and services that meet the changing needs of those markets;
projected capital expenditures; and
trends in government regulation, including the impact of Health Care Reform.

Table of Contents

You can identify forward-looking statements by terminology such as may, will, should, could, expects, intends, anticipates, believes, estimates, predicts, potential or continue or the negative of these terms or other comparative terminology. These statements are only predictions. Actual events or results may differ materially from those suggested by these forward-looking statements. In evaluating these statements and our prospects generally, you should carefully consider the factors set forth below. All forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary factors and to others contained throughout this report. We are under no duty to update any of the forward-looking statements after the date of this report or to conform these statements to actual results.

Although it is not possible to create a comprehensive list of all factors that may cause actual results to differ from the results expressed or implied by our forward-looking statements or that may affect our future results, some of these factors include the following: dependence upon a limited number of customers, product obsolescence, inability to market current or future products, pricing pressure from customers, reliance on third party suppliers for raw materials, products and subcomponents, fluctuating operating results, inability to maintain high quality standards for our products, challenges to our intellectual property rights, product liability claims, inability to successfully consummate and integrate acquisitions, unsuccessful expansion into new markets, competition, inability to obtain licenses to key technology, regulatory changes or consolidation in the healthcare industry, and other risks and uncertainties that arise from time to time as described in the Company's Annual Report on Form 10-K and other periodic filings with the Securities and Exchange Commission.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Foreign Currency We have significant foreign operations in France, Mexico and Switzerland, which expose the Company to foreign currency exchange rate fluctuations due to transactions denominated in Euros, Pesos and Swiss Francs, respectively. We continuously evaluate our foreign currency risk and will take action from time to time in order to best mitigate these risks, which includes the use of various derivative instruments such as forward currency exchange contracts. See Note 10 Commitments and Contingencies of the Notes to Condensed Consolidated Financial Statements in this report for additional information about our forward currency exchange contracts. A hypothetical 10% change in the value of the U.S. dollar in relation to our most significant foreign currency exposures would have had an impact of approximately \$8 million on our annual sales. This amount is not indicative of the hypothetical net earnings impact due to partially offsetting impacts on cost of sales and operating expenses in those currencies. We translate all assets and liabilities of our foreign operations, where the U.S. dollar is not the functional currency, at the period-end exchange rate and translate sales and expenses at the average exchange rates in effect during the period. The net effect of these translation adjustments is recorded in the Condensed Consolidated Financial Statements as Comprehensive Income (Loss). The cumulative translation adjustment as of July 2, 2010 was a \$0.3 million loss. Translation adjustments are not adjusted for income taxes as they relate to permanent investments in our foreign subsidiaries. Net foreign currency transaction gains and losses included in Other Expense, Net amounted to a loss of \$0.5 million and gain of \$0.5 million for the first six months of 2010 and 2009, respectively. A hypothetical 10% change in the value of the U.S. dollar in relation to our most significant foreign currency net assets would have had an impact of approximately \$9 million on our foreign net assets as of July 2, 2010.

Table of Contents

Interest Rate Swaps As of July 2, 2010, we had \$98 million outstanding on our revolving line of credit. Interest rates reset on this debt based upon the six-month LIBOR rate, thus subjecting us to interest rate risk. During 2008, we entered into three receive floating-pay fixed interest rate swaps indexed to the six-month LIBOR rate. The objective of these swaps is to hedge against potential changes in cash flows on our outstanding revolving line of credit. No credit risk was hedged. The receive variable leg of the swaps and the variable rate paid on the revolving line of credit bear the same rate of interest, excluding the credit spread, and reset and pay interest on the same dates. See Note 5 Debt of the Notes to Condensed Consolidated Financial Statements in this report for additional information about our interest rate swap contracts.

The estimated negative fair value of the interest rate swap contracts of \$0.8 million as of July 2, 2010 represents the amount we would have to pay to terminate the contracts. No portion of the change in fair value of the interest rate swaps during the 2010 or 2009 periods was considered ineffective. The amount recorded as additional Interest Expense related to the interest rate swaps for the second quarter of 2010 and 2009 was \$0.6 million and \$0.3 million, respectively, and \$1.2 million and \$0.5 million, respectively, for the six months ended July 2, 2010 and July 3, 2009. Any change in the LIBOR interest rate would not have an impact on our interest expense relating to the \$98 million of floating rate revolving line of credit debt outstanding due to the interest rate swap agreements we have in place.

ITEM 4. CONTROLS AND PROCEDURES.

a. Evaluation of Disclosure Controls and Procedures.

Our management, including the principal executive officer and principal financial officer, evaluated our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) related to the recording, processing, summarization and reporting of information in our reports that we file with the SEC as of July 2, 2010. These disclosure controls and procedures have been designed to provide reasonable assurance that material information relating to us, including our subsidiaries, is made known to our management, including these officers, by other of our employees, and that this information is recorded, processed, summarized, evaluated and reported, as applicable, within the time periods specified in the SEC's rules and forms. Based on their evaluation, as of July 2, 2010, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures are effective.

b. Changes in Internal Control Over Financial Reporting.

There have been no changes in our internal control over financial reporting that occurred during our last fiscal quarter to which this Quarterly Report on Form 10-Q relates that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

With regard to the previously reported patent infringement action filed by Pressure Products Medical Supplies, Inc. (“Pressure Products”), in August 2010 the parties reached an agreement to settle the litigation. In exchange for a cash payment by the Company, Pressure Products will grant a covenant not to sue on the Company’s FlowGuard™ and OptiSeal™ introducer products and dismiss its claims against the Company. No further material litigation charges are anticipated with regards to this litigation as a result of this settlement. As part of the settlement, the litigation commenced by the Company against Pressure Products also will be dismissed.

The litigation previously reported in the Company’s Annual Report on Form 10-K for the year ended on January 1, 2010 commenced against the Company by its insurance carrier that had been paying the cost of defense in the Electrochem Litigation has been settled. Under the terms of the settlement agreement, the insurer has no further obligation to defend the Company, but the Company has no obligation to reimburse the insurer for defense costs expended prior to the jury verdict.

Except as disclosed above, there have been no material developments in those legal proceedings previously disclosed in the Company’s Form 10-K for the year ended January 1, 2010.

ITEM 1A. RISK FACTORS.

There have been no material changes from risk factors as previously disclosed in the Company’s Form 10-K for the year ended January 1, 2010.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES.

None.

ITEM 4. (REMOVED AND RESERVED)

ITEM 5. OTHER INFORMATION.

None.

ITEM 6. EXHIBITS.

See the Exhibit Index for a list of those exhibits filed herewith.
