SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended:
DECEMBER 31, 2001

Commission file number:
1-12733

TOWER AUTOMOTIVE, INC.
(Exact name of Registrant as specified in its charter)

DELAWARE
(State of Incorporation)

41-1746238
(I.R.S. Employer Identification
No.)

5211 CASCADE ROAD SE - SUITE 300
GRAND RAPIDS, MICHIGAN
(Address of Principal Executive
Offices)

49546
(Zip Code)

REGISTRANT'S TELEPHONE NUMBER, INCLUDING AREA CODE:
(616) 802-1600

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:
COMMON STOCK, PAR VALUE \$.01 PER SHARE

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:
NONE

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934, during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [X] No []

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Form 10-K. [X]

As of March 15, 2002, 48,222,012 shares of Common Stock of the Registrant were outstanding and the aggregate market value of the Common Stock of the Registrant (based upon the last reported sale price of the Common Stock at that date by the New York Stock Exchange), excluding shares owned beneficially by affiliates, was approximately \$612,495,000.

Information required by Items 10, 11, 12 and 13 of Part III of this Annual Report on Form 10-K incorporates by reference information (to the extent specific sections are referred to herein) from the Registrant's Proxy Statement for its annual meeting to be held May 15, 2002 (the "2002 Proxy Statement").

PART I

ITEM 1. BUSINESS

GENERAL DEVELOPMENT OF BUSINESS

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

BACKGROUND OF COMPANY

Tower Automotive, Inc. and its subsidiaries (collectively referred to as the "Company" or "Tower Automotive") is a leading global designer and producer of structural components and assemblies used by every major automotive original equipment manufacturer ("OEM"), including Ford, DaimlerChrysler, General Motors ("GM"), Honda, Toyota, Renault/Nissan, Fiat, Hyundai/Kia, BMW, Volkswagen Group, and Isuzu. The Company's current products include automotive body structural stampings and assemblies including exposed sheet metal ("Class A") components, lower vehicle structural stampings and assemblies, suspension components, modules and systems. The Company believes it is the largest independent global supplier of structural components and assemblies to the automotive market (based on net revenues).

The Company has over 60 manufacturing, product development, and administrative facilities located in the U.S., Canada, Mexico, Brazil, India, Germany, Hungary, Poland, Slovakia, Italy, France, Spain, Japan, China and Korea. The Company continues to broaden its geographic coverage and strengthen its ability to supply products on a global basis as a result of its acquisition strategy, targeted organic growth and disciplined manufacturing efficiency and productivity initiatives.

Since its inception in April 1993, when the Company was formed to acquire R. J. Tower Corporation, the Company's revenues have grown rapidly through a focused strategy of internal growth and a highly disciplined acquisition program. Since 1993, the Company has successfully completed 14 acquisitions and established six joint ventures in China, Mexico, Korea, Japan and the United States. As a result of these acquisitions and internal growth, the Company's revenues have increased from approximately \$86 million in 1993 to approximately \$2.5 billion in 2001. The Company's North American average content per vehicle has increased from \$6.23 in 1993 to \$114.67 in 2001.

The Company operates in the large and highly fragmented structural segment of the automotive supply industry, which has continued to undergo significant consolidation. In order to lower costs and improve quality, OEMs are reducing their supplier base by awarding sole-source contracts to full-service suppliers who are able to supply larger portions of a vehicle on a global basis. OEMs' criteria for supplier selection include not only cost, quality and responsiveness, but also full-service design, engineering and program management capabilities. OEMs are increasingly seeking suppliers capable of providing complete systems or modules rather than suppliers who only provide separate component parts. In addition, OEMs are increasingly requiring their suppliers to have the capability to design and manufacture their products in multiple geographic markets. As a full-service supplier with strong OEM relationships, the Company expects to continue to benefit from these trends within the structural segment of the automotive supply industry.

Approximately 72 percent of the Company's 2001 revenues were generated from sales in North America. The Company supplies products for many of the most popular car, light truck and sport utility models, including the Honda Accord and Civic, Toyota Camry, Ford Taurus, Focus, Explorer, Ranger and F-Series pickups, Chevrolet Silverado and GMC Sierra pickups, and Dodge Ram pickup. Approximately 11 percent of the Company's 2001 revenues were generated from sales in Europe and 15 percent in Asia. The remaining 2 percent of revenue was generated from sales in South America.

The Company's acquisition and joint venture activity is summarized below:

Carron Prototype Center. In January 2001, the Company invested approximately \$2 million in the formation of a prototyping joint venture with Carron Industries. The joint venture, Carron Prototype Center, located in

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Inkster, Michigan, provides the Company with detail stamping and tooling capabilities and has capacity for full frame prototypes and vehicle builds.

1

Presskam. In November 2000, the Company completed the acquisition of Strojarné Malacky, a.s. ("Presskam"), a manufacturer of upper body structural assemblies for Volkswagen, Porsche and Skoda, located near Bratislava, Slovakia. The Company paid total consideration of approximately \$10 million for Presskam and intends to use the investment to further support Volkswagen's Bratislava assembly operation.

Yorozu. In September 2000, the Company acquired a 17 percent equity interest in Yorozu Corporation ("Yorozu"), a supplier of suspension modules and structural parts to the Asian and North American automotive markets, from Nissan Motor Co. Ltd. ("Nissan"). Yorozu is based in Japan and is publicly traded on the first tier of the Tokyo Stock Exchange. Its principal customers include Nissan, Auto Alliance, General Motors, Ford, and Honda. The Company will pay Nissan approximately \$38 million over two and one half years for the 17 percent interest. In conjunction with the original investment, the Company had an option to increase its holdings in Yorozu by 13.8 percent through the purchase of additional Yorozu shares. In February 2001, the Company exercised the right to purchase the additional equity interest and will pay Nissan approximately \$30 million over two and one half years for the additional 13.8 percent interest. The remaining obligation to Nissan, as of December 31, 2001, was \$29.5 million, and is recorded as indebtedness on the Company's balance sheet.

Caterina. In July 2000, the Company acquired the remaining 60 percent equity interest in Metalurgica Caterina S.A. ("Caterina") for approximately \$42 million. The initial 40 percent interest was acquired in March 1998 for approximately \$48 million. Caterina is a supplier of structural stampings and assemblies to the Brazilian automotive market. This investment provided the Company with a substantial manufacturing presence in one of the fastest growing automotive markets in the world and added Volkswagen and Mercedes-Benz as new customers in Brazil.

Algoods. In May 2000, the Company acquired all of the outstanding common stock of Algoods, Inc. ("Algoods") for total consideration of approximately \$33 million. Algoods manufactures aluminum heat shields and impact discs for the North American automotive industry from aluminum mini-mill and manufacturing operations located in Toronto, Canada. Its primary customer is DaimlerChrysler. The acquisition of Algoods represents a significant investment in processing technology for lightweight materials which complements the Company's existing heat shield capabilities and provides opportunities for application in other lightweight vehicle structural products.

DTA Development. In March 2000, the Company invested \$2.1 million in the formation of a product technology and development joint venture with Defiance Testing & Engineering Services, Inc., a subsidiary of GenTek Inc. The joint venture, DTA Development, located in Westland, Michigan, provides the Company with product-testing services. Traditionally, the Company utilizes both internal and external product testing extensively to validate complex systems during the development stage of a program. This joint venture allows the Company to have access to a broader and more cost efficient range of testing capabilities. DTA Development blends the benefits of chassis product technology and development activities with leading edge commercial testing services.

Dr. Meleghy. In January 2000, the Company acquired all of the outstanding shares of Dr. Meleghy GmbH & Co. KG Werkzeugbau und Presswerk, Bergisch Gladbach ("Dr. Meleghy") for approximately \$86 million. Dr. Meleghy designs and produces structural stampings, exposed surface panels and modules for the European

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

automotive industry. Dr. Meleghy also designs and manufactures tools and dies for use in its production and for the external market. Dr. Meleghy operates three facilities in Germany and one facility in each of Hungary and Poland. Dr. Meleghy's principal customers include DaimlerChrysler, Audi, Volkswagen, Ford, Opel and BMW. Products offered by Dr. Meleghy include body side panels, floor pan assemblies, and miscellaneous structural stampings. Under the original purchase agreement, the Company has paid an additional \$29.6 million for this acquisition based on Dr. Meleghy achieving certain operating targets in 2000.

Seojin. In October 1999, the Company invested \$21 million for new shares representing a 49 percent equity interest in Seojin Industrial Company Limited ("Seojin"). Seojin is a supplier of frames, modules and structural components to the Korean automotive industry. In addition, the Company advanced \$19 million to Seojin in exchange for variable rate convertible bonds (the "Bonds") due October 30, 2009. The

2

Bonds are unsecured and rank equally with all other present and future obligations of Seojin. Interest on the Bonds is payable annually beginning October 30, 2000 and each October 30 thereafter until maturity. Under the joint venture investment agreement, the Company had the right to convert the Bonds into common stock of Seojin any time on or after October 30, 2000. The conversion rate was based upon a predetermined formula that increases the Company's equity interest to approximately 66 percent. On October 31, 2000, the Company exercised its right to convert the bonds into 17 percent of the common stock of Seojin. Based upon the formula for conversion of the Seojin variable rate bonds, the Company paid \$1.2 million for the additional equity interest.

Active. In July 1999, the Company acquired all of the outstanding stock of Active Tool Corporation and Active Products Corporation (collectively, "Active") for total approximate consideration of \$315 million. Active, which has five facilities, designs and produces a variety of large unexposed structural stampings, exposed surface panels, and modules to the North American automotive industry. Active's main customers include DaimlerChrysler, Ford, General Motors, and Saturn. Products offered by Active include body sides, pick-up box sides, fenders, floor pan assemblies, door panels, pillars, and heat shields. The acquisition of Active enhanced the Company's ability to manufacture large and complex structures, as well as exposed surface panels.

IMAR and OSLAMT. In July 1998, the Company acquired IMAR s.r.l. ("IMAR") and OSLAMT S.p.A. ("OSLAMT"). IMAR designs and manufactures structural parts and assemblies from two facilities in Italy, primarily for Fiat. OSLAMT designs and manufactures tools and assemblies for the automotive market from its facility in Turin, Italy. The purchase price consisted of approximately \$32 million cash plus the assumption of approximately \$17 million of indebtedness. Under the acquisition agreement, the Company also paid an additional amount of \$15 million, based on the achievement of certain operating targets.

Metalsa. In October 1997, the Company acquired a 40 percent equity interest in Metalsa S. de R.L. ("Metalsa"). In addition, the Company has entered into a technology sharing arrangement which will allow it to utilize the latest available product and process technology. Metalsa is the largest supplier of vehicle frames and structures in Mexico. The Company paid approximately \$120 million for its equity interest with an additional amount of up to \$45 million payable based upon Metalsa's net earnings through December 31, 2000. The Company paid approximately \$26 million under the earnout provisions of the joint venture investment agreement.

SIMES. In May 1997, the Company acquired Societa Industria Meccanica e Stampaggio S.p.A. ("SIMES"), an Italian automotive parts manufacturer, for

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

approximately \$51 million in cash, plus an additional \$3 million based on achievement by SIMES of certain operating targets following the acquisition. The acquisition of SIMES (i) significantly expanded the Company's global capabilities by providing the Company with a manufacturing presence in Europe, (ii) added Fiat as a new customer and (iii) enhanced the Company's design and engineering capabilities.

APC. In April 1997, the Company acquired Automotive Products Company ("APC") from A.O. Smith Corporation for approximately \$700 million in cash. APC is a leading designer and producer of structural and suspension components for the automotive, light truck and heavy truck markets. The Company believes that the acquisition of APC provided it with several strategic benefits, including: (i) expanded product offerings and modular product opportunities; (ii) increased customer penetration within each of the three major North American OEMs and within certain foreign OEMs with manufacturing operations in North America ("Transplants"); (iii) increased penetration in the light truck segment and other key models; (iv) complementary new technology; (v) opportunities to reduce costs and improve operational efficiency; and (vi) an expanded presence in China, Japan and South America, which complemented the Company's current European initiatives to provide expanded global production capabilities for both North American and international OEMs.

MSTI. In May 1996, the Company acquired MascoTech Stamping Technologies, Inc. ("MSTI") from MascoTech, Inc. ("MascoTech") for approximately \$79 million, plus an additional \$30 million in earnout payments as certain operating targets were achieved by the MSTI facilities in the first three years

3

following the acquisition. The MSTI acquisition: (i) expanded the Company's product capabilities into chassis and suspension components; (ii) provided chassis and suspension technology as well as value-added processing technologies including assembling, painting and welding; and (iii) increased the Company's content per vehicle on key light truck and sport utility vehicles such as the Ford F-Series, Explorer and Windstar and the Dodge Ram and Dakota as well as on high volume passenger cars such as the Ford Taurus/Sable.

Trylon. In January 1996, the Company acquired Trylon Corporation ("Trylon") from MascoTech for approximately \$25 million in cash. The acquisition of Trylon: (i) broadened the Company's product offerings to include small, precision metal stampings and assemblies, which were previously outsourced to third parties; (ii) established a relationship between the Company and General Motors; and (iii) increased content on Ford models, primarily the Villager.

Kalamazoo. In June 1994, the Company acquired Kalamazoo Stamping and Die Company ("Kalamazoo"), a supplier of structural stampings and assemblies, for approximately \$12 million in cash. The acquisition of Kalamazoo added additional structural components to the Company's product offerings and increased model penetration with Ford.

Edgewood. In May 1994, the Company acquired Edgewood Tool and Manufacturing Company and its affiliate, Ann Arbor Assembly Corporation (collectively, "Edgewood") for approximately \$30 million in aggregate consideration. Edgewood is a leading supplier of hood and deck lid hinges as well as structural stampings and assemblies. The acquisition of Edgewood: (i) added engineered mechanical stampings, primarily hood and deck lid hinges, and additional structural components to the Company's product offerings; (ii) increased model penetration with the Company's existing customers; and (iii) provided the Company with a significant presence with Mazda.

J.L. French. In October 1999, the Company loaned \$30 million to J.L.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

French Automotive Castings, Inc., ("J.L. French") in exchange for a convertible subordinated promissory note due October 14, 2009. The note bears interest at 7.5 percent annually with interest payable on the last day of each calendar quarter beginning December 31, 1999. The Company can convert, at its option, any portion of the outstanding principal of the note into Class A Common Stock of J.L. French at a preset agreed upon conversion price. In November 2000, the Company exercised its option to convert the note into 7,124 shares of Class A "1" Common Stock of J.L. French, which has a 7.5 percent pay-in-kind dividend right. Additionally, in November 2000, the Company invested \$2.9 million in J.L. French through the purchase of Class P Common Stock, which has an 8 percent pay-in-kind dividend right. In May 2000, the Company invested \$11.0 million in J.L. French through the purchase of Class A Common Stock. At December 31, 2001, the Company had an ownership interest of approximately 16 percent in J.L. French. During the fourth quarter of 2001, the Company evaluated its investment in J.L. French and determined it was impaired and therefore recorded a charge of \$46.3 million to write off the entire investment in J.L. French.

Roanoke Heavy Truck Business. In December 2000, the Company sold its Roanoke, Virginia heavy truck rail manufacturing business (the "Roanoke Heavy Truck Business") to its joint venture partner, Metalsa, for net proceeds of approximately \$55 million, which approximated the book value of the net assets sold, plus an earnout of up to \$30 million based on achieving certain profit levels over the next three years. The net proceeds were used to repay outstanding indebtedness under the revolving credit facility.

Hinge Business. In August 1998, the Company sold its hinge business to Dura Automotive Systems, Inc. for net proceeds of approximately \$37 million which approximated the book value of the net assets sold. The net proceeds were used to repay outstanding indebtedness under the revolving credit facility.

The Company's principal executive offices are located at 5211 Cascade Road SE, Suite 300, Grand Rapids, Michigan 49546, and its telephone number is (616) 802-1600.

BUSINESS STRATEGY

The Company's strategy is to capitalize upon its position as the largest independent global supplier of automotive structural components and assemblies in order to take advantage of the opportunities arising

4

from the consolidation, globalization and modular sourcing trends in the automotive supply industry. The ultimate goal of this strategy is to maximize return on invested capital and create long-term value for shareholders. Key elements of the Company's operating and growth strategies are outlined below:

Operating Strategy:

Offer Full-Service Technical Design, Engineering and Program Management Capabilities. The Company continues to build its competitive advantage through investment in product development, advanced engineering and program management. As a result of this investment, and of consolidation among suppliers of automotive structural components and assemblies, the Company believes that it is one of only a select group of suppliers able to provide automotive OEMs with full service technical design, engineering and program management capabilities with respect to the entire body structure of a vehicle on a global basis. The Company works with OEMs throughout the product development process from concept vehicle and prototype development through the design and implementation of manufacturing processes to provide full-service capabilities to its customers. In some cases, the Company places design engineers at customer facilities to

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

coordinate its product design efforts with those of its OEM customers.

Further Enhance Global Presence. The Company offers manufacturing and support services to its customers on a global basis through a combination of international wholly owned subsidiaries and by entering into joint ventures and partnerships with foreign suppliers. Outside of North America, the Company has technical/customer service centers in Yokohama, Japan; Turin, Italy; Hyderabad, India; Bergisch-Gladbach, Germany; and Sao Paulo, Brazil. The Company also has relocated certain technical personnel to locations where OEMs are developing "world cars" which can be designed in one vehicle center to a single global standard but produced and sold in different geographic markets. The Company believes that these global, technical, and manufacturing capabilities have led to the award of several, major new programs to the Company.

Continue to Optimize Manufacturing Efficiency and Quality. In response to OEMs' increasingly stringent production specifications, the Company has implemented manufacturing practices designed to maximize product quality and timeliness of delivery to reduce waste and enhance efficiency. The Company has continued to upgrade its manufacturing equipment and processes through selective investment in new equipment, maintenance of existing equipment and efficient utilization of manufacturing engineering personnel. In order to maximize return on invested capital, the Company increasingly employs flexible manufacturing processes that allow it to maximize equipment utilization in meeting customer expectations for product quality and timely delivery. Consistent with this strategy, the Company, where appropriate, outsources the production of select commodity components to Tier II manufacturers, as well as seeks to provide administrative services to these manufacturers to maximize supply chain efficiency and return on invested capital. The Company monitors existing manufacturing capacity relative to expected capacity, which is determined primarily by current and expected business backlog and by opportunities to outsource commodity operations to Tier II manufacturers. As a result, beginning in the second half of 2000, the Company began restructuring its operations to reduce excess manufacturing capacity and improve the efficiency of its operations.

Maintain Decentralized, Participative, Incentive-Based Culture. The Company's decentralized approach to managing its manufacturing facilities encourages decision making and colleague participation in areas such as manufacturing processes and customer service. The Company's leadership team meets frequently at various Company locations in order to maintain a unified Company culture. To increase colleague productivity, the Company utilizes incentive programs for all salaried and hourly colleagues that provide incentives for colleagues who take advantage of continuous improvement programs and who provide cost savings ideas.

Growth Strategy:

The Company's growth strategy comprises two fundamental elements; increased organic growth and the pursuit of strategic acquisitions, alliances and partnerships.

5

Increase Organic Growth. The Company actively pursues increased organic growth from both new and replacement vehicle programs. Specifically, it is the Company's belief that the following competitive strengths have played, and will continue to play, an important role in achieving its organic growth objectives:

- Scale position as the largest independent supplier of automotive structural components and assemblies;

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

- Full-service technical design, engineering and program management capabilities;
- Global engineering and manufacturing presence;
- Modular product capabilities;
- Strong customer relationships with key domestic and foreign automotive OEMs;
- Strong financial position relative to most competitors.

As a result of these competitive strengths, and the efforts to increase organic growth, the Company was awarded programs in 2001 that, based on independent estimates of expected program volumes and current expectations of program pricing, represent more than \$760 million in annual revenues. These programs are scheduled to launch over the next three years and be in full production by 2005. These programs will help to further the diversification of the Company's customer base. The proportion of revenues from Ford and DaimlerChrysler, the Company's two largest customers, has decreased from 68 percent in 2000 to 60 percent in 2001. Of the \$760 million in annual revenues represented by the new program awards described above, 43 percent is expected to be derived from Ford and DaimlerChrysler and 57 percent is expected to be derived from other customers including Nissan, GM, and BMW.

In order to better target acceptable returns on new business, the Company, beginning in 2000, adopted a return on invested capital-based approach to evaluating the attractiveness of potential new programs. Specifically, the objective is to take on only those programs that are expected to provide an acceptable return on invested capital after taking into account such factors as expected unit volume and pricing, ability to utilize existing manufacturing capacity for that program, requirements for investment in new capital equipment and the flexibility to use such new capital equipment for other programs.

Pursue Strategic Acquisitions, Alliances and Partnerships. Strategic acquisitions, alliances and partnerships have contributed significantly to the Company's growth. The Company continues to believe that consolidation in the automotive supply industry will provide further attractive opportunities to either acquire, or purchase a majority or minority ownership interest in companies that complement its existing business. The Company seeks to make acquisitions that:

- Provide additional product, manufacturing and technical capabilities;
- Broaden the Company's geographic coverage domestically and strengthen its ability to supply products on a global basis;
- Increase both the number of models for which the Company supplies products and the content supplied for existing models;
- Add new customers;
- Facilitate outsourcing opportunities from the in-house operations of new and existing customers;
- Facilitate capacity rationalization and restructuring opportunities; and
- Provide at least a minimum targeted return on invested capital.

In 2001, over 70 percent of total worldwide passenger vehicle production occurred outside North America. As a result, a particular focus for the Company has been and will continue to be to pursue acquisitions or develop strategic

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

partnerships and alliances that strengthen the Company's ability to supply its products on a global basis. Consistent with this strategy, the Company has formed, or is in the process

6

of forming, strategic alliances with other suppliers throughout the world, including those located in Europe, Asia and South America. For example, the Company has majority-owned operations in Asia through its 66 percent interest in Seojin in Korea and its 60 percent interest in Tower Golden Ring, which manufactures structural components in China. The Company also has equity interests in Mexico through its 40 percent interest in Metalsa and in Japan through its 30.8 percent interest in Yorozu. Increased international sales are intended to mitigate the effects of cyclical downturns in a given geographic region and further diversify the Company's OEM customer base.

INDUSTRY TRENDS

The Company's performance and growth is directly related to certain trends within the automotive market, including the consolidation of the component supply industry, the increase in global sourcing and the growth of system/modular sourcing. It is also directly related to automotive production, which is cyclical and depends on general economic conditions and consumer confidence.

Continuation of Supplier Consolidation. In order to lower costs and improve quality, OEMs have continued to reduce their supply base by awarding sole-source contracts to full-service suppliers who are able to supply larger segments of a vehicle. OEMs' criteria for supplier selection include not only cost, quality and responsiveness, but also full-service design, engineering and program management capabilities. As a result, over the past decade, the automotive supply industry has been undergoing significant consolidation. Furthermore, in 2001 a number of suppliers experienced financial difficulties, which is likely to result in further consolidation activity as the operations of these suppliers are acquired and rationalized by larger, more capable suppliers. For full-service suppliers such as the Company, this environment provides an opportunity to grow both organically, by obtaining business previously provided by other non-full service suppliers, and through acquisition, by acquiring suppliers that further enhance product, manufacturing and service capabilities. OEMs rigorously evaluate suppliers on the basis of product quality, cost control, reliability of delivery, product design capability, financial strength, new technology implementation, quality and condition of facilities and overall management. Suppliers that obtain superior ratings are considered for sourcing new business. Although these new OEM policies have already resulted in significant consolidation of component suppliers in certain segments, the Company believes that consolidation within the structural and suspension component segments of the automotive industry will continue to provide attractive opportunities to acquire or partner with companies that complement its existing business.

Global Sourcing. Regions such as Asia, Latin America, Mexico and Eastern Europe are expected to experience significant growth in vehicle demand over the next ten years. OEMs are positioning themselves to reach these emerging markets in a cost-effective manner by seeking to design and produce "world cars" which can be designed in one vehicle center to a single global standard but produced and sold in different geographic markets, thereby allowing OEMs to reduce design costs, take advantage of low-cost manufacturing locations and improve product quality and consistency. OEMs increasingly are requiring their suppliers to have the capability to design and manufacture their products in multiple geographic markets. In order to best meet these OEM requirements, the Company has over 24 manufacturing facilities outside the U.S., including locations in Canada,

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Brazil, Germany, Italy, Poland, Slovakia, Hungary, Korea, and China. In addition, the Company's alliance/partnership relationships provide access to new geographic markets and customers. A more recent trend beyond the development of "world cars", is the consolidation of platforms across OEMs through joint development efforts. GM and Fiat have announced plans to combine platforms across the two companies. DaimlerChrysler with Mitsubishi and Renault with Nissan will combine platforms as well. OEMs also plan to create common component sets across platforms in areas such as powertrain, axles, suspensions, HVAC, and other areas, thereby reducing the degree of product differentiation.

System/Modular Sourcing. OEMs are increasingly seeking suppliers capable of providing complete systems or modules. A system is a group of components, which may be dispersed throughout the vehicle, yet operate together to provide a specific engineering function. Modules, on the other hand, consist of sub-assemblies at a specific location in the vehicle, incorporating components from various functional systems,

7

which are assembled and shipped to the OEM ready for installation in a vehicle as a unit. By outsourcing complete systems or modules, OEMs are able to reduce their costs associated with the design and integration of different components and improve quality by enabling their suppliers to assemble and test major portions of the vehicle prior to production. The Company has capitalized on the system/modular sourcing trend among OEMs by offering customers higher value-added supply capabilities through an increasing focus on the production of assemblies consisting of multiple component parts that are welded or otherwise fastened together by the Company. The Company has the ability to supply OEMs with modules consisting of integrated assemblies and component parts that can be installed as a unit in a vehicle at the OEM assembly plant.

OEM Consolidation. The recent acquisition and consolidation activity among select OEMs has not led to the disadvantage of the smaller OEMs in the industry as previously predicted. Rather, smaller OEMs such as Peugeot, Honda, Hyundai/Kia, and BMW have strengthened their positions in the industry and their financial performance, while some of the larger OEMs have struggled to successfully integrate acquisitions. The Company's global capabilities have allowed it to continue to serve as a valuable supplier to those smaller producers.

PRODUCTS

The Company produces a broad range of structural components and assemblies, many of which are critical to the structural integrity of a vehicle. Many of the Company's stamped, formed and welded components and assemblies are attached directly to the frame of an automobile at the OEM assembly plant and comprise the major structure of a vehicle. The Company's products generally can be classified into the following categories: body structures and assemblies; lower vehicle structures; suspension modules and systems; and suspension components. A brief summary of each of the Company's principal product categories follows:

PRODUCT CATEGORY/DESCRIPTION

BODY STRUCTURES AND ASSEMBLIES:

Products that form the basic upper body structure of the vehicle and include large metal stampings such as body pillars, roof rails, side sills, parcel shelves and intrusion beams. Current assemblies include a broad array of highly engineered parts such as fuel filler assemblies, which are attached to both lower vehicle and body structures. This category also includes Class A surfaces and modules. Class A surfaces include exposed sheet metal components

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

such as body sides, pick-up box sides, door panels and fenders. The capability to produce these types of components complements the Company's substantial presence in lower vehicle and body structures and allows for the combination of these offerings into modules for supply to customers.

LOWER VEHICLE STRUCTURES:

Products that form the basic lower body structure of the vehicle and include large metal stampings from both traditional and hydroforming methods, such as pickup truck and SUV full frames, automotive engine cradles, floor pan components and cross members. Critical to the strength and safety of vehicles, these products carry the load of the vehicle and provide crash integrity.

SUSPENSION MODULES AND SYSTEMS:

Products include axle assemblies which consist of stamped metal trailing axles, assembled brake shoes, hoses and tie rods and front and rear structural suspension modules/systems, which consist of control arms, suspension links and value-added assemblies and systems comprised of components that it manufactures as well as those produced by other manufacturers. Assemblies are groups of components grouped according to their relative location, while systems are components grouped based upon providing

8

functionality. The Company sells this expertise to OEMs who have been increasingly outsourcing assemblies and systems in order to reduce production and inventory management costs.

SUSPENSION COMPONENTS:

Products include stamped, formed and welded products such as control arms, suspension links, track bars, spring and shock towers and trailing axles. Critical to the ride, handling and noise characteristics of a vehicle, suspension components are a natural extension of the Company's larger structural components.

OTHER:

The Company manufactures a variety of other products, including heat shields and other precision stampings, for its OEM customers.

The following table summarizes the approximate composition by product category of the Company's global revenues for the last two fiscal years:

PRODUCT CATEGORY -----	YEAR ENDED DECEMBER 31,	
	2001	2000
	----	----
Body structures & assemblies (including Class A surfaces)...	39%	39%
Lower vehicle structures.....	36	41
Suspension modules & systems.....	15	11
Suspension components.....	8	8
Other.....	2	1
	---	---
Total.....	100%	100%
	===	===

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

CUSTOMERS AND MARKETING

The North American automotive manufacturing market is dominated by GM, Ford and DaimlerChrysler, with the Japanese and European OEMs representing approximately 23 percent of production in this market in 2001. The Company currently supplies its products primarily to Ford, DaimlerChrysler, GM, Honda, Toyota, and Nissan in North America. As a result of past growth strategies, the Company has further expanded its global presence and has increased penetration into certain existing customers and added new customers such as Fiat, BMW, Volkswagen, Nissan, and Hyundai/Kia.

OEMs typically award contracts that cover parts to be supplied for a particular vehicle model or platform. Such contracts range from one year to over the life of the model, which is generally three to ten years and do not require the purchase by the OEM of any minimum number of parts. The Company also competes for new business to supply parts for successor models and therefore is subject to the risk that the OEM will not select the Company to produce parts on a successor model. The Company supplies parts for a broad cross-section of both new and mature models, thereby reducing its reliance on any particular model. For example, the Company supplies parts for substantially all models produced by Ford, Honda and Toyota in North America and also currently supplies DaimlerChrysler with substantially all of its full frame requirements.

9

Following is a summary of the global composition of significant customers for the last two fiscal years:

CUSTOMER -----	YEAR ENDED DECEMBER 31, -----	
	2001	2000
	----	----
Ford/Jaguar/Volvo.....	35%	37%
DaimlerChrysler.....	25	31
Hyundai/Kia.....	12	4
General Motors.....	4	5
Fiat.....	4	4
VW Group.....	4	2
Honda.....	3	3
Toyota.....	2	2
Nissan.....	1	1
Other.....	10	11
	---	---
Total.....	100%	100%
	===	===

Below is a summary of the Company's sales by geographic region for the last two fiscal years:

YEAR ENDED

Most of the parts the Company produces have a lead time of two to five years from product development to production. See "Design and Engineering Support." The selling prices of these products are generally negotiated between the Company and its customers and are typically not subject to a competitive bid process.

Sales of the Company's products to OEMs are made directly by the sales and engineering teams, located at its technical/customer service centers in Novi, Michigan; Rochester Hills, Michigan; Yokohama, Japan; Turin, Italy; Bergisch-Gladbach, Germany; Sao Paulo, Brazil; and Hyderabad, India. Through its technical centers, the Company services its OEM customers and manages its continuing programs of product design improvement and development. The Company periodically places engineering staff at various customer facilities to facilitate the development of new programs.

The Company's sales and marketing efforts are designed to create overall awareness of its engineering, program management, manufacturing and assembly expertise to acquire new business and to provide ongoing customer service. The sales group is organized into customer-dedicated teams within product groups. From time to time, the Company also participates in industry and customer specific trade and technical shows.

DESIGN AND ENGINEERING SUPPORT

The Company strives to maintain a technological advantage through investment in product development and advanced engineering capabilities. The Company's manufacturing engineering capabilities enable it to design and build high-quality and efficient manufacturing systems, processes and equipment and to continually improve its production processes and equipment. The Company's manufacturing engineers are located at each of its manufacturing facilities. The Company's engineering staff currently consists of approximately 330 full-time engineers, whose responsibilities range from research and development, advanced product development, product design, testing and initial prototype development to the design and implementation of manufacturing processes.

Because assembled parts must be designed at an early stage in the development of new vehicles or model revisions, the Company is increasingly given the opportunity to utilize its product engineering resources early in the planning process. Advanced development engineering resources create original engineering designs, computer-aided designs, feasibility studies, working prototypes and testing programs to meet customer specifications. The Company also has full-service design capability for chassis components.

11

The Company's Hyderabad, India technical center allows for 24 hour engineering globally, thereby optimizing product design and analysis capabilities, leading to reduced development costs.

MANUFACTURING

The Company's manufacturing operations consist primarily of stamping operations, system and modular assembly operations, roll-forming and hydroforming operations and associated coating and other ancillary operations.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Stamping involves passing metal through dies in a stamping press to form the metal into three-dimensional parts. The Company produces stamped parts using over 640 precision single-stage, progressive and transfer presses, ranging in size from 150 to 4,000 tons, which perform multiple functions as raw material proceeds through the press and is converted into a finished product. The Company continually invests in its press technology to increase flexibility, improve safety and minimize die changeover time.

After forming is completed, stampings that are to be used in assemblies are placed in work-in-progress staging areas from which they are fed into cell-oriented assembly operations that produce complex, value-added assemblies through the combination of multiple parts that are welded or fastened together. The Company's assembly operations are performed on either dedicated, high-volume welding/fastening machines or on flexible-cell oriented robotic lines for units with lower volume production runs. The assembly machines attach additional parts, fixtures or stampings to the original metal stampings. In addition to standard production capabilities, the Company's assembly machines are also able to perform various statistical control functions and identify improper welds and attachments. The Company continually works with manufacturers of fixed/robotic welding systems to develop faster, more flexible machinery. Several of the Company's welding systems were designed by the Company.

The products manufactured by the Company use various grades and thicknesses of steel and aluminum, including high strength hot and cold rolled, galvanized, organically coated, stainless and aluminized steel. The Company also produces exposed sheet metal components, such as exterior body panels. See "Suppliers and Raw Materials."

OEMs have established quality rating systems involving rigorous inspections of suppliers' facilities and operations. OEMs' factory rating programs provide a quantitative measure of a company's success in improving the quality of its operations. The Company has received quality awards from Ford (Q1) and DaimlerChrysler (Pentastar). The automotive industry has adopted a quality rating system known as QS-9000. All of the Company's existing operating facilities in North America have received QS-9000 certification in compliance with the automotive industry requirements.

COMPETITION

The Company operates in a highly competitive, fragmented market segment of the automotive supply industry, with a limited number of competitors generating revenues in excess of \$200 million. The number of the Company's competitors has decreased in recent years and is expected to continue to decrease due to the supplier consolidation resulting from changing OEM policies. The Company's major competitors include The Budd Company, a subsidiary of Thyssen-Krupp AG, Magna International, Inc. ("Magna"), Dana Corporation, and divisions of OEMs with internal stamping and assembly operations, all of which have substantial financial resources. The Company competes with other significant competitors in various segments of its product lines and in various geographic markets. The Company views Magna as its strongest competitor across most of the Company's product lines; however, the Company believes that no single competitor can provide the same range of products and capabilities as the Company in all of the major international automotive markets.

The Company principally competes for new business both at the beginning of the development of new models and upon the redesign of existing models. New model development generally begins two to five years before the marketing of such models to the public. Once a supplier has been designated to supply parts for a new program, an OEM usually will continue to purchase those parts from the designated

producer for the life of the program, although not necessarily for a redesign. Competitive factors in the market for the Company's products include product quality and reliability, cost and timely delivery, technical expertise and development capability, new product innovation and customer service. In addition, there is substantial and continuing pressure at the OEMs to reduce costs, including the cost of products purchased from outside suppliers such as the Company. Historically, the Company has been able to generate sufficient production cost savings to offset these price reductions.

SUPPLIERS AND RAW MATERIALS

The primary raw material used to produce the majority of the Company's products is steel. The Company purchases hot and cold rolled, galvanized, organically coated, stainless and aluminized steel from a variety of suppliers. The Company employs just-in-time manufacturing and sourcing systems enabling it to meet customer requirements for faster deliveries while minimizing its need to carry significant inventory levels. The Company has not experienced any significant shortages of raw materials and normally does not carry inventories of raw materials or finished products in excess of those reasonably required to meet production and shipping schedules. Raw material costs represented approximately 56 percent of the Company's revenues in 2001.

Ford, Honda and DaimlerChrysler currently purchase all of the steel used by the Company for their models directly from steel producers. As a result, the Company has minimal exposure to changes in steel prices for parts supplied to Ford, Honda and DaimlerChrysler, which collectively represented 63 percent of the Company's revenues in 2001.

The Company expects that the content level of metal in cars and light trucks will remain constant or increase slightly due to the trend toward increased vehicle size and a greater emphasis on metal recycling. Although the search for improved fuel economy and weight reduction has resulted in attempts to reduce the sheet metal content of light vehicles, an efficient, cost-effective substitute for steel used in the Company's structural products has not been found. While various polymers have been used recently for fenders, hoods and decks, such products do not have the inherent strength or structural integrity on a cost-effective basis to be used for structural components. The Company is involved in ongoing evaluations of the potential for the use of aluminum and of specialty steel in its products.

Other raw materials purchased by the Company include dies, fasteners, tubing, springs, rivets and rubber products, all of which are available from numerous sources.

COLLEAGUES

As of December 31, 2001, the Company had approximately 13,000 colleagues worldwide, of whom approximately 5,300 are covered under collective bargaining agreements. These collective bargaining agreements expire between 2002 and 2005. The Company believes that its future success will depend in part on its ability to continue to recruit, retain and motivate qualified personnel at all levels of the Company. The Company has instituted a large number of colleague incentive programs to increase colleague morale and expand the colleagues' participation in the Company's business. Since its inception in 1993, the Company has not experienced any significant work stoppages and considers its relations with its colleagues to be good.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

ITEM 2. PROPERTIES

FACILITIES

The following table provides information regarding Tower Automotive's principal facilities. The Company maintains several manufacturing facilities located in close proximity to many of the high-volume vehicle assembly plants of its customers. The Company's facilities are geographically located in such a way as to enable the Company to optimize its management and logistical capabilities on a regional basis.

(1) Facility is leased by a joint venture in which the Company holds a 60 percent equity interest.

(2) Facility is owned by a joint venture in which the Company holds a 66 percent equity interest.

Management believes that substantially all of the Company's property and equipment is in good condition. In order to increase efficiency, the Company expects to continue to make capital expenditures for equipment upgrades at its facilities as necessary.

The Company believes that its existing facilities will be adequate to meet its production demands for the foreseeable future. The Company's facilities were specifically designed for the manufacturing of the Company's products. The utilization and capacity of such facilities are dependent upon the mix of products being produced by the Company.

ITEM 3. LEGAL PROCEEDINGS

The Company is not currently involved in any material lawsuits. The Company believes it maintains adequate insurance, including product liability coverage. The Company historically has not been required to pay any material liability claims.

ENVIRONMENTAL MATTERS

The Company is subject to foreign, federal, state and local laws and regulations governing the protection of the environment and occupational health and safety, including laws regulating the generation, storage, handling, use and transportation of hazardous materials; the emission and discharge of hazardous materials into the soil, ground or air; and the health and safety of its colleagues. The Company is also required to obtain permits from governmental authorities for certain operations. The Company cannot assure that it has been or will be at all times in complete compliance with such laws, regulations and permits. If it violates or fails to comply with these laws, regulations or permits, it could be fined or otherwise sanctioned by regulators. In some instances, such a fine or sanction could be material. The Company does not expect that its capital expenditures for environmental controls will be material for the current or succeeding fiscal year.

The Company is also subject to laws imposing liability for the cleanup of contaminated property. Under these laws, it could be held liable for costs and damages relating to contamination at its past or present facilities and at third

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

party sites to which these facilities sent wastes containing hazardous substances. The amount of such liability could be material.

As part of the Company's acquisition of Active in 1999, it acquired a facility located in Sebewaing, Michigan. In 2001, the Sebewaing facility received a claim from the Village of Sebewaing for costs associated with the removal of sludge from the Village's wastewater treatment lagoon. The Village alleged that wastewater discharges from the facility resulted in contamination of the sludge, which, in turn,

15

increased the disposal costs incurred by the Village. The amount of the Village's claim is \$208,000. The Company is in discussions with the Village regarding resolving claim. The Company also acquired from Active a facility located in Elkton, Michigan. The Company is in the process of investigating contamination at the Elkton facility, and at a nearby waste disposal site that was allegedly used for the disposal of wastes from the Elkton facility in the 1970s. These investigations are being conducted under the oversight of the Michigan Department of Environmental Quality ("MDEQ"). Because the MDEQ has not yet approved a Remedial Action Plan for these sites, the cost to remediate the sites is not known, although it is not expected to exceed the \$14 million in the escrow established for indemnification, described below.

In connection with the Company's acquisition of Active, it is entitled to indemnification for losses (including reasonable legal fees and expenses) resulting from claims arising from certain pre-closing matters, including pre-closing environmental matters. The indemnity covers losses that exceed \$1 million, up to the amount of escrowed funds, which is currently about \$14 million. The indemnity is limited to the claims the Company submitted within two years after acquiring Active. The Company submitted several claims under this indemnity, including claims for the Sebewaing wastewater matter and the Elkton contamination matters described above. The Company is currently in negotiations with the former shareholders of Active to reach agreement regarding the amount funds that will be paid out of the escrow to settle indemnified claims.

The Company acquired Algoods, Inc. in 2000, with a facility in Toronto, Ontario. Prior operations had resulted in contamination at the facility. In 2000, the Company had preliminarily estimated that the present value of its costs to address these issues at \$5.5 million (CDN). Alcan Aluminum, Ltd., a former owner of the property, is in the process of investigating and remediating this contamination. Until 2008, the Company has agreed to contribute up to \$100,000 (CDN) per year for remediation activities. After 2008, the Company has agreed to be responsible for on-site contamination and Alcan has agreed to be responsible for off-site contamination.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of Stockholders during the fourth quarter of 2001.

ADDITIONAL ITEM -- EXECUTIVE OFFICERS

The following table sets forth certain information with respect to the Company's executive officers as of December 31, 2001:

NAME	AGE	POSITION
----	---	-----

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Dugald K. Campbell.....	55	President, Chief Executive Officer and Director
James W. Arnold.....	49	Vice President
Anthony A. Barone.....	52	Vice President and Chief Financial Officer
Richard S. Burgess.....	47	Vice President
Kathy J. Johnston.....	44	Vice President
Tommy G. Pitser.....	54	Vice President
Antonio R. Zarate.....	57	Vice President

DUGALD K. CAMPBELL has served as President, Chief Executive Officer and a Director of the Company since December 1993. From 1991 to 1993, Mr. Campbell served as a consultant to Hidden Creek Industries, a private industrial management company. From 1988 to 1991, he served as Vice President and General Manager of the Sensor Systems Division of Siemens Automotive, a manufacturer of engine management systems and components. From 1972 to 1988, he held various executive, engineering and marketing positions with Allied Automotive, a manufacturer of vehicle systems and components and a subsidiary of AlliedSignal, Inc.

16

JAMES W. ARNOLD has served as Vice President of the Company since 1999, with current responsibility for the Company's North American and Asian strategy. Mr. Arnold joined the Company in 1998. From 1977 to 1998, Mr. Arnold held a variety of manufacturing, sales, marketing and Asian general management positions at AlliedSignal.

ANTHONY A. BARONE has served as Vice President and Chief Financial Officer of the Company since May 1995. From 1984 to 1995, Mr. Barone served as Chief Financial Officer of O'Sullivan Corporation, a manufacturer of interior trim components for the automotive industry.

RICHARD S. BURGESS has served as Vice President of the Company with responsibility for colleague growth and development since January 1996. From June 1994 to January 1996, Mr. Burgess served as the colleague growth and development leader during the start-up of the Bardstown, Kentucky operation. From October 1991 to June 1994, Mr. Burgess filled various roles in colleague growth and development of R.J. Tower Corporation.

KATHY J. JOHNSTON has served as Vice President of the Company since June 2000 with responsibility for enterprise strategy and commercial development. From 1997 to 2000, Ms. Johnston served as Vice President Planning and Business Development at TRW Automotive in Cleveland, Ohio. From 1981 to 1997, Ms. Johnston served in finance, sales and marketing, purchasing, operations and strategic planning roles at TRW's vehicle safety systems group in Detroit, Michigan.

TOMMY G. PITSER has served as Vice President since 1996, with current responsibility for the Company's European strategy. Mr. Pitser previously had responsibility for the Company's South American strategy and its joint venture investment in China and operations in Barrie, Ontario; Plymouth, Michigan; Yokohama, Japan; Romulus, Michigan; Manchester, Michigan and Novi, Michigan, since May 1996. Prior to joining the Company, Mr. Pitser served in various sales and marketing capacities at MSTI. Prior to joining MSTI, Mr. Pitser served as Market Director-Automotive at AE Goetze North America. From 1969 to 1992, Mr. Pitser was an employee of Borg-Warner Corporation, most recently as General Manager-Marine & Industrial Transmissions.

ANTONIO R. ZARATE has served as Vice President of the Company since May 2000 with responsibility for the Company's strategy in Mexico and South America. From 1994 to 2000, Mr. Zarate served as President of the Automotive Division of

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Proeza, S.A. de C.V., a diversified international company that has operations primarily in the automotive and citrus juice processing industries.

There are no family relationships between or among the above-named executive officers. There are no arrangements or understandings between any of these officers pursuant to which any of them served as an officer.

17

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

The Company's Common Stock is traded on the New York Stock Exchange under the symbol TWR. As of March 15, 2002, there were approximately 2,893 stockholders of record of the Company's stock. The following table sets forth, for the periods indicated, the low and high closing sale prices for Common Stock as reported on the New York Stock Exchange:

	LOW	HIGH
	-----	-----
2000		
First Quarter.....	\$11.63	\$17.50
Second Quarter.....	11.63	17.63
Third Quarter.....	9.13	13.56
Fourth Quarter.....	7.13	11.00
2001		
First Quarter.....	\$ 8.50	\$11.65
Second Quarter.....	8.70	11.21
Third Quarter.....	7.01	14.71
Fourth Quarter.....	5.90	9.65

During the last two years, the Company has not paid any cash dividends. The Company has no current intention of paying any cash dividends in 2002. The Company's ability to pay cash dividends on its Common Stock is dependent on the receipt of dividends or other payments from its operating subsidiaries. The payment of cash dividends to the Company by such operating subsidiaries for the purpose of paying cash dividends on the Common Stock is limited by the terms of the \$1.15 billion senior unsecured credit agreement.

18

ITEM 6. SELECTED FINANCIAL DATA

The selected consolidated financial data for Tower Automotive presented below for and as of the end of each of the years in the five-year period ended December 31, 2001, is derived from Tower Automotive, Inc.'s Consolidated Financial Statements which have been audited by Arthur Andersen LLP, independent public accountants. The consolidated financial statements as of December 31, 2000 and 2001 and for each of the three years in the period ended December 31, 2001 and the report of independent public accountants thereon are included elsewhere in this report. The consolidated financial statements as of December 31, 1997, 1998 and 1999 are not included herein. This selected consolidated financial data should be read in conjunction with "Management's Discussion and Analysis of Results of Operations and Financial Condition" and Tower

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Automotive's Consolidated Financial Statements and Notes to Consolidated Financial Statements, included elsewhere in this report.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF RESULTS OF OPERATIONS AND FINANCIAL CONDITION

INTRODUCTION

Since its inception in April 1993, when the Company was formed to acquire R. J. Tower Corporation, the Company's revenues have grown rapidly through a focused strategy of internal growth and a highly disciplined acquisition program. Since 1993, the Company has successfully completed 14 acquisitions and established six joint ventures in China, Mexico, Korea, Japan and the United States. As a result of these acquisitions and internal growth, the Company's revenues have increased from approximately \$86 million in 1993 to approximately \$2.5 billion in 2001.

Initially, the Company's growth came primarily from acquisitions of North

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

American-based automotive suppliers, some of which had international operations. The Company succeeded in consolidating a portion of the North American automotive supplier base for structural components and assemblies and established itself as a key supplier of those products. The Company's more recent acquisitions have been intended to strengthen its ability to supply products on a global basis, grow its technology and manufacturing capabilities, and diversify its customer base. See "Recent Transactions" below.

The Company's rapid growth through acquisitions coincided with an extended period of increased automotive production that resulted in high levels of utilization of the Company's acquired resources and capacity and contributed to periods of strong operating results. Beginning in late 2000, automotive production declined relative to prior periods, leading the Company to focus its efforts on reducing the capacity of the enterprise and improving the efficiency of its continuing operations. These efforts resulted in two significant restructurings, described in more detail below, that reduced excess capacity, eliminated redundant overhead costs, and reorganized the management structure of the Company's U.S. and Canadian operations. These efforts also involved the divestiture of certain non-core functions, including the sale of the Company's heavy truck business, in December 2000, to its joint venture partner, Metalsa. Prior to these restructurings, the Company did not undertake any significant reductions in the scope of its operations or any capacity rationalizations as a result of or following any of its prior acquisitions.

The Company's most recent objective has been to reduce indebtedness by maximizing cash flow. Several initiatives, such as extending its accounts payable terms to coincide with prevailing industry practices and accelerating collections from customers took place in 2001. As a result, and as described in more detail below under "Liquidity and Capital Resources," the Company was able to significantly reduce its indebtedness in 2001 by making net repayments of \$335 million, despite last year's downturn in the automotive industry.

The automotive market continues to be highly cyclical and dependent upon consumer spending. Due to the relatively long lead times required to produce many of the Company's complex structural components, it may be difficult, in the short term, for the Company to obtain new sales to replace any decline in the sales of existing products. As a result, the Company has implemented and continues to pursue the actions necessary to mitigate the effects of any production downturn, focusing on reducing costs, maximizing its cash return on invested capital, reducing debt balances and matching capital expenditures with operating cash flow.

The Company's growth in Europe and with foreign transplant operations in the U.S. has reduced the Company's reliance on Ford and DaimlerChrysler. As a result, revenues from Ford and DaimlerChrysler decreased from 37 percent and 31 percent in 2000, respectively, to 35 percent and 25 percent in 2001, respectively. The Company expects this trend to continue as a result of its anticipated organic growth outside the U.S. and from recent awards to supply foreign transplant operations in the U.S.

RECENT TRANSACTIONS

During the last two years, the Company extended the geographic scope of its manufacturing base through both acquisitions and joint ventures. In November 2000, the Company acquired Presskam for approximately \$10 million. Located near Bratislava, Slovakia, Presskam manufactures upper body

structural assemblies for Volkswagen, Porsche and Skoda. The Company also acquired a 30.8 percent interest in Yorozu, a supplier of suspension modules and

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

structural parts to the Asian and North American automotive markets. The total purchase price of approximately \$68 million is payable over a three-year period beginning in September 2000. The remaining obligation of \$29.5 million as of December 31, 2001, is recorded as indebtedness on the Company's balance sheet.

In July 2000, the Company acquired for approximately \$42 million, the remaining 60 percent interest in Caterina, a supplier of structural stampings and assemblies to the Brazilian automotive market, including Volkswagen and Mercedes-Benz. In May 2000, the Company paid approximately \$33 million to acquire Algooods, a Canadian manufacturer of aluminum heat shields and impact discs for the North American automotive industry. The acquisition represented a significant investment in processing technology for lightweight materials to complement the Company's existing heat shield capabilities and provides opportunities for application in other lightweight vehicle structural products. Finally, in January 2000, the Company acquired German-based Dr. Meleghy for approximately \$86 million, plus an earnout payment of \$29.6 million. Dr. Meleghy designs and produces structural stampings, assemblies, exposed surface panels and modules for the European automotive industry. Dr. Meleghy operates three facilities in Germany and one facility in both Hungary and Poland. Its main customers include DaimlerChrysler, Audi, Volkswagen, Ford, Opel, and BMW.

In addition to the purchase of Algooods, the Company invested in two joint ventures to further improve its technology and manufacturing process capabilities. In January 2001, the Company invested approximately \$2 million in a joint venture with Carron Industries, located in Inkster, Michigan, to provide the Company with detail stamping and tooling capabilities, as well as full frame prototyping. In March 2000, the Company invested \$2.1 million in the formation of a product technology and development joint venture with Defiance Testing & Engineering Services, Inc., a subsidiary of GenTek. This entity provides the Company with product testing services and allows the Company to have access to a broader and more cost efficient range of testing capabilities.

COMPARISON OF THE YEAR ENDED DECEMBER 31, 2001 TO THE YEAR ENDED DECEMBER 31, 2000

Revenues. Revenues for the year ended December 31, 2001 were \$2,467.4 million, a 2.5 percent decrease, compared to \$2,532.0 million for the year ended December 31, 2000. The decrease was comprised of U.S. and Canada volume declines of \$263.0 million, primarily in the following platforms: Dodge Dakota, Durango and Ram pickup; Chrysler LH; Ford Econoline, Focus, Explorer, Expedition, Taurus and Ranger; and Lincoln LS/Jaguar S-Type. Other declines in revenues of \$126.0 million were attributable to a decline in GM light truck program sales and the sale of the heavy truck business in December 2000. These declines were offset by \$324.4 million in incremental revenues associated with the acquisitions of Algooods (May 2000), Caterina (July 2000), Presskam (November 2000) and Seojin (November 2000) and the consolidation of Tower Golden Ring (July 2001).

Cost of Sales. Cost of sales as a percent of revenues for the year ended December 31, 2001 was 88.8 percent compared to 85.3 percent for the year ended December 31, 2000. The decline in the gross profit margin was primarily due to decreased production volumes and product mix changes on light truck, sport utility and other models served by the Company in North America and increasing sales with lower margins in Europe, Asia and South America. Increased costs associated with the launch of the Ford Explorer, Dodge Ram Truck and Cadillac CTS programs also contributed to the decline in 2001 gross margins as compared to 2000. The Company experienced an unusually high number of launches in 2001. The costs incurred with respect to these launches exceeded planned costs due to both a greater than expected number of engineering changes from the Company's customers as well as unanticipated launch inefficiencies.

S, G & A Expenses. Selling, general and administrative expenses increased to \$139.2 million, or 5.6 percent of revenues, for the year ended December 31,

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

2001 compared to \$137.0 million, or 5.4 percent of revenues, for the year ended December 31, 2000. This increase was due primarily to incremental costs of \$12.4 million associated with the Company's acquisition of Algoods, Caterina, Presskam, and Seojin and

21

the consolidation of Tower Golden Ring, offset by \$10.2 million in decreased costs due mainly to reductions in headcount in the consolidation of the Company's engineering and support activities.

Amortization Expense. Amortization expense for the year ended December 31, 2001 was \$24.8 million compared to \$21.5 million for the year ended December 31, 2000. The increase was due to incremental goodwill amortization related to the acquisitions of Algoods, Caterina, Presskam and Seojin.

Interest Expense, net. Interest expense (net of interest income) for the year ended December 31, 2001 was \$73.8 million compared to \$64.7 million for the year ended December 31, 2000. Interest expense increased due to the (i) full year effect in 2001 of increased borrowings to fund the Company's acquisitions of Algoods, Caterina, Presskam and Seojin and additional equity investment in Yorozu totaling \$23.5 million, offset by (ii) decreased interest rates and decreased spreads associated with the new credit agreement of \$12.7 million, and (iii) increased capitalized interest on construction projects of \$1.7 million.

Income Taxes. The effective income tax rate is not comparable between the years as a result of the loss in 2001 compared to income in 2000. The entire amount of the loss in 2001 did not receive tax benefit due to amortization and write-off of nondeductible goodwill, and the provision of a valuation allowance for a capital loss carryforward.

Equity in Earnings of Joint Ventures. Equity in earnings of joint ventures net of tax, was \$17.2 million and \$22.5 million for the years ended December 31, 2001 and 2000, respectively. These amounts represent the Company's share of the earnings from its joint venture interests in Metalsa, Tower Golden Ring, Yorozu, and DTA Development, in the 2001 period and Metalsa, Caterina, Tower Golden Ring, and Seojin in the 2000 period. The decrease in 2001 was due primarily to the consolidation of Tower Golden Ring beginning in the third quarter of 2001.

Minority Interest. Minority interest for the years ended December 31, 2001 represents dividends, net of income tax benefits, on the 6 3/4% Trust Preferred Securities ("Preferred Securities") and the minority interest held by the 40 percent joint venture partners in Tower Golden Ring. Minority interest for the year ended December 31, 2000 represents dividends, net of income tax benefits on the Preferred Securities. The increase in minority interest expense in 2001 was due primarily to the consolidation of Tower Golden Ring in the third quarter of 2001.

COMPARISON OF THE YEAR ENDED DECEMBER 31, 2000 TO THE YEAR ENDED DECEMBER 31, 1999

Revenues. Revenues for the year ended December 31, 2000 were \$2,532.0 million, a 16.7 percent increase, compared to \$2,170.0 million for the year ended December 31, 1999. The increase was primarily due to \$506.0 million related to the acquisitions of Active in July 1999, Dr. Meleghy effective January 2000, Algoods in May 2000, Caterina in July 2000, Seojin in November 2000, and Presskam in November 2000. These increases were offset by declines in GM truck programs of \$114.0 million and heavy truck rail manufacturing sales of \$56.6 million as a result of the sharp decline in automotive production in the second half of 2000. Overall net increases on all other platforms, including the Ford Focus, Taurus, Explorer, Expedition, Excursion, and Lincoln LS/Jaguar

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

S-Type, Nissan Xterra and Dodge Dakota, of \$26.6 million composed the balance of the revenue change.

Cost of Sales. Cost of sales as a percent of revenues for the year ended December 31, 2000 was 85.3 percent compared to 84.0 percent for the year ended December 31, 1999. Despite the incremental sales growth year over year, which occurred predominantly in the first half of 2000, the Company experienced a decline in gross profit margin due primarily to the combined effects of volume declines in the GM truck sales and heavy truck rail sales, the DaimlerChrysler plant shutdowns, production slowdowns at Ford due to the Firestone tire recall and increasing lower margin foreign sales in 2000 as compared to 1999. The beginning of the launch of the new Ford Explorer program, which was delayed beyond the original start date, also adversely impacted gross profit margin.

S, G & A Expenses. Selling, general and administrative expenses increased to \$137.0 million, or 5.4 percent of revenues, for the year ended December 31, 2000 compared to \$106.0 million, or 4.9 percent of revenues, for the year ended December 31, 1999. The increased expense was due to incremental costs

22

associated with the Company's acquisitions of Active, Dr. Meleghy, Algoods, Caterina, Seojin and Presskam of \$20.5 million and increased engineering, program development, and launch costs related to new business of approximately \$8.6 million. The realization of gains on the cash settlement of amounts due under the interest rate swap and lock agreements during 1999, had the effect of reducing the 1999 expense by \$1.9 million.

Amortization Expense. Amortization expense for the year ended December 31, 2000 was \$21.5 million compared to \$15.8 million for the year ended December 31, 1999. The increase was due to the incremental goodwill amortization related to the acquisitions of Active in 1999 and Dr. Meleghy, Algoods, Caterina, and Presskam in 2000.

Interest Expense, net. Interest expense (net of interest income) for the year ended December 31, 2000 was \$64.7 million compared to \$38.0 million for the year ended December 31, 1999. Interest expense increased due to (i) increased borrowings incurred to fund the Company's acquisitions of Active, Dr. Meleghy, Algoods, Caterina and Presskam of \$23.0 million, (ii) increased borrowings to fund the Company's joint venture interest in Yorozu of \$0.6 million, (iii) increased interest rates and spreads associated with the new credit agreement of \$8.7 million, and (iv) the issuance of the senior Euro notes of \$5.3 million. These increases were offset by increased interest income from the convertible notes in J.L. French and Seojin of \$4.9 million and increased capitalized interest on construction projects of \$6.0 million.

Income Taxes. The effective income tax rate was 37.2 percent for the year ended December 31, 2000 and 40 percent for the year ended December 31, 1999. The decrease in the effective rates in 2000 is due primarily as a result of increased income in lower tax jurisdictions.

Equity in Earnings of Joint Ventures. Equity in earnings of joint ventures net of tax was \$22.5 million and \$15.3 million for the years ended December 31, 2000 and 1999, respectively. These amounts represent the Company's share of the earnings from its joint venture interests in Metalsa, Caterina, Tower Golden Ring and Seojin. The increase in 2000 was due primarily to the full year impact of earnings related to the Seojin joint venture.

Minority Interest. Minority interest for the years ended December 31, 2000 and 1999 represents dividends, net of income tax benefits, on the Preferred Securities.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

RESTRUCTURING AND ASSET IMPAIRMENT CHARGE

The Company's growth through acquisitions coincided with an extended period of high automotive production that resulted in higher levels of utilization of the Company's acquired resources and capacity and contributed to periods of strong operating results. More recently, as automotive production has declined from previous levels, the Company has focused its efforts on reducing the capacity of the enterprise and improving the efficiency of its continuing operations. During the 18 month period beginning in the fourth quarter of 2000, the Company: (i) divested itself of its non-core heavy truck business, (ii) consolidated its manufacturing operations by closing manufacturing locations in Kalamazoo, Michigan; Sebawaing, Michigan; and certain operations in Milwaukee, Wisconsin, (iii) reduced redundant overhead through a consolidation of its technical activities and a reduction of other salaried colleagues, and (iv) reorganized the management of its U.S. and Canada region. These were accomplished through two restructurings, described in more detail below. The first restructuring was initiated in October 2000 (the "2000 Plan"), while the second restructuring was initiated in October 2001 (the "2001 Plan").

23

The restructuring and asset impairment charges consist of both restructuring charges and non-restructuring related asset impairments, major components of which are discussed in the sections below. The following table summarizes the principal components of these charges for each of the last two years (in millions):

	2001 PLAN	2000 PLAN
	-----	-----
RESTRUCTURING AND RELATED ASSET IMPAIRMENTS		
Asset impairments.....	\$127.4	\$103.7
Severance and outplacement costs.....	24.6	25.2
Loss contracts.....	--	8.1
Other exit costs.....	26.1	4.3
	-----	-----
Total.....	178.1	141.3
OTHER GOODWILL AND ASSET IMPAIRMENTS		
Goodwill write down.....	108.6	--
Other asset impairments.....	50.7	--
Investment impairment.....	46.3	--
	-----	-----
Total.....	205.6	--
	-----	-----
Total restructuring and asset impairment charges.....	\$383.7	\$141.3
	=====	=====
Non-cash charges.....	\$333.0	\$103.7
	-----	-----
Cash charges.....	\$ 50.7	\$ 37.6
	-----	-----

Under the 2000 Plan, the Company realized cash savings of approximately \$32 million in 2001 as a result of reductions in payroll costs directly related to restructuring activities. These cash savings from permanent payroll reductions are expected to be realized annually. Further, under the 2001 Plan, the Company is expected to realize an additional annual cash savings of approximately \$35 million attributable to permanent payroll reductions that will begin in 2002.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

SEBEWAING AND MILWAUKEE PRESS OPERATIONS (2001 PLAN):

In October 2001, the Company's board of directors approved a restructuring of the enterprise that included the closing of the Sebewaing, Michigan facility. In addition, in December 2001, the Company's board of directors approved a restructuring plan that relates to the consolidation of technical activities and a reduction of other salaried colleagues in conjunction with a reorganization of the Company's U.S. and Canada operations and the relocation of some component manufacturing from the Company's Milwaukee Press Operations to other Tower locations. As a result of the 2001 Plan, the Company recorded a restructuring charge in the fourth quarter of 2001 of \$178.1 million, which reflects the estimated qualifying "exit costs" to be incurred over the next 12 months pertaining to the 2001 Plan.

The 2001 Plan charge includes costs associated with asset impairments, severance and outplacement costs related to colleague terminations and certain other exit costs. These activities are anticipated to result in a reduction of more than 700 colleagues in the Company's technical and administrative centers in Novi, Rochester Hills, and Grand Rapids, Michigan; Milwaukee, Wisconsin; and its U.S. and Canada manufacturing locations. Through December 31, 2001, the Company had eliminated approximately 270 colleagues pursuant to the 2001 Plan. The estimated restructuring charge does not cover certain aspects of the 2001 Plan, including movement of equipment and colleague relocation and training. These costs will be recognized in future periods as incurred.

The asset impairments consist of long-lived assets, including fixed assets, buildings and manufacturing equipment from the facilities the Company intends to dispose of or discontinue, and goodwill. The carrying value of the long-lived assets written off was \$127.4 million as of December 31, 2001. For assets that will be disposed of currently, the Company measured impairment based on estimated proceeds on the sale of

24

the facilities and equipment. These asset impairments have arisen only as a consequence of the Company making the decision to exit these activities during the fourth quarter of 2001.

Based on the current plan, the Company anticipates this charge recorded under the 2001 Plan will require cash payments of \$34.9 million combined with the write-off of assets having a book value of \$127.4 million and other future obligations of \$15.8 million. The asset write-offs include \$87.5 million of goodwill associated with Sebewaing and Milwaukee Press Operations, \$20.6 million of property, plant and equipment associated with the Sebewaing operations and \$12.1 million of property, plant and equipment associated with the Milwaukee Press Operations business that will be discontinued. Additionally, there was \$7.2 million of property and building write downs associated with the decision to consolidate the Company's technical centers.

The accrual for the 2001 Plan is included in accrued liabilities in the accompanying consolidated balance sheet as of December 31, 2001. The table below summarizes the accrued operational realignment and other charges through December 31, 2001 (in millions):

ASSET IMPAIRMENTS	SEVERANCE AND OUTPLACEMENT COSTS	OTHER EXIT COSTS	TOTAL
-----	-----	-----	-----

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Provision.....	\$ 127.4	\$24.6	\$26.1	\$ 178.1
Reclassification from 2000 Plan.....	--	--	5.9	5.9
Cash payments.....	--	(0.7)	(0.6)	(1.3)
Non cash charges.....	(127.4)	--	--	(127.4)
	-----	-----	-----	-----
Balance at December 31, 2001.....	\$ --	\$23.9	\$31.4	\$ 55.3
	=====	=====	=====	=====

On January 31, 2002, the Company announced that it will be discontinuing the remaining stamping and ancillary processes currently performed at the Company's Milwaukee Press Operations and relocating the remaining work to other Tower locations or Tier II suppliers. The Company expects to complete the transfer process during the second quarter of 2002. As a result of these efforts, the Company expects to record a restructuring charge in the first quarter of 2002 totaling approximately \$75 million comprised of expected cash payments of \$15 million, asset impairment charges of \$47 million and other future obligations of \$13 million.

HEAVY TRUCK AND KALAMAZOO STAMPING OPERATIONS (2000 PLAN):

In October 2000, the Company's board of directors approved the 2000 Plan, which was intended to improve the Company's long-term competitive position and lower its cost structure. The 2000 Plan included phasing out the heavy truck rail manufacturing in Milwaukee, Wisconsin; reducing stamping capacity by closing the Kalamazoo, Michigan facility; and consolidating related support activities across the enterprise. The Company recognized a charge to operations of approximately \$141.3 million in the fourth quarter of 2000, which reflected the estimated qualifying "exit costs" to be incurred over the next 12 months under the 2000 Plan.

The 2000 Plan charge included costs associated with asset impairments, severance and outplacement costs related to colleague terminations, loss contract provisions and certain other exit costs. These activities resulted in a reduction of approximately 850 colleagues.

The asset impairments consisted of long-lived assets, including fixed assets, manufacturing equipment and land, from the facilities the Company intends to dispose of or discontinue. For assets that were disposed of currently, the Company measured impairment based on estimated proceeds on the sale of the facilities and equipment. The carrying value of the long-lived assets held for sale on disposal is approximately \$3.8 million as of December 31, 2001. For assets that will be held and used in the future, the Company prepared a forecast of expected undiscounted cash flows to determine whether asset impairment existed, and used fair values to measure the required write-downs. These asset impairments

have arisen only as a consequence of the Company making the decision to exit these activities during the fourth quarter of 2000.

The accrual for the 2000 Plan has been fully utilized and revised as of December 31, 2001. The table below summarizes the accrued operational realignment and other charges through December 31, 2001 (in millions):

ASSET	SEVERANCE AND OUTPLACEMENT	LOSS	OTHER EXIT
-------	-------------------------------	------	---------------

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

	IMPAIRMENTS	COSTS	CONTRACTS	COSTS	TOTAL
	-----	-----	-----	-----	-----
Provision for operational realignment and other charges.....	\$ 103.7	\$ 25.2	\$ 8.1	\$ 4.3	\$ 141.3
Cash payments.....	--	(8.7)	(2.5)	(0.3)	(11.5)
Non cash charges.....	(103.7)	--	--	--	(103.7)
	-----	-----	-----	-----	-----
Balance at December 31, 2000.....	--	16.5	5.6	4.0	26.1
Cash payments.....	--	(13.6)	(4.2)	(2.4)	(20.2)
Revision of estimate.....	--	(2.9)	(1.4)	(1.6)	(5.9)
	-----	-----	-----	-----	-----
Balance at December 31, 2001.....	\$ --	\$ --	\$ --	\$ --	\$ --
	=====	=====	=====	=====	=====

The following table summarizes the major components of the asset impairment charge for the 2000 Plan (in millions):

	CARRYING AMOUNT

Milwaukee Heavy Truck Rail Manufacturing.....	\$ 47.3
Milwaukee Press Operations Machinery & Equipment.....	7.9
Milwaukee Shared Services Land & Equipment.....	19.8
Milwaukee Prototype & Technical Center Building, Machinery & Equipment.....	14.0
Kalamazoo Stamping Operations Land, Building & Equipment....	5.7
Granite City Stamping Operations Machinery & Equipment.....	4.6
Related Stamping & Assembly Machinery & Equipment.....	4.4

Total.....	\$103.7
	=====

The triggering event for each major component's asset impairment charge was the decision to exit the activities, which was made by the Company's board of directors on October 2, 2000.

NON-RESTRUCTURING ASSET IMPAIRMENTS:

The other goodwill and asset impairment charges recorded in 2001 are a result of the Company's review of the carrying amount of certain of its goodwill, fixed assets and certain investments, in light of its current operating environment, worldwide economic conditions and trends in the Company's industry. Based upon a review of anticipated cash flows, the Company determined that goodwill assigned to two of its plants was impaired and was written down. In addition, the Company identified assets which no longer had sufficient cash flows to support their carrying amounts and were written down to fair value, including its investment in J.L. French. At December 31, 2001, the Company had approximately \$567 million of unamortized goodwill. Later in 2002, the Company will perform a review of its goodwill to determine the extent to which any further impairment charges are necessary under the new accounting requirements of SFAS 142. See -- "Critical Accounting Policies" and "Recently Issued Accounting Policies."

	\$ 178.1	\$256.7
	=====	=====

(2) The Company leases certain equipment utilized in its operations under operating lease agreements. If certain equipment had been purchased instead of leased, capital expenditures would have been \$265.7 million and \$181.8 million in 2001 and 2000, respectively.

27

SOURCES OF CASH

The Company's principal sources of cash are cash flow from operations, commercial borrowings and capital markets activities. During the year ended December 31, 2001, the Company generated \$513.8 million of cash from operations. This compares with \$92.6 million generated during the same period in 2000. Net income before depreciation and amortization, deferred income taxes, extraordinary loss, equity in joint venture earnings, and restructuring and asset impairment charges was \$178.1 million and \$256.7 million for 2001 and 2000, respectively. Operating cash flow was reduced by \$21.5 million in 2001 and \$11.5 million in 2000 for cash restructuring payments, and was increased by net tax refunds of \$12.9 million in 2001 and decreased as a result of net tax payments of \$18.8 million in 2000. In total, working capital and other operating items increased operating cash flow by \$335.7 million during 2001 and decreased operating cash flow by \$164.1 million during 2000.

In August 2001, the Company realized net proceeds of \$37.5 million from the issuance of 3,636,400 shares of common stock at a price of \$11.00 per share in a private placement transaction. The issuance of stock from the Company's colleague stock purchase plan and option plan contributed an additional \$1.5 million and \$6.8 million to cash flow for 2001 and 2000, respectively.

In June 2001, the Company entered into a financing agreement whereby its domestic operating units sell eligible customer receivables on an ongoing basis to a newly formed, fully consolidated, financing subsidiary. The financing subsidiary subsequently sells its interest in the receivables to a third party funding agent in exchange for cash and a subordinated interest in the unfunded receivables transferred. The Company acts as an administrative agent in the management and collection of accounts receivable sold. Through December 31, 2001, the Company realized net cash proceeds of \$15.2 million from the sale of receivables.

In July 2000, the Company replaced its previous \$750 million amortizing credit agreement with a new six-year \$1.15 billion senior unsecured credit agreement. The new credit agreement includes an \$825 million non-amortizing revolving facility and a \$325 million amortizing term loan. The credit agreement also includes a multi-currency borrowing feature that allows the Company to borrow up to \$500 million in certain freely-tradable offshore currencies and letter of credit sublimits of \$100 million. As of December 31, 2001, \$20.0 million of the outstanding borrowings are denominated in Japanese yen, \$55.6 million are denominated in Euros and \$15.7 million are denominated in Canadian dollars. Interest on borrowings under the credit agreement is at the financial institutions' reference rate, LIBOR, or the Eurodollar rate plus a margin ranging from 0 to 200 basis points depending on the ratio of the consolidated funded debt for restricted subsidiaries of the Company to its total earnings before interest, taxes, depreciation and amortization (EBITDA as defined in the credit agreement). The weighted average interest rate for such borrowings was

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

7.0 percent for year ended December 31, 2001. The credit agreement has a final maturity of 2006. As a result of the debt replacement, the Company recorded an extraordinary loss, net of tax, of \$3.0 million during the third quarter of 2000.

At December 31, 2001, the Company had borrowed approximately \$101 million under its revolving credit facility of \$825 million. In order to borrow under the revolving facility, the Company must meet certain covenant ratios. Based on these covenants, the amount of unused availability under the revolving facility was approximately \$103 million at December 31, 2001, compared to unused availability of approximately \$326 million at December 31, 2000. This reduction in availability resulted from a decrease in trailing four quarter EBITDA, offset in part by an increase in availability due to the reduction of indebtedness (as defined in the credit agreement) between the periods. The credit agreement requires the Company to meet certain financial tests, including but not limited to a minimum interest coverage and maximum leverage ratio. The covenant conditions contained in the credit agreement also limit the Company's ability to pay dividends to the available borrowings under the revolving facility. As of December 31, 2001, the Company was in compliance with all debt covenants.

In September 2000, the Company entered into an interest rate swap contract to hedge against interest rate exposure on approximately \$160 million of its floating rate indebtedness under the credit agreement. The contracts have the effect of converting the floating rate interest to a fixed rate of approximately

28

6.9 percent, plus any applicable margin required under the revolving credit facility. The interest rate swap contract was executed to balance the Company's fixed-rate and floating-rate debt portfolios and it expires in September 2005.

In July 2000, R. J. Tower Corporation, a wholly owned subsidiary of the Company, issued Euro-denominated senior unsecured notes in the amount of E150 million (\$133.6 million at December 31, 2001). The notes bear interest at a rate of 9.25 percent, payable semi-annually. The notes rank equally with all of the Company's other unsecured and unsubordinated debt. The net proceeds after issuance costs were used to repay a portion of the Company's existing Euro-denominated indebtedness under its credit facility. The notes mature on August 1, 2010.

USES OF CASH

The Company's principal uses of cash are debt repayment, capital expenditures and acquisitions and investments in joint ventures. Net cash used in investing activities was \$199.4 million during the year ended December 31, 2001, as compared to \$266.8 million in the prior period. Net capital expenditures totaled \$194.0 million and \$93.6 million for the comparable 2001 and 2000 periods, respectively. Net cash used in financing activities totaled \$296.0 million for the year ended December 31, 2001, compared with net cash provided by financing activities of \$173.9 million in the prior period. Net repayments of debt were \$335.0 million in 2001, with net proceeds from borrowings of \$207.3 million in 2000.

Capital expenditures were \$194.0 million and \$93.6 million in 2001 and 2000, respectively. The Company leases certain equipment utilized in its operations under operating lease agreements. If certain equipment had been purchased instead of leased, capital expenditures would have been \$265.7 million and \$181.8 million in 2001 and 2000, respectively. The equipment leased during 2001 and 2000 was primarily associated with new customer programs such as the Dodge Ram and Cadillac CTS programs that launched during 2001. The Company intends to continue to utilize operating lease financing on occasion when the

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

effective interest rate equals or is lower than the Company's cost of capital and the lease terms match the expected life of the respective program. Annual operating lease payments under the Company's lease agreements range from \$54 million to \$48 million over the next five years. Operating lease expense is included in cost of sales in the Company's statements of operations.

Capital expenditures in 2001 also included investment in other new programs, additional capabilities in Europe, and maintenance, safety and productivity improvements. The Company estimates its 2002 capital expenditures will be approximately \$155 million. Where appropriate, the Company may lease rather than purchase such equipment, which would have the effect of reducing this anticipated level of capital expenditures.

Acquisitions and investments in joint ventures were approximately \$5.4 million and \$228.5 million for the 2001 and 2000 periods, respectively, offset by proceeds from the sale of its heavy truck business of \$55.4 million during 2000. During 2000, the Company used cash of \$40.2 million to repurchase common stock.

WORKING CAPITAL

During the year ended December 31, 2001, working capital decreased by approximately \$458.5 million. During that year, the Company focused specifically on working capital improvement in executing its objectives of reducing indebtedness by maximizing free cash flow. In addition to the items listed above, several key initiatives were utilized, the results of which contributed to the working capital decrease during the year and resulted in the significant improvement in cash generated from operations. Approximately \$120.5 million of the decrease in working capital was comprised of an increase in accounts payable by renegotiating terms with key suppliers to terms that are more reflective of industry norms. A decrease of accounts receivable of approximately \$74.5 million resulted primarily from the Company's participation in specific receivable programs with key customers. These programs allow for accelerated collection of receivables from key customers, subject to interest charges ranging from 7.25 percent to 8.5 percent at an annualized rate. Working capital also decreased as a result of the collection of tooling receivables and the receipt of proceeds from certain operating lease arrangements that were finalized in 2001 but pertained to dedicated capital costs incurred in 2000 in anticipation of the completion of those leases. The Company also emphasized the maintenance of low inventory levels.

29

The Company expects to continue to maintain a low working capital position through a continuation of the efforts discussed above and continued focus on minimizing the length of the cash flow cycle. The Company believes that the available borrowing capacity under its credit agreement, together with funds generated by operations, should provide sufficient liquidity and capital resources to pursue its business strategy for the foreseeable future, with respect to working capital, capital expenditures, and other operating needs.

CONTRACTUAL OBLIGATIONS AND COMMERCIAL COMMITMENTS

The Company's contractual obligations and commercial commitments as of December 31, 2001 are as follows:

PAYMENTS DUE BY PERIOD

LESS THAN

AFTER

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

CONTRACTUAL OBLIGATIONS	TOTAL	1 YEAR	1 - 3 YEARS	4 - 5 YEARS	5 YEARS
Long-term debt.....	\$ 770,444	\$169,360	\$174,842	\$232,331	\$193,911
Convertible Subordinated Notes*.....	199,984	--	199,984	--	--
Capital lease obligations.....	7,343	3,227	4,116	--	--
Operating leases.....	383,244	54,177	106,853	100,787	121,427
Balance at December 31, 2001.....	\$1,361,015	\$226,764	\$485,795	\$333,118	\$315,380

* The Convertible Subordinated Notes are due on August 1, 2004 and are convertible into common stock of the Company at a conversion price of \$25.88 per share; therefore, they have been included as part of the contractual obligations in the 1 - 3 year period above.

At December 31, 2001, the Company's commercial commitments included \$100 million of standby letters of credit which are available under the terms of the Company's \$1.15 billion senior unsecured credit agreement.

LOSS CONTRACTS, FACILITY SHUTDOWN AND PAYROLL RELATED COSTS

The Company is committed under existing certain agreements, assumed in connection with prior acquisitions, to supply product to its customers at selling prices that are not sufficient to cover the direct costs to produce those parts. The Company is obligated to supply these products for the life of the related vehicles, which is typically three to ten years. Accordingly, the Company recognizes losses at the time these losses are probable and reasonably estimable at an amount equal to the minimum amount necessary to fulfill its obligations to its customers. The reserves established in connection with these recognized losses are reversed as the product is shipped to the customers.

The Company's acquisitions have been accounted for using the purchase method of accounting and, accordingly, the assets acquired and liabilities assumed have been recorded at fair value as of the dates of the acquisitions. The excess of the purchase price over the fair value of the assets acquired and liabilities assumed has been recorded as goodwill. Results of operations for these acquisitions have been included in the accompanying consolidated financial statements since the dates of acquisition.

In conjunction with its acquisitions, reserves have been established for certain costs associated with facility shutdown and consolidation activities, for general and payroll related costs primarily for planned colleague termination activities, and for provisions for acquired loss contracts. A rollforward of these reserves is as follows (in millions):

	FACILITY SHUTDOWN COSTS	PAYROLL RELATED COSTS	LOSS CONTRACTS
December 31, 1999.....	\$13.8	\$ 6.4	\$ 24.8
Additions.....	1.0	--	12.3
Utilizations.....	(7.5)	(2.6)	(8.4)
December 31, 2000.....	7.3	3.8	28.7

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Additions.....	--	--	--
Utilization.....	(2.1)	(2.7)	(11.7)
	-----	-----	-----
December 31, 2001.....	\$ 5.2	\$ 1.1	\$ 17.0
	=====	=====	=====

30

The timing of facility shutdown and consolidation activities were adjusted to reflect customer concerns with supply interruption. As of December 31, 2001, the facilities have been shutdown, but the Company continues to incur costs related to maintenance, taxes and other costs related to buildings that are held for sale. These reserves have been utilized as originally intended and management believes the liabilities recorded for shutdown and consolidation activities are adequate but not excessive as of December 31, 2001.

EFFECTS OF INFLATION

Inflation generally affects the Company by increasing the interest expense of floating-rate indebtedness and by increasing the cost of labor, equipment and raw materials. Management believes that inflation has not significantly affected the Company's business over the past 12 months. However, because selling prices generally cannot be increased until a model changeover, the effects of inflation must be offset by productivity improvements and volume from new business awards.

MARKET RISK

The Company is exposed to various market risks, including changes in foreign currency exchange rates and interest rates. Market risk is the potential loss arising from adverse changes in market rates and prices, such as foreign currency exchange and interest rates. The Company's policy is to not enter into derivatives or other financial instruments for trading or speculative purposes. The Company periodically enters into financial instruments to manage and reduce the impact of changes in interest rates.

Interest rate swaps are entered into as a hedge of underlying debt instruments to effectively change the characteristics of the interest rate without actually changing the debt instrument. Therefore, these interest rate swap agreements convert outstanding floating rate debt to fixed rate debt for a period of time. For fixed rate debt, interest rate changes affect the fair market value but do not impact earnings or cash flows. Conversely for floating rate debt, interest rate changes generally do not affect the fair market value but do impact future earnings and cash flows, assuming other factors are held constant.

At December 31, 2001, Tower Automotive had total debt and obligations under capital leases of \$977.8 million. The debt is comprised of fixed rate debt of \$493.6 million and floating rate debt of \$484.2 million. The pre-tax earnings and cash flows impact for the next year resulting from a one percentage point increase in interest rates on variable rate debt would be approximately \$4.8 million, holding other variables constant. A one percentage point increase in interest rates would not materially impact the fair value of the fixed rate debt.

A portion of Tower Automotive's revenues were derived from manufacturing operations in Europe, Asia and South America. The results of operations and financial position of the Company's foreign operations are principally measured in its respective currency and translated into U.S. dollars. The effects of foreign currency fluctuations in Europe, Asia and South America are somewhat mitigated by the fact that expenses are generally incurred in the same currency

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

in which revenues are generated. The reported income of these subsidiaries will be higher or lower depending on a weakening or strengthening of the U.S. dollar against the respective foreign currency.

A portion of Tower Automotive's assets are based in its foreign operations and are translated into U.S. dollars at foreign currency exchange rates in effect as of the end of each period, with the effect of such translation reflected as a separate component of stockholders' investment. Accordingly, the Company's consolidated stockholders' investment will fluctuate depending upon the weakening or strengthening of the U.S. dollar against the respective foreign currency.

The Company's strategy for management of currency risk relies primarily upon conducting its operations in a country's respective currency and may, from time to time, engage in hedging programs intended to reduce the Company's exposure to currency fluctuations. As of December 31, 2001, the Company held no foreign currency hedge positions. Management believes the effect of a one percent appreciation or depreciation in foreign currency rates would not materially affect the Company's financial position or results of operations for the periods presented.

31

CRITICAL ACCOUNTING POLICIES

The Company believes the following represent its critical accounting policies:

Goodwill and Impairment of Long-Lived Assets -- The Company performs impairment analyses of its recorded goodwill and long-lived assets whenever events and circumstances indicate that they may be impaired. When the undiscounted cash flows, without interest or tax charges, are less than the carrying value of the assets being reviewed for impairment, the assets are written down to fair market value. During 2001, the Company recorded goodwill and long-lived asset impairment writedown provisions of \$333.0 million, which largely resulted from the downturn in the automotive market and the resulting restructuring of the Company's operations. Future events could cause the Company to conclude that additional impairment indicators exist and that goodwill associated with its acquired business is further impaired. Any resulting impairment loss could have a material adverse impact on the financial condition and results of operations of the Company.

In 2002, Statement of Financial Accounting Standards No. 142, "Goodwill and Other Intangible Assets" (SFAS 142) became effective and as a result, the Company will cease to amortize approximately \$567 million of goodwill. The Company had recorded approximately \$21 million of amortization on these amounts during 2001 and would have recorded approximately \$16 million of amortization during 2002 after recording 2001 goodwill writedowns of approximately \$196 million. In lieu of amortization, the Company is required to perform an initial impairment review of its goodwill in 2002 and an annual impairment review thereafter. The initial review is expected to be completed during the second quarter of 2002. There can be no assurance that at the time the review is completed a material impairment charge will not be recorded.

Other Loss Reserves -- The Company has other loss reserves such as purchase accounting reserves, restructuring reserves, and loss contract reserves that require the use of estimates and judgment with regard to risk exposure and ultimate liability. Reserves for loss contracts are estimated by determining which parts are being sold pursuant to loss contracts and determining an estimate of the per-part negative margin. Additionally, the Company must estimate the volumes that are committed to sell over the life of the related

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

production cycle. Other losses are estimated using consistent and appropriate methods; however, changes to the assumptions could materially affect the recorded liabilities for loss.

Customer Tooling and Other Design Costs -- As indicated in Note 2 to the Consolidated Financial Statements, the Company incurs costs related to tooling. Based on the fact that the Company has the contractual right to use the tool over the life of the supply arrangement, these costs are capitalized and amortized over the life of the related product.

Pension and Other Post-Employment Benefits -- The determination of the obligation and expense for pension and other postretirement benefits is dependent on the selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions are described in Note 11 to the Consolidated Financial Statements and include, among others, the discount rate, expected long-term rate of return on plan assets and rates of increase in compensation and healthcare costs. In accordance with generally accepted accounting principles, actual results that differ from these assumptions are accumulated and amortized over future periods and therefore, generally affect the recognized expense and recorded obligation in such future periods. While the Company believes that the assumptions are appropriate, significant differences in the actual experience or significant changes in the assumptions may materially affect the pension and other postretirement obligations and the future expense.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

On June 29, 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (SFAS) 141, "Business Combinations," and SFAS 142, "Goodwill and Intangible Assets." Major provisions of these Statements are as follows: all business combinations initiated after June 30, 2001 must use the purchase method of accounting; the pooling of interest method of accounting is prohibited except for transactions initiated before July 1, 2001; intangible assets acquired in a business

32

combination must be recorded separately from goodwill if they arise from contractual or other legal rights or are separable from the acquired entity and can be sold, transferred, licensed, rented or exchanged, either individually or as part of a related contract, asset or liability; goodwill and intangible assets with indefinite lives are not amortized but tested for impairment annually, except in certain circumstances, and whenever there is an impairment indicator; all acquired goodwill must be assigned to reporting units for purposes of impairment testing; effective January 1, 2002, goodwill is no longer subject to amortization.

The Company will apply the new rules on accounting for goodwill and other intangible assets beginning in the first quarter of fiscal year 2002. As of December 31, 2001, the Company has unamortized goodwill of \$567.1 million that will be subject to the transition provisions of the Statements. The Company has not yet determined the impact of adopting these Statements on its earnings and financial position, including whether it will be required to recognize any transitional impairment losses as a cumulative effect of a change in accounting principle. Application of the nonamortization provisions of the Statements is expected to result in a reduction in goodwill amortization expense of approximately \$16 million in fiscal 2002, after reflecting the writedowns of goodwill totaling \$196.1 million, which were recorded during 2001.

In July 2001, the FASB issued SFAS No. 144, "Impairment or Disposal of Long-Lived Assets," which is effective for fiscal years beginning after December

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

15, 2001. The provisions of this Statement provide a single accounting model for impairment of long-lived assets. The adoption of SFAS No. 144 on January 1, 2002 is not expected to have a material impact on the Company's financial position or its results of operations.

RISK FACTORS

The Company is subject to the following risks relating to its operations and the nature of the industry in which it competes:

- THE LOSS OF FORD, DAIMLERCHRYSLER OR ANY OTHER SIGNIFICANT CUSTOMER COULD HAVE A MATERIAL ADVERSE EFFECT ON EXISTING AND FUTURE REVENUES AND NET INCOME (LOSS)

Revenues from Ford and DaimlerChrysler represented approximately 35 percent and 25 percent, respectively, of the Company's revenues in 2001. The contracts with many customers, including Ford and DaimlerChrysler, provide for supplying the customer's requirements for a particular model, rather than for manufacturing a specific quantity of products. These contracts range from one year to the life of the model, usually three to ten years, and do not require the purchase by the customer of any minimum number of parts. Therefore, the loss of any one of these customers or a significant reduction in demand for certain key models or a group of related models sold by any major customer could have a material adverse effect on the Company's existing and future revenues and net income (loss).

- GROSS MARGIN AND PROFITABILITY WILL BE ADVERSELY AFFECTED BY THE INABILITY TO REDUCE COSTS

There is substantial continuing pressure from the major OEMs to reduce costs, including the cost of products purchased from outside suppliers. In addition, the Company's profitability is dependent, in part, on its ability to spread fixed production costs over increasing product sales. If the Company is unable to generate sufficient production cost savings in the future to offset price reductions and any reduction in consumer demand for automobiles resulting in decreased sales, the Company's gross margin and profitability would be adversely affected.

- CYCLICALITY AND SEASONALITY IN THE AUTOMOTIVE MARKET COULD ADVERSELY AFFECT REVENUES AND NET INCOME (LOSS)

The automotive market is highly cyclical and is dependent on consumer spending. For example, during the third and fourth quarters of 2000, the automotive market began experiencing a decline in production levels. This decline continued throughout 2001. Economic factors adversely affecting automotive production and consumer spending could adversely impact the Company's revenues and net income. The automotive market is also somewhat seasonal. The Company typically experiences decreased

33

revenue and operating income during the third calendar quarter of each year due to the impact of scheduled OEM plant shutdowns in July and August for vacations and new model changeovers.

- THE COMPANY IS SUBJECT TO CERTAIN RISKS ASSOCIATED WITH FOREIGN OPERATIONS THAT COULD HARM REVENUES AND PROFITABILITY

The Company has significant international operations, specifically in Europe, Asia and South America. Certain risks are inherent in international operations, including:

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

- difficulty in enforcing agreements and collecting receivables through certain foreign legal systems;
- foreign customers may have longer payment cycles than customers in the United States;
- tax rates in certain foreign countries may exceed those in the United States, and foreign earnings may be subject to withholding requirements or the imposition of tariffs, exchange controls or other restrictions;
- general economic and political conditions in countries where the Company operates may have an adverse effect on operations in those countries;
- the Company may find it difficult to manage a large organization spread throughout various countries; and
- the Company may find it difficult to comply with foreign laws and regulations.

As the Company continues to expand its business globally, its success will depend, in part, on the ability to anticipate and effectively manage these and other risks. The occurrence of any of the foregoing risks could have a significant effect on the Company's international operations and, as a result, its revenues and profitability.

- CURRENCY EXCHANGE RATE FLUCTUATIONS COULD HAVE AN ADVERSE EFFECT ON REVENUES AND FINANCIAL RESULTS

The Company generates a significant portion of its revenues and incurs a significant portion of its expenses in currencies other than U.S. dollars. To the extent that the Company is unable to match revenues received in foreign currencies with costs paid in the same currency, exchange rate fluctuations in any such currency could have an adverse effect on revenues and financial results. For example, the weakening of European currencies in relation to the U.S. dollar had a negative impact on revenues in 2000 and 2001.

- THE COMPANY'S BUSINESS MAY BE DISRUPTED SIGNIFICANTLY BY WORK STOPPAGES AND OTHER LABOR MATTERS

Many OEMs and their suppliers have unionized work forces. Work stoppages or slow-downs experienced by OEMs or their suppliers could result in slow-downs or closures of assembly plants where the Company's products are included in assembled vehicles. For example, strikes by the United Auto Workers led to the shutdown of most of GM's North American assembly plants in June and July of 1998. The Company estimates that this work stoppage at GM's facilities had an unfavorable impact of approximately \$24.7 million on its 1998 revenues. In the event that one or more of its customers experiences a material work stoppage, such a work stoppage could have a material adverse effect on the Company's business.

In addition, approximately 5,300 of the Company's colleagues are unionized (representing approximately 41 percent of its colleagues as of December 31, 2001). The Company may encounter strikes, further unionization efforts or other types of conflicts with labor unions or the Company's colleagues, any of which could have an adverse effect on the Company's ability to produce structural components and assemblies or may limit its flexibility in dealing with its workforce.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

- OPERATING RESULTS MAY BE ADVERSELY AFFECTED BY THE IMPACT OF ENVIRONMENTAL AND SAFETY REGULATIONS

The Company is subject to foreign, federal, state and local laws and regulations governing the protection of the environment and occupational health and safety, including laws regulating the generation, storage, handling, use and transportation of hazardous materials; the emission and discharge of hazardous materials into the soil, ground or air; and the health and safety of its colleagues. The Company is also required to obtain permits from governmental authorities for certain operations. The Company cannot assure that it has been or will be at all times in complete compliance with such laws, regulations and permits. If it violates or fails to comply with these laws, regulations or permits, it could be fined or otherwise sanctioned by regulators. In some instances, such a fine or sanction could be material. The Company does not expect that its capital expenditures for environmental controls will be material for the current or succeeding fiscal year.

The Company is also subject to laws imposing liability for the cleanup of contaminated property. Under these laws, it could be held liable for costs and damages relating to contamination at its past or present facilities and at third party sites to which these facilities sent wastes containing hazardous substances. The amount of such liability could be material.

- THE INABILITY TO COMPETE EFFECTIVELY IN THE HIGHLY COMPETITIVE AUTOMOTIVE SUPPLY INDUSTRY COULD RESULT IN THE LOSS OF CUSTOMERS, WHICH COULD HAVE AN ADVERSE EFFECT ON THE COMPANY'S REVENUES AND OPERATING RESULTS

The automotive component supply industry is highly competitive. Some of the Company's competitors are companies, or divisions or subsidiaries of companies, that are larger than the Company and have greater financial and other resources. In addition, with respect to certain of the Company's products, it competes with divisions of its OEM customers. The Company's products may not be able to compete successfully with the products of these other companies, which could result in the loss of customers and, as a result, decreased revenues and profitability. In addition, the Company's competitive position in the automotive component supply industry could be adversely affected in the event that it is unsuccessful in making strategic acquisitions or establishing joint ventures that would enable it to expand globally.

The Company principally competes for new business both at the beginning of the development of new models and upon the redesign of existing models by its major customers. New model development generally begins two to five years prior to the marketing of such models to the public. The failure to obtain new business on new models or to retain or increase business on redesigned existing models could adversely affect the Company's business and financial results. In addition, as a result of the relatively long lead times required for many of its complex structural components, it may be difficult in the short-term for the Company to obtain new sales to replace any unexpected decline in the sale of existing products. The Company may incur significant expense in preparing to meet anticipated customer requirements which may not be recovered.

- ACTUAL PROGRAM VOLUMES AND PRICING MAY BE LESS THAN PLANNED

The Company incurs costs and makes capital expenditures for new program awards based upon certain estimates of production volumes for certain vehicles. While the Company attempts to establish the price of its products for variances in production volumes, if the actual production of certain vehicle models is significantly less than planned, the Company's revenues and net income may be adversely affected. The Company cannot predict its customers' demands for the products it supplies either in the aggregate or for particular reporting periods. For example, the Company cannot predict whether or to what extent the expected \$760 million in annual new program revenue, anticipated to be fully

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

realized by 2005, will actually result in firm orders from customers.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

All statements, other than statements of historical fact, included in this Form 10-K or incorporated by reference herein, are, or may be deemed to be, forward-looking statements within the meaning of

35

Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). When used in this Form 10-K, the words "anticipate," "believe," "estimate," "expect," "intends" and similar expressions, as they relate to the Company, are intended to identify forward-looking statements. Such forward-looking statements are based on the beliefs of the Company's management as well as on assumptions made by and information currently available to the Company at the time such statements were made. Various economic and competitive factors could cause actual results to differ materially from those discussed in such forward-looking statements, including factors which are outside the control of the Company, such as risks relating to: (i) the degree to which the Company is leveraged; (ii) the Company's reliance on major customers and selected models; (iii) the cyclical nature and seasonality of the automotive market; (iv) the failure to realize the benefits of recent acquisitions and joint ventures; (v) obtaining new business on new and redesigned models; (vi) the Company's ability to continue to implement its acquisition strategy; (vii) the highly competitive nature of the automotive supply industry; (viii) the ability to achieve the anticipated volume of production from new and planned supply programs; and (ix) such other factors noted in this Form 10-K with respect to the Company's businesses. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on behalf of the Company are expressly qualified in their entirety by such cautionary statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See "Market Risk" section of Item 7.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Management of the Company is responsible for the financial information and representations contained in the consolidated financial statements and other sections of the 2001 Annual Report. The consolidated financial statements have been prepared in conformity with generally accepted accounting principles and therefore include certain amounts based on management's best estimates and judgments. The financial information contained elsewhere in the 2001 Annual Report is consistent with that in the consolidated financial statements.

The Company maintains internal accounting control systems which management believes provide reasonable assurance that the Company's assets are properly safeguarded and accounted for, that the Company's books and records properly reflect all transactions, and that the Company's policies and procedures are implemented by qualified personnel. Reasonable assurance is based upon the recognition that the cost of an internal control system should not exceed the related benefits.

The Audit Committee of the Board of Directors meets with representatives of management and Arthur Andersen LLP, the Company's independent public accountants, on financial reporting matters and the evaluation of internal accounting controls. The independent public accountants have free access to meet with the Audit Committee, without the presence of management, to discuss any appropriate matters.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Arthur Andersen LLP is engaged to express an opinion as to whether the consolidated financial statements present fairly, in all material respects and in accordance with generally accepted accounting principles, the financial position, results of operations and cash flows of the Company. Solely for purposes of planning and performing their audit of the Company's 2001 financial statements, Arthur Andersen LLP obtained an understanding of, and selectively tested, certain aspects of the Company's system of internal controls.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

To Tower Automotive, Inc.:

We have audited the accompanying consolidated balance sheets of Tower Automotive, Inc. (a Delaware corporation) and Subsidiaries as of December 31, 2001 and 2000, and the related consolidated statements of operations, stockholders' investment and cash flows for each of the three years in the period ended December 31, 2001. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Tower Automotive, Inc. and Subsidiaries as of December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2001 in conformity with accounting principles generally accepted in the United States.

As explained in Note 2 to the financial statements, effective January 1, 2001, the Company adopted the new requirements of Statement of Financial

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities."

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND BASIS OF PRESENTATION:

Tower Automotive, Inc. and subsidiaries (the "Company") produces a broad range of assemblies and modules for vehicle frames, upper body structures and suspension systems for the global automotive industry. Including both wholly-owned subsidiaries and investments in joint ventures, the Company has facilities in the United States, Canada, Italy, Germany, Hungary, Poland, Brazil, India, Slovakia, Korea, Japan, China, and Mexico.

2. SIGNIFICANT ACCOUNTING POLICIES:

PRINCIPLES OF CONSOLIDATION:

The accompanying consolidated financial statements include the accounts of Tower Automotive, Inc., its wholly-owned subsidiaries, and its majority-owned

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

and majority-controlled investments. All material intercompany accounts and transactions have been eliminated in consolidation.

As part of the acquisition of Automotive Products Company in 1997, the Company acquired a 60 percent joint venture interest in Tower Golden Ring, which produces certain parts in China. The remaining 40 percent of the joint venture is owned by unrelated third parties. Prior to the third quarter of 2001, this investment was accounted for using the equity method since all significant business decisions required the approval of 80 percent of the joint venture partners. During the third quarter of 2001, the Company determined that its relationship with the other investors and the fact that representatives appointed by the Company hold key management positions within the joint venture allowed it to exercise significant control over significant business decisions. As a result, this joint venture was consolidated effective as of the third quarter of 2001. The Company's investments in Metalsa and Yorozu are accounted for using the equity method. The Company's minority-controlled investments (less than 20 percent ownership) are accounted for under the cost method.

CASH AND CASH EQUIVALENTS:

Cash and cash equivalents consist of highly liquid investments with an original maturity of three months or less. Cash equivalents are stated at cost which approximates fair value.

SUBORDINATED INTEREST IN ACCOUNTS RECEIVABLE:

In June 2001, the Company entered into a financing agreement whereby its domestic operating units sell eligible customer receivables on an ongoing basis to a newly formed, fully consolidated, financing entity. The financing entity subsequently sells its interest in the receivables to a third party funding agent in exchange for cash and a subordinated interest in the unfunded receivables transferred. The Company acts as an administrative agent in the management and collection of accounts receivable sold.

At December 31, 2001, the Company sold approximately \$111.2 million of net accounts receivable in exchange for \$15.2 million of cash and a retained subordinated interest in the receivables sold of approximately \$96.0 million. The receivables sold represented amounts owed to the Company from customers as of November 30, 2001. The majority of such receivables were collected in December 2001 and as a result, the Company's retained interest in accounts receivable is not significant as of December 31, 2001 and is not presented separately from accounts receivable. The net proceeds from the sale of the receivables were used to pay down borrowings under the Company's revolving credit facility. As of December 31, 2001, the Company recorded a liability to the funding agent of \$15.2 million, which represents receivables for which the Company has received collections from customers and are required to be submitted to the funding agent. Settlement of amounts due to the funding agent, as well as the cost of funding at a rate of approximately 7.6 percent, occurs during the month subsequent to the sale of the receivables.

43

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

INVENTORIES:

Inventories are valued at the lower of first-in, first-out ("FIFO") cost or market.

Inventories consisted of the following (in thousands):

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

	DECEMBER 31,	
	2001	2000
Raw materials.....	\$ 52,579	\$ 54,958

Finished goods.....	35,321	37,239
	-----	-----
	\$112,536	\$132,478
	=====	=====

TOOLING AND OTHER DESIGN COSTS:

Tooling and other design costs represent costs incurred by the Company in the development of new tooling used in the manufacture of the Company's products. The Company follows the provisions of Emerging Issues Task Force ("EITF") Issue No. 99-5, "Accounting for Pre-Production Costs Related to Long-Term Supply Arrangements," that requires all pre-production tooling costs incurred for tools that the Company will not own and that will be used in producing products to be supplied under long-term supply agreements be expensed as incurred unless the supply agreement provides the supplier with the noncancellable right to use the tools or the reimbursement of such costs is contractually guaranteed by the customer. At the time that the customer awards a contract to the Company, the customer agrees to reimburse the Company for certain of its tooling costs either in the form of a lump sum payment or by reimbursement on a piece price basis. When the part for which tooling has been developed reaches a production-ready status, the Company is reimbursed by its customers for the cost of the tooling (in instances of lump sum payment), at which time the tooling becomes the property of the customers. For those costs related to other tooling and design costs reimbursed through the piece price as contractually guaranteed, such costs are capitalized as property, plant and equipment and amortized using the unit of production method over the life of the related product. The Company has certain other tooling costs related to tools for which the Company has the contractual right to use the tool over the life of the supply arrangement, which are capitalized as property, plant and equipment and amortized over the life of the related product. The components of capitalized tooling costs are as follows (in thousands):

	DECEMBER 31,	
	2001	2000
Reimbursable pre-production design and development costs....	\$ 5,628	\$ 2,442
Customer-owned tooling.....	51,019	85,416
Supplier-owned tooling.....	28,533	18,197
	-----	-----
Total.....	\$85,180	\$106,055
	=====	=====

All tooling amounts owned by the customer for which the Company expects reimbursement are recorded in other current and other long-term assets on the accompanying consolidated balance sheet. If the Company forecasts that the amount of capitalized tooling and design costs exceeds the amount to be realized

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

through the sale of product, a loss is recognized currently.

	=====	=====

Property, plant and equipment acquired in the acquisitions discussed in Note 6 was recorded at its fair value, determined based on appraisals, as of the respective acquisition dates. Additions to property, plant and equipment following the acquisitions are stated at cost. For financial reporting purposes, depreciation and amortization are provided using the straight-line method over the following estimated useful lives:

Buildings and improvements.....	15 to 40 years
Machinery and equipment.....	3 to 20 years

Accelerated depreciation methods are used for tax reporting purposes.

Interest is capitalized during the construction of major facilities and is amortized over their estimated useful lives. Interest of \$14.6 million was capitalized during the year ended December 31, 2001, \$12.9 million was capitalized during the year ended December 31, 2000 and \$6.9 million was capitalized during the year ended December 31, 1999.

Maintenance and repairs are charged to expense as incurred. Major betterments and improvements which extend the useful life of the related item are capitalized and depreciated. The cost and accumulated depreciation of property, plant and equipment retired or otherwise disposed of are removed from the related accounts, and any residual values after considering proceeds are charged or credited to income.

GOODWILL:

Goodwill represents the excess of the purchase price over the fair value of

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

the net assets acquired, and through December 31, 2001, was being amortized on a straight-line basis over 40 years.

The Company periodically evaluates whether events and circumstances have occurred which may affect the estimated useful life or the recoverability of the remaining balance of its goodwill and other long-lived assets. If such events or circumstances were to indicate that the carrying amount of these assets were not recoverable, the Company would estimate the future cash flows expected to result from the use of the assets and their eventual disposition. If the sum of the expected future cash flows (undiscounted and without interest charges) were less than the carrying amount of goodwill, the Company would recognize an impairment loss. Impairment losses are measured by comparing fair value of the goodwill as determined by discounting the future cash flows at a market rate of interest.

During the fourth quarter of 2001, the Company recorded a goodwill impairment charge of \$87.5 million as a result of the restructuring of certain operations (See Note 3). In addition, based upon the Company's current operating plans (including the organizational realignment initiative discussed in Note 3) and current and forecasted trends in the automotive industry, the Company re-evaluated the

45

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

carrying amount of goodwill and other long-lived assets. Based upon this analysis, the Company determined that an additional \$108.6 million of goodwill and \$97.0 million of manufacturing equipment and other assets were impaired. As a result, these assets were written down to their estimated fair value as discussed above (See Note 3).

OTHER ASSETS:

Other assets consist primarily of deferred rent expense and debt issuance costs. Debt issue costs are amortized on a straight-line basis over the term of the related obligations.

FAIR VALUE OF FINANCIAL INSTRUMENTS:

The carrying amount of cash and cash equivalents, accounts receivable, accounts payable and revolving credit facilities approximates fair value because of the short maturity of these instruments. The carrying amount of the Company's long-term debt approximates fair value because of the variability of the interest cost associated with these instruments. The fair value of the Company's Convertible Subordinated Notes and Preferred Securities approximated \$167.5 million and \$111.3 million, respectively, as of December 31, 2001.

DERIVATIVE FINANCIAL INSTRUMENTS:

The Company adopted Statement of Financial Accounting Standards ("SFAS") No. 133 "Accounting for Derivative Instruments and Hedging Activities," effective January 1, 2001. SFAS No. 133 establishes accounting and reporting standards requiring that every derivative instrument, including certain derivative instruments embedded in other contracts be recorded in the balance sheet as either an asset or liability measured at its fair value. SFAS No. 133 requires that changes in the derivative's fair value be recognized currently in earnings unless specific hedge criteria are met, and requires that a company must formally document, designate and assess the effectiveness of transactions that receive hedge accounting. The effect of this change as of January 1, 2001, was a pretax charge to accumulated other comprehensive loss of \$6.8 million

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

(\$4.2 million net of income tax benefit).

The Company uses derivative financial instruments principally to manage the risk that changes in interest rates will affect the amount of its future interest payments. Interest rate swap contracts are used to adjust the proportion of total debt that is subject to variable and fixed interest rates. Under these agreements, the Company agrees to pay an amount equal to a specified fixed rate times a notional principal amount, and to receive in return an amount equal to a specified variable rate times the same notional principal amount. The notional amounts of the contract are not exchanged. No other cash payments are made unless the contract is terminated prior to maturity, in which case the amount paid or received in settlement is established by agreement at the time of termination, and usually will represent the net present value, at current rates of interest, of the remaining obligation to exchange payments under the term of the contract.

The interest rate swap contracts are recorded at fair value in the consolidated balance sheet as accrued liabilities and the related gains or losses on these contracts are deferred in stockholders' investment (as a component of other comprehensive income (loss)). Amounts to be paid or received under the contracts are accrued as interest rates change and are recognized over the life of the contracts as an adjustment to interest expense. The net effect of this accounting is that interest expense on the portion of variable rate debt being hedged is generally recorded based on fixed interest rates.

During September 2000, the Company entered into an interest rate swap contract to hedge against interest rate exposure on approximately \$160 million of its floating rate indebtedness under its \$1.15 billion senior unsecured credit facility. The contract has the effect of converting the floating rate interest to a

46

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

fixed rate of approximately 6.9 percent, plus any applicable margin required under the revolving credit facility. The interest rate swap contract was executed to balance the Company's fixed-rate and floating-rate debt portfolios and expires in September 2005. As of December 31, 2001, this is the only swap contract the Company has outstanding. The fair value of the interest rate swap agreement at December 31, 2001 and 2000 was a liability of \$13.4 million and \$6.9 million, respectively, representing the cost that would be incurred to terminate the agreement. This swap contract has been designated as a highly effective cash flow hedge and accordingly, gains or losses on any ineffectiveness was not material to any period.

OTHER NONCURRENT LIABILITIES:

Other noncurrent liabilities consisted of the following (in thousands):

=====	=====

REVENUE RECOGNITION AND SALES COMMITMENTS:

The Company recognizes revenue as its products are shipped to its customers. The Company enters into agreements to produce products for its customers at the beginning of a given vehicle's life. Once such agreements are entered into by the Company, fulfillment of the customers' purchasing requirements is the obligation of the Company for the entire production life of the vehicle, with terms of three to ten years and the Company has no provisions to terminate such contracts. In certain instances, the Company may be committed under existing agreements to supply product to its customers at selling prices which are not sufficient to cover the direct cost to produce such product. In such situations, the Company records a liability for the estimated future amount of such losses. Such losses are recognized at the time that the loss is probable and reasonably estimable and is recorded at the minimum amount necessary to fulfill the Company's obligations to its customers. Losses are discounted and are estimated based upon information available at the time of the estimate, including future production volume estimates, length of the program and selling price and production cost information.

INCOME TAXES:

The Company recognizes deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Deferred tax assets and liabilities are determined based on the difference between the financial statement and tax bases of assets and liabilities using currently enacted tax rates.

COMPREHENSIVE INCOME (LOSS):

Comprehensive income (loss) reflects the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources. For the Company, comprehensive income (loss) represents net income (loss) adjusted for foreign currency translation adjustments, minimum pension liability adjustments, and gains or losses on qualifying cash flow hedges in accordance with SFAS No. 133.

47

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

SEGMENT REPORTING:

In accordance with SFAS No. 131, the Company uses the "management approach" to reporting segment disclosures. The management approach designates the internal organization that is used by management for making operating decisions and assessing performance as the source of the Company's reportable segments. SFAS No. 131 also requires disclosures about products and services, geographic areas, and major customers.

STOCK OPTIONS:

The Company accounts for stock options under the provisions of Accounting Principles Board opinion ("APB") No. 25, under which no compensation expense is recognized when the stock options are granted to employees and directors at fair market value. The pro forma effects had the Company followed the provisions of

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

SFAS No. 123 are included in Note 4. The Company may also grant stock options to outside consultants. The fair value of these option grants are expensed over the period services are rendered based on the Black-Scholes valuation model.

USE OF ESTIMATES:

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The actual results could differ from those estimates.

FOREIGN CURRENCY TRANSLATION:

Assets and liabilities of the Company's foreign operations are translated into U.S. dollars using the year-end rates of exchange. Results of operations are translated at average rates prevailing throughout the period. Translation gains or losses are accumulated as a separate component of "other comprehensive loss" in the accompanying consolidated statements of stockholders' investment.

RECLASSIFICATIONS:

Certain prior year amounts were reclassified to conform to the current year presentation.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS:

On June 29, 2001, the Financial Accounting Standards Board ("FASB") issued SFAS 141, "Business Combinations," and SFAS 142, "Goodwill and Intangible Assets." Major provisions of these Statements are as follows: all business combinations initiated after June 30, 2001 must use the purchase method of accounting; the pooling of interest method of accounting is prohibited except for transactions initiated before July 1, 2001; intangible assets acquired in a business combination must be recorded separately from goodwill if they arise from contractual or other legal rights or are separable from the acquired entity and can be sold, transferred, licensed, rented or exchanged, either individually or as part of a related contract, asset or liability; goodwill and intangible assets with indefinite lives are not amortized but tested for impairment annually, except in certain circumstances, and whenever there is an impairment indicator; all acquired goodwill must be assigned to reporting units for purposes of impairment testing; effective January 1, 2002, goodwill is no longer subject to amortization.

The Company will apply the new rules on accounting for goodwill and other intangible assets beginning in the first quarter of fiscal year 2002. As of December 31, 2001, the Company has unamortized goodwill of \$567.1 million that will be subject to the transition provisions of the Statements. The Company

48

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

has not yet determined the impact of adopting these Statements on its earnings and financial position, including whether it will be required to recognize any transitional impairment losses as a cumulative effect of a change in accounting principle. Application of the nonamortization provisions of the Statements is expected to result in a reduction in goodwill amortization expense of approximately \$16 million in fiscal 2002, after reflecting 2001 goodwill writedowns of \$196.1 million.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

In July 2001, the FASB issued SFAS No. 144, "Impairment or Disposal of Long-Lived Assets," which is effective for fiscal years beginning after December 15, 2001. The provisions of this Statement provide a single accounting model for impairment of long-lived assets. The adoption of SFAS No. 144 on January 1, 2002 is not expected to have a material impact on the Company's financial position or its results of operations.

3. RESTRUCTURING AND ASSET IMPAIRMENT CHARGES:

SEBEWAING AND MILWAUKEE PRESS OPERATIONS:

In October 2001, the Company's board of directors approved a restructuring of the enterprise that included the closing of the Sebewaing, Michigan facility. In addition, in December 2001, the Company's board of directors approved a restructuring plan that related to the consolidation of technical activities and a reduction of other salaried colleagues in conjunction with a reorganization of the Company's U.S. and Canada operations and the relocation of some component manufacturing from the Company's Milwaukee Press Operations to other Tower locations. As a result of these realignment efforts (the "2001 Plan"), the Company recorded a restructuring charge in the fourth quarter of 2001 of \$178.1 million, which reflects the estimated qualifying "exit costs" to be incurred over the next 12 months pertaining to the 2001 Plan.

The 2001 Plan charge includes costs associated with asset impairments, severance and outplacement costs related to employee terminations and certain other exit costs. These activities are anticipated to result in a reduction of more than 700 colleagues in the Company's technical and administrative centers in Novi, Rochester Hills, and Grand Rapids, Michigan; Milwaukee, Wisconsin; and its U.S. and Canada manufacturing locations. Through December 31, 2001, the Company had eliminated approximately 270 colleagues pursuant to the 2001 Plan. The estimated restructuring charge does not cover certain aspects of the 2001 Plan, including movement of equipment and employee relocation and training. These costs will be recognized in future periods as incurred.

The asset impairments consist of long-lived assets, including fixed assets, buildings and manufacturing equipment from the facilities the Company intends to dispose of or discontinue, and goodwill. The carrying value of the long-lived assets written off was approximately \$127.4 million as of December 31, 2001. Fixed assets that will be disposed of as part of the 2001 Plan were written down to their estimated residual values. For assets that will be sold currently, the Company measured impairment based on estimated proceeds on the sale of the facilities and equipment. These asset impairments have arisen as a consequence of the Company making the decision to exit these activities during the fourth quarter of 2001.

Based on the current plan, the Company anticipates this charge will require cash payments of approximately \$34.9 million combined with the \$127.4 million write-off of assets and other future obligations of \$15.8 million. The asset write-offs include \$87.5 million of goodwill associated with Sebewaing and Milwaukee Press Operations, \$20.6 million of property, plant and equipment associated with the Sebewaing operations and \$12.1 million of property, plant and equipment associated with the Milwaukee Press Operations business that will be discontinued. Additionally, there was \$7.2 million of property and building write downs associated with the decision to consolidate the Company's technical centers.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

The accrual for operational realignment and other costs is included in accrued liabilities in the accompanying consolidated balance sheet as of December 31, 2001. The table below summarizes the accrued operational realignment and other charges through December 31, 2001 (in millions):

	ASSET IMPAIRMENTS	SEVERANCE AND OUTPLACEMENT COSTS	OTHER EXIT COSTS	TOTAL
	-----	-----	-----	-----

Non cash charges.....	(127.4)	--	--	(127.4)
	-----	-----	-----	-----
Balance at December 31, 2001.....	\$ --	\$23.9	\$31.4	\$ 55.3
	=====	=====	=====	=====

SUBSEQUENT EVENT (UNAUDITED):

On January 31, 2002, the Company announced that it will discontinue the remaining stamping and ancillary processes currently performed at the Company's Milwaukee Press Operations and relocate the remaining work to other Tower locations or Tier II suppliers. The Company expects to complete the transfer process during the second quarter of 2002. As a result of these efforts, the Company expects to record a restructuring charge in the first quarter of 2002 totaling approximately \$75 million.

HEAVY TRUCK AND KALAMAZOO STAMPING OPERATIONS:

In October 2000, the Company's board of directors approved a comprehensive operational realignment plan (the "2000 Plan") to improve the Company's long-term competitive position and lower its cost structure. The 2000 Plan included phasing out the heavy truck rail manufacturing in Milwaukee, Wisconsin; reducing stamping capacity by closing the Kalamazoo, Michigan facility; and consolidating related support activities across the enterprise. The Company recognized a charge to operations of approximately \$141.3 million in the fourth quarter of 2000, which reflected the estimated qualifying "exit costs" to be incurred over the ensuing twelve months.

The 2000 Plan charge included costs associated with asset impairments, severance and outplacement costs related to employee terminations, loss contract provisions and certain other exit costs. These activities resulted in a reduction of approximately 850 employees.

The asset impairments consisted of long-lived assets, including fixed assets, manufacturing equipment and land, from the facilities the Company intends to dispose of or discontinue. For assets that were disposed of currently, the Company measured impairment based on estimated proceeds on the sale of the facilities and equipment. The carrying value of the long-lived assets held for sale or disposal was approximately \$3.8 million as of December 31, 2001. For assets that will be held and used in the future, the Company prepared a forecast of expected undiscounted cash flows to determine whether asset impairment existed, and used fair values to measure the required write-downs. These asset impairments have arisen as a consequence of the Company making the decision to exit these activities during the fourth quarter of 2000.

The Company anticipated this charge would require cash payments of

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

approximately \$37.6 million combined with the write-off of assets having a book value of approximately \$103.7 million. Actual amounts have been revised by \$5.9 million compared to the original estimate. The assets written off included Milwaukee heavy truck rail manufacturing machinery and equipment of approximately \$47.3 million, Milwaukee and corporate campus support operating assets of approximately \$46.1 million, Kalamazoo

50

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

stamping operation's land, buildings and equipment of approximately \$5.7 million and Granite City stamping, machinery and equipment of \$4.6 million.

The accrual for the 2000 Plan has been fully utilized and revised as of December 31, 2001. The table below summarizes the accrued operational realignment and other charges through December 31, 2001 (in millions):

	ASSET IMPAIRMENTS	SEVERANCE AND OUTPLACEMENT COSTS	LOSS CONTRACTS	OTHER EXIT COSTS	TOTAL
	-----	-----	-----	-----	-----
Provision.....	\$ 103.7	\$ 25.2	\$ 8.1	\$ 4.3	\$ 141.3

	=====	=====	=====	=====	=====

NON-RESTRUCTURING ASSET IMPAIRMENTS:

The restructuring and asset impairment charges line on the accompanying consolidated statement of operations is comprised of both restructuring and non-restructuring related asset impairments. The components of that line are as follows for each of the three years ending December 31, 2001 (in millions):

	2001	2000	1999
	-----	-----	-----
Restructuring and related asset impairments.....	\$178.1	\$141.3	\$--
Other goodwill and asset impairments.....	205.6	--	--
	-----	-----	-----
Total.....	\$383.7	\$141.3	\$--
	=====	=====	=====

The other goodwill and asset impairment charges recorded in 2001 are a result of the Company's review of the carrying amount of certain of its goodwill, fixed assets, and certain investments based upon the Company's current

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

operating plans (including the organizational realignment initiative discussed above) and current and forecasted trends in the automotive industry. Based upon a review of anticipated cash flows, the Company determined that goodwill assigned to two of its plants was impaired and was written off. In addition, the Company identified assets which no longer had sufficient cash flows to support their carrying amounts and were written down to fair value, including its investment in J.L. French.

The total of the other goodwill and asset impairment charges included above is as follows (in millions):

Goodwill writedown.....	\$108.6
Other asset impairments.....	50.7
Investment in J.L. French impairment.....	46.3

Total.....	\$205.6
	=====

51

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

4. STOCKHOLDERS' INVESTMENT:

SALE OF COMMON STOCK:

On August 30, 2001, the Company issued 3,636,400 shares of common stock (par value \$0.01 per share) at a price of \$11.00 per share in a private placement transaction. The Company used the net proceeds of approximately \$37.5 million to repay outstanding indebtedness under its revolving credit facility.

STOCK REPURCHASE:

On May 26, 2000, the Company announced that its board of directors approved the purchase of up to \$100 million of its common stock, if authorized by the executive committee of the board. The shares may be purchased in the open market at prevailing prices and at times and amounts to be determined by the board's executive committee as market conditions and the Company's capital position warrant. During the year ended December 31, 2000, approximately 4.1 million shares at a total cost of approximately \$40.2 million were purchased. The repurchased shares were placed in treasury and were reissued during 2001 for general corporate purposes. There were no shares repurchased during 2001.

EARNINGS PER SHARE:

Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the year. Diluted earnings per share for the 1999 period was calculated on the following assumptions: (i) the Edgewood notes were converted at the beginning of the respective periods, (ii) the Convertible Subordinated Notes were converted at the beginning of the respective periods, and (iii) the Preferred Securities (as defined in Note 5) were converted at the beginning of the period. The Convertible Subordinated Notes and Preferred Securities were not included in the computation of earnings per share for the year ended December 31, 2001 and 2000, due to their anti-dilutive effect. In addition, common stock equivalents relating to options and Edgewood notes totaling approximately 230,000 shares, using the treasury stock method, were excluded from the calculation of earnings per share in 2001

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

because their impact was anti-dilutive.

STOCK OPTION PLAN:

The Company sponsors the 1994 Key Employee Stock Option Plan (the "Stock Option Plan"), under which any person who is a full-time, salaried employee of the Company (excluding non-management directors) is eligible to participate in the Stock Option Plan (an "Employee Participant"). A committee of the board of directors selects the Employee Participants and determines the terms and

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

conditions of the options. The Stock Option Plan provides for the issuance of options up to 3,000,000 shares of Common Stock at exercise prices equal to the stock market price on the date of grant, subject to certain adjustments reflecting changes in the Company's capitalization. Information regarding the Stock Option Plan is as follows:

	SHARES UNDER OPTION	EXERCISE PRICE	WEIGHTED AVERAGE EXERCISE PRICE	WEIGHTED AVERAGE FAIR VALUE OF OPTIONS GRANTED	EXERCISE AT END OF YEAR

The weighted average exercise price of options exercisable at end of year was \$16.59 at December 31, 2001, \$18.13 at December 31, 2000 and \$16.48 at December 31, 1999.

53

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

All options granted in the stock option plan have a contractual life of 10 years from the date of grant and vest ratably over a four-year period from the date of grant.

In March 1999, the Company's board of directors adopted and shareholders approved the Tower Automotive Inc. Long Term Incentive Plan ("Incentive Plan"). The Incentive Plan is designed to promote the long term success of the Company through stock based compensation by aligning the interests of participants with those of its stockholders. Eligible participants under the Incentive Plan include key company colleagues, directors, and outside consultants. Awards under the Incentive Plan may include stock options, stock appreciation rights, performance shares, and other stock based awards. The Incentive Plan provides for the issuance of up to 3,000,000 shares of common stock. A committee of the board of directors is responsible for administration, participant selection, and determination of terms and conditions of the Incentive Plan. Information regarding the Incentive Plan is as follows:

Options granted in each of the past three years have a remaining contractual life of five to 10 years and vest ratably over a four-year period from the date of grant. The weighted average exercise price of options exercisable under the Incentive Plan was \$13.65 at December 31, 2001 and \$19.25 at December 31, 2000. No options issued under the Incentive Plan were exercisable as of December 31, 1999.

INDEPENDENT DIRECTOR STOCK OPTION PLAN:

In February 1996, the Company's board of directors approved the Tower Automotive, Inc. Independent Director Stock Option Plan (the "Director Option Plan") that provides for the issuance of options to Independent Directors, as defined, to acquire up to 200,000 shares of the Company's Common Stock, subject to certain adjustments reflecting changes in the Company's capitalization. The option exercise price must be at least equal to the fair value of the Common Stock at the time the option is

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

issued. Vesting is determined by the board of directors at the date of grant and in no event can be less than six months from the date of grant. Information regarding the Director Option Plan is as follows:

WEIGHTED
AVERAGE

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

	=====	=====	=====		

The weighted average exercise price of options exercisable under the Director Option Plan was \$16.31 at December 31, 2001, \$15.59 at December 31, 2000 and \$13.56 at December 31, 1999.

EMPLOYEE STOCK PURCHASE PLAN:

The Company also sponsors an employee stock discount purchase plan which provides for the sale of up to 1,000,000 shares of the Company's Common Stock at discounted purchase prices, subject to certain limitations. The cost per share under this plan is 85 percent of the market value of the Company's Common Stock at the date of purchase, as defined. During the year ended December 31, 2001, 172,502 shares of Common Stock were issued to employees pursuant to this plan, 224,342 shares of Common Stock were issued during the year ended December 31, 2000, and 222,574 shares of Common Stock were issued during the year ended December 31, 1999. The weighted average fair value of shares sold in 2001, 2000, and 1999 was \$6.64, \$11.23, and \$16.09, respectively.

DEFERRED STOCK PLANS:

The Company sponsors the Tower Automotive, Inc. Key Leadership Deferred Income Stock Purchase Plan and the Tower Automotive, Inc. Director Deferred Stock Purchase Plan (the "Deferred Stock Plans"), which allow certain employees to defer receipt of all or a portion of their annual cash bonus and outside directors to defer all or a portion of their annual retainer. The Company makes a matching contribution of one-third of the deferral. The Company matching contribution vests on the 15th day of December of the second plan year following the date of the deferral. In accordance with the terms of the plans, the deferral and Company's matching contribution may be placed in a "Rabbi" trust, which invests solely in the Company's Common Stock. This trust arrangement offers a degree of assurance for ultimate payment of benefits without causing constructive receipt for income tax purposes. Distributions from the trust can only be made in the form of the Company's Common Stock. The assets in the trust remain subject to the claims of creditors of the Company and are not the property of the employee or outside director; therefore, they are included as a separate component of stockholders' investment under the caption Deferred Compensation Plans. The Company recorded \$1.3 million, \$4.5 million and \$4.4 million of expense related to these plans during the years ended December 31, 2001, 2000 and 1999, respectively.

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

RESTRICTED STOCK:

In July 2001, the Company offered to its existing colleagues, and certain consultants, the right to exchange the Company stock options, having an exercise price of \$17.125 or more, for shares of restricted stock. As a result of the offer, effective September 17, 2001, the Company issued approximately 530,671 shares of its common stock in exchange for the surrender of options to purchase a total of 1,503,500 shares of the Company's Common Stock. The cost of this exchange was recorded in stockholders' investment as deferred compensation based upon the fair value of stock issued and is being expensed as the restrictions lapse.

SUPPLEMENTAL RETIREMENT PLAN:

During 2001, the Company's board of directors approved the Tower Automotive Supplemental Retirement Plan (the "Supplemental Retirement Plan"), which allows certain employees who are restricted in their contributions to the Tower Automotive Retirement Plan by certain statutory limitations on benefits to defer receipt of all or a portion of their annual cash compensation. The Company makes a matching contribution based on the terms of the plan. The Company's matching contributions vests on the first day of the third plan year following the date of the employee's deferral. The Company recorded \$0.4 million of compensation expense related to this plan during the year ended December 31, 2001.

STOCK-BASED COMPENSATION PLANS:

As discussed above, the Company has three stock option plans: the Stock Option Plan, the Long Term Incentive Plan and the Independent Director Stock Option Plan. Additionally the Company has two stock purchase plans: the Employee Stock Purchase Plan and the Deferred Income Stock Plan. The Company has elected to continue to account for these plans under APB No. 25, under which no compensation cost has been recognized for employee groups and directors eligible for the plans. Had compensation cost for these plans been determined as required under SFAS No. 123, "Accounting for Stock-Based Compensation," the Company's pro forma net income (loss) and pro forma earnings per share would have been as follows (in thousands, except per share data):

	YEARS ENDED DECEMBER 31,		
	2001	2000	1999
Net income (loss)			
As Reported.....	\$ (267,524)	\$ 13,434	\$ 117,088

The fair value of each option grant is estimated on the date of the grant

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

using the Black-Scholes option pricing model with the following weighted average assumptions: Risk free interest rates of 4.88 percent in 2001, 5.56 percent to 6.72 percent in 2000, and 4.54 percent in 1999; expected life of seven years for 2001, 2000, and 1999; expected volatility of 52 percent in 2001, 49 percent in 2000, and 40 percent in 1999; expected dividends of zero.

56

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

OTHER COMMON STOCK EQUIVALENTS:

In connection with the acquisition of Edgewood Tool and Manufacturing Company ("Edgewood") in May 1994, the Company issued options to acquire 205,968 shares of Common Stock at an exercise price of \$3.28 per share. These options are fully exercisable through 2004. As of December 31, 2001, all of these options were exercisable.

In connection with the acquisition of MSTI in May 1996, the Company issued warrants to MascoTech, Inc. ("MascoTech") to acquire 400,000 shares of Common Stock at an exercise price of \$9 per share. On May 5, 2000, MascoTech exercised all of the warrants outstanding under this agreement.

In addition, the Company has Convertible Subordinated Notes outstanding as discussed in Note 8, and Convertible Preferred Securities as discussed in Note 5.

DIVIDENDS:

The Company has not declared or paid any cash dividends in the past. As discussed in Note 8, the Company's debt agreements restrict the amount of dividends the Company can declare or pay. As of December 31, 2001, under the most restrictive debt covenants, the Company could not have paid any cash dividends.

5. MANDATORILY REDEEMABLE TRUST CONVERTIBLE PREFERRED SECURITIES:

On June 9, 1998, Tower Automotive Capital Trust (the "Preferred Issuer"), a wholly owned statutory business trust of the Company, completed the offering of \$258.8 million of its 6 3/4 percent Trust Convertible Preferred Securities ("Preferred Securities"), resulting in net proceeds of approximately \$249.7 million. The Preferred Securities are redeemable, in whole or in part, on or after June 30, 2001 and all Preferred Securities must be redeemed no later than June 30, 2018. The Preferred Securities are convertible, at the option of the holder, into common stock of the Company at a rate of 1.6280 shares of common stock for each Preferred Security, which is equivalent to a conversion price of \$30.713 per share. The net proceeds of the offering were used to repay outstanding indebtedness. Minority interest reflected in the accompanying consolidated statements of operations represents dividends on the Preferred Securities at a rate of 6 3/4 percent, net of income tax benefits at the Company's incremental tax rate of 39 percent in 2001 and 40 percent in 2000 and 1999.

No separate financial statements of the Preferred Issuer have been included herein. The Company does not consider that such financial statements would be material to holders of Preferred Securities because (i) all of the voting securities of the Preferred Issuer are owned, directly or indirectly, by the Company, a reporting company under the Exchange Act, (ii) the Preferred Issuer has no independent operations and exists for the sole purpose of issuing securities representing undivided beneficial interests in the assets of the

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Preferred Issuer and investing the proceeds thereof in 6 3/4 percent Convertible Subordinated Debentures due June 30, 2018 issued by the Company and (iii) the obligations of the Preferred Issuer under the Preferred Securities are fully and unconditionally guaranteed by the Company.

6. ACQUISITIONS AND INVESTMENT IN JOINT VENTURES:

ACQUISITIONS:

On November 30, 2000 the Company completed the acquisition of Strojarné Malacky, a.s. ("Presskam"), a manufacturer of upper body structural assemblies for Volkswagen, Porsche and Skoda, located in Bratislava, Slovakia. The Company paid total consideration of approximately \$10 million for Presskam and intends to use the investment to further support Volkswagen's Bratislava assembly operation.

57

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

On July 6, 2000, the Company acquired the remaining 60 percent equity interest in Metalurgica Caterina S.A. ("Caterina") for approximately \$42 million. The initial 40 percent interest was acquired in March 1998, for approximately \$48 million. Caterina is a supplier of structural stampings and assemblies to the Brazilian automotive market, including Volkswagen and Mercedes-Benz.

On May 3, 2000, the Company acquired all of the outstanding common stock of Algoods, Inc. ("Algoods") for total consideration of approximately \$33 million. Algoods manufactures aluminum heat shields and impact discs for the North American automotive industry from aluminum mini-mill and manufacturing operations located in Toronto, Canada. Its primary customer is DaimlerChrysler. The acquisition of Algoods represents a significant investment in processing technology for lightweight materials which complements the Company's existing heat shield capabilities and provides opportunities for application in other lightweight vehicle structural products.

Effective January 1, 2000, the Company acquired all of the outstanding shares of Dr. Meleghy GmbH & Co. KG Werkzeugbau und Presswerk, Bergisch Gladbach ("Dr. Meleghy") for approximately \$86 million plus earnout payments of \$2.7 million paid in 2001 and \$26.9 million to be paid in 2002. Dr. Meleghy designs and produces structural stampings, assemblies, exposed surface panels and modules to the European automotive industry. Dr. Meleghy also designs and manufactures tools and dies for use in its production and for the external market. Dr. Meleghy operates three facilities in Germany and one facility in both Hungary and Poland. Dr. Meleghy's main customers include DaimlerChrysler, Audi, Volkswagen, Ford, Opel, and BMW. Products offered by Dr. Meleghy include body side panels, floor pan assemblies, and miscellaneous structural stampings.

On October 29, 1999, the Company invested \$21 million for new shares representing a 49 percent equity interest in Seojin Industrial Company Limited ("Seojin"). Seojin is a supplier of frames, modules and structural components to the Korean automotive industry. In addition, the Company advanced \$19 million to Seojin in exchange for variable rate convertible bonds (the "Bonds") due October 30, 2009. The conversion rate was based on a predetermined formula that would increase the Company's equity interest to 66 percent. On October 31, 2000, the Company exercised its right to convert the bonds into 17 percent of the common stock of Seojin. Based upon the formula for conversion of the Seojin bonds, the Company paid an additional \$1.2 million for the 17 percent equity interest.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

On July 29, 1999, the Company acquired all of the outstanding stock of Active Tool Corporation and Active Products Corporation (collectively, "Active") for total approximate consideration of \$315 million. Active, which has five facilities, designs and produces a variety of large unexposed structural stampings, exposed surface panels, and modules to the North American automotive industry. Active's main customers include DaimlerChrysler, Ford, General Motors, and Saturn. Products offered by Active include body sides, pickup box sides, fenders, floor pan assemblies, door panels, pillars, and heat shields. The acquisition of Active enhances the Company's ability to manufacture large and complex structures, as well as exposed surface panels.

These acquisitions have been accounted for using the purchase method of accounting and, accordingly, the assets acquired and liabilities assumed have been recorded at fair value as of the dates of the acquisitions. The excess of the purchase price over the fair value of the assets acquired and liabilities assumed has been recorded as goodwill. Results of operations for these acquisitions have been included in the accompanying consolidated financial statements since the dates of acquisition.

In conjunction with its acquisitions, reserves have been established for certain costs associated with facility shutdown and consolidation activities, for general and payroll related costs primarily for planned

58

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

employee termination activities, and for provisions for acquired loss contracts. A rollforward of these reserves is as follows (in millions):

	FACILITY SHUTDOWN COSTS	PAYROLL RELATED COSTS	LOSS CONTRACTS
	-----	-----	-----
December 31, 1999.....	\$13.8	\$ 6.4	\$ 24.8
Additions.....	1.0	--	12.3
Utilizations.....	(7.5)	(2.6)	(8.4)
	-----	-----	-----
December 31, 2000.....	7.3	3.8	28.7
Additions.....	--	--	--
Utilization.....	(2.1)	(2.7)	(11.7)
	-----	-----	-----
December 31, 2001.....	\$ 5.2	\$ 1.1	\$ 17.0
	=====	=====	=====

The timing of facility shutdown and consolidation activities were adjusted to reflect customer concerns with supply interruption. As of December 31, 2001, the facilities have been shutdown, but the Company continues to incur costs related to maintenance, taxes and other costs related to buildings that are held for sale. These reserves have been utilized as originally intended and management believes the liabilities recorded for shutdown and consolidation activities are adequate but not excessive as of December 31, 2001.

A reconciliation of the purchase accounting liabilities detailed in the table above to the total purchase accounting liabilities shown in Note 2 follows (in millions):

	-----	-----
Total purchase accounting reserves.....	\$43.1	\$68.4
	=====	=====

INVESTMENT IN JOINT VENTURES:

On January 2, 2001, the Company invested approximately \$2 million in the formation of a prototyping joint venture with Carron Industries. The joint venture, Carron Prototype Center, located in Inkster, Michigan, provides the Company with detail stamping and tooling capabilities and has capacity for full frame prototypes and vehicle builds. The Company accounts for this investment using the cost method.

On September 21, 2000, the Company acquired a 17 percent equity interest in Yorozu Corporation ("Yorozu"), a supplier of suspension modules and structural parts to the Asian and North American automotive markets, from Nissan Motor Co. Ltd. ("Nissan"). Yorozu is based in Japan and is publicly traded on the first tier of the Tokyo Stock Exchange. Its principal customers include Nissan, Auto Alliance, General Motors, Ford, and Honda. The Company will pay Nissan approximately \$68 million over two and one half years for the original 17 percent interest and an option to increase its holdings in Yorozu by 13.8 percent through the purchase of additional Yorozu shares, which was exercised on February 20, 2001. As of December 31, 2001, \$29.5 million remains to be paid under these arrangements and is recorded as indebtedness on the Company's balance sheet. As of December 31, 2001, the traded market

59

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

value of shares held in Yorozu was \$17.6 million and the Company's investment in Yorozu was \$54.8 million. The Company has determined that the investment in Yorozu has not suffered a permanent decline in market value. This determination is based on the long-term nature of the investment and the fact that the Company believes that there is a significant premium associated with the large block of stock held.

On March 23, 2000, the Company invested \$2.1 million in the formation of a product technology and development joint venture with Defiance Testing & Engineering Services, Inc., a subsidiary of GenTek Inc. The joint venture, DTA Development, located in Westland, Michigan, provides the Company with product-testing services. Traditionally, the Company utilizes both internal and external product testing extensively to validate complex systems during the development stage of a program. This joint venture allows the Company to have access to a broader and more cost efficient range of testing capabilities. DTA Development blends the benefits of chassis product technology and development

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

activities with leading edge commercial testing services.

On October 14, 1999, the Company loaned \$30.0 million to J. L. French Automotive Castings, Inc., ("J.L. French") in exchange for a convertible subordinated promissory note due October 14, 2009 that bears interest at 7.5 percent. On November 30, 2000, the Company exercised its option to convert the note into 7,124 shares of Class A "1" Common Stock of J. L. French, which has a 7.5 percent pay-in-kind dividend right.

Additionally, on November 30, 2000, the Company invested \$2.9 million in J. L. French through the purchase of Class P Common Stock, which has an 8 percent pay-in-kind dividend right. On May 24, 2000, the Company invested \$11.0 million in J. L. French through the purchase of Class A Common Stock. At December 31, 2001, the Company has an ownership interest of approximately 16 percent in J. L. French. As discussed in Note 3, the Company evaluated its investment in J.L. French and determined that the investment has been impaired. Due to this impairment, the Company recorded a charge of \$46.3 million to write off the entire investment in J.L. French during the fourth quarter of 2001.

The Company is a 40 percent partner in Metalsa S. de R.L. ("Metalsa") with Promotora de Empresas Zano, S.A. de C.V. ("Proeza"). Metalsa is the largest supplier of vehicle frames and structures in Mexico. In addition, the parties have entered into a technology sharing arrangement that enables both companies to utilize the latest available product and process technology. Metalsa is headquartered in Monterrey, Mexico and has manufacturing facilities in Monterrey and San Luis Potosi, Mexico. Metalsa's customers include DaimlerChrysler, General Motors, Ford, and Nissan. In connection with the original agreement, the Company paid \$120 million to Proeza, with an additional amount of up to \$45 million payable based upon net earnings of Metalsa for the years 1998, 1999 and 2000. Based upon Metalsa's 1998 and 1999 net earnings, the Company paid Proeza \$9.0 million and \$7.9 million of additional consideration during 1999 and 2000, respectively. Based upon Metalsa's 2000 net earnings, the Company paid \$8.6 million of additional consideration during the first quarter of 2002.

The accompanying unaudited consolidated pro forma results of operations for the year ended December 31, 2000 give effect to the following as if they were completed at the beginning of the year: (i) the acquisitions of Algoods, Caterina, Seojin and Presskam, (ii) the refinancing of bank indebtedness under the new senior credit facility (Note 8), and (iii) the completion of the sale of the senior Euro notes and the application of the net proceeds therefrom (Note 8). The accompanying unaudited consolidated pro forma results of operations for the year ended December 31, 1999 give effect to the transactions described above and the following as if they were completed at the beginning of the year: (i) the acquisition of Active, (ii) the investment in Seojin, and (iii) the \$325 million term loan add on facility (Note 8). The unaudited pro forma financial information does not purport to represent what the Company's results of operations would actually have been if such transactions in fact had occurred at such date or to project the Company's results of future operations (in thousands, except per share data):

7. DIVESTITURES:

On December 7, 2000, the Company sold its Roanoke, Virginia heavy truck rail manufacturing business (the "Roanoke Heavy Truck Business") to its joint venture partner, Metalsa, for net proceeds of approximately \$55 million, which approximated the book value of the net assets sold, plus an earnout of up to \$30 million based on achieving certain profit levels over the three years following the sale. Through December 31, 2001, no additional payments have been earned. The net proceeds were used to repay outstanding indebtedness under the revolving credit facility. The results of operations of the Roanoke Heavy Truck Business are not significant to the operating results of the Company as a whole and have, therefore, been excluded from the pro forma financial information in Note 6.

	=====

On July 25, 2000, the Company replaced its previous \$750 million amortizing credit agreement with a new six-year \$1.15 billion senior unsecured credit agreement. The new credit agreement includes a non-amortizing revolving facility of \$825 million along with an amortizing term loan of \$325 million. The new facility also includes a multi-currency borrowing feature that allows the

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Company to borrow up to \$500 million in certain freely tradable offshore currencies, and letter of credit sublimits of \$100 million. As of December 31, 2001, \$20.0 million of the outstanding borrowings are denominated in Japanese yen, \$55.6 million are denominated in Euro, and \$15.7 million are denominated in Canadian dollars. Interest on

62

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

the new credit facility is at the financial institutions' reference rate, LIBOR, or the Eurodollar rate plus a margin ranging from 0 to 200 basis points depending on the ratio of the consolidated funded debt for restricted subsidiaries of the Company to its total EBITDA. The weighted average interest rate for such borrowings was 7.0 percent and 7.3 percent for years ended December 31, 2001 and 2000, respectively. The new credit agreement has a final maturity of 2006. As a result of the debt replacement, the Company recorded an extraordinary loss, net of tax, of \$3.0 million during the third quarter of 2000.

The Credit Agreement requires the Company to meet certain financial tests, including but not limited to a minimum interest coverage and maximum leverage ratio. The credit agreement limits the Company's ability to pay dividends. As of December 31, 2001, the Company was in compliance with all debt covenants.

On July 25, 2000, R. J. Tower Corporation (the "Issuer"), a wholly-owned subsidiary of the Company, issued Euro-denominated senior unsecured notes in the amount of E150 million (\$133.6 million at December 31, 2001). The notes bear interest at a rate of 9.25 percent, payable semi-annually. The notes rank equally with all of the Company's other unsecured and unsubordinated debt. The net proceeds after issuance costs were used to repay a portion of the Company's existing Euro-denominated indebtedness under its credit facility. The notes mature on August 1, 2010.

During September 2000, the Company entered into an interest rate swap contract to hedge against interest rate exposure on approximately \$160 million of its floating rate indebtedness under its \$1.15 billion senior unsecured credit facility. The contracts have the effect of converting the floating rate interest to a fixed rate of approximately 6.9 percent, plus any applicable margin required under the revolving credit facility. The interest rate swap contract was executed to balance the Company's fixed-rate and floating-rate debt portfolios and expires in September 2005.

For the periods presented through July 24, 2000, the Company's Credit Agreement included an amortizing revolving credit facility that provided for borrowings of up to \$750 million on an unsecured basis with a letter of credit sublimit of \$75 million. Interest on the credit facility was at the prime rate or LIBOR plus a margin ranging from 17 to 50 basis points depending upon the ratio of the consolidated indebtedness of the Company to its total capitalization.

In July 1997, the Company completed the offering of \$200 million of Convertible Subordinated Notes (the "Notes"). The Notes bear interest at 5 percent, are unsecured, due on August 1, 2004 and are convertible into Common Stock at a conversion price of \$25.88 per share. The Company may make optional redemptions of the Notes after August 1, 2000 at amounts ranging from 102.857 percent to 100.714 percent of face value. In the event of a change in control (as defined) the holders of the Notes may require the Company to redeem the Notes at face value plus accrued interest. Proceeds from the Notes were used to repay outstanding indebtedness under the revolving credit facility.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

In 1994 and 1995, the Company issued \$25.0 million and \$20.0 million, respectively, of industrial development revenue bonds related to the construction and equipping of a manufacturing facility in Bardstown, Kentucky. The bonds are collateralized by letters of credit.

A summary of deferred income tax assets (liabilities) is as follows (in thousands):

	DECEMBER 31,	
	2001	2000
Deferred Income Tax Assets:		
Accrued compensation costs.....	\$ 11,569	\$ 8,446
Postretirement benefit obligations.....	31,952	39,435
Loss contracts.....	5,397	14,950
Facility closure and consolidation costs.....	48,009	37,626
Net operating loss carryforwards and tax credits.....	76,618	34,365
Investment valuation adjustments.....	16,254	--
Other reserves and accruals not currently deductible for tax purposes.....	10,975	23,524
	-----	-----
Less: Valuation allowance.....	(16,254)	--
	-----	-----
Total deferred income tax assets.....	184,520	158,346
Deferred Income Tax Liabilities -- Depreciation lives and methods.....	(96,736)	(151,320)
	-----	-----
Net deferred tax assets.....	\$ 87,784	\$ 7,026
	=====	=====

Net current deferred tax assets of \$26.3 million in 2001 and \$29.3 million in 2000 have been recorded in other current assets. The valuation allowance has been provided due to the uncertainty of the use of the tax benefit associated with a specific reserve recorded against the carrying value of a cost-based investment.

The Company has an alternative minimum tax ("AMT") credit carryforward of approximately \$21.1 million. The AMT credit has an indefinite carryforward period. The Company has federal net operating loss carryforwards ("NOL's") of

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

approximately \$69.5 million which expire 2020 through 2021 and various state NOL's that expire through 2021.

The Company has not recorded deferred income taxes applicable to undistributed earnings of its foreign joint venture operations as all such earnings are deemed to be indefinitely reinvested in those operations. If the earnings of such joint ventures were not indefinitely reinvested, a deferred liability would have been required which would not have been material as of December 31, 2001 or 2000. Undistributed amounts, if remitted in the future, may not result in additional U.S. income taxes because of the use of available foreign tax credits at that time.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

10. SEGMENT INFORMATION:

The Company produces a broad range of assemblies and modules for vehicle body structures and suspension systems for the global automotive industry. These operations have similar characteristics including the nature of products, production processes and customers and produce lower vehicle structures, body structures (including Class A surfaces), suspension components, and modular assemblies for the automotive industry. Management reviews the operating results of the Company and makes decisions based upon two operating segments: United States/Canada and International. The accounting policies of the segments are the same as those described in the summary of significant accounting policies (see Note 2). Financial information by segment is as follows (in thousands):

	UNITED STATES/ CANADA -----	INTERNATIONAL -----	TOTAL -----

	=====	=====	=====

The Company sells its products directly to automotive manufacturers.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

Following is a summary of customers that accounted for 10 percent or more of consolidated revenues in any of the three years in the period ended December 31, 2001:

	2001	2000	1999
	----	----	----
Ford.....	35%	37%	38%
DaimlerChrysler.....	25	31	29
Hyundai/Kia.....	12	4	--
General Motors.....	4	5	10

Receivables from these customers represented 41 percent of total accounts receivable at December 31, 2001, 57 percent of total accounts receivable at December 31, 2000 and 65 percent of total accounts receivable at December 31, 1999.

11. EMPLOYEE BENEFIT PLANS:

The Company sponsors various pension and other postretirement benefit plans for its employees.

RETIREMENT PLANS:

The Company's UAW Retirement Income Plan and the Tower Automotive Pension Plan provides for substantially all union employees. Benefits under the plans are based on years of service. Contributions by

67

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

the Company are intended to provide not only for benefits attributed to service to date, but also for those benefits expected to be earned in the future. The Company's funding policy is to contribute annually the amounts sufficient to meet the higher of the minimum funding requirements set forth in the Employee Retirement Income Security Act of 1974 or the minimum funding requirements under the Company's union contracts.

The following tables provide a reconciliation of the changes in the benefit obligations and fair value of assets for the defined benefit pension plans (in thousands):

	-----	-----
Weighted-average assumptions of each year end:		
Discount rate.....	7.5%	8.1%
Expected return on plan assets.....	9.5%	9.5%
Rate of compensation increase.....	4.5%	4.5%
Measurement date.....	9/30/2001	9/30/2000

The Company contributes to a union sponsored multi-employer pension plan providing defined benefits to certain Michigan hourly employees. Contributions to the pension plan are based on rates set forth in the Company's union contracts. The expense related to this plan was \$0.7 million for the year ended December 31, 2001, \$0.8 million for the year ended December 31, 2000 and \$0.8 million for the year ended December 31, 1999.

The Company also contributes to a union sponsored multi-employer pension plan providing defined benefits for certain hourly employees of the Milwaukee facility. Expense relating to this plan was \$0.6 million, \$0.5 million and \$1.3 million for the years ended December 31, 2001, 2000 and 1999, respectively. The expense is determined based on contractual rates with the union.

The Company also maintains a qualified profit sharing retirement plan and 401(k) employee savings plan covering certain salaried and hourly employees. The expense related to these plans was \$11.0 million during 2001 and 2000, and \$9.7 million during 1999.

The Company sponsors a 401(k) employee savings plan covering certain union employees. The Company matches a portion of the employee contributions made to this plan. The expense under this plan in each of the three years in the period ended December 31, 2001 was not material.

POSTRETIREMENT PLANS:

The Company provides certain medical insurance benefits for retired employees. Certain employees of the Company are eligible for these benefits if they remain employed until age 55 or 59 and fulfill other eligibility requirements specified by the plans. Certain retirees between the ages of 55 and 62 must

contribute 100 percent of the group rate for active employees. No contributions are required for retirees 62 or older. Benefits are continued for dependents of eligible retiree participants after the death of the retiree.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

The discount rate used to measure the Company's post retirement medical benefit obligation was 8.1 percent in 2001 and 2000.

For measurement purposes, an 11.5 percent annual rate of increase in per capita cost of covered health care benefits was assumed for 2001. The rate was assumed to decrease gradually to 5.5 percent for 2006 and remain at that level thereafter.

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

TOWER AUTOMOTIVE, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

Assumed health care cost trend rates have a significant effect on the amounts reported for the post retirement medical plans. A one percentage point change in assumed health care costs trend rates would have the following effects (in thousands):

	INCREASE	DECREASE
ONE PERCENTAGE POINT:		
Effect on total service and interest cost components.....	\$ 184	\$ 167
	=====	=====
Effect on the accumulated benefit obligation.....	\$2,700	\$2,409
	=====	=====

12. COMMITMENTS:

LEASES:

The Company leases office and manufacturing space and certain equipment under lease agreements which require it to pay maintenance, insurance, taxes and other expenses in addition to annual rentals. The Company has entered into several leasing commitments with maturities of between 2002 and 2015. The properties covered under these transactions include manufacturing equipment, facilities and administrative offices. The leases provide for a substantial residual value guarantee (less than 90 percent of the total cost), which may become payable upon the termination of the transaction, and include purchase and renewal options. As of December 31, 2001, residual value guarantees in connection with these leases totaled approximately \$103.4 million. Upon termination of the leases, the Company expects the fair market value of the leased properties to reduce substantially or eliminate entirely the payment under the residual value guarantees. Future annual rental commitments at December 31, 2001 under these leases are as follows (in thousands):

YEAR	OPERATING	CAPITAL
2002.....	\$ 54,177	\$3,227
2003.....	53,288	4,449
2004.....	53,565	275

Present value of minimum lease payments.....		\$7,343
		=====

Total rent expense for all operating leases totaled \$55.2 million, \$21.5

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

million and \$15.0 million in 2001, 2000 and 1999, respectively.

Rent commitments associated with acquired facilities which will not be utilized by the Company have been excluded from the above amounts and were provided for in the recording of the related acquisition, as discussed in Note 6.

LITIGATION:

The Company is party to certain claims arising in the ordinary course of business. In the opinion of management, based upon the advice of legal counsel, the outcomes of such claims are not expected to be material to the Company's financial position and statements of operations.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

13. RELATED PARTY TRANSACTIONS:

The Company has made payments to Hidden Creek Industries, an affiliate of the Company, for certain acquisition related and other management services totaling \$0.6 million during 2001, \$4.4 million during 2000 and \$3.1 million during 1999.

14. QUARTERLY FINANCIAL DATA (UNAUDITED):

The following is a condensed summary of quarterly results of operations for 2001 and 2000. The restructuring and asset impairment charges described in Note 3 are reflected in the fourth quarter 2001 and 2000 amounts. The sum of the per share amounts for the quarters does not equal the total for the year due to the effects of rounding and the anti-dilutive effects of certain common stock equivalents (in thousands, except per share amounts):

	REVENUES	GROSS PROFIT	OPERATING INCOME (LOSS)	NET INCOME (LOSS)	BASIC EARNINGS (LOSS) PER SHARE	DILUTE EARNING (LOSS) PER SHA
	-----	-----	-----	-----	-----	-----

15. CONSOLIDATING GUARANTOR AND NON-GUARANTOR FINANCIAL INFORMATION:

The following consolidating financial information presents balance sheets, statements of operations and cash flow information related to the Company's business. Each Guarantor, as defined, is a direct or indirect wholly-owned subsidiary of the Company and has fully and unconditionally guaranteed the 9.25 percent senior unsecured notes issued by R. J. Tower Corporation, on a joint and several basis. Tower Automotive, Inc. (the parent company) has also fully and unconditionally guaranteed the note and is reflected as the Parent Guarantor in the consolidating financial information. The Non-Guarantors are the Company's foreign subsidiaries. Separate financial statements and other disclosures concerning the Guarantors have not been presented because management believes that such information is not material to investors.

REPORT OF INDEPENDENT PUBLIC ACCOUNTANTS

We have audited, in accordance with auditing standards generally accepted in the United States, the financial statements included in the Tower Automotive, Inc. and Subsidiaries' annual report to stockholders incorporated by reference in this Form 10-K, and have issued our report thereon dated January 25, 2002.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The Schedule I -- Condensed Financial Information of Registrant and Schedule II -- Valuation and Qualifying Accounts of Registrant are the responsibility of the Company's management and are presented for purposes of complying with the Securities and Exchange Commission's rules and are not part of the basic financial statements. These schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, fairly state in all material respects the financial data required to be set forth therein in relation to the basic financial statements taken as a whole.

SCHEDULE I

TOWER AUTOMOTIVE, INC.
CONDENSED FINANCIAL INFORMATION OF REGISTRANT
TOWER AUTOMOTIVE, INC. (PARENT COMPANY)
NOTES TO CONDENSED FINANCIAL STATEMENTS

NOTE 1. ORGANIZATION AND OPERATIONS

Tower Automotive, Inc. (the "Parent Company") and its consolidated subsidiaries (the "Subsidiaries"), collectively "the Company", produces a broad range of assemblies and modules for vehicle frames, upper body structures and suspension systems for the global automotive industry. Including both wholly-owned subsidiaries and investments in joint ventures, the Company has facilities in the United States, Canada, Italy, Germany, Hungary, Poland, Brazil, India, Slovakia, Korea, Japan, China, and Mexico.

The Notes to Consolidated Financial Statements of Tower Automotive, Inc. and Subsidiaries should be read in conjunction with this Schedule I.

NOTE 2. CONVERTIBLE SUBORDINATED NOTES

In July 1997, the Parent Company completed the offering of \$200 million of Convertible Subordinated Notes (the "Notes"). The net proceeds from the Notes, \$194.1 million, were contributed as an additional investment in the Subsidiaries. The Notes bear interest at 5 percent, are unsecured, are due on August 1, 2004 and are convertible into Common Stock of the Parent Company at a conversion price of \$25.88 per share. The Parent Company may make optional redemptions of the Notes after August 1, 2000 at amounts ranging from 102.857 percent to 100.714 percent of face value. In the event of a change in control (as defined), the holders of the Notes may require the Parent Company to redeem the Notes at face value plus accrued interest.

NOTE 3. STOCKHOLDERS' INVESTMENT

On May 19, 1998, the Parent Company's Board of Directors approved a two-for-one stock split, which was effected as a stock dividend. On July 15, 1998, stockholders were issued one additional share of Common Stock for each share of Common Stock held on the record date of June 30, 1998. All references to the number of common shares and per share amounts have been adjusted to reflect the stock split on a retroactive basis.

NOTE 4. CONVERTIBLE SUBORDINATED DEBENTURES

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

On June 9, 1998, Tower Automotive Capital Trust (the "Preferred Issuer"), a wholly owned statutory business trust of the Parent Company, completed the offering of \$258.8 million of its 6 3/4 percent Trust Convertible Preferred Securities ("Preferred Securities"), resulting in net proceeds of approximately \$249.7 million. The Preferred Securities are redeemable, in whole or in part, on or after June 30, 2001 and all Preferred Securities must be redeemed no later than June 30, 2018. The Preferred Securities are convertible, at the option of the holder, into Common Stock of the Parent Company at a rate of 1.6280 shares of Common Stock for each Preferred Security, which is equivalent to a conversion price of \$30.713 per share. The obligations of the Preferred Issuer under the Preferred Securities are fully and unconditionally guaranteed by the Parent Company. Concurrently with the issuance of the Preferred Securities, the Preferred Issuer acquired \$258.8 million of the Parent Company's 6 3/4 percent Convertible Subordinated Debentures ("Debentures") for net proceeds of \$249.7 million. Interest is payable quarterly and the notes mature on June 30, 2018. The net proceeds received from the issuance of the Debentures by the Parent Company were contributed as an additional investment in the Subsidiaries.

NOTE 5. INVESTMENT IN J.L. FRENCH

On October 14, 1999, the Company loaned \$30.0 million to J.L. French Automotive Castings, Inc. ("J.L. French") in exchange for a convertible subordinated promissory note due October 14, 2009. The note bears interest at 7.5% annually with interest payable on the last day of each calendar quarter beginning December 31, 1999. On November 30, 2000, the Company exercised its option to convert the note into 7,124 shares of Class A "1" Common Stock of J. L. French, which has a 7.5 percent pay-in-kind dividend right. Additionally, on November 30, 2000, the Company invested \$2.9 million in J. L. French through the purchase of Class P Common Stock, which has an 8 percent pay-in-kind dividend right. On May 24, 2000, the Company invested \$11.0 million in J. L. French through the purchase of Class A Common Stock. At December 31, 2001, the Company has an ownership interest of approximately 16 percent in J. L. French. During the fourth quarter of 2001, the Company evaluated its investment in J.L. French and determined that the investment has been impaired, and therefore, recorded a charge of \$46.3 million to write off the entire investment in J.L. French.

NOTE 6. GUARANTEES AND RESTRICTIONS

Guarantee of Subsidiaries' Debt

In July 2000, the Subsidiaries replaced the existing \$750 million amortizing credit agreement with a new six-year \$1.15 billion senior unsecured credit agreement. The new credit agreement includes a non-amortizing revolving facility of \$825 million along with an amortizing term loan of \$325 million. The new facility also includes a multi-currency borrowing feature that allows the Company to borrow up to \$500 million in certain freely tradable offshore currencies, and letter of credit sublimits of \$100 million. The Parent Company provided a guarantee for this debt. As of December 31, 2001, \$20.0 million of the outstanding borrowings are denominated in Japanese yen, \$55.6 million are denominated in Euro, and \$15.7 million are denominated in Canadian dollars. Interest on the new credit facility is at the financial institutions' reference rate, LIBOR, or the Eurodollar rate plus a margin ranging from 0 to 200 basis

Edgar Filing: TOWER AUTOMOTIVE INC - Form 10-K405

points depending on the ratio of the consolidated funded debt for restricted subsidiaries of the Company to its total EBITDA. The weighted average interest rate for such borrowings was 7.3 percent and 7.0 percent for the years ended December 31, 2001 and 2000. The new credit agreement has a final maturity of 2006. As a result of the debt replacement, the Subsidiaries recorded an extraordinary loss, net of tax, of \$3.0 million during the third quarter of 2000.

In July 2000, R. J. Tower (the "Issuer"), a wholly-owned subsidiary of the Parent Company, issued Euro-denominated senior unsecured notes in the amount of E150 million (\$133.6 million at December 31, 2001). The notes bear interest at a rate of 9.25 percent, payable semi-annually. The notes rank equally with all of the Company's other unsecured and unsubordinated debt. The notes mature on August 1, 2010.

For the periods presented through July 24, 2000, the Subsidiaries' Credit Agreement included an amortizing revolving credit facility that provided for borrowings of up to \$750 million on an unsecured basis with a letter of credit sublimit of \$75 million. The Parent Company provided a guarantee for this debt. Interest on the credit facility was at the prime rate or LIBOR plus a margin ranging from 17 to 50 basis points depending upon the ratio of the consolidated indebtedness of the Company to its total capitalization.

Restrictions on Subsidiaries to Make Distributions to the Parent Company

Under the terms of the \$1.15 billion senior unsecured credit agreement described above, the Subsidiaries are restricted in their ability to dividend, loan or otherwise distribute assets, properties, cash, rights, obligations or securities to the Parent Company. These restrictions are subject to a number of important exceptions, including the ability of the Subsidiaries to: (i) purchase shares of the capital stock of the Parent and declare or pay cash dividends to the Parent Company in an aggregate amount equal to \$125,000,000 (provided that no event of default exists after giving effect to such action); (ii) declare and pay dividends to the Parent Company to be used to pay taxes and other expenses of the Parent Company and the Subsidiaries on a consolidated basis; and (iii) declare and pay dividends to the Parent Company to enable the Parent Company to make regularly scheduled interest payments or the payment of principal at maturity of any unsecured indebtedness issued by the Parent Company (including the Notes and the Debentures (see Note 3)), the proceeds of which are applied to the prepayment of the revolving loans, in each case (a) has no scheduled principal payments before July 25, 2006; (b) has no guaranty obligation by the borrower under the revolving credit facility; and (c) has terms and conditions which are acceptable to the principal lender under the revolving credit facility. As of December 31, 2001, the Subsidiaries could have paid up to approximately \$103 million to the Parent Company under the exception described in item (i) above.
