The returns shown in this report do not reflect the deduction of taxes that a shareholder would pay on fund distributions or the redemption of fund shares. Performance of share classes will vary due to differences in sales charges and expenses. Average annual total return with sales charges includes payment of the maximum sales charge of 4.75 percent for Class A shares, a contingent deferred sales charge of 4.00 percent for Class B shares (in years one and two and declining to zero after year five), a contingent deferred sales charge of 1.00 percent for Class C shares in year one and combined Rule 12b-1 fees and service fees of up to 0.25 percent for Class A shares and up to 1.00 percent for Class B

and C shares. The since inception and 10-year returns for Class B shares reflect the conversion of Class B shares into Class A shares six years after purchase. The since inception returns for Class C shares reflect the conversion of Class C shares into Class A shares 10 years after purchase. See footnote 3 in the Notes to Financial Statements for additional information. Figures shown above assume reinvestment of all dividends and capital gains. SEC yield is a calculation for determining the amount of portfolio income, excluding non-income items as prescribed by the SEC. Yields are subject to change.

J.P. Morgan Global High Yield Index is a broad-based index that reflects the general performance of the global high-yield corporate debt market. Lipper High Yield Bond Fund Index is an index of funds with similar return objectives as this fund. Indexes do not include any expenses, fees or sales charges, which would lower performance. Indexes are unmanaged and should not be considered an investment. Source: Lipper Inc.

### Fund Report

FOR THE 6-MONTH PERIOD ENDED FEBRUARY 28, 2005

Van Kampen High Yield Fund is managed by the Adviser's Taxable Fixed Income team. (1) Members of the team include Sheila A. Finnerty, Managing Director of the Adviser; Gordon Loery, Executive Director of the Adviser; and Joshua Givelber and Chad Liu, Vice Presidents of the Adviser.

### MARKET CONDITIONS

The high yield market saw strong performance for the six months ended February 28, 2005. The market was supported by strong fundamentals, as economic growth continued and defaults remained very low. Although new issuance levels remained high for much of the period, demand from yield-seeking investors resulted in this issuance being absorbed with little difficulty. This demand led to a general decline in yield spreads (the extra yield over Treasuries demanded by investors as compensation for assuming credit risk) over the period in spite of a steadily rising federal funds rate.

The high yield market weakened in January due to outflows from mutual funds, a declining equity market and the continuing high level of new issuance, causing high yield spreads to widen slightly and the index's yield to maturity to rise. In February, the high yield market went on to rebound, showing strong performance despite a declining Treasury market. High yield spreads tightened significantly for the month, and by the end of the period the high yield market reached near-record tightness in spreads.

### PERFORMANCE ANALYSIS

Van Kampen High Yield Fund returned 6.60 percent (Class A shares, assuming no front-end sales charge was paid), underperforming its benchmark, the J. P. Morgan Global High Yield Index and the Lipper High Yield Bond Fund Index, an index of funds with similar investment objectives, for the six months ended February 28, 2005. (See table below.)

TOTAL RETURN FOR THE SIX-MONTH PERIOD ENDING FEBRUARY 28, 2005

---

THE PERFORMANCE FOR THE THREE SHARE CLASSES VARIES BECAUSE EACH HAS DIFFERENT EXPENSES. THE FUND'S TOTAL RETURN FIGURES ASSUME THE REINVESTMENT OF ALL DISTRIBUTIONS, BUT DO NOT REFLECT THE DEDUCTION OF ANY APPLICABLE SALES CHARGES. SUCH COSTS WOULD LOWER PERFORMANCE. PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS. SEE PERFORMANCE SUMMARY FOR STANDARDIZED PERFORMANCE INFORMATION AND INDEX DEFINITIONS.

(1) Team members may change without notice at any time.

2

The bulk of the fund's underperformance was driven by its emphasis on less-risky securities. While the fund's credit ratings exposures were broadly similar to those of the J. P. Morgan Global High Yield Index, its portfolio emphasized the less yield-driven names that did not rally as strongly as the more speculative areas of the market. One example was airline bonds, which the fund has avoided since before the period due to concerns about these distressed companies' ability to pay interest on their debt. These were among the speculative parts of the market that enjoyed a brief rally during the period, and the fund's strategy limited its participation in that rally.

The fund's positive return was driven by strong security selection in several key sectors. Within cable, the fund benefited from allocations to several European cable companies which performed well. The fund also benefited from gains in holdings in the telecommunications and media sectors.

There is no guarantee the security sectors mentioned will continue to perform well or be held by the fund in the future.

### Expense Example

As a shareholder of the Fund, you incur two types of costs: (1) transaction costs, including sales charges (loads) on purchase payments of Class A Shares and contingent deferred sales charge on redemptions of Class B and C Shares; and (2) ongoing costs, including management fees; distribution and service (12b-1) fees; and other Fund expenses. This example is intended to help you understand your ongoing cost (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period 9/1/04 - 2/28/05.

### ACTUAL EXPENSE

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

### HYPOTHETICAL EXAMPLE FOR COMPARISON PURPOSES

The second line of the table below provides information about hypothetical

Edgar Filing: VAN KAMPEN HIGH YIELD FUND - Form N-CSRS

expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing cost of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads) or contingent deferred sales charges. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

(a) As required, effective September 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities and presenting paydown gains and losses on mortgage- and asset-backed securities as interest income. The effect of these changes for the period ended August 31, 2002 was to decrease the ratio of net investment income to average net assets from 10.49% to 10.39%. Net investment income per share and net realized gains and losses per share were unaffected by the adjustments. Per share, ratios and supplemental data for periods prior to August 31, 2002 have not been restated to reflect this change in presentation.

(b) Assumes reinvestment of all distributions for the period and does not include payment of the maximum sales charge of 4.75% or contingent deferred sales charge (CDSC). On purchases of \$1 million or more, a CDSC of 1% may be imposed on certain redemptions made within eighteen months of purchase. With respect to shares purchased prior to December 1, 2004, a CDSC of 1% may be imposed on certain redemptions made within one year of purchase. If the sales charges were included, total returns would be lower. These returns include Rule 12b-1 fees and service fees of up to .25% and do not reflect the deduction of taxes that a shareholder would pay on Fund distributions or the redemption of Fund shares.

VAN KAMPEN HIGH YIELD FUND

NOTES TO FINANCIAL STATEMENTS -- FEBRUARY 28, 2005 (UNAUDITED)

### 1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen High Yield Fund (the "Fund"), formerly Van Kampen High Income Corporate Bond Fund, is organized as a Delaware statutory trust, and is registered as a diversified, open-end management investment company under the Investment Company Act of 1940 (the "1940 Act"), as amended. The Fund's primary investment objective is to seek to maximize current income. Capital appreciation is a secondary objective which is sought only when consistent with the Fund's primary investment objective. The Fund commenced investment operations on October 2, 1978. The distribution of the Fund's Class B and Class C Shares commenced on July 2, 1992 and July 6, 1993, respectively. The Fund registered Class I Shares on September 1, 2004. There were no sales of Class I Shares for the period ended February 28, 2005.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION Fixed income investments and preferred stock are stated at value using market quotations or indications of value obtained from an independent pricing service. Investments in securities listed on a securities exchange are valued at their sale price as of the close of such securities exchange. Equity securities traded on NASDAQ are valued at the NASDAQ Official Closing Price. Unlisted securities and listed securities for which the last sales price is not available are valued at the mean of the last reported bid and asked price. For those securities where quotations or prices are not available, valuations are determined in accordance with procedures established in good faith by the Board of Trustees. Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. Forward foreign currency contracts are valued using quoted foreign exchange rates.

B. SECURITY TRANSACTIONS Security transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis. The Fund may purchase and sell securities on a "when-issued" or "delayed delivery" basis, with settlement to occur at a later date. The value of the security so purchased is subject to market fluctuations during this period. The Fund will segregate assets with the custodian having an aggregate value at least equal to

Edgar Filing: VAN KAMPEN HIGH YIELD FUND - Form N-CSRS

the amount of the when-issued or delayed delivery purchase commitments until payment is made. At February 28, 2005, the Fund had \$1,621,119 of when-issued, delayed delivery, or forward purchase commitments.

The Fund may invest in repurchase agreements, which are short-term investments in which the Fund acquires ownership of a debt security and the seller agrees to repurchase the security at a future time and specified price. The Fund may invest independently in repurchase agreements, or transfer uninvested cash balances into a pooled cash account along with other investment companies advised by Van Kampen Asset Management (the "Adviser") or its affiliates, the daily aggregate of which is invested in repurchase agreements. Repurchase agreements are fully collateralized by the underlying debt security. The Fund will make

23

VAN KAMPEN HIGH YIELD FUND

NOTES TO FINANCIAL STATEMENTS -- FEBRUARY 28, 2005 (UNAUDITED) continued

payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Fund.

C. INCOME AND EXPENSES Interest income is recorded on an accrual basis and dividend income is recorded on the ex-dividend date. Discounts on debt securities are accreted and premiums are amortized over the expected life of each applicable security. Income and expenses of the Fund are allocated on a pro rata basis to each class of shares, except for distribution and service fees and incremental transfer agency costs which are unique to each class of shares.

D. FEDERAL INCOME TAXES It is the Fund's policy to comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Fund intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At August 31, 2004, the Fund had an accumulated capital loss carryforward for tax purposes of \$361,788,463 which will expire according to the following schedule.

AMOUNT	EXPIRATION
\$ 5,614,460.....	August 31, 2007

120,089,012.....	August 31, 2011

E. DISTRIBUTION OF INCOME AND GAINS The Fund declares daily and pays monthly dividends from net investment income. Net realized gains, if any, are distributed annually. Distributions from net realized gains for book purposes may include short-term capital gains which are included in ordinary income for tax purposes.

For tax purposes, the determination of a return of capital distribution is made at the end of the Fund's fiscal year. Therefore, while it is likely that a portion of the Fund's distribution will ultimately be characterized as a return of capital for tax purposes, no such designation has been made for the six months ended February 28, 2005.

F. EXPENSE REDUCTIONS During the six months ended February 28, 2005, the Fund's custody fee was reduced by \$10,413 as a result of credits earned on cash balances.

G. FOREIGN CURRENCY TRANSLATION Asset and liabilities denominated in foreign currencies and commitments under forward foreign currency contracts are translated into U.S. dollars at the mean of the quoted bid and ask prices of such currencies against the U.S. dollar. Purchases and sales of portfolio securities are translated at the rate of exchange prevailing when such securities were acquired or sold. Realized gain and loss on foreign currency transactions on the Statement of Operations includes the net realized amount from the sale of foreign currency and the amount realized between trade date and settlement date on securities transactions. Income and expenses are translated at rates prevailing when accrued.

recognized expenses of approximately \$533,000 representing transfer agency fees paid to VKIS. Transfer agency fees are determined through negotiations with the Fund's Board of Trustees.

Certain officers and trustees of the Fund are also officers and directors of Van Kampen. The Fund does not compensate its officers or trustees who are also officers of Van Kampen.

The Fund provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Investments in such funds of \$249,834 are included in "Other" assets on the Statement of Assets and Liabilities at February 28, 2005. Appreciation/ depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Fund. Benefits under the retirement plan are payable upon retirement for a ten-year period and are based upon each trustee's years of service to the Fund. The maximum annual benefit per trustee under the plan is \$2,500.

## Edgar Filing: VAN KAMPEN HIGH YIELD FUND - Form N-CSRS

On December 17, 2004, the Fund acquired all of the assets and liabilities of the Van Kampen High Yield Fund ("High Yield") through a tax free reorganization approved by High Yield shareholders on December 7, 2004. The Fund issued 49,903,883, 21,224,359 and 7,028,101 shares of Classes A, B and C valued at \$186,141,484, \$79,591,347 and \$26,074,256, respectively, in exchange for High Yield's net assets. The shares of High Yield were converted into Fund shares at a ratio 1 to 1.515, 1 to 1.514 and 1 to 1.529 for Classes A, B and C, respectively. Net unrealized appreciation of High Yield as of December 17, 2004 was \$3,802,196. The Fund assumed High Yield's book to tax amortization differences, which resulted in a \$660,296 decrease to accumulated undistributed net investment income and a corresponding increase to net unrealized appreciation. Shares issued in connection with this reorganization are included in proceeds from shares sold for the six months ended February 28, 2005. Combined net assets of both funds on the day of reorganization were \$893,763,227.

#### 4. INVESTMENT TRANSACTIONS

During the period, the cost of purchases and proceeds from sales of investments, excluding short-term investments, were \$564,535,730 and \$285,728,083, respectively.

#### 5. DERIVATIVE FINANCIAL INSTRUMENTS

A derivative financial instrument in very general terms refers to a security whose value is "derived" from the value of an underlying asset, reference rate or index.

The Fund has a variety of reasons to use derivative instruments, such as to attempt to protect the Fund against possible changes in the market value of its portfolio, manage the Fund's effective yield, foreign currency exposure, maturity and duration or generate potential gain. All of the Fund's holdings, including derivative instruments, are marked to market each day with the change in value reflected in unrealized appreciation/depreciation. Upon disposition, a realized gain or loss is recognized accordingly, except when taking delivery of a

28

VAN KAMPEN HIGH YIELD FUND

NOTES TO FINANCIAL STATEMENTS -- FEBRUARY 28, 2005 (UNAUDITED) continued

security underlying a forward commitment. In this instance, the recognition of gain or loss is postponed until the disposal of the security underlying the forward commitment.

Purchasing securities on a forward commitment involves a risk that the market value at the time of delivery may be lower than the agreed upon purchase price resulting in an unrealized loss. Selling securities on a forward commitment involves different risks and can result in losses more significant than those arising from the purchase of such securities. Risks may arise as a result of the potential inability of the counterparties to meet the terms of their contracts.

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Upon the settlement of the contract, a realized gain or loss is recognized and is included as a component of realized gain/loss on forward foreign currency contracts. Risks may arise as a result of the potential inability of the counterparties to meet the terms of their contracts. Risks may also arise from

the unanticipated movements in the value of a foreign currency relative to the U.S. dollar.

The following forward foreign currency contracts were outstanding as of February 28, 2005:

### 6. DISTRIBUTION AND SERVICE PLANS

With respect to its Class A Shares, Class B Shares and Class C Shares, the Fund and its shareholders have adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act, as amended, and a service plan (collectively the "Plans"). The Plans govern payments for: the distribution of the Fund's Class A Shares, Class B Shares and Class C Shares; the provision of ongoing shareholder services with respect to such classes of shares; and maintenance of shareholder accounts with respect to such classes of shares.

Annual fees under the Plans of up to .25% of Class A average daily net assets and up to 1.00% each for Class B and Class C average daily net assets are accrued daily. The annual fees for Class A Shares are paid quarterly and the annual fees for Class C Shares are paid monthly. For Class B Shares, 75% of the annual fees are paid monthly, while 25% of the annual fees are paid quarterly. The amount of distribution expenses incurred by Van Kampen and not yet reimbursed ("unreimbursed receivable") was approximately \$4,174,300 and \$5,100 for Class B and Class C Shares, respectively. These amounts may be recovered from future payments under the

29

distribution plan or CDSC. To the extent the unreimbursed receivable has been fully recovered, any excess 12b-1 fees will be refunded to the Fund on a quarterly basis.

## Edgar Filing: VAN KAMPEN HIGH YIELD FUND - Form N-CSRS

Included in the fees for the six months ended February 28, 2005 are payments retained by Van Kampen of approximately \$820,600 and payments made to Morgan Stanley DW Inc., an affiliate of the Adviser, of approximately \$88,900.

### 7. LEGAL MATTERS

The Adviser, certain affiliates of the Adviser, and certain investment companies advised by the Adviser or its affiliates, including the Fund, are named as defendants in a number of similar class action complaints which were recently consolidated. The consolidated action also names as defendants certain individual Trustees and Directors of certain investment companies advised by affiliates of the Adviser; the complaint does not, however, name the individual Trustees of any Van Kampen funds. The consolidated amended complaint generally alleges that defendants violated their statutory disclosure obligations and fiduciary duties by failing properly to disclose (i) that the Adviser and certain affiliates of the Adviser allegedly offered economic incentives to brokers and others to steer investors to the funds advised by the Adviser or its affiliates rather than funds managed by other companies, and (ii) that the funds advised by the Adviser or its affiliates, including the Fund, allegedly paid excessive commissions to brokers in return for their alleged efforts to steer investors to these funds. The complaint seeks, among other things, unspecified compensatory damages, rescissionary damages, fees and costs.

The Adviser and certain affiliates of the Adviser are also named as defendants in a derivative suit which additionally names as defendants certain individual Trustees of certain Van Kampen funds; the named investment companies, including the Fund, are listed as nominal defendants. The complaint alleges that defendants caused the Van Kampen funds to pay economic incentives to a proprietary sales force to promote the sale of proprietary mutual funds. The complaint also alleges that the Van Kampen funds paid excessive commissions to Morgan Stanley and its affiliates in connection with the sales of the funds. The complaint seeks, among other things, the removal of the current Trustees of the funds, rescission of the management contracts for the funds, disgorgement of profits by Morgan Stanley and its affiliates and monetary damages. This complaint has been coordinated with the consolidated complaint described in the preceding paragraph. Plaintiff has sought leave to file a second amended derivative complaint that alleges that the Adviser permitted or recklessly disregarded market timing and late trading in its proprietary mutual funds in order to increase assets under management and fees. However, pursuant to an agreement between the parties, the plaintiff's proposed second amended derivative complaint was withdrawn and the allegations regarding market timing and late trading asserted therein were filed in a separate complaint and coordinated with other cases related to market timing that have been centralized in a federal court.

The defendants have moved to dismiss each of these actions and otherwise intend to defend them vigorously. While the defendants believe that they have meritorious defenses, the ultimate outcome of these matters is not presently determinable at this early stage of litigation, and no provision has been made in the Fund's financial statements for the effect, if any, of these matters.
