March 2007 Order Comments:

Order growth remained in the positive 5 to 10 percent range as order trends continued to match expectations. Favorable currency exchange rates contributed over 2 percentage points to the increase.

Process Management maintained double-digit order growth and continued to see balance across the portfolio with strength from the valve, measurement and systems businesses.

Order growth for Industrial Automation remained at high levels and was led by the power generating alternator and electrical distribution businesses. Orders also benefited from the weaker dollar.

Order growth increased for Network Power and continued to be led by the uninterruptible power supply (UPS), precision cooling and China power systems businesses.

Climate Technologies orders continued to trend positively as strength in Europe and Asia drove solid growth.

Appliance and Tools order growth remained in the 0 to 5 percent range. Strong growth in the tools business offset softness in the storage, motors and appliance businesses.
