Table of Contents**Fourth Quarter 2003**

	<u>Forecast Q4</u>	<u>Change Yr/Yr</u>
Alaska Airlines		
Capacity (ASMs in millions)	5,162	8.5%
Fuel gallons (000,000)	84.2	6.2%
Cost per ASM excluding fuel (cents)	8.6	(2.3%)

Alaska's October traffic increased 17.1% to 1.126 billion revenue passenger miles (RPMs) from 961.8 million flown a year earlier. Capacity during October was 1.722 billion available seat miles (ASMs), 9.3% higher than the 1.576 billion in October 2002.

The passenger load factor (the percentage of available seats occupied by fare paying passengers) for October 2003 was 65.4%, compared to 61.0% in October 2002. The airline carried 1,183,300 passengers compared to 1,054,500 in October 2002.

For October 2003, RASM increased by 8.1% as compared to October 2002. This increase in RASM is primarily due to an increase in load factor, partially offset by a slight decrease in yield.

Horizon Air		
Capacity (ASMs in millions)	604	(4.4%)
Fuel gallons (000,000)	12.7	(8.6%)
Cost per ASM excluding fuel (cents)	17.2	12.4%

During November and December of 2003, Horizon will complete the necessary transition to begin regional jet service as Frontier JetExpress effective January 1, 2004. These preparations are expected to result in a decrease in capacity levels and an increase in cost per ASM excluding fuel during the fourth quarter as compared to the same period in 2002.

Horizon's October traffic increased 14.8% to 139.0 million RPMs from 121.2 million flown a year earlier. Capacity for October was 210.8 million ASMs, 0.6% lower than last year's 212.2 million.

The passenger load factor for October 2003 was 66.0%, compared to 57.1% last October. The airline carried 429,400 passengers compared to 384,000 in October 2002.

For October 2003, RASM increased by 18.0% as compared to October 2002. This increase in RASM is primarily due to increases in yield and load factor.
