CORE MOLDING TECHNOLOGIES, INC.

(Exact name of registrant as specified in its charter)

Delaware

31-1481870

(State or other jurisdiction
incorporation or organization)

(I.R.S. Employer Identification No.)

800 Manor Park Drive, P.O. Box 28183
Columbus, Ohio

43228-0183

(Address of principal executive office)

(Zip Code)

Registrant's telephone number, including area code (614) 870-5000

N/A

Former name, former address and former fiscal year, if changed since last report.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ NO ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller Reporting Company ☒
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company as defined in Rule 12b-2 of the Act.

Yes ☐ NO ☒

As of August 8, 2008, the latest practicable date, 6,854,922 shares of the registrant's common shares were issued and outstanding.

Table of Contents

Core Molding Technologies, Inc. and Subsidiaries
Notes to Consolidated Financial Statements
(Unaudited)

1. Basis of Presentation

The accompanying unaudited consolidated financial statements have been prepared in accordance with the instructions to Form 10-Q and include all of the information and disclosures required by accounting principles generally accepted in the United States of America for interim reporting, which are less than those required for annual reporting. In the opinion of management, the accompanying unaudited consolidated financial statements contain all adjustments (all of which are normal and recurring in nature) necessary to present fairly the financial position of Core Molding Technologies, Inc. and its subsidiaries (Core Molding Technologies or the Company) at June 30, 2008, the results of operations for the three and six months ended June 30, 2008, and the cash flows for the six months ended June 30, 2008. The Consolidated Notes to Financial Statements, which are contained in the 2007 Annual Report to Shareholders, should be read in conjunction with these consolidated financial statements.

Core Molding Technologies and its subsidiaries operate in the plastics market in a family of products known as reinforced plastics. Reinforced plastics are combinations of resins and reinforcing fibers (typically glass or carbon) that are molded to shape. Core Molding Technologies operates four production facilities in Columbus, Ohio; Batavia, Ohio; Gaffney, South Carolina; and Matamoros, Mexico. The Columbus and Gaffney facilities produce reinforced plastics by compression molding sheet molding compound (SMC) in a closed mold process. The Batavia facility produces reinforced plastic products by a robotic spray-up open mold process and resin transfer molding (RTM) closed mold process utilizing multiple insert tooling (MIT). The Matamoros facility utilizes spray-up and hand lay-up open mold processes and RTM closed mold process to produce reinforced plastic products.

2. Net Income per Common Share

Net income per common share is computed based on the weighted average number of common shares outstanding during the period. Diluted net income per common share is computed similarly but include the effect of the assumed exercise of dilutive stock options and restricted stock under the treasury stock method.

The computation of basic and diluted net income per common share is as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2008	2007	2008	2007
Net income	\$ 1,716,261	\$ 1,266,133	\$ 2,580,414	\$ 2,478,903
Weighted average common shares outstanding	6,740,818	10,313,249	6,736,043	10,288,840
Plus: dilutive options assumed exercised	566,700	606,700	566,700	606,700
Less: shares assumed repurchased with proceeds from exercise	(287,011)	(325,699)	(288,024)	(302,985)
Plus: dilutive effect of nonvested restricted stock grants	44,108	24,194	41,714	24,082
Weighted average common and potentially issuable common shares outstanding	7,064,615	10,618,444	7,056,433	10,616,637
Basic net income per common share	\$ 0.25	\$ 0.12	\$ 0.38	\$ 0.24
Diluted net income per common share	\$ 0.24	\$ 0.12	\$ 0.37	\$ 0.23

For the six months ended June 30, 2008 and 2007 there were 28,200 and 33,000 antidilutive options, respectively.

Table of Contents**3. Sales**

Core Molding Technologies currently has two major customers, Navistar, Inc. (Navistar) formerly known as International Truck & Engine Corporation, and PACCAR, Inc. (PACCAR). Major customers are defined as customers whose sales individually consist of more than ten percent of total sales. The following table presents sales revenue for the above-mentioned customers for the six months ended June 30, 2008 and 2007:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Navistar product sales	\$ 16,624,481	\$ 11,289,338	\$ 30,099,452	\$ 23,719,615
Navistar tooling sales	36,522	7,869,493	2,793,471	8,143,381
Total Navistar sales	16,661,003	\$ 19,158,831	32,892,923	\$ 31,862,996
PACCAR product sales	7,668,656	6,364,693	15,074,287	14,210,671
PACCAR tooling sales	365,696	5,419,794	460,146	5,514,794
Total PACCAR sales	8,034,352	11,784,487	15,534,433	19,725,465
Other product sales	5,102,110	7,031,075	10,204,720	17,405,756
Other tooling sales	141,229	320,883	392,055	530,150
Total other sales	5,243,339	7,351,958	10,596,775	17,935,906
Total product sales	29,395,247	24,685,106	55,378,459	55,336,042
Total tooling sales	543,447	13,610,170	3,645,672	14,188,325
Total sales	\$ 29,938,694	\$ 38,295,276	\$ 59,024,131	\$ 69,524,367

4. Comprehensive Income

Comprehensive income represents net income plus the results of certain equity changes not reflected in the Consolidated Statements of Income. The components of comprehensive income, net of tax, are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Net income	\$ 1,716,261	\$ 1,266,133	\$ 2,580,414	\$ 2,478,903
Hedge accounting effect of interest rate swaps, net of deferred income tax expense of \$33,257, tax benefit of \$2,787 for the three and six months ended June 30, 2008 and deferred income tax expense of \$22,198 and \$13,017 for the three and six months ended June 30, 2007, respectively	64,559	39,018	(5,409)	20,923
Amortization of previously unrecognized postretirement plan loss, net of deferred tax expense of \$11,361 and \$22,722 for the three	20,638	42,910	41,277	85,817

and six months ended June 30, 2008 and net of deferred tax expense of \$24,877 and \$49,755 for the three and six months ended June 30, 2007, respectively.

Comprehensive income	\$ 1,801,458	\$ 1,348,061	\$ 2,616,282	\$ 2,585,643
----------------------	--------------	--------------	--------------	--------------

8

Table of Contents**5. Postretirement Benefits**

The components of expense for all of Core Molding Technologies' postretirement benefits plans for the six months ended June 30, 2008 and 2007 are as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
Pension expense:				
Defined contribution plan Contributions	\$ 122,000	\$ 107,000	\$ 249,000	\$ 227,000
Multi-employer plan Contributions	130,000	105,000	263,000	215,000
Total pension expense	252,000	212,000	512,000	442,000
Health and life insurance:				
Service cost	159,000	187,000	318,000	399,000
Interest cost	263,000	269,000	525,000	498,000
Amortization of net loss	32,000	55,000	64,000	135,000
Net periodic benefit cost	454,000	511,000	907,000	1032,000
Total postretirement benefits expense	\$ 706,000	\$ 723,000	\$ 1,419,000	\$ 1,474,000

Core Molding Technologies has made contributions of approximately \$568,000 to pension plans and \$197,000 of postretirement healthcare payments through June 30, 2008 and expects to make approximately \$280,000 of defined and multi-employer pension payments through the remainder of 2008. The Company also expects to make approximately \$292,000 of postretirement healthcare payments through the remainder of 2008, all of which are accrued.

6. Debt**Interest Rate Swaps**

In conjunction with its variable rate Industrial Revenue Bond (IRB) the Company has entered into an interest rate swap agreement, which is designated as a cash flow hedging instrument. Under this agreement, the Company pays a fixed rate of 4.89% to the counterparty and receives 76% of the 30-day commercial paper rate. The swap term and notional amount matches the payment schedule on the IRB with final maturity in April 2013. The difference paid or received varies as short-term interest rates change and is accrued and recognized as an adjustment to interest expense. While the Company is exposed to credit loss on its interest rate swap in the event of non-performance by the counterparty to the swap, management believes such non-performance is unlikely to occur given the financial resources of the counterparty. The effectiveness of the swap is assessed at each financial reporting date by comparing the commercial paper rate of the swap to the benchmark rate underlying the variable rate of the IRB. Any ineffectiveness of the swap is recorded as an adjustment to interest expense and historically has not been material. Interest expense of \$11,551 and interest income of \$4,345 was recorded for the six months ended June 30, 2008 and 2007, respectively, related to ineffectiveness of the swap. The fair value of the swap was a liability of \$218,069 and \$228,156 as of June 30, 2008 and December 31, 2007, respectively. None of the changes in fair value of the interest rate swap have been excluded from the assessment of hedge effectiveness.

Effective January 1, 2004, the Company entered into an interest rate swap agreement, which is designated as a cash flow hedge of the Company's bank note payable. Under this agreement, the Company pays a fixed rate of 5.75% to the counterparty and receives LIBOR plus 200 basis points. The swap term and notional amount match the payment schedule on the bank note payable with final maturity in January 2011. The interest rate swap is a highly effective

hedge because the amount, benchmark interest rate index, term, and repricing dates of both the interest rate swap and the hedged variable interest cash flows are exactly the same. The fair value of the swap was a liability of \$25,244 and an asset of \$4,590 as of June 30, 2008 and December 31, 2007 respectively. While the Company is exposed to credit loss on its interest rate swap in the event of non-performance by the counterparty to the swap, management believes that such non-performance is unlikely to occur given the financial resources of the counterparty.

Table of Contents**Line of Credit**

At June 30, 2008, the Company had available a \$15,000,000 variable rate bank revolving line of credit scheduled to mature on April 30, 2009. The line of credit bears interest at LIBOR plus 200 basis points. The line of credit is collateralized by all the Company's assets. At June 30, 2008 and December 31, 2007 there was an outstanding balance of \$2,162,499 and \$2,251,863, respectively. The outstanding balance on the line of credit is due April 2009; therefore the Company has classified the outstanding balance as a current liability on its consolidated balance sheet.

7. Income Taxes

On January 1, 2007, the Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48). As a result of the implementation of FIN 48 the Company recognized a \$68,000 increase to retained earnings. This increase is represented by the recognition of state tax benefits of \$212,000 and related accrued interest receivable of \$16,000. These benefits generated a federal tax liability of \$60,000. The Company also recorded a liability for unrecognized tax benefits of \$52,000 and \$48,000 related to uncertain state and foreign tax positions, respectively and the amounts were recorded in income tax receivable in the consolidated balance sheet. As of December 31, 2007, the unrecognized tax benefit liability had been reduced to \$24,000 due to the resolution of certain state and foreign tax matters. The unrecognized tax liability of \$24,000 was favorably settled during the three months ended June 30, 2008 and the unrecognized tax liability was credited to tax expense. There are no federal or state income tax audits in process.

The Company files income tax returns in the U.S. federal jurisdiction, Mexico and various state jurisdictions. The Company is no longer subject to U.S. federal and state income tax examinations by tax authorities for years before 2004 and is subject to income tax examinations by Mexican authorities since the Company began business in Mexico in 2001. The Company does not anticipate that the unrecognized tax benefits will significantly change within the next twelve months.

8. Stock Based Compensation

The Company has a Long Term Equity Incentive Plan (the 2006 Plan), as approved by the shareholders in May 2006. This 2006 Plan replaced the Long Term Equity Incentive Plan (the Original Plan) as originally approved by the shareholders in May 1997 and as amended in May 2000. The 2006 Plan allows for grants to directors and key employees of non-qualified stock options, incentive stock options, stock appreciation rights, restricted stock, performance shares, performance units and other incentive awards (Stock Awards) up to an aggregate of 3,000,000 awards, each representing a right to buy a share of Core Molding Technologies common stock. Stock Awards can be granted under the 2006 Plan through the earlier of December 31, 2015, or the date the maximum number of available awards under the 2006 Plan have been granted.

Stock Options

The following summarizes the activity relating to stock options under the plans mentioned above for the six months ended June 30, 2008:

	Number of Shares	Weighted Average Exercise Price
Outstanding at December 31, 2007	620,700	\$ 3.33
Exercised	(15,000)	3.15
Granted		
Forfeited	(10,800)	4.67
Outstanding at June 30, 2008	594,900	\$ 3.31
Exercisable at June 30, 2008	466,985	\$ 3.29

Table of Contents

The following summarizes the status of, and changes to, unvested options during the six months ended June 30, 2008:

	Number Of Shares	Weighted Average Exercise Price
Unvested at December 31, 2007	162,350	\$ 3.46
Granted		
Vested	(23,635)	3.24
Forfeited	(10,800)	4.67
Unvested at June 30, 2008	127,915	\$ 3.40

At June 30, 2008 and 2007, there was \$208,763 and \$359,984, respectively, of total unrecognized compensation cost, related to unvested stock options granted under the plans. Total compensation cost related to incentive stock options for the six months ended June 30, 2008 and 2007 was \$62,771 and, \$69,987, respectively. This compensation expense is allocated such that \$49,238 and \$56,129 are included in selling, general and administrative expenses and \$13,533 and \$13,858 are recorded in cost of sales for the six months ended June 30, 2008 and 2007, respectively.

Restricted Stock

In May of 2006, Core Molding Technologies began granting shares of its common stock to certain directors, officers, and key managers in the form of unvested stock (Restricted Stock). These awards are recorded at the market value of Core Molding Technologies common stock on the date of issuance and amortized ratably as compensation expense over the applicable vesting period.

The following summarizes the status of Restricted Stock grants as of June 30, 2008 and changes during the six months ended June 30, 2008:

	Number Of Shares	Weighted Average Grant Date Fair Value
Unvested balance at December 31, 2007	61,416	\$ 7.02
Granted	41,635	7.01
Vested	(5,919)	6.99
Forfeited		
Unvested at June 30, 2008	97,132	\$ 7.02

As of June 30, 2008 and 2007, there was \$477,398 and \$284,190, respectively, of total unrecognized compensation cost related to Restricted Stock granted under the 2006 Plan. The total compensation costs related to restricted stock grants for the six months ended June 30, 2008 and 2007 was \$105,491 and \$75,298, respectively, all of which was recorded to selling, general and administrative.

9. Common Stock

On July 18, 2007, the Company entered into a stock repurchase agreement with Navistar, pursuant to which the Company repurchased 3,600,000 shares of the Company's common stock, par value \$0.01 per share, from Navistar in a privately negotiated transaction at \$7.25 per share, for a total purchase price of \$26,100,000. The Company used approximately \$19 million of existing cash and \$7.1 million from its revolving line of credit to fund the repurchase. The Company also incurred approximately \$115,000 in costs related to the stock repurchase agreement, which is recorded on the balance sheet in treasury stock.

Navistar continues to be a significant stockholder of the Company's common stock with 664,000 shares, or approximately 9.8% of the shares outstanding at June 30, 2008. Navistar is also the Company's largest customer, accounting for approximately 56% of the Company's 2008 year-to-date sales.

Table of Contents

On July 16, 2007, the Board of Directors approved a Shareholders Rights Plan (the Plan) in conjunction with the approval of the repurchase of shares of stock from Navistar. The Plan was implemented to protect the interests of the Company's stockholders by encouraging potential buyers to negotiate directly with the Board prior to attempting a takeover. Under the Plan, each shareholder will receive a dividend of one right per share of common stock of the Company owned on the record date, July 18, 2007. The rights will not initially be exercisable until, subject to action by the Board of Directors, a person acquires 15% or more of the voting stock without approval of the Board. If the rights become exercisable, all holders except the party triggering the rights shall be entitled to purchase shares of the Company at a discount. Each right entitles the registered holder to purchase from the Company a unit consisting of one one-thousandth of a share of Series A Junior Participating Preferred Stock, par value \$0.01 per share. In connection with the adoption of the Rights Agreement, on July 18, 2007, the Company filed a Certificate of Designations of Series A Junior Participating Preferred Stock with the Secretary of State of the State of Delaware.

10. Subsequent Event

On July 1, 2008 the Company announced that it has signed a letter of intent to purchase 22 acres of land and construct a manufacturing facility in Matamoros, Mexico. The Company plans to invest approximately \$20.2 million in the new facility that will replace its existing leased facility in Matamoros and add compression molding capabilities. To finance this purchase, the Company has received bank financing commitments for new borrowings. Upon finalization of a definitive construction contract and land purchase agreement these new borrowings will be finalized. On August 1, 2008 the Company obtained a Letter of Credit from a bank for \$3,544,300 securing a steel vendor to begin fabricating the new building's infrastructure. This Letter of Credit expires November 30, 2008 and while in place will reduce the amount available on the Company's existing \$15 million Line-of-Credit by \$3,544,300.

In late July Matamoros, Mexico was subject to the effects of Hurricane Dolly. Although the Company's production facility in Matamoros did not suffer significant damage the Company did stop production for two days with no customer issues. The Company did incur an approximate one week delay in progress toward the above noted construction project.

11. Recent Accounting Pronouncements

In July 2006, the FASB issued Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, which clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 provides guidance on the financial statement recognition and measurement of a tax position taken, or expected to be taken, in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition. This interpretation is effective for fiscal years beginning after December 15, 2006, and became effective for the Company on January 1, 2007. For benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. The impact of the adoption of FIN 48 is discussed in Note 7.

In September 2006, the FASB issued Statement No. 157 to define fair value, establish a framework for measuring fair value and to expand disclosures about Fair Value Measurements (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 does not change the requirements to apply fair value in existing accounting standards. Under SFAS No. 157, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts. The standard clarifies that fair value should be based on the assumptions market participants would use when pricing the asset or liability. To increase consistency and comparability in fair value measurements, SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy disclosed is based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy defined by SFAS No. 157 are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical asset or liabilities that the company has the ability to access as of the reporting date.

Table of Contents

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly through corroboration with observable market data.

Level 3 inputs are unobservable inputs, such as internally developed pricing models for the asset or liability due to little or no market activity for the asset or liability.

SFAS No. 157 became effective for the Company as of January 1, 2008. The provisions of SFAS No. 157 are to be applied prospectively, except for the initial impact on the following three items, which are required to be recorded as an adjustment to the opening balance of retained earnings in the year of adoption: (1) changes in fair value measurements of existing derivative financial instruments measured initially using the transaction price under EITF Issue No. 02-3, (2) existing hybrid financial instruments measured initially at fair value using the transaction price and (3) blockage factor discounts. Under the current disclosure requirements of SFAS 157, the Company's lone fair value measure is its interest rate swaps. The swaps fall under Level 2 of the fair value hierarchy. For further discussion of the interest rate swaps see Note 6. The adoption of SFAS No. 157 did not have an impact on the Company's January 1, 2008 balance of retained earnings and is not anticipated to have a material impact prospectively.

In February 2008, the FASB issued FASB Staff Position No. FAS 157-2 (FSP 157-2), Effective Date of FASB Statement No. 157 , which provides a one year deferral of the effective date of SFAS No. 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. In accordance with this interpretation, we have only adopted the provisions of SFAS No. 157 with respect to our financial assets and financial liabilities that are measured at fair value as of the beginning of fiscal year 2008. The provisions of SFAS No. 157 have not been applied to non-financial assets and non-financial liabilities. The major categories of non-financial assets and non-financial liabilities that are measured at fair value, for which we have not applied the provisions of SFAS No. 157, are as follows: reporting units measured at fair value in the first step of a goodwill impairment test and long-lived assets measured at fair value for an impairment assessment.

Statement No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (FAS-159), provides companies with an option to report selected financial assets and liabilities at fair value. The objective of FAS-159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. FAS-159 was issued in February 2007 and is effective for fiscal years beginning after November 15, 2007. The application of FAS-159 did not have any impact on earnings or the financial position, because the Company did not elect to use the fair value option for any financial assets or liabilities.

In December 2007, the FASB issued SFAS No. 141R to improve the relevance, representational faithfulness, and comparability of information that a reporting entity provides in its financial reports regarding business combinations and its effects, including recognition of assets and liabilities, the measurement of goodwill and required disclosures. This Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008 and earlier adoption is prohibited. Management is currently evaluating the impact of the provisions of SFAS No. 141R on the consolidated financial statements.

Statement No. 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133 (FAS-161), requires enhanced disclosures about an entity's derivative and hedging activities and thereby improves the transparency of financial reporting. The Statement was issued in March 2008 and is effective prospectively for fiscal years beginning after November 15, 2008. Management is currently evaluating the impact of the provisions of FAS-161 on the consolidated financial statements.

In April 2008, the FASB issued FSP FAS 142-3, *Determination of the Useful Life of Intangible Assets* . FSP FAS 142-3 amends the factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS No. 142, *Goodwill and Other Intangible Assets* . This guidance for determining the useful life of a recognized intangible asset applies prospectively to intangible assets acquired individually or with a group of other assets in either an asset acquisition or business combination. FSP FAS 142-3 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2008, and early adoption is prohibited. We are currently evaluating the impact FSP FAS 142-3 will have on our Consolidated Financial Statements.

Table of Contents

In May 2008, the FASB issued Statement of Financial Accounting Standards No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (FAS 162). This Standard identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles. FAS 162 directs the hierarchy to the entity, rather than the independent auditors, as the entity is responsible for selecting accounting principles for financial statements that are presented in conformity with generally accepted accounting principles. The Standard is effective 60 days following SEC approval of the Public Company Accounting Oversight Board amendments to remove the hierarchy of generally accepted accounting principles from the auditing standards. FAS 162 is not expected to have an impact on the Company's financial condition, results of operations or cash flows.

Part I Financial Information
Item 2

Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis of Financial Conditions and Results of Operations contains certain forward-looking statements within the meaning of the federal securities laws. As a general matter, forward-looking statements are those focused upon future plans, objectives or performance as opposed to historical items and include statements of anticipated events or trends and expectations and beliefs relating to matters not historical in nature. Such forward-looking statements involve known and unknown risks and are subject to uncertainties and factors relating to Core Molding Technologies operations and business environment, all of which are difficult to predict and many of which are beyond Core Molding Technologies' control. These uncertainties and factors could cause Core Molding Technologies' actual results to differ materially from those matters expressed in or implied by such forward-looking statements.

Core Molding Technologies believes that the following factors, among others, could affect its future performance and cause actual results to differ materially from those expressed or implied by forward-looking statements made in this quarterly report: business conditions in the plastics, transportation, watercraft and commercial product industries; general economic conditions in the markets, sometimes driven by federal and state regulations (including engine emission regulations) in which Core Molding Technologies operates; dependence upon two major customers as the primary source of Core Molding Technologies' sales revenues; recent efforts of Core Molding Technologies to expand its customer base; failure of Core Molding Technologies' suppliers to perform their contractual obligations; the availability of raw materials; inflationary pressures; new technologies; competitive and regulatory matters; labor relations; the loss or inability of Core Molding Technologies to attract and retain key personnel; compliance changes to federal, state and local environmental laws and regulations; the availability of capital; the ability of Core Molding Technologies to provide on-time delivery to customers, which may require additional shipping expenses to ensure on-time delivery or otherwise result in late fees; risk of cancellation or rescheduling of orders; management's decision to pursue new products or businesses which involve additional costs, risks or capital expenditures; and other risks identified from time-to-time in Core Molding Technologies' other public documents on file with the Securities and Exchange Commission, including those described in Item 1A of the 2007 Annual Report to Shareholders on Form 10-K.

Overview

Core Molding Technologies is a compounder of sheet molding composite (SMC) and molder of fiberglass reinforced plastics. Core Molding Technologies produces high quality fiberglass reinforced molded products and SMC materials for varied markets, including light, medium, and heavy-duty trucks, automobiles and automotive aftermarkets, personal watercraft, and other commercial products. The demand for Core Molding Technologies' products is affected by economic conditions in the United States, Canada and Mexico, the cyclical nature of markets we serve, regulatory requirements, interest rates and other factors. Core Molding Technologies' manufacturing operations have a significant fixed cost component. Accordingly, during periods of changing demands, the profitability of Core Molding Technologies' operations may change proportionately more than revenues from operations.

On December 31, 1996, Core Molding Technologies acquired substantially all of the assets and assumed certain liabilities of Columbus Plastics, a wholly owned operating unit of Navistar's truck manufacturing division since its formation in late 1980. Columbus Plastics, located in Columbus, Ohio, was a compounder and compression molder of SMC. In 1998 Core Molding Technologies began compression molding operations at its second facility in Gaffney, South Carolina, and in October 2001, Core Molding Technologies acquired certain assets of Airshield Corporation. As a result of this acquisition, Core Molding Technologies expanded its fiberglass molding capabilities to include the spray up, hand-lay-up open mold processes and resin transfer (RTM) closed mold process. In September 2004, Core Molding Technologies acquired substantially all the operating assets of Keystone Restyling Products, Inc., a privately held manufacturer and distributor of fiberglass reinforced products for the automotive-aftermarket industry. In August 2005, Core Molding Technologies acquired certain assets of the Cincinnati Fiberglass Division of Diversified Glass, Inc. a Batavia, Ohio-based, privately held manufacturer and distributor of fiberglass reinforced plastic components supplied primarily to the heavy-duty truck market. The Batavia, Ohio facility produces reinforced plastic

products by a robotic spray-up open mold process and resin transfer molding (RTM) utilizing multiple insert tooling (MIT) closed mold process.

Table of Contents

Core Molding Technologies recorded net income for the six months ended June 30, 2008 of \$2,580,000 or \$.38 per basic and \$.37 per diluted share, compared with \$2,479,000, or \$.24 per basic and \$.23 per diluted share, for the six months ended June 30, 2007. In July 2007, the Company purchased 3,600,000 shares of its stock from Navistar. This share repurchase resulted in a favorable impact on earnings per share for the six months ended June 30, 2008 compared to June 30, 2007, due to lower outstanding shares. Core Molding Technologies is planning for a recovery in the medium and heavy-duty truck market in late 2008 or early 2009. While industry analysts are forecasting an increase in truck orders for this time period, the Company recognizes that this expectation should be balanced in light of an uncertain U.S. economy.

Results of Operations

Three Months Ended June 30, 2008, As Compared To Three Months Ended June 30, 2007

Net sales for the three months ended June 30, 2008, totaled \$29,939,000, representing an approximate 22% decrease from the \$38,295,000 reported for the three months ended June 30, 2007. Included in total sales are tooling project sales of \$543,000 and \$13,610,000 for the three months ended June 30, 2008 and June 30, 2007, respectively. Tooling project sales result from billings to customers for molds and assembly equipment built specifically for their products. These sales are sporadic in nature. Total product sales, excluding tooling project sales, were approximately 19% higher for the three months ended June 30, 2008, as compared to the same period a year ago. The increase in product sales is primarily due to increased volume for programs started in 2007 and some improvement in the overall truck market.

Sales to Navistar totaled \$16,661,000 for the three months ended June 30, 2008, decreasing 13% from \$19,159,000 in sales for the three months ended June 30, 2007. Included in total sales is \$37,000 of tooling sales for the three months ended June 30, 2008 compared to \$7,869,000 for the same three months in 2007. Product sales to Navistar increased by 47% for the three months ended June 30, 2008 versus the same period of the prior year. The increase in product sales is primarily due to increased volume for programs started in 2007, as well as an improvement in the demand for Navistar products.

Sales to PACCAR totaled \$8,034,000 for the three months ended June 30, 2008, decreasing 32% from \$11,784,000 in sales for the three months ended June 30, 2007. Included in total sales is \$366,000 of tooling sales for the three months ended June 30, 2008 compared to \$5,420,000 for the same three months in 2007. Product sales to PACCAR increased by 20% for the three months ended June 30, 2008 compared to the same period of the prior year. The increase in product sales is primarily due to increased volume for programs started in 2007.

Sales to other customers for the three months ended June 30, 2008 decreased 29% to \$5,243,000 compared to \$7,352,000 for the three months ended June 30, 2007. This decrease is primarily related to decreases in product sales to a personal watercraft customer of approximately \$1,976,000, as well as decreases in sales to other truck and commercial customers.

Gross margin was approximately 19% of sales for the three months ended June 30, 2008, compared with 12% for the three months ended June 30, 2007. The increase was due to a combination of factors including favorable operating efficiencies, fixed cost absorption as well as the dilutive effect tooling project revenues had on gross margin in 2007. Historically, the Company has not achieved margins on tooling projects similar to margins on its sales of SMC and molded products.

Selling, general and administrative expenses (SG&A) totaled \$2,994,000 for the three months ended June 30, 2008, increasing from \$2,787,000 for the three months ended June 30, 2007. The increase was primarily due to increases in the Company's profit sharing amounts resulting from improved earnings for the three months ended June 30, 2008 compared to the three months ended June 30, 2007.

Net interest expense totaled \$132,000 for the three months ended June 30, 2008, compared to net interest income of \$122,000 for the three months ended June 30, 2007. The Company had no interest income for the three months ended June 30, 2008 compared to \$248,000 for the three months ended June 30, 2007 due to cash previously used for investing being used to repurchase Core Molding Technologies stock from Navistar in July of 2007. Interest expense increased to \$132,000 compared to \$126,000 for the three months ended June 30, 2007. The increase in interest expense is primarily a result of borrowings on the line of credit which were used to finance a portion of the stock repurchase from Navistar. Variable interest rates experienced by Core Molding Technologies with respect to its two

long-term borrowing facilities have decreased; however, due to the interest rate swaps Core Molding Technologies has previously entered into, the interest rate is essentially fixed for these two debt instruments.

Table of Contents

Income taxes for the three months ended June 30, 2008, are estimated to be approximately 31% of total earnings before taxes or \$778,000. In the three months ended June 30, 2007 income taxes were estimated to be 35% of total earnings before taxes or \$674,000. The decrease in the effective tax rate is due to an increase in the deduction available to manufacturers under section 199 of the Internal Revenue Code, decreases in the Company's effective state tax rates, as well as tax preference items that occurred during the quarter, including the favorable settlement of a FIN 48 liability.

Core Molding Technologies recorded net income for the three months ended June 30, 2008 of \$1,716,000 or \$.25 per basic and \$.24 per diluted share, compared with \$1,266,000, or \$.12 per basic and \$.12 per diluted share, for the three months ended June 30, 2007. Weighted average shares outstanding decreased from 10,313,249 in the second quarter 2007, to 6,740,818 in the same period in 2008 primarily due to the 3,600,000 shares of common stock purchased from Navistar in July 2007. This stock purchase has had a net favorable effect on earnings per share for the three months ended June 30, 2008.

Six Months Ended June 30, 2008, As Compared To Six Months Ended June 30, 2007

Net sales for the six months ended June 30, 2008, totaled \$59,024,000, representing an approximate 15% decrease from the \$69,524,000 reported for the six months ended June 30, 2007. Included in total sales are tooling project sales of \$3,646,000 and \$14,188,000 for the six months ended June 30, 2008 and June 30, 2007, respectively. Tooling project sales result from billings to customers for molds and assembly equipment built specifically for their products. These sales are sporadic in nature. Total product sales, excluding tooling project sales, were \$55,378,000 for the six months ended June 30, 2008 as compared to \$55,336,000 for the six months ended June 30, 2007.

Sales to Navistar totaled \$32,893,000 for the six months ended June 30, 2008, as compared to \$31,863,000 for the six months ended June 30, 2007. Included in total sales are \$2,793,000 of tooling sales for the six months ended June 30, 2008 compared to \$8,143,000 for the six months ended June 30, 2007. Total product sales to Navistar increased by 27% for the six months ended June 30, 2008 compared to the six months ended June 30, 2007. The increase in product sales is primarily due to increased volume for programs started in 2007.

Sales to PACCAR totaled \$15,534,000 for the six months ended June 30, 2008, as compared to \$19,725,000 reported for the six months ended June 30, 2007. Included in total sales are \$460,000 of tooling sales for the six months ended June 30, 2008 compared to \$5,515,000 for the six months ended June 30, 2007. Total product sales to PACCAR increased by 6% for the six months ended June 30, 2008 compared to the six months ended June 30, 2007. The increase in product sales is due to increased volume for programs started in 2007.

Sales to other customers for the six months ended June 30, 2008, decreased approximately 41% to \$10,597,000 from \$17,936,000 for the six months ended June 30, 2007. This decrease is primarily related to decreases in product sales to a personal watercraft customer of approximately \$4,023,000, a decrease in product sales to an automotive customer of \$1,152,000 as well as decreases in sales to other truck and commercial customers.

Gross margin was approximately 17% of sales for the six months ended June 30, 2008, compared with 14% for the six months ended June 30, 2007. The increase was due to a combination of factors including production efficiencies and higher fixed cost absorption due to product sales volumes. Our manufacturing operations have significant fixed costs such as depreciation, post retirement healthcare costs, salary labor, lease expense and energy that do not change proportionately with sales. Also contributing to the increase in gross margin was the dilutive effect tooling project revenue has on gross margin for the six months ended June 30, 2007. Historically, Core Molding Technologies has not achieved margins on tooling projects similar to margins on its sales of SMC and molded products.

Selling, general and administrative expenses (SG&A) totaled \$5,808,000 for the six months ended June 30, 2008, decreasing from \$5,879,000 for the six months ended June 30, 2007.

Net interest expense totaled \$361,000 for the six months ended June 30, 2008, compared to net interest income of \$230,000 for the six months ended June 30, 2007. The Company had no interest income for the six months ended June 30, 2008 compared to \$493,000 for the six months ended June 30, 2007 due to cash previously used for investing being used to repurchase Core Molding Technologies stock from Navistar in July of 2007. Interest expense increased to \$361,000 compared to \$263,000 for the six months ended June 30, 2007. The increase in interest expense is primarily a result of borrowings on the line of credit which were used to finance a portion of the stock repurchase from Navistar. Variable interest rates experienced by Core Molding Technologies with respect to its two long-term

borrowing facilities have decreased; however, due to the interest rate swaps Core Molding Technologies has entered into, the interest rate is essentially fixed for these two debt instruments.

Table of Contents

Income taxes for the six months ended June 30, 2008, are estimated to be approximately 32% of total earnings before taxes or \$1,187,000. In the six months ended June 30, 2007 income taxes were estimated to be 35% of total earnings before taxes or \$1,303,000. The decrease in the effective tax rate is due to an increase in the deduction available to manufacturers under section 199 of the Internal Revenue Code, decreases in the Company's effective state tax rates, as well as tax preference items that occurred during the quarter, including the favorable settlement of a FIN 48 liability. Core Molding Technologies recorded net income for the six months ended June 30, 2008 of \$2,580,000 or \$.38 per basic and \$.37 per diluted share, compared with \$2,479,000, or \$.24 per basic and \$.23 per diluted share, for the six months ended June 30, 2007. Weighted average shares outstanding decreased from 10,288,840 in the second quarter 2007, to 6,736,043 in the same period in 2008 primarily due to the 3,600,000 shares of common stock purchased from Navistar in July 2007. This stock purchase has had a net favorable effect on earnings per share for the six months ended June 30, 2008.

Liquidity and Capital Resources

The Company's primary sources of funds have been cash generated from operating activities and borrowings from third parties. Primary cash requirements are for operating expenses and capital expenditures. While the current capital markets have been adversely impacted by a variety of economic factors, the Company believes that it will continue to have access to traditional bank financing.

Cash provided by operating activities for the six months ended June 30, 2008 totaled \$1,543,000. Net income contributed \$2,580,000 to operating cash flow. Non-cash deductions of depreciation and amortization also contributed \$1,805,000 to operating cash flow. In addition, the increase in the postretirement healthcare benefits liability of \$710,000 is not a current cash obligation, and this item will not be a cash obligation until additional employees retire and begin to utilize these benefits. Changes in working capital decreased cash provided by operating activities by \$3,578,000. Changes in working capital primarily relate to an increase in accounts receivable due to increased product sales for the six months ended June 30, 2008 compared to the fourth quarter of 2007 which is partially offset by lower inventory levels.

Cash used in investing activities for the six months ended June 30, 2008 was \$573,000, primarily representing purchases of machinery and equipment. On July 1, 2008 the Company announced that it has signed a letter of intent to purchase 22 acres of land and construct a manufacturing facility in Matamoros Mexico. The Company plans to invest approximately \$20.2 million in the new facility that will replace its existing leased facility in Matamoros and add compression molding capabilities. To finance this purchase, the Company has received bank financing commitments for new borrowings. The Company also plans to spend an additional \$1,694,000 for the remainder of the year for other approved capital projects, which primarily relate to purchases of machinery and equipment. These capital additions will be funded by cash from operations and borrowings on the Company's line of credit. The Company may also undertake other capital improvement projects in the future as deemed necessary and appropriate.

Financing activities decreased cash by \$970,000. This decrease is related to principal repayments on its secured note payable of \$643,000 and its industrial revenue bond of \$285,000. Additionally, cash was also used to make payments to reduce the line of credit by \$89,000.

At June 30, 2008, the Company had no cash on hand and a line of credit of \$15,000,000, with a scheduled maturity of April 30, 2009. At June 30, 2008, Core Molding Technologies had outstanding borrowings of \$2,162,000 on this line of credit.

As of June 30, 2008, the Company was in compliance with its financial debt covenants for the secured note payable, the line of credit and letter of credit securing the industrial revenue bond and certain equipment leases. The covenants relate to maintaining certain financial ratios. Management expects Core Molding Technologies to meet these covenants for the year 2008. However, if a material adverse change in the financial position of Core Molding Technologies should occur, Core Molding Technologies' liquidity and ability to obtain further financing to fund future operating and capital requirements could be negatively impacted.

Recently Issued Accounting Standards

In July 2006, the FASB issued Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, which clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes*. FIN 48 provides guidance on the financial statement recognition and measurement of a tax position taken, or expected to be taken, in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures, and transition. This interpretation is effective for fiscal years beginning after December 15, 2006, and became effective for the Company on January 1, 2007. For benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. The amount recognized is measured as the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. The impact of the adoption of FIN 48 is discussed in Note 7.

In September 2006, the FASB issued SFAS No. 157 to define fair value, establish a framework for measuring fair value and to expand disclosures about fair value measurements. SFAS No. 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS No. 157 does not change the requirements to apply fair value in existing accounting standards. Under SFAS No. 157, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts. The standard clarifies that fair value should be based on the assumptions market participants would use when pricing the asset or liability.

To increase consistency and comparability in fair value measurements, SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels. The level in the fair value hierarchy disclosed is based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy defined by SFAS No. 157 are as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical asset or liabilities that the company has the ability to access as of the reporting date.

Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly through corroboration with observable market data.

Level 3 inputs are unobservable inputs, such as internally developed pricing models for the asset or liability due to little or no market activity for the asset or liability.

SFAS No. 157 became effective for the Company as of January 1, 2008. The provisions of SFAS No. 157 are to be applied prospectively, except for the initial impact on the following three items, which are required to be recorded as an adjustment to the opening balance of retained earnings in the year of adoption: (1) changes in fair value measurements of existing derivative financial instruments measured initially using the transaction price under EITF Issue No. 02-3, (2) existing hybrid financial instruments measured initially at fair value using the transaction price and (3) blockage factor discounts. Under the current disclosure requirements of SFAS 157, the Company's lone fair value measure is its interest rate swaps. The swaps fall under Level 2 of the fair value hierarchy. For further discussion of the interest rate swaps see Note 6. The adoption of SFAS No. 157 did not have an impact on the Company's January 1, 2008 balance of retained earnings and is not anticipated to have a material impact prospectively.

In February 2008, the FASB issued FASB Staff Position No. FAS 157-2 (FSP 157-2), *Effective Date of FASB Statement No. 157*, which provides a one year deferral of the effective date of SFAS No. 157 for non-financial assets and non-financial liabilities, except those that are recognized or disclosed in the financial statements at fair value at least annually. In accordance with this interpretation, we have only adopted the provisions of SFAS No. 157 with respect to our financial assets and financial liabilities that are measured at fair value as of the beginning of fiscal year 2008. The provisions of SFAS No. 157 have not been applied to non-financial assets and non-financial liabilities. The major categories of non-financial assets and non-financial liabilities that are measured at fair value, for which we have not applied the provisions of SFAS No. 157, are as follows: reporting units measured at fair value in the first step of a goodwill impairment test and long-lived assets measured at fair value for an impairment assessment.

Table of Contents

Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (FAS-159), provides companies with an option to report selected financial assets and liabilities at fair value. The objective of FAS-159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. FAS-159 was issued in February 2007 and is effective for fiscal years beginning after November 15, 2007. The application of FAS-159 did not have any impact on earnings or the financial position, because the Company did not elect to use the fair value option for any financial assets or liabilities.

In December 2007, the FASB issued SFAS No. 141R to improve the relevance, representational faithfulness, and comparability of information that a reporting entity provides in its financial reports regarding business combinations and its effects, including recognition of assets and liabilities, the measurement of goodwill and required disclosures. This Statement is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008 and earlier adoption is prohibited. Management is currently evaluating the impact of the provisions of SFAS No. 141R on the consolidated financial statements.

Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities*, an amendment of FASB Statement No. 133 (FAS-161), requires enhanced disclosures about an entity's derivative and hedging activities and thereby improves the transparency of financial reporting. The Statement was issued in March 2008 and is effective prospectively for fiscal years beginning after November 15, 2008. Management is currently evaluating the impact of the provisions of FAS-161 on the consolidated financial statements.

In April 2008, the FASB issued FSP FAS 142-3, *Determination of the Useful Life of Intangible Assets*. FSP FAS 142-3 amends the factors an entity should consider in developing renewal or extension assumptions used in determining the useful life of recognized intangible assets under SFAS No. 142, *Goodwill and Other Intangible Assets*. This guidance for determining the useful life of a recognized intangible asset applies prospectively to intangible assets acquired individually or with a group of other assets in either an asset acquisition or business combination. FSP FAS 142-3 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2008, and early adoption is prohibited. We are currently evaluating the impact FSP FAS 142-3 will have on our Consolidated Financial Statements.

In May 2008, the FASB issued Statement of Financial Accounting Standards No. 162, *The Hierarchy of Generally Accepted Accounting Principles* (FAS 162). This Standard identifies the sources of accounting principles and the framework for selecting the principles to be used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles. FAS 162 directs the hierarchy to the entity, rather than the independent auditors, as the entity is responsible for selecting accounting principles for financial statements that are presented in conformity with generally accepted accounting principles. The Standard is effective 60 days following SEC approval of the Public Company Accounting Oversight Board amendments to remove the hierarchy of generally accepted accounting principles from the auditing standards. FAS 162 is not expected to have an impact on our financial condition, results of operations or cash flows.

Critical Accounting Policies and Estimates

Management's Discussion and Analysis of Financial Condition and Results of Operations discuss the Company's consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. On an on-going basis, management evaluates its estimates and judgments, including those related to accounts receivable, inventories, post retirement benefits, and income taxes. Management bases its estimates and judgments on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Management believes the following critical accounting policies, among others, affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Accounts receivable allowances: Management maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of the Company's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances

Table of Contents

may be required. The Company recorded an allowance for doubtful accounts of \$253,000 at June 30, 2008 and \$334,000 at December 31, 2007. Management also records estimates for customer returns and deductions, discounts offered to customers, and for price adjustments. Should customer returns and deductions, discounts, and price adjustments fluctuate from the estimated amounts, additional allowances may be required. The Company has reduced accounts receivable for chargebacks by \$1,566,000 at June 30, 2008 and \$1,576,000 at December 31, 2007.

Inventories: Inventories, which include material, labor and manufacturing overhead, are valued at the lower of cost or market. The inventories are accounted for using the first-in, first-out (FIFO) method of determining inventory costs. Inventory quantities on-hand are regularly reviewed, and where necessary, provisions for excess and obsolete inventory are recorded based on historical and anticipated usage.

Goodwill and Long-Lived Assets: Management evaluates whether impairment exists for goodwill and long-lived assets annually on December 31. Should actual results differ from the assumptions used to determine impairment, additional provisions may be required. In particular, decreases in future cash flows from operating activities below the assumptions could have an adverse effect on the Company's ability to recover its long-lived assets. The Company has not recorded any impairment to goodwill or long-lived assets for the six months ended June 30, 2008.

Self-Insurance: The Company is self-insured with respect to most of its Columbus and Batavia, Ohio and Gaffney, South Carolina medical and dental claims and Columbus and Batavia, Ohio workers' compensation claims. The Company has recorded an estimated liability for self-insured medical and dental claims incurred but not reported and workers' compensation claims incurred but not reported at June 30, 2008 and December 31, 2007 of \$1,099,000 and \$1,141,000, respectively.

Post retirement benefits: Management records an accrual for postretirement costs associated with the health care plan sponsored by Core Molding Technologies. Should actual results differ from the assumptions used to determine the reserves, additional provisions may be required. In particular, increases in future healthcare costs above the assumptions could have an adverse effect on Core Molding Technologies' operations. The effect of a change in healthcare costs is described in Note 11 of the Consolidated Notes to Financial Statements, which are contained in the 2007 Annual Report to Shareholders. Core Molding Technologies recorded a liability for postretirement healthcare benefits based on actuarially computed estimates of \$17,088,000 at June 30, 2008 and \$16,442,000 at December 31, 2007.

Revenue Recognition: Revenue from product sales is recognized at the time products are shipped and title transfers. Allowances for returned products and other credits are estimated and recorded as revenue is recognized. Tooling revenue is recognized when the customer approves the tool and accepts ownership. Progress billings and expenses are shown net as an asset or liability on the Company's balance sheet. Tooling in progress can fluctuate significantly from period to period and is dependent upon the stage of tooling projects and the related billing and expense payment timetable for individual projects and therefore does not necessarily reflect projected income or loss from tooling projects. At June 30, 2008 the Company has recorded a net liability related to tooling in progress of \$241,000, which represents approximately \$3,312,000 of progress tooling billings and \$3,071,000 of progress tooling expenses. At December 31, 2007 the Company had recorded a net liability related to tooling in progress of \$102,000, which represents approximately \$4,738,000 of progress tooling billings and \$4,636,000 of progress tooling expenses.

Income taxes: The Consolidated Balance Sheet at June 30, 2008 and December 31, 2007, includes a deferred tax asset of \$7,802,000 and \$7,799,000, respectively. The Company performs analyses to evaluate the balance of deferred tax assets that will be realized. Such analyses are based on the premise that the company is, and will continue to be, a going concern and that it is more likely than not that deferred tax benefits will be realized through the generation of future taxable income. For more information, refer to Note 10 in Core Molding Technologies 2007 Annual Report to Shareholders.

Part I Financial Information
Item 3

Quantitative and Qualitative Disclosures About Market Risk

Core Molding Technologies' primary market risk results from changes in the price of commodities used in its manufacturing operations. Core Molding Technologies is also exposed to fluctuations in interest rates and foreign currency fluctuations associated with the Mexican Peso. Core Molding Technologies does not hold any material market risk sensitive instruments for trading purposes.

Core Molding Technologies has the following five items that are sensitive to market risks: (1) Industrial Revenue Bond (IRB) with a variable interest rate. The Company has an interest rate swap to fix the interest rate at 4.89%; (2) revolving line of credit, which bears a variable interest rate; (3) bank note payable with a variable interest rate. The Company entered into a swap agreement effective January 1, 2004, to fix the interest rate at 5.75%; (4) foreign currency purchases in which the Company purchases Mexican pesos with United States dollars to meet certain obligations that arise due to operations at the facility located in Mexico; and (5) raw material purchases in which Core Molding Technologies purchases various resins for use in production. The prices of these resins are affected by the prices of crude oil and natural gas as well as processing capacity versus demand.

Assuming a hypothetical 10% increase in commodity prices, Core Molding Technologies would be impacted by an increase in raw material costs, which would have an adverse affect on operating margins.

Assuming a hypothetical 10% change in short-term interest rates in both the six month periods ended June 30, 2008 and 2007, interest expense would not change significantly, as the interest rate swap agreements would generally offset the impact. In 2007, to support the purchase of treasury stock, Core Molding Technologies utilized the revolving line of credit which has a balance of \$2,162,000 at June 30, 2008. The interest rate is impacted by LIBOR. A hypothetical 10% change in short-term interest rates in 2008 could impact the interest paid by the Company, however, it would not have a material effect on earnings before tax.

Item 4T

Controls and Procedures

As of the end of the period covered by this report, the Company has carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act). Based upon this evaluation, the Company's management, including its Chief Executive Officer and its Chief Financial Officer, concluded that the Company's disclosure controls and procedures were (i) effective to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act was accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure, and (ii) effective to ensure that information required to be disclosed in the Company's reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commissions rules and forms.

There were no changes in internal control over financial reporting (as such term is defined in Exchange Act Rule 13a-15(f)) that occurred in the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II Other Information

Item 1. Legal Proceedings

None

Item 1A. Risk Factors

There have been no material changes in Core Molding Technologies' risk factors from those previously disclosed in Core Molding Technologies 2007 Annual Report on Form 10-K.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults Upon Senior Securities

None

Item 4. Submission of Matters to a Vote of Security Holders

At the annual meeting of the stockholders of Core Molding Technologies held on May 14, 2008, the following issue was voted upon with the indicated results:

A. Election of Directors:	Shares Voted For	Shares Voted Against
Kevin L. Barnett	4,697,822	1,145,609
Thomas R. Cellitti	4,698,822	1,144,609
James F. Crowley	5,093,208	750,223
Ralph O. Hellmold	5,204,640	638,791
Malcolm M. Prine	5,204,890	638,541

The above elected directors constitute the full acting Board of Directors for Core Molding Technologies; all terms expire at the 2009 annual meeting of stockholders of the Company.
