**Frost & Sullivan Recognizes NICE as #1 in Worldwide Quality Monitoring Market**

**Ra`anana, Israel, October 2, 2003 - NICE Systems (NASDAQ: NICE)**, a worldwide leader of multimedia recording solutions, applications and related professional services for business interaction management, today announced that Frost & Sullivan has recognized NICE for its number one market share position in 2002 in the worldwide Quality Monitoring market, comprised of both Full Recording and Selective Recording.

The report also indicated that NICE has increased its market share in both the Full Recording and Selective Recording segments during the first quarter of 2003.

According to the report, "As the only major quality monitoring vendor to compete strongly in both the selective and full recording segments, NICE is the global leader for the combined selective recording and full recording markets."

The report continues, "Overall, the company`s product lines are very complete....with a solid product line and a global distribution network, NICE Systems is well positioned to continue its strong growth record."

"It is very gratifying to have a leading analyst firm such as Frost & Sullivan validate our industry leadership for three straight years," said Haim Shani, president and CEO of NICE Systems, Ltd. "In addition to the advantages noted in the report such as the breadth of our product line and our global partners and distribution network, we attribute our success to constant technological innovation and excellent customer service."

**NICE to Demonstrate Innovative VoIP-Based Call Recording Solutions at Wall Street Technology Show**

**Award-winning VoIP recording software features an interactive digital display - on the IP telephone itself - to initiate and track recordings**

**Ra'anana, Israel, October 22, 2003 - NICE Systems (NASDAQ: NICE)**, a worldwide leader of multimedia recording solutions, applications and related professional services for business interaction management, today announced that it will demonstrate new innovative, award-winning VoIP-based call recording applications for risk management, sales verification and compliance at the Wall Street Technology Association (WSTA) show in New York City.

VoIP recording solutions from NICE provide customers with full application transparency, which facilitates and expedites the migration from conventional to VoIP infrastructure. Among other specific benefits, NICE's IP telephony applications allow the user to initiate full or partial call-recording on demand and then tag and store select calls to be replayed at a later time, or emailed to another user for playback. This flexibility garnered these applications the Innovation Award in Vertical Market - Finance, from Cisco at its 2003 Innovation Through Convergence (ITC) show in September 2003.

NICE's IP telephony applications offer voice recording capabilities to financial trading floors, financial call centers, financial branch institutions and call centers. Converging voice and data, these applications give financial institutions improved ability to manage customer interactions for risk management, protection against fraud and interaction content verification.

"The pace of organizations migrating their trading floors and call centers to VoIP infrastructure continues," said Shlomo Shamir, president and CEO of NICE Systems, Inc, "NICE, with already well more than 80 VoIP customers worldwide, is committed to helping its customers maximize VoIP capabilities for improved customer interaction monitoring and better business performance."

All NICE VoIP-based solutions integrate with leading IP telephony switch vendors including Cisco, Avaya, Nortel, Alcatel, Aspect, and others.

For a complete demonstration of NICE`s new VoIP applications and other offerings for the financial services market, please visit us at the WSTA show for Security, Disaster Recovery and Business Continuity in New York City on October 22, 2003 at the Marriott Marquis, booth number 25.
