## AMERICAN RIVER BANKSHARES

### NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

September 30, 2015

#### 1. CONSOLIDATED FINANCIAL STATEMENTS

In the opinion of management, the unaudited consolidated financial statements contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the consolidated financial position of American River Bankshares (the “Company”) at September 30, 2015 and December 31, 2014, the results of its operations and statement of comprehensive income for the three-month and nine-month periods ended September 30, 2015 and 2014, its cash flows for the nine-month periods ended September 30, 2015 and 2014 and its statement of changes in shareholders’ equity for the year ended December 31, 2014 and the nine months ended September 30, 2015 in conformity with accounting principles generally accepted in the United States of America.

Certain disclosures normally presented in the notes to the annual consolidated financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted. The Company believes that the disclosures are adequate to make the information not misleading. These interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company’s 2014 annual report on Form 10-K. The results of operations for the three-month and nine-month periods ended September 30, 2015 may not necessarily be indicative of the operating results for the full year.

In preparing such financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ significantly from those estimates. Material estimates that are particularly susceptible to significant changes in the near term relate to the determination of the allowance for loan and lease losses, the provision for taxes, the valuation of goodwill and the estimated fair value of investment securities, impaired loans and other real estate owned.

Management has determined that since all of the banking products and services offered by the Company are available in each branch office of American River Bank, all branch offices are located within the same economic environment and management does not allocate resources based on the performance of different lending or transaction activities, it is appropriate to aggregate all of the branch offices and report them as a single operating segment. No client accounts for more than ten percent (10%) of revenues for the Company or American River Bank.

#### 2. STOCK-BASED COMPENSATION

***Equity Plans***

On March 17, 2010, the Board of Directors adopted the 2010 Equity Incentive Plan (the “2010 Plan”). The 2010 Plan was approved by the Company’s shareholders on May 20, 2010. In 2000, the Board of Directors adopted and the Company’s shareholders approved a stock option plan (the “2000 Plan”), under which 176,321 options remain outstanding at September 30, 2015. At September 30, 2015, under the 2010 Plan, there were 76,461 stock options and 57,516 restricted shares outstanding and the total number of authorized shares that remain available for issuance was 1,395,985. The 2010 Plan provides for the following types of stock-based awards: incentive stock options; nonqualified stock options; stock appreciation rights; restricted stock; restricted performance stock; unrestricted Company stock; and performance units. Awards under the 2000 Plan were either incentive stock options or nonqualified stock options. Under the 2010 Plan, the awards may be granted to employees and directors under incentive and nonqualified option agreements, restricted stock agreements, and other awards agreements. The 2010 Plan and the 2000 Plan (collectively the “Plans”) require that the option price may not be less than the fair market value of the stock at the date the option is awarded. The option awards under the Plans expire on dates determined by the Board of Directors, but not later than ten years from the date of award. The vesting period is generally five years; however, the vesting period can be modified at the discretion of the Company’s Board of Directors. Outstanding option awards under the Plans are exercisable until their expiration, however, no new options will be awarded under the 2000 Plan. New shares are issued upon exercise of an option.

The award date fair value of awards is determined by the market price of the Company's common stock on the date of award and is recognized ratably as compensation expense or director expense over the vesting periods. The shares of common stock awarded pursuant to such agreements vest in increments over one to five years from the date of award. The shares awarded to employees and directors under the restricted stock agreements vest on the applicable vesting dates only to the extent the recipient of the shares is then an employee or a director of the Company or one of its subsidiaries, and each recipient will forfeit all of the shares that have not vested on the date his or her employment or service is terminated.

### ***Equity Compensation***

For the three-month periods ended September 30, 2015 and 2014, the compensation cost recognized for equity compensation was \$73,000 and \$48,000, respectively. The recognized tax benefit for equity compensation expense was \$25,000 and \$17,000, respectively, for the three-month periods ended September 30, 2015 and 2014. For the nine-month periods ended September 30, 2015 and 2014, the compensation cost recognized for equity compensation was \$200,000 and \$119,000, respectively. The recognized tax benefit for equity compensation expense was \$70,000 and \$42,000, respectively, for the nine-month periods ended September 30, 2015 and 2014.

At September 30, 2015, the total compensation cost related to nonvested stock option awards not yet recorded was \$149,000. This amount will be recognized over the next 4.75 years and the weighted average period of recognizing these costs is expected to be 2.25 years. At September 30, 2015, the total compensation cost related to restricted stock awards not yet recorded was \$424,000. This amount will be recognized over the next 4.75 years and the weighted average period of recognizing these costs is expected to be 1.89 years.

### ***Equity Plans Activity***

#### **Stock Options**

There were no stock options awarded during the three-month period ended September 30, 2015. There were 26,427 stock options awarded during the nine-month period ended September 30, 2015 at a weighted average exercise price of \$9.56. There were no stock options awarded during the three-month period ended September 30, 2014. There were 32,705 stock options awarded during the nine-month period ended September 30, 2014 at a weighted average exercise price of \$8.85. The weighted average award date fair value of options awarded for the nine-month period ended September 30, 2015 was \$3.24. The weighted average award date fair value of options awarded for the nine-month period ended September 30, 2014 was \$2.44. A summary of option activity under the Plans as of September 30, 2015 and changes during the period then ended is presented below:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (\$000)
Outstanding at January 1, 2015	271,700	\$ 16.27	3.1 years	\$ 82
Awarded	26,427	9.56	—	—
Exercised	—	—	—	—
Cancelled	45,345	18.17	—	—
Outstanding at September 30, 2015	252,782	\$ 15.23	3.9 years	\$ 120
Vested at September 30, 2015	193,246	\$ 17.16	2.4 years	\$ 80
Non-vested at September 30, 2015	59,536	\$ 8.96	8.9 years	\$ 40

## Restricted Stock

There were no shares of restricted stock awarded during the three-month period ended September 30, 2015 and 45,023 shares of restricted stock awarded during the nine-month period ended September 30, 2015. There were no shares of restricted stock awarded during the three-month period ended September 30, 2014 and 24,830 shares of restricted stock awarded during the nine-month period ended September 30, 2014. Of the restricted shares awarded in 2015, 12,552 restricted shares will vest one year from the date of the award, 11,939 vest over five years at 20% per year from the date of the award, and 20,532 are performance based awards that must meet minimum performance criteria before they begin to vest. If the performance metrics are not met, up to 100% of the award may be forfeited and if the performance metrics are exceeded, the awards may be increased by up to 150% of the original award. Of the restricted shares awarded in 2014, 13,560 restricted shares vested one year from the date of the award and 11,270 shares vest over five years at 20% per year from the date of the award. Award date fair value is determined by the market price of the Company's common stock on the date of award (\$9.41 on March 18, 2015, \$9.56 on May 22, 2015 and \$8.85 on May 22, 2014).

There were 3,274 restricted share awards that were fully vested during the three-month period ended September 30, 2015 and 20,345 restricted share awards that were fully vested during the nine-month period ended September 30, 2015. There were 3,272 restricted share awards that were fully vested during the three-month period ended September 30, 2014 and 15,982 restricted share awards that were fully vested during the nine-month period ended September 30, 2014. There were no restricted share awards forfeited during the three-month and nine-month periods ended September 30, 2015 and 2014. The intrinsic value of nonvested restricted shares at September 30, 2015 was \$553,000.

Restricted Stock	Shares	Weighted Average Award Date Fair Value
Nonvested at January 1, 2015	32,838	\$ 8.31
Awarded	45,023	9.49
Less: Vested	20,345	8.36
Less: Cancelled	—	—
Nonvested at September 30, 2015	57,516	\$ 9.21

## Other Equity Awards

There were no stock appreciation rights; unrestricted Company stock; or performance units awarded during the three-month or nine-month month periods ended September 30, 2015 or 2014.

The intrinsic value used for stock options and restricted stock was derived from the market price of the Company's common stock of \$9.62 as of September 30, 2015.

### 3. COMMITMENTS AND CONTINGENCIES

In the normal course of business there are outstanding various commitments to extend credit which are not reflected in the financial statements, including loan commitments of approximately \$29,150,000 and standby letters of credit of approximately \$363,000 at September 30, 2015 and loan commitments of approximately \$32,639,000 and standby letters of credit of approximately \$356,000 at December 31, 2014. Such commitments relate primarily to real estate construction loans, revolving lines of credit and other commercial loans. However, all such commitments will not necessarily culminate in actual extensions of credit by the Company during 2015 as some of these are expected to expire without being fully drawn upon.

Standby letters of credit are commitments issued to guarantee the performance or financial obligation of a client to a third party. These guarantees are issued primarily relating to purchases of inventory, insurance programs, performance obligations to government agencies, or as security for real estate rents by commercial clients and are typically short-term in nature. Credit risk is similar to that involved in extending loan commitments to clients and accordingly, evaluation and collateral requirements similar to those for loan commitments are used. The majority of all such commitments are collateralized. The fair value of the liability related to these standby letters of credit, which represents the fees received for issuing the guarantees, was not significant September 30, 2015 or December 31, 2014.

## 4. EARNINGS PER SHARE COMPUTATION

Basic earnings per share is computed by dividing net income by the weighted average common shares outstanding for the period (7,481,529 and 7,653,109 shares for the three-month and nine-month periods ended September 30, 2015, and 8,063,589 and 8,154,947 for the three-month and nine-month periods ended September 30, 2014). Diluted earnings per share reflect the potential dilution that could occur if securities or other contracts to issue common stock, such as stock options or restricted stock, result in the issuance of common stock. Diluted earnings per share is computed by dividing net income by the weighted average common shares outstanding for the period plus the dilutive effect of stock based awards. There were 19,930 and 14,878, respectively, dilutive shares for the three-month and nine-month periods ended September 30, 2015 and 11,934 and 11,835, respectively, dilutive shares for the three-month and nine-month periods ended September 30, 2014. For the three-month periods ended September 30, 2015 and 2014, there were 192,106 and 211,024 stock options, respectively, that were excluded from the calculation as they were considered antidilutive. For the nine-month periods ended September 30, 2015 and 2014, there were 192,106 and 211,024 stock options, respectively, that were excluded from the calculation as they were considered antidilutive. Earnings per share is retroactively adjusted for stock dividends and stock splits, if applicable, for all periods presented.

## 5. INVESTMENT SECURITIES

The amortized cost and estimated fair values of investment securities at September 30, 2015 and December 31, 2014 consisted of the following (dollars in thousands):

Available-for-Sale

	September 30, 2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Debt securities:				
U.S. Government Agencies and Sponsored Agencies	\$234,938	\$ 5,058	\$ (175)	) \$239,821
Obligations of states and political subdivisions	23,858	1,406	—	25,264

Obligations of states and political subdivisions	24,886	1,423	(20)	) 26,289

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

Corporate bonds	1,504	79	—	1,583
Equity securities:				
Corporate stock	54	23	—	77
	\$283,446	\$ 6,240	\$ (622 )	\$289,064

Net unrealized gains on available-for-sale investment securities totaling \$6,390,000 were recorded, net of \$2,565,000 in tax liabilities, as accumulated other comprehensive income within shareholders' equity at September 30, 2015. Proceeds and gross realized gains from the sale and call of available-for-sale investment securities for the three-month period ended September 30, 2015 totaled \$8,381,000 and \$33,000, respectively, and for the nine-month period ended September 30, 2015 totaled \$23,764,000 and \$251,000, respectively. There were no transfers of available-for-sale investment securities for the three-month and nine-month periods ended September 30, 2015.

Net unrealized gains on available-for-sale investment securities totaling \$5,618,000 were recorded, net of \$2,247,000 in tax liabilities, as accumulated other comprehensive income within shareholders' equity at December 31, 2014. Proceeds and gross realized gains from the sale and call of available-for-sale investment securities for the three-month period ended September 30, 2014 totaled \$8,656,000 and \$83,000, respectively, and for the nine-month period ended September 30, 2014 totaled \$11,288,000 and \$100,000, respectively. There were no transfers of available-for-sale investment securities for the three-month and nine-month periods ended September 30, 2014.

Held-to-Maturity

September 30, 2015

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Debt securities:				
U.S. Government Agencies and Sponsored Agencies	\$ 674	\$ 52	\$ —	\$ 726

December 31, 2014

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Debt securities:				
U.S. Government Agencies and Sponsored Agencies	\$ 862	\$ 60	\$ —	\$ 922

There were no sales or transfers of held-to-maturity investment securities for the periods ended September 30, 2015 and September 30, 2014. Investment securities with unrealized losses at September 30, 2015 and December 31, 2014 are summarized and classified according to the duration of the loss period as follows (dollars in thousands):

September 30, 2015

	Less than 12 Months Fair Value	Unrealized Losses	12 Months or More Fair Value	Unrealized Losses	Total Fair Value	Unrealized Losses
Available-for-Sale						
Debt securities:						
U.S. Government Agencies and Sponsored Agencies	\$21,090	\$ (164 )	2,268	(11 )	\$23,358	\$ (175 )
	\$21,090	\$ (164 )	\$2,268	\$ (11 )	\$23,358	\$ (175 )

December 31, 2014

	Less than 12 Months Fair Value	Unrealized Losses	12 Months or More Fair Value	Unrealized Losses	Total Fair Value	Unrealized Losses
Available-for-Sale						
Debt securities:						
U.S. Government Agencies and Sponsored Agencies	\$57,145	\$ (503 )	\$10,006	\$ (99 )	\$67,151	\$ (602 )
Obligations of states and political subdivisions	—	—	649	(20 )	649	(20 )
	\$57,145	\$ (503 )	\$10,655	\$ (119 )	\$67,800	\$ (622 )

There were no held-to-maturity investment securities with unrealized losses as of September 30, 2015 or December 31, 2014.

At September 30, 2015, the Company held 217 securities of which 13 were in a loss position for less than twelve months and one was in a loss position for twelve months or more. Of the 13 securities in a loss position for less than twelve months and the single security that was in a loss position for greater than twelve months, all were U.S. Government Agencies and Sponsored Agencies securities.

At December 31, 2014, the Company held 223 securities of which 25 were in a loss position for less than twelve months and six were in a loss position for twelve months or more. Of the 25 securities in a loss position for less than twelve months, 22 were U.S. Government Agencies and Sponsored Agencies securities and three were obligations of states or political subdivisions. The six securities that were in a loss position for greater than twelve months consisted of five U.S. Government Agencies and Sponsored Agencies securities and one obligation of states or political subdivisions.

The unrealized loss on the Company's U.S. Government Agencies and Sponsored Agencies securities is primarily driven by interest rates. Because the decline in market value is attributable to a change in interest rates and not credit quality and because the Company has the ability and intent to hold these investments until recovery of fair value, which may be until maturity, management does not consider these investments to be other-than-temporarily impaired.

The amortized cost and estimated fair values of investment securities at September 30, 2015 by contractual maturity are shown below (dollars in thousands).

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value
Within one year	\$—	\$—		
After one year through five years	4,386	4,541		
After five years through ten years	15,173	16,157		
After ten years	5,802	6,137		
	25,361	26,835		
Investment securities not due at a single maturity date:				
Mortgage-backed securities	234,938	239,821	\$ 674	\$ 726
Corporate stock	51	84	—	—
	\$260,350	\$266,740	\$ 674	\$ 726

Expected maturities may differ from contractual maturities because the issuers of some of the securities have the right to call or prepay obligations with or without call or prepayment penalties.

## 6. IMPAIRED AND NONPERFORMING LOANS AND LEASES AND OTHER REAL ESTATE OWNED

At September 30, 2015 and December 31, 2014, the recorded investment in nonperforming loans and leases was approximately \$1,932,000 and \$1,653,000, respectively. Nonperforming loans and leases include all such loans and leases that are either placed on nonaccrual status or are 90 days past due as to principal or interest but still accrue interest because such loans are well-secured and in the process of collection. The Company considers a loan to be impaired when, based on current information and events, it is probable that it will be unable to collect all amounts due (principal and interest) according to the contractual terms of the original loan agreement. At September 30, 2015, the recorded investment in loans and leases that were considered to be impaired totaled \$23,110,000, which includes \$1,725,000 in nonaccrual loans and leases and \$21,385,000 in performing loans and leases. Of the total impaired loans of \$23,110,000, loans totaling \$13,178,000 were deemed to require no specific reserve and loans totaling \$9,932,000 were deemed to require a related valuation allowance of \$966,000. At December 31, 2014, the recorded investment in loans and leases that were considered to be impaired totaled \$25,120,000 and had a related valuation allowance of \$1,603,000.

At September 30, 2015 and December 31, 2014, the recorded investment in other real estate owned ("OREO") was \$3,781,000 and \$4,647,000, respectively. At September 30, 2015, the Company did not own any residential OREO properties and there were \$338,000 of residential properties in the process of foreclosure. During the first quarter of 2015, the Company sold two adjoining parcels of land in Sacramento County that did not result in a gain or loss at the time of sale; however, prior to sale, the book value of this property was adjusted by \$76,000 with a charge to expense during the first quarter of 2015. The Company did not add any properties to OREO during the first quarter of 2015. During the second quarter of 2015, the Company did not foreclose on any property and an OREO property in Amador County consisting of unimproved land was sold. No gain or loss was recorded as a result of the sale. During the third quarter of 2015, the Company did not foreclose on any property or sell any OREO property.

The Company periodically obtains property valuations to determine whether the recorded book value is considered fair value. During the third quarter of 2015, this valuation process did not result in the Company adjusting any book values.

The September 30, 2015 OREO balance of \$3,781,000 consisted of four properties including two commercial real estate properties in the total amount of \$2,522,000 and two commercial unimproved land properties totaling \$1,259,000.

Nonperforming loans and leases and OREO at September 30, 2015 and December 31, 2014 are summarized as follows:

(in thousands)	September 30, 2015	December 31, 2014		
Nonaccrual loans and leases that are current to terms (less than 30 days past due)	\$ 123	\$ 13		
Nonaccrual loans and leases that are past due	1,685	1,640		
Loans and leases past due 90 days and accruing interest	124	—		
Other assets	878	878		
Other real estate owned	3,781	4,647		
Total nonperforming assets	\$ 6,591	\$ 7,178		
Nonperforming loans and leases to total loans and leases	0.66	%	0.63	%

## 7. TROUBLED DEBT RESTRUCTURINGS

At September 30, 2015, there were 15 loans and leases that were considered to be troubled debt restructurings. Of these loans and leases, 11 are currently performing (less than ninety days past due) totaling \$9,093,000 and four are considered nonperforming (and included in the \$1,932,000 discussed in Note 6), totaling \$1,226,000. Of the four TDRs considered nonperforming, two are current to the modified terms. At September 30, 2015 and December 31, 2014, there were no unfunded commitments on those loans considered troubled debt restructures. See also “Impaired Loans and Leases” in “Item 2 - Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

The Company has allocated \$262,000 and \$829,000, respectively, as specific reserves for loans whose terms have been modified as troubled debt restructurings as of September 30, 2015 and December 31, 2014.

During the nine-month period ended September 30, 2015, the terms of six loans were modified as troubled debt restructurings. Three of these loans were renewals of previously reported loans and three were new TDRs. The modifications of the terms of these loans consisted of extensions of the maturity date and/or interest rates lower than the original loan rate.

There were no loans modified as troubled debt restructurings during the three months ended September 30, 2015.

The following table presents loans by class modified as troubled debt restructurings during the nine months ended September 30, 2015 (dollars in thousands):

	Number of Loans	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Troubled debt restructurings:			
Commercial	1	\$ 47	\$ 47
Real estate - commercial	2	1,645	1,645
Real estate - residential	2	416	416
Consumer	1	23	23
Total	6	\$ 2,131	\$ 2,131

The troubled debt restructurings described above increased the allowance for loan and lease losses by \$151,000 and resulted in no charge-offs during the nine months ended September 30, 2015.

The following table presents loans by class modified as troubled debt restructurings during the three months ended September 30, 2014 (dollars in thousands):

	Number of Loans	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Troubled debt restructurings:			
Real estate - commercial	3	\$ 890	\$ 890
Consumer	1	7	7
Total	4	\$ 897	\$ 897

The following table presents loans by class modified as troubled debt restructurings during the nine months ended September 30, 2014 (dollars in thousands):

	Number of Loans	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment
Troubled debt restructurings:			

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

Real estate - commercial	8	\$ 5,925	\$ 5,925
Consumer	2	52	52
Total	10	\$ 5,977	\$ 5,977

The troubled debt restructurings described above increased the allowance for loan and lease losses by \$93,000 and resulted in no charge-offs during the three months ended September 30, 2014 and increased the allowance for loan and lease losses by \$246,000 and resulted in no charge-offs during the nine months ended September 30, 2014.

There were no payment defaults on troubled debt restructurings within twelve months following the modification for the three-month and nine-month periods ended September 30, 2015 or September 30, 2014.

## 8. ALLOWANCE FOR LOAN AND LEASE LOSSES

The Company's loan and lease portfolio allocated by management's internal risk ratings as of September 30, 2015 and December 31, 2014 are summarized below:

## 9. BORROWING ARRANGEMENTS

At September 30, 2015, the Company had \$17,000,000 of unsecured short-term borrowing arrangements with two of its correspondent banks. There were no advances under the borrowing arrangements as of September 30, 2015 or December 31, 2014.

The Company has a line of credit available with the Federal Home Loan Bank of San Francisco (the "FHLB") which is secured by pledged mortgage loans and investment securities. Borrowings may include overnight advances as well as loans with terms of up to thirty years. Advances (both short-term and long-term) totaling \$11,000,000 were outstanding from the FHLB at September 30, 2015, bearing interest rates ranging from 0.45% to 1.91% and maturing between March 16, 2016 and July 12, 2019. Advances totaling \$11,000,000 were outstanding from the FHLB at December 31, 2014, bearing interest rates ranging from 0.24% to 1.91% and maturing between March 19, 2016 and July 12, 2019. Remaining amounts available under the borrowing arrangement with the FHLB at September 30, 2015 and December 31, 2014 totaled \$76,807,000 and \$67,228,000, respectively. In addition, the Company has a secured borrowing agreement with the Federal Reserve Bank of San Francisco. The borrowing can be secured by pledging selected loans and investment securities. Borrowings generally are short-term including overnight advances as well as loans with terms up to ninety days. Amounts available under this borrowing arrangement at September 30, 2015 and December 31, 2014 were \$16,122,000 and \$17,335,000, respectively. There were no advances outstanding under this borrowing arrangement as of September 30, 2015 and December 31, 2014.

## 10. INCOME TAXES

The Company files its income taxes on a consolidated basis with its subsidiaries. The allocation of income tax expense (benefit) represents each entity's proportionate share of the consolidated provision for (benefit from) income taxes.

The Company accounts for income taxes using the balance sheet method, under which deferred tax assets and liabilities are recognized for the tax consequences of temporary differences between the reported amounts of assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. On the consolidated balance sheet, net deferred tax assets are included in accrued interest receivable and other assets.

The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above, if applicable, is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The Company recognizes accrued interest and penalties related to unrecognized tax benefits, if applicable, as a component of interest expense in the consolidated statement of income. There have been no unrecognized tax benefits or accrued interest and penalties for the three-month and nine-month periods ended September 30, 2015 and 2014.

The combined federal and state effective tax rate for the quarter ended September 30, 2015 was 35.5%, compared to 35.3% for the third quarter of 2014. For the nine months ended September 30, 2015, the combined federal and state effective tax rate was 34.7% compared to 34.9% for the nine months ended September 30, 2014. The higher combined federal and state effective tax rate in the third quarter of 2015 compared to the third quarter of 2014 resulted from higher pretax income in 2015. Pretax income was \$539,000 (31.0%) higher in the third quarter of 2015 compared to the third quarter of 2014 increasing from \$1,737,000 to \$2,276,000. The decrease in the combined federal and state effective tax rate in the nine months of 2015 compared to the nine months of 2014 resulted from an increase in tax benefits related to tax exempt loan interest, offset by higher pretax income in 2015. Interest on tax exempt loans increased from \$10,000 in 2014 to \$222,000 in 2015. Pretax income was \$970,000 (20.0%) higher in the first nine months of 2015 compared to the first nine months of 2014 increasing from \$4,863,000 to \$5,833,000.

## 11. FAIR VALUE MEASUREMENTS

The following tables present information about the Company's assets and liabilities measured at fair value on a recurring and nonrecurring basis as of September 30, 2015 and December 31, 2014. They indicate the fair value hierarchy of the valuation techniques utilized by the Company to determine such fair value. In general, fair values determined by Level 1 inputs utilize quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company has the ability to access. Fair values determined by Level 2 inputs utilize inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include quoted prices for similar assets and liabilities in active markets and inputs other than quoted prices that are observable for the asset or liability, such as interest rates and yield curves that are observable at commonly quoted intervals. Level 3 inputs are unobservable inputs for the asset or liability, including situations where there is little, if any, market activity for the asset or liability. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the asset or liability.

Estimated fair values are disclosed for financial instruments for which it is practicable to estimate fair value. These estimates are made at a specific point in time based on relevant market data and information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering the Company's entire holdings of a particular financial instrument for sale at one time, nor do they attempt to estimate the value of anticipated future business related to the instruments. In addition, the tax ramifications related to the realization of unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of these estimates.

The carrying amounts and estimated fair values of the Company's financial instruments are as follows (dollars in thousands):

	Carrying Amount	Fair Value Measurements Using:			Total
September 30, 2015		Level 1	Level 2	Level 3	
Financial assets:					
Cash and due from banks	\$21,638	\$21,638			\$21,638

Long-term borrowings	7,500	—	7,567	—		7,567
Accrued interest payable	59	—	59	—		59

Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding current economic conditions, risk characteristics of various financial instruments and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the fair values presented.

The following methods and assumptions were used by the Company to estimate the fair values of its financial instruments at September 30, 2015 and December 31, 2014:

**Cash and due from banks:** The carrying amounts of cash and short-term instruments approximate fair values and are classified as Level 1.

**Interest-bearing deposits in banks:** The fair values of interest-bearing deposits in banks are estimated by discounting their future cash flows using rates at each reporting date for instruments with similar remaining maturities offered by comparable financial institutions and are classified as Level 2.

**Investment securities:** For investment securities, fair values are based on quoted market prices, where available, and are classified as Level 1. If quoted market prices are not available, fair values are estimated using quoted market prices for similar securities and indications of value provided by brokers and are classified as Level 2.

**FHLB stock:** It is not practicable to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Loans and leases: Fair values of loans, excluding loans held for sale, are estimated as follows: For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values resulting in a Level 3 classification. Fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality also resulting in a Level 3 classification. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

**Deposits:** The fair values disclosed for demand deposits (e.g., interest and non-interest checking, passbook savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount) resulting in a Level 1 classification. For time deposits, the fair values for fixed rate certificates of deposit are estimated using a discounted cash flow methodology that applies market interest rates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

**Short-term and long-term borrowings:** The fair value of short-term borrowings is estimated to be the carrying amount and is classified as Level 1. The fair value of long-term borrowings is estimated using a discounted cash flow analysis using interest rates currently available for similar debt instruments and are classified as Level 2.

**Accrued interest receivable and payable:** The carrying amount of accrued interest receivable approximates fair value resulting in a Level 3 classification and the carrying amount of accrued interest payable approximates fair value resulting in a Level 2 classification.

**Off-balance sheet instruments:** Fair values for off-balance sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair value of commitments was not material at September 30, 2015 and December 31, 2014.

Assets and liabilities measured at fair value on a recurring and non-recurring basis along with any related gain or loss recognized in the income statement due to fair value changes are presented in the following table:

Description	Fair Value Measurements Using			Total
(dollars in thousands)	Fair Value	Level 1	Level 2	Gains (Losses)

Assets and liabilities measured on a nonrecurring basis:					
Impaired loans:					
Commercial	\$666	\$—	\$—	\$666	\$ 14
Real estate:					
Commercial	286	—	—	286	—
Other real estate owned	4,404	—	—	4,404	(216
Total nonrecurring	\$5,356	\$—	\$—	\$5,356	\$ (202

There were no significant transfers between Levels 1 and 2 during the three-month and nine-month periods ended September 30, 2015 or the twelve months ended December 31, 2014.

The following methods were used to estimate the fair value of each class of financial instrument above:

Available-for-sale securities – Fair values for investment securities are based on quoted market prices, if available, and are considered as Level 1, or evaluated using pricing models that vary by asset class and incorporate available trade, bid and other market information and are considered as Level 2. Pricing applications apply available information, as applicable, through processes such as benchmark curves, benchmarking to like securities, sector groupings and matrix pricing.

Impaired loans – The fair value of collateral dependent impaired loans adjusted for specific allocations of the allowance for loan losses is generally based on recent real estate appraisals and/or evaluations. These appraisals and/or evaluations may utilize a single valuation approach or a combination of approaches including comparable sales, cost and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income and other available data. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. The valuation technique used for all Level 3 nonrecurring loans consists of the appraised value less a reserve for past dues taxes and selling costs ranging from 8% to 10%.

Other real estate owned – Certain commercial and residential real estate properties classified as OREO are measured at fair value, less costs to sell. Fair values are based on real estate appraisals. These appraisals may use a single valuation approach or a combination of approaches including comparable sales, cost and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income and other available data. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. The valuation technique used for all Level 3 nonrecurring OREO consists of the appraised value less selling costs ranging from 8% to 10%.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**

The following is management's discussion and analysis of the significant changes in American River Bankshares' (the "Company") balance sheet accounts between December 31, 2014 and September 30, 2015 and its income and expense accounts for the three-month and nine-month periods ended September 30, 2015 and 2014. The discussion is designed to provide a better understanding of significant trends related to the Company's financial condition, results of operations, liquidity, capital resources and interest rate sensitivity. This discussion and supporting tables and the consolidated financial statements and related notes appearing elsewhere in this report are unaudited. Interest income and net interest income are presented on a fully taxable equivalent basis (FTE) within management's discussion and analysis. Certain matters discussed or incorporated by reference in this Quarterly Report on Form 10-Q including, but not limited to, matters described in "Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations," are "forward-looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, Section 27A of the Securities Act of 1933, as amended, and subject to the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may contain words related to future projections including, but not limited to, words such as "believe," "expect," "anticipate," "intend," "may," "will," "should," "could," "would," and variations of those words and similar words that are subject to risks, uncertainties and other factors that could cause actual results to differ significantly from those projected. Factors that could cause or contribute to such differences include, but are not limited to, the following:

- the legislation promulgated by the United States Congress and actions taken by governmental agencies, including the United States Department of the Treasury, to deal with challenges to the U.S. financial system;

- the risks presented by economic volatility and recession, which could adversely affect credit quality, collateral values, including real estate collateral, investment values, liquidity and loan originations and loan portfolio delinquency rates;

- variances in the actual versus projected growth in assets and return on assets;

- potential loan and lease losses;

- potential expenses associated with resolving nonperforming assets as well as regulatory changes;

- changes in the interest rate environment including interest rates charged on loans, earned on securities investments and paid on deposits and other borrowed funds;

- competitive effects;

- potential declines in fee and other noninterest income earned associated with economic factors, as well as regulatory changes;

- general economic conditions nationally, regionally, and within our operating markets could be less favorable than expected or could have a more direct and pronounced effect on us than expected and adversely affect our ability to continue internal growth at historical rates and maintain the quality of our earning assets;

- changes in the regulatory environment including increased capital and regulatory compliance requirements and further government intervention in the U.S. financial system;

- changes in business conditions and inflation;

- changes in securities markets, public debt markets, and other capital markets;

- potential data processing and other operational systems failures or fraud;
- potential decline in real estate values in our operating markets;
- the effects of uncontrollable events such as terrorism, the threat of terrorism or the impact of military conflicts in connection with the conduct of the war on terrorism by the United States and its allies, negative financial and economic conditions, natural disasters, and disruption of power supplies and communications;
- changes in accounting standards, tax laws or regulations and interpretations of such standards, laws or regulations;
- projected business increases following any future strategic expansion could be lower than expected;
- the goodwill we have recorded in connection with acquisitions could become impaired, which may have an adverse impact on our earnings;
- the reputation of the financial services industry could experience further deterioration, which could adversely affect our ability to access markets for funding and to acquire and retain customers;
- the efficiencies we may expect to receive from any investments in personnel and infrastructure may not be realized; and
- downgrades in the credit rating of the United States by credit rating agencies.

The factors set forth under “Item 1A - Risk Factors” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2014, and other cautionary statements and information set forth in this Quarterly Report on Form 10-Q should be carefully considered and understood as being applicable to all related forward-looking statements contained in this Quarterly Report on Form 10-Q, when evaluating the business prospects of the Company and its subsidiaries.

Forward-looking statements are not guarantees of performance. By their nature, they involve risks, uncertainties and assumptions. The future results and shareholder values may differ significantly from those expressed in these forward-looking statements. You are cautioned not to put undue reliance on any forward-looking statement. Any such statement speaks only as of the date of this report, and in the case of any documents that may be incorporated by reference, as of the date of those documents. We do not undertake any obligation to update or release any revisions to any forward-looking statements, to report any new information, future event or other circumstances after the date of this report or to reflect the occurrence of unanticipated events, except as required by law. However, your attention is directed to any further disclosures made on related subjects in our subsequent reports filed with the Securities and Exchange Commission (the “SEC”) on Forms 10-K, 10-Q and 8-K.

## **Critical Accounting Policies**

### *General*

The Company’s financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”). The financial information contained within our statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. In addition, GAAP itself may change from one previously acceptable method to another method. Although the economics of our transactions would be the same, the timing of events that would impact our transactions could change.

### *Allowance for Loan and Lease Losses*

The allowance for loan and lease losses is an estimate of the probable incurred credit loss risk inherent in our loan and lease portfolio as of the balance sheet date. The allowance is based on two basic principles of accounting: (1) “Accounting for Contingencies,” which requires that losses be accrued when it is probable that a loss has occurred at the balance sheet date and such loss can be reasonably estimated; and (2) the “Receivables” topic, which requires that losses be accrued on impaired loans based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan or lease balance.

The allowance for loan and lease losses is determined based upon estimates that can and do change when the actual risk, loss events, or changes in other factors, occur. The analysis of the allowance uses an historical loss view as an indicator of probable incurred losses and as a result could differ from the actual losses incurred in the future. If the allowance for loan and lease losses falls below that deemed adequate (by reason of loan and lease growth, actual losses, the effect of changes in risk factors, or some combination of these), the Company has a strategy for supplementing the allowance for loan and lease losses, over the short-term. For further information regarding our allowance for loan and lease losses, see “Allowance for Loan and Lease Losses Activity” discussion later in this Item 2.

### *Stock-Based Compensation*

The Company recognizes compensation expense over the vesting period in an amount equal to the fair value of all share-based payments which consist of stock options and restricted stock awarded to directors and employees. The fair value of each stock option award is estimated on the date of the award and amortized over the service period using a Black-Scholes-Merton based option valuation model that requires the use of assumptions. Critical assumptions that affect the estimated fair value of each award include expected stock price volatility, dividend yields, option life and

the risk-free interest rate.

### *Goodwill*

Business combinations involving the Company's acquisition of equity interests or net assets of another enterprise or the assumption of net liabilities in an acquisition of branches constituting a business may give rise to goodwill. Goodwill represents the excess of the cost of an acquired entity over the net of the amounts assigned to assets acquired and liabilities assumed. The value of goodwill is ultimately derived from the Company's ability to generate net earnings after the acquisition and is not deductible for tax purposes. A decline in net earnings could be indicative of a decline in the fair value of goodwill and result in impairment. For that reason, goodwill is assessed for impairment on an annual basis. Impairment exists when a reporting unit's carrying value of goodwill exceeds its fair value. The most recent annual assessment was performed as of December 31, 2014, and at that time, the Company's reporting unit had positive equity and the Company elected to perform a qualitative assessment to determine if it was more likely than not that the fair value of the reporting unit exceeded its carrying value, including goodwill. The qualitative assessment indicated that it was more likely than not that the fair value of the reporting unit exceeded its carrying value, resulting in no impairment.

### *Income Taxes*

The Company files its income taxes on a consolidated basis with its subsidiaries. The allocation of income tax expense (benefit) represents each entity's proportionate share of the consolidated provision for (benefit from) income taxes.

The Company accounts for income taxes using the balance sheet method, under which deferred tax assets and liabilities are recognized for the tax consequences of temporary differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. On the consolidated balance sheet, net deferred tax assets are included in accrued interest receivable and other assets.

The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is, if applicable, reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination. The Company recognizes accrued interest and penalties related to unrecognized tax benefits, if applicable, as a component of interest expense in the consolidated statement of income. There were no unrecognized tax benefits or accrued interest and penalties at September 30, 2015 or 2014 or for the three-month and nine-month periods then ended.

### **General Development of Business**

The Company is a bank holding company registered under the Bank Holding Company Act of 1956, as amended. The Company was incorporated under the laws of the State of California in 1995. As a bank holding company, the Company is authorized to engage in the activities permitted under the Bank Holding Company Act of 1956, as amended, and regulations thereunder. Its principal office is located at 3100 Zinfandel Drive, Suite 450, Rancho

Cordova, California 95670 and its telephone number is (916) 854-0123. The Company employed an equivalent of 99 full-time employees as of September 30, 2015.

The Company owns 100% of the issued and outstanding common shares of its banking subsidiary, American River Bank (the “Bank”), and American River Financial, a California corporation which has been inactive since its incorporation in 2003.

American River Bank was incorporated and commenced business in Fair Oaks, California, in 1983 and thereafter moved its headquarters to Sacramento, California in 1985. American River Bank operates five full service offices in Sacramento and Placer Counties including the main office located at 1545 River Park Drive, Suite 107, Sacramento and branch offices in Sacramento, Gold River, and Roseville; two full service offices in Sonoma County in Healdsburg and Santa Rosa; and three full service banking offices in Amador County in Jackson, Pioneer, and Ione. In addition, American River Bank operates loan production offices in Santa Clara County, in the city of San Jose, and serves the Contra Costa and Alameda County markets through a loan production office in the city of Pleasanton.

In 2000, the Company acquired North Coast Bank as a separate bank subsidiary. North Coast Bank was incorporated and commenced business in 1990 as Windsor Oaks National Bank in Windsor, California. In 1997, the name was changed to North Coast Bank. Effective December 31, 2003, North Coast Bank was merged with and into American River Bank. On December 3, 2004, the Company acquired Bank of Amador located in Jackson, California. Bank of Amador was merged with and into American River Bank.

The Bank's deposits are insured by the Federal Deposit Insurance Corporation (the "FDIC") up to applicable legal limits. On July 21, 2010, President Obama signed the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"). The Dodd-Frank Act includes a permanent increase to \$250,000 as the maximum FDIC insurance limit per depositor retroactive to January 1, 2008 and the extension of unlimited FDIC insurance for noninterest-bearing transaction accounts effective December 31, 2010 through December 31, 2012. On November 9, 2010, the FDIC implemented a final rule to permanently increase the maximum insurance limit to \$250,000 under the Dodd-Frank Act. The unlimited insurance coverage for noninterest bearing transaction accounts was not extended and terminated on December 31, 2012. The \$250,000 maximum deposit insurance amount per depositor remains in effect.

American River Bank does not offer trust services or international banking services and does not plan to do so in the near future. American River Bank's primary business is serving the commercial banking needs of small to mid-sized businesses within those counties listed above. American River Bank accepts checking and savings deposits, offers money market deposit accounts and certificates of deposit, makes secured and unsecured commercial, secured real estate, and other installment and term loans and offers other customary banking services. American River Bank also conducts lease financing for certain types of business equipment. American River Bank owns 100% of two inactive companies, ARBCO and American River Mortgage. ARBCO was formed in 1984 to conduct real estate development and has been inactive since 1995. American River Mortgage has been inactive since its formation in 1994. During 2014 and 2015, the Company conducted no significant activities other than holding the shares of its subsidiaries. However, it is authorized, with the prior approval of the Board of Governors of the Federal Reserve System (the "Federal Reserve Board"), the Company's principal regulator, to engage in a variety of activities which are deemed closely related to the business of banking. The common stock of the Company is registered under the Securities Exchange Act of 1934, as amended, and is listed and traded on the Nasdaq Global Select Market under the symbol "AMRB."

## Overview

The Company recorded net income of \$1,469,000 for the quarter ended September 30, 2015, which was an increase of \$345,000 compared to \$1,124,000 reported for the same period of 2014. Diluted earnings per share for the third quarter of 2015 were \$0.20 compared to \$0.14 recorded in the third quarter of 2014. The return on average equity ("ROAE") and the return on average assets ("ROAA") for the third quarter of 2015 were 6.71% and 0.92%, respectively, as compared to 5.09% and 0.74%, respectively, for the same period in 2014.

Net income for the nine months ended September 30, 2015 and 2014 was \$3,811,000 and \$3,165,000, respectively, with diluted earnings per share of \$0.50 in 2015 and \$0.39 in 2014. For the first nine months of 2015, ROAE was 5.81% and ROAA was 0.82% compared to 4.86% and 0.71%, respectively, for the same period in 2014.

Total assets of the Company increased by \$7,440,000 (1.2%) from \$617,754,000 at December 31, 2014 to \$625,194,000 at September 30, 2015. Net loans totaled \$289,774,000 at September 30, 2015, an increase of \$31,717,000 (12.3%) from \$258,057,000 at December 31, 2014. Deposit balances at September 30, 2015 totaled

\$521,369,000, up \$10,676,000 (2.1%) from the \$510,693,000 at December 31, 2014.

The Company ended the third quarter of 2015 with a leverage capital ratio of 10.8%, a Tier 1 capital ratio of 19.0%, and a total risk-based capital ratio of 20.3% compared to 11.6%, 21.6%, and 22.9%, respectively, at December 31, 2014. Table One below provides a summary of the components of net income for the periods indicated (see also the “Results of Operations” section that follows for an explanation of the fluctuations in the individual components).

**Table One: Components of Net Income**

(dollars in thousands)	For the three months ended		For the nine months ended	
	September 30,		September 30,

**Results of Operations****Net Interest Income and Net Interest Margin**

Net interest income represents the excess of interest and fees earned on interest earning assets (loans and leases, securities, Federal funds sold and investments in time deposits) over the interest paid on interest-bearing deposits and borrowed funds. Net interest margin is net interest income expressed as a percentage of average earning assets. The Company's net interest margin was 3.72% for the three months ended September 30, 2015, 3.49% for the three months ended September 30, 2014, 3.62% for the nine months ended September 30, 2015 and 3.58% for the nine months ended September 30, 2014.

The fully taxable equivalent interest income component for the third quarter of 2015 increased \$519,000 (10.3%) to \$5,553,000 compared to \$5,034,000 for the three months ended September 30, 2014. The increase in the fully taxable equivalent interest income for the third quarter of 2015 compared to the same period in 2014 is broken down by rate (up \$120,000) and volume (up \$399,000). The rate increase primarily occurred in the investment portfolio which can be attributed to a slowdown in the mortgage refinance market. As mortgage refinancing slows it also reduces the principal prepayments that the Company receives on the mortgage backed securities, which reduces the premium amounts amortized on the bonds. A lower amount of amortized premium results in higher interest income. Investment securities added \$249,000 in additional interest income related to rate. The average yield on investments increased from 2.34% from the third quarter of 2014 to 2.69% during the third quarter of 2015. The increased yield created by the investments was partially offset by a lower yield on loans which saw a decrease from 5.25% in the third quarter of 2014 to 5.07% in the third quarter of 2015. While average loans increased by \$33,171,000 (13.1%) from \$253,743,000 during the third quarter of 2014 to \$286,914,000 during the third quarter of 2015, due to the overall lower interest rate environment, the new loans added were at lower yields than the existing loans. The volume increase of \$399,000 was primarily from an increase in average loans (\$439,000) partially offset by a decrease in investments (\$40,000). The average balance of earning assets increased \$27,015,000 (5.0%) from \$539,707,000 in the

third quarter of 2014 to \$566,722,000 in the third quarter of 2015. When compared to the third quarter of 2014, average investment securities decreased \$6,156,000 (2.2%) from \$284,964,000 for the third quarter of 2014 compared to \$278,808,000 for the third quarter of 2015.

The fully taxable equivalent interest income for the nine months ended September 30, 2015 increased \$679,000 (4.5%) to \$15,912,000 compared to \$15,233,000 for the nine months ended September 30, 2014. The breakdown of the fully taxable equivalent interest income for the nine months ended September 30, 2015 over the same period in 2014 resulted from a decrease in rate (down \$215,000) and an increase in volume (up \$894,000). Average earning assets increased \$23,928,000 (4.5%) from \$536,008,000 during the first nine months of 2014 to \$559,936,000 during the same period in 2015. During the nine month periods, the Company experienced an increase in interest income due to the rates on investments (up \$553,000) but this was offset by a reduction in rates on loans (down \$769,000). While average loan balances increased by \$21,323,000 (8.4%) from \$254,243,000 during 2014 to \$275,566,000 during 2015, the Company did experience a drop in rates on these loans from 5.43% in 2014 to 5.06% in 2015. This decrease is caused by proceeds of principal pay downs and loan prepayments invested in loans yielding lower rates. The volume increase of \$894,000 is primarily related to above mentioned increase in average loan balances (up \$866,000) from 2014 to 2015.

Interest expense was \$47,000 (16.4%) lower in the third quarter of 2015 versus the prior year period, decreasing from \$287,000 to \$240,000. The average balances on interest bearing liabilities were \$359,886,000 (or \$2,776,000 and 0.8% higher) in the third quarter of 2015 compared to \$357,110,000 in the same quarter in 2014. The higher balances had only a slight impact on the overall interest expense, as the largest increase came in average borrowings which increased \$7,136,000 (64.3%) and added \$22,000 to expense. The primary decrease in interest expense relates to lower rates (down \$63,000). Rates paid on interest bearing liabilities decreased 6 basis points from 0.32% to 0.26% for the third quarter of 2014 compared to the third quarter of 2015.

Interest expense was \$732,000 in the nine-month period ended September 30, 2015 (or \$150,000 and 17.0% lower) compared to \$882,000 in the prior year period. The average balance on interest-bearing liabilities was \$356,128,000 (up \$2,706,000 or 0.8% higher) in the nine-month period ended September 30, 2015 compared to \$353,422,000 in the same period in 2014. Although the average balance was slightly higher, the increase had no material impact (up \$18,000) as increases in line items were primarily offset by decreases in others. The primary decrease in interest expense relates to lower rates (down \$168,000). Rates paid on interest bearing liabilities decreased 6 basis points from 0.33% to 0.27% for 2014 compared to 2015.

Table Two, Analysis of Net Interest Margin on Earning Assets, and Table Three, Analysis of Volume and Rate Changes on Net Interest Income and Expenses, are provided to enable the reader to understand the components and trends of the Company's interest income and expenses. Table Two provides an analysis of net interest margin on earning assets setting forth average assets, liabilities and shareholders' equity; interest income earned and interest expense paid and average rates earned and paid; and the net interest margin on earning assets. Table Three sets forth a summary of the changes in interest income and interest expense from changes in average asset and liability balances (volume) and changes in average interest rates.

- (1) The average balance of nonperforming loans is immaterial as a percentage of total loans and, as such, has been included in net loans.

(2) Loan fees of \$157,000 and \$32,000, respectively, during the three months ended September 30, 2015 and September 30, 2014, and loan fees of \$250,000 and \$278,000, respectively, during the nine months ended September 30, 2015 and September 30, 2014, have been included in the interest income computation.

- (3) Includes taxable-equivalent adjustments that primarily relate to income on certain securities that is exempt from federal income taxes. The effective federal statutory tax rate was 34% for 2015 and 2014.

(4) The rate/volume variance has been included in the rate variance.

#### **Provision for Loan and Lease Losses**

The Company experienced net loan and lease losses of \$430,000 or 0.59% (on an annualized basis) of average loans and leases for the three months ended September 30, 2015 compared to net loan and lease recoveries of \$198,000 or (0.31%) (on an annualized basis) of average loans and leases for the three months ended September 30, 2014. The Company did not increase or decrease the provision for loan and lease losses for the third quarter of 2015 or the first nine months of 2015. Due to the \$198,000 in recoveries in the third quarter of 2014, the Company had a negative \$200,000 provision for loan and lease losses for the period. For the first nine months of 2015, net loan and lease losses were \$372,000 or 0.18% (on an annualized basis). For the first nine months of 2014, the Company had a negative \$200,000 provision for loan and lease losses and net loan and lease recoveries were \$314,000 or (0.17%) (on an annualized basis) of average loans and leases outstanding. The Company has continued to experience an overall improvement in the credit quality of the loan and lease portfolio and continued loan recoveries; however, one commercial account with two loans in the total amount of \$609,000 which were charged off in the third quarter of 2015. The two loans carried specific reserves totaling \$509,000 at June 30, 2015 and the date charged off. For additional information see the "Allowance for Loan and Lease Losses Activity."

**Noninterest Income**

Table Four below provides a summary of the components of noninterest income for the periods indicated (dollars in thousands):

Table Four: Components of Noninterest Income

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2015	2014	2015	2014
Service charges on deposit accounts	\$ 132	\$ 129	\$ 376	\$ 434
Gain on sale/call of securities	33	83	251	100
Merchant fee income	98	102	285	311
Bank owned life insurance	80	73	239	202
Income from OREO properties	87	78	248	290
Other	60	55	183	193
Total noninterest income	\$ 490	\$ 520	\$ 1,582	\$ 1,530

Noninterest income decreased \$30,000 (5.8%) to \$490,000 for the three months ended September 30, 2015 compared to \$520,000 for the three months ended September 30, 2014. The decrease from the third quarter of 2014 to the third quarter of 2015 was primarily related to a decrease in gain on sale of securities from \$83,000 in 2014 to \$33,000 in 2015. For the nine months ended September 30, 2015, noninterest income increased \$52,000 (3.4%) from \$1,530,000 in 2014 to \$1,582,000 in 2015. The increase from the first nine months of 2014 compared to the same period in 2015 was primarily related to the gain on sale of securities resulting in income of \$251,000 in the first nine months of 2015 compared to \$100,000 for the first nine months of 2014, for an increase of \$151,000 (151.0%). The partial offset to this increase was a decrease in service charges of \$58,000 (13.4%) from \$434,000 in 2014 to \$376,000 in 2015 and the decrease in rental income from OREO properties which declined \$42,000 (14.5%) from \$290,000 in 2014 to \$248,000 in 2015. The decrease in service charges was based upon the Bank closely monitoring large increases in NSF income to ensure that clients incurring these costs are appropriately counselled. The decrease in OREO income resulted from a reduction in income producing OREO properties. The increase in gain on sale of securities was a result of the Bank managing its portfolio in a volatile rate environment.

**Noninterest Expense**

Noninterest expense decreased \$230,000 (6.3%) to \$3,432,000 in the third quarter of 2015 compared to \$3,662,000 in the third quarter of 2014. Salary and employee benefits expense decreased \$57,000 (2.5%) from \$2,242,000 during the third quarter of 2014 to \$2,185,000 during the third quarter of 2015. The decrease in salaries and benefits resulted from a lower number of full-time equivalent employees ("FTE"). Average FTE decreased from 102 during the third quarter of 2014 to 100 during the third quarter of 2015 due to a few open positions that the Company intends to fill in the near future. Core salaries decreased by \$31,000 (2.0%) from \$1,518,000 in the third quarter of 2014 to \$1,487,000

in the third quarter of 2015 and are related to the lower number of FTE's. In addition, placement fees paid to hire new employees decreased \$36,000 (49.3%) from \$73,000 in the third quarter of 2014 to \$37,000 in the third quarter of 2015. From the third quarter of 2014, to the third quarter of 2015, occupancy expense decreased \$1,000 and furniture and equipment expense decreased \$19,000. FDIC assessments decreased by \$11,000 from the third quarter of 2014, to the third quarter of 2015. OREO related expenses increased \$24,000 (70.6%) during the third quarter of 2015 to \$58,000, from \$34,000 in the third quarter of 2014. The increase in OREO related expense resulted from no gain or loss on sale and no write-downs of existing values resulting from updated property valuations during the third quarter of 2015. Gain on sales, net of write-downs, during the third quarter of 2014 was \$64,000. The \$64,000 net gain is accounted for as a reduction to OREO expense. In addition, the Company held more OREO properties in 2014 than in 2015 resulting in higher operating costs in 2014, that partially offset the net gain on sale in 2014. Other expenses decreased \$166,000 (20.6%) to \$641,000 in the third quarter of 2015 compared to \$807,000 in the third quarter of 2014. There were numerous fluctuations in the categories that represent other expense but the two largest decreases were lower legal expense and a rebate from the Company's debit card processor. Legal fees decreased \$43,000 (69.4%) from \$62,000 in the third quarter of 2014 to \$19,000 in the third quarter of 2015. The decrease in legal expense was primarily the result of the resolution of issues associated with a former OREO property. The fee from the debit card processor resulted from the receipt of a \$47,000 conversion payment related to the Company's decision to switch processors and is accounted for as a reduction of processing expenses. The fully taxable equivalent efficiency ratio for the third quarter of 2015 decreased to 59.1% from 69.5% for the third quarter of 2014.

Noninterest expense for the nine-month period ended September 30, 2015 was \$10,660,000 compared to \$11,014,000 for the same period in 2014 for a decrease of \$354,000 (3.2%). Salaries and benefits expense increased \$21,000 (0.3%) from \$6,479,000 for the nine months ended September 30, 2014 to \$6,500,000 for the same period in 2015. Occupancy expense decreased \$10,000 (1.1%) and furniture and equipment expense decreased \$29,000 (5.2%). FDIC assessments decreased \$49,000 (17.0%) during 2015 to \$239,000 from \$288,000 in 2014. The decrease in the FDIC assessments resulted from the Bank's improved risk assessment category. OREO related expenses increased \$104,000 (66.7%) during 2015 to \$260,000 from \$156,000 in 2014. The increase in OREO related expense resulted from no gain or loss on sale in 2015 compared to \$204,000 in 2014, higher write-downs of existing values resulting from updated property valuations or changes in values due to anticipated sales in 2015 (\$76,000) compared to \$34,000 in 2014, and lower operating expenses in 2015 (\$184,000) compared to \$326,000 in 2014 resulted from a lower number of OREO properties in 2015 compared to 2014. Other expenses decreased \$391,000 (14.8%) from \$2,637,000 for the nine months ended September 30, 2014 to \$2,246,000 for the same period in 2015. The decrease in other expenses primarily resulted from lower legal expenses in 2015. Legal expenses decreased \$263,000 (69.0%) from \$381,000 during the first nine months of 2014 to \$118,000 during the same period in 2015. This decrease is primarily related to problem loan credits and the resolution of issues associated with a former OREO property. The fully taxable equivalent efficiency ratio for the first nine months of 2015 was 63.6% as compared to 69.4% in the same period of 2014.

### **Provision for Income Taxes**

Federal and state income taxes for the quarter ended September 30, 2015 increased by \$194,000 (31.6%) from \$613,000 in the third quarter of 2014 to \$807,000 in the third quarter of 2015. The combined federal and state effective tax rate for the quarter ended September 30, 2015 was 35.5%, an increase from 35.3% for the third quarter of 2014. The higher tax expense and effective tax rate in the third quarter of 2015 compared to 2014 resulted from an increase in taxable income. Pre-tax income increased \$539,000 (31.0%) from \$1,737,000 in the third quarter of 2014 to \$2,276,000 in the third quarter of 2015. For the nine months ended September 30, 2015, the provision for income taxes was \$2,022,000 with a combined federal and state effective tax rate of 34.7%, compared to a provision of \$1,698,000 and a combined federal and state effective tax rate of 34.9% for the nine months ended September 30, 2014. The decrease in the effective tax rate in the nine months of 2015 compared to the nine months of 2014 resulted from an increase in tax benefits related to tax exempt loan interest, offset by higher pretax income in 2015. Interest on tax exempt loans increased from \$10,000 in 2014 to \$222,000 in 2015. Pretax income was \$970,000 (20.0%) higher in the first nine months of 2015 compared to the first nine months of 2014 increasing from \$4,863,000 to \$5,833,000.

### **Balance Sheet Analysis**

The Company's total assets were \$625,194,000 at September 30, 2015 compared to \$617,754,000 at December 31, 2014, representing an increase of \$7,440,000 (1.2%). The average assets for the three months ended September 30, 2015 were \$630,704,000, which represents an increase of \$24,914,000 (4.1%) over the balance of \$605,790,000 during the three-month period ended September 30, 2014. The average assets for the nine months ended September 30, 2015 were \$618,551,000, which represents an increase of \$19,210,000 (3.2%) over the average balance of \$599,341,000 during the nine-month period ended September 30, 2014.

### **Investment Securities**

The Company classifies its investment securities as available-for-sale or held-to-maturity. The Company's intent is to hold all securities classified as held-to-maturity until maturity and management believes that it has the ability to do so. Securities available-for-sale may be sold to implement asset/liability management strategies and in response to changes in interest rates, prepayment rates and similar factors. Management periodically evaluates each investment security in a loss position for other than temporary impairment relying primarily on industry analyst reports, observation of market conditions and interest rate fluctuations. Management has the ability and intent to hold securities with established maturity dates until recovery of fair value, which may be until maturity, and believes it will be able to collect all amounts due according to the contractual terms for all of the underlying investment securities; therefore, management does not consider these investments to be other-than-temporarily impaired.

Table Five below summarizes the values of the Company's investment securities held on September 30, 2015 and December 31, 2014.

**Table Five: Investment Securities Composition**

(dollars in thousands)

Available-for-sale (at fair value)	September 30, 2015	December 31, 2014
Debt securities:		
U.S. Government Agencies and Sponsored Agencies	\$ 239,821	\$ 261,115
Obligations of states and political subdivisions	25,264	26,289
Corporate bonds	1,571	1,583
Corporate stock	84	77
Total available-for-sale investment securities	\$ 266,740	\$ 289,064
Held-to-maturity (at amortized cost)		
Debt securities:		
U.S. Government Agencies and Sponsored Agencies	\$ 674	\$ 862
Total held-to-maturity investment securities	\$ 674	\$ 862

Net unrealized gains on available-for-sale investment securities totaling \$6,390,000 were recorded, net of \$2,565,000 in tax liabilities, as accumulated other comprehensive income within shareholders' equity at September 30, 2015 and net unrealized gains on available-for-sale investment securities totaling \$5,618,000 were recorded, net of \$2,247,000 in tax liabilities, as accumulated other comprehensive income within shareholders' equity at December 31, 2014.

**Loans and Leases**

The Company's historical lending activities have been in the following principal areas: (1) commercial; (2) commercial real estate; (3) multi-family real estate; (4) real estate construction (both commercial and residential); (5) residential real estate; (6) lease financing receivable; (7) agriculture; and (8) consumer loans. The Company's continuing focus on growth in our market area, new borrowers developed through the Company's marketing efforts, and credit extensions expanded to existing borrowers, resulted in the Company originating \$67.3 million in new loans during the first nine months of 2015. This production was partially offset by normal pay downs and payoffs, but still resulted in an overall net increase in net loans and leases of \$31.7 million (12.3%) from December 31, 2014. The market in which the Company operates has begun to show demand for credit products as the continued low rate environment and expectations for economic expansion have increased refinancing as well as new loan activity. Table Six below summarizes the composition of the loan portfolio as of September 30, 2015 and December 31, 2014.

**Table Six: Loan and Lease Portfolio Composition**

(dollars in thousands)	September 30, 2015			December 31, 2014			Change in	Percentage
	\$	%		\$	%		dollars	change
Commercial	\$ 34,269	12	%	\$ 25,186	10	%	\$ 9,083	36.1

Commercial	204,345	69	%	193,871	73	%	10,474	5.4
Multi-family	21,978	7	%	14,167	5	%	7,811	55.1
Construction	11,258	4	%	8,028	3	%	3,230	40.2
Residential	16,307	6	%	13,309	5	%	2,998	22.5
Lease financing receivable	837	0	%	1,286	1	%	(449)	(34.9)
Agriculture	2,358	1	%	2,882	1	%	(524)	(18.2)

Edgar Filing: AMERICAN RIVER BANKSHARES - Form 10-Q

Consumer	3,590	1	%	4,916	2	%	(1,326 )	(27.0	%)
Total loans and leases	294,942	100	%	263,645	100	%	31,297	11.9	%
Deferred loan and lease fees, net	(239 )			(287 )			48		
Allowance for loan and lease losses	(4,929 )			(5,301 )			372		
Total net loans and leases	\$ 289,774			\$ 258,057			\$ 31,717	12.3	%

A significant portion of the Company's loans and leases are direct loans and leases made to individuals and local businesses. The Company relies substantially on local promotional activity and personal contacts by American River Bank officers, directors and employees to compete with other financial institutions. The Company makes loans and leases to borrowers whose applications include a sound purpose and a viable primary repayment source, generally supported by a secondary source of repayment.

Commercial loans consist of credit lines for operating needs and working capital and loans for equipment or vehicle purchases. Consumer loans include traditional consumer products such as secured and unsecured personal loans and loans to finance the purchase of autos, boats and recreational vehicles. Construction loans are generally comprised of commitments to customers within the Company's service area for construction of owner-occupied commercial properties. Other real estate loans consist primarily of loans secured by first trust deeds on commercial or multi-family properties, typically with maturities from 3 to 10 years and original loan-to-value ratios generally from 65% to 75%. In general, except in the case of loans under SBA programs, the Company does not make long-term mortgage loans.

"Subprime" real estate loans generally refer to residential mortgages made to higher-risk borrowers with lower credit and/or income histories. Within the banking industry, many of these loans were originated with adjustable interest rates that reset upward after an introductory period. These "subprime" loans coupled with declines in housing prices led to an increase in default rates resulting in many instances of increased foreclosure rates as the adjustable interest rates reset to higher levels. The Company did not have any such "subprime" loans at September 30, 2015 and December 31, 2014.

### **Risk Elements**

The Company assesses and manages credit risk on an ongoing basis through a total credit culture that emphasizes excellent credit quality, extensive internal monitoring and established formal lending policies. Additionally, the Company contracts with an outside loan review consultant to periodically review the existing loan and lease portfolio. Management believes its ability to identify and assess risk and return characteristics of the Company's loan and lease portfolio is critical for profitability and growth. Management strives to continue its emphasis on credit quality in the loan and lease approval process, through active credit administration and regular monitoring. With this in mind, management has designed and implemented a comprehensive loan and lease review and grading system that functions to continually assess the credit risk inherent in the loan and lease portfolio.

Ultimately, underlying trends in economic and business cycles influence credit quality. American River Bank's business is concentrated in the Sacramento Metropolitan Statistical Area, which is a diversified economy, but with a large State of California government presence and employment base; in Sonoma County, which is focused on businesses within the two communities in which the Bank has offices (Santa Rosa and Healdsburg); and in Amador County, in which the Bank is primarily focused on businesses within the three communities in which it has offices (Jackson, Pioneer, and Ione). The economy of Sonoma County is diversified with professional services, manufacturing, agriculture and real estate investment and construction, while the economy of Amador County is reliant upon government, services, retail trade, manufacturing industries and Indian gaming. The Company has recently entered the Santa Clara, Contra Costa, and Alameda County markets with loan productions offices in Pleasanton and San Jose. The economies of Santa Clara, Contra Costa and Alameda Counties are diversified with professional services, manufacturing, technology related companies, real estate investment and construction.

The Company has significant extensions of credit and commitments to extend credit that are secured by real estate. The ultimate repayment of these loans is generally dependent on personal or business cash flows or the sale or refinancing of the real estate. The Company monitors the effects of current and expected market conditions and other factors on the collectability of real estate loans. The more significant factors management considers involve the following: lease rates and terms, vacancy rates, absorption and sale rates and capitalization rates; real estate values, supply and demand factors, and rates of return; operating expenses; inflation and deflation; and sufficiency of repayment sources independent of the real estate including, in some instances, personal guarantees.

In extending credit and commitments to borrowers, the Company generally requires collateral and/or guarantees as security. The repayment of such loans is expected to come from cash flow or from proceeds from the sale of selected assets of the borrowers. The Company's requirement for collateral and/or guarantees is determined on a case-by-case basis in connection with management's evaluation of the creditworthiness of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, income-producing properties, residences and other real property. The Company secures its collateral by perfecting its security interest in business assets, obtaining deeds of trust, or outright possession among other means.

In management's judgment, a concentration exists in real estate loans, which represented approximately 86% of the Company's loan and lease portfolio at September 30, 2015 and December 31, 2014. Management believes that the residential land portion of the Company's loan portfolio carries more than the normal credit risk, due primarily to curtailed demand for new and resale residential property, relative to pre-recession levels, a resulting oversupply of unsold residential land, and observed reductions in values throughout the Company's market area. Management has responded by evaluating loans that it considers to carry any significant risk above the normal risk of collectability by taking actions where possible to reduce credit risk exposure by methods that include, but are not limited to, seeking liquidation of the loan by the borrower, seeking additional tangible collateral or other repayment support, converting the property through judicial or non-judicial foreclosure proceedings, and other collection techniques. Management currently believes that it maintains its allowance for loan and lease losses at levels adequate to reflect the loss risk inherent in its total loan portfolio.

A decline in the economy in general, or decline in real estate values in the Company's primary market areas, in particular, could have an adverse impact on the collectability of real estate loans and require an increase in the provision for loan and lease losses. This could adversely affect the Company's future prospects, results of operations, profitability and stock price. Management believes that its lending practices and underwriting standards are structured with the intent to minimize losses; however, there is no assurance that losses will not occur. The Company's loan practices and underwriting standards include, but are not limited to, the following: (1) maintaining a thorough understanding of the Company's service area and originating a significant majority of its loans within that area, (2) maintaining a thorough understanding of borrowers' knowledge, capacity, and market position in their field of expertise, (3) basing real estate loan approvals not only on market demand for the project, but also on the borrowers' capacity to support the project financially in the event it does not perform to expectations (whether sale or income performance), and (4) maintaining conforming and prudent loan-to-value and loan-to-cost ratios based on independent outside appraisals and ongoing inspection and analysis by the Company's lending officers or contracted third-party professionals.

### **Nonperforming, Past Due and Restructured Loans and Leases**

At September 30, 2015, nonperforming loans and leases (those loans and leases on nonaccrual status and those loans and leases still accruing and past due 90 days or more) were \$1,932,000 or 0.66% of total loans and leases. The \$1,932,000 in nonperforming loans and leases was made up of nine loans. Four of those loans totaling \$123,000 were current (less than 30 days past due pursuant to their original or modified terms). Nonperforming loans and leases were \$1,653,000 or 0.63% of total loans and leases at December 31, 2014. Specific reserves of \$30,000 were held on the nonperforming loans at September 30, 2015 and specific reserves of \$353,000 were held on the nonperforming loans at December 31, 2014.

At December 31, 2014, the Company's nonperforming loans included three real estate loans totaling \$845,000; two commercial loans totaling \$666,000 and three consumer loans totaling \$142,000. During the first quarter of 2015, one real estate loan in the amount of \$103,000 was renewed and considered current. The Company also collected approximately \$33,000 in principal paydowns. The overall level of nonperforming loans increased \$731,000 (42.0%) to \$2,454,000 at June 30, 2015 compared to \$1,723,000 at March 31, 2015. During the second quarter of 2015, a single real estate loan in the amount of \$103,000 was paid off and two loans in the amount of \$862,000 were placed on nonperforming status. The Company also collected approximately \$28,000 in principal paydowns. Of the two loans added in the second quarter of 2015, one was real estate secured and the other was a commercial loan, both of which were transferred without an adjustment to the loan balance. During the third quarter of 2015, two commercial loans in the amount of \$609,000 were charged off and a single consumer loan that was greater than 90 days past due but in the process of collection of \$124,000 was added to nonperforming loans. The Company also collected approximately \$36,000 in principal paydowns.

There were no loan or lease concentrations in excess of 10% of total loans and leases not otherwise disclosed as a category of loans and leases as of September 30, 2015. Management is not aware of any potential problem loans, which were accruing and current at September 30, 2015, where serious doubt exists as to the ability of the borrower to comply with the present repayment terms and that would result in a significant loss to the Company. Table Seven below sets forth nonaccrual loans and loans past due 90 days or more as of September 30, 2015 and December 31, 2014.

Table Seven: Nonperforming Loans and Leases

(dollars in thousands)

	September 30, 2015	December 31, 2014
Past due 90 days or more and still accruing:		
Commercial	\$ —	\$ —
Real estate	—	—
Lease financing receivable	—	—
Agriculture	—	—
Consumer	124	—
Nonaccrual:		
Commercial	30	666
Real estate	1,316	845
Lease financing receivable	—	—
Agriculture	—	—
Consumer	462	142
Total nonperforming loans	\$ 1,932	\$ 1,653

The net interest due on nonaccrual loans and leases but excluded from interest income was \$45,000 for the three months ended September 30, 2015, compared to foregone interest of \$31,000 during the three months ended September 30, 2014. The net interest due on nonaccrual loans and leases but excluded from interest income was \$114,000 for the nine months ended September 30, 2015, compared to foregone interest of \$85,000 during the nine months ended September 30, 2014.

### Impaired Loans and Leases

The Company considers a loan to be impaired when, based on current information and events, it is probable that it will be unable to collect all amounts due (principal and interest) according to the original contractual terms of the loan or lease agreement. The measurement of impairment may be based on (i) the present value of the expected cash flows of the impaired loan or lease discounted at the loan's or lease's original effective interest rate, (ii) the observable market price of the impaired loan or lease, or (iii) the fair value of the collateral of a collateral-dependent loan. The Company does not apply this definition to smaller-balance loans or leases that are collectively evaluated for credit risk. In assessing whether a loan or lease is impaired, the Company typically reviews loans or leases graded substandard or lower with outstanding principal balances in excess of \$100,000, as well as loans considered troubled debt restructures with outstanding principal balances in excess of \$25,000. The Company identifies troubled debt restructures by reviewing each renewal, modification, or extension of a loan with a screening document. This document is designed to identify any characteristics of such a loan that would qualify it as a troubled debt restructure. If the characteristics are not present that would qualify a loan as a troubled debt restructure, it is deemed to be a modification.

At September 30, 2015, the recorded investment in loans and leases that were considered to be impaired totaled \$23,110,000, which includes \$21,385,000 in performing loans and leases. Of the total impaired loans of \$23,110,000, loans totaling \$13,178,000 were deemed to require no specific reserve and loans totaling \$9,932,000 were deemed to require a related valuation allowance of \$966,000. Of the \$13,178,000 in impaired loans that did not carry a specific reserve, there were \$4,437,000 in loans or leases that had previous partial charge-offs and \$8,741,000 in loans or leases that were analyzed and determined not to require a specific reserve or charge-off because the collateral value or discounted cash flow value exceeded the loan or lease balance. The recorded investment in loans and leases that were considered to be impaired totaled \$25,120,000 at December 31, 2014. Of the total impaired loans of \$25,120,000, loans totaling \$11,059,000 were deemed to require no specific reserve and loans totaling \$14,061,000 were deemed to require a related valuation allowance of \$1,603,000.

The Company has been operating in a market that has recently experienced sporadic improvement in real estate values of commercial, residential, land, and construction properties. As such, the Company is focused on monitoring collateral values for those loans considered collateral dependent. The collateral evaluations performed by the Company are updated as necessary, which is generally once every six months, and are reviewed by a qualified credit officer. In the third quarter of 2015, the Company had net charge-offs of \$430,000 with no added provision as the two charged off carried specific reserves. In the third quarter of 2014, the Company had net recoveries of \$198,000 with \$200,000 in provision reversed.

At September 30, 2015, there were 11 loans and leases that were modified and are currently performing (less than ninety days past due) totaling \$9,093,000 and four loans and leases that are considered nonperforming (and included in Table Seven above) totaling \$1,226,000, that are considered troubled debt restructures (“TDRs”). These TDRs have a specific reserve of \$262,000. As of September 30, 2015, of the 15 TDRs, there were six extensions, five rate reductions, two changes in terms and two lines of credit converted to term loans. All were performing as agreed except for two change in terms, one extension and one rate decrease. The Company generally requires TDRs that are on nonaccrual status to make six consecutive payments on the restructured loan or lease prior to returning the loan or lease to accrual status.

### **Allowance for Loan and Lease Losses Activity**

The Company maintains an allowance for loan and lease losses (“ALLL”) to cover probable losses inherent in the loan and lease portfolio, which is based upon management’s estimate of those losses. The ALLL is established through a provision for loan and lease losses and is increased by provisions charged against current earnings and recoveries and reduced by charge-offs. Actual losses for loans and leases can vary significantly from this estimate. The methodology and assumptions used to calculate the allowance are continually reviewed as to their appropriateness given the most recent losses realized and other factors that influence the estimation process. The model assumptions and resulting allowance level are adjusted accordingly as these factors change.

The adequacy of the ALLL and the level of the related provision for loan and lease losses is determined based on management’s judgment after consideration of numerous factors including, but not limited to: (i) local and regional economic conditions, (ii) the financial condition of the borrowers, (iii) loan impairment and the related level of expected charge-offs, (iv) evaluation of industry trends, (v) industry and other concentrations, (vi) loans and leases which are contractually current as to payment terms but demonstrate a higher degree of risk as identified by management, (vii) continuing evaluations of the performing loan portfolio, (viii) ongoing review and evaluation of problem loans identified as having loss potential, (ix) quarterly review by the Board of Directors, and (x) assessments by banking regulators and other third parties. Management and the Board of Directors evaluate the ALLL and determine its appropriate level considering objective and subjective measures, such as knowledge of the borrowers’ business, valuation of collateral, the determination of impaired loans or leases and exposure to potential losses.

The ALLL totaled \$4,929,000 or 1.67% of total loans and leases at September 30, 2015 compared to \$5,301,000 or 2.01% of total loans and leases at December 31, 2014. The decrease in the balance and percentage results from the charge off of two loans during the third quarter of 2015. These two loans carried specific reserves. The Company establishes general and specific reserves in accordance with accounting principles generally accepted in the United States of America. The ALLL is composed of categories of the loan and lease portfolio based on loan type and loan rating; however, the entire allowance is available to cover actual loan and lease losses. While management uses available information to recognize possible losses on loans and leases, future additions to the allowance may be necessary, based on changes in economic conditions and other matters. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Company’s ALLL. Such agencies may require the Company to provide additions to the allowance based on their judgment of information available to them at the time of their examination.

The ALLL as a percentage of nonperforming loans and leases was 255.1% at September 30, 2015 and 320.7% at December 31, 2014. The ALLL as a percentage of impaired loans and leases was 21.3% at September 30, 2015 and 20.1% at December 31, 2014. Of the total nonperforming and impaired loans and leases outstanding as of September 30, 2015, there were \$5,299,000 in loans or leases that had been reduced by partial charge-offs of \$817,000. As these loan or lease balances are charged off, the remaining balances, following analysis, normally do not initially require specific reserves and are not eligible for general reserves. The impact of this on credit ratios is such that the Company’s ALLL as a percentage may be lower, because the partial charge-offs have reduced the potential probable incurred losses related to those credits.

The Company's policy with regard to loan or lease charge-offs continues to be that a loan or lease is charged off against the ALLL when management believes that the collectability of the principal is unlikely. As previously discussed in the "Impaired Loans and Leases" section, certain loans are evaluated for impairment. Generally, if a loan is collateralized by real estate, and considered collateral dependent, the impaired portion will be charged off to the allowance for loan and lease losses unless it is in the process of collection, in which case a specific reserve may be warranted. If the collateral is other than real estate and considered impaired, a specific reserve may be warranted.

It is the policy of management to maintain the allowance for loan and lease losses at a level believed to be adequate for known and inherent risks in the portfolio. Our methodology incorporates a variety of risk considerations, both quantitative and qualitative, in establishing an allowance for loan and lease losses that management believes is appropriate at each reporting date. Based on information currently available to analyze inherent credit risk, including economic factors, overall credit quality, historical delinquencies and a history of actual charge-offs, management believes that the provision for loan and lease losses and the allowance for loan and lease losses are prudent and adequate. Adjustments may be made based on differences from estimated loan and lease growth, the types of loans constituting this growth, changes in risk ratings within the portfolio, and general economic conditions. However, no prediction of the ultimate level of loans and leases charged off in future periods can be made with any certainty. Table Eight below summarizes, for the periods indicated, the activity in the ALLL.

Table Eight: Allowance for Loan and Lease Losses  
(dollars in thousands)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Average loans and leases outstanding	\$286,914	\$253,743	\$275,566	\$254,243
Allowance for loan and lease losses at beginning of period	\$5,359	\$5,462	\$5,301	\$5,346
Loans and leases charged off:

Additions to allowance charged to operating expenses	—	(200 )	—	(200 )
Allowance for loan and lease losses at end of period	\$4,929	\$5,460	\$4,929	\$5,460
Ratio of net charge-offs to average loans and leases outstanding (annualized)	0.59	% -0.31	% 0.18	% -0.17
Provision of allowance for loan and lease losses to average loans and leases outstanding (annualized)	0.00	% -0.31	% 0.00	% -0.11
Allowance for loan and lease losses to loans and leases net of deferred fees at end of period	1.67	% 2.16	% 1.67	% 2.16

#### Other Real Estate Owned

At September 30, 2015, the Company had four other real estate owned (“OREO”) properties totaling \$3,781,000. This compares to seven properties totaling \$4,647,000 at December 31, 2014 and eight properties totaling \$5,201,000 at September 30, 2014.

During the third quarter of 2015, the Company did not foreclose on any property or sell any OREO property. At September 30, 2015, there was not a valuation reserve. This compares to a reserve balances of \$156,000 at December 31, 2014 and \$130,000 at September 30, 2014. The Company believes that all four OREO properties owned at September 30, 2015 are carried approximately at fair value.

## Deposits

At September 30, 2015, total deposits were \$521,369,000 representing a \$10,676,000 (2.1%) increase from the December 31, 2014 balance of \$510,693,000. The Company's deposit growth plan for 2015 is to concentrate its efforts on increasing noninterest-bearing demand, interest-bearing money market and NOW accounts, and savings accounts while allowing higher cost time deposits to mature and close or renew at lower rates. In addition, the Company evaluated the rate structure on some of the higher cost money market accounts and reduced the interest rates on some relationships. During the first nine months of 2015, the Company experienced increases in noninterest-bearing (\$22,340,000 or 14.3%), interest-bearing checking (\$2,883,000 or 4.7%), and savings accounts (\$1,354,000 or 2.3%), and decreases in money market (\$14,376,000 or 9.7%) and time deposits (\$1,525,000 or 1.7%).

## Other Borrowed Funds

Other borrowings outstanding as of September 30, 2015 and December 31, 2014, consist of advances (both long-term and short-term) from the Federal Home Loan Bank of San Francisco ("FHLB"). Table Nine below summarizes these borrowings.

Table Nine: Other Borrowed Funds  
(dollars in thousands)

	September 30, 2015		December 31, 2014	
	Amount	Rate	Amount	Rate
Short-term borrowings:				
FHLB advances	\$3,500	1.28%	\$3,500	0.92%
Long-term borrowings:				
FHLB advances	\$7,500	1.24%	\$7,500	1.39%

The maximum amount of short-term borrowings at any month-end during the first nine months of 2015 and 2014 was \$3,500,000. The FHLB advances are collateralized by loans and securities pledged to the FHLB. The following is a breakdown of rates and maturities on FHLB advances (dollars in thousands):

	Short-term		Long-term	
Amount	\$ 3,500		\$7,500	
Maturity	2016		2016 to 2019	
Weighted average rates	1.28	%	1.24	%

## Capital Resources

The Company and American River Bank are subject to certain regulatory capital requirements administered by the Federal Reserve Board and the Federal Deposit Insurance Corporation (the "FDIC"). Failure to meet these minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on the Company's consolidated financial statements. Under current capital adequacy guidelines and the regulatory framework for prompt corrective action, banks must meet specific capital guidelines that involve quantitative measures of their assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The Company's and American River Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

At September 30, 2015, shareholders' equity was \$86,278,000, representing a decrease of \$3,369,000 (3.8%) from \$89,647,000 at December 31, 2014. The reduction was due primarily to a decrease in common stock of \$7,843,000 related to repurchases made under the 2015 Stock Repurchase Program, partially offset by an increase in Retained Earnings of \$3,811,000 due to the net income for the year. During the third quarter of 2015, the Company repurchased 386,508 shares of its common stock at an average price of \$10.03 per share under the 2015 Stock Repurchase Program. During 2015, the Company repurchased 790,989 shares of its common stock at an average price of \$9.87 per share. The ratio of total risk-based capital to risk adjusted assets was 20.3% at September 30, 2015 and 22.9% at December 31, 2014. Tier 1 risk-based capital to risk-adjusted assets was 19.0% at September 30, 2015 and 21.6% at December 31, 2014. The leverage ratio was 10.8% at September 30, 2015 and 11.6% at December 31, 2014.

Table Ten below lists the Company's actual capital ratios at September 30, 2015 and December 31, 2014 as well as the minimum capital ratios for capital adequacy.

Table Ten: Capital Ratios

Capital to Risk-Adjusted Assets	At September 30, 2015		At December 31, 2014		Minimum Regulatory Capital Requirements	
American River Bankshares						
Leverage Ratio	10.8	%	11.6	%	4.0	%
Tier 1 Risk-Based Capital	19.0	%	21.6	%	6.0	%
Total Risk-Based Capital	20.3	%	22.9	%	8.0	%
American River Bank						
Leverage Ratio	10.9	%	11.7	%	4.0	%
Common Equity Tier 1 Risk-Based Capital	18.8	%	N/A		4.5	%
Tier 1 Risk-Based Capital	18.8	%	21.7	%	6.0	%
Total Risk-Based Capital	20.0	%	22.9	%	8.0	%

Capital ratios are reviewed on a regular basis to ensure that capital exceeds the prescribed regulatory requirements and is adequate to meet future needs. Management believes that both the Company and American River Bank met all of their capital adequacy requirements as of September 30, 2015 and December 31, 2014.

In July 2013, the federal bank regulatory agencies issued interim final rules that revised the risk-based capital requirements in order to implement the "Basel III" regulatory capital reforms released by the Basel Committee on Banking Supervision and changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010. The Basel III reforms reflected in the final rules include an increase in the risk-based capital requirements and certain changes to capital components and the calculation of risk-weighted assets.

Effective January 1, 2015, banking organizations like American River Bank must comply with new minimum capital ratio requirements to be phased-in between January 1, 2015 and January 1, 2019, which would consist of the following: (i) a new common equity Tier 1 capital to total risk weighted assets ratio of 4.5%; (ii) a Tier 1 capital to total risk weighted assets ratio of 6% (increased from 4%); (iii) a total capital to total risk weighted assets ratio of 8% (unchanged from current rules); and (iv) a Tier 1 capital to adjusted average total assets ("leverage") ratio of 4%.

In addition, a "capital conservation buffer," is established which when fully phased-in will require maintenance of a minimum of 2.5% of common equity Tier 1 capital to total risk weighted assets in excess of the regulatory minimum capital ratio requirements described above. The 2.5% buffer will increase the minimum capital ratios to (i) a common equity Tier 1 capital ratio of 7.0%, (ii) a Tier 1 capital ratio of 8.5%, and (iii) a total capital ratio of 10.5%. The new buffer requirement will be phased-in between January 1, 2016 and January 1, 2019. If the capital ratio levels of a banking organization fall below the capital conservation buffer amount, the organization will be subject to limitations on (i) the payment of dividends; (ii) discretionary bonus payments; (iii) discretionary payments under Tier 1 instruments; and (iv) engaging in share repurchases.

The federal bank regulatory agencies also implemented changes to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions if their capital ratios begin to show signs of weakness. These changes became effective January 1, 2015 and require insured depository institutions to meet the following increased capital ratio requirements in order to qualify as “well capitalized:” (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8% (increased from 6%); (iii) a total capital ratio of 10% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 5% (increased from 4%).

On January 21, 2015, the Company approved and authorized a stock repurchase program for 2015 (the “2015 Program”). The repurchase target of 5% of the outstanding common shares was reached in the first quarter of 2015 and, on July 15, 2015, the Company approved and authorized an increase to this stock repurchase program and this increase (representing 5% of the outstanding common shares) was reached in the third quarter of 2015. See Part II, Item 2, for additional disclosure regarding the 2015 Program.

## **Inflation**

The impact of inflation on a financial institution differs significantly from that exerted on manufacturing or other commercial concerns primarily because its assets and liabilities are largely monetary. In general, inflation primarily affects the Company and its subsidiaries through its effect on market rates of interest, which affects the Company's ability to attract loan customers. Inflation affects the growth of total assets by increasing the level of loan demand and potentially adversely affects capital adequacy because loan growth in inflationary periods can increase at rates higher than the rate that capital grows through retention of earnings which may be generated in the future. In addition to its effects on interest rates, inflation increases overall operating expenses. Inflation has not had a significant effect upon the results of operations of the Company and its subsidiaries during the periods ended September 30, 2015 and 2014.

## **Liquidity**

Liquidity management refers to the Company's ability to provide funds on an ongoing basis to meet fluctuations in deposit levels as well as the credit needs and requirements of its clients. Both assets and liabilities contribute to the Company's liquidity position. Federal funds lines, short-term investments and securities, and loan and lease repayments contribute to liquidity, along with deposit increases, while loan and lease funding and deposit withdrawals decrease liquidity. The Company assesses the likelihood of projected funding requirements by reviewing historical funding patterns, current and forecasted economic conditions and individual client funding needs. Commitments to fund loans and outstanding standby letters of credit at September 30, 2015 were approximately \$29,150,000 and \$363,000, respectively. Such loan commitments relate primarily to revolving lines of credit and other commercial loans and to real estate construction loans. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

The Company's sources of liquidity consist of cash and due from correspondent banks, overnight funds sold to correspondent banks, unpledged marketable investments and loans held for sale and/or pledged for secured borrowings. At September 30, 2015, consolidated liquid assets totaled \$216.6 million or 34.7% of total assets compared to \$234.7 million or 38.0% of total assets on December 31, 2014. In addition to liquid assets, the Company maintains two short-term unsecured lines of credit in the amount of \$17,000,000 with two of its correspondent banks. At September 30, 2015, the Company had \$17,000,000 available under these credit lines. Additionally, the Bank is a member of the FHLB. At September 30, 2015, the Bank could have arranged for up to \$87,807,000 in secured borrowings from the FHLB. These borrowings are secured by pledged mortgage loans and investment securities. At September 30, 2015, the Company had advances, borrowings and commitments (including letters of credit) outstanding of \$11,000,000, leaving \$76,807,000 available under these FHLB secured borrowing arrangements. American River Bank also has a secured borrowing arrangement with the Federal Reserve Bank of San Francisco. The borrowing can be secured by pledging selected loans and investment securities. At September 30, 2015, the Company's borrowing capacity at the Federal Reserve Bank was \$16,122,000. The Company serves primarily a business and professional customer base and, as such, its deposit base is susceptible to economic fluctuations. Accordingly, management strives to maintain a balanced position of liquid assets and borrowing capacity to offset the potential runoff of these volatile and/or cyclical deposits.

Liquidity is also affected by portfolio maturities and the effect of interest rate fluctuations on the marketability of both assets and liabilities. The Company can sell any of its unpledged securities held in the available-for-sale category to meet liquidity needs. Furthermore, the Bank can pledge additional unencumbered securities to borrow from the Federal Reserve Bank of San Francisco and the FHLB.

## **Off-Balance Sheet Items**

The Company is a party to financial instruments with off-balance-sheet risk in the normal course of business in order to meet the financing needs of its customers and to reduce its exposure to fluctuations in interest rates. These financial instruments consist of commitments to extend credit and letters of credit. These instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized on the balance sheet.

The Company's exposure to credit loss in the event of nonperformance by the other party for commitments to extend credit and letters of credit is represented by the contractual amount of those instruments. The Company applies the same credit policies to commitments and letters of credit as it does for loans included on the consolidated balance sheet. As of September 30, 2015 and December 31, 2014, commitments to extend credit and standby letters of credit were the only financial instruments with off-balance sheet risk. The Company has not entered into any contracts for financial derivative instruments such as futures, swaps, options or similar instruments. Loan commitments and standby letters of credit were \$29,513,000 and \$32,995,000 at September 30, 2015 and December 31, 2014, respectively. As a percentage of net loans and leases these off-balance sheet items represent 10.2% and 12.8%, respectively.

The Company has certain ongoing commitments under operating leases. These commitments do not significantly impact operating results.

### **Website Access**

American River Bankshares maintains a website where certain information about the Company is posted. Through the website, its annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments thereto, as well as Section 16 Reports and amendments thereto, are available as soon as reasonably practicable after such material is electronically filed with or furnished to the Securities and Exchange Commission (the "SEC"). These reports are free of charge and can be accessed through the address [www.americanriverbank.com](http://www.americanriverbank.com) by clicking on the *Investor Relations/SEC Filings* link located at that address. Once you have selected the *SEC Filings* link you will have the option to access the Section 16 Reports or the other above-referenced reports filed by the Company by selecting the appropriate link.

## **Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

### **Market Risk Management**

*Overview.* Market risk is the risk of loss from adverse changes in market prices and rates. The Company's market risk arises primarily from interest rate risk inherent in its loan, investment and deposit functions. The goal for managing the assets and liabilities of the Company is to maximize shareholder value and earnings while maintaining a high quality balance sheet without exposing the Company to undue interest rate risk. The Board of Directors has overall responsibility for the interest rate risk management policies. The Company has an Enterprise Risk Management Committee, made up of Company management that establishes and monitors guidelines to control the sensitivity of earnings to changes in interest rates.

*Asset/Liability Management.* Activities involved in asset/liability management include but are not limited to lending, accepting and placing deposits and investing in securities. Interest rate risk is the primary market risk associated with asset/liability management. Sensitivity of earnings to interest rate changes arises when yields on assets change in a different time period or in a different amount from that of interest costs on liabilities. To mitigate interest rate risk, the structure of the balance sheet is managed with the goal that movements of interest rates on assets and liabilities are correlated and contribute to earnings even in periods of volatile interest rates. The asset/liability management policy sets limits on the acceptable amount of variance in net interest margin and market value of equity under changing interest environments. The Company uses simulation models to forecast earnings, net interest margin and market value of equity.

Simulation of earnings is the primary tool used to measure the sensitivity of earnings to interest rate changes. Using computer-modeling techniques, with specialized software built for this specific purpose for financial institutions, the Company is able to estimate the potential impact of changing interest rates on earnings, net interest margin and market value of equity. A balance sheet is prepared using detailed inputs of actual loans, securities and interest-bearing liabilities (i.e. deposits/borrowings). The balance sheet is processed using multiple interest rate scenarios. The scenarios include a rising rate forecast, a flat rate forecast and a falling rate forecast which take place within a one-year time frame. The net interest income is measured over one and two-year periods assuming a gradual change in rates over the twelve-month horizon. The simulation modeling attempts to estimate changes in the Company's net interest income utilizing a detailed current balance sheet.

After a review of the model results as of September 30, 2015, the Company does not consider the fluctuations from the base case, to have a material impact on the Company's projected results and are within the tolerance levels outlined in the Company's interest rate risk policies. The simulations of earnings do not incorporate any management actions, which might moderate the negative consequences of interest rate deviations. Therefore, they do not reflect likely actual results, but serve as reasonable estimates of interest rate risk.

#### **Item 4. Controls and Procedures.**

The Company, under the supervision and with the participation of its management, including the Chief Executive Officer and the Chief Financial Officer, evaluated the effectiveness of the design and operation of the Company's "disclosure controls and procedures" (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2015. Based on that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely making known to them material information relating to the Company and the Company's consolidated subsidiaries required to be disclosed in the Company's reports filed or submitted under the Exchange Act.

During the quarter ended September 30, 2015, there have been no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect our internal controls over financial reporting.

## **PART II – OTHER INFORMATION**

#### **Item 1. Legal Proceedings.**

From time to time, the Company and/or its subsidiaries is a party to claims and legal proceedings arising in the ordinary course of business. The Company's management is not aware of any significant pending legal proceedings to which either it or its subsidiaries may be a party or has recently been a party, which will have a significant adverse effect on the financial condition or results of operations of the Company or its subsidiaries, taken as a whole.

#### **Item 1A. Risk Factors.**

There have been no significant changes in the risk factors previously disclosed in the Company's Form 10-K for the period ended December 31, 2014, filed with the Securities and Exchange Commission on February 27, 2015.

#### **Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

During 2014, the Company approved and authorized a stock repurchase program for 2014 (the "2014 Program"). The 2014 Program authorized the repurchase during 2014 of up to 5% of the outstanding shares of the Company's common stock, or approximately 424,462 shares. During 2014, the Company repurchased 424,462 shares of its common stock at an average price of \$9.77 per share. On January 21, 2015, the Company approved and authorized a stock repurchase program for 2015 (the "2015 Program"). The 2015 Program authorized the repurchase during 2015 of up to 5% of the outstanding shares of the Company's common stock, or approximately 404,481 shares based on the 8,089,615 shares outstanding as of December 31, 2014. Any repurchases under the 2015 Program will be made from time to time by the Company in the open market as conditions allow. All such transactions will be structured to comply with SEC Rule 10b-18 and all shares repurchased under the 2015 Program will be retired. The number, price and timing of the repurchases will be at the Company's sole discretion and the 2015 Program may be re-evaluated depending on market conditions, capital and liquidity needs or other factors. Based on such re-evaluation, the Board of Directors may suspend, terminate, modify or cancel the 2015 Program at any time without notice. During the first quarter of 2015, the Company repurchased the targeted amount of 404,481 shares of its common stock at an average price of \$9.70 per share. On July 17, 2015, the Company approved and authorized an increase in the 2015 Program. The increase authorized the repurchase during the remainder of 2015 of up to 5% of the outstanding shares of the Company's common stock, or approximately an additional 386,508 shares based on the 7,730,157 shares outstanding as of June 30, 2015. During the third quarter of 2015, the Company repurchased the targeted amount of 386,508 shares of its common stock at an average price of \$10.03 per share.

The following table lists shares repurchased during the quarter ended September 30, 2015 and the maximum amount available to repurchase under the repurchase plan.

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid Per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) That May Yet Be Purchased Under the Plans or Programs
Month #1				
July 1 through				
July 31, 2015	150,000	\$9.92	150,000	236,508
Month #2				
August 1 through				
August 31, 2015	90,137	\$10.07	90,137	146,371
Month #3				
September 1 through				
September 30, 2015	146,371	\$10.12	146,371	-
Total	386,508	\$10.03	386,508	N/A
