[SIDEBAR]

WHAT ARE SYNDICATED BANK LOANS?

SYNDICATED BANK LOANS ARE TYPICALLY SECURED, FLOATING RATE LOANS TO CORPORATE BORROWERS MADE BY A GROUP, OR SYNDICATE, OF BANKS AND OTHER LENDERS. A GROUP OF LENDERS PROVIDES CAPITAL TO COMPANIES FOR VARIED PURPOSES, SUCH AS MERGER AND ACQUISITION ACTIVITY, LEVERAGED BUYOUTS OR REFINANCINGS. BORROWING RATES ARE GENERALLY PEGGED TO AN INDEX, SUCH AS LIBOR, THE LONDON INTERBANK OFFERED RATE.

Interest rates remained at historically low levels largely due to aggressive action by the Federal Reserve Board (the Fed). In November 2002, the Fed cut the federal funds target rate 50 basis points (0.50%) to 1.25%, the lowest level in more than 40 years. Short-term interest rates, as measured by the 3-month London InterBank Offered Rate (LIBOR), the benchmark underlying many of the Fund's floating rate loans, fell from 1.82% at the beginning of the reporting period to 1.35% on January 31, 2003. Long-term rates also dipped, and the yield on the 10-year Treasury note fell from 4.51% to 4.00%.

U.S. equity markets experienced significant volatility during the reporting period. Initially declining, they staged a brief recovery before falling again. Overall, the Dow Jones Industrial Average fell from 8736.59 on July 31, 2002, to 8053.81 at period-end.

SYNDICATED BANK LOAN MARKET

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

The six-month reporting period was another volatile period for the bank loan market. Total issuance, including investment-grade issues, diminished due to high default rates, accounting irregularities and sector-specific difficulties in industries like telecommunications and utilities. According to Standard & Poor's, however, leveraged loan issuance for all of 2002 was actually the same as 2001, indicating that the problems in the investment-grade market benefited the leveraged loan segment to some extent.

After a very strong second quarter 2002, which saw numerous refinancings, the leveraged loan market took a breather at the

2

beginning of the summer. By late summer, lack of demand sent secondary prices tumbling, closing the primary market to all but the highest quality new issues. As has become commonplace in the hot-and-cold loan market, however, a turnaround was soon at hand thanks to a recovery in equity and high yield markets. By early fall, market tone began to improve, and a number of new deals -- including several leveraged buyouts -- were well received. In addition, buyers started to express interest in discounted loans in the secondary market. After hitting lows in early November, secondary prices recovered somewhat by the end of the reporting period.

Default rates improved during the period, falling to 6% at the end of 2002, down from a peak of 7.4% in June 2002. At year-end 2002, the default rate, as measured by number of issuers, was at its lowest level since May 2000. 1

Over the past six months, the loan market started to resemble the high yield bond market, with many deals restructured to meet market demands. Final interest rate spreads and price discounts were often very different from originally proposed terms. By the beginning of 2003, spreads started to tighten a bit, reflecting investors' willingness to accept more risk. This opening of the high yield market also tightened pricing a bit, and some companies had the option of issuing high yield bonds to meet their capital needs. The pipeline of new deals remained surprisingly strong in early 2003, reflecting the market's ability to absorb new issues and refinance older loans.

PORTFOLIO NOTES

Within this environment, Franklin Floating Rate Trust posted a +0.75% cumulative total return for the six months ended January 31, 2003, as shown in the Performance Summary on page 7. The Fund's share price, as measured by net asset value, declined from \$8.31 on July 31, 2002, to a low of \$8.00 in mid-November as the bank loan market seemed to bottom out, before ending the period at \$8.16.

During the six months under review, we continued to pursue our strategy of focusing on providing loans to companies with strong cash flow, franchise value and asset coverage. Consistent with that approach, we invested in the Dex Media East bank facility, which funded the leveraged buyout of Qwest's yellow page directory business. Qwest, a financially troubled telephone company serving areas in the western U.S., desperately needed to raise cash to reduce debt, and

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

two major leveraged buyout firms agreed to buy the firm's yellow page directories business in two parts. We invested in the bank loan that financed the first transaction. We felt that the inherently stable nature of the yellow page business and strong collateral value -- including the right to be Qwest's official yellow page publisher and the use of the Qwest yellow page brand name -- made the loan attractive.

We also participated in refinancing the bank debt of PerkinElmer, a leading provider of scientific instruments, consumables and services to the pharmaceutical, biomedical, environmental testing and general industrial industries. We found the bank debt attractive due to the company's leading market position and diversified product offering, as well as its global reach.

4

MDCP Acquisitions, the largest European-based integrated manufacturer of containerboard, corrugated containers and other paper-based packaging products, was another of the Fund's new investments during the period. We found the MDCP senior credit issues attractive due to their strong underlying security package and significant asset coverage. Additionally, we believe MDCP benefits from an internationally experienced management team with local expertise in each of MDCP's geographic markets, including Europe, North America and Latin America.

Lastly, the Fund also invested in the debt of Integrated Defense Technologies (IDT), a leading supplier of defense electronics whose products are installed on front-line defense platforms and used by all branches of the U.S. military. We felt comfortable lending to IDT because its products are viewed by the military as "mission critical," giving the company a stable base of funding. Moreover, IDT's management believes that its large base of installed products provides ample opportunity for future growth and diversification of the company's program and customer base, as well as significant opportunities for follow-on business.

Looking forward, we will continue our strategy of holding loans from companies that we believe have strong market positions and asset coverage. We are cautiously optimistic on the leveraged loan market. The economy appears to be in the midst of a shallow but solid recovery and interest rates remain very low, but potentially poised to increase. With its relatively stable share price and potential for high, current income, we believe the Fund is an attractive investment for those seeking to diversify portfolios heavily weighted in equities.

FRANKLIN FLOATING RATE TRUST

Notes to Financial Statements (unaudited)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The Franklin Floating Rate Trust (the Fund) is registered under the Investment Company Act of 1940 as a non-diversified, closed-end, continuously offered investment company. The Fund seeks current income and preservation of capital. The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION:

The Fund invests primarily in senior secured corporate loans and senior secured debt that meet credit standards established by Franklin Advisers Inc. The Fund values its securities based on quotations provided by banks, broker/dealers or pricing services experienced in such matters. Restricted securities and securities for which market quotations are not readily available are valued at fair value as determined by management in accordance with procedures established by the Board of Trustees.

B. FOREIGN CURRENCY TRANSLATION:

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities and income items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollars equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. SECURITIES PURCHASED ON A WHEN-ISSUED OR DELAYED DELIVERY BASIS

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

The Fund may purchase securities on a when-issued or delayed delivery basis, with payment and delivery scheduled for a future date. These transactions are subject to market fluctuations and are subject to the risk that the value at delivery may be more or less than the trade date purchase price. Although the Fund will generally purchase these securities with the intention of holding the securities, it may sell the securities before the settlement date.

D. INCOME TAXES:

No provision has been made for income taxes because the Fund's policy is to qualify as a regulated investment company under the Internal Revenue Code and to distribute substantially all of its taxable income.

E. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS:

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Discounts and premiums on securities purchased are amortized over the lives of the respective securities. Facility fees are recognized as income over the expected term of the loan. Dividend income and distributions to shareholders are recorded on the ex-dividend date.

FRANKLIN FLOATING RATE TRUST

Notes to Financial Statements (unaudited) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONT.)

F. ORGANIZATION COSTS:

Organization costs are amortized on a straight-line basis over five years.

G. ACCOUNTING ESTIMATES:

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expense during the reporting period. Actual results could differ from those estimates.

H. UNFUNDED LOAN COMMITMENTS:

The Fund may enter into certain credit agreements, all or a portion of which may be unfunded. The Fund is obligated to fund these loan commitments at the borrowers' discretion. These commitments are disclosed in the accompanying Statement of Investments and Statement of Assets and Liabilities.

2. SHARES OF BENEFICIAL INTEREST

At January 31, 2003, there were an unlimited number of shares authorized (\$.01 par value). Transactions in the Fund's shares were as follows:

3. TENDER OF SHARES

24

FRANKLIN FLOATING RATE TRUST

Notes to Financial Statements (unaudited) (CONTINUED)

4. REVOLVING CREDIT FACILITY

The Fund participates in a \$200 million senior unsecured revolving credit facility to fund shareholder redemptions or meet unfunded loan commitments. The facility agreement ends on December 19, 2003. Interest is charged at the Federal Funds Rate plus .50%. Facility fees paid are amortized on a straight line basis over the term of the commitment. Annual commitment fees of .09% are charged on the unused portion of the facility and allocated among the participating funds based on net assets.

During the period ended January 31, 2003, the Fund did not utilize the facility.

5. TRANSACTIONS WITH AFFILIATES

Certain officers and trustees of the Fund are also officers and/or directors of the following entities:

ENTITY	AFFILIATION

Franklin/Templeton Investor Services LLC (Investor Services)	Transfer agent

The Fund pays an investment management fee to Advisers of .80% per year of the average daily net assets of the Fund.

6. INCOME TAXES

At January 31, 2003, the net unrealized appreciation (depreciation) based on the cost of investments for income tax purposes of \$1,488,406,674 was as follows:

6. INCOME TAXES (CONT.)

At July 31, 2002, the Fund had tax basis capital losses of \$2,115,134, which may be carried over to offset future capital gains. Such losses expire in 2009.

At July 31, 2002, the Fund has deferred capital losses occurring subsequent to October 31, 2001 of \$127,009,562. For tax purposes, such losses will be reflected in the year ending July 31, 2003.

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of defaulted securities, foreign currency transactions, and bond premiums.

Net realized capital gains (losses) differ for financial statement and tax purposes primarily due to differing treatment of wash sales, foreign currency transactions, and bond premiums.

7. INVESTMENT TRANSACTIONS

Purchases and sales of securities (excluding short-term securities) for the period ended January 31, 2003 aggregated \$205,224,916 and \$672,789,803, respectively.

8. INVESTMENTS IN FRANKLIN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

Edgar Filing: FRANKLIN FLOATING RATE TRUST - Form N-30D

The Fund may invest in the Franklin Institutional Fiduciary Trust Money Market Portfolio (the Sweep Money Fund), an open-end investment company managed by Advisers. Management fees paid by the Fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management fees paid by the Sweep Money Fund. The Fund earned \$1,612,247 of dividend income from investment in the Sweep Money Fund.

9. CREDIT RISK AND DEFAULTED SECURITIES

The Fund has 95.64% of its portfolio invested in below investment grade and comparable quality unrated high yield securities, which tend to be more sensitive to economic conditions than higher rated securities. At January 31, 2003, the Fund held defaulted securities with a value aggregating \$23,514,993 representing 1.82% of the Fund's net assets. For information as to specific securities, see the accompanying Statement of Investments.

FRANKLIN FLOATING RATE TRUST

10. RESTRICTED SECURITIES

At January 31, 2003, investments in securities included issues that are restricted or illiquid. Restricted securities are often purchased in private placement transactions, are not registered under the Securities Act of 1933, may have contractual restrictions on resale, and are valued under methods approved by the Board of Trustees as reflecting fair value. A security may also be considered illiquid if it lacks a readily available market or if its valuation has not changed for a certain period of time. At January 31, 2003, the Fund held investments in restricted and illiquid securities that were valued under approved methods by the Trustees, as follows:
