Cautionary Note Regarding Forward-Looking Statements

This Report on Form 10-Q contains various statements that may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, and are intended to be covered by the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Any statements about our expectations, beliefs, plans, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. These forward-looking statements often can be, but are not always, identified by the use of words such as "assume," "expect," "intend," "plan," "project," "believe," "estimate," "predict," "anticipate," "may," "might," "should," "could," "goal," "potential" and similar expressions. We base these forward-looking statements on our current expectations and projections about future events, our assumptions regarding these events and our knowledge of facts at the time the statements are made. These statements include statements relating to our projected growth, anticipated future financial performance, and management's long-term performance goals, as well as statements relating to the anticipated effects on results of operations and financial condition.

These forward-looking statements are subject to various risks and uncertainties that may be outside our control and our actual results could differ materially from our projected results. In addition, our past results of operations do not necessarily indicate our future results. The forward-looking statements could be affected by many factors, including but not limited to:

Local, regional, and national economic conditions and events and the impact they may have on us and our customers, and our assessment of that impact on our estimates including, the allowance for loan losses;

Delay in the pace of economic recovery and stagnant or decreasing employment levels;

Changes in the financial performance or condition of the Company's customers, or changes in the performance or creditworthiness of our customers' suppliers or other counterparties, which could lead to decreased loan utilization rates, delinquencies, or defaults, which could negatively affect our customers' ability to meet certain credit obligations;

Volatility in credit or equity markets and its effect on the global economy;

Changes in consumer spending, borrowing or saving habits;

Competition for loans and deposits and failure to attract or retain deposits or loans;

The ability to increase market share and control expenses;

Risks associated with concentrations in real estate related loans;

Other-than-temporary impairment charges to our securities portfolio;

An oversupply of inventory and deterioration in values of California commercial real estate;

A prolonged slowdown in construction activity;

Changes in the level of nonperforming assets, charge-offs, or other credit quality measures, and their impact on the adequacy of the Company's allowance for loan losses and the Company's provision for loan losses;

The effects of and changes in trade, monetary and fiscal policies and laws, including the interest rate policies of the Federal Open Market Committee of the Federal Reserve Board;

Changes in inflation, interest rates, and market liquidity which may impact interest margins and impact funding sources;

Our ability to raise capital or incur debt on reasonable terms;

3

Table of Contents

Regulatory limits on Heritage Bank of Commerce's ability to pay dividends to the Company;

The impact of reputational risk on such matters as business generation and retention, funding and liquidity;

The impact of cyber security attacks or other disruptions to the Company's information systems and any resulting compromise of data or disruptions in service;

The effect of the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 and the rules and regulations to be promulgated by supervisory and oversight agencies implementing the legislation taking into account that the precise timing, extent and nature of such rules and regulations and the impact on the Company are uncertain;

The impact of revised capital requirements under Basel III;

Significant changes in applicable laws and regulations, including those concerning taxes, banking and securities;

Changes in the competitive environment among financial or bank holding companies and other financial service providers;

The effect of changes in accounting policies and practices, as may be adopted by the regulatory agencies, the Public Company Accounting Oversight Board, the Financial Accounting Standards Board and other accounting standard setters;

The costs and effects of legal and regulatory developments, including resolution of legal proceedings or regulatory or other governmental inquiries, and the results of regulatory examinations or reviews; and

Our success in managing the risks involved in the foregoing factors.

We are not able to predict all the factors that may affect future results. You should not place undue reliance on any forward looking statement, which speaks only as of the date of this Report on Form 10-Q. Except as required by applicable laws or regulations, we do not undertake any obligation to update or revise any forward looking statement, whether as a result of new information, future events or otherwise.

HERITAGE COMMERCE CORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

June 30, 2014

(Unaudited)

1) Basis of Presentation

The unaudited consolidated financial statements of Heritage Commerce Corp (the "Company" or "HCC") and its wholly owned subsidiary, Heritage Bank of Commerce (the "Bank" or "HBC"), have been prepared pursuant to the rules and regulations for reporting on Form 10-Q. Accordingly, certain information and notes required by accounting principles generally accepted in the United States of America ("GAAP") for annual financial statements are not included herein. The interim statements should be read in conjunction with the consolidated financial statements and notes that were included in the Company's Form 10-K for the year ended December 31, 2013. The Company also established the following unconsolidated subsidiary grantor trusts: Heritage Capital Trust I; Heritage Statutory Trust I; Heritage Statutory Trust II; and Heritage Commerce Corp Statutory Trust III, which were Delaware Statutory business trusts formed for the exclusive purpose of issuing and selling trust preferred securities. During the third quarter of 2012, the Company dissolved the Heritage Statutory Trust I and the Heritage Capital Trust I. During the third quarter of 2013, the Company dissolved the Heritage Statutory Trust II and the Heritage Commerce Corp Statutory Trust III.

HBC is a commercial bank serving customers located in Santa Clara, Alameda, Contra Costa, and San Benito counties of California. No customer accounts for more than 10 percent of revenue for HBC or the Company. Management evaluates the Company's performance as a whole and does not allocate resources based on the performance of different lending or transaction activities. Accordingly, the Company and its subsidiary operate as one business segment.

In management's opinion, all adjustments necessary for a fair presentation of these consolidated financial statements have been included and are of a normal and recurring nature. All intercompany transactions and balances have been eliminated.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ significantly from these estimates.

The results for the three and six months ended June 30, 2014 are not necessarily indicative of the results expected for any subsequent period or for the entire year ending December 31, 2014.

Reclassifications

Certain reclassifications of prior year balances have been made to conform to the current year presentation. These reclassifications had no impact on the Company's consolidated financial position, results of operations or net change in cash and cash equivalents.

Adoption of New Accounting Standards

In January 2014, the Financial Accounting Standards Board ("FASB") amended existing guidance clarifying that an in substance repossession or foreclosure occurs, and a creditor is considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan, upon either (1) the creditor obtaining legal title to the residential real estate property upon

HERITAGE COMMERCE CORP

(Unaudited)

1) Basis of Presentation (Continued)

completion of a foreclosure or (2) the borrower conveying all interest in the residential real estate property to the creditor to satisfy that loan through completion of a deed in lieu of foreclosure or through a similar legal agreement. Additionally, the amendments require interim and annual disclosure of both (1) the amount of foreclosed residential real estate property held by the creditor and (2) the recorded investment in consumer mortgage loans collateralized by residential real estate property that are in the process of foreclosure according to local requirements of the applicable jurisdiction. The amendments in this update are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. For entities other than public business entities, the amendments in this update are effective for annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. We are evaluating the impact of adopting the new guidance on the consolidated financial statements.

In January 2014, the FASB issued guidance for accounting for investments in qualified affordable housing projects, which represents a consensus of the Emerging Issues Task Force and sets forth new accounting for qualifying investments in flow-through limited liability entities that invest in affordable housing projects. The new guidance will allow an investor that meets certain conditions to amortize the cost of its investment in proportion to the tax credits and other tax benefits it receives. The new accounting method, referred to as the proportional amortization method, will allow amortization of the tax credit investment to be reflected along with the primary benefits, the tax credits and other tax benefits, on a net basis in the income statement within the income tax expense (benefit) line. For public business entities, the guidance is effective for interim and annual periods beginning after December 15, 2014. For all other entities, the guidance is effective for annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. Early adoption is permitted in the annual period for which financial statements have not been issued. We are evaluating the impact of adopting the new guidance on the consolidated financial statements.

In May 2014, the FASB issued an update to the guidance for accounting for revenue from contracts with customers. The guidance in this update affects any entity that either enters into contracts with customers to transfer goods or services or enters into contracts for the transfer of nonfinancial assets unless those contracts are within the scope of other standards (for example, insurance contracts or lease contracts). The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance provides steps to follow to achieve the core principle. An entity should disclose sufficient information to enable users of financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. Qualitative and quantitative information is required about contracts with customers, significant judgments and changes in judgments, and assets recognized from the costs to obtain or fulfill a contract. The amendments in this update become effective for annual periods and interim periods within those annual periods beginning after December 15, 2016. We are evaluating the impact of adopting the new guidance on the consolidated financial statements.

(Unaudited)

2) Earnings Per Share

Basic earnings per common share is computed by dividing net income, less dividends and discount accretion on preferred stock, by the weighted average common shares outstanding. The Series C Preferred Stock participates in the earnings of the Company and, therefore, the shares issued on the conversion of the Series C Preferred Stock are considered outstanding under the two class method of computing basic earnings per common share during periods of earnings. Diluted earnings per share reflect potential dilution from outstanding stock options and common stock warrants, using the treasury stock method. The common stock warrant was antidilutive for the six months ended June 30, 2013. The Company repurchased the warrant for \$140,000 in the second quarter of 2013. A reconciliation of these factors used in computing basic and diluted earnings per common share is as follows:

	For the Three Jun				For the Six Months Ended June 30,				
	2014		2013		2014		2013		
	(Do	llars	s in thousands, ex	cept	per share amou	ints)			
Net income available to common shareholders	\$ 3,100	\$	2,793	\$	5,952	\$	4,973		
Less: undistributed earnings allocated to Series C Preferred Stock	358		489		673		871		
Distributed and undistributed earnings allocated to common shareholders	\$ 2,742	\$	2,304	\$	5,279	\$	4,102		
Weighted average common shares outstanding for basic earnings per common share	26,370,510		26,336,244		26,365,167		26,332,793		
Dilutive effect of stock options oustanding, using the treasury stock method	132,891		35,648		128,299		46,123		
Shares used in computing diluted earnings per common share	26,503,401		26,371,892		26,493,466		26,378,916		
Basic earnings per share	\$ 0.10	\$	0.09	\$	0.20	\$	0.16

There were no holdings of securities of any one issuer, other than the U.S. Government and its sponsored entities, in an amount greater than 10% of shareholders' equity. At June 30, 2014, the Company held 371 securities (141 available-for-sale and 230 held-to-maturity), of which 202 had fair values below amortized cost. At June 30, 2014, there were \$39,693,000 of agency mortgage-backed securities available-for-sale, \$7,133,000 of corporate bonds available-for-sale, \$7,798,000 of agency mortgage-backed securities held-to-maturity and \$58,402,000 of municipals bonds held-to-maturity carried with an unrealized loss for over 12 months. The total unrealized loss for securities over 12 months was \$4,562,000 at June 30, 2014. The unrealized losses were due to higher interest rates.

HERITAGE COMMERCE CORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

June 30, 2014

(Unaudited)

4) Securities (Continued)

The issuers are of high credit quality and all principal amounts are expected to be paid when securities mature. The fair value is expected to recover as the securities approach their maturity date and/or market rates decline. The Company does not believe that it is more likely than not that the Company will be required to sell a security in an unrealized loss position prior to recovery in value. The Company does not consider these securities to be other than temporarily impaired at June 30, 2014.

At December 31, 2013, the Company held 392 securities (163 available-for-sale and 229 held-to-maturity), of which 275 had fair values below amortized cost. At December 31, 2013, there were \$8,920,000 of agency mortgage-backed securities available-for-sale, \$1,860,000 of corporate bonds available-for-sale, \$9,134,000 of agency mortgage-backed securities held-to-maturity, and \$25,520,000 of municipal bonds held-to-maturity carried with an unrealized loss for over 12 months. The total unrealized loss for securities over 12 months was \$6,178,000 at December 31, 2013. The unrealized losses were due to higher interest rates. The issuers were of high credit quality and all principal amounts were expected to be paid when securities mature. The fair value was expected to recover as the securities approach their maturity date and/or market rates decline. The Company did not believe that it is more likely than not that the Company would be required to sell a security in an unrealized loss position prior to recovery in value. The Company did not consider these securities to be other than temporarily impaired at December 31, 2013.

The proceeds from sales of securities and the resulting gains and losses are listed below:

	Three M J	Months June 30,		Six Mont June						
	2014	2013			2014		2013			
		(Dollars in thousands)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

June 30, 2014

(Unaudited)

5) Loans (Continued)

Past due loans 30 days or greater totaled \$9,394,000 and \$9,638,000 at June 30, 2014 and December 31, 2013, respectively, of which \$4,657,000 and \$5,900,000 were on nonaccrual. At June 30, 2014, there were also \$3,031,000 loans less than 30 days past due included in nonaccrual loans held-for-investment. At December 31, 2013, there were also \$5,426,000 loans less than 30 days past due included in nonaccrual loans held-for-investment. Management's classification of a loan as "nonaccrual" is an indication that there is reasonable doubt as to the full recovery of principal or interest on the loan. At that point, the Company stops accruing interest income, and reverses any uncollected interest that had been accrued as income. The Company begins recognizing interest income only as cash interest payments are received and it has been determined the collection of all outstanding principal is not in doubt. The loans may or may not be collateralized, and collection efforts are pursued.

Credit Quality Indicators

Concentrations of credit risk arise when a number of customers are engaged in similar business activities, or activities in the same geographic region, or have similar features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions. The Company's loan portfolio is concentrated in commercial (primarily manufacturing, wholesale, and service) and real estate lending, with the balance in consumer loans. While no specific industry concentration is considered significant, the Company's lending operations are located in the Company's market areas that are dependent on the technology and real estate industries and their supporting companies. Thus, the Company's borrowers could be adversely impacted by a downturn in these sectors of the economy which could reduce the demand for loans and adversely impact the borrowers' ability to repay their loans.

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans as to credit risk. This analysis is performed on a quarterly basis. Nonclassified loans generally include those loans that are expected to be repaid in accordance with contractual loans terms. Classified loans are those loans that are assigned a substandard, substandard-nonaccrual, or doubtful risk rating using the following definitions:

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Substandard-Nonaccrual. Loans classified as substandard-nonaccrual are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any, and it is probable that the Company will not receive payment of the full contractual principal and interest. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected. In addition, the Company no longer accrues interest on the loan because of the underlying weaknesses.

HERITAGE COMMERCE CORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

June 30, 2014

(Unaudited)

5) Loans (Continued)

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loss. Loans classified as loss are considered uncollectable or of so little value that their continuance as assets is not warranted. This classification does not necessarily mean that a loan has no recovery or salvage value; but rather, there is much doubt about whether, how much, or when the recovery would occur. Loans classified as loss are immediately charged off against the allowance for loan losses. Therefore, there is no balance to report at June 30, 2014 or December 31, 2013.

The following table provides a summary of the loan portfolio by loan type and credit quality classification at period end:

		,	June	e 30, 2014			Dec	ceml	ber 31, 201	13

In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed in accordance with the Company's underwriting policy.

The recorded investment of troubled debt restructurings at June 30, 2014 was \$3,124,000, which included \$1,490,000 of nonaccrual loans and \$1,634,000 of accruing loans. The book balance of troubled debt restructurings at December 31, 2013 was \$3,722,000, which included \$3,230,000 of nonaccrual loans and \$492,000 of accruing loans. Approximately \$757,000 and \$1,186,000 in specific reserves were established with respect to these loans as of June 30, 2014 and December 31, 2013, respectively. As of June 30, 2014 and December 31, 2013, the Company had no additional amounts committed on any loan classified as a troubled debt restructuring.

There were no new loans modified as troubled debt restructurings during the three and six month periods ended June 30, 2014 and 2013.

Classified loans in the table above include Small Business Administration ("SBA") guarantees.

HERITAGE COMMERCE CORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

June 30, 2014

(Unaudited)

5) Loans (Continued)

A loan is considered to be in payment default when it is 30 days contractually past due under the modified terms. There were no defaults on troubled debt restructurings, within twelve months following the modification, during the three and six month periods ended June 30, 2014 and 2013.

A loan that is a troubled debt restructuring on nonaccrual status may return to accruing status after a period of at least six months of consecutive payments in accordance with the modified terms.

6) Income Taxes

Some items of income and expense are recognized in different years for tax purposes than when applying generally accepted accounting principles, leading to timing differences between the Company's actual tax liability and the amount accrued for this liability based on book income. These temporary differences comprise the "deferred" portion of the Company's tax expense or benefit, which is accumulated on the Company's books as a deferred tax asset or deferred tax liability until such time as they reverse.

Realization of the Company's deferred tax assets is primarily dependent upon the Company generating sufficient taxable income to obtain benefit from the reversal of net deductible temporary differences and utilization of tax credit carryforwards and the net operating loss carryforwards for Federal and California state income tax purposes. The amount of deferred tax assets considered realizable is subject to adjustment in future periods based on estimates of future taxable income. Under generally accepted accounting principles, a valuation allowance is required to be recognized if it is "more likely than not" that a deferred tax asset will not be realized. The determination of the realizability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, including forecasts of future income, cumulative losses, applicable tax planning strategies, and assessments of current and future economic and business conditions.

The Company had net deferred tax assets of \$19,105,000, and \$23,326,000, at June 30, 2014, and December 31, 2013, respectively. After consideration of the matters in the preceding paragraph, the Company determined that it is more likely than not that the net deferred tax asset at June 30, 2014 and December 31, 2013 will be fully realized in future years.

7) Benefit Plans

Supplemental Retirement Plan

The Company has a supplemental retirement plan (the "Plan") covering current and former key executives and directors. The Plan is a nonqualified defined benefit plan. Benefits are unsecured as

8) Equity

Common Stock Warrant

The common stock warrant issued to the U.S. Treasury as part of the Company's participation in the U.S. Treasury Capital Purchase Program was repurchased by the Company in the second quarter of 2013.

Series C Preferred Stock

On June 21, 2010, the Company issued to various institutional investors 21,004 shares of Series C Convertible Perpetual Preferred Stock ("Series C Preferred Stock"). The Series C Preferred Stock is mandatorily convertible into common stock at a conversion price of \$3.75 per share upon a subsequent transfer of the Series C Preferred Stock to third parties not affiliated with the holder in a widely dispersed offering. The 21,004 shares of Series C Preferred Stock are convertible into 5,601,000 shares of common stock. The Series C Preferred Stock is non-voting except in the case of certain transactions that would affect the rights of the holders of the Series C Preferred Stock or applicable law. The holders of Series C Preferred Stock receive dividends on an as converted basis when dividends are also declared for holders of common stock. The Series C Preferred Stock is not redeemable by the Company or by the holders and has a liquidation preference of \$1,000 per share. The Series C Preferred Stock ranks senior to the Company's common stock.

9) Fair Value

Accounting guidance establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data (for example, interest rates and yield curves observable at commonly quoted intervals, prepayment speeds, credit risks, and default rates).

Level 3: Significant unobservable inputs that reflect a reporting entity's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Financial Assets and Liabilities Measured on a Recurring Basis

The fair values of securities available for sale are determined by obtaining quoted prices on nationally recognized securities exchanges (Level 1 inputs) or matrix pricing, which is a mathematical technique widely used in the industry to value debt securities without relying exclusively on quoted prices for the specific securities, but rather by relying on the securities' relationship to other benchmark quoted securities (Level 2 inputs).

HERITAGE COMMERCE CORP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

June 30, 2014

(Unaudited)

9) Fair Value (Continued)

The fair value of interest-only ("I/O") strip receivable assets is based on a valuation model used by a third party. The Company is able to compare the valuation model inputs and results to widely available published industry data for reasonableness (Level 2 inputs).

	Fair Value			Jsing

There were no transfers between Level 1 and Level 2 during the period for assets measured at fair value on a recurring basis.

Assets and Liabilities Measured on a Non-Recurring Basis

The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. The appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

Foreclosed assets are valued at the time the loan is foreclosed upon and the asset is transferred to foreclosed assets. The fair value is based primarily on third party appraisals, less costs to sell. The appraisals may utilize a single valuation approach or a combination of approaches including the comparable sales and income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such

9) Fair Value (Continued)

The following table shows the detail of the impaired loans held-for- investment and the impaired loans held-for-investment carried at fair value for the periods indicated:

	June 3	,	December 3	31, 2013
		(Dollars	in thousands)	
Impaired loans held-for-investment:				
Book value of impaired loans held-for-investment carried at fair value	\$	5,892	\$	8,472
Book value of impaired loans held-for-investment carried at cost		3,430		3,346
Total impaired loans held-for-investment	\$	9,322	\$	11,818
Impaired loans held-for-investment carried at fair value:				
Book value of impaired loans held-for-investment carried at fair value	\$	5,892	\$	8,472
Specific valuation allowance		(1,512)		(2,456)
Impaired loans held-for-investment carried at fair value, net	\$	4,380	\$	6,016

Impaired loans held-for-investment which are measured primarily for impairment using the fair value of the collateral were \$9,322,000 at June 30, 2014, after partial charge-offs of \$264,000 in the first six months of 2014. In addition, these loans had a specific valuation allowance of \$1,512,000 at June 30, 2014. Impaired loans held-for-investment totaling \$5,892,000 at June 30, 2014 were carried at fair value as a result of the aforementioned partial charge-offs and specific valuation allowances at period-end. The remaining \$3,430,000 of impaired loans were carried at cost at June 30, 2014, as the fair value of the collateral exceeded the cost basis of each respective loan. Partial charge-offs and changes in specific valuation allowances during the first six months of 2014 on impaired loans held-for-investment carried at fair value at June 30, 2014 resulted in an additional provision for loan losses of \$421,000.

Impaired loans held for investment of \$11,818,000 at December 31, 2013, after partial charge offs of \$318,000 in 2013, were analyzed for additional impairment primarily using the fair value of collateral. In addition, these loans had a specific valuation allowance of \$2,456,000 at December 31, 2013. Impaired loans held for investment totaling \$8,472,000 at December 31, 2013 were carried at fair value as a result of the aforementioned partial charge offs and specific valuation allowances at year end. The remaining \$3,346,000 of impaired loans were carried at cost at December 31, 2013, as the fair value of the collateral exceeded the cost basis of each respective loan. Partial charge offs and changes in specific valuation allowances during 2013 on impaired loans held for investment carried at fair value at December 31, 2013 resulted in an additional provision for loan losses of \$508,000.

At December 31, 2013, foreclosed assets had a carrying amount of \$575,000, with no valuation allowance at December 31, 2013.

The Company obtains third party appraisals on its impaired loans held-for-investment and foreclosed assets to determine fair value. Generally, the third party appraisals apply the "market approach," which is a valuation technique that uses prices and other relevant information generated by market transactions involving identical or comparable (that is, similar) assets, liabilities, or a group of assets and liabilities, such as a business. Adjustments are then made based on the type of property, age

9) Fair Value (Continued)

The carrying amounts and estimated fair values of the Company's financial instruments at December 31, 2013:

					Estimated F	air	Value	
	Carrying Amounts	A	uoted Prices in active Markets for dentical Assets (Level 1)		Significant Other Observable Inputs (Level 2)		Significant nobservable Inputs (Level 3)	Total
			(Dol	lars	in thousand	s)		
Assets:								
Cash and cash equivalents	\$ 112,605	\$	112,605					\$ 112,605
Securities available-for-sale	\$ 280,100			\$	280,100			\$ 280,100
Securities held-to-maturity	\$ 95,921			\$	86,032			\$ 86,032
Loans (including loans								
held-for-sale), net	\$ 898,897			\$	3,148	\$	890,368	\$ 893,516
FHLB and FRB stock	\$ 10,435							N/A
Accrued interest receivable	\$ 4,085			\$	1,729	\$	2,356	\$ 4,085
Loan servicing rights and I/O strips								
receivables	\$ 2,172			\$	4,203			\$ 4,203
Liabilities:								
Time deposits	\$ 277,844			\$	278,239			\$ 278,239
Other deposits	\$ 1,008,377			\$	1,008,377			\$ 1,008,377
Accrued interest payable	\$ 192			\$	192			\$ 192

The methods and assumptions, not previously discussed, used to estimate the fair value are described as follows:

Cash and Cash Equivalents

The carrying amounts of cash on hand, noninterest and interest bearing due from bank accounts, and Fed funds sold approximate fair values and are classified as Level 1.

Loans

The fair value of loans held-for-sale is estimated based upon binding contracts and quotes from third parties resulting in a Level 2 classification.

Fair values of loans, excluding loans held for sale, are estimated as follows: For variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values resulting in a Level 3 classification. Fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. Impaired loans are valued at the lower of cost or fair value as described previously. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

(Unaudited)

9) Fair Value (Continued)

FHLB and FRB Stock

It was not practical to determine the fair value of FHLB and FRB stock due to restrictions placed on their transferability.

Accrued Interest Receivable/Payable

The carrying amounts of accrued interest approximate fair value resulting in a Level 2 or Level 3 classification.

Deposits

The fair values disclosed for demand deposits (e.g., interest and noninterest checking, passbook savings, and certain types of money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount) resulting in a Level 2 classification. The carrying amounts of variable rate, fixed-term money market accounts approximate their fair values at the reporting date resulting in a Level 2 classification. The carrying amounts of variable rate, certificates of deposit approximate their fair values at the reporting date resulting in a Level 2 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flows calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

Off-balance Sheet Instruments

Fair values for off-balance sheet, credit-related financial instruments are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing. The fair value of commitments is not material.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information about the financial instruments. These estimates do not reflect any premium or discount that could result from offering for sale at one time the entire holdings of a particular financial instrument. Fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

10) Equity Plan

The Company maintained and Amended and Restated 2004 Equity Plan (the "2004 Plan") for directors, officers, and key employees. The 2004 Plan was terminated on May 23, 2013. On May 23, 2013, the Company's shareholders approved the 2013 Equity Incentive Plan (the "2013 Plan"). The equity plans provide for the grant of incentive and nonqualified stock options and restricted stock. The equity plans provide that the option price for both incentive and nonqualified stock options will be

HERITAGE COMMERCE CORP

(Unaudited)

10) Equity Plan (Continued)

determined by the Board of Directors at no less than the fair value at the date of grant. Options granted vest on a schedule determined by the Board of Directors at the time of grant. Generally options vest over four years. All options expire no later than ten years from the date of grant. Restricted stock is subject to time vesting. As of June 30, 2014, the Company granted 312,050 shares of nonqualified stock options and 15,000 shares of restricted stock subject to time vesting requirements. There were 1,400,450 shares available for the issuance of equity awards under the 2013 Plan as of June 30, 2014.

Stock option activity under the equity plans is as follows:

Total Stock Options	Number of Shares	Weighted Average Exercise Price		Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at January 1, 2014	1,506,504	\$	11.80	Life (Tears)	, 41110
Granted	312,050	\$	8.07		
Exercised	(4,572)	\$	4.20		
Forfeited or expired	(40,786)	\$	13.28		
Outstanding at June 30, 2014	1,773,196	\$	11.13	6.2	\$ 1,984,000
Vested or expected to vest	1,684,536			6.2	\$ 1,884,800
Exercisable at June 30, 2014	1,142,160			4.6	\$ 1,362,000

As of June 30, 2014, there was \$2,376,000 of total unrecognized compensation cost related to nonvested stock options granted under the equity plans. That cost is expected to be recognized over a weighted-average period of approximately 2.96 years.

Restricted stock activity under the equity plans is as follows:

		Weighted Average		
	Number	Gr	ant Date	
Total Restricted Stock Award	of Shares	Fair Value		
Nonvested shares at January 1, 2014	58,000	\$	6.28	
Granted	15,000	\$	8.23	

Exercised	(18,000) \$	6.39
Nonvested shares at June 30, 2014	55,000 \$	6.77

As of June 30, 2014, there was \$138,000 of total unrecognized compensation cost related to nonvested restricted stock awards granted under the equity plans. The cost is expected to be recognized over a weighted-average period of approximately 2.89 years.

11) Capital Requirements

The Company and its subsidiary bank are subject to various regulatory capital requirements administered by the banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's financial statements and operations. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and HBC must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off balance sheet items as calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to help ensure capital adequacy require the Company and HBC to maintain minimum amounts and ratios (set forth in the table below) of total and Tier 1 capital (as defined in the regulations) to risk weighted assets (as defined), and of Tier 1 capital to average assets (as defined). Management believes that, as of June 30, 2014 and 2013, the Company and HBC met all capital adequacy guidelines to which they were subject.

The Company's consolidated capital amounts and ratios are presented in the following table, together with capital adequacy requirements.

	Actual Amount Ratio		Under Regul	latory	Capita Adequa	l cy
4			Amount	Ratio	Amount	Ratio
		(Dollars in tho	usands)

(Unaudited)

11) Capital Requirements (Continued)

HBC's actual capital and required amounts and ratios are presented in the following table.

				To Be Well-Capita Under Pro Corrective A	alized mpt	Required 1 Capital Adequae	Į
		Actual		Provision	ns	Purpose	•
	A	Amount	Ratio	Amount	Ratio	Amount	Ratio
			(Dollars in tho	usands)		
As of June 30, 2014:							
Total Capital (to risk-weighted assets)	\$	179,379	14.1% \$	127,133	10.0% \$	101,706	8.0%
Tier 1 Capital (to risk-weighted assets)	\$	163,448	12.9% \$	76,280	6.0% \$	50,853	4.0%
Tier 1 Capital (to average assets)	\$	163,448	11.2% \$	73,215	5.0% \$	58,572	4.0%
As of December 31, 2013:							
Total Capital (to risk-weighted assets)	\$	163,827	13.9% \$	117,872	10.0% \$	94,297	8.0%
Tier 1 Capital (to risk-weighted assets)	\$	149,037	12.6% \$	70,723	6.0%\$	47,148	4.0%
Tier 1 Capital (to average assets)	\$	149,037	10.1%\$	73,858	5.0% \$	59,086	4.0%

As of June 30, 2014 the Company's and HBC's capital ratios exceed the highest regulatory capital requirement of prompt corrective provisions. There are no conditions or events since June 30, 2014 that management believes have changed the categorization of the Company or HBC as well capitalized.

HCC is dependent upon dividends from HBC. Under California General Corporation Law, the holders of common stock are entitled to receive dividends when and as declared by the Board of Directors, out of funds legally available. The California Financial Code provides that a state licensed bank may not make a cash distribution to its shareholders in excess of the lesser of the following: (i) the bank's retained earnings; or (ii) the bank's net income for its last three fiscal years, less the amount of any distributions made by the bank to its shareholders during such period. However, a bank, with the prior approval of the Commissioner of the California Department of Business Oversight Division of Financial Institutions may make a distribution to its shareholders of an amount not to exceed the greater of (i) a bank's retained earnings; (ii) its net income for its last fiscal year; or (iii) its net income for the current fiscal year. Also with the prior approval of the Commissioner of the California Department of Business Oversight ("DBO") and the shareholders of the bank, the bank may make a distribution to its shareholders, as a reduction in capital of the bank. In the event that the Commissioner determines that the shareholders' equity of a bank is inadequate or that the making of a distribution by a bank would be unsafe or unsound, the Commissioner may order a bank to refrain from making such a proposed distribution. As of June 30, 2014, HBC would be required to obtain regulatory approval from the DBO for a dividend or other distribution to HCC. Similar restrictions

HERITAGE COMMERCE CORP

June 30, 2014

(Unaudited)

11) Capital Requirements (Continued)

applied to the amount and sum of loan advances and other transfers of funds from HBC to the parent company.

12) Loss Contingencies

The Company's policy is to accrue for legal costs associated with both asserted and unasserted claims when it is probable that such costs will be incurred and such costs can be reasonably estimated. A number of parties have filed complaints in the Superior Court of California for the County of Santa Clara asserting certain claims against the Company arising from the transfer of funds. The litigation is in the early stages and it is not possible to determine the amount of the loss, if any, arising from the claim in excess of the legal expenses expected to be incurred in defense of the litigation. The Company intends to vigorously defend the litigation.

13) Subsequent Event

On July 24, 2014, the Company announced that its Board of Directors declared a \$0.05 per share quarterly cash dividend to holders of common stock and Series C preferred stock (on an as converted basis). The dividend will be paid on August 27, 2014, to shareholders of record on August 7, 2014.

Table of Contents

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion provides information about the results of operations, financial condition, liquidity, and capital resources of Heritage Commerce Corp (the "Company" or "HCC") and its wholly owned subsidiary, Heritage Bank of Commerce (sometimes referred to as the "Bank" or "HBC"). This information is intended to facilitate the understanding and assessment of significant changes and trends related to our financial condition and the results of operations. This discussion and analysis should be read in conjunction with our consolidated financial statements and the accompanying notes presented elsewhere in this report. Unless we state otherwise or the context indicates otherwise, references to the "Company," "Heritage," "we," "us," and "our," in this Report on Form 10-Q refer to Heritage Commerce Corp and Heritage Bank of Commerce.

CRITICAL ACCOUNTING POLICIES

Critical accounting policies are discussed in our Form 10-K for the year ended December 31, 2013. There are no changes to these policies as of June 30, 2014.

EXECUTIVE SUMMARY

This summary is intended to identify the most important matters on which management focuses when it evaluates the financial condition and performance of the Company. When evaluating financial condition and performance, management looks at certain key metrics and measures. The Company's evaluation includes comparisons with peer group financial institutions and its own performance objectives established in the internal planning process.

The primary activity of the Company is commercial banking. The Company's operations are located entirely in the southern and eastern regions of the general San Francisco Bay Area of California in the counties of Santa Clara, Alameda Contra Costa, and San Benito. The largest city in this area is San Jose and the Company's market includes the headquarters of a number of technology based companies in the region known commonly as Silicon Valley. The Company's customers are primarily closely held businesses and professionals.

Performance Overview

For the three months ended June 30, 2014, net income was \$3.3 million, or \$0.10 per average diluted common share, compared to \$2.8 million, or \$0.09 per average diluted common share, for the three months ended June 30, 2013. The Company's annualized return on average assets was 0.91% and annualized return on average equity was 7.45% for the three months ended June 30, 2014, compared to 0.82% and 6.53%, respectively, a year ago.

For the six months ended June 30, 2014, net income available to common shareholders was \$6.4 million, or \$0.20 per average diluted common share, an increase from \$5.0 million, or \$0.16 per average diluted common share, for the six months ended June 30, 2013. The Company's annualized return on average assets was 0.88% and annualized return on average equity was 7.28% for the six months ended June 30, 2014, compared to 0.71% and 5.88%, respectively, a year ago.

The following are major factors that impacted the Company's results of operations:

The net interest margin, on a fully tax equivalent ("FTE") basis, increased 18 basis points to 4.07% for the second quarter of 2014, from 3.89% for the second quarter of 2013, primarily due to loan growth, higher yields on securities, and a lower cost of funds. For the six months ended June 30, 2014, net interest margin increased 26 basis points to 4.06%, from 3.80% for the six months ended June 30, 2013, primarily due to loan growth, higher yields on securities, and a lower cost of funds.

Table of Contents

The yield on the loan portfolio was 4.78% for the second quarter of 2014, compared to 4.93% for the second quarter of 2013. The yield on the loan portfolio was 4.82% for the six months ended June 30, 2014, compared to 5.03% for the six months ended June 30, 2013. The decrease in the yield on the loan portfolio for the second quarter and six months ended June 30, 2014 compared to the same periods in 2013 was a result of competitive market conditions.

Net interest income increased 13% to \$13.7 million for the second quarter of 2014, compared to \$12.2 million for the second quarter of 2013, driven primarily by loan growth and increases in core deposits. Net interest income increased 11% to \$27.0 million for the six months ended June 30, 2014, compared to \$24.3 million for the six months ended June 30, 2013.

There was a \$198,000 credit to the provision for loan losses for the second quarter of 2014, compared to a \$270,000 credit to the provision for loan losses for the second quarter of 2013. For the six months ended June 31, 2014, there was a \$208,000 credit to the provision for loan losses, compared to a \$270,000 credit to the provision for loan losses for the six months ended June 30, 2013.

Noninterest income was \$2.0 million for the second quarter of 2014, compared to \$1.9 million for the second quarter of 2013. For the six months ended June 30, 2014, noninterest income was \$4.1 million, compared to \$3.6 million for the six months June 30, 2013. Primarily due to higher gain on sales of SBA loans, noninterest income was higher for the second quarter and for the six months ended June 30, 2014, compared to the same periods in 2013.

Noninterest expense for the second quarter of 2014 was \$10.9 million, an increase of 5% from \$10.4 million for the second quarter of 2013. Noninterest expense for the six months ended June 30, 2014 increased 2% to \$21.7 million, compared to \$21.2 million for the six months ended June 30, 2013. The increase in noninterest expense for the second quarter and six months ended June 30, 2014 was primarily due to increased salaries and employee benefits expense, partially offset by lower professional fees. Higher salaries and employee benefits expense reflected the growth in staffing for business initiatives, the impact of merit increases, and costs associated with the reorganization of administrative responsibilities in the second quarter of 2014. Professional fees were lower due to net recoveries in legal fees as a result of the resolution or payoff of certain problem loans in the second quarter of 2014.

The efficiency ratio for the second quarter of 2014 improved to 69.50%, compared to 73.85% for the second quarter of 2013. The efficiency ratio for the six months ended June 30, 2014 was 69.71%, compared to 75.92% for the six months ended June 30, 2013. The decrease in the efficiency ratio in the second quarter and six months ended June 30, 2014, compared to the same periods in 2013, was primarily due to higher net interest income and noninterest income, partially offset by higher noninterest expense.

Income tax expense for the second quarter of 2014 was \$1.7 million, compared to \$1.2 million for the second quarter of 2013. The effective tax rate for the second quarter of 2014 increased to 33%, compared to 29% for the second quarter of 2013, primarily as a result of reduced income tax credits. Income tax expense for the six months ended June 30, 2014 was \$3.2 million, compared to \$2.0 million for the six months ended June 30, 2013. The effective tax rate for the six months ended June 30, 2014 was 33%, compared to 29% for the six months ended June 30, 2013. The difference in the effective tax rate for the periods reported, compared to the combined Federal and state statutory tax rate of 42%, is primarily the result of the Company's investment in life insurance policies whose earnings are not subject to taxes, tax credits related to investments in low income housing limited partnerships, and tax-exempt interest income earned on municipal bonds.

Table of Contents

The following are important factors in understanding our current financial condition and liquidity position:

Cash, Federal funds sold, interest-bearing deposits in other financial institutions and securities available-for-sale decreased 18% to \$310.9 million at June 30, 2014, from \$379.5 million at June 30, 2013, and decreased 21% from \$392.7 million at December 31, 2013.

Securities held-to-maturity, at amortized cost, were \$96.0 million at June 30, 2014, compared to \$81.7 million at June 30, 2013, and \$95.9 million at December 31, 2013.

Total loans, excluding loans held-for-sale, increased 18% to \$990.3 million at June 30, 2014, from \$842.0 million at June 30, 2013, and increased 8% from \$914.9 million at December 31, 2013.

Nonperforming assets were \$8.7 million, or 0.59% of total assets, at June 30, 2014, compared to \$15.0 million, or 1.07%, of total assets, at June 30, 2013, and \$12.4 million, or 0.83% of total assets, at December 31, 2013.

Classified assets, net of Small Business Administration ("SBA") guarantees, decreased 3% to \$23.1 million at June 30, 2014, from \$23.8 million at June 30, 2013, and decreased 2% from \$23.6 million at December 31, 2013.

Net charge-offs totaled \$27,000 for the second quarter of 2014, compared to net recoveries of \$270,000 for the second quarter 2013, and net charge-offs of \$166,000 for the fourth quarter of 2013.

The allowance for loan losses at June 30, 2014 was \$18.6 million, or 1.88% of total loans, representing 228.35% of nonperforming loans. The allowance for loan losses at June 30, 2013 was \$19.3 million, or 2.30% of total loans, representing 134.52% of nonperforming loans. The allowance for loan losses at December 31, 2013 was \$19.2 million, or 2.09% of total loans, representing 162.16% of nonperforming loans.

Deposits totaled \$1.27 billion at June 30, 2014, compared to \$1.19 billion at June 30, 2013, and \$1.29 billion at December 31, 2013. Noninterest-bearing demand deposits increased \$48.7 million at June 30, 2014 from June 30, 2013, and increased \$25.2 million from December 31, 2013, while brokered deposits decreased \$43.2 million and \$21.9 million, respectively. Deposits (excluding all time deposits and CDARS deposits) increased \$129.6 million, or 15%, to \$1.0 billion at June 30, 2014, from \$873.9 million at June 30, 2013 and increased \$29.9 million, or 3%, from \$973.6 million at December 31, 2013.

The ratio of noncore funding (which consists of time deposits-\$100,000 and over, CDARS deposits, brokered deposits, securities under agreement to repurchase and short-term borrowings) to total assets was 16.48% at June 30, 2014, compared to 20.87% at June 30, 2013, and 19.51% at December 31, 2013.

The loan to deposit ratio was 78.11% at June 30, 2014, compared to 70.81% at June 30, 2013, and 71.13% at December 31, 2013.

The Company announced it will pay a quarterly cash dividend of \$0.05 per share in the third quarter of 2014 to holders of common stock and Series C Convertible Perpetual Preferred Stock ("Series C Preferred Stock"), on an as converted basis.

Table of Contents

Capital ratios exceed regulatory requirements for a well-capitalized financial institution, both on a consolidated basis and at the bank level at June 30, 2014:

Capital Ratios	Heritage Commerce Corp	Heritage Bank of Commerce	Well-Capitalized Financial Institution Regulatory Guidelines

Tier 1 Risk-Based	13.9%	12.9%	6.0%
Leverage	12.0%	11.2%	5.0%
Deposits			

The composition and cost of the Company's deposit base are important in analyzing the Company's net interest margin and balance sheet liquidity characteristics. Except for brokered time deposits, the Company's depositors are generally located in its primary market area. Depending on loan demand and other funding requirements, the Company also obtains deposits from wholesale sources including deposit brokers. HBC is a member of the Certificate of Deposit Account Registry Service ("CDARS") program. The CDARS program allows customers with deposits in excess of FDIC insured limits to obtain coverage on time deposits through a network of banks within the CDARS program. Deposits gathered through this program are considered brokered deposits under regulatory guidelines. The Company has a policy to monitor all deposits that may be sensitive to interest rate changes to help assure that liquidity risk does not become excessive due to concentrations.

Deposits totaled \$1.27 billion at June 30, 2014, compared to \$1.19 billion at June 30, 2013, and \$1.29 billion at December 31, 2013. Deposits (excluding all time deposits and CDARS deposits) increased \$129.6 million, or 15%, to \$1.0 billion at June 30, 2014, from \$873.9 million at June 30, 2013, and increased \$29.9 million, or 3%, from \$973.6 million at December 31, 2013. The ratio of noncore funding (which consists of time deposits-\$100,000 and over, CDARS deposits, brokered deposits, securities under agreement to repurchase and short-term borrowings) to total assets was 16.48% at June 30, 2014, compared to 20.87% at June 30, 2013, and 19.51% at December 31, 2013.

During the fourth quarter of 2013, the Company received \$27.5 million in deposits from a law firm which were placed in a CDARS money market account. All of the \$27.5 million in deposits from the law firm were withdrawn in January, 2014. The Company had \$33.6 million in brokered deposits at June 30, 2014, compared to \$76.8 million at June 30, 2013, and \$55.5 million at December 31, 2013. Deposits from title insurance companies, escrow accounts and real estate exchange facilitators was \$20.8 million at June 30, 2014, compared to \$18.2 million at June 30, 2013, and \$37.6 million at December 31, 2013. Certificates of deposit from the State of California totaled \$98.0 million at June 30, 2014, June 30, 2013 and December 31, 2013.

Liquidity

Our liquidity position refers to our ability to maintain cash flows sufficient to fund operations and to meet obligations and other commitments in a timely fashion. At June 30, 2014, we had \$49.4 million in cash and cash equivalents and approximately \$446.3 million in available borrowing capacity from various sources including the Federal Home Loan Bank ("FHLB"), the Federal Reserve Bank of San Francisco ("FRB"), and Federal funds facilities with several financial institutions. The Company also had \$205.6 million in unpledged securities available at June 30, 2014. Our loan to deposit ratio increased to 78.11% at June 30, 2014, compared to 70.81% at June 30, 2013, and 71.13% at December 31, 2013.

Table of Contents

Lending

Our lending business originates principally through our branch offices located in our primary markets. Loans, excluding loans held-for-sale, increased 18% to \$990.3 million at June 30, 2014, from \$842.0 million at June 30, 2013, and increased 8% from \$914.9 million at December 31, 2013. The loan portfolio remains well-diversified with commercial and industrial ("C&I") loans accounting for 42% of the loan portfolio at June 30, 2014. Commercial and residential real estate loans accounted for 46% of the total loan portfolio, of which 49% were owner-occupied by businesses. Consumer and home equity loans accounted for 7% of total loans, and land and construction loans accounted for the remaining 5% of total loans at June 30, 2014. C&I line usage was 42% at June 30, 2014, compared to 40% at June 30, 2013, and 41% at December 31, 2013.

Net Interest Income

The management of interest income and expense is fundamental to the performance of the Company. Net interest income, the difference between interest income and interest expense, is the largest component of the Company's total revenue. Management closely monitors both total net interest income and the net interest margin (net interest income divided by average earning assets).

The Company through its asset and liability policies and practices seeks to maximize net interest income without exposing the Company to an excessive level of interest rate risk. Interest rate risk is managed by monitoring the pricing, maturity and repricing options of all classes of interest bearing assets and liabilities. This is discussed in more detail under "Liquidity and Asset/Liability Management." In addition, we believe there are measures and initiatives we can take to improve the net interest margin, including increasing loan rates, adding floors on floating rate loans, reducing nonperforming assets, managing deposit interest rates, and reducing higher cost deposits.

The net interest margin is also adversely impacted by the reversal of interest on nonaccrual loans and the reinvestment of loan payoffs into lower yielding investment securities and other short-term investments.

Management of Credit Risk

We continue to proactively identify, quantify, and manage our problem loans. Early identification of problem loans and potential future losses helps enable us to resolve credit issues with potentially less risk and ultimate losses. We maintain an allowance for loan losses in an amount that we believe is adequate to absorb probable incurred losses in the portfolio. While we strive to carefully manage and monitor credit quality and to identify loans that may be deteriorating, circumstances can change at any time for loans included in the portfolio that may result in future losses, that as of the date of the financial statements have not yet been identified as potential problem loans. Through established credit practices, we adjust the allowance for loan losses accordingly. However, because future events are uncertain, there may be loans that will deteriorate, some of which could occur in an accelerated time-frame. As a result, future additions to the allowance for loan losses may be necessary. Because the loan portfolio contains a number of commercial loans, commercial real estate, construction and land development loans with relatively large balances, deterioration in the credit quality of one or more of these loans may require a significant increase to the allowance for loan losses. Future additions to the allowance may also be required based on changes in the financial condition of borrowers. Additionally, Federal and state banking regulators, as an integral part of their supervisory function, periodically review our allowance for loan losses. These regulatory agencies may require us to recognize further loan loss provisions or charge-offs based upon their judgments, which may be different from ours. Any increase in the allowance for loan losses would have an adverse effect, which may be material, on our financial condition and results of operation.

Table of Contents

Further discussion of the management of credit risk appears under "Provision for Loan Losses" and "Allowance for Loan Losses."

Noninterest Income

While net interest income remains the largest single component of total revenues, noninterest income is an important component. A portion of the Company's noninterest income is associated with its SBA lending activity, consisting of gains on the sale of loans sold in the secondary market and servicing income from loans sold with servicing retained. Other sources of noninterest income include loan servicing fees, service charges and fees, cash surrender value from company owned life insurance policies, and gains on the sale of securities.

Noninterest Expense

Management considers the control of operating expenses to be a critical element of the Company's performance. Noninterest expense for the second quarter of 2014 was \$10.9 million, an increase of 5% from \$10.4 million for the second quarter of 2013. Noninterest expense for the six months ended June 30, 2014 increased 2% to \$21.7 million, compared to \$21.2 million for the six months ended June 30, 2013. The increase in noninterest expense for the second quarter and six months ended June 30, 2014 was primarily due to increased salaries and employee benefits expense, partially offset by lower professional fees.

Capital Management

As part of its asset and liability management process, the Company continually assesses its capital position to take into consideration growth, expected earnings, risk profile and potential corporate activities that it may choose to pursue.

On November 21, 2008, the Company issued to the U.S. Treasury under its Capital Purchase Program 40,000 shares of Series A Preferred Stock for \$40.0 million and issued a warrant to purchase 462,963 shares of common stock at an exercise price of \$12.96.

On June 21, 2010, the Company issued to various institutional investors 21,004 shares of Series C Convertible Perpetual Preferred Stock ("Series C Preferred Stock"). The Series C Preferred Stock is mandatorily convertible into common stock at a conversion price of \$3.75 per share upon a subsequent transfer of the Series C Preferred Stock to third parties not affiliated with the holder in a widely dispersed offering. The 21,004 shares of Series C Preferred Stock are convertible into 5,601,000 shares of common stock. The Series C Preferred Stock is non-voting except in the case of certain transactions that would affect the rights of the holders of the Series C Preferred Stock or applicable law. The holders of Series C Preferred Stock receive dividends on an as converted basis when dividends are also declared for holders of common stock. The Series C Preferred Stock is not redeemable by the Company or by the holders and has a liquidation preference of \$1,000 per share. The Series C Preferred Stock ranks senior to the Company's common stock.

On March 7, 2012, in accordance with approvals received from the U.S. Treasury and the Federal Reserve, the Company repurchased all shares of the Series A Preferred Stock and paid the related accrued and unpaid dividends. The repurchase of the Series A Preferred Stock eliminated \$2.0 million in annual dividends. On June 12, 2013, the Company completed the repurchase of the common stock warrant for \$140,000.

During the third quarter of 2012, the Company completed the redemption of \$14 million fixed-rate subordinated debt, and during the third quarter of 2013, the Company completed the redemption of its remaining \$9 million of floating rate subordinated debt.

Table of Contents

RESULTS OF OPERATIONS

The Company earns income from two primary sources. The first is net interest income, which is interest income generated by earning assets less interest expense on interest-bearing liabilities. The second is noninterest income, which primarily consists of gains on the sale of loans, loan servicing fees, customer service charges and fees, the increase in cash surrender value of life insurance, and gains on the sale of securities. The majority of the Company's noninterest expenses are operating costs that relate to providing a full range of banking services to our customers.

Net Interest Income and Net Interest Margin

The level of net interest income depends on several factors in combination, including yields on earning assets, the cost of interest-bearing liabilities, the relative volumes of earning assets and interest-bearing liabilities, and the mix of products which comprise the Company's earning assets, deposits, and other interest-bearing liabilities. To maintain its net interest margin the Company must manage the relationship between interest earned and paid.

The following Distribution, Rate and Yield table presents the average amounts outstanding for the major categories of the Company's balance sheet, the average interest rates earned or paid thereon, and the resulting net interest margin on average interest earning assets for the periods indicated. Average balances are based on daily averages.

Table of Contents

Volume and Rate Variances

The Volume and Rate Variances table below sets forth the dollar difference in interest earned and paid for each major category of interest-earning assets and interest-bearing liabilities for the noted periods, and the amount of such change attributable to changes in average balances (volume) or changes in average interest rates. Volume variances are equal to the increase or decrease in the average balance times the prior period rate, and rate variances are equal to the increase or decrease in the average rate times the prior period average balance. Variances attributable to both rate and volume changes are equal to the change in rate times the change in average balance and are included below in the average volume column.

⁽¹⁾ Reflects tax equivalent adjustment for tax exempt income based on a 35% tax rate.

The Company's net interest margin (FTE), expressed as a percentage of average earning assets, increased 18 basis points to 4.07% for the second quarter of 2014, from 3.89% for the second quarter of 2013. For the six months ended June 30, 2014, net interest margin increased 26 basis points to 4.06%, from 3.80% for the six months ended June 30, 2013. The increase in the net interest margin for the second quarter and for the six months ended June 30, 2014, compared to the same periods in 2013, was primarily due to loan growth, higher yields on securities, and a

lower cost of funds.

Net interest income increased 13% to \$13.7 million for the second quarter of 2014, compared to \$12.2 million for the second quarter of 2013. Net interest income increased 11% to \$27.0 million for the six months ended June 30, 2014, compared to \$24.3 million the six months ended June 30, 2013. The increase in the net interest income for the second quarter and for the six months ended June 30, 2014, compared to the same periods in 2013, was primarily due to loan growth and an increase in core deposits.

A substantial portion of the Company's earning assets are variable-rate loans that re-price when the Company's prime lending rate is changed, compared to a large base of core deposits that are generally slower to re-price. This causes the Company's balance sheet to be asset-sensitive, which means that all else being equal, the Company's net interest margin will be lower during periods when short-term interest rates are falling and higher when rates are rising.

Table of Contents

Provision for Loan Losses

Credit risk is inherent in the business of making loans. The Company establishes an allowance for loan losses through charges to earnings, which are presented in the statements of income as the provision for loan losses. Specifically identifiable and quantifiable known losses are promptly charged off against the allowance. The provision for loan losses is determined by conducting a quarterly evaluation of the adequacy of the Company's allowance for loan losses and charging the shortfall or excess, if any, to the current quarter's expense. This has the effect of creating variability in the amount and frequency of charges to the Company's earnings. The provision for loan losses and level of allowance for each period are dependent upon many factors, including loan growth, net charge-offs, changes in the composition of the loan portfolio, delinquencies, management's assessment of the quality of the loan portfolio, the valuation of problem loans and the general economic conditions in the Company's market area.

There was a credit to the provision for loan losses of \$198,000 for the second quarter of 2014, compared to a credit to the provision for loan losses of \$270,000 for the second quarter of 2013. The credit to the provision for loan losses for the six months ended June 30, 2014 was \$208,000, compared to a credit to the provision for loan losses \$270,000 for the six months ended June 30,2013.

The allowance for loan losses totaled \$18.6 million, or 1.88% of total loans at June 30, 2014, compared to \$19.3 million, or 2.30% of total loans at June 30, 2013, and \$19.2 million, or 2.09% of total loans at December 31, 2013. The allowance for loan losses to total loans decreased at June 30, 2014, compared to June 30, 2013, and December 31, 2013, primarily due to increasing loan balances with no default histories, improving the quality of the loan portfolio overall. Net charge-offs totaled \$27,000 for the second quarter of 2014, compared to net recoveries of \$270,000 for the second quarter of 2013, and net charge-offs of \$166,000 for the fourth quarter of 2013. Provisions for loan losses are charged to operations to bring the allowance for loan losses to a level deemed appropriate by the Company based on the factors discussed under "Allowance for Loan Losses".

Noninterest Income

The following table sets forth the various components of the Company's noninterest income for the periods indicated:

	For the Three Months Ended June 30,			Increase (decrease) 2014 versus 2013			
	:	2014	2	013	Aı	mount	Percent
			(Do	llars in	thous	ands)

Gain on sales of SBA loans		599		270		329	122%	
Increase in cash surrender value of life insurance		795		826		(31)	-4%	
Servicing income		661		750		(89)	-12%	
Gain on sales of securities		50		38		12	32%	
Other		693		499		194	39%	
Total noninterest income	\$	4.064	\$	3,578	\$	486	14%	

The increase in noninterest income in the second quarter and six months ended June 30, 2014, compared to the same periods in 2013 was primarily attributable to a higher gain on sales of SBA loans.

Historically, a significant percentage of the Company's noninterest income has been associated with its SBA lending activity, as gains on the sale of loans sold in the secondary market and servicing income from loans sold with servicing rights retained. For the three months ended June 30, 2014, SBA loan sales resulted in a \$442,000 gain, compared to a \$134,000 gain on sale of SBA loans for the three months ended June 30, 2013. For the six months ended June 30, 2014, SBA loan sales resulted in a \$599,000 gain, compared to a \$270,000 gain on sale of SBA loans for the six months ended June 30, 2013.

The servicing assets that result from the sales of SBA loans with servicing retained are amortized over the expected term of the loans using a method approximating the interest method. Servicing income generally declines as the respective loans are repaid.

Noninterest expense for the second quarter of 2014 increased to \$10.9 million, from \$10.4 million for the second quarter of 2013. Noninterest expense for the six months ended June 30, 2014 was \$21.7 million, compared to \$21.2 million for the six months ended June 30, 2013. The increase in noninterest expense for the second quarter and six months ended June 30, 2014 compared to the same periods in 2013 was primarily due to increased salaries and employee benefits expense, partially offset by lower professional fees, data processing and software

subscriptions, low income housing investment losses, and a \$167,000 charge in the second quarter of 2013 related to the redemption of floating-rate subordinated debt. Higher salaries and employee benefits expense reflected the growth in staffing for business initiatives, the impact of merit increases, and costs associated with the reorganization of administrative responsibilities in the second quarter of 2014. Professional fees were lower due to net recoveries in legal fees as a result of the resolution or payoff of certain problem loans in the second quarter of 2014. Data processing and software subscriptions were lower mainly due to system conversion costs in the second quarter of 2013. Full time equivalent employees were 203 at June 30, 2014 and 191 at June 30, 2013.

Table of Contents

In the normal course of business, the Company becomes a party to financial instruments with off-balance sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit in the form of loans, or through commercial or standby letters of credit, and financial guarantees. These instruments represent varying degrees of exposure to risk in excess of the amounts included in the accompanying condensed consolidated balance sheets. The Company calculates an off-balance sheet credit risk reserve for all unfunded commitments.

Income Tax Expense

The Company computes its provision for income taxes on a monthly basis. The effective tax rate is determined by applying the Company's statutory income tax rates to pre-tax book income as adjusted for permanent differences between pre-tax book income and actual taxable income. These permanent differences include, but are not limited to, increases in the cash surrender value of life insurance policies, California Enterprise Zone deductions, certain expenses that are not allowed as tax deductions, and tax credits.

The Company's Federal and state income tax expense for the quarter and six months ended June 30, 2014 was \$1.7 million and \$3.2 million, respectively. The income tax expense was \$1.2 million and \$2.0 million for the same periods in 2013. The following table shows the Company's effective income tax rates for the periods indicated:

	For t	he	For the				
	Three Months		Six Months				
	Ende	ed	Ende	ed			
	June :	30,	June 30,				
	2014	2013	2014	2013			
Effective income tax rate	33.5%	29.3%	33.5%	28.8%			

The difference in the effective tax rate compared to the combined Federal and state statutory tax rate of 42% is primarily the result of tax exempt securities, the Company's investment in life insurance policies whose earnings are not subject to taxes, tax credits related to investments in low income housing limited partnerships, Enterprise Zone tax credits, and hiring credits.

The Company has net investments of \$874,000 in low-income housing limited partnerships as of June 30, 2014, generating tax credits of approximately \$412,000 for 2014, compared to tax credits of approximately \$727,000 for 2013. The Company had California Enterprise Zone tax savings of approximately \$162,000 for 2013. The California state legislature eliminated the Enterprise Zone tax deductions beginning January 1, 2014.

Some items of income and expense are recognized in different years for tax purposes than when applying generally accepted accounting principles leading to timing differences between the Company's actual tax liability, and the amount accrued for this liability based on book income. These temporary differences comprise the "deferred" portion of the Company's tax expense or benefit, which is accumulated on the Company's books as a deferred tax asset or deferred tax liability until such time as they reverse.

Realization of the Company's deferred tax assets is primarily dependent upon the Company generating sufficient future taxable income to obtain benefit from the reversal of net deductible temporary differences and utilization of tax credit carryforwards and the net operating loss carryforwards for Federal and California state income tax purposes. The amount of deferred tax assets considered realizable is subject to adjustment in future periods based on estimates of future taxable income. Under generally accepted accounting principles a valuation allowance is required to be recognized if it is "more likely than not" that a deferred tax asset will not be realized. The determination of the realizability of the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, including forecasts of future income, cumulative losses, applicable tax planning strategies, and assessments of current and future economic and business conditions.

Table of Contents

The Company had net deferred tax assets of \$19.1 million and \$23.3 million at June 30, 2014, and December 31, 2013, respectively. After consideration of the matters in the preceding paragraph, the Company determined that it is more likely than not that the net deferred tax asset at June 30, 2014 and December 31, 2013 will be fully realized in future years.

FINANCIAL CONDITION

As of June 30, 2014, total assets increased to \$1.48 billion, compared to \$1.40 billion at June 30, 2013, and decreased from \$1.49 billion at December 31, 2013. Securities available-for-sale (at fair value) were \$261.5 million at June 30, 2014, a decrease of 11% from \$293.8 million at June 30, 2013, and a decrease of 7% from \$280.1 million at December 31, 2013. Securities held-to-maturity (at amortized cost) were \$96.0 million at June 30, 2014, compared to \$81.7 million at June 30, 2013, and \$95.9 million at December 31, 2013. The total loan portfolio, excluding loans held-for-sale, was \$990.3 million at June 30, 2014, an increase of 18% from \$842.0 million at June 30, 2013, and an increase of 8% from \$914.9 million at December 31, 2013.

Deposits totaled \$1.27 billion at June 30, 2014, compared to \$1.19 billion at June 30, 2013, and \$1.29 billion at December 31, 2013. Deposits (excluding all time deposits and CDARS deposits) increased \$129.6 million, or 15%, to \$1.0 billion at June 30, 2014, from \$873.9 million at June 30, 2013, and increased \$29.9 million, or 3%, from \$973.6 million at December 31, 2013. There was no subordinated debt at June 30, 2014, compared to \$9.3 million at June 30, 2013, and no subordinated debt at December 31, 2013.

Securities Portfolio

(1) Reflects tax equivalent yield based on a 35% tax rate.

The securities portfolio is the second largest component of the Company's interest-earning assets, and the structure and composition of this portfolio is important to an analysis of the financial condition of the Company. The portfolio serves the following purposes: (i) it provides a source of pledged assets for securing certain deposits and borrowed funds, as may be required by law or by specific agreement with a depositor or lender; (ii) it provides liquidity to even out cash flows from the loan and deposit activities of customers; (iii) it can be used as an interest rate risk management tool, since it provides a large base of assets, the maturity and interest rate characteristics of which can be changed more readily than the loan portfolio to better match changes in the deposit base and other funding sources of the Company; and (iv) it is an alternative interest-earning use of funds when loan demand is weak or when deposits grow more rapidly than loans.

The Company's portfolio may include: (i) U.S. Treasury securities and U.S. Government sponsored entities' debt securities for liquidity and pledging; (ii) mortgage-backed securities, which in many instances can also be used for pledging, and which generally enhance the yield of the portfolio; (iii) municipal obligations, which provide tax free income and limited pledging potential; (iv) collateralized mortgage obligations, which generally enhance the yield of the portfolio; and (v) single entity issue trust preferred securities, which generally enhance the yield on the portfolio.

The Company classifies its securities as either available-for-sale or held-to-maturity at the time of purchase. Accounting guidance requires available-for-sale securities to be marked to fair value with an offset to accumulated other comprehensive income (loss), a component of

shareholders' equity. Monthly adjustments are made to reflect changes in the fair value of the Company's available-for-sale securities. The investment securities available-for-sale portfolio totaled \$261.5 million at June 30, 2014, a decrease of 11% from \$293.8 million at June 30, 2013, and a decrease of 7% from \$280.1 million at December 31, 2013. At June 30, 2014, the investment securities available-for-sale portfolio was comprised of \$159.0 million of agency mortgage-backed securities (all issued by U.S. Government sponsored entities), \$53.9 million of corporate bonds, \$27.3 million of asset-backed securities, and \$21.3 million of single entity issue trust preferred securities.

Table of Contents

The investment securities held-to-maturity portfolio, at amortized cost, totaled \$96.0 million at June 30, 2014, compared to \$81.7 million at June 30, 2013, and \$95.9 million at December 31, 2013. At June 30, 2014, the investment securities held-to-maturity portfolio was comprised of \$80.0 million of tax-exempt municipal bonds, and \$16.0 million of agency mortgage-backed securities.

The Company has not used interest rate swaps or other derivative instruments to hedge fixed rate loans or securities to otherwise mitigate interest rate risk.

Loans

The Company's loans represent the largest portion of invested assets, substantially greater than the securities portfolio or any other asset category, and the quality and diversification of the loan portfolio is an important consideration when reviewing the Company's financial condition.

Gross loans, excluding loans held-for-sale, represented 67% of total assets at June 30, 2014, 60% at June 30, 2013, and 61% of total assets at December 31, 2013. The ratio of loans to deposits increased to 78.11% at June 30, 2014, from 70.81% at June 30, 2013, and from 71.13% at December 31, 2013.

Loan Distribution

The Loan Distribution table that follows sets forth the Company's gross loans, excluding loans held-for-sale, outstanding and the percentage distribution in each category at the dates indicated:

Loans, net	\$	971,749		\$	822,608		\$	895,749		

The Company's loan portfolio is concentrated in commercial loans, primarily manufacturing, wholesale, and services, and commercial real estate, with the remaining balance in land development and construction, home equity and consumer loans. The Company does not have any concentrations by industry or group of industries in its loan portfolio, however, 57% of its gross loans were secured by real property at June 30,

2014, compared to 53% at June 30, 2013, and 55% at December 31, 2013. While no specific industry concentration is considered significant, the Company's lending operations are located in areas that are dependent on the technology and real estate industries and their supporting companies.

The Company has established concentration limits in its loan portfolio for commercial real estate loans, commercial loans, construction loans and unsecured lending, among others. All loan types are within established limits. The Company uses underwriting guidelines to assess the borrowers' historical cash flow to determine debt service, and we further stress test the debt service under higher interest

Table of Contents

rate scenarios. Financial and performance covenants are used in commercial lending to allow the Company to react to a borrower's deteriorating financial condition should that occur.

The Company's commercial loans are made for working capital, financing the purchase of equipment or for other business purposes. Commercial loans include loans with maturities ranging from thirty days to one year and "term loans" with maturities normally ranging from one to five years. Short-term business loans are generally intended to finance current transactions and typically provide for periodic principal payments, with interest payable monthly. Term loans normally provide for floating interest rates, with monthly payments of both principal and interest.

The Company is an active participant in the SBA and U.S. Department of Agriculture guaranteed lending programs, and has been approved by the SBA as a lender under the Preferred Lender Program. The Company regularly makes such guaranteed loans (collectively referred to as "SBA loans"). The guaranteed portion of these loans is typically sold in the secondary market depending on market conditions. When the guaranteed portion of an SBA loan is sold the Company retains the servicing rights for the sold portion. During the second quarter and the six months ended June 30, 2014, loans were sold resulting in a gain on sale of SBA loans of \$442,000 and \$599,000, respectively.

As of June 30, 2014, commercial and residential real estate mortgage loans of \$454.7 million consist primarily of adjustable and fixed-rate loans secured by deeds of trust on commercial and residential property. The real estate mortgage loans at June 30, 2014, consist of \$222.1 million, or 49%, of commercial owner occupied properties, \$232.6 million, or 51%, of commercial investment properties, and \$473,000 (less than 1%) in residential properties. Properties securing the commercial real estate mortgage loans are generally located in the Company's primary market, which is the Greater San Francisco Bay Area.

The Company's commercial real estate loans consist primarily of loans based on the borrower's cash flow and are secured by deeds of trust on commercial and residential property to provide a secondary source of repayment. The Company generally restricts real estate term loans to no more than 75% of the property's appraised value or the purchase price of the property during the initial underwriting of the credit, depending on the type of property and its utilization. The Company offers both fixed and floating rate loans. Maturities on real estate mortgage loans are generally between five and ten years (with amortization ranging from fifteen to twenty-five years and a balloon payment due at maturity); however, SBA and certain other real estate loans that can be sold in the secondary market may be granted for longer maturities.

The Company's land and construction loans are primarily to finance the development/construction of commercial and single family residential properties. The Company utilizes underwriting guidelines to assess the likelihood of repayment from sources such as sale of the property or availability of permanent mortgage financing prior to making the construction loan. Construction loans are provided only in our market area, and we have extensive controls for the disbursement process. The projects are typically infill construction in strong markets. Land and construction loans increased \$21.1 million to \$47.8 million, at June 30, 2014, from \$26.7 million, at June 30, 2013, and increased \$16.4 million from \$31.4 million, at December 31, 2013, primarily as a result of strong housing demand within the Company's lending area.

The Company makes home equity lines of credit available to its existing customers. Home equity lines of credit are underwritten initially with a maximum 75% loan to value ratio. Home equity lines are reviewed at least semiannually, with specific emphasis on loans with a loan to value ratio greater than 70%. The Company takes measures to work with customers to reduce line commitments and minimize potential losses. There have been no adverse classifications to date as a result of the review.

Additionally, the Company makes consumer loans for the purpose of financing automobiles, various types of consumer goods, and other personal purposes. Consumer loans generally provide for the monthly payment of principal and interest. Most of the Company's consumer loans are secured by the personal property being purchased or, in the instances of home equity loans or lines, real property.

Table of Contents

With certain exceptions, state chartered banks are permitted to make extensions of credit to any one borrowing entity up to 15% of the bank's capital and reserves for unsecured loans and up to 25% of the bank's capital and reserves for secured loans. For HBC, these lending limits were \$27.9 million and \$46.4 million at June 30, 2014, respectively.

Loan Maturities

The following table presents the maturity distribution of the Company's loans (excluding loans held-for-sale) as of June 30, 2014. The table shows the distribution of such loans between those loans with predetermined (fixed) interest rates and those with variable (floating) interest rates. Floating rates generally fluctuate with changes in the prime rate as reflected in the Western Edition of The Wall Street Journal. As of June 30, 2014, approximately 58% of the Company's loan portfolio consisted of floating interest rate loans.
