EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 1 Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with instructions to the Quarterly Report on Form 10-Q and Rule 10-01 of Regulation S-X. Consequently, certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States have been condensed or omitted. References to the “Company,” “EMCOR,” “we,” “us,” “our” and similar words refer to EMCOR Group, Inc. and its consolidated subsidiaries unless the context indicates otherwise. Readers of this report should refer to the consolidated financial statements and the notes thereto included in our latest Annual Report on Form 10-K filed with the Securities and Exchange Commission. In our opinion, the accompanying unaudited condensed consolidated financial statements contain all adjustments (consisting only of those of a normal recurring nature) necessary to present fairly our financial position and the results of our operations. The results of operations for the three and six months ended June 30, 2018 are not necessarily indicative of the results to be expected for the year ending December 31, 2018.

NOTE 2 New Accounting Pronouncements

On January 1, 2018, we adopted the accounting pronouncement issued by the Financial Accounting Standards Board (“FASB”) to clarify existing guidance on revenue recognition. This guidance includes the required steps to achieve the core principle that a company should recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. We adopted this pronouncement on a modified retrospective basis, and its impact on our financial position and results of operations, as well as required additional disclosures, are included in Note 3 - Revenue from Contracts with Customers. As a result of the adoption of this standard, certain changes have been made to the Condensed Consolidated Balance Sheets. The accounts previously named “Costs and estimated earnings in excess of billings on uncompleted contracts” and “Billings in excess of costs and estimated earnings on uncompleted contracts” have been renamed “Contract assets” and “Contract liabilities”, respectively. In addition, for periods beginning after December 31, 2017, amounts representing deferred revenues on services contracts, which were previously included in “Other accrued expenses and liabilities” within the Condensed Consolidated Balance Sheets, have been reclassified as “Contract liabilities.”

On January 1, 2018, we adopted the accounting pronouncement issued by the FASB to clarify how entities should present restricted cash and restricted cash equivalents in the statement of cash flows. This guidance requires entities to show changes in the total of cash, cash equivalents and restricted cash in the statement of cash flows. This guidance was adopted on a retrospective basis, and such adoption did not have a material impact on our financial position and/or results of operations.

In February 2016, an accounting pronouncement was issued by the FASB to replace existing lease accounting guidance. This pronouncement is intended to provide enhanced transparency and comparability by requiring lessees to record right-of-use assets and corresponding lease liabilities on the balance sheet for most leases. Expenses associated with leases will continue to be recognized in a manner similar to current accounting guidance. This pronouncement is effective for annual and interim periods beginning after December 15, 2018, with early adoption permitted. The adoption is required to be applied on a modified retrospective basis for each prior reporting period presented.

Although we have not yet quantified the impact that the adoption of this pronouncement will have on our financial position and/or results of operations, we have begun a process to identify a complete population of our leases. Such process includes reviewing various contracts to identify whether such arrangements convey the right to control the use of an identified asset. We continue to evaluate the impact of the new accounting pronouncement, including enhanced disclosure requirements, on our business processes, controls and systems.

NOTE 3 Revenue from Contracts with Customers

The Company adopted Accounting Standards Codification Topic 606, “Revenue from Contracts with Customers” (“ASC 606”) on January 1, 2018. The adoption of ASC 606 represents a change in accounting principle that aligns revenue recognition with the timing of when promised goods or services are transferred to customers in an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. To achieve

this core principle, the Company applies the following five steps in accordance with ASC 606:

(1) Identify the contract with a customer

A contract with a customer exists when: (a) the parties have approved the contract and are committed to perform their respective obligations, (b) the rights of the parties can be identified, (c) payment terms can be identified, (d) the arrangement has commercial substance, and (e) collectibility of consideration is probable. Judgment is required when determining if the contractual

6

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 3 Revenue from Contracts with Customers - (Continued)

criteria are met, specifically in the earlier stages of a project when a formally executed contract may not yet exist. In these situations, the Company evaluates all relevant facts and circumstances, including the existence of other forms of documentation or historical experience with our customers that may indicate a contractual agreement is in place and revenue should be recognized. In determining if the collectibility of consideration is probable, the Company considers the customer's ability and intention to pay such consideration through an evaluation of several factors, including an assessment of the creditworthiness of the customer and our prior collection history with such customer.

(2) Identify the performance obligations in the contract

At contract inception, the Company assesses the goods or services promised in a contract and identifies, as a separate performance obligation, each distinct promise to transfer goods or services to the customer. The identified performance obligations represent the "unit of account" for purposes of determining revenue recognition. In order to properly identify separate performance obligations, the Company applies judgment in determining whether each good or service provided is: (a) capable of being distinct, whereby the customer can benefit from the good or service either on its own or together with other resources that are readily available to the customer, and (b) distinct within the context of the contract, whereby the transfer of the good or service to the customer is separately identifiable from other promises in the contract.

In addition, when assessing performance obligations within a contract, the Company considers the warranty provisions included within such contract. To the extent the warranty terms provide the customer with an additional service, other than assurance that the promised good or service complies with agreed upon specifications, such warranty is accounted for as a separate performance obligation. In determining whether a warranty provides an additional service, the Company considers each warranty provision in comparison to warranty terms which are standard in the industry.

Our contracts are often modified through change orders to account for changes in the scope and price of the goods or services we are providing. Although the Company evaluates each change order to determine whether such modification creates a separate performance obligation, the majority of our change orders are for goods or services that are not distinct within the context of our original contract, and therefore, are not treated as separate performance obligations.

(3) Determine the transaction price

The transaction price represents the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to our customers. The consideration promised within a contract may include fixed amounts, variable amounts, or both. To the extent the performance obligation includes variable consideration, including contract bonuses and penalties that can either increase or decrease the transaction price, the Company estimates the amount of variable consideration to be included in the transaction price utilizing one of two prescribed methods, depending on which method better predicts the amount of consideration to which the entity will be entitled. Such methods include: (a) the expected value method, whereby the amount of variable consideration to be recognized represents the sum of probability weighted amounts in a range of possible consideration amounts, and (b) the most likely amount method, whereby the amount of variable consideration to be recognized represents the single most likely amount in a range of possible consideration amounts. When applying these methods, the Company considers all information that is reasonably available, including historical, current and estimates of future performance. The expected value method is typically utilized in situations where a contract contains a large number of possible outcomes while the most likely amount method is typically utilized in situations where a contract has only two possible outcomes.

Variable consideration is included in the transaction price only to the extent it is probable, in the Company's judgment, that a significant future reversal in the amount of cumulative revenue recognized under the contract will not occur when the uncertainty associated with the variable consideration is subsequently resolved. This threshold is referred to

as the variable consideration constraint. In assessing whether to apply the variable consideration constraint, the Company considers if factors exist that could increase the likelihood or the magnitude of a potential reversal of revenue, including, but not limited to, whether: (a) the amount of consideration is highly susceptible to factors outside of the Company's influence, such as the actions of third parties, (b) the uncertainty surrounding the amount of consideration is not expected to be resolved for a long period of time, (c) the Company's experience with similar types of contracts is limited or that experience has limited predictive value, (d) the Company has a practice of either offering a broad range of price concessions or changing the payment terms and conditions of similar contracts in similar circumstances, and (e) the contract has a large number and broad range of possible consideration amounts.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 3 Revenue from Contracts with Customers - (Continued)

Pending change orders represent one of the most common forms of variable consideration included within contract value and typically represent contract modifications for which a change in scope has been authorized or acknowledged by our customer, but the final adjustment to contract price is yet to be negotiated. In estimating the transaction price for pending change orders, the Company considers all relevant facts, including documented correspondence with the customer regarding acknowledgment and/or agreement with the modification, as well as historical experience with the customer or similar contractual circumstances. Based upon this assessment, the Company estimates the transaction price, including whether the variable consideration constraint should be applied.

Contract claims are another form of variable consideration which is common within our industry. Claim amounts represent revenue that has been recognized for contract modifications that are not submitted or are in dispute as to both scope and price. In estimating the transaction price for claims, the Company considers all relevant facts available. However, given the uncertainty surrounding claims, including the potential long-term nature of dispute resolution and the broad range of possible consideration amounts, there is an increased likelihood that any additional contract revenue associated with contract claims is constrained. The resolution of claims involves negotiations and, in certain cases, litigation. In the event litigation costs are incurred by us in connection with claims, such litigation costs are expensed as incurred, although we may seek to recover these costs.

For some transactions, the receipt of consideration does not match the timing of the transfer of goods or services to the customer. For such contracts, the Company evaluates whether this timing difference represents a financing arrangement within the contract. Although rare, if a contract is determined to contain a significant financing component, the Company adjusts the promised amount of consideration for the effects of the time value of money when determining the transaction price of such contract. Although our customers may retain a portion of the contract price until completion of the project and final contract settlement, these retainage amounts are not considered a significant financing component as the intent of the withheld amounts is to provide the customer with assurance that we will complete our obligations under the contract rather than to provide financing to the customer. In addition, although we may be entitled to advanced payments from our customers on certain contracts, these advanced payments generally do not represent a significant financing component as the payments are used to meet working capital demands that can be higher in the early stages of a contract, as well as to protect us from our customer failing to meet its obligations under the contract.

Changes in the estimates of transaction prices are recognized on a cumulative catch-up basis in the period in which the revisions to the estimates are made. Such changes in estimates can result in the recognition of revenue in a current period for performance obligations which were satisfied or partially satisfied in prior periods. Such changes in estimates may also result in the reversal of previously recognized revenue if the ultimate outcome differs from the Company's previous estimate. For the three and six months ended June 30, 2018, there were no significant amounts of revenue recognized during the period related to performance obligations satisfied in prior periods. For the three and six months ended June 30, 2017, we recognized \$11.6 million and \$18.1 million of gross profit associated with the recovery of certain contract costs previously disputed on a project completed in 2016. In addition, for the three and six months ended June 30, 2018 and 2017, there were no significant reversals of revenue recognized associated with the revision to transaction prices.

(4) Allocate the transaction price to performance obligations in the contract

For contracts that contain multiple performance obligations, the Company allocates the transaction price to each performance obligation based on a relative standalone selling price. The Company determines the standalone selling price based on the price at which the performance obligation would have been sold separately in similar circumstances to similar customers. If the standalone selling price is not observable, the Company estimates the standalone selling price taking into account all available information such as market conditions and internal pricing guidelines. In certain circumstances, the standalone selling price is determined using an expected profit margin on anticipated costs related

to the performance obligation.

(5) Recognize revenue as performance obligations are satisfied

The Company recognizes revenue at the time the related performance obligation is satisfied by transferring a promised good or service to its customers. A good or service is considered to be transferred when the customer obtains control. The Company can transfer control of a good or service and satisfy its performance obligations either over time or at a point in time. The Company transfers control of a good or service over time and, therefore, satisfies a performance obligation and recognizes revenue over time if one of the following three criteria are met: (a) the customer simultaneously receives and consumes the benefits provided by the Company's performance as we perform, (b) the Company's performance creates or enhances an asset that the customer controls

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 3 Revenue from Contracts with Customers - (Continued)

as the asset is created or enhanced, or (c) the Company's performance does not create an asset with an alternative use to us, and we have an enforceable right to payment for performance completed to date.

For our performance obligations satisfied over time, we recognize revenue by measuring the progress toward complete satisfaction of that performance obligation. The selection of the method to measure progress towards completion can be either an input method or an output method and requires judgment based on the nature of the goods or services to be provided.

For our construction contracts, revenue is generally recognized over time as our performance creates or enhances an asset that the customer controls. Our fixed price construction projects generally use a cost-to-cost input method to measure our progress towards complete satisfaction of the performance obligation as we believe it best depicts the transfer of control to the customer. Under the cost-to-cost measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs at completion of the performance obligation. For our unit price construction contracts, progress towards complete satisfaction is measured through an output method such as the amount of units produced or delivered, when our performance does not produce significant amounts of work in process or finished goods prior to complete satisfaction of such performance obligations.

For our services contracts, revenue is also generally recognized over time as the customer simultaneously receives and consumes the benefits of our performance as we perform the service. For our fixed price service contracts with specified service periods, revenue is generally recognized on a straight-line basis over such service period when our inputs are expended evenly, and the customer receives and consumes the benefits of our performance throughout the contract term.

The timing of revenue recognition for the manufacturing of new build heat exchangers within our United States industrial services segment depends on the payment terms of the contract, as our performance does not create an asset with an alternative use to us. For those contracts which we have a right to payment for performance completed to date at all times throughout our performance, inclusive of a cancellation, we recognize revenue over time. These performance obligations use a cost-to-cost input method to measure our progress towards complete satisfaction of the performance obligation as we believe it best depicts the transfer of control to the customer. However, for those contracts for which we do not have a right, at all times, to payment for performance completed to date, we recognize revenue at the point in time when control is transferred to the customer. For bill-and-hold arrangements, revenue is recognized when the customer obtains control of the heat exchanger, which may be prior to shipping, if the criteria of ASC 606 are met.

For certain of our revenue streams, such as call-out repair and service work, outage services, refinery turnarounds and specialty welding services that are performed under time and materials contracts, our progress towards complete satisfaction of such performance obligations is measured using an output method as the customer receives and consumes the benefits of our performance completed to date.

Due to uncertainties inherent in the estimation process, it is possible that estimates of costs to complete a performance obligation will be revised in the near-term. For those performance obligations for which revenue is recognized using a cost-to-cost input method, changes in total estimated costs, and related progress towards complete satisfaction of the performance obligation, are recognized on a cumulative catch-up basis in the period in which the revisions to the estimates are made. When the current estimate of total costs for a performance obligation indicate a loss, a provision for the entire estimated loss on the unsatisfied performance obligation is made in the period in which the loss becomes evident. For the three and six months ended June 30, 2018 and 2017, there were no changes in total estimated costs that had a significant impact to our operating results. In addition, for the three and six months ended June 30, 2018 and 2017, there were no significant losses recognized.

Disaggregation of Revenues

Our revenues are principally derived from contracts to provide construction services relating to electrical and mechanical systems, as well as to provide a number of building services and industrial services to our customers. Our contracts are with many different customers in numerous industries. Refer to Note 14 - Segment Information of the notes to the condensed consolidated financial statements for additional information on how we disaggregate our revenues by reportable segment, as well as a more complete description of our business.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Contract Assets and Contract Liabilities

Accounts receivable are recognized in the period when our right to consideration is unconditional. Accounts receivable are recognized net of an allowance for doubtful accounts. A considerable amount of judgment is required in assessing the likelihood of realization of receivables.

The timing of revenue recognition may differ from the timing of invoicing to customers. Contract assets include unbilled amounts from our long-term construction projects when revenue recognized under the cost-to-cost measure of progress exceed the amounts invoiced to our customers, as the amounts cannot be billed under the terms of our contracts. Such amounts are recoverable from our customers based upon various measures of performance, including achievement of certain milestones, completion of specified units or completion of a contract. In addition, many of our time and materials arrangements, as well as our contracts to perform turnaround services within the United States industrial services segment, are billed in arrears pursuant to contract terms that are standard within the industry, resulting in contract assets and/or unbilled receivables being recorded, as revenue is recognized in advance of billings. Also included in contract assets are amounts we seek or will seek to collect from customers or others for errors or changes in contract specifications or design, contract change orders or modifications in dispute or unapproved as to both scope and/or price, or other customer-related causes of unanticipated additional contract costs (claims and unapproved change orders). Our contract assets do not include capitalized costs to obtain and fulfill a contract. Contract assets are generally classified as current within the Condensed Consolidated Balance Sheets.

Contract liabilities from our long-term construction contracts occur when amounts invoiced to our customers exceed revenues recognized under the cost-to-cost measure of progress. Contract liabilities additionally include advanced payments from our customers on certain contracts. Contract liabilities decrease as we recognize revenue from the satisfaction of the related performance obligation and are recorded as either current or long-term, depending upon when we expect to recognize such revenue. The long-term portion of contract liabilities is included in "Other long-term obligations" in the Condensed Consolidated Balance Sheets.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 3 Revenue from Contracts with Customers - (Continued)

Net contract liabilities consisted of the following (in thousands):

	June 30, 2018	December 31, 2017
Contract assets, current	\$156,134	\$122,621
Contract assets, non-current	—	—
Contract liabilities, current	(551,614)	(524,156)
Contract liabilities, non-current	(3,327)	—
Deferred revenue ⁽¹⁾	—	(47,328)
Net contract liabilities	\$(398,807)	\$(448,863)

Represents deferred revenue on service contracts, which was included in “Accrued expenses and other” and “Other (1) long-term liabilities” in the Condensed Consolidated Balance Sheet as of December 31 2017. For the periods after December 31, 2017, these amounts are included within “Contract liabilities.”

The \$50.1 million decrease in net contract liabilities for the six months ended June 30, 2018 was attributable to a decrease in the net contract liability balance on our uncompleted long-term construction contracts as a result of the completion or substantial completion of certain large projects which were previously billed ahead pursuant to contract terms. Contract assets and contract liabilities increased by approximately \$0.3 million and \$2.1 million, respectively, as a result of acquisitions made in 2018. There was no significant impairment of contract assets recognized during the period.

Transaction Price Allocated to Remaining Unsatisfied Performance Obligations

The following table presents the transaction price allocated to remaining unsatisfied performance obligations (“remaining performance obligations”) for each of our reportable segments and their respective percentages of total remaining performance obligations (in thousands, except for percentages):

	June 30, 2018	% of Total
Remaining performance obligations:		
United States electrical construction and facilities services	\$1,037,796	28 %
United States mechanical construction and facilities services	1,970,393	54 %
United States building services	451,960	12 %
United States industrial services	82,640	2 %
Total United States operations	3,542,789	96 %
United Kingdom building services	130,342	4 %
Total worldwide operations	\$3,673,131	100 %

Our remaining performance obligations at June 30, 2018 were \$3.67 billion. Remaining performance obligations increase with awards of new contracts and decrease as we perform work and recognize revenue on existing contracts. We include a project within our remaining performance obligations at such time the project is awarded and agreement on contract terms has been reached. Our remaining performance obligations include amounts related to contracts for which a fixed price contract value is not assigned when a reasonable estimate of total transaction price can be made. Remaining performance obligations include unrecognized revenues to be realized from uncompleted construction contracts. Although many of our construction contracts are subject to cancellation at the election of our customers, in accordance with industry practice, we do not limit the amount of unrecognized revenue included within remaining performance obligations due to the inherent substantial economic penalty that would be incurred by our customers upon cancellation. We believe our reported remaining performance obligations for our construction contracts are firm

and contract cancellations have not had a material adverse effect on us.

Remaining performance obligations also include unrecognized revenues expected to be realized over the remaining term of service contracts. However, to the extent a service contract includes a cancellation clause which allows for the termination of such

12

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 3 Revenue from Contracts with Customers - (Continued)

contract by either party without a substantive penalty, the remaining contract term, and therefore, the amount of unrecognized revenues included within remaining performance obligations, is limited to the notice period required for the termination.

Our remaining performance obligations are comprised of: (a) original contract amounts, (b) change orders for which we have received written confirmations from our customers, (c) pending change orders for which we expect to receive confirmations in the ordinary course of business, (d) claim amounts that we have made against customers for which we have determined we have a legal basis under existing contractual arrangements and as to which the variable consideration constraint does not apply, and (e) other forms of variable consideration to the extent that such variable consideration has been included within the transaction price of our contracts. Such claim and other variable consideration amounts were immaterial for all periods presented.

Refer to the table below for additional information regarding our remaining performance obligations, including an estimate of when we expect to recognize such remaining performance obligations as revenue (in thousands):

	Within one year	Greater than one year
Remaining performance obligations:		
United States electrical construction and facilities services	\$910,676	\$127,120
United States mechanical construction and facilities services	1,453,161	517,232
United States building services	436,102	15,858
United States industrial services	82,640	—
Total United States operations	2,882,579	660,210
United Kingdom building services	78,659	51,683
Total worldwide operations	\$2,961,238	\$711,893

Impact of the Adoption of ASC 606 on our Financial Statements

The Company adopted ASC 606 on a modified retrospective basis. As part of such adoption, the new standard was applied only to those contracts which were not completed as of the date of adoption. Additionally, the Company has not retrospectively restated contract positions for contract modifications made prior to the adoption of ASC 606. The cumulative effect of applying the new guidance was recorded on January 1, 2018 as a reduction to retained earnings in the amount of \$0.9 million, net of tax. The majority of this adjustment related to: (a) a change in the measurement of our progress towards complete satisfaction of performance obligations for certain of our contracts within the United States electrical construction and facilities services segment, (b) a change in the timing of revenue recognition from a point in time to over time for certain repair projects within the United Kingdom building services segment, (c) the recognition of revenue for certain bill-and-hold arrangements within our United States industrial services segment that was not allowed under previous revenue recognition guidance, (d) the recognition of variable consideration for contract bonuses within certain of our construction contracts, and (e) a change in the timing of revenue recognition from a point in time to over time for certain of our contracts within our United States industrial services segment to manufacture or repair heat exchangers. These adjustments were not material to our financial position either individually or in the aggregate.

The adoption of ASC 606 had no impact on the Company's cash flows from operations.

The differences between our reported operating results and the pro forma operating results presented in the above tables for the three and six months ended June 30, 2018 primarily related to the previously referenced items identified upon adoption of ASC 606.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 4 Acquisitions of Businesses

During the second quarter of 2018, we acquired two companies, each for an immaterial amount. One company provides mobile mechanical services within the Western region of the United States, and the other company provides mobile mechanical services and fire protection services within the Southern region of the United States. Both of their results have been included in our United States building services segment.

On January 4, 2017, March 1, 2017 and November 1, 2017, we acquired three companies for a total consideration of \$109.3 million. One company provides fire protection and alarm services primarily in the Southern region of the United States. The second company provides millwright services for manufacturing companies throughout the United States. Both of their results have been included in our United States mechanical construction and facilities services segment. The third company provides mobile mechanical services within the Western region of the United States, and its results have been included in our United States building services segment. In connection with these acquisitions, we acquired working capital of \$9.6 million and other net assets of \$2.3 million and have preliminarily ascribed \$40.8 million to goodwill and \$56.6 million to identifiable intangible assets. We expect that all of the acquired goodwill will be deductible for tax purposes.

The purchase price allocation for the businesses acquired in 2018 and the business acquired in November of 2017 are still preliminary and subject to change during their respective measurement periods. The purchase price allocations for the businesses acquired in January and March of 2017 were finalized during the first quarter of 2018 with an insignificant impact. The acquisition of each business was accounted for by the acquisition method, and the prices paid for them have been allocated to their respective assets and liabilities, based upon the estimated fair value of their assets and liabilities at the dates of their respective acquisitions by us.

NOTE 5 Disposition of Assets

Due to a historical pattern of losses in the construction operations of our United Kingdom segment and our negative assessment of construction market conditions in the United Kingdom for the foreseeable future, we ceased construction operations in the United Kingdom during the third quarter of 2014. The results of the construction operations of our United Kingdom segment for all periods are presented in the Condensed Consolidated Financial Statements as discontinued operations.

The results of discontinued operations are as follows (in thousands):

	For the three months ended		For the six months ended	
	June 30, 2018	2017	June 30, 2018	2017
Revenues	\$—	\$944	\$—	\$944
Loss from discontinued operation, net of income taxes	\$(205)	\$(18)	\$(487)	\$(522)
Diluted loss per share from discontinued operation	\$(0.00)	\$(0.00)	\$(0.01)	\$(0.01)

The loss from discontinued operations in 2018 and 2017 was primarily due to legal costs related to the settlement of final contract balances on certain construction projects completed in prior years.

Included in the Condensed Consolidated Balance Sheets at June 30, 2018 and December 31, 2017 are the following major classes of assets and liabilities associated with the discontinued operation (in thousands):

	June 30, December 31,	
	2018	2017
Assets of discontinued operation:		
Current assets	\$ 110	\$ 242

Liabilities of discontinued operation:

Current liabilities	\$ 2,038	\$ 2,811
---------------------	----------	----------

At June 30, 2018, the assets and liabilities of the discontinued operation consisted of accounts receivable, contract retentions and contract warranty obligations that are expected to be collected or fulfilled in the ordinary course of

business. Additionally at June 30, 2018, there remained less than \$0.1 million of obligations related to employee severance, which are expected to be paid during the remainder of 2018. The settlement of the remaining assets and liabilities may result in additional income and/or expenses. Such income and/or expenses are expected to be immaterial and will be reflected as discontinued operations as incurred.

NOTE 6 Earnings Per Share

Calculation of Basic and Diluted Earnings (Loss) per Common Share

The following tables summarize our calculation of Basic and Diluted Earnings (Loss) per Common Share (“EPS”) for the three and six months ended June 30, 2018 and 2017 (in thousands, except share and per share data):

	For the three months ended June 30,	
	2018	2017
Numerator:		
Income from continuing operations attributable to EMCOR Group, Inc. common stockholders	\$71,021	\$56,776
Loss from discontinued operation, net of income taxes	(205)	(18)
Net income attributable to EMCOR Group, Inc. common stockholders	\$70,816	\$56,758
Denominator:		
Weighted average shares outstanding used to compute basic earnings (loss) per common share	58,332,934	59,290,420
Effect of dilutive securities—Share-based awards	337,661	348,641
Shares used to compute diluted earnings (loss) per common share	58,670,595	59,639,061
Basic earnings (loss) per common share:		
From continuing operations attributable to EMCOR Group, Inc. common stockholders	\$1.22	\$0.96
From discontinued operation	(0.00)	(0.00)
Net income attributable to EMCOR Group, Inc. common stockholders	\$1.22	\$0.96
Diluted earnings (loss) per common share:		
From continuing operations attributable to EMCOR Group, Inc. common stockholders	\$1.21	\$0.95
From discontinued operation	(0.00)	(0.00)
Net income attributable to EMCOR Group, Inc. common stockholders	\$1.21	\$0.95
	For the six months ended June 30,	
	2018	2017
Numerator:		
Income from continuing operations attributable to EMCOR Group, Inc. common stockholders	\$126,677	\$109,920
Loss from discontinued operation, net of income taxes	(487)	(522)
Net income attributable to EMCOR Group, Inc. common stockholders	\$126,190	\$109,398
Denominator:		
Weighted average shares outstanding used to compute basic earnings (loss) per common share	58,531,150	59,527,863
Effect of dilutive securities—Share-based awards	331,355	345,553
Shares used to compute diluted earnings (loss) per common share	58,862,505	59,873,416
Basic earnings (loss) per common share:		
From continuing operations attributable to EMCOR Group, Inc. common stockholders	\$2.16	\$1.85
From discontinued operation	(0.01)	(0.01)
Net income attributable to EMCOR Group, Inc. common stockholders	\$2.15	\$1.84
Diluted earnings (loss) per common share:		
From continuing operations attributable to EMCOR Group, Inc. common stockholders	\$2.15	\$1.84
From discontinued operation	(0.01)	(0.01)
Net income attributable to EMCOR Group, Inc. common stockholders	\$2.14	\$1.83

The number of outstanding share-based awards that were excluded from the computation of diluted EPS for the three and six months ended June 30, 2018 because they would be anti-dilutive were 500 and 550, respectively. The number of outstanding share-based awards that were excluded from the computation of diluted EPS for the three and six months ended June 30, 2017 because they would be anti-dilutive were 47,200 and zero, respectively.

Credit Agreement

We have a credit agreement dated as of August 3, 2016, which provides for a \$900.0 million revolving credit facility (the “2016 Revolving Credit Facility”) and a \$400.0 million term loan (the “2016 Term Loan”) (collectively referred to as the “2016 Credit Agreement”) expiring August 3, 2021. We may increase the 2016 Revolving Credit Facility to \$1.3 billion if additional lenders are identified and/or existing lenders are willing to increase their current commitments. We may allocate up to \$300.0 million of available capacity under the 2016 Revolving Credit Facility to letters of credit for our account or for the account of any of our subsidiaries. Obligations under the 2016 Credit Agreement are guaranteed by most of our direct and indirect subsidiaries and are secured by substantially all of our assets. The 2016 Credit Agreement contains various covenants providing for, among other things, maintenance of certain financial ratios and certain limitations on payment of dividends, common stock repurchases, investments, acquisitions, indebtedness and capital expenditures. We were in compliance with all such covenants as of June 30, 2018 and December 31, 2017. A commitment fee is payable on the average daily unused amount of the 2016 Revolving Credit Facility, which ranges from 0.15% to 0.30%, based on certain financial tests. The fee was 0.15% of the unused amount as of June 30, 2018. Borrowings under the 2016 Credit Agreement bear interest at (1) a base rate plus a margin of 0.00% to 0.75%, based on certain financial tests, or (2) United States dollar LIBOR (2.09% and 2.33% at June 30, 2018 for our 2016 Revolving Credit Facility and our 2016 Term Loan, respectively) plus 1.00% to 1.75%, based on certain financial tests. The base rate is determined by the greater of (a) the prime commercial lending rate announced by Bank of Montreal from time to time (5.00% at June 30, 2018), (b) the federal funds effective rate, plus ½ of 1.00%, (c) the daily one month LIBOR rate, plus 1.00%, or (d) 0.00%. The interest rates in effect at June 30, 2018 were 3.09% and 3.33% for our 2016 Revolving Credit Facility and our 2016 Term Loan, respectively. Fees for letters of credit issued under the 2016 Revolving Credit Facility range from 1.00% to 1.75% of the respective face amounts of outstanding letters of credit and are computed based on certain financial tests. Debt issuance costs are amortized over the life of the agreement and are included as part of interest expense. The 2016 Term Loan previously required us to make principal payments of \$5.0 million on the last day of March, June, September and December of each year, which commenced with the calendar quarter ended December 31, 2016. On December 30, 2016, we made a

payment of \$100.0 million, of which \$5.0 million represented our required quarterly payment and \$95.0 million represented a prepayment of outstanding principal. Such prepayment was applied against the remaining mandatory quarterly payments on a ratable basis. As a result, commencing with the calendar quarter ended March 31, 2017, our required quarterly payment has been reduced to \$3.8 million. All unpaid principal and interest is due on August 3, 2021. As of June 30, 2018 and December 31, 2017, the balance of the 2016 Term Loan was \$277.2 million and \$284.8 million, respectively. As of June 30, 2018 and December 31, 2017, we had approximately \$110.3 million and

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 8 Debt - (Continued)

\$110.1 million of letters of credit outstanding, respectively. There were \$25.0 million in borrowings outstanding under the 2016 Revolving Credit Facility as of June 30, 2018 and December 31, 2017.

NOTE 9 Fair Value Measurements

We use a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy, which gives the highest priority to quoted prices in active markets, is comprised of the following three levels:

Level 1 – Unadjusted quoted market prices in active markets for identical assets and liabilities.

Level 2 – Observable inputs, other than Level 1 inputs. Level 2 inputs would typically include quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are both significant to the measurement and unobservable.

The following tables provide the assets and liabilities carried at fair value measured on a recurring basis as of June 30, 2018 and December 31, 2017 (in thousands):

Asset Category	Assets at Fair Value as of June 30, 2018			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents ⁽¹⁾	\$306,624	\$ —	\$ —	—\$306,624
Restricted cash ⁽²⁾	2,572	—	—	2,572
Deferred compensation plan assets ⁽³⁾	24,159	—	—	24,159
Total	\$333,355	\$ —	\$ —	—\$333,355
Asset Category	Assets at Fair Value as of December 31, 2017			
	Level 1	Level 2	Level 3	Total
Cash and cash equivalents ⁽¹⁾	\$467,430	\$ —	\$ —	—\$467,430
Restricted cash ⁽²⁾	1,958	—	—	1,958
Deferred compensation plan assets ⁽³⁾	22,054	—	—	22,054
Total	\$491,442	\$ —	\$ —	—\$491,442

Cash and cash equivalents include money market funds with original maturity dates of three months or less, which (1) are Level 1 assets. At June 30, 2018 and December 31, 2017, we had \$167.2 million and \$194.2 million, respectively, in money market funds.

(2) Restricted cash is classified as “Prepaid expenses and other” in the Condensed Consolidated Balance Sheets.

Restricted cash primarily represents cash held in account for use on customer contracts.

(3) Deferred compensation plan assets are classified as “Other assets” in the Condensed Consolidated Balance Sheets.

We believe that the carrying values of our financial instruments, which include accounts receivable and other financing commitments, approximate their fair values due primarily to their short-term maturities and low risk of counterparty default. The carrying value of our debt associated with the 2016 Credit Agreement approximates its fair value due to the variable rate on such debt.

NOTE 10 Income Taxes

On December 22, 2017, the U.S. government enacted comprehensive tax legislation, commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”). The Tax Act makes broad and complex changes to the U.S. tax code, including, among other things, reducing the U.S. federal corporate tax rate from 35% to 21%, effective January 1, 2018.

As a result of the reduction of the U.S. corporate tax rate to 21%, U.S. generally accepted accounting principles require companies to re-value their deferred tax assets and liabilities as of the date of enactment, with the resulting tax effects accounted for in the reporting period of enactment. Based on currently available information, the Company’s

estimated value of its net deferred federal and state tax liability balances have been reduced by approximately \$39.3 million, which was recorded as a reduction of income tax expense in the Company's Consolidated Statements of Operations for the year ended December 31, 2017. Such estimate will be finalized upon the completion of the 2017 federal and state income tax returns as the Company continues to evaluate any further guidance that may be issued related to the Tax Act.

Table of Contents

EMCOR Group, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements (Unaudited)

NOTE 10 Income Taxes - (Continued)

The Tax Act provides for a change from a worldwide to a territorial tax system and requires a one-time transition tax on certain deferred foreign income of specified foreign corporations. Staff Accounting Bulletin 118 provides a measurement period for companies to evaluate the effects of the Tax Act, and the Company made a provisional estimate at December 31, 2017 that the impact of such transition tax was expected to be immaterial. The Company has concluded, after completion of its analysis during the first quarter of 2018 that it is not subject to such transition tax. Our income tax provision for the three and six months ended June 30, 2018 also included an estimate of the minimum tax on global intangible low-taxed income for certain earnings of our foreign subsidiaries, as required under the Tax Act. The Company continues to evaluate the effects of the Tax Act related to the repatriation of certain foreign earnings and believes that such effects are immaterial.

For the three months ended June 30, 2018 and 2017, our income tax provision from continuing operations was \$26.5 million and \$33.0 million, respectively, based on an effective income tax rate, before discrete items and less amounts attributable to noncontrolling interests, of 27.8% and 37.5%, respectively. The actual income tax rate on income from continuing operations, less amounts attributable to noncontrolling interests, for the three months ended June 30, 2018 and 2017, inclusive of discrete items, was 27.2% and 36.8%, respectively. For the six months ended June 30, 2018 and 2017, our income tax provision from continuing operations was \$47.2 million and \$59.9 million, respectively, based on an effective income tax rate, before discrete items and less amounts attributable to noncontrolling interests, of 27.7% and 37.7%, respectively. The actual income tax rate on income from continuing operations, less amounts attributable to noncontrolling interests, for the six months ended June 30, 2018 and 2017, inclusive of discrete items, was 27.1% and 35.3%, respectively. The decrease in the 2018 income tax provision and the 2018 actual income tax rate on income from continuing operations was primarily due to the enactment of the Tax Act.

As of June 30, 2018 and December 31, 2017, the amount of unrecognized income tax benefits was \$0.8 million.

We report interest expense and/or income related to unrecognized income tax benefits in the income tax provision. As of June 30, 2018 and December 31, 2017, we had approximately \$0.1 million of accrued interest expense related to unrecognized income tax benefits included as a liability in the Condensed Consolidated Balance Sheets. Total income tax reserves included in "Other long-term liabilities" were \$0.9 million as of June 30, 2018 and December 31, 2017. For the three months ended June 30, 2018 and 2017, less than \$0.1 million and \$0.1 million of interest expense, respectively, was recognized in the income tax provision. For the six months ended June 30, 2018 and 2017, less than \$0.1 million of interest expense and \$0.3 million of interest income, respectively, was recognized in the income tax provision.

We do not anticipate any significant changes to our reserves for uncertain tax positions in the next twelve months. We file income tax returns with the Internal Revenue Service and various state, local and foreign tax agencies. The Company is currently under examination by various taxing authorities for the years 2012 through 2015. During the first quarter of 2017, the Company settled an examination with a taxing authority which resulted in a \$3.3 million reversal of reserves for previously uncertain tax positions.

NOTE 11 Common Stock

As of June 30, 2018 and December 31, 2017, there were 58,173,108 and 58,798,428 shares of our common stock outstanding, respectively.

During the three months ended June 30, 2018 and 2017, we issued 72,777 and 76,347 shares of common stock, respectively. During the six months ended June 30, 2018 and 2017, we issued 170,930 and 193,381 shares of common stock, respectively. These shares were issued primarily upon: (a) the satisfaction of required conditions under certain of our share-based compensation plans and (b) the purchase of common stock pursuant to our employee stock purchase plan.

On September 26, 2011, our Board of Directors authorized us to repurchase up to \$100.0 million of our outstanding common stock. On December 5, 2013, October 23, 2014, October 28, 2015 and October 25, 2017, our Board of Directors authorized us to repurchase up to an additional \$100.0 million, \$250.0 million, \$200.0 million and \$100.0

million of our outstanding common stock, respectively. During 2018, we have repurchased 796,250 shares of our common stock for approximately \$60.5 million. Since the inception of the repurchase programs through June 30, 2018, we have repurchased approximately 13.6 million shares of our common stock for approximately \$635.8 million. As of June 30, 2018, there remained authorization for us to repurchase approximately \$114.2 million of our shares. The repurchase programs have no expiration date and do not obligate the Company to acquire any particular amount of common stock and may be suspended, recommenced or discontinued at any time or from time to time without prior notice. We may repurchase our shares from time to time to the extent permitted by securities laws and other legal requirements, including provisions in our 2016 Credit Agreement placing limitations on such repurchases. The repurchase programs have been and will be funded from our operations.

NOTE 12 Retirement Plans

Our United Kingdom subsidiary has a defined benefit pension plan covering all eligible employees (the “UK Plan”); however, no individual joining the company after October 31, 2001 may participate in the UK Plan. On May 31, 2010, we curtailed the future accrual of benefits for active employees under such plan. We also sponsor three domestic retirement plans in which participation by new individuals is frozen.

Components of Net Periodic Pension Cost

The components of net periodic pension cost of the UK Plan for the three and six months ended June 30, 2018 and 2017 were as follows (in thousands):

	For the three months ended June 30,		For the six months ended June 30,	
	2018	2017	2018	2017
Interest cost	\$2,045	\$2,124	\$4,144	\$4,169
Expected return on plan assets	(3,490)	(3,327)	(7,071)	(6,531)
Amortization of unrecognized loss	665	724	1,347	1,422
Net periodic pension cost (income)	\$(780)	\$(479)	\$(1,580)	\$(940)

The net periodic pension cost associated with the domestic plans was approximately \$0.1 million for each of the three and six months ended June 30, 2018 and 2017.

Employer Contributions

For the six months ended June 30, 2018, our United Kingdom subsidiary contributed approximately \$2.2 million to the UK Plan and anticipates contributing an additional \$2.5 million during the remainder of 2018. Contributions to the domestic plans were approximately \$0.1 million for the six months ended June 30, 2018.

NOTE 13 Commitments and Contingencies

Government Contracts

As a government contractor, we are subject to U.S. government audits and investigations relating to our operations, fines, penalties and compensatory and treble damages, and possible suspension or debarment from doing business with the government. Based on currently available information, we believe the outcome of ongoing government disputes and investigations will not have a material impact on our financial position, results of operations or liquidity.

Legal Matters

One of our subsidiaries was a subcontractor to a mechanical contractor (“Mechanical Contractor”) on a construction project where an explosion occurred in 2010. The Mechanical Contractor has asserted claims, in the context of an arbitration proceeding against our subsidiary, alleging that our subsidiary is responsible for a portion of the damages for which the Mechanical Contractor may be liable as a result of: (a) personal injury suffered by individuals as a result of the explosion and (b) the Mechanical Contractor’s legal fees and associated management costs in defending against any and all such claims. The Mechanical Contractor previously asserted claims under the Connecticut and Massachusetts Unfair and Deceptive Trade Practices Acts, but such claims have been withdrawn. The general contractor (as assignee of the Mechanical Contractor) on the construction project, and for whom the Mechanical Contractor worked, has alleged that our subsidiary is responsible for losses asserted by the owner of the project and/or the general contractor because of delays in completion of the project and for damages to the owner’s property. We believe, and have been advised by counsel, that we have a number of meritorious defenses to all such matters. We believe that the ultimate outcome of such matters will not have a material adverse effect on our consolidated financial position, results of operations or liquidity. Notwithstanding our assessment of the final impact of this matter, we are not able to estimate with any certainty the amount of loss, if any, which would be associated with an adverse resolution.

We are involved in several other proceedings in which damages and claims have been asserted against us. We believe that we have a number of valid defenses to such proceedings and claims and intend to vigorously defend ourselves. Other potential claims may exist that have not yet been asserted against us. We do not believe that any such matters

will have a material adverse effect on our financial position, results of operations or liquidity. Litigation is subject to many uncertainties and the outcome of litigation is not predictable with assurance. It is possible that some litigation matters for which liabilities have not been recorded could be decided unfavorably to us, and that any such unfavorable decisions could have a material adverse effect on our financial position, results of operations or liquidity.

NOTE 13 Commitments and Contingencies - (Continued)

Restructuring expenses

Restructuring expenses, relating to employee severance obligations, were \$0.4 million and \$0.5 million for the three and six months ended June 30, 2018, respectively, and \$0.3 million and \$0.9 million for the three and six months ended June 30, 2017, respectively. As of June 30, 2018, the balance of these restructuring obligations yet to be paid was \$0.4 million, and the majority of such amount is expected to be paid during the remainder of 2018. No material expenses in connection with restructuring from continuing operations are expected to be incurred during the remainder of 2018.

The changes in restructuring activity by reportable segments during the six months ended June 30, 2018 and 2017 were as follows (in thousands):

	United States electrical construction and facilities services segment	United States mechanical construction and facilities services segment	United States building services segment	Total
Balance at December 31, 2016	\$ —	\$ 188	\$ 13	\$201
Charges	—	218	690	908
Payments	—	(316)	(621)	(937)
Balance at June 30, 2017	\$ —	\$ 90	\$ 82	\$172
Balance at December 31, 2017	\$ 452	\$ —	\$ 40	\$492
Charges	—	—	464	464
Payments	(239)	—	(305)	(544)
Balance at June 30, 2018	\$ 213	\$ —	\$ 199	\$412

NOTE 14 Segment Information

We have the following reportable segments, which provide services associated with the design, integration, installation, start-up, operation and maintenance of various systems: (a) United States electrical construction and facilities services (involving systems for electrical power transmission and distribution; premises electrical and lighting systems; process instrumentation in the refining, chemical process, food process and mining industries; low-voltage systems, such as fire alarm, security and process control; voice and data communication; roadway and transit lighting; and fiber optic lines); (b) United States mechanical construction and facilities services (involving systems for heating, ventilation, air conditioning, refrigeration and clean-room process ventilation; fire protection; plumbing, process and high-purity piping; controls and filtration; water and wastewater treatment; central plant heating and cooling; cranes and rigging; millwrighting; and steel fabrication, erection and welding); (c) United States building services; (d) United States industrial services; and (e) United Kingdom building services. The “United States building services” and “United Kingdom building services” segments principally consist of those operations which provide a portfolio of services needed to support the operation and maintenance of customers’ facilities, including commercial and government site-based operations and maintenance; facility maintenance and services, including reception, security and catering services; outage services to utilities and industrial plants; military base operations support services; mobile maintenance and services; floor care and janitorial services; landscaping, lot sweeping and snow removal; facilities management; vendor management; call center services; installation and support for building systems; program development, management and maintenance for energy systems; technical consulting and diagnostic services; infrastructure and building projects for federal, state and local governmental agencies and bodies; and small modification and retrofit projects, which services are not generally related to customers’ construction programs. The “United States industrial services” segment principally consists of those operations which provide industrial maintenance and services, including those for refineries and petrochemical plants, including on-site repairs, maintenance and service of heat exchangers, towers, vessels and piping; design, manufacturing, repair and hydro blast

cleaning of shell and tube heat exchangers and related equipment; refinery turnaround planning and engineering services; specialty welding services; overhaul and maintenance of critical process units in refineries and petrochemical plants; and specialty technical services for refineries and petrochemical plants.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

We are one of the largest electrical and mechanical construction and facilities services firms in the United States. In addition, we provide a number of building services and industrial services. Our services are provided to a broad range of commercial, industrial, utility and institutional customers through approximately 75 operating subsidiaries and joint venture entities. Our offices are located in the United States and the United Kingdom.

Operating Segments

We have the following reportable segments, which provide services associated with the design, integration, installation, start-up, operation and maintenance of various systems: (a) United States electrical construction and facilities services (involving systems for electrical power transmission and distribution; premises electrical and lighting systems; process instrumentation in the refining, chemical process, food process and mining industries; low-voltage systems, such as fire alarm, security and process control; voice and data communication; roadway and transit lighting; and fiber optic lines); (b) United States mechanical construction and facilities services (involving systems for heating, ventilation, air conditioning, refrigeration and clean-room process ventilation; fire protection; plumbing, process and high-purity piping; controls and filtration; water and wastewater treatment; central plant heating and cooling; cranes and rigging; millwrighting; and steel fabrication, erection and welding); (c) United States building services; (d) United States industrial services; and (e) United Kingdom building services. The "United States building services" and "United Kingdom building services" segments principally consist of those operations which provide a portfolio of services needed to support the operation and maintenance of customers' facilities, including commercial and government site-based operations and maintenance; facility maintenance and services, including reception, security and catering services; outage services to utilities and industrial plants; military base operations support services; mobile maintenance and services; floor care and janitorial services; landscaping, lot sweeping and snow removal; facilities management; vendor management; call center services; installation and support for building systems; program development, management and maintenance for energy systems; technical consulting and diagnostic services; infrastructure and building projects for federal, state and local governmental agencies and bodies; and small modification and retrofit projects, which services are not generally related to customers' construction programs. The "United States industrial services" segment principally consists of those operations which provide industrial maintenance and services, including those for refineries and petrochemical plants, including on-site repairs, maintenance and service of heat exchangers, towers, vessels and piping; design, manufacturing, repair and hydro blast cleaning of shell and tube heat exchangers and related equipment; refinery turnaround planning and engineering services; specialty welding services; overhaul and maintenance of critical process units in refineries and petrochemical plants; and specialty technical services for refineries and petrochemical plants.

Impact of Acquisitions

In order to provide a more meaningful period-over-period discussion of our operating results, we may discuss amounts generated or incurred (revenues, gross profit, selling, general and administrative expenses and operating income) by companies acquired. The amounts discussed reflect the acquired companies' operating results in the current reported period only for the time period these entities were not owned by EMCOR in the comparable prior reported period.

Overview

The following table presents selected financial data for the three months ended June 30, 2018 and 2017 (in thousands, except percentages and per share data):

	For the three months ended	
	June 30,	
	2018	2017
Revenues	\$1,953,886	\$1,895,937
Revenues increase (decrease) from prior year	3.1	% (1.9)%
Operating income	\$99,656	\$92,413
Operating income as a percentage of revenues	5.1	% 4.9 %
Net income attributable to EMCOR Group, Inc.	\$70,816	\$56,758
Diluted earnings per common share from continuing operations	\$1.21	\$0.95

Table of Contents

The results for the 2018 second quarter represented strong operating performance from the majority of our reporting segments, which culminated in new company records in terms of quarterly revenues, operating income, net income attributable to EMCOR Group, Inc. and diluted earnings per common share from continuing operations.

The increase in revenues for the 2018 second quarter was primarily attributable to revenue growth within all of our reportable segments, except for our United States industrial services segment and our United States mechanical construction and facilities services segment. In addition, companies acquired in 2018 and 2017, which are reported in our United States mechanical construction and facilities services segment and our United States building services segment, generated incremental revenues of \$16.5 million.

The overall increase in operating income and operating margin (operating income as a percentage of revenues) was attributable to the results of all of our reportable segments, except for our United States industrial services segment. Companies acquired in 2018 and 2017 contributed incremental operating income of \$1.6 million, inclusive of \$0.5 million of amortization expense associated with identifiable intangible assets. The results for the 2017 second quarter included the recovery of certain contract costs previously disputed on a project that was completed in 2016 within our United States mechanical construction and facilities services segment, which resulted in \$11.6 million of gross profit and favorably impacted consolidated operating margin by 0.6%.

The increase in net income attributable to EMCOR Group, Inc. and diluted earnings per common share from continuing operations for the second quarter of 2018 was due to an increase in operating income and the reduction in the U.S federal corporate tax rate due to the enactment of the Tax Cuts and Jobs Act legislation (the "Tax Act"). We acquired two companies in 2018, each for an immaterial amount. One company provides mobile mechanical services and fire protection services within the Southern region of the United States, and its results of operations have been included in our United States building services segment. The results of operations for the other company acquired, which have also been included in our United States building services segment, were de minimis.

Results of Operations

Revenues

The following tables present our operating segment revenues from unrelated entities and their respective percentages of total revenues (in thousands, except for percentages):

	For the three months ended June 30,			
	2018	% of Total	2017	% of Total
Revenues:				
United States electrical construction and facilities services	\$479,542	25 %	\$449,222	24 %
United States mechanical construction and facilities services	740,657	38 %	741,817	39 %
United States building services	461,033	24 %	438,264	23 %
United States industrial services	167,147	9 %	187,476	10 %
Total United States operations	1,848,379	95 %	1,816,779	96 %
United Kingdom building services	105,507	5 %	79,158	4 %
Total worldwide operations	\$1,953,886	100 %	\$1,895,937	100 %

	For the six months ended June 30,			
	2018	% of Total	2017	% of Total
Revenues:				
United States electrical construction and facilities services	\$934,294	24 %	\$892,238	24 %
United States mechanical construction and facilities services	1,439,504	37 %	1,412,946	37 %
United States building services	915,785	24 %	878,294	23 %
United States industrial services	352,294	9 %	446,015	12 %
Total United States operations	3,641,877	94 %	3,629,493	96 %
United Kingdom building services	212,397	6 %	158,176	4 %
Total worldwide operations	\$3,854,274	100 %	\$3,787,669	100 %

Table of Contents

As described below in more detail, our revenues for the three months ended June 30, 2018 increased to \$1.95 billion compared to \$1.90 billion for the three months ended June 30, 2017, and our revenues for the six months ended June 30, 2018 increased to \$3.85 billion compared to \$3.79 billion for the six months ended June 30, 2017. The increase in revenues for the three months ended June 30, 2018 was primarily attributable to increased revenues from all of our reportable segments, except for our United States industrial services segment and our United States mechanical construction and facilities services segment. The increase in revenues for the six months ended June 30, 2018 was primarily attributable to increased revenues from all of our reportable segments, except for our United States industrial services segment. Companies acquired in 2018 and 2017, which are reported in our United States mechanical construction and facilities services segment and our United States building services segment, generated incremental revenues of \$16.5 million and \$36.0 million for the three and six months ended June 30, 2018, respectively. Revenues of our United States electrical construction and facilities services segment were \$479.5 million and \$934.3 million for the three and six months ended June 30, 2018, respectively, compared to revenues of \$449.2 million and \$892.2 million for the three and six months ended June 30, 2017, respectively. The increase in revenues for the three and six months ended June 30, 2018 was primarily attributable to an increase in revenues from institutional, commercial and water and wastewater construction projects, partially offset by a decrease in revenues from transportation construction projects. In addition, revenues for the six months ended June 30, 2018 benefited from a significant increase in revenues from healthcare construction projects.

Our United States mechanical construction and facilities services segment revenues for the three months ended June 30, 2018 were \$740.7 million, a \$1.2 million decrease compared to revenues of \$741.8 million for the three months ended June 30, 2017. Revenues of this segment for the six months ended June 30, 2018 were \$1,439.5 million, a \$26.6 million increase compared to revenues of \$1,412.9 million for the six months ended June 30, 2017. The decrease in revenues for the three months ended June 30, 2018 was primarily attributable to a decrease in revenues from large food processing construction projects that were substantially complete at the end of 2017, partially offset by an increase in revenues from commercial construction projects. The increase in revenues for the six months ended June 30, 2018 was primarily attributable to an increase in revenues from commercial, institutional and healthcare construction projects, partially offset by a decrease in revenues from large food processing construction projects. The results for the three and six months ended June 30, 2018 included \$10.3 million and \$20.5 million, respectively, of incremental revenues generated by a company acquired in 2017. This segment's results for the three and six months ended June 30, 2017 included \$11.6 million and \$18.1 million of revenues as a result of the recovery of certain contract costs previously disputed on a project that was completed in 2016.

Revenues of our United States building services segment for the three months ended June 30, 2018 increased by \$22.8 million compared to the three months ended June 30, 2017, and revenues for the six months ended June 30, 2018 increased by \$37.5 million compared to the six months ended June 30, 2017. The increase in revenues for both periods was due to: (a) greater project and repair service activities within our mobile mechanical services operations, (b) large project activity within our energy services operations, (c) increased activity from government site-based operations, partially as a result of new project awards, and (d) an increase in snow removal activity within our commercial site-based services operations. These increases were partially offset by a decrease in revenues due to the loss of certain contracts not renewed pursuant to rebid within our commercial site-based services operations. The results for the three and six months ended June 30, 2018 included \$6.2 million and \$15.5 million, respectively, of incremental revenues generated by companies acquired in 2018 and 2017.

Revenues of our United States industrial services segment for the three months ended June 30, 2018 decreased by \$20.3 million compared to the three months ended June 30, 2017, and revenues for the six months ended June 30, 2018 decreased by \$93.7 million compared to the six months ended June 30, 2017. The decrease in revenues for the three and six months ended June 30, 2018 was attributable to a decrease in revenues from our field services operations, as the results of 2017 included large turnaround project activity that did not repeat in 2018. In addition, revenues for the six months ended June 30, 2018 from our field services operations were impacted by the effects of Hurricane Harvey in 2017, which altered the timing of previously scheduled maintenance activities with our customers in 2018. The decrease in turnaround activities from our field services operations for both periods was partially offset by an increase in revenues from our shop services operations due to an increase in demand for our

cleaning and repair services.

Our United Kingdom building services segment revenues were \$105.5 million for the three months ended June 30, 2018 compared to revenues of \$79.2 million for the three months ended June 30, 2017. For the six months ended June 30, 2018, revenues for this segment were \$212.4 million compared to revenues of \$158.2 million for the six months ended June 30, 2017. This segment's increase in revenues for both periods was the result of increased project activity with existing customers, as well as new contract awards within the commercial, institutional and water and wastewater market sectors. In addition, this segment's revenues for the three and six months ended June 30, 2018 were positively impacted by an increase of \$6.4 million and \$18.9 million, respectively, related to the effect of favorable exchange rates for the British pound versus the United States dollar.

Table of Contents

Cost of sales and Gross profit

The following table presents our cost of sales, gross profit (revenues less cost of sales) and gross profit margin (gross profit as a percentage of revenues) (in thousands, except for percentages):

	For the three months ended		For the six months ended		
	June 30,		June 30,		
	2018	2017	2018	2017	
Cost of sales	\$1,663,042	\$1,621,436	\$3,294,311	\$3,246,828	
Gross profit	\$290,844	\$274,501	\$559,963	\$540,841	
Gross profit, as a percentage of revenues	14.9	% 14.5	% 14.5	% 14.3	%

Our gross profit increased by \$16.3 million for the three months ended June 30, 2018 compared to the three months ended June 30, 2017. Gross profit increased by \$19.1 million for the six months ended June 30, 2018 compared to the six months ended June 30, 2017. Our gross profit margin was 14.9% and 14.5% for the three months ended June 30, 2018 and 2017, respectively. Gross profit margin was 14.5% and 14.3% for the six months ended June 30, 2018 and 2017, respectively. The increase in gross profit for both periods was primarily attributable to improved operating performance within all of our reportable segments, except for our United States industrial services segment. The increase in gross profit margin for the three months ended June 30, 2018 was primarily attributable to improved operating performance within all of our reportable segments, except for our United States industrial services segment and our United States electrical construction and facilities services segment. The increase in gross profit margin for the six months ended June 30, 2018 was primarily attributable to improved operating performance within all of our reportable segments, except for our United States industrial services segment. In addition, the increase in gross profit margin for both periods was partially due to the favorable resolution of uncertainties on certain construction projects at or nearing completion. Gross profit and gross profit margin within our United States mechanical construction and facilities services segment for the 2017 periods were favorably impacted by the recovery of certain contract costs previously disputed on a project that was completed in 2016, resulting in \$11.6 million and \$18.1 million of gross profit and a 0.5% and a 0.4% favorable impact on the Company's gross profit margin for the three and six months ended June 30, 2017, respectively.

Selling, general and administrative expenses

The following table presents our selling, general and administrative expenses and SG&A margin (selling, general and administrative expenses as a percentage of revenues) (in thousands, except for percentages):

	For the three		For the six		
	months ended		months ended		
	June 30,		June 30,		
	2018	2017	2018	2017	
Selling, general and administrative expenses	\$189,907	\$181,745	\$380,932	\$365,132	
Selling, general and administrative expenses, as a percentage of revenues	9.7	% 9.6	% 9.9	% 9.6	%

Our selling, general and administrative expenses for the three months ended June 30, 2018 increased by \$8.2 million to \$189.9 million compared to \$181.7 million for the three months ended June 30, 2017. Selling, general and administrative expenses for the six months ended June 30, 2018 increased by \$15.8 million to \$380.9 million compared to \$365.1 million for the six months ended June 30, 2017. The increase in selling, general and administrative expenses for the three and six months ended June 30, 2018 included \$2.7 million and \$4.8 million, respectively, of incremental expenses directly related to companies acquired in 2018 and 2017, including amortization expense attributable to identifiable intangible assets of \$0.3 million and \$0.5 million, respectively. In addition to the impact of acquisitions, selling, general and administrative expenses increased due to: (a) an increase in incentive compensation expense, due to higher projected annual operating results than in the same prior year periods, (b) an increase in salaries, partially as a result of an increase in headcount due to higher revenues than in the same prior year periods, and (c) increases in other selling, general and administrative expenses, such as legal, information technology and medical costs. Selling, general and administrative expenses as a percentage of revenues were 9.7% and 9.9% for

the three and six months ended June 30, 2018, respectively, compared to 9.6% for both the three and six months ended June 30, 2017. The increase in SG&A margin for the three and six months ended June 30, 2018 was partially due to unabsorbed overhead costs within our United States industrial services segment due to the lack of significant turnaround activity.

Edgar Filing: EMCOR GROUP INC - Form 10-Q

Interest income	1,178	330
Income from continuing operations before income taxes	\$173,839	\$169,785

30

Table of Contents

As described below in more detail, operating income was \$99.7 million and \$177.7 million for the three and six months ended June 30, 2018, respectively, compared to \$92.4 million and \$174.8 million for the three and six months ended June 30, 2017, respectively. Operating margin was 5.1% and 4.6% for the three and six months ended June 30, 2018, respectively, compared to 4.9% and 4.6% for the three and six months ended June 30, 2017, respectively.

Operating income and operating margin for the 2017 periods benefited from the recovery of certain contract costs previously disputed on a project completed in 2016 within our United States mechanical construction and facilities services segment, which resulted in a 0.6% and a 0.4% favorable impact on the Company's operating margin for the three and six months ended June 30, 2017, respectively.

Operating income of our United States electrical construction and facilities services segment for the three and six months ended June 30, 2018 was \$36.0 million and \$71.8 million, respectively, compared to operating income of \$32.1 million and \$63.2 million for the three and six months ended June 30, 2017, respectively. The increase in operating income for both periods was attributable to an increase in gross profit from manufacturing, hospitality and commercial construction projects. In addition, operating income for the six months ended June 30, 2018 benefited from a significant increase in gross profit from transportation construction projects. The increase in operating margin for the three months ended June 30, 2018 was attributable to a decrease in the ratio of selling, general and administrative expenses to revenues. The increase in operating margin for the six months ended June 30, 2018 was attributable to improved operating performance, partially as a result of increased gross profit margin from construction projects within the transportation market sector.

Our United States mechanical construction and facilities services segment operating income for the three months ended June 30, 2018 was \$57.6 million, a \$4.5 million increase compared to operating income of \$53.1 million for the three months ended June 30, 2017. Operating income for the six months ended June 30, 2018 was \$97.2 million, a \$3.7 million increase compared to operating income of \$93.5 million for the six months ended June 30, 2017. The increase in operating income for both periods was attributable to an increase in gross profit from commercial, hospitality and manufacturing construction projects, partially offset by a decrease in gross profit from institutional construction projects. A company acquired in 2017 contributed incremental operating income of \$1.1 million and \$2.0 million, inclusive of \$0.2 million and \$0.5 million of amortization expense associated with identifiable intangible assets, for the three and six months ended June 30, 2018, respectively. This segment's operating income for the 2017 periods benefited from the recovery of certain contract costs previously disputed on a project completed in 2016, which resulted in \$11.6 million and \$18.1 million of gross profit for the three and six months ended June 30, 2017, respectively. The increase in operating margin for both periods was attributable to an increase in gross profit margin. In addition, the increase in gross profit margin for both periods was partially due to the favorable resolution of uncertainties on certain construction projects at or nearing completion. The recovery of the disputed contract costs in 2017 discussed above favorably impacted this segment's operating margin by 1.5% and 1.2% for the three and six months ended June 30, 2017, respectively.

Operating income of our United States building services segment for the three months ended June 30, 2018 increased by \$2.2 million compared to operating income for the three months ended June 30, 2017, and its operating income for the six months ended June 30, 2018 increased by \$5.0 million compared to the six months ended June 30, 2017. The increase in operating income for both periods was primarily attributable to increases in operating income from: (a) our government site-based services operations, partially as a result of new contract awards, (b) our energy services operations, due to large project activity, and (c) our commercial site-based services operations, partially as a result of an increase in snow removal activities from our contracts that are based on a per snow event basis. Additionally, companies acquired in 2018 and 2017 within our mobile mechanical services operations, contributed incremental operating income of \$0.5 million and \$1.0 million, inclusive of \$0.3 million and \$0.5 million of amortization expense associated with identifiable intangible assets, for the three and six months ended June 30, 2018, respectively. The increase in operating margin for both periods was attributable to an increase in gross profit margin.

Our United States industrial services segment operating income for the three months ended June 30, 2018 was \$1.1 million compared to operating income of \$4.4 million for the three months ended June 30, 2017. Operating income for the six months ended June 30, 2018 was \$4.5 million compared to operating income of \$21.4 for the six months ended June 30, 2017. The decrease in operating income for both periods was attributable to a lack of large turnaround

projects within our field services operations. In addition, gross profit was negatively impacted by the mix of work in our field services operations, which included a higher percentage of small capital projects that generate lower gross profit margins than our typical turnaround work. Lastly, operating income for the six months ended June 30, 2018 was negatively impacted by Hurricane Harvey in 2017, which altered the timing of previously scheduled maintenance activities with our customers during the first quarter of 2018. The decrease in operating income from our field services operations was partially offset by an increase in operating income from our shop services operations, due to an increase in demand for our cleaning and repair services. The decrease in operating margin for both periods was attributable to a decrease in gross profit margin and an increase in the ratio of selling, general and administrative expenses to revenues. The increase in SG&A margin for the three and six months ended June 30, 2018 was primarily the result of unabsorbed overhead costs due to the lack of significant turnaround projects.

Table of Contents

Our United Kingdom building services segment operating income was \$4.6 million for the three months ended June 30, 2018 compared to operating income of \$3.0 million for the three months ended June 30, 2017. Operating income was \$8.4 million for the six months ended June 30, 2018 compared to operating income of \$4.2 million for the six months ended June 30, 2017. Operating income for both periods increased primarily due to an increase in gross profit from project activity with existing customers, as well as gross profit from new contract awards. This segment's results included increases in operating income of \$0.3 million and \$0.7 million for the three and six months ended June 30, 2018, respectively, relating to the effect of favorable exchange rates for the British pound versus the United States dollar. The increase in operating margin for the three and six months ended June 30, 2018 was attributable to an increase in gross profit margin and a decrease in SG&A margin.

Our corporate administration operating loss for the three months ended June 30, 2018 was \$20.7 million compared to \$20.1 million for the three months ended June 30, 2017. Our corporate administration operating loss for the six months ended June 30, 2018 was \$42.4 million compared to \$41.1 million for the six months ended June 30, 2017. The increase in corporate administration expenses for the three and six months ended June 30, 2018 was due to an increase in certain employment costs, such as salaries and incentive compensation, as well as an increase in information technology and legal costs.

Interest expense for the three months ended June 30, 2018 and 2017 was \$3.5 million and \$3.1 million, respectively. Interest expense for the six months ended June 30, 2018 and 2017 was \$6.5 million and \$6.1 million, respectively. Interest income for the three months ended June 30, 2018 and 2017 was \$0.6 million and \$0.1 million, respectively. Interest income for the six months ended June 30, 2018 and 2017 was \$1.2 million and \$0.3 million, respectively. The increases in interest expense and interest income for both periods resulted from higher interest rates. The increase in interest expense was partially offset by the impact of reduced average outstanding borrowings.

For the three months ended June 30, 2018 and 2017, our income tax provision from continuing operations was \$26.5 million and \$33.0 million, respectively, based on an effective income tax rate, before discrete items and less amounts attributable to noncontrolling interests, of 27.8% and 37.5%, respectively. The actual income tax rate on income from continuing operations, less amounts attributable to noncontrolling interests, for the three months ended June 30, 2018 and 2017, inclusive of discrete items, was 27.2% and 36.8%, respectively. For the six months ended June 30, 2018 and 2017, our income tax provision from continuing operations was \$47.2 million and \$59.9 million, respectively, based on an effective income tax rate, before discrete items and less amounts attributable to noncontrolling interests, of 27.7% and 37.7%, respectively. The actual income tax rate on income from continuing operations, less amounts attributable to noncontrolling interests, for the six months ended June 30, 2018 and 2017, inclusive of discrete items, was 27.1% and 35.3%, respectively. The decrease in the 2018 income tax provision and the 2018 actual income tax rate on income from continuing operations was primarily due to the enactment of the Tax Act.

Discontinued operations

Due to a historical pattern of losses in the construction operations of our United Kingdom segment and our negative assessment of construction market conditions in the United Kingdom for the foreseeable future, we ceased construction operations in the United Kingdom during the third quarter of 2014. The results of the construction operations of our United Kingdom segment for all periods are presented in the Condensed Consolidated Financial Statements as discontinued operations.

Remaining Unsatisfied Performance Obligations

The following table presents the transaction price allocated to remaining unsatisfied performance obligations ("remaining performance obligations") in accordance with Accounting Standards Codification Topic 606, "Revenue from Contracts with Customers" ("ASC 606") for each of our reportable segments and their respective percentage total of remaining performance obligations (in thousands, except for percentages):

	June 30, 2018	% of Total	March 31, 2018	% of Total
Remaining performance obligations:				
United States electrical construction and facilities services	\$1,037,796	28 %	\$1,133,811	31 %
United States mechanical construction and facilities services	1,970,393	54 %	1,822,381	51 %
United States building services	451,960	12 %	424,196	12 %

Edgar Filing: EMCOR GROUP INC - Form 10-Q

United States industrial services	82,640	2 %	64,450	2 %
Total United States operations	3,542,789	96 %	3,444,838	96 %
United Kingdom building services	130,342	4 %	158,905	4 %
Total worldwide operations	\$3,673,131	100%	\$3,603,743	100%

32

Table of Contents

Our remaining performance obligations at June 30, 2018 were \$3.67 billion. Remaining performance obligations increase with awards of new contracts and decrease as we perform work and recognize revenue on existing contracts. We include a project within our remaining performance obligations at such time as the project is awarded and agreement on contract terms has been reached. Our remaining performance obligations include amounts related to contracts for which a fixed price contract value is not assigned when a reasonable estimate of total transaction price can be made.

Remaining performance obligations include unrecognized revenues to be realized from uncompleted construction contracts. Although many of our construction contracts are subject to cancellation at the election of our customers, in accordance with industry practice, we do not limit the amount of unrecognized revenue included within remaining performance obligations due to the inherent substantial economic penalty that would be incurred by our customers upon cancellation. We believe our reported remaining performance obligations for our construction contracts are firm and contract cancellations have not had a material adverse effect on us.

Remaining performance obligations also include unrecognized revenues expected to be realized over the remaining term of service contracts. However, to the extent a service contract includes a cancellation clause which allows for the termination of such contract by either party without a substantive penalty, the remaining contract term, and therefore, the amount of unrecognized revenues included within remaining performance obligations, is limited to the notice period required for the termination.

Our remaining performance obligations are comprised of: (a) original contract amounts, (b) change orders for which we have received written confirmations from our customers, (c) pending change orders for which we expect to receive confirmations in the ordinary course of business, (d) claim amounts that we have made against customers for which we have determined we have a legal basis under existing contractual arrangements and as to which the variable consideration constraint does not apply, and (e) other forms of variable consideration to the extent that such variable consideration has been included within the transaction price of our contracts. Such claim and other variable consideration amounts were immaterial for all periods presented.

Our remaining performance obligations at June 30, 2018 were \$3.67 billion compared to \$3.60 billion at March 31, 2018. The increase in remaining performance obligations at June 30, 2018 compared to March 31, 2018 was attributable to an increase in remaining performance obligations from all of our reportable segments, except for our United States electrical construction and facilities services segment and our United Kingdom building services segment.

Liquidity and Capital Resources

The following table presents our net cash used in operating activities, investing activities and financing activities (in thousands):

	For the six months ended June 30,	
	2018	2017
Net cash (used in) provided by operating activities	\$(32,650)	\$102,663
Net cash used in investing activities	\$(43,917)	\$(98,763)
Net cash used in financing activities	\$(82,504)	\$(85,086)
Effect of exchange rate changes on cash, cash equivalents and restricted cash	\$(1,121)	\$1,739

Our consolidated cash balance, including cash equivalents and restricted cash, decreased by approximately \$160.2 million from \$469.4 million at December 31, 2017 to \$309.2 million at June 30, 2018. Net cash used in operating activities for the six months ended June 30, 2018 was \$32.7 million compared to net cash provided by operating activities of \$102.7 million for the six months ended June 30, 2017. The reduction in cash flows from operating activities was primarily due to: (a) timing of cash receipts from our customers, including payments of advanced billings on our long-term construction contracts, (b) an increase in payments for incentive awards, and (c) an increase in payments to our vendors. Net cash used in investing activities was \$43.9 million for the six months ended June 30, 2018 compared to net cash used in investing activities of \$98.8 million for the six months ended June 30, 2017. The decrease in net cash used in investing activities was primarily due to a reduction in payments for acquisitions of

businesses. Net cash flows from financing activities for the six months ended June 30, 2018 decreased by approximately \$2.6 million compared to the six months ended June 30, 2017. The decrease in net cash used in financing activities was primarily due to a decrease in funds used for the repurchase of common stock, partially offset by payments for contingent consideration arrangements. Cash flows from discontinued operations were immaterial and are not expected to significantly affect future liquidity.

Table of Contents

The following is a summary of material contractual obligations and other commercial commitments (in millions):

Contractual Obligations	Total	Payments Due by Period			
		Less than 1 year	1-3 years	3-5 years	After 5 years
Revolving credit facility (including interest at 3.09%) ⁽¹⁾	\$27.4	\$0.8	\$1.6	\$25.0	\$—
Term loan (including interest at 3.33%) ⁽¹⁾	304.0	24.4	47.2	232.4	—
Capital lease obligations	4.7	1.7	2.6	0.4	—
Operating leases	298.3	74.8	117.6	63.4	42.5
Open purchase obligations ⁽²⁾	1,142.3	926.8	215.2	0.3	—
Other long-term obligations, including current portion ⁽³⁾	376.2	65.5	301.0	9.7	—
Liabilities related to uncertain income tax positions ⁽⁴⁾	0.9	—	—	—	0.9
Total Contractual Obligations	\$2,153.8	\$1,094.0	\$685.2	\$331.2	\$43.4

Other Commercial Commitments	Total Committed	Amount of Commitment Expiration by Period			
		Less than 1 year	1-3 years	3-5 years	After 5 years
Letters of credit	\$ 110.3	\$110.3	\$ —	\$ —	—

On August 3, 2016, we entered into a \$900.0 million revolving credit facility (the “2016 Revolving Credit Facility”) and a \$400.0 million term loan (the “2016 Term Loan”) (collectively referred to as the “2016 Credit Agreement”). The (1) proceeds of the 2016 Term Loan were used to repay amounts drawn under our prior credit agreement. As of June 30, 2018, the amount outstanding under the 2016 Term Loan was \$277.2 million. As of June 30, 2018, there were borrowings outstanding of \$25.0 million under the 2016 Revolving Credit Facility.

Represents open purchase orders for material and subcontracting costs related to construction and services (2) contracts. These purchase orders are not reflected in EMCOR’s Condensed Consolidated Balance Sheets and should not impact future cash flows, as amounts should be recovered through customer billings.

Represents primarily insurance related liabilities and liabilities for deferred income taxes, incentive compensation and deferred compensation, classified as other long-term liabilities in the Condensed Consolidated Balance Sheets. Cash payments for insurance and deferred compensation related liabilities may be payable beyond three years, but it is not practical to estimate these payments; therefore, these liabilities are reflected in the 1-3 years payment (3) period. We provide funding to our post retirement plans based on at least the minimum funding required by applicable regulations. In determining the minimum required funding, we utilize current actuarial assumptions and exchange rates to forecast estimates of amounts that may be payable for up to five years in the future. In our judgment, minimum funding estimates beyond a five year time horizon cannot be reliably estimated and, therefore, have not been included in the table.

(4) Includes \$0.1 million of accrued interest.

We have a credit agreement dated as of August 3, 2016, which provides for a \$900.0 million revolving credit facility (the “2016 Revolving Credit Facility”) and a \$400.0 million term loan (the “2016 Term Loan”) (collectively referred to as the “2016 Credit Agreement”) expiring August 3, 2021. We may increase the 2016 Revolving Credit Facility to \$1.3 billion if additional lenders are identified and/or existing lenders are willing to increase their current commitments. We may allocate up to \$300.0 million of available capacity under the 2016 Revolving Credit Facility to letters of credit for our account or for the account of any of our subsidiaries. Obligations under the 2016 Credit Agreement are guaranteed by most of our direct and indirect subsidiaries and are secured by substantially all of our assets. The 2016 Credit Agreement contains various covenants providing for, among other things, maintenance of certain financial

ratios and certain limitations on payment of dividends, common stock repurchases, investments, acquisitions, indebtedness and capital expenditures. We were in compliance with all such covenants as of June 30, 2018 and December 31, 2017. A commitment fee is payable on the average daily unused amount of the 2016 Revolving Credit Facility, which ranges from 0.15% to 0.30%, based on certain financial tests. The fee was 0.15% of the unused amount as of June 30, 2018. Borrowings under the 2016 Credit Agreement bear interest at (1) a base rate plus a margin of 0.00% to 0.75%, based on certain financial tests, or (2) United States dollar LIBOR (2.09% and 2.33% at June 30, 2018 for our 2016 Revolving Credit Facility and our 2016 Term Loan, respectively) plus 1.00% to 1.75%, based on certain financial tests. The base rate is determined by the greater of (a) the prime commercial lending rate announced by Bank of Montreal from time to time (5.00% at June 30, 2018), (b) the federal funds effective rate, plus ½ of 1.00%, (c) the daily one month LIBOR rate, plus 1.00%, or (d) 0.00%. The interest rates in effect at June 30, 2018 were 3.09% and 3.33% for our 2016 Revolving Credit Facility and our 2016 Term Loan, respectively. Fees for letters of credit issued under the 2016 Revolving Credit Facility range from 1.00% to 1.75% of the respective face amounts of outstanding letters of credit and are computed based on certain financial tests. Debt issuance costs are

Table of Contents

amortized over the life of the agreement and are included as part of interest expense. The 2016 Term Loan previously required us to make principal payments of \$5.0 million on the last day of March, June, September and December of each year, which commenced with the calendar quarter ended December 31, 2016. On December 30, 2016, we made a payment of \$100.0 million, of which \$5.0 million represented our required quarterly payment and \$95.0 million represented a prepayment of outstanding principal. Such prepayment was applied against the remaining mandatory quarterly payments on a ratable basis. As a result, commencing with the calendar quarter ended March 31, 2017, our required quarterly payment has been reduced to \$3.8 million. All unpaid principal and interest is due on August 3, 2021. As of June 30, 2018 and December 31, 2017, the balance of the 2016 Term Loan was \$277.2 million and \$284.8 million, respectively. As of June 30, 2018 and December 31, 2017, we had approximately \$110.3 million and \$110.1 million of letters of credit outstanding, respectively. There were \$25.0 million in borrowings outstanding under the 2016 Revolving Credit Facility as of June 30, 2018 and December 31, 2017.

The terms of our construction contracts frequently require that we obtain from surety companies (“Surety Companies”) and provide to our customers payment and performance bonds (“Surety Bonds”) as a condition to the award of such contracts. The Surety Bonds secure our payment and performance obligations under such contracts, and we have agreed to indemnify the Surety Companies for amounts, if any, paid by them in respect of Surety Bonds issued on our behalf. In addition, at the request of labor unions representing certain of our employees, Surety Bonds are sometimes provided to secure obligations for wages and benefits payable to or for such employees. Public sector contracts require Surety Bonds more frequently than private sector contracts and, accordingly, our bonding requirements typically increase as the amount of public sector work increases. As of June 30, 2018, based on the percentage-of-completion of our projects covered by Surety Bonds, our aggregate estimated exposure, assuming defaults on all our then existing contractual obligations, was approximately \$1.1 billion. Surety Bonds are issued by Surety Companies in return for premiums, which vary depending on the size and type of bond.

From time to time, we discuss with our current and other Surety Bond providers the amounts of Surety Bonds that may be available to us based on our financial strength and the absence of any default by us on any Surety Bond issued on our behalf and believe those amounts are currently adequate for our needs. However, if we experience changes in our bonding relationships or if there are adverse changes in the surety industry, we may (i) seek to satisfy certain customer requests for Surety Bonds by posting other forms of collateral in lieu of Surety Bonds, such as letters of credit, parent company guarantees or cash, in order to convince customers to forego the requirement for Surety Bonds, (ii) increase our activities in our business segments that rarely require Surety Bonds, such as our building and industrial services segments, and/or (iii) refrain from bidding for certain projects that require Surety Bonds. There can be no assurance that we would be able to effectuate alternatives to providing Surety Bonds to our customers or to obtain, on favorable terms, sufficient additional work that does not require Surety Bonds. Accordingly, if we were to experience a reduction in the availability of Surety Bonds, we could experience a material adverse effect on our financial position, results of operations and/or cash flows.

In the ordinary course of business, we, at times, guarantee obligations of our subsidiaries under certain contracts. Generally, we are liable under such an arrangement only if our subsidiary fails to perform its obligations under the contract. Historically, we have not incurred any substantial liabilities as a consequence of these guarantees.

We do not have any other material financial guarantees or off-balance sheet arrangements other than those disclosed herein.

We are a party to lawsuits and other proceedings in which other parties seek to recover from us amounts ranging from a few thousand dollars to over \$10.0 million. We do not believe that any such matters will have a material adverse effect on our financial position, results of operations or liquidity.

On September 26, 2011, our Board of Directors authorized us to repurchase up to \$100.0 million of our outstanding common stock. On December 5, 2013, October 23, 2014, October 28, 2015 and October 25, 2017, our Board of Directors authorized us to repurchase up to an additional \$100.0 million, \$250.0 million, \$200.0 million and \$100.0 million of our outstanding common stock, respectively. During 2018, we have repurchased 796,250 shares of our common stock for approximately \$60.5 million. Since the inception of the repurchase programs through June 30, 2018, we have repurchased approximately 13.6 million shares of our common stock for approximately \$635.8 million. As of June 30, 2018, there remained authorization for us to repurchase approximately \$114.2 million of our shares.

The repurchase programs have no expiration date and do not obligate the Company to acquire any particular amount of common stock and may be suspended, recommenced or discontinued at any time or from time to time without prior notice. We may repurchase our shares from time to time to the extent permitted by securities laws and other legal requirements, including provisions in our 2016 Credit Agreement placing limitations on such repurchases. The repurchase programs have been and will be funded from our operations.

We have paid quarterly dividends since October 25, 2011. We currently pay a regular quarterly dividend of \$0.08 per share. Our 2016 Credit Agreement places limitations on the payment of dividends on our common stock. However, we do not believe that the terms of such agreement currently materially limit our ability to pay a quarterly dividend of \$0.08 per share for the foreseeable future. The payment of dividends has been and will be funded from our operations.

Table of Contents

Our primary source of liquidity has been, and is expected to continue to be, cash generated by operating activities. We also maintain our 2016 Revolving Credit Facility that may be utilized, among other things, to meet short-term liquidity needs in the event cash generated by operating activities is insufficient or to enable us to participate in joint ventures or to make acquisitions that may require access to cash on short notice or for any other reason. Negative macroeconomic trends may have an adverse effect on liquidity. During economic downturns, there have typically been fewer small discretionary projects from the private sector, and our competitors have aggressively bid larger long-term infrastructure and public sector contracts. Short-term liquidity is also impacted by the type and length of construction contracts in place and large turnaround activities in our United States industrial services segment that are billed in arrears pursuant to contractual terms that are standard within the industry. Performance of long duration contracts typically requires greater amounts of working capital. While we strive to negotiate favorable billing terms which allow us to invoice in advance of costs incurred on certain of our contracts, there can be no assurance that such terms will be agreed to by our customers.

Long-term liquidity requirements can be expected to be met initially through cash generated from operating activities and our 2016 Revolving Credit Facility. Based upon our current credit ratings and financial position, we can reasonably expect to be able to incur long-term debt to fund acquisitions. Over the long term, our primary revenue risk factor continues to be the level of demand for non-residential construction services and for building and industrial services, which is influenced by macroeconomic trends including interest rates and governmental economic policy. In addition, our ability to perform work is critical to meeting long-term liquidity requirements.

We believe that our current cash balances and our borrowing capacity available under our 2016 Revolving Credit Facility or other forms of financing available to us through borrowings, combined with cash expected to be generated from operations, will be sufficient to provide short-term and foreseeable long-term liquidity and meet our expected capital expenditure requirements.

Certain Insurance Matters

As of June 30, 2018 and December 31, 2017, we utilized approximately \$110.0 million and \$109.7 million, respectively, of letters of credit obtained under our 2016 Revolving Credit Facility as collateral for our insurance obligations.

New Accounting Pronouncements

We review new accounting standards to determine the expected financial impact, if any, that the adoption of such standards will have. See Note 2 - New Accounting Pronouncements of the notes to condensed consolidated financial statements included in Item 1. Financial Statements for further information regarding new accounting standards, including the anticipated dates of adoption and the effects on our consolidated financial position, results of operations or liquidity.

Application of Critical Accounting Policies

Our condensed consolidated financial statements are based on the application of significant accounting policies, which require management to make significant estimates and assumptions. Our significant accounting policies are described in Note 2 – Summary of Significant Accounting Policies of the notes to consolidated financial statements included in Item 8 of our annual report on Form 10-K for the year ended December 31, 2017. We believe that some of the more critical judgment areas in the application of accounting policies that affect our financial condition and results of operations are the impact of changes in the estimates and judgments pertaining to: (a) revenue recognition from contracts with our customers; (b) collectibility or valuation of accounts receivable; (c) insurance liabilities; (d) income taxes; and (e) goodwill and identifiable intangible assets.

Revenue Recognition from Contracts with our Customers

We believe our most critical accounting policy is revenue recognition in accordance with ASC 606. ASC 606 aligns revenue recognition with the timing of when promised goods or services are transferred to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. This core principle is achieved through the application of the following five step model: (1) identify the contract with a customer, (2) identify the performance obligations in the contract, (3) determine the transaction price, (4) allocate the transaction price to performance obligations in the contract, and (5) recognize revenue as performance obligations are satisfied.

The Company recognizes revenue at the time the related performance obligation is satisfied by transferring a promised good or service to its customers. A good or service is considered to be transferred when the customer obtains control. The Company can transfer control of a good or service and satisfy its performance obligations either over time or at a point in time. The Company transfers control of a good or service over time and, therefore, satisfies a performance obligation and recognizes revenue over time if one of the following three criteria are met: (a) the customer simultaneously receives and consumes the benefits provided by the Company's performance as we perform, (b) the Company's performance creates or enhances an asset that the customer

Table of Contents

controls as the asset is created or enhanced, or (c) the Company's performance does not create an asset with an alternative use to us, and we have an enforceable right to payment for performance completed to date.

For our performance obligations satisfied over time, we recognize revenue by measuring the progress toward complete satisfaction of that performance obligation. The selection of the method to measure progress towards completion can be either an input method or an output method and requires judgment based on the nature of the goods or services to be provided.

For our construction contracts, revenue is generally recognized over time as our performance creates or enhances an asset that the customer controls as it is created or enhanced. Our fixed price construction projects generally use a cost-to-cost input method to measure our progress towards complete satisfaction of the performance obligation as we believe it best depicts the transfer of control to the customer which occurs as we incur costs on our contracts. Under the cost-to-cost measure of progress, the extent of progress towards completion is measured based on the ratio of costs incurred to date to the total estimated costs at completion of the performance obligation. For our unit price construction contracts, progress towards complete satisfaction is measured through an output method such as the amount of units produced or delivered, as this method most faithfully depicts the transfer of control to the customer. For our services contracts, revenue is also generally recognized over time as the customer simultaneously receives and consumes the benefits of our performance as we perform the service. For our fixed price service contracts with specified service periods, revenue is generally recognized on a straight-line basis over such service period when our inputs are expended evenly, and the customer receives and consumes the benefits of our performance throughout the contract term.

The timing of revenue recognition for the manufacturing of new build heat exchangers within our United States industrial services segment depends on the payment terms of the contract, as our performance does not create an asset with an alternative use to us. For those contracts which we have a right to payment for performance completed to date at all times throughout our performance, inclusive of a cancellation, we recognize revenue over time. These performance obligations use a cost-to-cost input method to measure our progress towards complete satisfaction of the performance obligation as we believe it best depicts the transfer of control to the customer which occurs as we incur costs on our contracts. However, for those contracts for which we do not have a right, at all times, to payment for performance completed to date, we recognize revenue at the point in time when control is transferred to the customer. For bill-and-hold arrangements, revenue is recognized when the customer obtains control of the heat exchanger, which may be prior to shipping, if the criteria of ASC 606 are met.

For certain of our revenue streams, such as call-out repair and service work, outage services, refinery turnarounds and specialty welding services that are performed under time and materials contracts, our progress towards complete satisfaction of such performance obligations is measured using an output method as the customer receives and consumes the benefits of our performance completed to date.

Due to uncertainties inherent in the estimation process, it is possible that estimates of costs to complete a performance obligation will be revised in the near-term. For those performance obligations for which revenue is recognized using a cost-to-cost input method, changes in total estimated costs, and related progress towards complete satisfaction of the performance obligation, are recognized on a cumulative catch-up basis in the period in which the revisions to the estimates are made. When the current estimate of total costs for a performance obligation indicate a loss, a provision for the entire estimated loss on the unsatisfied performance obligation is made in the period in which the loss becomes evident. For the three and six months ended June 30, 2018 and 2017, there were no changes in total estimated costs that had a significant impact to our operating results. In addition, for the three and six months ended June 30, 2018 and 2017, there were no significant losses recognized.

The timing of revenue recognition may differ from the timing of invoicing to customers. Contract assets include unbilled amounts from our long-term construction projects when revenue recognized under the cost-to-cost measure of progress exceed the amounts invoiced to our customers, as the amounts cannot be billed under the terms of our contracts. Such amounts are recoverable from our customers based upon various measures of performance, including achievement of certain milestones, completion of specified units or completion of a contract. In addition, many of our time and materials arrangements, as well as our contracts to perform turnaround services within the United States industrial services segment, are billed in arrears pursuant to contract terms that are standard within the industry,

resulting in contract assets and/or unbilled receivables being recorded, as revenue is recognized in advance of billings. Also included in contract assets are amounts we seek or will seek to collect from customers or others for errors or changes in contract specifications or design, contract change orders or modifications in dispute or unapproved as to both scope and/or price, or other customer-related causes of unanticipated additional contract costs (claims and unapproved change orders). Our contract assets do not include capitalized costs to obtain and fulfill a contract. Contract assets are generally classified as current within the Condensed Consolidated Balance Sheets. Contract liabilities from our long-term construction contracts occur when amounts invoiced to our customers exceed revenues recognized under the cost-to-cost measure of progress. Contract liabilities additionally include advanced payments from our

Table of Contents

customers on certain contracts. Contract liabilities decrease as we recognize revenue from the satisfaction of the related performance obligation and are recorded as either current or long-term, depending upon when we expect to recognize such revenue. The long-term portion of contract liabilities is included in “Other long-term obligations” in the Condensed Consolidated Balance Sheets.

See Note 3 - Revenue from Contracts with Customers of the notes to condensed consolidated financial statements included in Item 1. Financial Statements for further disclosure regarding revenue recognition.

Accounts Receivable

Accounts receivable are recognized in the period we deliver goods or provide services to our customers or when our right to consideration is unconditional. We are required to estimate the collectibility of accounts receivable. A considerable amount of judgment is required in assessing the likelihood of realization of receivables. Relevant assessment factors include the creditworthiness of the customer, our prior collection history with the customer and related aging of the past due balances. At June 30, 2018 and December 31, 2017, our accounts receivable of \$1,635.3 million and \$1,607.9 million, respectively, included allowances for doubtful accounts of \$16.1 million and \$17.2 million, respectively. The decrease in our allowance for doubtful accounts was due to the write-off of previously reserved accounts receivable. Specific accounts receivable are evaluated when we believe a customer may not be able to meet its financial obligations due to deterioration of its financial condition or its credit ratings. The allowance for doubtful accounts requirements are based on the best facts available and are re-evaluated and adjusted on a regular basis as additional information is received.

Insurance Liabilities

We have loss payment deductibles for certain workers’ compensation, automobile liability, general liability and property claims, have self-insured retentions for certain other casualty claims and are self-insured for employee-related healthcare claims. Losses are recorded based upon estimates of our liability for claims incurred and for claims incurred but not reported. The liabilities are derived from known facts, historical trends and industry averages utilizing the assistance of an actuary to determine the best estimate for the majority of these obligations. We believe the liabilities recognized on our balance sheets for these obligations are adequate. However, such obligations are difficult to assess and estimate due to numerous factors, including severity of injury, determination of liability in proportion to other parties, timely reporting of occurrences and effectiveness of safety and risk management programs. Therefore, if our actual experience differs from the assumptions and estimates used for recording the liabilities, adjustments may be required and will be recorded in the period that the experience becomes known. Our estimated net insurance liabilities for workers’ compensation, automobile liability, general liability and property claims increased by \$4.6 million for the six months ended June 30, 2018 compared to the year ended December 31, 2017, primarily due to a change in the actuarial assumptions for the most recent policy year. If our estimated insurance liabilities for workers’ compensation, automobile liability, general liability and property claims had increased by 10%, it would have resulted in \$16.2 million of additional expense for the six months ended June 30, 2018.

Income Taxes

We had net deferred income tax liabilities at June 30, 2018 and December 31, 2017 of \$69.8 million and \$64.7 million, respectively, primarily resulting from differences between the carrying value and income tax basis of certain identifiable intangible assets and depreciable fixed assets, which will impact our taxable income in future periods. Included within these net deferred income tax liabilities are \$101.1 million and \$105.6 million of deferred income tax assets as of June 30, 2018 and December 31, 2017, respectively. A valuation allowance is required when it is more likely than not that all or a portion of a deferred income tax asset will not be realized. As of June 30, 2018 and December 31, 2017, the total valuation allowance on deferred income tax assets, related to state net operating carryforwards, was approximately \$3.8 million.

Goodwill and Identifiable Intangible Assets

As of June 30, 2018, we had \$978.3 million and \$481.6 million, respectively, of goodwill and net identifiable intangible assets (primarily consisting of our contract backlog, developed technology/vendor network, customer relationships, non-competition agreements and trade names), arising out of the acquisition of companies. As of December 31, 2017, goodwill and net identifiable intangible assets were \$964.9 million and \$495.0 million, respectively. As of June 30, 2018, approximately 33.4% of our goodwill related to our United States industrial

services segment, approximately 26.2% related to our United States mechanical construction and facilities services segment, approximately 27.5% related to our United States building services segment, and approximately 12.9% related to our United States electrical construction and facilities services segment. The changes to goodwill since December 31, 2017 were related to two acquisitions in 2018 and a purchase price adjustment related to a prior acquisition. The determination of related estimated useful lives for identifiable intangible assets and whether those assets are impaired involves significant judgments based upon short and long-term projections of future performance. These forecasts reflect assumptions regarding the ability to successfully integrate acquired companies, as well as macroeconomic conditions. ASC Topic 350, "Intangibles – Goodwill and Other" ("ASC 350") requires that goodwill and other identifiable intangible assets with indefinite

Table of Contents

useful lives not be amortized, but instead tested at least annually for impairment (which we test each October 1, absent any impairment indicators), and be written down if impaired. ASC 350 requires that goodwill be allocated to its respective reporting unit and that identifiable intangible assets with finite lives be amortized over their useful lives. We test for impairment of our goodwill at the reporting unit level. Our reporting units are consistent with the reportable segments identified in Note 14, “Segment Information”, of the notes to condensed consolidated financial statements. In assessing whether our goodwill is impaired, we compare the fair value of the reporting unit to the carrying amount, including goodwill. If the fair value exceeds the carrying amount, no impairment loss is recognized. However, if the carrying amount of the reporting unit exceeds the fair value, the goodwill of the reporting unit is impaired and an impairment loss in the amount of the excess is recognized and charged to operations. The fair value of each of our reporting units is generally determined using discount estimated future cash flows; however, in certain circumstances, consideration is given to a market approach whereby fair value is measured based on a multiple of earnings.

As of the date of our latest impairment test (October 1, 2017), the carrying values of our United States building services segment, our United States mechanical construction and facilities services segment and our United States electrical construction and facilities services segment were approximately \$471.8 million, \$313.9 million and \$214.1 million, respectively. The fair values of our United States building services segment, our United States mechanical construction and facilities services segment and our United States electrical construction and facilities services segment exceeded their carrying values by approximately \$408.9 million, \$1,013.3 million and \$673.2 million, respectively.

During our annual impairment testing procedures as of October 1, 2017, and as a result of continued adverse market conditions, we tempered our expectations regarding the strength of a near-term recovery within our United States industrial services segment. As a result of our revised projections, the fair value of this segment fell short of its carrying value of \$666.7 million and resulted in the recognition of a non-cash impairment charge of \$57.5 million for the year ending December 31, 2017. There were no other goodwill impairment charges recognized during 2017. The weighted average cost of capital used in testing goodwill for impairment as of October 1, 2017 was 10.6%, 10.0% and 11.0% for our domestic construction segments, our United States building services segment and our United States industrial services segment, respectively. The perpetual growth rate used for our annual testing was 2.7% for all of our domestic segments. Unfavorable changes in these key assumptions may affect future testing results. For example, keeping all other assumptions constant, a 50 basis point increase in the weighted average costs of capital would cause the estimated fair values of our United States electrical construction and facilities services segment, our United States mechanical construction and facilities services segment, our United States building services segment and our United States industrial services segment to decrease by approximately \$51.1 million, \$74.9 million, \$53.3 million, and \$20.0 million, respectively. In addition, keeping all other assumptions constant, a 50 basis point reduction in the perpetual growth rate would cause the estimated fair values of our United States electrical construction and facilities services segment, our United States mechanical construction and facilities services segment, our United States building services segment, and our United States industrial services segment to decrease by approximately \$25.1 million, \$41.0 million, \$28.1 million, and \$10.0 million, respectively.

We also test for the impairment of trade names that are not subject to amortization by calculating the fair value using the “relief from royalty payments” methodology. This approach involves two steps: (a) estimating reasonable royalty rates for each trade name and (b) applying these royalty rates to a net revenue stream and discounting the resulting cash flows to determine fair value. This fair value is then compared with the carrying value of each trade name. If the carrying amount of the trade name is greater than the implied fair value of the trade name, an impairment in the amount of the excess is recognized and charged to operations. No impairment of our indefinite-lived trade names was recognized during the three and six months ended June 30, 2018 and 2017.

In addition, we review for the impairment of other identifiable intangible assets that are being amortized whenever facts and circumstances indicate that their carrying values may not be fully recoverable. This test compares their carrying values to the undiscounted pre-tax cash flows expected to result from the use of the assets. If the assets are impaired, the assets are written down to their fair values, generally determined based on their future discounted cash flows. During the three and six months ended June 30, 2018, we recorded a \$0.9 million non-cash impairment charge

associated with a finite-lived trade name within our United States industrial services segment. No additional impairment of our other identifiable intangible assets was recognized during the three and six months ended June 30, 2018 and 2017.

As referenced above, we have certain businesses, particularly within our United States industrial services segment, whose results are highly impacted by the demand for some of our offerings within the industrial and oil and gas markets. Future performance of this segment, along with a continued evaluation of the conditions of its end user markets, will be important to ongoing impairment assessments. Should this segment's actual results suffer a further decline or expected future results be revised downward, the risk of goodwill impairment or impairment of other identifiable intangible assets would increase.

Table of Contents

Our development of the present value of future cash flow projections used in impairment testing is based upon assumptions and estimates by management from a review of our operating results, business plans, anticipated growth rates and margins, and weighted average cost of capital, among others. Those assumptions and estimates can change in future periods, and other factors used in assessing fair value are outside the control of management, such as interest rates. There can be no assurance that estimates and assumptions made for purposes of our goodwill and identifiable asset impairment testing will prove to be accurate predictions of the future. If our assumptions regarding future business performance or anticipated growth rates and/or margins are not achieved, or there is a rise in interest rates, we may be required to record goodwill and/or identifiable asset impairment charges in future periods. It is not possible at this time to determine if any future impairment charge will result or, if it does, whether such a charge would be material.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.**

We have not used any derivative financial instruments during the six months ended June 30, 2018, including trading or speculating on changes in interest rates or commodity prices of materials used in our business.

We are exposed to market risk for changes in interest rates for borrowings under the 2016 Credit Agreement, which provides for a revolving credit facility and a term loan. Borrowings under the 2016 Credit Agreement bear interest at variable rates. As of June 30, 2018, there were borrowings of \$25.0 million outstanding under the 2016 Revolving Credit Facility and the balance of the 2016 Term Loan was \$277.2 million. This instrument bears interest at (1) a base rate plus a margin of 0.00% to 0.75%, based on certain financial tests, or (2) United States dollar LIBOR (2.09% and 2.33% at June 30, 2018 for our 2016 Revolving Credit Facility and our 2016 Term Loan, respectively) plus 1.00% to 1.75%, based on certain financial tests. The base rate is determined by the greater of (a) the prime commercial lending rate announced by Bank of Montreal from time to time (5.00% at June 30, 2018), (b) the federal funds effective rate, plus ½ of 1.00%, (c) the daily one month LIBOR rate, plus 1.00%, or (d) 0.00%. The interest rates in effect at June 30, 2018 were 3.09% and 3.33% for our 2016 Revolving Credit Facility and our 2016 Term Loan, respectively. Based on the \$302.2 million borrowings outstanding under the 2016 Credit Agreement, if overall interest rates were to increase by 100 basis points, interest expense, net of income taxes, would increase by approximately \$2.2 million in the next twelve months. Conversely, if overall interest rates were to decrease by 100 basis points, interest expense, net of income taxes, would decrease by approximately \$2.2 million in the next twelve months. Fees for letters of credit issued under the 2016 Revolving Credit Facility range from 1.00% to 1.75% of the respective face amounts of outstanding letters of credit and are computed based on certain financial tests. The 2016 Credit Agreement expires on August 3, 2021. There is no guarantee that we will be able to renew the 2016 Credit Agreement at its expiration. We are also exposed to construction market risk and its potential related impact on accounts receivable or contract assets on uncompleted contracts. The amounts recorded may be at risk if our customers' ability to pay these obligations is negatively impacted by economic conditions. We continually monitor the creditworthiness of our customers and maintain on-going discussions with customers regarding contract status with respect to change orders and billing terms. Therefore, we believe we take appropriate action to manage market and other risks, but there is no assurance that we will be able to reasonably identify all risks with respect to collectibility of these assets. See also the previous discussions of Revenue Recognition from Contracts with our Customers and Accounts Receivable under the heading, "Application of Critical Accounting Policies" in Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Amounts invested in our foreign operations are translated into U.S. dollars at the exchange rates in effect at the end of the period. The resulting translation adjustments are recorded as accumulated other comprehensive (loss) income, a component of equity, in the Condensed Consolidated Balance Sheets. We believe the exposure to the effects that fluctuating foreign currencies may have on our consolidated results of operations is limited because the foreign operations primarily invoice customers and collect obligations in their respective local currencies. Additionally, expenses associated with these transactions are generally contracted and paid for in their same local currencies. In addition, we are exposed to market risk of fluctuations in certain commodity prices of materials, such as copper and steel, which are used as components of supplies or materials utilized in our construction, building services and industrial services operations. We are also exposed to increases in energy prices, particularly as they relate to gasoline prices for our fleet of over 10,000 vehicles. While we believe we can increase our contract prices to adjust for some price increases in commodities, there can be no assurance that such price increases, if they were to occur, would be recoverable. Additionally, our fixed price contracts do not allow us to adjust our prices and, as a result, increases in material costs could reduce our profitability with respect to projects in progress.

ITEM 4. CONTROLS AND PROCEDURES.

Based on an evaluation of our disclosure controls and procedures (as required by Rule 13a-15(b) of the Securities Exchange Act of 1934), our President and Chief Executive Officer, Anthony J. Guzzi, and our Executive Vice President and Chief Financial Officer, Mark A. Pompa, have concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934) are effective as of the end of the period covered by this report.

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934) during the fiscal quarter ended June 30, 2018 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents

PART II. – OTHER INFORMATION.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS.

The following table summarizes repurchases of our common stock made by us during the quarter ended June 30, 2018:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares That May Yet be Purchased Under the Plan or Programs
April 1, 2018 to April 30, 2018	166,394	\$74.26	166,394	\$127,909,131
May 1, 2018 to May 31, 2018	183,960	\$74.29	183,960	\$114,243,454
June 1, 2018 to June 30, 2018	None	None	None	\$114,243,454
Total	350,354	\$74.28	350,354	

On September 26, 2011, our Board of Directors authorized us to repurchase up to \$100.0 million of our outstanding common stock. On December 5, 2013, October 23, 2014, October 28, 2015 and October 25, 2017, our Board of Directors authorized us to repurchase up to an additional \$100.0 million, \$250.0 million, \$200.0 million and \$100.0 million of our outstanding common stock, respectively. As of June 30, 2018, there remained (1) authorization for us to repurchase approximately \$114.2 million of our shares. No shares have been repurchased by us since the programs have been announced other than pursuant to these publicly announced programs. The repurchase programs have no expiration date and do not obligate the Company to acquire any particular amount of common stock and may be suspended, recommenced or discontinued at any time or from time to time without prior notice. We may repurchase our shares from time to time to the extent permitted by securities laws and other legal requirements, including provisions in our credit agreement placing limitations on such repurchases.

ITEM 4. MINE SAFETY DISCLOSURES.

Information concerning mine safety violations or other regulatory matters required by Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act and Item 104 of Regulation S-K (17 CFR 229.104) is included in Exhibit 95 to this quarterly report.

ITEM 6. EXHIBITS.

For the list of exhibits, see the Exhibit Index immediately following the signature page hereof, which Exhibit Index is incorporated herein by reference.
