FOR IMMEDIATE RELEASE

ANGLOTAJIK MINERALS REQUEST GRANTED

## Edgar Filing: ANGLOTAJIK MINERALS INC - Form 8-K

Nov 24, 2003 Los Angeles, California.- Anglotajik Minerals, Inc. (OTC Bulletin Board AJKM). The company announces that Mr. Georges Al-Zein, Executive Director AngloTajik Minerals Inc, Dushanbe has been notified by Ministry of Industry officials, that the request to further explore and develop several mineral deposits within the country of Tajikistan has been granted . The Company anticipates receipt of the formal Letter of Protocol from the Minister of Industry to arrive within the next several days.

This official letter acknowledges and accepts the request from AngloTajik Minerals Inc., to finalize a formal agreement allowing the company to proceed with the further exploration and development of several mineral deposits identified in previous Government Ministry of Industry meetings, as deposits of significant interest.

These deposits are situated in the southeastern Pamir region of Tajikistan and lay within a 400 sq km area. The deposits will include but will not be limited to the Barch, Huf, Akjilga Rudokop and Ikar deposits. The company's decision to conclude a formal agreement with the Government of Tajikistan was due in part to an independent review of Soviet Government documentation identifying several years of Soviet exploration throughout this area.

An expedition identified as the Pamir Expedition, carried out exploration of several of these deposits over a 5 year period in the early to mid 1970's. Further examination of this area was again carried out in late 1997 by a North American geology engineering firm. Documentation provided has identified extensive exploration work on two deposit areas within this 400 sq km zone. Several reserve estimates have been identified but to date not verified under the current western measurement standards. These deposits indicate significant findings of Tungsten, Gold, Silver, Copper, Cobalt and Rare Earth.

The Company's immediate plans are to re-enter these deposits and re-establish the earlier findings under western mining measurement standards. Corporate operations have been established in Dushanbe, the capital of Tajikistan. As well, local qualified personnel have been employed. The company will continue to interview qualified local mining personnel to assist in this venture.

The company expects to conclude on a formal agreement within the next several weeks.

Anglotajik Minerals Inc., is a resource company, registered in the State of Nevada, focusing on the exploration and advancement of mineral assets in The Republic of Tajikistan.
