Summary of the Minutes of the 368th meeting of the Board of Directors.

Date, time and place: December 21, 2005, at 3 p.m., at the company's head office, Av. Barbacena 1200, 18th Floor, Belo Horizonte, Minas Gerais, Brazil.

Meeting Committee: Chairman: Wilson Nélio Brumer; Secretary: Anamaria Pugedo Frade Barros.

Summary of business:

I- The Board approved:

a) The Annual Budget for 2006, and also the Corporate Guidelines for Execution of Budgets, contained in Part III of the Annual Budget: 12 Guidelines for capital expenditure; 13 Guidelines for execution of the expenses budget; and 14 Guidelines for inventories of materials and equipment.

b) The content of the Memorandum of Agreement which establishes the relationship between the parties for presentation of the bid for acquisition, in an auction to be held on a securities exchange, of the stockholding interest owned by the government of São Paulo State in CTEEP (*Companhia de Transmissão de Energia Elétrica Paulista*); and also for joint management of the business of that company, if the bid made is successful.

c) The content of the Memorandum of Agreement establishing the relationship between the parties for the process of preparation and delivery of a final binding proposal, in the event of being admitted by EDF Internacional

S.A. to the subsequent phase, and also for the management of the business of, UTE Norte Fluminense S.A., if the bid is successful.

- d) The Economic and Financial Opinion valuing WAY TV Belo Horizonte S.A., prepared by the specialized independent entity Ernst & Young Consultores Associados Ltda.
- e) Payment of Interest on Equity, on account of the minimum obligatory dividend, in the amount of R\$ 157 million, to stockholders on the company's Nominal Stockholder Registry on January 2, 2006, in two equal installments on June 30 and December 30, 2006, it being the duty of the Executive Board to obey these payment periods, and decide the locations and processes of payment.
- f) The Minutes of this meeting.

II- The Board authorized:

- a) Payment of an Advance against future capital increase, up to a limit of R\$3 million, to cover costs associated with the economic-financial valuation of *Light Serviços de Eletricidade S.A.*
- b) Signing of a Confidentiality Agreement with CTEEP (*Companhia de Transmissão de Energia Elétrica Paulista*) and with CESP (*Companhia*

Energética de São Paulo), with confidentiality obligation for two years from the date of signing, so that Cemig may have access to confidential information making possible the economic-financial valuation of CTEEP, for the purposes of a potential acquisition of a stake in that company.

c) Disposal, through an auction on a securities exchange, of the totality of the shares owned by Empresa da Infovias S.A. in Way TV Belo Horizonte S.A., establishing a minimum value for the disposal of said shares, such authorization being conditional upon the sale of 100% of the shares of that company by all its stockholders, through an auction on a securities exchange.

III- The Chairman; the Vice-Chairman; the Board members Andréa Paula Fernandes Pansa, Carlos Augusto Leite Brandão, Haroldo Guimarães Brasil, José Augusto Pimentel Pessôa, Andréa Leandro Silva and Alexandre Heringer Lisboa; the Directors Flávio Decat de Moura and Celso Ferreira; and the Superintendents Pedro Carlos Hosken Vieira and Manoel Bernardino Soares made comments on general subjects and matters of interest to the company. The following were present: Board members: Wilson Nélio Brumer, Djalma Bastos de Moraes, Aécio Ferreira da Cunha, Alexandre Heringer Lisboa, Andréa Paula Fernandes Pansa, Carlos Augusto Leite Brandão, Francelino Pereira dos Santos, Haroldo Guimarães Brasil, José Augusto Pimentel Pessôa, Nilo Barroso Neto, Andréa Leandro Silva and Luiz Henrique de Castro Carvalho; Members of the Audit Board: Directors: Itamaury Teles de Oliveira, Flávio Decat de Moura and Celso Ferreira; Superintendents: Pedro Carlos Hosken Vieira and Manoel Bernardino Soares; and Anamaria Pugedo Frade Barros, Secretary.

Listed Company CNPJ (corporate taxpayer number) 17.155.730/0001-64; NIRE

(business registration number) 31300040127

Extract of the minutes of the 381st meeting of the Board of Directors.

Date, time and place: 12 April 2006, 1pm, company headquarters at Av. Barbacena, 1.200, 1th floor, Belo Horizonte (Minas Gerais state).

Presiding officers: Chairman: Wilson Nélio Brumer / Secretary: Anamaria Pugedo Frade Barros.

Summary: I- The Board approved the minutes of this meeting.

II- The Board authorized: a) the resubmittal to Banco Itaú BBA S.A., together with Brascan Energética S.A. and the Brasil Energia Private Equity Fund, of a preliminary and non-binding proposal to acquire 100% of the capital stock of Usina Termelétrica Juiz de Fora S.A.. Submittal of the definitive proposal, by CEMIG, will depend on prior authorization from the Board, and its terms and conditions will prevail, in all circumstances, over the terms and conditions of the preliminary and non-binding proposal, including the price; and b) filing an action for rescission (i.e. to overrule a final judgment), with request for anticipated judicial protection, against Rima Industrial S.A., with the aim of achieving the total or partial rescission of the decision condemning CEMIG to reimburse that consumer in the amounts related to the tariff additions resulting from DNAEE Order 045/86, adjusted by TR (reference rate) inflation + 2% and delinquent interest, and the installation of a Non-Requirement of Bid Tender Administrative Process and the hiring of Professor João Dácio Rolim, through the law firm Escritório Gaia, Silva, Rolim & Associados Advocacia e Consultoria Jurídica, to support said lawsuit. III- The Vice-Chairman; the Board members Andréa Paula Fernandes Pansa, Antônio Luiz Barros de Salles, Carlos Augusto Leite Brandão, Haroldo Guimarães Brasil and José Augusto Pimentel Pessôa; the Director Flávio Decat de Moura; and the Superintendent Manoel Bernardino Soares made comments on general matters and businesses in the interest of the Company. Present: Board members Wilson Nélio Brumer, Djalma Bastos de Moraes, Andréa Paula Fernandes Pansa, Antônio Adriano Silva, Antônio Luiz Barros de Salles, Alexandre Heringer Lisboa, Carlos Augusto Leite Brandão, Francelino Pereira dos Santos, Haroldo Guimarães Brasil, José Augusto Pimentel Pessôa, Nilo Barroso Neto, Eduardo Lery Vieira, Guy Maria Villela Paschoal, Luiz Henrique de Castro Carvalho and Fernando Lage de Melo; Flávio Decat de Moura, Director; Manoel Bernardino Soares, Superintendent; and, Anamaria Pugedo Frade Barros, Secretary.

Anamaria Pugedo Frade Barros

COMPANHIA ENERGÉTICA DE MINAS GERAIS - CEMIG

BRAZILIAN LISTED COMPANY - CNPJ 17.155.730/0001-64

MATERIAL ANNOUNCEMENT

Cemig (Companhia Energética de Minas Gerais), a listed company holding public service concessions, with share securities traded on the stock exchanges of New York, Madrid and São Paulo, in accordance with its commitment to best corporate governance practices, and Instructions 358 and 359 (of 3 and 22 January, 2002) of the Brazilian Securities Commission (CVM), hereby informs the public that **the shares held by EDF International S.A. (EDFI) in Light S.A. (Light) and in Lidil Comercial Ltda. (Lidil) were today transferred to RME** Rio Minas Energia Participações S.A (RME), **in which Cemig holds 25%** (twenty five per cent) of the registered capital.

RME, a corporation with head office at Avenida Rio Branco 123, Suite 1901, in Rio de Janeiro, Brazil, registered as in the Brazilian Registry of Corporate Taxpayers under N° (CNPJ) 07.925.628/0001-47, is a holding company whose objects are to invest in companies operating in the electricity sector. Its present stockholders are: Companhia Energética de Minas Gerais **Cemig; Andrade**

Gutierrez Concessões S.A.; **Pactual** Energia Participações; and **Luce** Brasil Fundo de Investimento em Participações (Luce). Luce acquired the shares in RME until then held by JLA Participações S.A.(JLA), and has the same controlling stockholder as JLA.

The transaction involved the purchase of 100,719,912,442 common shares in **Light** and the totality of the shares of **Lidil**, a company which holds 5,584,685,447 common shares in Light, resulting in the transfer of a total of 106,304,597,889 commons hares in **Light**, representing, on today s date, 79.39% of the registered capital, and of the voting stock, of **Light**.

The total price was R\$ 697,953,064.46, corresponding to US\$319,809,871.91, for the purchase of 106,304,597,889 common shares in Light, representing an approximate price of R\$ 6.56 per share, corresponding to US\$3.01 per thousand shares. The price was paid in full by RME in cash, on today s date, and the shares were also transferred on today s date.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Also today an amendment was signed to the Stock Purchase Agreement providing that in the event that RME disposes of shares in Light acquired from EDFI within one year, it will, under such amendment, have to pay EDFI 50% of the amount of profit obtained on the sale of such shares.

Additionally, on a date to be announced, RME will carry out a public offering for acquisition of the shares of Light S.A that are in circulation in the market, in accordance with Law 6404/76, CVM Instruction 361/2002 and the Regulations of the *Novo Mercado*, thus guaranteeing to the other stockholders of Light the same treatment accorded to EDFI.

Light is a holding company which indirectly operates in **electricity generation, transmission and distribution in Rio de Janeiro State**. Thus, for RME and its stockholders, the transaction to purchase Light represents an opportunity to invest in a market with great growth potential, and which is at present the third largest electricity distribution market in Brazil.

Some statements in this presentation may be regarded under U.S. Securities law as *forward-looking statements*, i.e., statements that are subject to risks and uncertainties.

Forward-looking statements are forecasts which may differ from the final figures and which are not under our control.

For a discussion of the risks and uncertainties as they relate to us, please see our 20-F form for 2005, and in particular item 3 which contains Basic Information Risk Factors.

All figures are expressed in Brazilian GAAP.

Agenda

1. *Strategy and Results*

Fundamentals ensure sustainable growth

2. *Outlook of the Businesses*

Generation

Transmission

Distribution

Investment Program

3. *Financial Condition*

Debt Profile

Ratios

Cash Flow

4. *Review of Results*

1. *Strategy and Results*

Fundamentals ensure sustainable growth

Net Income and EBITDA Impacted by Non-Recurring Items

Net Income reached R\$ 665 million in the first half of 2006:

R\$ 4.10 per lot of 1,000 shares

Net income declined 36% compared to R\$ 1,042 million reported in the same period of 2005.

Cash flow generation, measured by EBITDA, decreased 29% to R\$ 1,198 million.

Non-Recurring Items:

Investment in the purchase of salaried bonus increase of employees (R\$177 million).

Recomposition of CVA for TUST in 2006 (R\$93 million).

Deferred Tariff Re adjustment in the first quarter of 2005 (R\$583 million).

Fundamentals Ensure Sustainable Growth

We are implementing our strategy to attain the maximum market share in the segments in which we operate:

Acquisition of controlling stake of Light S.A. through Rio Minas Energia Participações S.A. in which we have a 25% ownership.

Acquisition of stakeholding of Grupo Schahin on five transmission companies, in partnership with private investors.

Commenced operations at Irapé and Capim Branco I plants;

We are focusing on our main business-electricity:

Sale of participation of Infovias in Way for R\$91 million;

We sold our generation capacity for the highest value permitted in the second new energy auction:

355 MW average

Average price of R\$125.48 / MWh

Contract term of 30 years

Record sales of 24,331 GWh in the first half of 2006

Increase of 4.7% in sales to final customers;

Sales to other utilities, as the Initial Contracts expired.

17% growth of the network revenues compared to the first half of 2005

62% increase of network transmission revenue (TUST);

3% increase of TUSD network revenue.

90 thousand newly connected customers

Consolidated Results R\$ thousands

Wholesale	4,988,425	521,583	856.4%
TOTAL	24,331,539	18,873,557	28.9%

Results reflect the accelerated growth of the industrial class, the end of initial contracts and the migrations of free consumers in January 2005.

Growth has continued in the last 5 quarters.

Sales GWh CEMIG Consolidated

Outlook for Generation

We are expanding our generation capacity by 455 MW in 2006.

The addition of the last UHE de Capim Branco I machine and two UHE Irapé machines contributed to the increase of 257 MW of installed capacity.

Secured the concession of UHE de Baguari of 140 MW.

We are already the fifth largest generator in Brazil.

Financial Management Strictly Obeying Strategic Plan

Our strategic plan resulted in a revision of risk classification:

Elevation of Fitch rating, from A- to A+ (6/29/06);

Moody is preparing to review its classification;

We are revolving our debts, lengthening the maturity and reducing costs:

Emission of CEMIG D (R\$300 MM) and CEMIG GT (R\$ 900 MM) in Promissory Notes, at a cost of 103% of CDI (26/06/06).

On January 27, 2006, CRC credits placed in a FIDC in the value of R\$ 1.659 million:

R\$ 900 million in senior shares

R\$ 759 million in subordinate shares

Results for the First Half 2006

Companhia Energética de Minas Gerais - Cemig
CNPJ 06.981.176/0001-58

EARNINGS RELEASE

Q2 2006

Net Profit

Cemig Geração e Transmissão posted Q2 2006 net profit of R\$ 172mn, 11% higher year on year.

Net profit in H1 2006 was R\$ 293mn, slightly lower (0.68%) than the R\$ 295mn recorded in H1 2005.

The decline in profit basically reflects the increase in operational costs, including non requiring items, which rose 51%, mainly due to:

higher regulatory costs

higher personnel expenses

EBITDA

Cemig G/T posted EBITDA of R\$ 620mn in H1 2006, 1.81% lower year on year.

This decline was due to the increase in the company's operational costs, which mainly impacted EBITDA in Q2 2006, when EBITDA totaled R\$ 319mn, still 4.6% higher than the R\$ 305mn posted in Q2 2005.

As a result, Cemig G/T's EBITDA margin fell: from 67.7% in H1 2005 to 55.7% in H1 2006. If we exclude the effects of non-recurring items, EBITDA margin would be 59.4%

Despite the decline in EBITDA in Q2 2006, we highlight the significant increase (+19.6%) in net revenues in this period versus last year.

Net revenue grew to R\$ 592mn in Q2 2006, signaling the success of the management of the generation/transmission business, which has successfully been consolidating itself within the new Brazilian electricity sector model.

Gross Supply of Electricity

In H1 2006, revenue from the gross supply of electricity of Cemig G/T totaled R\$ 1.064bn, almost 7% higher year on year.

The main factor that influenced this growth was the revenue from the supply of energy to other concession holders, which posted strong growth in H1 2006 (+44.2% year on year).

This amount totaled R\$ 337mn in H1 2006, versus R\$ 234mn in H1 2005.

This growth is the result of the energy auction held in 2005, with the energy being sold to distribution companies when the so-called initial contracts expire.

Revenue from network usage

Revenue from network usage in H1 2006 was R\$ 286mn, 60.7% higher than the R\$ 178mn obtained in H1 2005. This revenue relates to the charges imposed by Cemig Geração e Transmissão on the agents connected to the basic network.

The increase in network usage revenue is mainly a result of the following factors:

increase in the annual revenue of the transmission business (+18%)

increase in the following charges:

CCC (+106.7%)

CDE (+150%)

PROINFA

Operational costs and expenses

Operational costs and expenses in H1 2006 totaled R\$ 584mn, 50.7% higher than the R\$ 388mn posted in H1 2005.

This result is mainly due to the variation in the following costs:

Personnel (+64.7%)

CCC fuel consumption account (+106.7%)

CDE energy development account (+150.0%)

Network usage charges (+103.8%); and

Provision for losses in free energy amounts (R\$ 26mn)

The main variations in the expenses are described below:

Personnel

Personnel expenses in H1 2006 totaled R\$ 140mn, 64.7% higher than the R\$ 85mn posted in H1 2005.

This result is mainly due to the annual wage increase of 7.6% in November 2005 and the provision for indemnity payments of future additional time-of-service payments of employees, made in June 2006, in the amount of R\$ 42mn.

Depreciation / Amortization

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Depreciation and amortization expenses did not vary significantly in the comparison between the two periods, totaling R\$ 90mn in H1 2006 (1.10% lower than the R\$ 91mn posted in H1 2005).

Post-Employment Obligations

Expenses incurred in post-employment obligations in H1 2006 totaled R\$ 17mn, 2.3% lower than the R\$ 17.4mn posted in H1 2005.

These expenses basically represent the interest incident on the actuarial obligations of Cemig Geração e Transmissão, net of the earnings expected from the assets of the plans, estimated by an external actuary. The decline in expenses is due to higher growth in assets than in obligations.

Fuel Consumption Account - CCC

CCC expenses in H1 2006 were R\$ 31mn, 106.7% higher than the R\$ 15mn posted in H1 2005.

These expenses relate to the operating costs of the thermo plants of the Brazilian interlinked and isolated energy systems, divided up between energy concession holders as stipulated by an ANEEL Resolution. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed on to the tariff.

Transmission Network Usage Charges

Expenses related to these charges totaled R\$ 108mn in H1 2006, 103.8% higher than the R\$ 53mn level posted in H1 2005. These expenses relate to the charges owed by electricity distribution and generation players for use of the installations, components of the basic network, as established through an ANEEL Resolution.

The increase in expenses is mainly due to the average 18% adjustment in the transmission tariff in June 2005 and the start-up of the *Aimorés* plant.

Energy Development Account - CDE

CDE expenses totaled R\$ 20mn in H1 2006, versus R\$ 8mn in H1 2005. These expenses relate to the passthrough to Eletrobrás by transmission concessionaires of the levies charged on consumers connected to the basic network, as established by the ONS (National Grid Operator).

The increase in this expense is due to the growth in the number of consumers and retroactive charging, as previously mentioned in the CCC expense item.

Provision for Losses - Free Energy Reimbursement Right

Based on its own studies, Cemig Geração e Transmissão recorded a provision for losses of R\$ 26mn in H1 2006.

Considering that the assumptions used in this study may be altered during the reimbursement period, Management will periodically revise these forecasts and, consequently, the provision level.

Energy Efficiency and Research and Development

Spending on energy efficiency and research and development in H1 2006 was R\$ 9mn, 200% higher than the R\$ 3mn level posted in H1 2005. This increase was mainly due to the new criteria adopted at the start of 2006 for recognizing these expenses.

Starting this year, the Company provisions 1% of its net revenue for investment in energy efficiency and research and development programs.

Alternative Energy Sources Incentive Program - PROINFA

PROINFA, implemented via Decree n° 5.025 of 30 March 2004, aims to increase the share of electricity produced by projects of Autonomous Independent Producers, involving wind-powered energy, small hydroelectric plants and biomass energy, in the National Interlinked System.

The amounts are paid by the transmission and distribution concessionaires to ELETROBRÁS, which administers the PROINFA account, in accordance with calculations made by ELETROBRÁS itself.

In H1 2006, Cemig Geração e Transmissão registered PROINFA expenses of R\$ 2.4mn. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed on to the tariff.

Financial Revenues (Expenses)

The company went from a net financial expense of R\$ 300mn in H1 2005 to a net financial expense of R\$ 211mn in H1 2006 (a decline of 29.7%). The items comprising the financial result and that posted the strongest variations are listed below:

Increase in financial investment revenues, due to a greater volume of funds invested (R\$ 34mn in H1 2006 versus R\$ 3.3mn in H1 2005).

19.2% increase in charges on loans and financings in Brazil as a result of the Company's debt rollover criteria, with several foreign currency debt contracts being replaced by local currency debt contracts, starting in H2 2005.

Net gains from FX variation in H1 2006 of R\$ 12mn, versus R\$ 49mn in H1 2005, basically resulting from loans and financings in foreign currency.

The reduction in gains is due to the debt rollover criteria, with several foreign currency debt contracts being replaced by local currency debt contracts, and to FX rate variation. In H1 2006, the Brazilian Real appreciated 7.5% against the US\$, versus 11.4% appreciation in H1 2005.

Companhia Energética de Minas Gerais - Cemig

CNPJ 06.981.180/0001-16

EARNINGS RELEASE

Q2 2006

Net Profit

Cemig D posted net profit of R\$ 199mn in Q2 2006, 32.5% lower year on year due to the impact of non-recurring items.

Net profit in H1 2006 was R\$ 344mn, versus R\$ 700mn in H1 2005.

The main factors that negatively affected the result were:

Recognition of revenue from the deferred tariff readjustment, in the amount of R \$591mn in H1 2005.

A 14.6% year-on-year increase in operational expenses in H1 2006, mainly due to:

the transfer of R\$ 93mn related to the CVA item (charges for usage of the transmission network), as described in the section Operational Costs and Expenses;

the increase in personnel expenses, due to the provision for indemnity payments to employees for future additional time-of-service payments, acquired by CEMIG in the approximate amount of R\$ 127mn;

In terms of positive effects on H1 2006 results, we highlight the reversal of RGR expenses, retroactive to 2004, in the amount of R\$ 28mn due to ANEEL approval of said expense in an amount less than that estimated by the Company.

EBITDA

EBITDA totaled R\$ 258mn in Q2 2006, bringing H1 2006 EBITDA to R\$ 548mn (45.9% lower year on year).

The chart below shows the behavior of EBITDA between H1 2005 and H1 2006:

This decline in EBITDA mainly stems from the extraordinary revenue of R\$ 591mn posted in H1 2005.

Excluding this non-recurring item, EBITDA actually rose by 29.6%. EBITDA margin fell from 31.8% in H1 2005 to 17.9% in H1 2006. Excluding the non-recurring items this margin reaches 22.1%.

Gross Supply of Electricity

Revenue from gross supply of electricity totaled R\$ 3.85bn in H1 2006, 12.3% higher than the R\$ 3.43bn posted in H1 2005.

The main impacts on 2006 revenues stemmed from the following factors:

Average tariff increase of 23.9%, effective as of 8 April 2005 (with full impact in annual 2006 result);

Average tariff increase of 6.7%, effective as of 8 April 2006; and

3.5% decline in the volume of energy billed to final consumers (excluding own consumption).

Amount of Energy Sold to Final Consumers (MWh)

Breakdown	2T06	MWh 2T05	Var. %
Residential	3.310.420	3.293.423	0,52
Industrial	2.391.539	2.908.360	(17,77)

Public Illumination	523.272	506.271	3,36
Public Service	499.600	483.399	3,35
Total	9.827.203	10.185.985	(3,52)

The charts below show the breakdown of energy consumption in H1 2006 and in 2005.

Breakdown of energy consumption by segment in

H1 2006

Breakdown of energy consumption by segment in

H1 2005

The decline is mainly due to the migration of industrial consumers, who have become free clients of Cemig Geração e Transmissão. This change is illustrated above, showing that the share of the industrial sector declined from 29% to 24% between 2005 and 2006.

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

Despite the decline in energy sales, we stress that some segments posted growth (especially the commercial and residential segments: +3.1% and +0.51%, respectively).

Considering the seasonable load shape from Distribution, we expect H2 2006 results to show growth in energy consumption in the main segments in relation to the H1 2006.

Deferred Tariff Increase

The result of CEMIG's periodic tariff revision, retroactive to April 2003, was announced in April 2005, granting CEMIG the right to raise tariffs by 44.4%.

The average increase applied to CEMIG's tariffs on 8 April 2003 was 31.5%. To compensate CEMIG for the lower revenues billed from April 2003 to April 2005, sector regulator ANEEL is incorporating an additional percentage in the tariff increases for the 2004-2007 period.

The difference between the tariff increase to which Cemig Distribuição was entitled and the tariff effectively charged from consumers between 2003 and 2005 was recognized as a regulatory asset in counterpart to the result of 2005, in the amount of R\$ 591mn.

Network usage revenues

The revenue obtained from charging for the use of the Electricity Distribution Systems (known as TUSD) was R\$ 587mn in H1 2006, 2.7% higher year on year.

The TUSD item is charged from unit generators on distribution voltage and free consumers located in Cemig D's concession area.

Operational costs and expenses

Operational costs and expenses (excluding financial income) in H1 2006 totaled R\$ 2.69bn, 14.6% higher than the R\$ 2.35bn posted in H1 2005. This is mainly due to the 17% increase in energy bought for resale (equivalent to R\$ 148mn), (from the end of the initial contracts) and the variation in personnel expenses due to the provision for indemnity payments to employees for future special additional payments (for time of service) made in June 2006 equivalent to R\$ 127mn.

The differences between the sum totals of the non-controllable costs (also called CVA), used as a reference in calculating tariff increased, and the amounts effectively disbursed are compensated in the subsequent tariff revisions, and registered in Current Assets and Long-Term Liabilities as prepaid expenses.

Total	2.535.584	133.464	29.924	2.698.972

(*) Relate to the non-controllable costs comprising the CVA that were transferred to the result due to their inclusions in the calculation of the tariff increase of Cemig Distribuição.

(**) Relate to the variations in the non-controllable costs comprising the CVA, and which were not included in the calculation of the tariff increase of Cemig D, thus being excluded from the result

The main variations in expenses are described below:

Personnel

Personnel expenses in H1 2006 were R\$ 435mn, 41.2% higher than the R\$ 308mn posted in H1 2005. This is mainly due to the provision for indemnity payments to employees for future additional time-of-service payments, as commented above, partially compensated by the increased transfer of personnel expenses to ongoing works (R\$ 51mn in June 2006 versus R\$ 16mn in 2005). This investment for future additional time-of-service payments will bring economy when the automatic adjustments of 1% for personnel salary will cease.

Electricity Purchased for Resale

Expenses related to electricity purchased for resale totaled R\$ 1.02bn in H1 2006, 17% higher than expense of R\$ 871mn recorded in H1 2005. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed through to the tariff.

Depreciation/Amortization

Depreciation and amortization expenses did not vary significantly between H1 2006 (R\$ 184mn) and R\$ 179mn (H1 2005), increasing only 2.8% - mainly due to the entry into operation of new distribution networks and lines.

Post-Employment Obligations

Expenses incurred in post-employment obligations in H1 2006 totaled R\$ 54mn, 3.6% lower than expenses of R\$ 56mn posted in H1 2005. These expenses basically represent the interest incident on the actuarial obligations of Cemig Distribuição, net of the earnings expected from the assets of the plans, estimated by an external actuary. The decline in expenses is due to higher growth in assets than in obligations.

Operational Provisions

Operational provisions in H1 2006 totaled R\$ 58mn, 23.4% higher than the R\$ 47mn posted in H1 2005. The main provision registered in 2006 relates to non-performing loans, in the amount of R\$ 52mn.

Fuel Consumption Account CCC (a levy on all electricity distributors, to subsidize thermal plants)

CCC expenses in H1 2006 totaled R\$ 191mn, 5.5% higher than the R\$ 181mn level posted in H1 2005. These expenses relate to the operating costs of the thermo plants of the Brazilian interlinked and isolated energy systems, divided up between energy concession holders as stipulated by an ANEEL Resolution. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed on to the tariff.

Transmission Network Usage Charges

Expenses related to these charges totaled R\$ 310mn in H1 2006, 2.1% higher than the R\$ 303mn level posted in H1 2005. These expenses relate to the charges owed by electricity distribution and generation players for use of the installations, components of the basic network, as established through an ANEEL Resolution. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed on to the tariff.

Due to a new ANEEL ruling on the criteria for constituting the CVA related to basic transmission network usage charges, in H1 2006 Cemig Distribuição reversed part of the CVA item constituted as of April 2005, in the amount of R\$ 93mn, ensuring an increase in these expenses in H1 2006.

Energy Development Account - CDE

CDE expenses totaled R\$ 131mn in H1 2006, 5% lower than the R\$ 138mn level obtained in H1 2005. Payments are defined by an ANEEL Resolution. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed on to the tariff.

Energy Efficiency and Research and Development

Spending on energy efficiency and research and development in H1 2006 totaled R\$ 36mn, 414% higher than the R\$ 7mn level posted in H1 2005. This increase was mainly due to the new criteria adopted at the start of 2006 for recognizing these expenses. Starting this year, the Company provisions 1% of its net revenue for investment in energy efficiency and research and development programs.

Alternative Energy Sources Incentive Program PROINFA

PROINFA, implemented via Decree n° 5.025 of 30 March 2004, aims to increase the share of electricity produced by projects of Autonomous Independent Producers, involving wind-powered energy, small hydroelectric plants and biomass energy, in the National Interlinked System.

The amounts are paid by the transmission and distribution concessionaires to ELETROBRÁS, which administers the PROINFA account, in accordance with calculations made by ELETROBRÁS itself.

In H1 2006, Cemig Distribuição registered PROINFA expenses of R\$ 13mn. This is a non-controllable cost, and the expense recognized in the result corresponds to the amount effectively passed on to the tariff and the energy amount is related to Cemig Distribuição.

Financial Revenues (Expenses)

In H1 2006, Cemig Distribuidora posted net financial revenue of R\$ 76mn, versus net financial revenue of R\$ 80mn in H1 2005. The main factors that impacted the financial result are listed below:

In H1 2006, revenue from monetary variation and interest incident on the Deferred Tariff Increase totaled R\$ 102mn, 34.6% lower than the R\$ 156mn level obtained in H1 2005. In 2005, Cemig Distribuição posted higher revenue due to the announcement of the definitive result of CEMIG's tariff review, which led to the registering of a regulatory asset called "Deferred Tariff Increase" and to the updating of this asset retroactive to 2003.

Growth of R\$ 53mn in revenue from interest on bills paid in arrears: R\$ 82mn in H1 2006 versus R\$ 29mn in H1 2005. This variation stems from the revenue registered in Q2 2006, in the amount of R\$ 48mn, related to the write-off of accounts received from large industrial consumers related to previous years, whose principal amount was considerably less than the accrued amount related to financial charges.

Companhia Energética de Minas Gerais - Cemig

Companhia Aberta - CNPJ 17.155.730/0001-64

CEMIG ANNOUNCED NET INCOME

OF R\$ 325 MILLION IN 2Q 2006

Belo Horizonte, Brazil, August 9, 2006 Companhia Energética de Minas Gerais CEMIG (BOV: CMIG4, CMIG3; NYSE: CIG e LATIBEX: XCMIG), a leading concessionaire in Brazil, and its subsidiaries (CEMIG Companies), today announced net income of R\$ 665 million in the period of January to June 2006, or R\$ 4.10 per lot of 1,000 shares. In the second quarter 2006, net income was R\$ 325 million, or R\$ 2.01 per lot of 1,000 shares.

The Chairman of the Board of Directors, Dr. Wilson Nélio Brumer, commented, "Second quarter results clearly demonstrate that our strategies, substantiated in our Strategic Plan, are correct and will enable us to attain our sustainable growth objectives, despite the impact caused by certain non-recurring items. The 67% increase our net income in the last three years proves that aligning with the interests of our shareholders has had a beneficial effect on everyone: shareholders, employees, and the communities we serve. During the first half of 2006, our shareholders have received, in accordance with our previously announced dividends, a total of R\$ 8.92 per lot of 1,000 shares. In the first half of the year, we grew with added value. Our energy sales increased 29%, driven by the evolution of the Minas Gerais economy. In May 2006, the state industry grew 8.5% when compared with the month of May 2005 whereas the national industry grew 4.8% in the same period. The number of Cemig consumers increased 2.8% in the first half of the year. Cash flow measured by EBITDA (Earnings before Interest, Taxes, Depreciation, and Amortization) reached R\$ 1,198 million, and net income was R\$ 665 million. We look for the best opportunities to accelerate our growth and we have been successful with this initiative. Our two most recent acquisitions clearly show our continued focus on the electricity sector and on projects that create value, above and beyond our ability to evaluate opportunities that have attractive returns vis à vis their risk. Cash generation, due to operational improvements that we have implemented, especially in the case of Light SA, will continue to leverage our continued growth in line with our long-term strategy. We will make further advancements in this quarter, without doubt.

President and CEO, Dr. Djalma Bastos de Morais stated, "In the first half of 2006, we achieved net income of R\$ 665 million, or R\$ 4.10 per thousand shares, a 36% reduction when compared to the same period of last year. It is important to note that a large portion of this reduction is from non-recurring items that will not affect our future results. In fact, a good example was the opportunity to obtain for our employees a salaried bonus that impacted our payroll by increasing it independently of performance. Although this is reflected in our results in the short-term, we treat this as a R\$ 177 million investment in the Company, and for our shareholders, it provides the long-term benefit of significantly reducing personnel expenses. We estimate a return of more than 12%. We must also point out our ability to take on new projects. We are constructing two additional electricity

generation plants that, when completed, will add more than 455 MW to our installed capacity, representing a 7% increase. During this half, we started operating in two more units in Usina de Capim Branco and the units in Usina de Irapé. Usina de Irapé (Hidrelétrica Presidente Juscelino Kubitschek) started commercial operation on July 20, 2006. This is the most important venture realized in Jequitinhonha Valley, with installed capacity of 360 MW and investments of more than R\$ 1.3 billion. This commitment to growth by the Company considers the desires of our shareholders who are looking for value in their investments and also the communities we serve through the installment of an essential service for social and economic development.

Chief Financial Officer and Director of Investor Relations, Dr. Flávio Decat de Moura, commented, "Once again, we were successful in our strategy to sell our electricity generated capacity in the auctions organized by ANEEL, our regulatory agency. As everyone knows, on June 29, 2006 we were able to sell practically all of the generation capacity that we had. We negotiated an average of 355 MW that will generate annual revenue of R\$ 390 million. Commercialized energy from hydroelectrics Aimorés (84 MW average), Irapé (206 MW average) and Queimado (47 MW average), at a price of R\$ 125 per MWh. We also sold, for R\$ 134.42 per MWh, energy from the Porto Estrela plant (18 MW average) with the recuperation of Uso de Bem Público - UBP. Cemig D already purchased 98.90 MW average, being 60.50 MW average of hydraulic energy and 38.50 MW average for thermo energy. The demand by the Distributor for this auction was fully attended. In relation to the financial highlights, I can say that we are continuing to rollover our debt, with R\$ 1.2 billion issued in promissory notes. Our strategy is to extend the maturity of our bonds and reduce the cost by optimizing the utilization of generated cash in the period generating overages to finance the acquisition of assets to attain the objectives established in our Strategic Plan.

2Q 2006 Highlights

Record sales volume in one quarter in the history of CEMIG

22.7% growth in the quantity of energy sold to final customers

90 thousand new consumers added in first half

Successful New Energy Auction

Significant Increase in Income from Wholesale

Net Income

CEMIG's net income for the second quarter 2006 was R\$ 325 million, in comparison with R\$ 487 million reported in the second quarter of 2005, representing a 33% decline.

For the first six months of 2006, net income was R\$ 665 million, a decrease of 36.2% in relation to the first half of 2005.

This reduction in net income was primarily due to the following factors:

Recognition of revenue due to the readjustment of the deferred tariff in the amount of R\$591 million during the first half of 2005.

An increase of 23.6% in operational expenses in the first half of 2006 compared to the same period of the prior year. This increase is mainly due to:

as an extraordinary event that affected the results of the first quarter 2006, excluded from the sum results was R\$ 93 million for the CVA charge of use of the transmission network, as described in the Operating Costs and Expenses section;

the increase in uncontrollable costs, principally in energy purchased for resale that increased 50.6% in the comparable periods;

the increased in personnel expenses, mainly due to the provision for the indemnity of employees for future salary increases, attained by CEMIG for the amount of approximately R\$177 million.

The table below illustrates the individual contribution of each company to consolidated income for the 2Q 2006.

Company	Net Income*	EBITDA*
Cemig Geração/Transmissão	171.739	319.478
Cemig Distribuição	146.738	177.706
Cemig Holding **	(24.967)	(55.545)
Gasmig	7.981	12.130
Infovias	76	12.078
Sá Carvalho	5.149	7.572
Efficientia	91	89
Ipatinga	1.358	2.852
Horizontes	2.833	3.472
Pai Joaquim	105	82
Transleste	876	1.493
Cogeração	1.239	1.227
Rosal Energia	5.142	5.375
Capim Branco	5.963	6.705
Cemig PCH	2.650	2.749
UTE Barreiro	(1.624)	(1.319)
Cemig Consolidado	325.350	496.144

* In R\$ thousands

When analyzing the table above, it is possible to observe that together, Cemig G/T as much as Cemig D are responsible for approximately 98% of total income. This participation has been constant in the most recent quarters, noting however an important increase in the contribution from Gasmig, who in the first half generated a net income of R\$ 17 million.

At the end of July, Cemig sold its participation in Way TV, following the Company's strategy to concentrate and expand in synergistic operations, so that any obtained resources could then be used for business expansion.

EBITDA

Cash generation for Cemig reached R\$ 1.197 billion in the first half of 2006, representing a 28.9% decline versus the same period last year. The reduction in EBITDA is primarily due to the extraordinary income registered in the first half of 2005 for the amount of R\$591 million.

Excluding this extraordinary income, EBITDA would have been in line with the comparable period of 2005. EBITDA margin was 27.4% in June 2006 compared with 41.2% in June 2005.

In the second quarter 2006, EBITDA was R\$ 495.7 million, representing a 30% decline when compared to the first quarter 2006. em relação ao 1ºTri 2006. It is important to note that the main negative impacts occur in the second quarter 2006.

Market

The quantity of energy sold in the second quarter 2006 was 12.5 million MWh, a record sales volume for one quarter in the history of Cemig. This volume represents an increase of 22.8% in relation to the same period of 2005.

Consumption by Class	Energy Sold (Consolidated) MWh - 2º Quarter		
	2006	2005	Change %
Residential	1.653.546	1.676.101	-1,35
Industrial	5.875.324	5.977.769	-1,71
Commercial	958.053	957.081	0,10
Rural	455.745	463.569	-1,69
Others	676.672	655.906	3,17
Wholesale	2.838.430	418.319	578,53
TOTAL	12.457.770	10.148.745	23

In the first six months of 2006, the quantity of energy sold reached 24.4 million MWh, representing an almost 30% increase in only one year.

Factors that contributed to this increase included:

Economic Improvement: the economic improvement of Minas Gerais that has occurred in the most recent quarters demonstrates a trend of continued growth, which is one of the most prominent in the country. It is interesting to note that through exports, the secondary sector continues to expand, especially in siderurgy, iron and metal industries. These sectors, which consume a significant amount of electricity, are contributing to the further increase in energy sold by Cemig.

Free Consumers: The amount of energy sold to free consumers was one of the principal sources that contributed to the energy sales volume growth in the first six months of 2006.

Wholesale: Wholesale energy reached 2.8 million MWh in the second quarter 2006. This increase of almost 580% in comparison with the same quarter of last year, was from energy sold to other utilities and also to commercial users.

An adjustment of R\$ 87 million in the supply not billed that was registered in the 1Q 2006 as a part of the reevaluation of the calculated revenue registered in the aforementioned quarter. It was necessary to have a reclassification of the automatically improved values through the information system of the Company, making the adjustments in the second quarter 2006. Additionally, the calculation procedures were reevaluated with a revision by the internal auditor of the respective internal controls.

Wholesale Revenue

The quantity of energy sold to other utilities reached 4.9 milhões MWh in the first half 2006.

This increase was mainly due to the energy sale from Cemig Generation and Transmission to other distributors in 2006.

In the past, a large portion of these sales were made between Cemig G/T e Cemig D, and by consolidating the Company's results, these activities were eliminated. It is interesting to note the optimal prices achieved by Cemig G/T for these contracts, accomplished in large part because of the Company's strategy to take advantage of market opportunities.

Revenues from Network Use

In the first half of 2006, revenues from network use increased 16.8% when compared with the same period of 2005. Of this R\$ 875 million, Cemig Distribution contributed approximately 67% with the remaining contribution from Cemig G/T.

Also adding to this amount are the revenues from the use of the installations comprising the basic transmission network of Cemig Generation and Transmission by the electricity generators and distributors that are part of the Brazilian interconnected system, as per values defined through ANEEL Resolution (R\$ 223 million in 2006 compared with R\$ 157 million in 2005).

Operating Costs and Expenses

Operating costs and expenses (excluding financial results) were R\$3.47 billion in the first six months of 2006, compared to R\$2.69 billion reported in the same period of 2005. This represents an increase of 28.9%.

This results is mainly due to the following factors:

Uncontrollable costs

Personnel expenses

Operational provisions

Costs and expenses are described in the below table:

Consolidated Operating Costs and Expenses as of June 30, 2006

	Operating Expenses without Effects of CVA	CVA Amounts transferred to the period s results (*)	CVA amounts not included in the period s results (**)	Effective expense recognized in the period s results

(*) Refers to the fixed costs that comprise the CVA that were transferred to the results as a function of their inclusion in the calculation of CEMIG s tariff adjustment

(**) Refers to the variation of fixed costs that comprise CVA that were not included in the calculations of CEMIG s tariff adjustment, and thus were excluded from the results

The main variations in expenses are described below:

Personnel

Personnel expenses in the first half of 2006 were R\$ 614 million compared to R\$ 440 million in the first half of 2005, an increase of 39.58%.

This was substantially due to the provision for indemnity of future salaried bonus for employees, which represents R\$ 177 million, with R\$ 41 million being expensed by Cemig G/T and R\$ 127 million by distribution, and the remaining amount allocated to other Cemig companies.

Electricity Purchased for Resale

The expense for electricity purchased for resale was R\$ 987.8 million in the first half of this year. This compares with R\$655.5 million reported in the period from January to June 2005, an increase of 50.6%.

This is an uncontrollable cost, and the expense recognized in the results corresponds with the amount effectively passed through the tariff.

Additionally, it needs to be pointed out that in 2005, a substantial portion of the electricity purchased for resale through Distribution was derived from Cemig Generation and Transmission, and as a result, in the presentation of consolidated results, were eliminated as operations between the companies.

Post-Employment Obligations

The expense for post-employment obligations was R\$ 75 million in the 1H 2006 versus R\$ 76.7 million in the first half of 2005, a 2.2% decline.

These expenses basically represent the interest on actuarial obligations, net of the income expected from plan assets, estimated by an outside actuary. The reduction of expenses shows a greater growth in assets in relation to obligations.

Operating Provisions

Operating provisions for the period from January to June 2006 were R\$ 80 million, compared to R\$15.2 million in the same period of 2005, an increase of 426.3%.

The principle provisions registered in 2006 originate from:

credits from doubtful accounts (R\$ 43.5 million)

worker contingencies (R\$16.7 million)

judicial contingencies civil actions (R\$11.4 million)

Fuel Consumption Account CCC

The CCC expense in the period from January to June 2006 was R\$ 222 million compared to R\$195,6 million in the first half of 2005, representing an increase of 13.5%.

The CCC refers to the operating costs of the thermal plants on the Brazilian interconnected and isolated system, divided proportionately between the electricity concessionaries through the ANEEL Resolution. This is an uncontrollable cost, as the expense recognized in the result corresponds to the value effectively passed through to the tariff.

Charges for Transmission Network Use

The expense for transmission network use in the first six months of 2006 was R\$ 421.7 million compared to R\$ 357.2 million in the period from January June 2005, a variation of 18%.

This expense is related to the charges paid by electricity distribution and generation agents for use of installations and components of the basic network, as defined by the ANEEL Resolution. This is an uncontrollable cost, as the expense recognized in the result corresponds to the value effectively passed through the tariff.

In accordance with a new interpretation of ANEEL as it relates to the CVA criteria with reference to tariff to use the integrated transmission installations and the basic network, CEMIG returned, in the first half of 2006, a portion of the CVA constituted in the amount of R\$ 93,2 million, which served to increase the value of the expense of the current semester.

Energy Development Account CDE

The CDE expense from the period of January to June 2006 was R\$ 151.135 million compared to R\$ 146.2 million in the first semester of 2005, representing an increase of 3.3%.

The payments are defined through the ANEEL Resolution. This is an uncontrollable cost, as the expense recognized in the results corresponds to the value effectively passed through the tariff.

Incentive Program for Sources of Alternative Energy PROINFA

PROINFA, instituted by Decree 5.025 from March 30, 2004, maintains the objectives to increase the use of energy produced by Autonomous and Independent Businesses, such as wind, small hydroelectric and biomass, within the National Interlinked System.

The values are captured by the concessionaries of transmission and distribution to ELETROBRAS, administrator of the PROINFA Account, in accordance with values determined by the former.

CEMIG registered within the period of January – June 2006, an expense with PROINFA in the amount of R\$ 15 million. This is a uncontrollable cost, as the expense recognized in the result corresponds to the value effectively passed through to the tariff.

Energy Efficiency Research & Development

The expenses with energy efficiency within the period of January to June 2006 were R\$ 45.2 million compared to R\$ 10.2 million in the same period in 2005, representing an increase of 343.1%.

This expense originated principally from new criteria adopted at the beginning of 2006, for which the Company provisioned 1% of their net revenue for the creation of programs in energy efficiency research and development.

Other Operating Expenses

Other operating expenses in the first six months of 2006 were R\$ 88.4 million compared to R\$ 74.2 million in the same period in 2006, resulting in an increase of 19.1%.

Financial Revenues (Expenses)

The financial result from January to June 2006 was a net financial expense of R\$ 123.4 million compared to a net financial expense of R\$ 166.6 million in the first half of 2005.

The main factors impacting the financial result were the following:

Income from the monetary update and interest on accounts receivable from the State of Minas Gerais, was in the amount of R\$ 41 million in the first half of 2006, compared to R\$ 215.8 million from January to June of 2005, resulting in a reduction of 80.8%.

With the transfer of the CRC to the Direct Creditors Fund, this income will not be booked in the results for 2006, also considering that the income to be registered with FIDC will be less than the amount stipulated in the update.

Growth of R\$ 52.6 million in the income from energy (R\$ 83.7 million in the period of January to June 2006 compared to R\$ 31 million in the same period in 2005.)

Edgar Filing: ENERGY CO OF MINAS GERAIS - Form 6-K

This variation originates from the registered income in the second quarter of 2006, in the amount of R\$ 48.2 million, referring to the decrease of accounts receivable from large industrial consumers related to previous years, whose value of principal was considerably inferior in the higher amount referring to financial charges.

Income from monetary variation and interest on the Deferred Tariff Adjustment (RTD) in the amount of R\$ 102.9 million compared to R\$ 155.6 million from January to June 2005.

In 2005, CEMIG reported higher income as a result of the tariff review being finalized, which led to the creation of the asset line item Deferred Tariff Adjustment and the realization of the asset back to 2003 resulted in the considerable amount of financial income booked in 2005.

Increase of 26.2% in charges related to loans and financing in the country due to the increase in the amount due as a function of the debt rollover criteria, with the substitution of various debt contracts in foreign currency to Brazilian currency, as of the second half of 2005.

Second New Energy Auction

In the second quarter 2006, the second auction for New Energy took place. The prices obtained by Cemig G/T were the maximum permitted, with the Generator attaining an average price of R\$ 125.48/MWh, with UHE Porto Estrela attaining a selling price of R\$ 134.42/MWh. Total energy sold by Cemig G/T reached 355 MW, or 21.11% of the energy sold in the auction.

Cemig D also was able to ensure a demand for its energy, attaining 79.68 MW, with an average price of R\$ 128.13/MWh.

Investment Program

Investments made during the 2Q 2006 reached R\$ 411 million, a 66% increase over the first three months of this year.

Investments made during the first six months of 2006 were R\$ 658 million, part of the total of R\$ 1.927 billion of investments slated for the year.

The majority of the investments made during the first half of 2006, or 83%, were in Cemig D, with the majority of this investment focused on the universalization of electricity consumption through the Luz Para Todos, or Light for Everyone program.

Additional details regarding investments can be seen in the following table.

Multiyear Investment Program
