

REPUBLIC BANCORP INC /KY/
Form 10-Q
November 09, 2006

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

Quarterly report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended September 30, 2006

or

Transition report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-24649

REPUBLIC BANCORP, INC.

(Exact name of registrant as specified in its charter)

Kentucky

(State of other jurisdiction of incorporation or organization)

61-0862051

(I.R.S. Employer Identification No.)

601 West Market Street, Louisville, Kentucky

(Address of principal executive offices)

40202

(Zip Code)

(502) 584-3600

(Registrant's telephone number, including area code)

Not Applicable

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

17,309,184 shares of Class A Common Stock, no par value and 2,238,543 shares of Class B Common Stock, no par value were outstanding at October 31, 2006, the latest practicable date.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS SEPTEMBER 30, 2006 AND 2005 (UNAUDITED) AND DECEMBER 31, 2005

1. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation The consolidated financial statements include the accounts of Republic Bancorp, Inc. (the Parent Company) and its wholly-owned subsidiaries: Republic Bank & Trust Company and Republic Bank & Trust Company of Indiana (together referred to as the Bank), Republic Funding Company, Republic Invest Co. and Republic Bancorp Capital Trust. Republic Invest Co. includes its subsidiary, Republic Capital LLC. Republic Bancorp Capital Trust is a Delaware statutory business trust that is a wholly-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. The consolidated financial statements also include the wholly-owned subsidiaries of Republic Bank & Trust Company: TRS RAL Funding LLC, Republic Financial Services, LLC and Republic Insurance Agency, LLC. All companies are collectively referred to as Republic or the Company. All significant intercompany balances and transactions have been eliminated in consolidation. See Footnote 13 Subsequent Event of Item 1 Financial Statements for additional information regarding the acquisition of GulfStream Community Bank.

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, the financial statements do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation have been included. Operating results for quarter and nine months ended September 30, 2006 are not necessarily indicative of the results that may be expected for the year ending December 31, 2006. For further information, refer to the consolidated financial statements and footnotes thereto included in Republic's Form 10-K for the year ended December 31, 2005.

New Accounting Standards

In February 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 155, Accounting for Certain Hybrid Financial Instruments, which amends SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities and SFAS No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities. This statement amends SFAS No. 133 to permit the fair value remeasurement for any hybrid instrument that contains an embedded derivative that otherwise would require bifurcation. This statement also eliminates the interim guidance in SFAS No. 133. Finally, this statement amends SFAS No. 140 to eliminate the restriction on the passive derivative instruments that a qualifying special purpose entity (SPE) may hold. This statement is effective for all financial instruments acquired or issued in fiscal years beginning after September 15, 2006. The Company is in process of evaluating the impact, if any, the adoption of SFAS No. 155 will have on our financial statements.

In March 2006, the FASB issued SFAS No. 156 Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities a replacement of FASB Statement No. 125 that changes the accounting for all servicing rights which are recorded as the result of purchasing a servicing right or selling a loan with servicing retained. SFAS No. 156 amends the current accounting guidance for servicing rights in that it allows companies to carry their servicing rights at fair value, where presently servicing rights are assessed for impairment based on their fair value at each reporting date, using lower of cost or market value. This pronouncement is effective January 1, 2007, although adoption is permitted earlier. The Company currently plans to adopt this standard on January 1, 2007.

In June 2006, the FASB issued FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109, which prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosures and transition. FIN 48 is effective beginning in 2007. The Company is in the process of evaluating the impact, if any, the adoption of FIN 48 will have on the Company's financial statements.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. This Statement defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. More specifically,

this statement clarifies the definition of fair value, establishes a fair valuation hierarchy based upon observable (i.e. quoted prices, interest rates, yield curves) and unobservable market inputs, and expands disclosure requirements to include the inputs used to develop estimates of fair value and the effects of the estimates on income for the period. This statement does not require any new fair value measurements. The new standard is effective for fiscal years beginning after November 15, 2007. The Company is in process of evaluating the impact, if any, the adoption of SFAS No. 157 will have on our financial statements.

In September 2006, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108 Topic 1N, Financials Statements - Considering the Effects of Prior Year Misstatements When Quantifying Misstatements in Current Year Financial Statements (SAB 108). SAB 108 requires that a dual approach be used to compute the amount of a financial statement misstatement. More specifically, the amount should be computed using both the rollover (current year income statement) and iron curtain (year end balance sheet perspective) methods. A registrant's financial statements require adjustment when either approach results in quantifying a misstatement that is material, after considering all relevant quantitative and qualitative factors. Registrants will not be required to restate prior period financial statements when initially applying SAB 108 if management properly applied its previous approach (i.e. rollover of iron curtain) given that all relevant qualitative factors were considered. SAB 108 states that, upon initial application, registrants may elect to (a) restate prior periods, or (b) record the cumulative effect of the initial impact of SAB 108 in the carrying amounts of assets and liabilities, with the offsetting adjustment made to retained earnings. To the extent that registrants elect to record the cumulative effect of initially applying SAB 108, they will disclose the nature and amount of each individual error being corrected in the cumulative adjustment. The disclosure will also include when and how each error being corrected arose and the fact that the errors had previously been considered immaterial. SAB 108 is effective for the Company for the fiscal year ending December 31, 2006. The Company is in process of evaluating the impact, if any, the adoption of SAB 108 will have on our financial statements.

In September 2006, the FASB ratified the Emerging Task Force's (EITF) consensus on Issue 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Agreements, which requires entities to recognize a liability and related compensation costs for endorsement split-dollar life insurance policies that provide a benefit to an employee that extends to postretirement periods. The liability should be recognized in accordance with SFAS No. 106: Employers' Accounting for Postretirement Benefits Other Than Pensions, based on the substantive agreement with the employee. This issue is effective for the Company beginning January 1, 2007. The Company is in process of evaluating the impact, if any, the adoption of Issue 06-4 will have on our financial statements.

In September 2006, the FASB ratified the EITF consensus on Issue 06-5, Accounting for Purchases of Life Insurance - Determining the Amount that Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4: Accounting for Purchases of Life Insurance. FASB Technical Bulletin No. 85-4 requires that assets such as bank owned life insurance be carried at their cash surrender value (CSV) or the amount that could be realized, with changes in CSV reported in earnings. Issue 06-5 requires that a policyholder consider any additional amounts (i.e. claims stabilization reserves and deferred acquisition costs) included in the contractual terms of the policy in determining the amount that could be realized under the insurance contract. Certain life insurance contracts provide the policyholder with an amount that, upon surrender, is greater if all individual policies are surrendered at the same time rather than if the policies were surrendered over a period of time. The issue requires that policyholders determine the amount that could be realized under the life insurance contract assuming the surrender of an individual-life by individual-life policy. This issue is effective for the Company beginning January 1, 2007. The Company is in process of evaluating the impact, if any, the adoption of Issue 06-4 will have on our financial statements.

See Footnote 2 regarding the new accounting pronouncement related to stock options that has impacted Republic's consolidated financial statements during 2006.

Securitization The Company utilizes a securitization structure to fund a portion of the RALs originated during the Tax Refund Solutions tax season. The securitization consisted of a total of \$206 million in loans over a four week period in January and February. The Company's continuing involvement in loans sold into the securitization is limited to only servicing of the loans. Compensation for servicing of the loans securitized is not contingent upon performance of the loans securitized.

Generally, from mid January to the end of February of each year, Refund Anticipation Loans which meet certain underwriting criteria related to refund amount and Earned Income Tax credit amount are classified as loans held for sale upon origination and sold into the securitization. All other RALs originated are retained by the Company. There are no loans held for sale as of any quarter end. The Company retained a related residual value in the securitization which is classified as a trading asset. On a quarterly basis, the Company adjusts the carrying amount based on its fair value.

The Company concluded that the transaction was a sale as defined in SFAS 140. This conclusion was based on, among other things, legal isolation of assets, the ability of the purchaser to pledge or sell the assets, and the absence of a right or obligation of the Company to repurchase the financial assets.

Reclassifications Certain amounts presented in prior periods have been reclassified to conform to the current period presentation.

All prior period share and per share data have been restated to reflect the five percent (5%) stock dividend that was declared in the first quarter of 2006.

In February 2006, the Company substantially exited the payday loan segment of business. The payday loan segment of business has been treated as a discontinued operation for financial reporting purposes in accordance with SFAS 144 Accounting for the Impairment or Disposal of Long-Lived Assets and all applicable current period and prior period data has been restated to reflect operations absent of the payday loan segment of business.

In prior period financial statement filings, the Company classified daily fees associated with overdrawn deposit accounts within service charges on deposits along with per item overdraft fees. In 2006, the Company reclassified daily overdraft fees into loan fees, which is included as a component of interest income on loans. All prior period amounts presented have been reclassified to conform to current period presentation. For the quarter and nine months ended September 30, 2006, the amount of fees reclassified was \$527,000 and \$1.5 million. For the quarter and nine months ended September 30, 2005, the amount of fees reclassified was \$460,000 and \$1.2 million.

2. STOCK PLANS AND STOCK BASED COMPENSATION

At September 30, 2006, the Company had two stock option plans and a director deferred compensation plan. The stock option plans consist of the 1995 Stock Option Plan (1995 Plan) and the 2005 Stock Incentive Plan (2005 Plan). With regard to the 1995 Plan, no additional grants were made in 2006 and none will be made in the future. The 2005 Plan permits the grant of stock options and stock awards for up to 3,150,000 shares, of which 3,086,000 shares remain available for issue with 64,000 allocated at September 30, 2006. With regard to the 2005 Plan, 10,000 option grants were made in 2006. All shares issued under the above mentioned plans came from authorized and unissued shares.

Effective January 1, 2006, the Company adopted SFAS 123R, Share Based Payment. The Company elected to utilize the modified prospective transition method; therefore, prior period results were not restated. Prior to the adoption of SFAS 123R, stock based compensation expense related to stock options was not recognized in the results of operations if the exercise price was at least equal to the market value of the common stock on the grant date, in accordance with Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees. All stock options have an exercise price that is at least equal to the fair market value of the Company's stock on the date the options were granted. As a result, the recognition of stock based compensation expense was limited to the expense attributed to the deferred director compensation plan.

SFAS 123R requires all share based payments to employees, including grants of employee stock options, to be recognized as compensation expense over the service period (generally the vesting period) in the consolidated financial statements based on the fair value of the options. For options with graded vesting, the Company values the stock option grants and recognizes compensation expense as if each vesting portion of the award was a separate award. Under the modified prospective method, unvested awards and awards that were granted, modified, or settled on or after January 1, 2006 are measured and accounted for in accordance with SFAS 123R. The impact of forfeitures that may occur prior to vesting is also estimated and considered in the amount recognized.

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

Under the stock option plans, certain key employees are granted options to purchase shares of Republic's Common Stock at fair value at the date of the grant. Options granted generally become fully exercisable at the end of five to six years of continued employment and must be exercised within one year from the date they become exercisable. There were no Class B stock options outstanding at September 30, 2006 and December 31, 2005.

The following table summarizes stock option activity:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006		2005		2006		2005	
	Options Class A Shares	Weighted Average Price Per Share	Options Class A Shares	Weighted Average Price Per Share	Options Class A Shares	Weighted Average Price Per Share	Options Class A Shares	Weighted Average Price Per Share
Outstanding at beginning of period	1,444,272	\$ 12.06	1,756,201	\$ 11.50	1,686,442	\$ 11.60	1,760,805	\$ 11.29
Granted	10,000	21.88			10,000	21.88	43,050	21.55
Exercised	(16,202)	7.63	(24,590)	10.82	(130,917)	6.50	(41,948)	10.99
Forfeited	(42,573)	13.46	(7,716)	16.53	(170,028)	11.70	(38,012)	14.38
Outstanding at end of period	1,395,497	\$ 12.14	1,723,895	\$ 11.49	1,395,497	\$ 12.14	1,723,895	\$ 11.49

The following table details stock options outstanding:

(dollars in thousands except per share data)	September 30, 2006
Stock options vested and currently exercisable:	
Number	46,581
Weighted average exercise price	\$ 7.11
Aggregate intrinsic value	\$ 654
Weighted average remaining life (in years)	0.40
Total Options Outstanding:	
Aggregate intrinsic value	\$ 12,622
Weighted average remaining life (in years)	2.85

The intrinsic value for stock options is calculated based on the exercise price of the underlying awards and the market price of the Company's Common Stock as of the reporting date. Stock option compensation expense is recorded as a component of salaries and employee benefits in the consolidated income statement. Since the stock options are incentive stock options and there were no disqualifying dispositions, no tax benefit related to this expense was recognized. No options were modified during the three and nine month periods ended September 30, 2006 and 2005. The following table provides further detail regarding intrinsic value of options exercised, stock option compensation expense and options granted.

(dollars in thousands)	Three Months Ended Sept. 30,		Nine Months Ended Sept. 30,	
	2006	2005	2006	2005
Intrinsic value of options exercised	\$ 212	\$ 240	\$ 1,742	\$ 442
Stock option compensation expense recorded	\$ 216	\$	\$ 619	\$
Options granted	10,000		10,000	43,050

Non executive officer employees had loans outstanding of \$747,000 and \$708,000 at September 30, 2006 and December 31, 2005 that were originated to fund stock option exercises.

The fair value of each stock option granted is estimated on the date of grant using the Black-Scholes based stock option valuation model. This model requires the input of subjective assumptions that will usually have a significant impact on the fair value estimate. Expected volatilities are based on historical volatility of Republic's stock and other factors. Expected dividends are based on dividend trends and the market price of Republic's stock price at grant. Republic uses historical data to estimate option exercises and employee terminations within the valuation model. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve at the time of grant.

The weighted average assumptions for options granted during the three and nine month period ended September 30, 2006 and the resulting estimated weighted average fair values per share used in the Black-Scholes option pricing model are as follows:

Risk-free interest rate	4.75	%
Expected dividend yield	1.81	
Expected life of options (in years)	6.00	
Expected volatility	23	%
Estimated fair value per share	\$ 5.69	

SFAS 123R requires the recognition of stock based compensation for the number of awards that are ultimately expected to vest. As a result, recognized stock option compensation expense was reduced for estimated forfeitures prior to vesting. Estimated forfeitures will be reassessed in subsequent periods and may change based on new facts and circumstances. Prior to January 1, 2006, actual forfeitures were accounted for as they occurred for purposes of required pro forma stock compensation disclosures.

Unrecognized stock option compensation expense related to unvested awards (net of estimated forfeitures) for the remainder of 2006 and beyond is estimated as follows:

Year	(in thousands)
October - December 2006	\$ 206
2007	670
2008	493
2009	328
2010	84
2011 and thereafter	29
Total	\$ 1,810

In November 2004, the Company's Board of Directors approved a Non Qualified Deferred Compensation Plan (the "Deferred Compensation Plan"). The Deferred Compensation Plan governs the deferral of board and committee fees of non-employee members of the Board of Directors. Members of the Board of Directors may defer up to 100% of their board and committee fees for a specified period ranging from two to five years. The value of the deferred director compensation account is deemed "invested" in Company stock and is immediately vested. On a quarterly basis, the Company reserves shares of Republic's stock within the Company's stock option plan for ultimate distribution to Directors at the end of the deferral period. The Deferred Compensation Plan has not and will not materially impact the Company, as director compensation expense will continue to be recorded when incurred.

The following table presents information on director deferred compensation shares outstanding for the periods shown:

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2006	Weighted Average Market Price at Date of Deferral	2005	Weighted Average Market Price at Date of Deferral	2006	Weighted Average Market Price at Date of Deferral	2005	Weighted Average Market Price at Date of Deferral
Balance, beginning of period	9,002	\$ 20.47	2,716	\$ 20.95	5,845	\$ 20.51		\$
Awarded	1,862	21.15	1,891	19.92	5,019	20.69	4,607	20.53

Class B Common Share	0.37	1.37

3. DISCONTINUED OPERATIONS PAYDAY LENDING

By letter to Republic Bank & Trust Company dated February 17, 2006, the FDIC cited inherent risks associated with payday lending activities and requested that the Board of Directors consider terminating this line of business. Consequently, on February 24, 2006, Republic Bank & Trust Company and ACE Cash Express, Inc. (ACE) amended the agreement regarding Republic Bank & Trust Company's payday loan activities in Texas, Pennsylvania and Arkansas. With respect to Texas, Republic Bank & Trust Company ceased offering payday loans the week of February 27, 2006. With respect to Arkansas and Pennsylvania, Republic Bank & Trust Company ceased offering payday loans on June 30, 2006. The Company did not incur any additional costs related to the termination of the ACE contract and does not anticipate incurring any additional costs in the future. The Company had no payday loans outstanding related to the above contract at September 30, 2006.

By letter to Republic Bank & Trust Company of Indiana dated February 17, 2006, the FDIC cited inherent risks associated with payday lending activities and asked the Board of Directors to consider terminating this line of business. Republic Bank & Trust Company of Indiana voluntarily elected to terminate its Internet payday loan program the week of February 20, 2006. The Internet payday loan program began operating in July 2005 and remained in a developmental stage until its termination date. The Company had no payday loans outstanding related to the above program at September 30, 2006.

The following table illustrates the financial statements of the discontinued operation:

Total non interest-bearing deposits	282,134	286,484
Total	\$ 1,547,254	\$ 1,602,565

7. FEDERAL HOME LOAN BANK (FHLB) ADVANCES

(in thousands)	September 30, 2006	December 31, 2005
FHLB convertible fixed interest rate advances with a weighted average interest rate of 4.98%(1) due through 2011	\$ 50,000	\$ 90,000
Overnight FHLB borrowings with a weighted average interest rate of 5.35%	312,000	117,000
FHLB fixed interest rate advances with a weighted average interest rate of 4.19% due through 2010	363,732	354,133
Total FHLB advances	\$ 725,732	\$ 561,133

(1) Represents convertible borrowings with the FHLB. These borrowings have original fixed rate periods ranging from one to five years with original maturities ranging from three to ten years if not converted earlier by the FHLB. At the end of their respective fixed rate periods, the FHLB has the right to convert the borrowings to floating rate advances tied to LIBOR or the Company can prepay the borrowings at no penalty. The Company has \$50 million in these advances that are currently eligible to be converted on their quarterly repricing date. Based on market conditions at this time, management does not believe these advances are likely to be converted in the short-term.

FHLB advances are collateralized by a blanket pledge of eligible real estate loans. At September 30, 2006, Republic had available collateral to borrow an additional \$46 million from the FHLB. Republic also has unsecured lines of credit totaling \$196 million available through various financial institutions.

Aggregate future principal payments on FHLB advances, based on contractual maturity date or expected call for the remainder of 2006 and beyond is as follows:

Year	(in thousands)
October - December 2006	\$ 367,000
2007	90,000
2008	128,500
2009	92,000
2010	42,370
Thereafter	5,862
Total	\$ 725,732

8. SUBORDINATED NOTE

In 2005, Republic Bancorp Capital Trust (RBCT), an unconsolidated trust subsidiary of Republic Bancorp, Inc., issued \$40 million in Trust Preferred Securities (TPS). The TPS mature on September 30, 2035 and are redeemable at the Company's option after ten years. The TPS pay a fixed interest rate for 10 years and adjust with LIBOR thereafter. The subordinated debentures are currently treated as Tier 1 Capital for regulatory purposes and the related interest expense, currently payable quarterly at the annual rate of 6.015%, is included in the consolidated financial statements.

9. OFF BALANCE SHEET RISKS, COMMITMENTS AND CONTINGENT LIABILITIES

Republic is a party to financial instruments with off balance sheet risk in the normal course of business in order to meet the financing needs of its customers. These financial instruments primarily include commitments to extend credit and standby letters of credit. The contract or notional amounts of these instruments reflect the potential future obligations of Republic pursuant to those financial instruments. Creditworthiness for all instruments is evaluated on a case by case basis in accordance with Republic's credit policies. Collateral from the customer may be required based on management's credit evaluation of the customer and may include business assets of commercial customers, as well as personal property and real estate of individual customers or guarantors.

Republic also extends binding commitments to customers and prospective customers. Such commitments assure the borrower of financing for a specified period of time at a specified rate. The risk to Republic under such loan commitments is limited by the terms of the contracts. For example, Republic may not be obligated to advance funds if the customer's financial condition deteriorates or if the customer fails to meet specific covenants. An approved but unfunded loan commitment represents a potential credit risk once the funds are advanced to the customer. This is also a liquidity risk since the customer may demand immediate cash that would require funding and interest rate risk as market interest rates may rise above the rate committed. In addition, since a portion of these loan commitments normally expire unused, the total amount of outstanding commitments at any point in time may not require future funding.

As of September 30, 2006, exclusive of mortgage banking loan commitments, Republic had outstanding loan commitments totaling \$509 million, which included unfunded home equity lines of credit totaling \$298 million. As of December 31, 2005, exclusive of mortgage banking loan commitments, Republic had outstanding loan commitments totaling \$475 million, which included unfunded home equity lines of credit totaling \$269 million.

Standby letters of credit are conditional commitments issued by Republic to guarantee the performance of a customer to a third party. The terms and risk of loss involved in issuing standby letters of credit are similar to those involved in issuing loan commitments and extending credit. Commitments outstanding under standby letters of credit totaled \$12 million at September 30, 2006 and \$10 million at December 31, 2005.

At September 30, 2006, Republic had \$72 million in letters of credit from the FHLB issued on behalf of the Bank's clients as compared to \$88 million at December 31, 2005. Approximately \$12 million and \$28 million of these letters of credit were used as credit enhancements for client bond offerings at September 30, 2006 and December 31, 2005, respectively. The remaining \$60 million letter of credit was used to collateralize a public funds deposit, which the Company classifies in short-term borrowings at September 30, 2006 and December 31, 2005. These letters of credit reduce Republic's available borrowing line at the FHLB by the above total amount. Republic uses a blanket pledge of eligible real estate loans to secure the letters of credit.

10. EARNINGS PER SHARE

Class A and Class B shares participate equally in undistributed earnings. The difference in earnings per share between the two classes of common stock results solely from the 10% per share cash dividend premium paid on Class A Common Stock over that paid on Class B Common Stock.

A reconciliation of the combined Class A and Class B Common Stock numerators and denominators of the earnings per share and diluted earnings per share computations is presented below:

11. SEGMENT INFORMATION

Edgar Filing: REPUBLIC BANCORP INC /KY/ - Form 10-Q

The reportable segments are determined by the type of products and services offered, distinguished between banking operations, mortgage banking operations, Tax Refund Solutions and Deferred Deposits or Payday Loans. As discussed throughout this document, the Company substantially exited the deferred deposit business during the first quarter of 2006; therefore, its deferred deposit segment operations are presented as discontinued operations. Loans, investments and deposits provide the majority of revenue from banking operations; servicing fees and loan sales provide the majority of revenue from mortgage banking operations; RAL fees, ERC fees and Net RAL securitization income provide the majority of the revenue from tax refund services; and fees for providing deferred deposits or payday loans have historically represented the primary revenue source for the deferred deposit segment. All Company segments are domestic.

The accounting policies used for Republic's reportable segments are the same as those described in the summary of significant accounting policies. Income taxes are allocated based on income before income tax expense. Transactions among reportable segments are made at fair value.

Segment information follows:

12. SECURITIZATION

In January 2006, the Company established a special purpose wholly owned subsidiary corporation of Republic Bank & Trust Company named TRS RAL Funding LLC (TRS RAL LLC) to securitize a portion of the RAL portfolio to an independent third party. The Company established a two step structure to handle the sale of the assets to third party investors. In the first step, a sale provides for TRS RAL LLC, a Special Purpose Entity, to purchase the assets from Republic Bank and Trust Company as Originator and Servicer. TRS RAL LLC is wholly owned by Republic Bank & Trust Company. In the second step, a sale and administration agreement is entered into by and among TRS RAL LLC a third party conduit investor and a third party administrative agent, conduit agent, and committed purchaser. TRS RAL LLC purchased the loans from Republic Bank & Trust Company. The third party conduit investor purchased all eligible loans with the Republic Bank & Trust Company retaining a residual interest in an over collateralization.

13. SUBSEQUENT EVENT

On October 3, 2006, subsequent to the end of the third quarter, Republic completed its acquisition of GulfStream Community Bank (GulfStream) of Port Richey, Florida. On the acquisition date, GulfStream, which began operations in 2000, had total assets of \$64 million with total loans of \$45 million and total deposits of \$54 million. This acquisition will not materially impact the Company in 2006.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations of Republic Bancorp, Inc. (Republic or the Company) analyzes the major elements of Republic's consolidated balance sheets and statements of income. Republic, a bank holding company headquartered in Louisville, Kentucky, is the Parent Company of Republic Bank & Trust Company, Republic Bank & Trust Company of Indiana (together referred to as the Bank), Republic Funding Company, Republic Invest Co. and Republic Bancorp Capital Trust. Republic Invest Co. includes its subsidiary, Republic Capital LLC. Republic Bancorp Capital Trust is a Delaware statutory business trust that is a 100%-owned unconsolidated finance subsidiary of Republic Bancorp, Inc. The consolidated financial statements also include the wholly-owned subsidiaries of Republic Bank & Trust Company: TRS RAL Funding LLC, Republic Financial Services, LLC and Republic Insurance Agency, LLC. Item 2 *Management's Discussion and Analysis of Financial Condition and Results of Operations* should be read in conjunction with Part I, Item 1 *Financial Statements*. See Footnote 13 Subsequent Event of Item 1 *Financial Statements* for additional information regarding the acquisition of GulfStream Community Bank

This discussion includes various forward-looking statements with respect to credit quality, including but not limited to, delinquency trends and the adequacy of the allowance for loan losses, banking products, corporate objectives, the Company's interest rate sensitivity model and other financial and business matters. Broadly speaking, forward-looking statements may include:

- projections of revenue, income, earnings per share, capital expenditures, dividends, capital structure or other financial items;
- descriptions of plans or objectives of the Company's management for future operations, products or services;
- forecasts of future economic performance; and
- descriptions of assumptions underlying or relating to any of the foregoing.

The Company may make forward-looking statements discussing management's expectations about:

- future credit losses and non-performing assets;
- the adequacy of the allowance for loans losses;
- the future value of mortgage servicing rights;
- the impact of new accounting pronouncements;
- future short-term and long-term interest rate levels and the respective impact on net interest margin, net interest spread, net income, liquidity and capital;
- legal and regulatory matters; and
- future capital expenditures.

Forward-looking statements discuss matters that are not historical facts. As forward-looking statements discuss future events or conditions, they often include words such as anticipate, believe, estimate, expect, intend, plan, project, target, can, could, may, should, expressions. Do not rely on forward-looking statements. Forward-looking statements detail management's expectations regarding the future and are not guarantees. Forward-looking statements are assumptions based on information known to management only as of the date they are made and management may not update them to reflect changes that occur subsequent to the date the statements are made.

OVERVIEW

Net income from continuing operations for the quarter ended September 30, 2006 was \$6.3 million, representing an increase of \$549,000 or 10% compared to the same period in 2005. Diluted earnings per Class A Common Share from continuing operations increased 11% to \$0.31 for the quarter ended September 30, 2006 compared to \$0.28 for the same period in 2005.

Overall net income for the quarter ended September 30, 2006 was \$6.7 million, representing a decline of \$1.4 million or 17% compared to the same period in 2005. Diluted earnings per Class A Common Share declined 15% to \$0.33 for the quarter ended September 30, 2006 compared to \$0.39 for the same period in 2005.

Net income from continuing operations for the nine months ended September 30, 2006 was \$22.1 million, representing a decline of \$2.0 million or 8% compared to the same period in 2005. Diluted earnings per Class A Common Share from continuing operations declined 5% to \$1.11 for the nine months ended September 30, 2006 compared to \$1.17 for the same period in 2005.

Overall net income for the nine months ended September 30, 2006 was \$22.4 million, representing a decline of \$7.0 million or 24% compared to the same period in 2005. Diluted earnings per Class A Common Share from continuing operations declined 21% to \$1.12 for the nine months ended September 30, 2006 compared to \$1.42 for the same period in 2005.

Highlights for the quarter and nine months ended September 30, 2006 consist of the following:

- In February 2006, the Bank substantially exited the payday loan business. For financial reporting purposes, the payday loan business segment has been treated as a discontinued operation. All current period and prior period data has been restated to reflect continuing operations absent of the payday loan business.
- Net income from continuing operations increased for the quarter ended September 30, 2006 compared to the same period in 2005 due primarily to an increase in net interest income associated with growth in the loan portfolio and an increase in service charges on deposit accounts. The Company also benefited from a \$750,000 reduction in incentive compensation accruals during the quarter.
- Net income from continuing operations decreased for the nine months ended September 30, 2006 compared to the same periods in 2005 due primarily to a decrease in Electronic Refund Check (ERC) volume at Tax Refund Solutions (TRS), a higher provision for loan losses within the traditional banking segment and higher overall non interest expenses across the Company.
- The Company sold a portion of its Refund Anticipation Loan (RAL) portfolio into a securitization during the first quarter of 2006. Under U.S. Generally Accepted Accounting Principles (GAAP), fees on securitized RALs are classified as non interest income on the income statement. Historically, the Company retained all RALs with their corresponding fees being included in interest income on loans.
- Net loans, primarily consisting of secured real estate loans, increased by \$152 million, or 7% to \$2.2 billion during the first nine months of 2006. The growth was spread across the residential real estate, commercial real estate, real estate construction and commercial loan portfolios.
- The Company experienced an increase in the provision for loan losses of \$1.6 million for the first nine months of 2006 and \$410,000 for the quarter ended September 30, 2006 compared to the same periods in the prior year. This increase was primarily in the traditional banking segment, which experienced an increase in its provision for loan losses of \$2.4 million for the first nine months of 2006 and \$349,000 for the quarter ended September 30, 2006 compared to the same periods in the prior year. The increase for the nine months relates primarily to a large credit to the provision during the second quarter of 2005 associated with improvements in a few large classified loans. The increase for the quarter relates primarily to growth in the loan portfolio.

- Service charges on deposit accounts increased \$2.0 million or 20% during the first nine months of 2006 and \$609,000 or 17% for the quarter ended September 30, 2006 compared to the same periods in 2005. The increases in service charges on deposit accounts for both the quarter and nine months ended September 30, 2006 were due to

28

growth in the number of checking accounts and an increase in the Bank's overdraft fee which became effective August 1, 2005.

- ERC fees declined \$2.0 million or 33% for the nine months ended September 30, 2006 compared to the same period in 2005 due primarily to the discontinuation of business relationship with one large tax preparation software relationship. Because the substantial majority of the Company's tax business occurs during the first quarter of each year, the majority of this decline relates to the first quarter of 2006.

BUSINESS SEGMENT COMPOSITION

The Company is divided into four distinct business operating segments: Banking, Tax Refund Solutions, Mortgage Banking and Deferred Deposits or Payday Loans. As discussed throughout this document, the Company substantially exited the deferred deposit business during the first quarter of 2006; therefore, the deferred deposit segment operations are presented as discontinued operations. Total assets and net income by segment for the three and nine months ended September 30, 2006 and 2005 are presented below:

(in thousands)	Three Months Ended September 30, 2006			Total Continuing Operations	Discontinued Operations

(I) Banking

As of September 30, 2006, Republic has a total of 35 full-service banking centers with 33 located in Kentucky and two in southern Indiana. Louisville, Kentucky, the largest city in the State, is the location of Republic's headquarters, as well as 18 additional banking centers. Republic's central Kentucky market includes 14 banking centers in the following Kentucky cities: Bowling Green (1); Elizabethtown (1); Fort Wright (1); Frankfort (2); Georgetown (1); Lexington, the second largest city in Kentucky (5); Owensboro (2); and Shelbyville (1). Republic Bank & Trust Company of Indiana has banking centers located in New Albany and Jeffersonville, Indiana. Republic also has two Loan Production Offices (LPOs) (Republic Finance) located in Louisville, Kentucky that operate as a division of Republic Bank & Trust Company. Republic Finance offers an array of loan products to individuals who may not qualify under the Bank's standard underwriting guidelines.

The Company closed the acquisition of GulfStream Community Bank, with two locations in Port Richey and New Port Richey, located just north of Tampa, Florida on October 3, 2006. See Footnote 12 Subsequent Event of Item 1 *Financial Statements* for additional information regarding the acquisition of GulfStream Community Bank.

Republic has developed a community banking network, with most of its banking centers located either in separate communities or portions of urban areas that represent distinct communities. Each of Republic's banking centers is managed by one or more officers with the decentralized authority to make loan decisions within Bank mandated policies, procedures and guidelines.

Banking related operating revenues are derived primarily from interest earned from the Bank's loan and investment securities portfolios and fee income from loans, deposits and other banking products. The Company has historically extended credit and provided general banking services through its banking center network to individuals and businesses. Over the past several years, the Company has expanded into new lines of business to diversify its asset mix and further enhance its profitability. The Bank principally markets its banking products and services through the following delivery channels:

Mortgage Lending The Company generally retains adjustable rate residential real estate loans with fixed terms up to ten years. These loans are originated through the Company's retail banking center network and LPOs. Fixed rate residential real estate loans that are sold into the secondary market, and their accompanying servicing rights, which may be either sold or retained, are included as a component of the Company's *Mortgage Banking* segment and are discussed throughout this document.

Commercial Lending Commercial loans are primarily real estate secured and are generated through banking centers in the Company's market areas. The Company makes commercial loans to a variety of industries and promotes this business through focused calling programs, in order to broaden relationships by providing business clients with loan, deposit and cash management services.

Consumer Lending Traditional consumer loans made by the Bank include home improvement and home equity loans, as well as secured and unsecured personal loans. With the exception of home equity loans, which are actively marketed in conjunction with single family first lien mortgage loans, traditional consumer loan products are not actively promoted in Republic's markets.

Cash Management Services Republic provides various deposit products designed for businesses located throughout its market areas. Lockbox processing, business online banking, account reconciliation and Automated Clearing House (ACH) processing are additional services offered to businesses through the Cash Management department. The Premier First product is the Company's premium money market sweep account designed for business clients.

Internet Banking Republic expands its market penetration and service delivery by offering clients Internet banking services and products through its Internet site, www.republicbank.com.

Other Banking Services The Bank also provides trust services, title insurance products and other related financial institution lines of business.

(II) Tax Refund Solutions (TRS)

Republic Bank & Trust Company is one of a limited number of financial institutions that facilitates the payment of federal and state tax refunds through tax preparers located throughout the U.S.. The Company facilitates the payment of these tax refunds through three primary products: Refund Anticipation Loans (RALs), Electronic Refund Checks (ERCs) and Electronic Refund Deposits (ERDs). The Company offers RALs for those taxpayers who apply and qualify and RALs are repaid when the taxpayers' refunds are electronically received by the Company from the government. For those taxpayers who wish to receive their funds electronically via an ACH, the Company will provide an ERC or an ERD to the taxpayer. An ERC/ERD is issued to the taxpayer after the Company has received the tax refund from the federal or state government.

See Footnote 12 of Item 1 *Financial Statements* for a description of the securitization that the Company utilized during the first quarter of 2006. This securitization represents the sale of a portion of the RAL portfolio to a financial institution, and except for the capital that must be allocated for the small retained interest kept by the Company, it eliminates the funding impact on the regulatory capital ratios of the Company. The net RAL securitization income, which represents the net amount of the fees from the loans, the fees paid by Republic, gain/loss on securitization residual and other costs incurred by Republic on the sold loans, is classified as non interest income under the caption Net RAL Securitization Income.

See additional discussion about this product under Footnote 11 Segment Information of Item 1 Financial Statements.

(III) Mortgage Banking

Mortgage banking activities primarily include 15, 20 and 30-year fixed rate real estate loans that are sold into the secondary market. Since 2003, Republic historically retained servicing on substantially all loans sold into the secondary market. During the second and third quarters of 2006, the Company began selling the majority of its loans with servicing released. Subsequent to the end of the third quarter of 2006, management made the decision to begin selling its fixed rate loans on a servicing retained basis again. Administration of loans with the servicing retained by the Company includes collecting principal and interest payments, escrowing funds for taxes and insurance and remitting payments to the secondary market investors. A fee is received by Republic for performing these standard servicing functions.

See additional discussion about this product under Footnote 11 Segment Information of Item 1 Financial Statements.

(IV) Discontinued Operations (Deferred Deposits or Payday Lending)

The Bank substantially exited the payday loan segment of business during February 2006. This has been treated as a discontinued operation and all current period and prior period data has been restated to reflect operations absent of the payday lending segment of business. The Company ceased originating payday loans on June 30, 2006 and had no payday loans outstanding at September 30, 2006.

Payday loans are transactions whereby customers receive cash advances in exchange for a check or authorization to electronically debit the customer's checking account for the advanced amount plus a fixed fee. Under the Marketer/Servicer model, customers can reclaim their checks in cash for the amount of the advance plus the fee, on or before the due date of the advance. If the customer does not reclaim the check in cash by the advance due date, the check is deposited. Payday loan transactions are recorded as loans on the Company's financial statements. The corresponding fees are recorded as a component of income from discontinued operations.

See additional discussion about this product under Footnote 3 Discontinued Operations and Footnote 11 Segment Information of Item 1 Financial Statements.

RESULTS OF OPERATIONS

Net Interest Income

The principal source of Republic's revenue is net interest income. Net interest income is the difference between interest income on interest-earning assets, such as loans and securities, and the interest expense on liabilities used to fund those assets,

such as interest-bearing deposits and borrowings. Net interest income is impacted by both changes in the amount and composition of interest-earning assets and interest-bearing liabilities, as well as market interest rates.

For the third quarter of 2006 net interest income was \$20.7 million, an increase of \$1.1 million, or 6%, over the same period in 2005. As illustrated in Table 3, the Company was able to increase its net interest income primarily through growth in the Company's traditional loan portfolio combined with an increase in yield on new loans and on its investment portfolio, as the Company maintained a short repricing duration on its investments for interest rate risk purposes. The increased interest income from loans and investments was partially offset by increased interest expense on money market accounts and repurchase agreements, which reprice with short-term indices. The Company's net interest spread from continuing operations declined 20 basis points for the third quarter of 2006 compared to the same period in 2005 while net interest margin from continuing operations declined 9 basis points for the same period.

For the nine months ended September 30, 2006, net interest income was \$66.8 million, a decline of \$1.0 million, or 2%, from the same period in 2005. The Company experienced a \$3.0 million or 34% decline in net interest income within the TRS business segment as a result of the RAL securitization, which effectively caused \$2.5 million in RAL fees to be classified in non interest income because they were related to securitized RALs. The Company experienced a \$4.2 million, or 7% increase in net interest income within the Banking segment which was primarily related to growth in the traditional loan portfolio, particularly within the residential real estate portfolio. Total traditional Bank loans increased \$241 million from September 30, 2005 to September 30, 2006.

The Company's net interest spread from continuing operations declined 34 basis points for the nine months ended September 30, 2006 to 2.73% compared to the same period in 2005, while net interest margin from continuing operations declined 19 basis points to 3.34% for the same period. Approximately 20 basis points of the decline in the net interest margin was the result of the fees on the securitized RALs now being classified in non interest income, while in past years all RALs were retained and their corresponding fees were included as a component of interest income on loans. The remainder of the decline in the net interest margin and net interest spread was the result of an increase in the Company's cost of funds without a similar corresponding increase in its yield on earning assets. More specifically, this contraction primarily occurred because much of the Company's funding is derived from large commercial cash management accounts that are tied to immediately repricing indices, while the majority of the Company's interest earning assets are real estate secured loans that reprice over a longer period. Based on the Company's current balance sheet structure, management believes that the net interest spread and margin in 2006 will continue to contract unless short-term rates decline significantly from current levels. Management is unable to precisely determine the negative impact of continued contraction on the Company's net interest spread and margin in the future.

In prior period financial statement filings, the Company classified daily fees associated with overdrawn deposit accounts within service charges on deposits along with per item overdraft fees. In 2006, the Company reclassified daily overdraft fees into loan fees, which is included as a component of interest income on loans. All prior period amounts presented have been reclassified to conform to current period presentation. For the quarter and nine months ended September 30, 2006, the amount of fees reclassified was \$527,000 and \$1.5 million. For the quarter and nine months ended September 30, 2005, the amount of fees reclassified was \$460,000 and \$1.2 million.

For additional information on the past effect of rising short-term interest rates on Republic's net interest income, see section titled Volume/Rate Variance Analysis in this section of the document. For additional information on the potential future effect of rising short-term interest rates on Republic's net interest income, see section titled Interest Rate Sensitivity in this section of the document. For additional discussion regarding the securitization, see the section titled Tax Refund Solutions and Footnote 12 of Item 1 Financial Statements.

Table 1 and Table 2 provide detailed information as to average balances, interest income/expense and rates by major balance sheet category for the three and nine month periods ended September 30, 2006 and 2005. Table 3 provides an analysis of the changes in net interest income attributable to changes in rates and changes in volume of interest-earning assets and interest-bearing liabilities.

(1) For the purpose of this calculation, the fair market value adjustment on investment securities resulting from SFAS 115 is included as a component of other assets.

(2) The amount of loan fee income included in total interest income was \$5.9 million and \$9.8 million for the nine months ended September 30, 2006 and 2005.

The following table illustrates the extent to which changes in interest rates and changes in the volume of interest-earning assets and interest-bearing liabilities affected Republic's interest income and interest expense during the periods indicated. Information is provided in each category with respect to (i) changes attributable to changes in volume (changes in volume multiplied by prior rate), (ii) changes attributable to changes in rate (changes in rate multiplied by prior volume) and (iii) the net change. The changes attributable to the combined impact of volume and rate have been allocated proportionately to the changes due to volume and the changes due to rate.

Non interest Income

Non interest income increased \$2.2 million or 10% during the nine months ended September 30, 2006 compared to the same period in 2005, due primarily to an increase in service charges on deposit accounts, a decline in ERC/ERD fees and an increase in net RAL securitization income. For the quarter ended September 30, 2006 non interest income increased \$504,000 or 8% over the same period in 2005, due primarily to the same reason.

Service charges on deposit accounts increased \$2.0 million or 20% during the nine months ended September 30, 2006 and \$609,000 or 17% for the quarter ended September 30, 2006 compared to the same periods in 2005. The increases were due primarily to growth in the Company's checking account base in conjunction with the Bank's Overdraft Honor program, which permits selected clients to overdraft their accounts up to a predetermined dollar amount (up to a maximum of \$750) for the Bank's customary overdraft fee. The Company also increased its overdraft fee by 7% in August of 2005 and again in September of 2006. Included in service charges on deposits are per item fees of \$8.9 million and \$7.1 million for nine months ended September 30, 2006 and 2005 with \$3.2 million and \$2.7 million related to the respective third quarters.

ERC/ERD fees decreased \$2.0 million, or 33%, to \$4.0 million during the nine months ended September 30, 2006 compared to the same period in 2005. This decrease was due to a 27% decline in ERC/ERD volume from the prior year resulting primarily from the discontinuation of a business relationship with one large integrated software partner. The substantial majority of the Company's tax business occurs during the first quarter of each year; therefore, most of this decline relates to the first quarter of 2006.

Net RAL Securitization Income was \$2.5 million for the nine months ended September 30, 2006 as the Company completed its first time securitization of a portion of the RAL portfolio during the first quarter of the year. The majority of this income was recognized during the first quarter of the year. A component of this amount represents a gain/loss on securitization residual, which reflects quarterly adjustments to the carrying value of the residual asset. The potential exists during the remainder of the year that the Company will record additional gain/loss on securitization residual based on its fair value. The Company believes the impact of these changes in the value of the residual interest will be immaterial to the financial statements and will recognize such changes in subsequent quarters as they are realized.

Detail of Net RAL Securitization Income follows:

(in thousands)	Three Months Ended September 30, 2006	Nine Months Ended September 30, 2006
Gain on sale of RALs	\$	\$ 2,022
Gain/Loss on Securitization Residual	113	509
Net RAL Securitization Income	\$ 113	\$ 2,531

See additional discussion under Footnote 12 Securitization of Item 1 Financial Statements.

Non interest Expenses

Non interest expenses increased \$4.3 million or 8% during the nine months ended September 30, 2006 compared to the same period in 2005. Salaries and employee benefits increased \$2.8 million during this period, attributable to annual merit increases, increased incentive compensation accruals and stock option compensation expense and higher than anticipated health insurance claims. The increase in non interest expense was moderated by a \$750,000 credit for a reduction in incentive compensation accruals posted during the third quarter of 2006. The Company recorded stock option expense of \$619,000 during the nine months ended September 30, 2006 related to the prospective adoption of SFAS 123R on January 1, 2006.

For the third quarter of 2006 non interest expenses increased \$360,000 or 2% compared to the same period in 2005. Salaries and employee benefits increased \$378,000 or 4% during this period, attributable to the same reasons cited in the preceding paragraph. The Company recorded stock option expense of \$216,000 during the third quarter 2006 related to the prospective adoption of SFAS 123R on January 1, 2006.

Occupancy and equipment expense increased \$884,000, or 9%, during the nine months ended September 30, 2006 compared to the same period in 2005. The increase in occupancy and equipment was primarily attributable to increased rent and leasehold improvements for the Company's operations areas, as well as increased leasing costs and service agreements for the Company's technology and operating systems.

Other expense decreased \$191,000, or 11%, during the quarter ended September 30, 2006 compared to the same period in 2005. The decrease was primarily attributable to prior period audit and professional fees associated with Tax Refund Solutions product consulting.

COMPARISON OF FINANCIAL CONDITION AT SEPTEMBER 30, 2006 AND DECEMBER 31, 2005

Loans

Net loans, primarily consisting of secured real estate loans, increased by \$152 million to \$2.2 billion at September 30, 2006 as compared to December 31, 2005. This growth was primarily in the residential real estate and commercial real estate portfolios and resulted from continued heavy marketing of its discounted closing costs promotions in both product types.

Allowance for Loan Losses and Provision for Loan Losses

The Company experienced an increase in the provision for loan losses of \$1.6 million for the first nine months of 2006 and \$410,000 for the quarter ended September 30, 2006 compared to the same periods in the prior year. The traditional banking segment accounted for an increase of \$2.4 million for the first nine months of 2006 and \$441,000 for the quarter ended September 30, 2006 compared to the same periods in the prior year. The increase in provision expense for the quarter ended September 30, 2006 was primarily due to growth in the loan portfolio. The increase for the first nine months also resulted from a large credit recorded to the provision during the second quarter of 2005 associated with improvements in a few large classified loans.

Also included in the provision for loan losses for the nine month periods ended September 30, 2006 and September 30, 2005 were \$379,000 and \$1.2 million for losses associated with RALs retained by the Company. The decrease in the provision associated with RALs resulted primarily from the securitization of a portion of the RAL portfolio during the first quarter of 2006.

The allowance for loan losses as a percent of total loans declined slightly to 0.49% at September 30, 2006 as compared to 0.53% as of December 31, 2005. Management believes, based on information presently available, that it has adequately provided for loan losses at September 30, 2006.

An analysis of the changes in the allowance for loan losses and selected ratios follows:

37

Table 4 Summary of Loan Loss Experience

(dollars in thousands)	Three Months Ended September 30,		Nine Months Ended September 30,

Federal Home Loan Bank Advances

The Company has \$726 million of FHLB advances at September 30, 2006. Approximately \$50 million of the FHLB advances at September 30, 2006 are convertible advances with original fixed rate periods ranging from one to five years and original maturities ranging from three to ten years. At the end of their respective fixed rate periods, the FHLB has the right to convert the advances to floating rate advances tied to LIBOR. If the FHLB elects to convert the debt to a floating rate instrument, Republic has the right to pay off the advances without penalty. During the first nine months of 2006, the FHLB converted \$40 million in advances to floating rate, overnight advances. The weighted average coupon on the \$50 million remaining at September 30, 2006 was 4.98%. Based on market conditions at this time, management believes it is likely the substantial majority of these advances will be converted to floating rate advances by the FHLB during the fourth quarter of 2006.

The Company also has approximately \$312 million in FHLB advances, which reprice on an overnight basis. The Company has elected to borrow these advances on an overnight basis due to the uncertainty of the current interest rate environment and the inversion of the yield curve. Due to the continued negative impact of the large amount of overnight advances on the Company's interest rate sensitivity model, it is likely the Company will begin extending

the maturities on a portion of these advances during the fourth quarter of 2006. The overall effect on the Company's current earnings from extending maturities on the overnight advances will be minimal. This strategy, however, will lessen the negative impact of an increase in short-term interest rates on the Company's net interest income and will reduce the positive impact from a decrease in short-term interest rates on the Company's net interest income.

LIQUIDITY

Republic maintains sufficient liquidity to fund loan demand and routine deposit withdrawal activity. Liquidity is managed by maintaining sufficient liquid assets in the form of investment securities. Funding and cash flows can also be realized by the sale of securities available for sale, principal paydowns on loans and mortgage backed securities (MBSs) and proceeds realized from the sale of loans held for sale. The Company's liquidity is impacted by its ability to sell securities, which is limited, due to the level of securities that are needed to secure public deposits, securities sold under agreements to repurchase and for other purposes, as required by law. At September 30, 2006, these securities had a fair market value of \$405 million. Republic's banking centers and its Internet site, www.republicbank.com, provide access to retail deposit markets. These retail deposits, if offered at attractive rates, have historically been a source of additional funding when needed. In addition, brokered certificates of deposit have provided a source of liquidity to the Company when needed to fund loan growth.

Traditionally, the Company has also utilized secured and unsecured borrowing lines to supplement its funding requirements. At September 30, 2006, the Company had capacity with the Federal Home Loan Bank to borrow an additional \$46 million. The Company also had \$196 million in approved unsecured line of credit facilities available at September 30, 2006 through various third party sources.

The Company's principal source of funds for dividend payments is dividends received from the Bank. Kentucky and Indiana banking regulations limit the amount of dividends that may be paid to the Parent Company by the Bank without prior approval of the respective states' banking regulators. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's net profits, combined with the retained net profits of the preceding two years. At September 30, 2006, Republic Bank & Trust Company and Republic Bank & Trust Company of Indiana could, without prior approval, declare dividends of approximately \$44 million and \$835,000, respectively. The Company does not plan to pay dividends from Republic Bank & Trust Company of Indiana in the foreseeable future.

CAPITAL

Total stockholders' equity increased from \$214 million at December 31, 2005 to \$233 million at September 30, 2006. The increase in stockholders' equity was primarily attributable to net income earned during 2006 reduced by dividends declared, the repurchase of Company stock and the change in accumulated other comprehensive income/(loss) as a result of the respective change in the value of the available for sale securities portfolio.

See Part II, Item 2 *Unregistered Sales of Equity Securities and Use of Proceeds* for additional detail regarding stock repurchases and buy back programs.

Regulatory Capital Requirements The Parent Company and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on Republic's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Parent Company and the Bank must meet specific capital guidelines that involve quantitative measures of the Company's assets, liabilities and certain off balance sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

The FDIC has categorized the Bank as well capitalized. To be categorized as well capitalized, the Bank must maintain minimum Total Risk Based, Tier I Capital and Tier I Leverage Capital ratios. Regulatory agencies measure capital adequacy within a framework that makes capital requirements, in part, dependent on the individual risk profiles of financial institutions. Republic continues to exceed the regulatory requirements for the Total Risk Based, Tier I Capital and Tier I Leverage Capital ratios. Republic and the Bank intend to maintain a capital position that

meets or exceeds the well capitalized requirements as defined by the Federal Reserve and FDIC. Republic's average capital to average assets ratio was 8.01% at September 30, 2006 compared to 8.00% at December 31, 2005.

In August 2005, Republic Bancorp Capital Trust (RBCT), an unconsolidated trust subsidiary of Republic Bancorp, Inc., issued \$40 million in Trust Preferred Securities (TPS). The TPS pay a fixed interest rate for 10 years and adjust with LIBOR thereafter. The TPS mature on September 30, 2035 and are redeemable at the Company's option after ten years. The subordinated debentures are treated as Tier I Capital for regulatory purposes. The sole asset of RBCT represents the proceeds of the offering loaned to Republic Bancorp, Inc. in exchange for subordinated debentures which have terms that are similar to the TPS. The subordinated debentures and the related interest expense, which are payable quarterly at the annual rate of 6.015%, are included in the consolidated financial statements. The proceeds obtained from the TPS offering have been and will continue to be utilized to fund loan growth, support an existing stock repurchase program and for other general business purposes including the acquisition of GulfStream Community Bank in Florida.

The following table sets forth the Company's risk based capital amounts and ratios as of September 30, 2006 and December 31, 2005.

Table 5 Capital Ratios

(dollars in thousands)	As of September 30, 2006		As of December 31, 2005

REGULATORY MATTERS

On June 22, 2006, Republic Bank & Trust Company received a subsequent CRA evaluation prepared as of April 10, 2006 in which it received a Satisfactory rating. Previously on July 22, 2005, Republic Bank & Trust Company received a Community Reinvestment Act (CRA) performance evaluation prepared as of October 4, 2004 with a Needs to Improve rating. Republic Bank & Trust Company voluntarily changed certain procedures and processes to address the Regulation B issues raised by the FDIC during the CRA Evaluation. As required by statute, the FDIC referred their conclusions to the Department of Justice (DOJ) for review. Subsequent to September 30, 2006, the Company was notified that the DOJ has referred the Regulation B issue back to the FDIC for administrative handling with no further corrective action required by the DOJ. At this time, the FDIC is considering whether it will require any further corrective actions by Republic.

ASSET/LIABILITY MANAGEMENT AND MARKET RISK

Asset/liability management control is designed to ensure safety and soundness, maintain liquidity and regulatory capital standards and achieve acceptable net interest income. Interest rate risk is the exposure to adverse changes in net interest income as a result of market fluctuations in interest rates. Management, on an ongoing basis, monitors interest rate and liquidity risk in order to implement appropriate funding and balance sheet strategies. Management considers interest rate risk to be Republic's most significant market risk in a fluctuating rate environment.

The interest sensitivity profile of Republic at any point in time will be affected by a number of factors. These factors include the mix of interest sensitive assets and liabilities, as well as their relative pricing schedules. It is also influenced by market interest rates, deposit growth, loan growth and other factors.

Republic utilizes an earnings simulation model to analyze net interest income sensitivity. Potential changes in market interest rates and their subsequent effects on net interest income are evaluated with the model. The model projects the effect of instantaneous movements in interest rates of both 100 and 200 basis point increments equally across all points on the yield curve. These projections are computed based on various assumptions, which are used to determine the 100 and 200 basis point increments, as well as the base case (which is a twelve month projected amount) scenario. Assumptions based on growth expectations and on the historical behavior of Republic's deposit and loan rates and their related balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain and, as a result, the model cannot precisely measure future net interest income or precisely predict the impact of fluctuations in market interest rates on net interest income. Actual results will differ from the model's simulated results due to timing, magnitude and frequency of interest rate changes, as well as changes in market conditions and the application and timing of various management strategies. Additionally, actual results could differ materially from the model if interest rates do not move equally across all points on the yield curve. As with the Company's previous simulation models, the September 30, 2006 simulation analysis continues to indicate that an increase in interest rates would have a negative effect on net interest income, while a decrease in interest rates would have a positive effect on net interest income.

The following table illustrates Republic's projected annualized net interest sensitivity profile based on the asset/liability model as of September 30, 2006:

Table 6 Interest Rate Sensitivity

	Net Interest Income Change	
Increase 200 basis points	-8.57	%
Decrease 100 basis points	-4.56	
Increase 100 basis points	2.99	
Decrease 200 basis points	4.25	

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Information required by this item is included under Part I, Item 2 *Management's Discussion and Analysis of Financial Condition and Results of Operation* and Item 1A *Risk Factors*.

Item 4. Controls and Procedures.

As of the end of the period covered by this report, an evaluation was carried out by Republic Bancorp, Inc.'s management, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, no change in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the fiscal quarter covered by this report that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings.

In the ordinary course of operations, Republic and the Bank are defendants in various legal proceedings. In the opinion of management, there is no proceeding pending or, to the knowledge of management, threatened litigation in which an adverse decision could result in a material adverse change in the business or consolidated financial position of Republic or the Bank.

Item 1A. Risk Factors.

Information regarding risk factors appears in the Company's Form 10-K for the year ending December 31, 2005, under the heading titled *Cautionary Statement Regarding Forward-Looking Statements* and in the Form 10-K Part I, Item 1A *Risk Factors*. There has been no material changes from the risk factors previously disclosed in our Form 10-K for the year ended December 31, 2005.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

Details of Republic's Class A Common Stock purchases during the third quarter of 2006 are included in the following table:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plan or Programs
July 1 - July 31		\$		
Aug. 1 - Aug. 31	1,157	20.44	1,157	
Sept. 1 - Sept. 30	1,157	21.98	1,157	
Total	2,314	* \$ 21.21	2,314	319,668

* - Represents shares repurchased by the Company in connection with stock option exercises.

During the nine months ended September 30, 2006, the Company repurchased 29,038 shares in addition to stock option exercises. During the second quarter of 2006, the Company's Board of Directors approved the repurchase of an additional 300,000 shares, from time to time, if market conditions are deemed favorable to the Company. During the third quarter of 2005, the Company's Board of Directors approved the repurchase of 262,500 shares. The repurchase programs will remain effective until the number of shares authorized is repurchased or until Republic's Board of Directors terminates the program. As of September 30, 2006, the Company had 319,668 shares which could be repurchased under the current stock repurchase programs.

During 2006, Republic issued approximately 10,000 shares of Class A Common Stock upon conversion of shares of Class B Common Stock by shareholders of Republic in accordance with the share-for-share conversion provision option of the Class B Common Stock. The exemption from registration of the newly issued Class A Common Stock relied upon was Section (3)(a)(9) of the Securities Act of 1933.

There were no equity securities of the registrant sold without registration during the quarter covered by this report.

Item 6. Exhibits.

(a) Exhibits
