First Nine Months 2007

Portugal Telecom

Earnings Release

Lisbon, Portugal, 14 November 2007

Portugal Telecom announced today its results for the first nine months ended 30 September 2007.

In 9M07, consolidated operating revenues amounted to Euro 4,531 million, an increase of 5.7% y.o.y. EBITDA increased by 11.8% y.o.y to Euro 1,726 million, equivalent to a margin of 38.1%, and income from operations increased by 29.2% y.o.y to Euro 910 million. Net income for the period amounted to Euro 670 million, an increase of 27.2% over the same period of last year. EBITDA minus Capex increased by 15.5% y.o.y to Euro 1,227 million. As at 30 September 2007, net debt amounted to Euro 4,332 million and after-tax unfunded post retirement benefit obligations totalled Euro 917 million.

PT's financial results have been prepared in accordance with International Financial Reporting Standards (IFRS). Following the approval of the PT Multimedia spin-off at PT's Annual Shareholders' Meeting on 27 April 2007, PT Multimedia was considered as a discontinued operation for reporting purposes. For a detailed discussion of PT Multimedia's results, please refer to PTM's First Nine Months 2007 Earnings Release.

Financial Review

Income Statement

Consolidated operating revenues increased by 5.7% y.o.y in 9M07 (+6.5% y.o.y in 3Q07), driven by growth at Vivo, TMN and Other Businesses. Vivo operating revenues increased by 13.8% y.o.y in Euros and by 12.8% y.o.y in Reais in 9M07, on the back of continued growth in customers and ARPU, as well as the impact of the change in interconnection regime (July 2006). TMN operating revenues increased by 1.3% y.o.y (+1.6% y.o.y in 3Q07), whilst billing revenues increased by 2.1% y.o.y (+2.4% y.o.y in 3Q07), underpinned by continued customer growth, particularly in postpaid and wireless broadband. Excluding the negative impact of mobile termination rate (MTR) cuts, operating revenues would have increased by 2.6% y.o.y in 9M07. Wireline operating revenues decreased by 5.7% y.o.y in 9M07, as a result of the impact of continued line loss and pricing pressure on retail revenues, notwithstanding the improvement in wholesale and data & corporate revenues. Other revenues increased to Euro 137 million mainly as a result of a higher contribution of MTC (Euro 77 million), which was only consolidated as from September 2006, and the increase in revenues of other fully consolidated subsidiaries.

Consolidated net income	241.0	125.4	92.1%	670.1	527.0	27.2%
--------------------------------	--------------	--------------	--------------	--------------	--------------	--------------

(1) Considering a Euro/Real average exchange rate of 2.7167 in 9M06 and 2.6921 in 9M07. (2) EBITDA = income from operations + depreciation and amortisation. (3) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + net other costs (gains).

EBITDA increased by 11.8% y.o.y in 9M07 to Euro 1,726 million, with the EBITDA margin improving by 2.1pp y.o.y to 38.1%. Adjusting for exceptional items (Table 3) related to prior years service gains at Wireline and provisions at Vivo (2Q06), EBITDA would have increased by 8.3% y.o.y, which results in a margin expansion of 0.9pp to 37.3%. The improvement in EBITDA in the period was driven primarily by growth in the mobile divisions, Vivo and TMN, and the increase in Other Businesses. Vivo EBITDA increased by 28.3% y.o.y (27.1% y.o.y in local currency), on the back of the strong improvement in underlying EBITDA (+16.8% in local currency) and the impact of a one-off provision recorded in 9M06 (Euro 30 million). As for TMN, continued top line growth, against a backdrop of strong commercial activity (190 thousand net additions in 3Q07), combined with strict cost control, resulted in an EBITDA growth of 3.3% y.o.y (+4.5% y.o.y in 3Q07). Wireline EBITDA increased by 0.7% y.o.y, mainly as a result of the increase in prior years service gains in 2007, resulting from the reduction in post retirement benefits. Excluding this impact, underlying EBITDA would have decreased by 2.4% y.o.y, with the 1.6pp improvement in underlying EBITDA margin resulting from the continued reduction in personnel-related and other operating costs. Other EBITDA increased to Euro 60 million in 9M07, mainly as a result of the increase in the contribution of MTC (Euro 40 million), which was only consolidated as from September 2006, and the increase in EBITDA of other fully consolidated subsidiaries.

The impact in 9M07 of the reduction in mobile termination rates throughout 2006 was as follows:

Table 4 _ Impact of Mobile Termination Rate Cuts

	3Q07	9M07
Revenues	3.2	19.6
Wireline	0.7	5.4
Domestic mobile TMN	2.5	14.2

Domestic mobile	TMN	1.2	7.1

Curtailment costs amounted to Euro 142 million in 9M07, as compared to Euro 96 million in the previous year. Curtailment costs in 9M07 were related to the reduction in headcount of 482 employees.

Net interest expenses decreased by 15.5% y.o.y to Euro 146 million in 9M07, mainly as a result of the reduction in the average cost of debt in Portugal and Brazil, as well as the decrease in Vivo's average net debt in the period, and notwithstanding the increase in PT's average net debt in the period.

Excluding Brazil and the interest cost associated with the PTM equity swap (settled in 2Q07), PT's average cost of debt was 3.5% in 9M07, as compared to 3.8% in the same period of last year.

Equity in earnings of affiliates increased to Euro 95 million in 9M07, as compared to Euro 86 million in 9M06, primarily as a result of the increase in PT's share in the earnings of Unitel (Euro 65 million in 9M07 vs. Euro 60 million in 9M06), UOL (Euro 9 million in 9M07 vs. Euro 5 million in 9M06) and CTM (Euro 13 million in 9M07 vs. Euro 11 million in 9M06).

Net other financial gains, which include net foreign currency gains, net gains on financial assets and net other financial expenses, amounted to Euro 220 million in 9M07, as compared to losses of Euro 39 million in 9M06. In 9M07, net gains on financial assets included gains related to: (1) the sale of 22% of Africatel (Euro 110 million), the holding company that aggregates all of PT's interests in Africa excluding Medi Telecom; (2) the equity swap contracts on PTM shares (Euro 77 million in 9M07 vs. Euro 6 million in 9M06); (3) the disposal of the investment in the shares of Banco Espirito Santo (Euro 36 million), and (4) the cash settlement of equity swaps on own shares (Euro 31 million). Net other financial expenses, which include mainly banking services, financial discounts and other financing costs, amounted to Euro 26 million in 9M07, which compares with Euro 37 million in 9M06. This reduction is mainly related to the financial taxes paid by Vivo in 9M06 in connection with its debt restructuring last year.

Provision for income taxes amounted to Euro 211 million in 9M07, as compared to a gain of Euro 7 million in 9M06. The change in this item is primarily explained by the Euro 53 million tax credit booked in 1Q06, in connection with the liquidation of a holding company, and by the Euro 142 million gain booked in 2Q06, in connection with the reduction of deferred tax liabilities resulting from the voluntary taxation of certain capital gains. Adjusting for these one-off effects, the provision for income taxes in 9M06 would have amounted to Euro 188 million, with the adjusted effective tax rate falling from 41% in 9M06 to 23% in 9M07, mainly as a result of: (1) the reduction in the nominal tax rate in Portugal from 27.5% in 2006 to 26.5% in 2007; (2) the decrease in allowances for deferred taxes on tax losses generated by Vivo, following the corporate restructuring completed at the end of 2006, and (3) the booking of the non-taxable capital gains related to the disposals of 22% of Africatel and the investment in the shares of BES.

Income from discontinued operations includes the earnings of PT Multimedia before minority interests, as a result of the spin-off of this division. In 9M07, this item included costs related to the spin-off process amounting to Euro 18 million (Euro 13 million, net of tax) in connection with employee, organisational and IT restructuring costs.

Income attributable to minority interests increased to Euro 66 million in 9M07 from losses of Euro 0.1 million in the previous year, mainly as a result of: (1) the increase in income attributable to Vivo minority interests (income of Euro 10 million in 9M07 vs. loss of Euro 38 million in 9M06), and (2) the income attributable to MTC minority interests (Euro 17 million in 9M07 vs. Euro 2 million in 9M06), which was consolidated as from September 2006.

Net income excluding exceptional items	172.9	167.1	3.4%	535.2	398.4	34.3%

Net income amounted to Euro 670 million in 9M07, an increase of 27.2% y.o.y, primarily as a result of the increase in EBITDA and higher net financial gains, more than offsetting the increase in curtailment costs in 9M07 and lower provision for income taxes in 9M06. Adjusting for the various impacts described above, net income excluding exceptional items would have increased by 34.3% y.o.y in 9M07 to Euro 535 million (see table 5).

Capex

Capex increased by 3.6% y.o.y to Euro 498 million in 9M07, with the decrease in Vivo capex being more than offset by the capex increase in the remaining divisions. Wireline capex was directed towards network upgrades to provide greater bandwidth, in part related to IPTV services launched in June 2007 and client-related capex, while at TMN capex was directed towards the build up of network capacity and 3G/3.5G coverage. TMN capex also included a contribution of Euro 8 million to a fund for the development of the information society, under the terms of the UMTS licence. At Vivo, capex was directed towards the GSM/EDGE overlay and network coverage and capacity. Other capex includes capex related to consolidated businesses not included in the main segments and support companies. In 9M07, other capex increased to Euro 47 million, as compared to Euro 30 million in 9M06, mainly as a result of the increase in the contribution of MTC (Euro 21 million), which was consolidated as from September 2006.

Cash Flow

Operating cash flow amounted to Euro 1,025 million in 9M07, a decrease of 7.4% y.o.y. The reduction in operating cash flow is explained by the increase in working capital investment in 9M07, primarily as a result of higher commercial activity at TMN and Vivo, higher management fees and the consolidation of MTC as from September 2006.

Table 7 _ Free Cash Flow

(1) Includes dividends received from PTM (Euro 54 million in 9M07 vs. Euro 58 million in 9M06) and Unitel (Euro 27 million in 9M07 vs. Euro 2 million in 9M06).

Free cash flow increased to Euro 915 million in 9M07 from Euro 450 million in 9M06, primarily as a result of: (1) the increase in net disposal of financial investments; (2) lower interest paid, and (3) lower contributions and payments related to post retirement benefits, as a result of the Euro 83 million reimbursement made in 9M07 by PT Prestações, the fund created to cover healthcare responsibilities, on account of healthcare expenses paid by PT in 2007 and in previous years. These effects were partially offset by higher income taxes paid, which increased since PT's tax losses carried forward were fully used in 2006.

Net disposals of financial investments in 9M07 included primarily the disposal of the investment in the shares of BES (Euro 110 million), the cash settlement of the PTM equity swap (Euro 94 million) and the proceeds from the disposal of a 22% stake in Africatel (Euro 117 million). In 9M06, net acquisitions of financial investments included mainly the acquisition of 34% stake in MTC (Euro 108 million) and PT's share in the capital increase of BES (Euro 19 million).

The reduction in interest paid from Euro 299 million in 9M06 to Euro 214 million in 9M07 is explained mainly by the fact that PT paid in 9M06 the last annual interest installment (Euro 52 million) of the Eurobond repaid in 2006 and by the decrease in Vivo's interest payments following the debt restructuring undertaken in 2006.

Consolidated Net Debt

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Consolidated net debt amounted to Euro 4,332 million as at 30 September 2007, as compared to Euro 3,757 million as at 31 December 2006. The increase in net debt over the period is explained primarily by the share buyback, currently under execution, and the dividends paid in May 2007.

As at 30 September 2007, 82.2% of total debt was medium and long-term, and 69.5% of total debt was set in fixed rates. As at 30 September 2007, 85.9% of total debt was denominated in Euros, 0.2% in US Dollars and 13.6% in Brazilian Reais. The 50% share of Vivo's net debt, proportionally consolidated by PT,

amounted to Euro 438 million as at 30 September 2007. At the end of September 2007, approximately 96% of Vivo's net debt was either Real-denominated or hedged into Reais.

(1) In 9M07, this item included dividends paid by PT (Euro 517 million) and its subsidiaries. (2) In 9M07, PT contracted equity swaps over 103 million own shares under the share buyback programme currently being executed. (3) In 9M06, this item included Euro 27 million related to the price reset of the equity swap contracts over PTM shares.

The total undrawn amount of PT's commercial paper lines and standby facilities stood at Euro 1,340 million as at 30 September 2007. The amount of available cash from the domestic operations plus the undrawn amount of PT's commercial paper lines and standby facilities totalled Euro 2,336 million at the end of September 2007.

In 9M07, PT's average cost of debt and maturity was 4.9% and 6.9 years respectively, including loans obtained in Brazil and denominated in Reais. Excluding Brazil and the interest cost associated with the PTM equity swap (settled in 2Q07), PT's average cost of debt was 3.5% in 9M07. The debt maturity excluding Brazil was 7.0 years at the end of September 2007. In 9M07, the net debt to EBITDA ratio was 1.9 times and EBITDA cover was 11.8 times. Considering the after-tax unfunded post retirement obligations, the adjusted net debt to EBITDA ratio decreased to 2.3 times in 9M07 from 2.7 times in 9M06.

In July 2007, PT successfully issued a Euro 750 million exchangeable bond with a maturity of 7 years. The coupon was fixed at 4.125% and the exchange price at Euro 13.9859, which was adjusted to Euro 11.60 following the spin-off of PT's interest in PT Multimedia.

Post Retirement Benefit Obligations

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

As at 30 September 2007, the projected benefit obligations (PBO) of PT's post retirement benefits amounted to Euro 4,305 million. PT's post-retirement benefit plans have been closed to new participants since 1994 for pensions and 2000 for healthcare.

Gross unfunded obligations decreased by Euro 407 million in 9M07 to Euro 1,247 million, as a result of the net actuarial gains booked in the period (Euro 322 million) and the Euro 117 million extraordinary contribution made in 9M07, notwithstanding the Euro 142 million curtailment charge. As part of the semi-annual actuarial study, the discount rates used to calculate the PBO were adjusted to reflect the evolution of

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

market yields. As such, the discount rate used for pensions and healthcare obligations was increased from 4.75% to 5.25% and the discount rate used for salaries from 4.25% to 4.75%. The after-tax unfunded obligations amounted to Euro 917 million at the end of September 2007.

In 1H07, PT recorded prior years service gains of Euro 42 million following the introduction of changes to the Social Security rules (DL 187/2007) and adjustments to the growth rate used to calculate pension complements introduced by PT. These prior years services gains included Euro 36 million related to vested rights (recorded directly in the income statement) and Euro 6 million related to unvested rights (deferred and amortised over the average working life of active employees). In addition, recent changes introduced by the Portuguese Government to the Social Security rules (Law 52/2007) are estimated to have a positive impact of approximately Euro 80-90 million on PT's PBO, which will be recorded following the completion of the next actuarial study at the end 4Q07.

(1) In 9M07, the PRB cost recorded in the income statement amounted to a gain of Euro 8.4 million, including a gain of Euro 1.6 million related to the amortisation of prior years service gains on unvested rights. (2) In 9M07, this item included: (i) Euro 33 million of regular contributions; (ii) Euro 124 million of payments of salaries to pre-retired and suspended employees and other; (iii) Euro 5 million related to upfront payments of certain redundancies; (iv) Euro 65 million of net reimbursements related to healthcare benefits, and (v) Euro 117 million related to an extraordinary contribution to the pension funds.

As set out below, post retirement benefit costs were Euro 8 million negative (gain) in 9M07, mainly as a result of the prior years service gains of Euro 36 million recorded in the period. The decrease in service cost in 9M07 is explained primarily by the reduction in healthcare obligations that occurred at the end of 2006, while the Euro 18 million decrease in net interest cost is explained by the narrowing of the unfunded gap.

(1) This item is primarily related to the changes in the Euro/Real exchange rate. (2) In 9M07, PT contracted equity swaps over 103 million own shares under the share buyback programme currently being executed. (3) In 9M07, this item includes Euro 36 million corresponding to the offset of the gain obtained on the disposal of the investment in the shares of Banco Espírito Santo recorded in the income statement in 2Q07. (4) This item includes primarily Euro 28 million related to price resets on existing equity swap contracts on own shares.

As at 30 September 2007, shareholders equity excluding minority interests amounted to Euro 1,794 million, a decrease of Euro 462 million in 9M07. Distributable reserves decreased by Euro 550 million to Euro 2,178 million at the end of September of 2007, with the impact of the share capital restructuring (Euro 440 million), as approved by shareholders on 27 April 2007, and the net income generated in 9M07 under Portuguese GAAP (Euro 577 million) being more than offset by the acquisition of treasury shares in 3Q07 (Euro 1,050 million) and the dividends paid in 2Q07 (Euro 517 million).

As at 13 November 2007, PT had a total of 123.7 million own shares, held through treasury stock and equity swap contracts, in the amount of Euro 1,265 million.

(1) In 3Q07, PT acquired 103 million own shares for a total amount of Euro 1,050 million, through the exercise of the physical settlement option of equity swaps contracted under the share buyback programme currently being executed.

Adjusting for the PTM spin-off, distributable reserves at the end of September 2007 would have amounted to Euro 1,807 million.

Consolidated Balance Sheet

As at 30 September 2007, the net exposure (assets minus liabilities) to Brazil amounted to R\$ 7,534 million (Euro 2,884 million at the Euro/Real exchange rate of 30 September 2007). The assets denominated in Brazilian Reais in the balance sheet, as at 30 September 2007, amounted to Euro 5,209 million, equivalent to approximately 38% of total assets.

Following the approval of the PT Multimedia spin-off by PT shareholders at the AGM of 27 April 2007, PTM was considered as a discontinued operation for reporting purposes. The book value of PT Multimedia, under IFRS, in PT's accounts (assets minus liabilities minus attributable minority interests) amounted to Euro 400 million as at 30 September 2007.

Operating Review

Wireline

Wireline operating revenues decreased by 5.7% y.o.y in 3Q07 to Euro 484 million, with the reduction in retail revenues more than offsetting the increase in wholesale and data & corporate revenues in the quarter.

(1) Includes intragroup transactions. (2) EBITDA = income from operations + depreciation and amortisation. (3) Adjusts for prior years service gains related to vested rights in the amount of Euro 36 million in 9M07 and Euro 15 million in 9M06. (4) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + net other costs.

Retail revenues fell by 12.7% y.o.y in 3Q07 on the back of continued competition from other fixed operators as well as increasing competition from mobile operators, both in voice and broadband. Voice revenues decreased by 14.7% y.o.y in 3Q07, as a result of line loss and increasing pricing pressure, particularly in ULL areas. Data revenues decreased by 1.9% y.o.y as the growth in ADSL retail customers was not sufficient to offset increasing pricing pressure in broadband, from both fixed and mobile operators.

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Wholesale revenues increased by 6.5% y.o.y in 3Q07, primarily as a result of the growth in unbundled local loop (ULL) and wholesale line rental (WLR).

Data & corporate revenues increased by 4.8% in 3Q07, as a result of continued focus on providing to corporate customers increasingly more advanced and customised solutions combining telecoms and IT. The growth in the quarter was underpinned by the increase in revenues from VPN and circuits.

Other revenues decreased by 6.7% y.o.y in 3Q07, with the decrease in equipment sales and in directories more than offsetting the growth in portal revenues (+51.8% y.o.y).

EBITDA amounted to Euro 220 million in 3Q07, with the margin remaining broadly flat at 45.4%. The reduction in EBITDA is explained by the decrease in top line, notwithstanding the reduction in personnel related costs. In effect, wages and salaries decreased by 10% y.o.y, as a result of the ongoing curtailment programme and wage increase moderation, while PRB costs fell by 54.1% on the back of the reduction in post retirement benefits and the narrowing of the pension deficit. The net reduction in headcount in 3Q07 reached 140 employees (342 employees in 9M07), improving the efficiency ratio to 632 lines per employee.

Capex remained flat at Euro 61 million in 3Q07, equivalent to 12.6% of operating revenues. Capex was directed mainly towards: (1) network upgrades to provide greater bandwidth to customers; (2) network capacity and information systems to provide IPTV services (soft launch in 2Q07), and (3) client-related capex as a result of investments in terminal equipment for corporate clients. EBITDA minus Capex amounted to Euro 159 million in 3Q07.

ADSL retail accesses increased by 12.6% y.o.y in 3Q07 to 741 thousand, with net additions in the period reaching 26 thousand, driven by the summer campaign. Voice lines fell by 10.5% y.o.y to 3,073 thousand. This decrease is explained by the net disconnection of 40 thousand traffic-generating lines, which is in line with the trend of the past four quarters, and the net disconnection of 34 thousand carrier press-selection lines. In terms of competitors' lines, voice-only lines (carrier pre-selection + wholesale line rental) decreased by 35 thousand in 3Q07, while ULL net additions fell by 15.9% y.o.y to 22 thousand in 3Q07. The growing presence of GSM-based fixed offers and wireless broadband has contributed further to fixed-mobile migration. The increase in voice net additions of cable competitors, on the back of triple-play offers, also contributed to the reduction in fixed lines in the period.

As part of the strategy to improve line retention and provide better value-for-money to its customers, PT has developed an extensive offer of flat-rate pricing plans. This has resulted to a large extent in a stabilisation of retail MOU. Currently, 51% of PT's residential customers have a flat-rate pricing plan.

In terms of triple-play services, PT launched its IPTV-based offer at the end of June 2007. At the end of 3Q07, PT had added a total of 6 thousand IPTV customers. The triple-play offer includes 42 pay-TV channels (of which 10 are a la carte), a broadband access of up to 8MB and unlimited fixed-to-fixed calls. Additionally, customers can buy premium services, such as SportTV (premium sports), premium movie channels and VOD services. The service is provided using ADSL 2+ and is available for up to two televisions per home. PT was the first operator in Portugal to introduce HDTV and has the most extensive VOD offer in the market.

Blended ARPU increased by 0.6% y.o.y in 3Q07 to Euro 30.4, driven by the growth in data ARPU, which increased by 14.7% y.o.y. The increased penetration of ADSL and the growth in IP-based services, including corporate VoIP, more than offset the reduction in voice and broadband ARPU.

Although retail traffic fell by 5.0% y.o.y. in 3Q07, as a result of line loss, retail MOU increased by 1.2% y.o.y in the period to 155 minutes, reflecting the positive impact of the rollout of flat-rate pricing plans. The 7.5% y.o.y reduction in wholesale traffic in 3Q07 is explained primarily by the 59.7% y.o.y decrease in dial-up Internet traffic, as a result of the continued migration to broadband.

Domestic Mobile

Operating revenues increased by 1.6% y.o.y in 3Q07 to Euro 402 million, supported by the growth of service revenues (+2.6% y.o.y) and despite lower equipment sales. Billing revenues increased by 2.4% y.o.y to Euro 301 million on the back of customer growth, particularly in postpaid and wireless broadband. The impact of lower mobile termination rates (MTR) amounted to Euro 2.5 million in 3Q07 and represented an average reduction of 4.3% y.o.y. Excluding this impact, service revenues would have increased by 3.3% y.o.y in 3Q07.

Mobile termination rates currently stand at Euro 11 cents per minute, following the reduction that took place at the beginning of October 2006. The telecom regulator has recently posted for public consultation the MTR schedule for 2008, which proposes a reduction to Euro 8 cents per minute on 1 January 2008, followed by quarterly cuts of Euro 0.5 cents until reaching Euro 6.5 cents per minute on 1 October 2008. The regulator has also indicated that it wishes to reintroduce asymmetry in fixed-to-mobile rates, after having eliminated it in 2005, and in mobile-to-mobile rates and, in line with other European markets, maintain a flat 20% premium for the third operator, subject to a review at the end of 2008. All operators have up to 30 working days to respond to this public consultation.

(1) Includes intragroup transactions. (2) EBITDA = income from operations + depreciation and amortisation. (3) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + net other costs.

EBITDA increased by 4.5% y.o.y to Euro 182 million in 3Q07, notwithstanding significantly higher commercial activity. The negative impact of MTR cuts amounted to Euro 1.2 million in 3Q07. Excluding this impact, EBITDA would have increased by 5.2% y.o.y in 3Q07. In spite of the increase in commercial activity, mainly focused on prepaid to postpaid migration and wireless broadband, the reduction in unitary SARC (-16.9% y.o.y) and the continued focus on reducing addressable costs resulted in an EBITDA margin improvement of 1.3pp y.o.y in 3Q07 to 45.2%.

Capex decreased by 7.2% y.o.y to Euro 40 million in 3Q07, equivalent to 10.0% of operating revenues. Capex was directed primarily towards network capacity, as a result of increased voice and data usage, and 3G/3.5G coverage (approximately 74% of network capex). EBITDA minus Capex increased by 8.4% y.o.y in 3Q07 to Euro 141 million and was equivalent to 35.1% of operating revenues.

Total customers increased by 9.3% y.o.y to 6,004 thousand, with net additions in 3Q07, including the initial take-up of the PC / data product targeted at teachers, students and professionals, reaching 190 thousand (+45.4% y.o.y) as a result of the successful summer campaign both for voice and data offers. In early October, TMN celebrated the 6 million customer mark, thus consolidating its leadership position in the market. TMN continued to focus on postpaid, particularly on the corporate segment and on prepaid to postpaid migration. As a result, more than half of net additions in the period were postpaid, which accounted for 22% of total customers at the end of 3Q07.

In 3Q07, TMN continued to focus on having a balanced and broad handset portfolio, with an important component of exclusive handsets, which allows for greater pricing flexibility and thus better control of SARC. For the summer campaign, TMN offered 25 new handsets, of which 19 were exclusive.

In terms of new services, internetnotelemovel, which was the first flat-rate offer for Internet and email access on mobile handsets launched in Portugal, has already approximately 100 thousand users. TMN's priority of continuing to grow the wireless broadband market was also patent in the e-escolas programme, a part of the Government's Plano Tecnológico initiative, which aims to provide laptop computers with wireless broadband connectivity, at certain discounts, to schools, teachers, students and info-excluded individuals. This project is being developed as part of TMN's commitment to the development of the information society, as per the UMTS licence terms.

With regard to the brand, TMN has been increasingly differentiating the way it addresses specific segments of the market, while reinforcing TMN's overall brand value. As part of this strategy, TMN sponsored several youth-related events, such as surfing meets, contests for new bands (garage sessions), and the most successful summer music festival in Portugal, with the view of strengthening the brand positioning in this key youth segment.

ARPU increased by 4.8% sequentially in 3Q07 to Euro 20.6, while decreasing by 5.8% y.o.y, as a result of lower interconnection and roaming prices, the increasing penetration in lower segments of the market and the growing number of users with multiple SIM cards. Nevertheless, the growth in the average customer base more than offset the dilution in ARPU, allowing service revenues to grow by 2.6% y.o.y in 3Q07. Roamers ARPU decreased by 25.9% y.o.y as a result of the adjustments TMN has been making to its roaming pricing plans, following EU-imposed changes to wholesale roaming prices, which came into effect as of 1 September 2007. Blended MOU increased by 1.6% y.o.y in 3Q07, underpinned by the strong growth in outgoing voice MOU, which increased by 3.9% y.o.y.

Data services continued to contribute strongly to top line growth, with data revenues having increased by 23.5% in 3Q07 and already accounting for 15.8% of service revenues at the end of the period, which compares favourably with 13.2% last year. The increase in data service revenues is primarily based on non-SMS data revenues, which almost doubled on an annual basis and already accounted for 36.3% of total data revenues in 3Q07. This growth in non-SMS data was driven by a strong performance in terms of mobile Internet and wireless broadband. Data usage, measured in kilobytes, increased by more than 6 times in 3Q07 when compared to last year. The number of SMS in 3Q07 reached approximately 188 messages per month per active SMS user. The number of active SMS users reached 46% of total customers at the end of the period.

Brazilian Mobile

Vivo's operating revenues, as stated in Brazilian Reais and in accordance with IFRS, increased by 11.2% y.o.y in 3Q07 to R\$ 3,410 million, primarily as a result of the strong growth in service revenues (+13.6% y.o.y), which was underpinned by the growth in customers and in ARPU. Equipment sales increased by 14.1% y.o.y in 3Q07 to R\$ 455 million as a result of increased commercial activity.

EBITDA increased by 8.4% y.o.y to R\$ 824 million in 3Q07, reflecting the strong underlying performance in terms of top line. Against a backdrop of substantially higher commercial activity (gross additions increasing by 30% y.o.y), total subscriber acquisition and retention costs increased by 23.6% y.o.y in 3Q07. However, the measures implemented over the past year and a half to control bad debt resulted in a significant reduction in bad debt provisions, which offset higher commercial costs. In effect, provisions for bad debt fell by 45.6% y.o.y in 3Q07, equivalent to 1.7% of gross revenues. EBITDA margin in 3Q07 remained broadly flat over the previous year at 24.2%.

(1) Information prepared in accordance with IFRS. (2) EBITDA = income from operations + depreciation and amortisation. (3) Adjusts for the one-off provision related to bad debt booked in 2Q06 in the amount of R\$ 162 million. (4) Income from operations = income before financials and income taxes + curtailment costs + losses (gains) on disposal of fixed assets + net other costs.

Capex decreased by 17.1% y.o.y to R\$ 369 million in 3Q07, equivalent to 10.8% of operating revenues. Capex in 3Q07 was directed towards: (1) the implementation of the GSM/EDGE overlay, and (2) network coverage and quality. The GSM/EDGE network overlay was implemented in record time and already covers 99% of the municipalities with CDMA coverage. Approximately 90% of the capex related to the initial GSM/EDGE rollout, as announced in July 2006, has been already invested.

On 2 August, Vivo reached an agreement to acquire Telemig Celular and Amazonia Celular. Anatel has already approved the acquisition of Telemig Celular and is currently reviewing the acquisition of Amazonia Celular. Additionally, on 25 September, Vivo acquired 1.9 GHz frequencies in all of the regions where it did not operate, in particular in the Northeast states. Vivo has thus achieved full nationwide coverage in Brazil, which has been a long-standing objective of the company and should consolidate its leadership position in the mobile market.

(1) Operating data calculated using Brazilian GAAP. (2) Includes the database adjustment undertaken in 2Q06 of 1,823 thousand customers.

Vivo's customer base increased by 9.0% y.o.y to 31,320 thousand, with net additions reaching 1,080 thousand in 3Q07 on the back of significantly higher commercial activity when compared with the same period of last year. Gross additions in the quarter increased by 30% y.o.y and were centred on the Father's Day campaign. GSM accounted for approximately 77% of total gross additions in 3Q07, bringing the total number of GSM customers to 6.8 million at the end of 3Q07, equivalent to 22% of total customers. As part of the continued focus on improving customer satisfaction and usage, Vivo launched a set of postpaid plans, called Vivo Escolha, in 3Q06. After one year of introducing the new family of plans, approximately 63% of the postpaid customer base (excluding corporates) has already moved to a Vivo Escolha plan. Vivo's focus on providing the best network quality and the best service offering has been resulting in improved customer satisfaction levels, as evidenced by recent consumer surveys.

Vivo's blended MOU remained flat in 3Q07 at 77 minutes, with the increase in outgoing MOU (+7.7% y.o.y) offsetting the reduction in incoming MOU. The success of the prepaid and recently introduced postpaid plans underpinned the performance of outgoing MOU.

Vivo's blended ARPU reached R\$ 30.8 in 3Q07, an increase of 7.4% y.o.y, driven by the strong growth in customer ARPU, which increased by 11.8% y.o.y on account of increased usage and higher penetration of data services.

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

The take-up of data services continued to contribute towards ARPU growth, with data revenues increasing by 38.5% y.o.y in 3Q07. Data as a percentage of total service revenues increased by 1.4pp to 7.7% in 3Q07. In terms of data services, Vivo has leveraged on being the only operator using two technologies, positioning

CDMA/EVDO as the best solution for mobile data. As a result, Vivo has continued to experience strong growth in its WAP and ZAP (EVDO data cards) offers. Recently it introduced innovative services such as Vivo Play (downloads and video streaming) and Vivo Flash (residential wireless broadband access for desktops).

Médi Télécom revenues increased by 4.4% y.o.y in 9M07 to MAD 3,703 million, while EBITDA increased by 2.1% y.o.y to MAD 1,638 million, reflecting the growth of commercial expenses due to increased competition in the market with the entry of a third operator. The mobile customer base increased by 53.2% y.o.y to 6,524 thousand, with net additions in 9M07 totalling 1,351 thousand, driven by the sale of SIM-only packages. MOU decreased by 5.9% y.o.y in 9M07 to 49 minutes. ARPU totalled MAD 72 in 9M07, a decrease of 22.9% over the same period of last year, mainly due to the significant growth of the customer base.

Unitel's revenues and EBITDA increased by 36.4% and 23.1% y.o.y respectively in 9M07, underpinned by strong customer growth, both in Luanda and in the main districts of the country. EBITDA margin reached 61.1% in 9M07. Net additions totalled 753 thousand in 9M07, with the total customer base reaching 2,802 thousand at the end of September 2007, an increase of 64.8% over the same period of last year. Unitel's MOU decreased by 9.4% y.o.y in 9M07 to 117 minutes, due to the strong increase in the customer base. ARPU totalled USD 27 in 9M07, a decrease of 19.8% over the same period of last year, as a result of the strong growth in the customer base.

MTC's revenues and EBITDA increased by 19.3% and 1.2% y.o.y respectively in 9M07. The reduction in EBITDA margin to 51.6% is explained by the increase in subscriber acquisition costs, due to higher commercial activity particularly in postpaid, higher leased line costs related to network rollout and higher personnel costs. Net additions totalled 134 thousand in 9M07, with total customers reaching 744 thousand at the end of September 2007, an increase of 33.9% over the same period of last year. Postpaid customers increased by 38.4% y.o.y, representing 9% of total customer base. ARPU totalled NAD 137 in 9M07, a decrease of 14.0% y.o.y, primarily as a result of the growth in the customer base in the period.

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

CVT's revenues and EBITDA increased by 6.3% and 8.1% y.o.y respectively in 9M07, mainly due to the strong growth in mobile customers, which increased by 37.3% y.o.y to 134 thousand customers. Mobile MOU reached 90 minutes, an increase of 14% y.o.y in 9M07. Mobile ARPU in 9M07 was CVE 2.765, a decrease of 10.4% y.o.y. EBITDA Margin was 62.8%.

CTM's revenues increased by 4.9% y.o.y to MOP 1,637 million in 9M07, as a result of the increase in the number of mobile and broadband customers. EBITDA improved by 16.7% y.o.y to MOP 686 million in 9M07. In the mobile division, customers increased by 14.6% y.o.y to 331 thousand at the end of September 2007. CTM's mobile ARPU decreased by 17.6% y.o.y to MOP 215 in 9M07, as a result of the growth in the customer base.

CST's revenues increased by 10.6% y.o.y to STD 112.175 million in 9M07, with EBITDA growing by 9.6% y.o.y to STD 38.409 million. In the mobile division, CST added 7 thousand customers in 9M07, bringing the total number of customers to 25 thousand at the end of September 2007, an increase of 44.1% y.o.y. Mobile MOU decreased by 26% y.o.y in 9M07, reaching 61 minutes, as a result of the growth in the customer base. Mobile ARPU was STD 292 thousand in 9M07, a decrease of 25.8% over the same period of last year.

Timor Telecom's revenues and EBITDA increased by 36.7% and 46.5% y.o.y respectively, mainly as a result of the strong increase in the number of mobile customers. Timor Telecom had net additions of 18 thousand increasing the total customer base to 68 thousand at the end of September 2007, an increase of 60.9% y.o.y. Mobile MOU decreased by 1.8% y.o.y to 102 minutes. Mobile ARPU was USD 33 in 9M07, a decrease of 7.9% over the same period of last year.

Subsequent Events

Completion of the PT Multimédia Spin-off

7 November 2007 _ PT announced that the spin-off of PTM was concluded with the distribution to its shareholders of its interest in PTM. Each shareholder was allotted 0.176067 PTM shares for each PT share held, subject to the effects of the withholding tax and fractional share payments, with a total of 154.9 million shares being transferred to the shareholders' accounts, representing 50.1% of the share capital and voting rights in PTM. As a result of the application of the withholding tax and the fractional shares mechanisms, PT retained an interest of 8.3% of PTM's share capital, corresponding to 25.7 million shares. For additional information please refer to the press releases published on 12 and 30 October 2007, as well on 6 and 7 November 2007.

13 November 2007 _ Following the sale of the PT Multimedia shares, retained through the application of the withholding tax and the fractional shares mechanisms in connection with the spin-off process, PT no longer holds PTM shares in its balance sheet. The buyers of such PTM shares have agreed to a 6-month lock-up period, as per US legal requirements.
