

3M CO
Form 10-K
February 15, 2008

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

x ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2007

Commission file number 1-3285

3M COMPANY

State of Incorporation: **Delaware**

I.R.S. Employer Identification No. **41-0417775**

Principal executive offices: **3M Center, St. Paul, Minnesota 55144**
Telephone number: **(651) 733-1110**

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of each class	Name of each exchange on which registered
Common Stock, Par Value \$.01 Per Share	New York Stock Exchange, Inc. Chicago Stock Exchange, Inc.

Note: The common stock of the Registrant is also traded on the SWX Swiss Exchange.

Securities registered pursuant to section 12(g) of the Act: None

Edgar Filing: 3M CO - Form 10-K

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes . No ..

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes . No .

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes . No .

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes . No ..

The aggregate market value of voting stock held by nonaffiliates of the Registrant, computed by reference to the closing price and shares outstanding, was approximately \$56.4 billion as of January 31, 2008 (approximately \$62.1 billion as of June 30, 2007, the last business day of the Registrant's most recently completed second quarter).

Shares of common stock outstanding at January 31, 2008: 707,662,632.

DOCUMENTS INCORPORATED BY REFERENCE

Parts of the Company's definitive proxy statement (to be filed pursuant to Regulation 14A within 120 days after Registrant's fiscal year-end of December 31, 2007) for its annual meeting to be held on May 13, 2008, are incorporated by reference in this Form 10-K in response to Part III, Items 10, 11, 12, 13 and 14.

This document (excluding exhibits) contains 92 pages.

The table of contents is set forth on page 2. The exhibit index begins on page 90.

3M COMPANY

ANNUAL REPORT ON FORM 10-K

For the Year Ended December 31, 2007

PART I

Item 1. Business.

3M Company, formerly known as Minnesota Mining and Manufacturing Company, was incorporated in 1929 under the laws of the State of Delaware to continue operations begun in 1902. The Company's ticker symbol is MMM. As used herein, the term "3M" or "Company" includes 3M Company and its subsidiaries unless the context indicates otherwise. In addition, for any references to Note 1 through Note 18, refer to the Notes to Consolidated Financial Statements in Item 8 of this document.

Available Information

The SEC maintains a website that contains reports, proxy and information statements, and other information regarding issuers, including the Company, that file electronically with the SEC. The public can obtain any documents that the Company files with the SEC at <http://www.sec.gov>. The Company files annual reports, quarterly reports, proxy statements and other documents with the Securities and Exchange Commission (SEC) under the Securities Exchange Act of 1934 (Exchange Act). The public may read and copy any materials that the Company files with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330.

3M also makes available free of charge through its website (<http://investor.3M.com>) the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and, if applicable, amendments to those reports filed or furnished pursuant to the Exchange Act as soon as reasonably practicable after the Company electronically files such material with, or furnishes it to, the SEC.

General

3M is a diversified technology company with a global presence in the following businesses: industrial and transportation; health care; display and graphics; consumer and office; safety, security and protection services; and electro and communications. 3M is among the leading manufacturers of products for many of the markets it serves. Most 3M products involve expertise in product development, manufacturing and marketing, and are subject to competition from products manufactured and sold by other technologically oriented companies.

At December 31, 2007, the Company employed 76,239 people, with 34,138 employed in the United States and 42,101 employed internationally.

Business Segments

As discussed in Note 16 to the Consolidated Financial Statements, effective in the first quarter of 2007, 3M made certain product moves between its business segments in its continuing effort to drive growth by aligning businesses around markets and customers. Segment information presented herein reflects the impact of these changes for all periods presented.

3M continues to manage its operations in six operating business segments: Industrial and Transportation; Health Care; Display and Graphics; Consumer and Office; Safety, Security and Protection Services; and Electro and Communications. 3M's six business segments bring together common or related 3M technologies, enhancing the development of innovative products and services and providing for efficient sharing of business resources. These segments have worldwide responsibility for virtually all 3M product lines. Certain small businesses and lab-sponsored products, as well as various corporate assets and expenses, are not allocated to the business segments. Financial information and other disclosures relating to 3M's business segments and operations in major geographic areas are provided in the Notes to Consolidated Financial Statements.

Industrial and Transportation Business: The Industrial and Transportation Business segment serves a broad range of markets, such as appliance, paper and packaging, food and beverage, and automotive. Industrial and Transportation products include tapes, a wide variety of coated and nonwoven abrasives, adhesives, specialty materials, closures for disposable diapers, and components and products that are used in the manufacture, repair, and maintenance of automotive, marine, aircraft and specialty vehicles. The August 2005 acquisition of CUNO, Incorporated (CUNO) added a comprehensive line of filtration products for the separation, clarification and purification of fluids and gases.

Major industrial products include vinyl, polyester, foil and specialty industrial tapes and adhesives; Scotch® Masking Tape, Scotch® Filament Tape and Scotch® Packaging Tape; packaging equipment; 3M VHB Bonding Tapes; conductive, low surface energy, hot melt, spray and structural adhesives; reclosable fasteners; label materials for durable

goods; and coated, nonwoven and microstructured surface finishing and grinding abrasives for the industrial market. Other products include a comprehensive line of filtration products for the separation, clarification and purification of fluids and gases; fluoroelastomers for seals, tubes and gaskets in engines; engineering fluids; and closures for disposable diapers.

Major transportation products include insulation components, including components for catalytic converters; functional and decorative graphics; abrasion-resistant films; masking tapes; fasteners and tapes for attaching nameplates, trim, moldings, interior panels and carpeting; coated, nonwoven and microstructured finishing and grinding abrasives; structural adhesives; and other specialty materials. In addition, 3M provides paint finishing and detailing products, including a complete system of cleaners, dressings, polishes, waxes and other products.

Health Care Business: The Health Care segment serves markets that include medical, clinics and hospitals, pharmaceuticals, dental and orthodontic practitioners, and health information systems. Products and services provided to these and other markets include medical and surgical supplies, skin health and infection prevention products, drug delivery systems, dental and orthodontic products, health information systems and microbiology products. As discussed in Note 2, the global branded pharmaceuticals business was sold in December 2006 and January 2007.

In the medical and surgical areas, 3M is a supplier of medical tapes, dressings, wound closure products, orthopedic casting materials, electrodes and stethoscopes. In infection prevention, 3M markets a variety of surgical drapes, masks and preps, as well as sterilization assurance equipment. Other products include drug delivery systems, such as metered-dose inhalers, transdermal skin patches and related components. Dental and orthodontic products include restoratives, adhesives, finishing and polishing products, crowns, impression materials, preventive sealants, professional tooth whiteners, prophylaxis and orthodontic appliances. In health information systems, 3M develops and markets computer software for hospital coding and data classification, as well as providing related consulting services. 3M provides microbiology products that make it faster and easier for food processors to test the microbiological quality of food.

Display and Graphics Business: The Display and Graphics segment serves markets that include electronic display, touch screen, traffic safety and commercial graphics. This segment includes optical film and lens solutions for electronic displays; touch screens and touch monitors; computer screen filters; reflective sheeting for transportation safety; and commercial graphics systems.

The optical film business provides films that serve numerous market segments of the electronic display industry. 3M provides distinct products for five market segments, including products for: 1) LCD computer monitors, 2) LCD televisions, 3) hand-held devices such as cellular phones, 4) notebook PCs and 5) automotive displays. Other optical products include lens systems for projection televisions, in addition to desktop and notebook computer screen filters that address needs for light control, privacy viewing and glare reduction. The touch systems business includes touch screens and touch monitors. In traffic safety systems, 3M provides reflective sheetings used on highway signs, vehicle license plates, construction work-zone devices, trucks and other vehicles, and also provides pavement marking systems. Major commercial graphics products include films, inks, digital signage systems and related products used to produce graphics for vehicles and signs.

Consumer and Office Business: The Consumer and Office segment serves markets that include consumer retail, office retail, home improvement, building maintenance and other markets. Products in this segment include office supply products, stationery products, construction and home improvement products, home care products, protective material products and consumer health care products.

Edgar Filing: 3M CO - Form 10-K

Major consumer and office products include Scotch® brand products, such as Scotch® Magic™ Tape, Scotch® Glue Stick and Scotch® Cushioned Mailer; Post-it® Products, such as Post-it® Flags, Post-it® Note Pads, Post-it® Labeling & Cover-up Tape, and Post-it® Pop-up Notes and Dispensers; construction and home improvement products, including surface-preparation and wood-finishing materials, Command Adhesive Products and Filtrete™ Filters for furnaces and air conditioners; home care products, including Scotch-Brite® Scour Pads, Scotch-Brite® Scrub Sponges, Scotch-Brite™ Microfiber Cloth products, O-Cel-O™ Sponges and Scotchgard™ Fabric Protectors; protective material products, certain maintenance-free respirators, and Nexcare™ Adhesive Bandages.

Safety, Security and Protection Services Business: The Safety, Security and Protection Services segment serves a broad range of markets that increase the safety, security and productivity of workers, facilities and systems. Major product offerings include personal protection products, safety and security products, energy control products, cleaning and protection products for commercial establishments, roofing granules for asphalt shingles, and supply chain execution software solutions. In August 2006, 3M completed the acquisition of Security Printing and Systems Limited, a producer of finished, personalized passports and secure cards, which expanded the 3M product line related to border and civil security solutions. 3M's new emerging business opportunity in its Track and Trace initiative within 3M's Safety, Security and Protection Services segment resulted in the merging of a number of formerly separate efforts into one concerted effort for

future growth. Track and Trace has a growing array of applications from tracking packages to managing medical and legal records.

This segment's products include certain maintenance-free and reusable respirators, personal protective equipment, electronic surveillance products, films that protect against counterfeiting, and reflective materials that are widely used on apparel, footwear and accessories, enhancing visibility in low-light situations. Other products include theft protection systems for libraries and library patron self-checkout systems; spill-control sorbents; Thinsulate Insulation and Thinsulate Lite Loft Insulation; 3M Scotchtint Window Film for buildings; 3M Ultra Safety and Security Window Film for property and personal protection during destructive weather conditions; nonwoven abrasive materials for floor maintenance and commercial cleaning; floor matting; natural and color-coated mineral granules for asphalt shingles; and supply chain execution software solutions.

Electro and Communications Business: The Electro and Communications segment serves the electrical, electronics and communications industries, including electrical utilities; electrical construction, maintenance and repair; original equipment manufacturer (OEM) electrical and electronics; computers and peripherals; consumer electronics; telecommunications central office, outside plant and enterprise; as well as aerospace, military, automotive and medical markets; with products that enable the efficient transmission of electrical power and speed the delivery of information and ideas. Products include electronic and interconnect solutions, microinterconnect systems, high-performance fluids, high-temperature and display tapes, telecommunications products, electrical products, and visual systems products.

Major electronic and electrical products include packaging and interconnection devices; high-performance fluids used in the manufacture of computer chips, and for cooling electronics and lubricating computer hard disk drives; high-temperature and display tapes; insulating materials, including pressure-sensitive tapes and resins; and related items. 3M Flexible Circuits use electronic packaging and interconnection technology, providing more connections in less space, and are used in ink-jet print cartridges, cell phones and electronic devices. This segment serves the world's telecommunications companies with a wide array of products for fiber-optic and copper-based telecommunications systems for rapid deployment in fixed and wireless networks. The 3M Aluminum Conductor Composite Reinforced (ACCR) electrical power cable, with an aluminum-based metal matrix at its core, increases transmission capacity for existing power lines. Visual communication products serve the world's office and education markets with overhead projectors and transparency films, as well as equipment and materials for electronic and multimedia presentations.

Distribution

3M products are sold through numerous distribution channels, including directly to users and through numerous wholesalers, retailers, jobbers, distributors and dealers in a wide variety of trades in many countries around the world. Management believes the confidence of wholesalers, retailers, jobbers, distributors and dealers in 3M and its products—a confidence developed through long association with skilled marketing and sales representatives—has contributed significantly to 3M's position in the marketplace and to its growth. 3M has 157 sales offices worldwide, with nine in the United States and 148 internationally.

Research and Patents

Research and product development constitutes an important part of 3M's activities and has been a major driver of 3M's sales growth. Research, development and related expenses totaled \$1.368 billion in 2007, \$1.522 billion in 2006 and \$1.274 billion in 2005. The global branded pharmaceuticals business, which was divested in December 2006 and January 2007, incurred research, development and related expenses of approximately \$120 million in 2006 and \$142 million in 2005. The 2006 amount also included a \$95 million in-process research and

Edgar Filing: 3M CO - Form 10-K

development charge (discussed in Note 2) and \$75 million in restructuring actions (Note 4). Research and development, covering basic scientific research and the application of scientific advances in the development of new and improved products and their uses, totaled \$788 million in 2007, compared to \$943 million in 2006, decreasing due to the \$95 million for purchased in-process research and development discussed above and also due to the pharmaceuticals business divestiture. Research and development expenses totaled \$818 million in 2005. Related expenses primarily include technical support provided by 3M to existing customers who are using 3M products, and the costs of internally developed patents.

The Company's products are sold around the world under various trademarks that are important to the Company. The Company also owns, or holds licenses to use, numerous U.S. and foreign patents. The Company's research and development activities generate a steady stream of inventions that are covered by new patents. Patents applicable to specific products extend for varying periods according to the date of patent application filing or patent grant and the legal term of patents in the various countries where patent protection is obtained. The actual protection afforded by a patent, which can vary from country to country, depends upon the type of patent, the scope of its coverage and the availability of legal remedies in the country.

The Company believes that its patents provide an important competitive advantage in many of its businesses. In general, no single patent or group of related patents is in itself essential to the Company as a whole or to any of the Company's

business segments. The importance of patents in the Display and Graphics segments is described in Performance by Business Segment Display and Graphics Business in Part II, Item 7.

Raw Materials

In 2007, the Company experienced cost increases affecting metals, wood pulp and oil-derived raw materials. Costs for these materials have remained high throughout the year, and 3M would expect this level to carry over into early 2008, with some moderation occurring later in the year. To date, the Company is receiving sufficient quantities of all raw materials to meet its reasonably foreseeable production requirements. It is impossible to predict future shortages of raw materials or the impact any such shortages would have. 3M has avoided disruption to its manufacturing operations through careful management of existing raw material inventories and development and qualification of additional supply sources. 3M manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts.

Environmental Law Compliance

3M's manufacturing operations are affected by national, state and local environmental laws around the world. 3M has made, and plans to continue making, necessary expenditures for compliance with applicable laws. 3M is also involved in remediation actions relating to environmental matters from past operations at certain sites (refer to Environmental and Other Liabilities and Insurance Receivables in Note 13, Commitments and Contingencies).

Environmental expenditures relating to existing conditions caused by past operations that do not contribute to current or future revenues are expensed. Reserves for liabilities for anticipated remediation costs are recorded on an undiscounted basis when they are probable and reasonably estimable, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. Environmental expenditures for capital projects that contribute to current or future operations generally are capitalized and depreciated over their estimated useful lives.

In 2007, 3M expended about \$21 million for capital projects related to protecting the environment. This amount excludes expenditures for remediation actions relating to existing matters caused by past operations. Capital expenditures for environmental purposes have included pollution control devices such as wastewater treatment plant improvements, scrubbers, containment structures, solvent recovery units and thermal oxidizers at new and existing facilities constructed or upgraded in the normal course of business. Consistent with the Company's policies stressing environmental responsibility, capital expenditures (other than for remediation projects) for known projects are presently expected to be about \$47 million over the next two years for new or expanded programs to build facilities or modify manufacturing processes to minimize waste and reduce emissions.

While the Company cannot predict with certainty the future costs of such cleanup activities, capital expenditures or operating costs for environmental compliance, the Company does not believe they will have a material effect on its capital expenditures, earnings or competitive position.

Executive Officers

Edgar Filing: 3M CO - Form 10-K

Following is a list of the executive officers of 3M, and their age, present position, the year elected to their present position and other positions they have held during the past five years. No family relationships exist among any of the executive officers named, nor is there any undisclosed arrangement or understanding pursuant to which any person was selected as an officer. This information is presented as of the date of the 10-K filing (February 15, 2008).

Name	Age	Present Position	Year Elected to Present Position	Other Positions Held During 2003-2007

-------------------	----	---	------	--

Item 1A. Risk Factors.

The most significant risk factors applicable to the Company are as follows:

** Results are impacted by the effects of, and changes in, worldwide economic conditions.* The Company operates in more than 60 countries and derives approximately 63% of its revenues from outside the United States. The Company's business may be affected by factors in the United States and other countries that are beyond its control, such as downturns in economic activity in a specific country or region, or in the various industries in which the Company operates; social, political or labor conditions in a specific country or region; or adverse changes in interest rates, tax, or regulations in the jurisdictions in which the company operates.

** The Company's results are affected by competitive conditions and customer preferences.* Demand for the Company's products, which impacts revenue and profit margins, is affected by (i) the development and timing of the introduction of competitive products; (ii) the Company's response to downward pricing to stay competitive; (iii) changes in customer order patterns, such as changes in the levels of inventory maintained by customers and the timing of customer purchases which may be affected by announced price changes, changes in the Company's incentive programs, or the customer's ability to achieve incentive goals; and (iv) changes in customers' preferences for our products, including the success of products offered by our competitors, and changes in customer designs for their products that can affect the demand for some of the Company's products.

** Foreign currency exchange rates and fluctuations in those rates may affect the Company's ability to realize projected growth rates in its sales and earnings.* Because the Company derives approximately 63% of its revenues from outside the United States, its ability to realize projected growth rates in sales and earnings could be adversely affected if the U.S. dollar strengthens significantly against foreign currencies.

** The Company's growth objectives are largely dependent on the timing and market acceptance of its new product offerings, including its ability to continually renew its pipeline of new products and to bring those products to market.* This ability may be adversely affected by difficulties or delays in product development, such as the inability to identify viable new products, obtain adequate intellectual property protection, or gain market acceptance of new products. There are no guarantees that new products will prove to be commercially successful.

** The Company's future results are subject to fluctuations in the costs and availability of purchased components, compounds, raw materials and energy, including oil and natural gas and their derivatives, due to shortages, increased demand, supply interruptions, currency exchange risks, natural disasters and other factors.* The Company depends on various components, compounds, raw materials, and energy (including oil and natural gas and their derivatives) supplied by others for the manufacturing of its products. It is possible that any of its supplier relationships could be interrupted due to natural and other disasters and other events, or be terminated in the future. Any sustained interruption in the Company's receipt of adequate supplies could have a material adverse effect on the Company. In addition, while the Company has a process to minimize volatility in component and material pricing, no assurance can be given that the Company will be able to successfully manage price fluctuations or that future price fluctuations or shortages will not have a material adverse effect on the Company.

** Acquisitions, strategic alliances, divestitures, and other unusual events resulting from portfolio management actions and other evolving business strategies, and possible organizational restructuring could affect future results.* The Company monitors its business portfolio and organizational structure and has made and may continue to make acquisitions, strategic alliances, divestitures and changes to its organizational structure. With respect to acquisitions, future results will be affected by the Company's ability to integrate acquired businesses quickly and obtain the anticipated synergies.

* *The Company's future results may be affected if the Company generates fewer productivity improvements than estimated.* The Company utilizes various tools, such as Lean Six Sigma, to improve operational efficiency and productivity. There can be no assurance that all of the projected productivity improvements will be realized.

* *The Company's future results may be affected by various legal and regulatory proceedings, including those involving product liability, antitrust, environmental or other matters.* The outcome of these legal proceedings may differ from the Company's expectations because the outcomes of litigation, including regulatory matters, are often difficult to reliably predict. Various factors or developments can lead the Company to change current estimates of liabilities and related insurance receivables where applicable, or make such estimates for matters previously not susceptible of reasonable estimates, such as a significant judicial ruling or judgment, a significant settlement, significant regulatory developments or changes in applicable law. A future adverse ruling, settlement or unfavorable development could result in future charges that could have a material adverse effect on the Company's results of operations or cash flows in any particular period. For a more detailed discussion of the legal proceedings involving the Company and the associated accounting estimates, see the discussion in Note 13.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

3M's general offices, corporate research laboratories, and certain division laboratories are located in St. Paul, Minnesota. In the United States, 3M has nine sales offices in eight states and operates 74 manufacturing facilities in 27 states. Internationally, 3M has 148 sales offices. The Company operates 93 manufacturing and converting facilities in 32 countries outside the United States.

3M owns substantially all of its physical properties. 3M's physical facilities are highly suitable for the purposes for which they were designed. Because 3M is a global enterprise characterized by substantial intersegment cooperation, properties are often used by multiple business segments.

Item 3. Legal Proceedings.

Discussion of legal matters is incorporated by reference from Part II, Item 8, Note 13, "Commitments and Contingencies," of this document, and should be considered an integral part of Part I, Item 3, "Legal Proceedings."

Item 4. Submission of Matters to a Vote of Security Holders.

None in the quarter ended December 31, 2007.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Equity compensation plans information is incorporated by reference from Part III, Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters," of this document, and should be considered an integral part of Item 5. At January 31, 2008, there were approximately 121,302 shareholders of record. 3M's stock is listed on the New York Stock Exchange, Inc. (NYSE), the Chicago Stock Exchange, Inc., and the SWX Swiss Exchange. Cash dividends declared and paid totaled \$.48 per share for each quarter of 2007, and \$.46 per share for each quarter of 2006. Stock price comparisons follow:

Stock price comparisons (NYSE composite transactions)

(Per share amounts)	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	Year
2007 High	\$ 79.88	\$ 89.03	\$ 93.98	\$ 97.00	\$ 97.00
2007 Low	72.90	75.91	83.21	78.98	72.90
2006 High	\$ 79.83	\$ 88.35	\$ 81.60	\$ 81.95	\$ 88.35
2006 Low	70.30	75.76	67.05	73.00	67.05

Issuer Purchases of Equity Securities

Repurchases of common stock are made to support the Company's stock-based employee compensation plans and for other corporate purposes. On February 13, 2006, the Board of Directors authorized the purchase of \$2.0 billion of the Company's common stock between February 13, 2006 and February 28, 2007. In August 2006, 3M's Board of Directors authorized the repurchase of an additional \$1.0 billion in share repurchases, raising the total authorization to \$3.0 billion for the period from February 13, 2006 to February 28, 2007. In February 2007, 3M's Board of Directors authorized a two-year share repurchase of up to \$7.0 billion for the period from February 12, 2007 to February 28, 2009.

Issuer Purchases of Equity

Securities (registered pursuant to

Section 12 of the Exchange Act)

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Approximate Dollar Value of Shares that May Yet Be Purchased under the Plans or Programs (Millions)
January 1-31, 2007	1,311,268	\$ 76.33	1,277,200	\$ 651
February 1-28, 2007	6,542,591	\$ 75.12	6,522,500	\$ 6,731

Total January 1 - December 31, 2007	39,756,386	\$ 81.42	38,972,900	\$ 4,149

(1) The total number of shares purchased includes: (i) shares purchased under the Board's authorizations described above, and (ii) shares purchased in connection with the exercise of stock options (which totaled 34,068 shares in January 2007, 20,091 shares in February 2007, 35,772 shares in March 2007, 71,521 shares in April 2007, 225,419 shares in May 2007, 74,233 shares in June 2007, 135,951 shares in July 2007, 82,178 shares in August 2007, 56,964 shares in September 2007, 13,802 shares in October 2007, 10,375 shares in November 2007, and 23,112 shares in December 2007).

Item 6. Selected Financial Data.

(Dollars in millions, except per share amounts)	2007	2006	2005	2004	2003
Years ended December 31:					
Net sales	\$ 24,462	\$ 22,923	\$ 21,167	\$ 20,011	\$ 18,232
Income before cumulative effect of accounting change	4,096	3,851	3,146	2,841	2,286
Per share of common stock:					
Income before cumulative effect of accounting change basic	5.70	5.15	4.11	3.64	2.92
Income before cumulative effect of accounting change diluted	5.60	5.06	4.03	3.56	2.88
Cash dividends declared and paid	1.92	1.84	1.68	1.44	1.32
At December 31:					
Total assets	\$ 24,694	\$ 21,294	\$ 20,541	\$ 20,723	\$ 17,612
Long-term debt (excluding portion due within one year) and long-term capital lease obligations	4,088	1,112	1,368	798	1,805

The above income and earnings per share information exclude a cumulative effect of accounting change in 2005 (\$35 million, or 5 cents per diluted share). Refer to Note 1 for more detail.

2007 results included net gains that increased operating income by \$681 million and net income by \$448 million. 2007 included gains related to the sale of businesses (\$849 million pre-tax, \$550 million after-tax) and a gain on sale of real estate (\$52 million pre-tax, \$37 million after-tax), which were partially offset by increases in environmental liabilities (\$134 million pre-tax, \$83 million after-tax), restructuring actions (\$41 million pre-tax, \$27 million after-tax), and other exit activities (\$45 million pre-tax, \$29 million after-tax). 2006 results included net gains that increased operating income by \$523 million and net income by \$438 million. 2006 included net benefits from gains related to the sale of certain portions of 3M's branded pharmaceuticals business (\$1.074 billion pre-tax, \$674 million after-tax) and favorable income tax adjustments (\$149 million), which were partially offset by restructuring actions (\$403 million pre-tax, \$257 million after-tax), acquired in-process research and development expenses (\$95 million pre-tax and after-tax), settlement costs of a previously disclosed antitrust class action (\$40 million pre-tax, \$25 million after-tax), and environmental obligations related to the pharmaceuticals business (\$13 million pre-tax, \$8 million after-tax). 2005 results included charges that reduced net income by \$75 million. This related to a tax liability resulting from 3M's reinvestment of approximately \$1.7 billion of foreign earnings in the United States pursuant to the repatriation provisions of the American Jobs Creation Act of 2004. 2003 results included charges related to an adverse ruling in a lawsuit filed against 3M in 1997 by LePage's Inc. that reduced operating income by \$93 million (\$58 million after tax).

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is designed to provide a reader of 3M's financial statements with a narrative from the perspective of management. 3M's MD&A is presented in nine sections:

	Reference (pages)
• Overview	12
• Results of Operations	15
• Performance by Business Segment	18
• Performance by Geographic Segment	27
• Critical Accounting Estimates	28
• New Accounting Pronouncements	30
• Financial Condition and Liquidity	30
• Financial Instruments	35
• Forward-Looking Statements	35

OVERVIEW

3M is a diversified global manufacturer, technology innovator and marketer of a wide variety of products. 3M manages its operations in six operating business segments: Industrial and Transportation; Health Care; Display and Graphics; Consumer and Office; Safety, Security and Protection Services; and Electro and Communications.

3M's strategy continues to emphasize a commitment to grow at a faster pace, using a four-pronged approach, which includes reinvesting in its core businesses, developing adjacent emerging business opportunities, expanding on the Company's already world-class capabilities internationally, and acquiring companies in complementary faster-growing industries. The Company will continue to invest in research and development and plant start-ups in 2008, including investments in emerging markets around the world. Research, development and related expenses totaled \$1.368 billion in 2007. Capital expenditures totaled \$1.422 billion in 2007, up \$254 million compared with 2006. The Company expects capital expenditures to total approximately \$1.3 billion to \$1.4 billion in 2008, providing the capacity to meet expected growth.

In December 2006 and January 2007, 3M completed the sale of its branded pharmaceuticals business, resulting in gains in the fourth quarter of 2006 and first quarter of 2007. In addition, 3M recorded a gain related to the sale of its Opticom Priority Control Systems and Canoga Traffic Detection businesses in the second quarter of 2007. In both 2007 and 2006, these gains on sale of businesses and a gain on sale of real estate were partially offset by restructuring and other items. Refer to Note A at the end of this overview section for additional details. Including these items, in 2007, 3M reported record net sales of \$24.462 billion and record net income of \$4.096 billion, or \$5.60 per diluted share, compared with net sales of \$22.923 billion and net income of \$3.851 billion, or \$5.06 per diluted share, in 2006. Excluding the items in Note A in both years, the Company still achieved strong underlying operating performance, helped by a 6.7% increase in net sales, which included the divestiture impacts discussed above that reduced sales growth by 3.8%.

The following table contains sales and operating income results by business segment for the years ended December 31, 2007 and 2006. Refer to the Performance by Business Segment section for discussion of the gain on sale of businesses, restructuring and other items that impacted reported operating income results.

Edgar Filing: 3M CO - Form 10-K

(Dollars in millions)	Net Sales	2007 % of Total	Oper. Income	Net Sales	2006 % of Total	Oper. Income	2007 vs. 2006 % change

In 2007, worldwide total sales increased 6.7%. Local-currency sales growth (which includes volume, selling price and acquisition impacts, but excludes divestiture and translation impacts) was 7.3%, with organic local-currency growth of 4.9% (including 0.7% benefit from pharmaceuticals supply agreements) and acquisitions adding 2.4%. Divestitures, primarily the sale of the global branded pharmaceuticals business (Health Care segment), decreased worldwide sales growth by 3.8%. The sale of the pharmaceuticals business is not presented as a discontinued operation due to the extent of the projected continuing cash flows from 3M's contractual supply relationship with the buyers in relation to those of the business that was sold.

The breadth of 3M's product lines was evident during 2007 as the Company experienced solid sales growth across the portfolio. Health Care led all segments with local-currency sales growth of 18.3% (excluding divestitures). This includes a 4.4% benefit from acquisitions and 4.5% benefit due to the pharmaceuticals supply agreements. The sale of 3M's global branded pharmaceuticals business reduced Health Care sales growth by 23.7%. Local-currency sales increased 10.8% in Safety, Security and Protection Services, including 7.4% from numerous acquisitions. Local-currency sales increased 5.8% in Industrial and Transportation, 5.0% in Consumer and Office, 2.3% in Electro and Communications, and 1.8% (excluding the impact of the Opticom/Canoga divestiture) in Display and Graphics. While 3M experienced broad-based sales growth, there was softness in certain markets in 2007. Within Display and Graphics, optical film sales increased slightly year-on-year, but 3M experienced an attachment rate loss in LCD desktop monitors and LCD TV segments, particularly in the second half of 2007, as competition continued to intensify in this market. 3M also experienced weakness in its roofing granules business for residential asphalt shingles and in its electronic solutions business due to softness in certain segments of the consumer electronics market. Refer to the section entitled Performance by Business Segment for a more detailed discussion of the results of the respective segments.

Geographically, the European region (which includes Europe, Middle East and Africa) led local-currency sales growth in 2007, with an increase of 11.7%, 7.4% of which was organic (excluding acquisitions, divestiture and translation impacts). Sales growth in Europe was led by Safety, Security and Protection Services and Health Care (without Pharmaceuticals). The combined Latin America and Canada area local-currency sales increased 10.6%, of which 9.6% was organic, with growth led by Industrial and Transportation, Safety, Security and Protection Services and Health Care (without Pharmaceuticals). Asia Pacific local-currency sales increased 4.9%, of which 4.5% was organic, with all six business segments contributing to this increase. United States local-currency sales increased 5.7%, of which 2.6% was organic. Organic volume growth in the U.S. was led by Health Care (without Pharmaceuticals) and Industrial and Transportation, which was partially offset by softness in the electronic solutions business and weakness in a few businesses that are impacted by the slowdown in the U.S. housing, road construction and mass retail markets, primarily the roofing granules, protective materials, traffic safety and office supply businesses. Divestitures, primarily the sale of the global branded pharmaceuticals business, reduced sales in Europe by 6.6%, in the United States by 4.2%, in the combined Latin America and Canada area by 2.8%, and in Asia Pacific by 1.3%. Currency effects increased total international sales by 5.2%, with Europe positively impacted by 8.5%, the combined Latin America and Canada area by 5.9%, and Asia Pacific by 2.0%, as the U.S. dollar weakened in aggregate against the multitude of currencies in these geographic areas.

Operating income for 2007 increased 8.7% year-on-year, including a net 2.2 percentage point benefit from the impact of items discussed in Note A below. Operating income margins were approximately 25% in both 2007 and 2006, with items in Note A positively impacting these margins in both years by approximately 2.5 percentage points.

3M generated \$4.275 billion of operating cash flows in 2007, an increase of \$436 million compared to 2006. In 2007, the Company utilized \$4.619 billion of cash to repurchase 3M common stock and pay dividends, compared to \$3.727 billion in 2006. In February 2007, 3M's Board of Directors authorized a two-year share repurchase of up to \$7.0 billion for the period from February 12, 2007 to February 28, 2009. As of December 31, 2007, approximately \$4.1 billion remained available for repurchase. In February 2008, 3M's Board authorized a dividend increase of 4.2% for 2008, marking the 50th consecutive year of dividend increases for 3M. 3M's debt to total capital ratio (total capital defined as debt plus equity) as of December 31, 2007 was 30%. 3M has an AA credit rating from Standard & Poor's, with a stable outlook, and an Aa1 credit rating from Moody's Investors Service, with a negative outlook. The Company has sufficient access to capital markets to meet currently anticipated growth and acquisition investment funding needs.

Edgar Filing: 3M CO - Form 10-K

In 2007, the Company experienced cost increases affecting metals, wood pulp and oil-derived raw materials. Costs for these materials have remained high throughout the year, and 3M would expect this level to carry over into early 2008, with some moderation occurring later in the year. To date the Company is receiving sufficient quantities of all raw materials to meet its reasonably foreseeable production requirements. It is impossible to predict future shortages of raw materials or the impact any such shortages would have. 3M has avoided disruption to its manufacturing operations through careful management of existing raw material inventories and development and qualification of additional supply sources. 3M manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts.

In 2007, the Company modified elements of its long-term incentive compensation programs. With the May 2007 Management Stock Ownership Program (MSOP) Annual Grant, the Company reduced the number of traditional stock options granted by reducing the number of employees eligible to receive annual grants and by shifting a portion of the annual grant away from traditional stock options primarily to restricted stock units. These changes will reduce the annual dilution impact from approximately 1.5% of total outstanding common stock to approximately 1%. However, associated with the reduction in the number of eligible employees, the Company provided a one-time buyout grant of restricted stock units to the impacted employees, which resulted in increased stock-based compensation expense in 2007. Stock-based compensation expense totaled \$0.18 per diluted share in 2007, compared with \$0.17 per diluted share in 2006. The Company's MSOP, including restricted stock units, is discussed further in Note 15.

The preceding forward-looking statements involve risks and uncertainties that could cause results to differ materially from those projected (refer to the forward-looking statements section in Item 7 and the risk factors provided in Item 1A for discussion of these risks and uncertainties).

(Note A). In 2007, gains on sale of businesses and real estate, net of restructuring and other items, increased operating income by \$681 million and net income by \$448 million, or \$0.62 per diluted share. 2007 included net benefits from gains related to the sale of businesses (\$849 million pre-tax, \$550 million after-tax) and a gain on sale of real estate (\$52 million pre-tax, \$37 million after-tax), which were partially offset by increases in environmental liabilities (\$134 million pre-tax, \$83 million after-tax), restructuring actions (\$41 million pre-tax, \$27 million after-tax), and other exit activities (\$45 million pre-tax, \$29 million after-tax). These items, except the gain on sale of real estate, are discussed in more detail in Note 2 (Acquisitions and Divestitures), Note 4 (Restructuring Actions and Other Exit Activities) and Note 13 (Commitments and Contingencies). Gains on sale of businesses include the second-quarter 2007 sale of 3M's Opticom Priority Control Systems and Canoga Traffic Detection businesses, and the first-quarter 2007 sale of the global branded pharmaceuticals business in Europe. Concerning the real estate sale, 3M sold its current lab facility located in Suwon, Korea and is currently building a new state-of-the-art customer-oriented R&D facility closer to Seoul and many of 3M's major customers.

In 2006, gains of sale of businesses, net of restructuring and other items, increased operating income by \$523 million and net income by \$438 million, or \$0.57 per diluted share. 2006 included net benefits from gains related to the sale of certain portions of 3M's branded pharmaceuticals business (\$1.074 billion pre-tax, \$674 million after-tax) and favorable income tax adjustments (\$149 million), which were partially offset by restructuring actions (\$403 million pre-tax, \$257 million after-tax), acquired in-process research and development expenses (\$95 million pre-tax and after-tax), settlement costs of a previously disclosed antitrust class action (\$40 million pre-tax, \$25 million after-tax), and environmental obligations related to the pharmaceuticals business (\$13 million pre-tax, \$8 million after-tax). These items, except the settlement costs and environmental obligations, are discussed in more detail in Note 2 (Acquisitions and Divestitures), Note 4 (Restructuring Actions and Other Exit Activities), Note 8 (Income Taxes) and Note 13 (Commitments and Contingencies). Concerning settlement costs, the Company recorded \$40 million in 2006 with respect to a settlement in principle related to the antitrust class action brought on behalf of direct purchasers who did not purchase private label tape. Concerning environmental obligations, the Company increased its reserves by \$13 million during 2006 for estimated environmental remediation costs at a European pharmaceutical plant.

RESULTS OF OPERATIONS*Net Sales:*

	2007			2006		
	U.S.	Intl.	Worldwide	U.S.	Intl.	Worldwide
Net sales (millions)	\$ 8,987	\$ 15,475	\$ 24,462	\$ 8,853	\$ 14,070	\$ 22,923
% of worldwide sales	36.7%	63.3%		38.6%	61.4%	
Components of net sales change:						
Volume organic	1.6%	7.4%	5.1%	3.1%	8.0%	6.1%
Volume acquisitions	3.1	2.1	2.4	2.6	1.9	2.1
Price	1.0	(1.1)	(0.2)	1.4	(1.8)	(0.5)
Local-currency sales (including acquisitions)	5.7	8.4	7.3	7.1	8.1	7.7
Divestitures	(4.2)	(3.6)	(3.8)			
Translation		5.2	3.2		1.0	0.6
Total sales change	1.5%	10.0%	6.7%	7.1%	9.1%	8.3%

In 2007, local-currency sales growth of 7.3% (which includes acquisitions, but excludes divestiture and translation impacts) was led by the Health Care; Safety, Security and Protection Services; Industrial and Transportation and Consumer and Office segments. All business segments have contributed positive local-currency sales growth for four consecutive years. Acquisitions increased 2007 sales by 2.4%, led by the August 2006 acquisition of Security Printing and Systems Limited and the late 2006 acquisitions of Softmed Systems Inc. and Biotrace International PLC.

In 2006, local-currency sales growth of 7.7% was broad-based, as all business segments made positive contributions to local-currency sales growth. Acquisitions increased 2006 sales by 2.1%, driven by the August 2005 acquisition of CUNO and the August 2006 acquisition of Security Printing and Systems Limited.

Refer to both the Performance by Business Segment and Performance by Geographic Area sections for additional discussion of sales change.

Operating Expenses:

(Percent of net sales)	2007	2006	2005	2007 Versus 2006	2006 Versus 2005
Cost of sales	52.1%	51.1%	49.2%	1.0%	1.9%
Selling, general and administrative expenses	20.5	22.1	21.9	(1.6)	0.2
Research, development and related expenses	5.6	6.6	6.0	(1.0)	0.6
Gain on sale of businesses	(3.5)	(4.6)		1.1	(4.6)
Operating income	25.3%	24.8%	22.9%	0.5%	1.9%

Edgar Filing: 3M CO - Form 10-K

As discussed in the preceding overview section, the 2007 gain on sale of businesses and real estate, net of environmental liability charges, restructuring and other exit activities, benefited 2007 operating income by \$681 million, or 2.8% of net sales. In addition, the 2006 gain on sale, net of restructuring and other items, benefited 2006 operating income by \$523 million, or 2.2% of net sales. The following tables summarize these items by operating expense category. Items included in the Other category of the table for 2006 are acquired in-process research and development expenses (\$95 million), settlement costs of a previously disclosed antitrust class action (\$40 million), and environmental obligations related to the pharmaceuticals business (\$13 million).

(Millions)	2007 Gain on Sale, Restructuring and Other Summary					Total

Total operating income penalty (benefit)	\$ (1,074)	\$ 166	\$ 112	\$ 125	\$ 403	\$ 148	\$ (523)

Cost of Sales:

Cost of sales includes manufacturing, engineering and freight costs. Cost of sales as a percent of net sales increased 1.0 percentage point in 2007 compared to 2006, with this increase primarily due to the sale of the branded pharmaceuticals business, which had lower than average cost of sales. Raw material costs increased approximately 1% in 2007, compared with 2006. In 2007, restructuring and other exit costs increased cost of sales by \$64 million, or 0.3 percentage points. These charges primarily related to the consolidation of certain flexible circuit manufacturing operations, the phase-out of operations at the Company's New Jersey roofing granule facility and charges related to the Company's decision to close an Electro and Communications facility in Wisconsin. In 2006, restructuring and other items increased cost of sales by \$143 million, or 0.7 percentage points.

Cost of sales increased 1.9 percentage points in 2006. Approximately 1.2 percentage points of this increase related to numerous items, such as higher raw material costs, slightly lower selling prices, and higher costs associated with scaling up additional manufacturing capacity. In addition, there were supply chain inefficiencies caused by capacity-constraints. Finally, 3M accelerated the pace of acquisitions in 2006, which increased cost of sales slightly for the year. Broad-based sales volume growth and productivity gains helped offset some of this impact. Raw material costs increased approximately 3% for 2006, compared with 2005.

Selling, General and Administrative Expenses:

Edgar Filing: 3M CO - Form 10-K

Selling, general and administrative (SG&A) expenses as a percent of net sales decreased 1.6 percentage points in 2007 when compared to 2006, as expenses incurred in 2006 in the Company's now-divested global branded Pharmaceuticals business did not repeat in 2007. Non-pharmaceutical ongoing SG&A expenses, after adjusting for the following items, were up approximately 7% in dollars, reflecting the Company's continued investment in sales and marketing to support growth markets. In 2007, SG&A includes increases in environmental liabilities, restructuring charges and other exit activities, net of the gain on sale of real estate (\$108 million combined net expense), which increased SG&A as a percent of sales by 0.4 percentage points. 2006 included restructuring actions and settlement costs of a previously disclosed antitrust class action (\$238 million combined expense), which increased 2006 SG&A as a percent of sales by 1.0 percentage points. In dollars, SG&A decreased \$51 million when comparing 2007 to 2006, with the change in restructuring and other items year-on-year decreasing SG&A by \$130 million, pharmaceutical SG&A spending decreasing \$241 million and other SG&A spending increasing \$320 million, or approximately 7% in dollars. The Company continues to constrain administrative costs.

SG&A expenses as a percentage of net sales increased 0.2 of a percentage point in 2006 when compared to 2005. In dollars, SG&A increased \$435 million, with restructuring and other items increasing SG&A by \$238 million and other spending increasing SG&A by \$197 million. 3M continues to invest in growth-oriented SG&A as sales and marketing costs increased faster than sales, while administrative expenses remained relatively flat in dollars, attributable to ongoing cost-control efforts.

Research, Development and Related Expenses:

Research, development and related expenses (R&D) as a percent of net sales decreased 1.0 percentage point in 2007 when compared to 2006, as expenses incurred in 2006 in the Company's now-divested R&D-intensive Pharmaceuticals business did not repeat in 2007. Non-pharmaceutical ongoing R&D expenses, after adjusting for the following items, were up approximately 11% in dollars, as the Company continued to aggressively invest in future technologies and growth opportunities. 2006 spending included a \$95 million in-process research and development charge (discussed in Note 2) and \$75 million in restructuring actions (Note 4), which increased 2006 R&D as a percent of sales by 0.7 percentage points. In dollars, R&D spending decreased \$154 million when comparing 2007 to 2006, with the change in restructuring and other items year-on-year decreasing R&D by \$174 million, 2006 pharmaceutical SG&A spending decreasing \$120 million and other R&D spending increasing \$140 million, or approximately 11% in dollars, reflecting 3M's continuing commitment to fund future growth for the Company.

R&D increased as a percent of sales by 0.6 of a percentage point, or \$248 million, when comparing 2006 to 2005. The 2006 spending included a \$95 million in-process research and development charge (discussed in Note 2) and \$75 million in restructuring actions (Note 4). Other spending increased approximately \$78 million, representing an increase of approximately 6% compared with 2005.

Gain on Sale of Businesses:

In January 2007, 3M completed the sale of its global branded pharmaceuticals business in Europe to Meda AB. 3M received proceeds of \$817 million for this transaction and recognized, net of assets sold, a pre-tax gain of \$781 million in 2007 (recorded in the Health Care segment). In June 2007, 3M completed the sale of its Opticom Priority Control Systems and Canoga Traffic Detection businesses to TorQuest Partners Inc., a Toronto-based investment firm. 3M received proceeds of \$80 million for this transaction and recognized, net of assets sold, transaction and other costs, a pre-tax gain of \$68 million (recorded in the Display and Graphics segment) in 2007.

In December 2006, 3M completed the sale of its global branded pharmaceuticals businesses in the United States, Canada, and Latin America region and the Asia Pacific region, including Australia and South Africa. 3M received proceeds of \$1.209 billion for these transactions and recognized a pre-tax gain on sale of \$1.074 billion in 2006 (recorded in the Health Care segment). For more detail, refer to Note 2.

Operating Income:

3M uses operating income as one of its primary business segment performance measurement tools. Operating income margins over the past several years have been in excess of 22%, helped by solid sales growth and an ongoing strong commitment to maintaining operational discipline throughout 3M's global operations. Operating income margins of 25.3% in 2007 were positively impacted by 2.8 percentage points (\$681 million) from the gain on sale of businesses and real estate, net of environmental liabilities, restructuring and other exit activities. Operating income margins of 24.8% for 2006 were positively impacted by 2.2 percentage points (\$523 million) from the gain on sale of portions of the pharmaceuticals business, net of restructuring and other actions. Adjusting for the preceding items, operating income margins in 2007 were similar to 2006.

Interest Expense and Income:

Edgar Filing: 3M CO - Form 10-K

(Millions)	2007		2006		2005	
Interest expense	\$	210	\$	122	\$	82
Interest income		(132)		(51)		(56)
Total	\$	78	\$	71	\$	26

Interest Expense: Interest expense increased year-on-year in both 2007 and 2006, primarily due to higher average debt balances and higher interest rates.

Interest Income: Interest income increased in 2007 due to higher average cash, cash equivalent and marketable securities balances and higher interest rates. Interest income was lower in 2006, with lower average cash, cash equivalent and marketable securities balances partially offset by higher interest rates.

Provision for Income Taxes:

(Percent of pre-tax income)	2007	2006	2005
Effective tax rate	32.1%	30.6%	33.7%

The effective tax rate for 2007 was 32.1%, compared with 30.6% in 2006. The Company's 2007 tax rate benefited from reduced international tax rates and an increased benefit for the domestic manufacturer's deduction, but was penalized by the elimination of the foreign export sales benefit. The Company's 2006 tax rate included benefits from adjustments to its reserves for tax contingencies following the settlement of income tax audits. Refer to Note 8 for additional information.

The tax rate for 2006 was 30.6%, compared with 33.7% in 2005. As discussed above, the Company's 2006 tax rate included benefits from adjustments to its reserves for tax contingencies. In 2005, the Company repatriated approximately \$1.7 billion of foreign earnings under the American Jobs Creation Act of 2004 (Jobs Act). The Jobs Act provided 3M the opportunity to tax-effectively repatriate foreign earnings for U.S. qualifying investments specified by 3M's domestic reinvestment plan. As a consequence, in the second quarter of 2005, 3M recorded a tax expense of \$75 million, net of available foreign tax credits, which negatively impacted the 2005 effective worldwide tax rate by 1.6%. No similar repatriation occurred in 2006 since this Jobs Act provision only applied to 2005.

Minority Interest:

(Millions)	2007	2006	2005
Minority interest	\$ 55	\$ 51	\$ 55

Minority interest expense eliminates the income or loss attributable to non-3M ownership interests in 3M consolidated entities. 3M's most significant consolidated entity with non-3M ownership interests is Sumitomo 3M Limited in Japan (3M owns 75% of Sumitomo 3M Limited).

Cumulative Effect of Accounting Change:

As of December 31, 2005, the Company adopted FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations* (FIN 47). This accounting standard applies to the fair value of a liability for an asset retirement obligation associated with the retirement of tangible long-lived assets and where the liability can be reasonably estimated. Conditional asset retirement obligations exist for certain of the Company's long-term assets. The fair value of these obligations is recorded as liabilities on a discounted basis. Over time the liabilities are accreted for the change in the present value and the initial capitalized costs are depreciated over the useful lives of the related assets. The adoption of FIN 47 resulted in the recognition of an asset retirement obligation liability of \$59 million at December 31, 2005 and an after-tax charge of \$35 million for 2005, which was reflected as a cumulative change in accounting principle in the Consolidated Statement of Income. At December 31, 2007, the asset retirement obligation liability was \$59 million.

Currency Effects:

3M estimates that year-on-year currency effects, including hedging impacts, increased net income by approximately \$150 million in 2007, \$20 million in 2006 and \$115 million in 2005. This estimate includes the effect of translating profits from local currencies into U.S. dollars; the impact of currency fluctuations on the transfer of goods between 3M operations in the United States and abroad; and transaction gains and losses, including derivative instruments designed to reduce foreign currency exchange rate risks. 3M estimates that year-on-year derivative and other transaction gains and losses increased net income by approximately \$10 million in 2007, had an immaterial impact on net income in 2006, and increased net income by approximately \$50 million in 2005.

PERFORMANCE BY BUSINESS SEGMENT

Disclosures relating to 3M's business segments are provided in Item 1, Business Segments. Financial information and other disclosures are provided in the Notes to the Consolidated Financial Statements. As discussed in Note 16 to the Consolidated Financial Statements, effective in the first quarter of 2007, 3M made certain product moves between its business segments in its continuing effort to drive growth by aligning businesses around markets and customers. Segment information presented herein reflects the impact of these changes for all periods presented. The reportable segments are the Health Care segment, Industrial and Transportation segment, Display and Graphics segment, Consumer and Office segment, Safety, Security and Protection Services segment, and Electro and Communications segment. Information related to 3M's business segments is presented in the tables that follow. Local-currency sales (which include both core and acquisition volume impacts, plus price impacts) are provided for each segment. The divestiture impact, translation impact and total sales change are also provided for each segment.

As discussed in Note 1, effective January 1, 2006, 3M adopted Statement of Financial Accounting Standards No. 123 (revised 2004),

Share-Based Payment (SFAS No. 123R), which required 3M to expense stock-based compensation. The Company adopted SFAS No. 123R using the modified retrospective method. Effective January 1, 2006, all prior periods were revised to give effect to the fair-value-based method of accounting for awards granted in fiscal years beginning on or after January 1, 1995. For additional discussion, refer to Note 15. Stock-based compensation expense for the years ended December 31, 2007, 2006 and 2005 is summarized by business segment in the table that follows.

Stock-based compensation expense

(Millions)	Years ended December 31		
	2007	2006	2005
Industrial and Transportation	\$ 58	\$ 50	\$ 46
Health Care	40	42	35
Display and Graphics	33	27	19
Consumer and Office	24	24	21
Safety, Security and Protection Services	23	21	16
Electro and Communications	21	21	18
Corporate and Unallocated	29	15	
Total Company	\$ 228	\$ 200	\$ 155

As discussed in the preceding overview section, the combination of the 2007 gain on sale of businesses and real estate, net of environmental liability charges, restructuring and other exit activities benefited 2007 operating income by \$681 million, or 2.8% of net sales. The 2006 gain on sale of businesses, net of restructuring and other items benefited 2006 operating income by \$523 million, or 2.2% of net sales. The following tables summarize these items by business segment. In 2006, items included in the Other category of the table are acquired in-process research and development expenses (\$95 million), settlement costs of a previously disclosed antitrust class action (\$40 million), and environmental obligations related to the pharmaceuticals business (\$13 million).

Total sales change	9.6%	9.8%	7.6%
Operating income (millions)	\$ 1,501	\$ 1,342	\$ 1,210
Percent change	11.8%	11.0%	16.7%
Percent of sales	20.6%	20.2%	20.0%

The Industrial and Transportation segment serves a broad range of markets, such as appliance, paper and packaging, food and beverage, and automotive. Industrial and Transportation products include tapes, a wide variety of coated and non-woven abrasives, adhesives, specialty materials, filtration products, closures for disposable diapers, and components and products that are used in the manufacture, repair and maintenance of automotive, marine, aircraft and specialty vehicles. The August 2005 acquisition of CUNO added a comprehensive line of filtration products for the separation, clarification and purification of fluids and gases.

In 2007, local-currency sales increased 5.8%, including 1.8% growth from acquisitions. During the fourth quarter of 2007, this segment added four complementary gap-filling acquisitions, bringing total completed acquisitions for the year to seven. In combination with focused investments in research and development, these acquisitions will help strengthen the core tapes, adhesives and abrasives platforms for many years to come. Sales growth was broad-based, led by industrial adhesives and tapes, automotive aftermarket, abrasives and automotive OEM businesses. All geographic areas contributed positively to growth. Significant manufacturing investments were made in emerging economies such as India, China and Poland to simplify the supply chain and get closer to local customers. Good operational discipline helped deliver operating income growth of 11.8%, with operating income margins of 20.6%. Operating income included \$9 million in restructuring and other exit activity expenses, primarily comprised of severance and related benefits.

In 2006, local-currency sales grew 9.0%, including 4.6% growth from acquisitions, primarily related to the August 2005 acquisition of CUNO. Since CUNO was acquired in early August 2005 and is thus considered part of organic growth effective in August 2006, the acquisition benefit

Edgar Filing: 3M CO - Form 10-K

reflected in 2006 only reflects the months from January 2006 through July 2006. The industrial adhesives and tapes business, along with the automotive aftermarket business, which sells products to body shops for vehicle repairs, led organic sales growth in 2006. 3M also posted good sales growth in its abrasives business and its energy and advanced materials business. Growth in the automotive OEM business was impacted by softness in the U.S. domestic automotive industry. Geographically, local-currency sales growth in dollars was strongest in the Asia Pacific and Europe areas. Operating income increased 11.0% to \$1.342 billion in 2006.

Operating income included \$15 million in restructuring expenses, primarily comprised of asset impairments and severance and related benefits, which negatively impacted operating income growth by 1.2%.

In March 2005, 3M's automotive business completed the purchase of 19% of TI&M Beteiligungsgesellschaft mbH (TI&M) for approximately \$55 million. TI&M is the parent company of I&T Innovation Technology Entwicklungs- und Holding Aktiengesellschaft (I&T), an Austrian maker of flat flexible cable and circuitry. Pursuant to a Shareholders Agreement, 3M marketed the firm's flat flexible wiring systems for automotive interior applications to the global automotive market. I&T filed a petition for bankruptcy protection in August 2006. As part of its agreement to purchase the shares of TI&M, the Company was granted a put option, which gave the Company the right to sell back its entire ownership interest in TI&M to the other investors from whom 3M acquired its 19% interest. The put option became exercisable January 1, 2007. The Company exercised the put option and recovered approximately \$25 million of its investment from one of the investors based in Belgium in February 2007. The other two TI&M investors have filed a bankruptcy petition in Austria. The Company is pursuing recovery of the balance of its investment both through the Austrian bankruptcy proceedings and pursuant to the terms of the Share Purchase Agreement. The Company believes collection of its remaining investment is probable and, as a result, no impairment reserve has been recorded.

Health Care Business (16.2% of consolidated sales):

	2007	2006	2005
Sales (millions)	\$ 3,968	\$ 4,011	\$ 3,760
Sales change analysis:			
Local currency (volume and price)	18.3%	6.0%	4.2%
Divestitures	(23.7)		
Translation	4.3	0.7	0.4
Total sales change	(1.1)%	6.7%	4.6%
Operating income (millions)	\$ 1,882	\$ 1,845	\$ 1,114
Percent change	2.0%	65.6%	14.6%
Percent of sales	47.4%	46.0%	29.6%

The Health Care segment serves markets that include medical, clinics and hospitals, pharmaceuticals, dental and orthodontic practitioners, and health information systems. Products and services provided to these and other markets include medical and surgical supplies, skin health and infection prevention products, drug delivery systems, dental and orthodontic products, health information systems and microbiology solutions. As discussed in Note 2, the global branded pharmaceuticals business was sold in December 2006 and January 2007.

In 2007, Health Care sales were \$3.968 billion. Local-currency growth was 18.3% (excluding divestitures), including 4.4 percentage points of growth from acquisitions and 4.5 percentage points of growth from supply agreements related to the sale of the global branded pharmaceuticals business. The sale of the pharmaceuticals business reduced Health Care sales growth by 23.7%. 3M provides disaggregated information on sales growth for Health Care's remaining businesses (without pharmaceuticals) further below.

The combination of the following items positively impacted total year 2007 Health Care operating income by \$791 million. As discussed in Note 2, in January 2007 the Company sold its branded pharmaceuticals business in the Europe region. The operating income gain related to this sale, which is included in Health Care, totaled \$781 million. In addition, as discussed in Note 4, a net operating income gain of \$10 million was recorded in 2007, which primarily related to adjustments to restructuring costs incurred in the fourth quarter of 2006.

Edgar Filing: 3M CO - Form 10-K

In 2006, Health Care sales were \$4.011 billion. Organic local-currency growth was 5.3%, with acquisitions adding an additional 0.7% of growth. Local-currency growth was led by the medical supplies and dental businesses. 3M's pharmaceutical business was approximately 19% of Health Care sales in 2006. Pharmaceutical local-currency sales declined 3.5% in 2006, while the remaining businesses' 2006 local-currency sales growth increased 8.5%. Geographically, Health Care's local-currency sales growth was strongest in the United States, Europe and Asia Pacific areas. Operating income for 2006 was up 65.6%, impacted by the gain on sale of 3M's branded pharmaceuticals business, restructuring impacts and other items as discussed in the following paragraph, which positively impacted operating income growth by 60.4%.

The combination of the following items positively impacted total year 2006 Health Care operating income by \$673 million, primarily in the fourth quarter of 2006. As discussed in Note 2, in early December 2006, the Company sold its branded pharmaceuticals business in the Asia Pacific region, including Australia and South Africa. The Company also sold its branded pharmaceuticals business in the United States, Canada and Latin America in late December 2006. The

operating income gain related to this sale, which is included in Health Care, totaled \$1.074 billion. In addition, as discussed in Note 4, the Health Care segment for the year 2006 included \$293 million in restructuring costs, primarily employee-related severance and benefit costs. Of the \$293 million, \$166 million was related to the pharmaceuticals business and \$15 million related to Health Care severance and other costs. In addition, \$112 million of severance and benefit costs were recorded in the fourth quarter of 2006 related to worldwide staff overhead reduction actions taken to streamline the Company's cost structure in response to the sale of 3M's branded pharmaceuticals business. Health Care also included \$95 million of expensed in-process research and development costs related to the Brontes acquisition and \$13 million in environmental reserves related to the pharmaceuticals business.

3M believes the following disaggregated information for 3M Health Care's remaining businesses (without pharmaceuticals) and for pharmaceuticals on a stand-alone basis provides useful information.

Health Care Business without Pharmaceuticals:

	2007	2006	2005
Sales (millions)	\$ 3,968	\$ 3,237	\$ 2,963
Sales change analysis:			
Local currency (volume and price)	18.3%	8.5%	5.3%
Translation	4.3	0.7	0.4
Total sales change	22.6%	9.2%	5.7%
Operating income (millions)	\$ 1,086	\$ 806	\$ 888
Percent change	34.6%	(9.1)%	14.0%
Percent of sales	27.4%	24.9%	30.0%

The following discussion provides information on 3M Health Care's remaining businesses (without pharmaceuticals).

In 2007, sales growth was broad-based across all platforms, led by infection prevention solutions and skin and wound care therapy products in medical, HFA-based components (non-CFC) for drug inhalers in drug delivery, and healthcare funding and performance management solutions for the hospital market in health information systems. Geographically, Health Care (without pharmaceuticals) achieved strong growth rates in all major regions, led by Europe, the United States, and the combined Latin America and Canada area. Local-currency sales increased 18.3%, with acquisitions contributing 4.4 percentage points of this growth. Much of the acquisition growth came from two deals that closed in late 2006: Biotrace International, PLC, a U.K.-based provider of microbiology products, and SoftMed, a Maryland-based provider of health information software solutions. Health Care also closed five complementary acquisitions in 2007 to strengthen the portfolio and accelerate growth into the future in the medical, oral care and health information systems businesses. Sales growth also included 4.5 percentage points of growth due to supply agreements related to the sale of the global branded pharmaceuticals business. Operating income increased 34.6%, with an operating income margin of 27.4%. Operating income for 2007 included \$5 million in restructuring expenses, primarily severance and related benefits.

In 2006, sales were \$3.237 billion. Organic local-currency growth was 7.4%, with acquisitions adding an additional 1.1% of growth. Local-currency growth was led by the medical supplies and dental businesses. Geographically, local-currency sales growth was strongest in the United States, Europe and Asia Pacific areas. Operating income for 2006 included \$95 million of expensed in-process research and development costs related to the Brontes acquisition and also included business-specific restructuring actions that totaled \$15 million, primarily comprised of severance and related benefits plus asset impairments. Including this combined operating income penalty of \$110 million, or 12.4 percentage point negative impact on operating income growth, 2006 operating income decreased 9.1%.

Pharmaceuticals Business:

	2007	2006	2005
Sales (millions)	\$	\$ 774	\$ 797
Sales change analysis:			
Local currency (volume and price)	N/A	(3.5)%	0.3%
Translation	N/A	0.6	0.3
Total sales change	N/A	(2.9)%	0.6%
Operating income (millions)	\$	\$ 796	\$ 226
Percent change	N/A	N/A	16.6%
Percent of sales	N/A	N/A	28.4%

The combination of the following items positively impacted total year 2007 pharmaceuticals operating income by \$796 million. As discussed in Note 2, in January 2007 the Company sold its branded pharmaceuticals business in the Europe region. The operating income gain related to this sale totaled \$781 million. In addition, as discussed in Note 4, a net operating income gain of \$15 million was recorded in 2007, which primarily related to adjustments to restructuring costs incurred in the fourth quarter of 2006. Drug Delivery Systems Division (part of Health Care without Pharmaceuticals) is a source of supply to the acquiring companies and records sales and operating income related to the pharmaceuticals supply agreements.

In total, the combination of the following items positively impacted total year 2006 pharmaceuticals operating income by \$783 million, primarily in the fourth quarter of 2006. As discussed in Note 2, in early December 2006, the Company sold its branded pharmaceuticals business in the Asia Pacific region, including Australia and South Africa. The Company also sold its branded pharmaceuticals business in the United States, Canada and Latin America in late December 2006. The operating income gain related to these transactions totaled \$1.074 billion. As discussed in Note 4, \$112 million of severance and benefit costs were recorded in the fourth quarter of 2006 related to worldwide staff overhead reduction actions taken to streamline the Company's cost structure in response to the sale of 3M's branded pharmaceuticals business. As also discussed in Note 4, the pharmaceuticals business for total year 2006 included \$97 million in employee-related severance and benefits and \$69 million of asset impairments and other expenses. In addition, an environmental reserve of \$13 million was recognized related to the pharmaceuticals business.

Display and Graphics Business (15.9% of consolidated sales):

	2007	2006	2005
Sales (millions)	\$	\$ 3,892	\$ 3,547
Sales change analysis:			
Local currency (volume and price)	1.8%	6.0%	4.6%
Divestitures	(0.4)		
Translation	1.8	0.3	0.2
Total sales change	3.2%	6.3%	4.8%
Operating income (millions)	\$	\$ 1,174	\$ 1,148
Percent change	12.4%	(9.0)%	2.9%
Percent of sales	30.2%	27.7%	32.4%

The Display and Graphics segment serves markets that include electronic display, touch screen, traffic safety and commercial graphics. This segment includes optical film and lens solutions for electronic displays; touch screens and touch monitors; computer screen filters; reflective sheeting for transportation safety; and commercial graphics systems. The optical film business provides films that serve numerous market

Edgar Filing: 3M CO - Form 10-K

segments of the electronic display industry. 3M provides distinct products for five market segments, including products for: 1) LCD computer monitors 2) LCD televisions 3) handheld devices such as cellular phones 4) notebook PCs and 5) automotive displays. The optical business includes a number of different products that are protected by various patents and groups of patents. The remaining lifetimes of such patents, as well as patents protecting future products, range from less than a few years to more than 10 years. These patents provide varying measures of exclusivity to 3M for a number of such products. 3M's proprietary manufacturing technology and know-how also provide a competitive advantage to 3M with respect to some of these products.

In 2007, Display and Graphics local-currency sales increased 1.8%, excluding the impact of the Opticom/Canoga business sale. The Company recorded positive sales growth in all major businesses – commercial graphics, traffic safety systems and optical systems. Throughout the year, commercial graphics saw strong performance in the vehicle wrapping market where 3M provides films, inks and other products for this rolling billboard industry. The traffic safety systems business also experienced growth for the year, with faster growth internationally as the 3M reflective solutions for highway construction projects are a perfect match in developing economies that are adding infrastructure. In June 2007, 3M completed the sale of its Opticom Priority Control Systems and Canoga Traffic Detection businesses. 3M received proceeds of \$80 million from this transaction and recognized an operating income gain of \$68 million in the Display and Graphics segment in the second quarter of 2007. In addition, Display and Graphics recorded restructuring and other exit activity expenses of \$17 million in 2007. Operating income in 2007 was \$1.174 billion, including this aggregate net operating income benefit of \$51 million, which contributed 1.3 percentage points of the 30.2% operating income margin. Operating income in 2006 (as discussed below) included \$39 million in restructuring expenses. These year-on-year impacts contributed 8.7 percentage points of the reported 12.4% operating income growth.

Optical systems continues to focus on market segmentation, with strong penetration in handhelds, computer displays and LCD televisions. 3M continues to experience attachment rate pressure in LCD desktop monitors and LCD TV segments, although in the fourth quarter of 2007 3M saw a mix-shift back to 1080p LCD TV's from 720p, which impacts 3M business as 3M films are used more heavily in the 1080p sets. 3M believes over the long term that 1080p LCD TV's will gain an increasing share of the overall LCD TV market. While 3M remains optimistic about the longer-term prospects for the optical film business, continuing price and attachment rate pressure is expected in 2008. Due to this pressure, 3M expects Display and Graphics operating income margins in 2008 to decline a few percentage points when compared to 2007 (excluding the net operating income benefit of 1.3 percentage points in 2007 discussed in the preceding paragraph). 3M's continued investment in this business has led to a solid stream of new products. 3M's brightness enhancement films provide an environmental solution through reduced energy consumption – an increasingly important requirement from both retail customers and government units. 3M has made significant sustainable factory improvements by relentlessly reducing costs and by adding needed capacity to secure future growth.

In 2006, the Display and Graphics business posted local-currency sales growth of 6.0%. Optical film sales volumes increased at double-digit rates in 2006. 3M saw an acceleration in the LCD industry due to strong consumer demand for LCD TV's, which drove record sales of 3M's proprietary optical films, despite ongoing downward pricing pressure in these consumer electronic applications. Commercial Graphics, a supplier of large-format graphics solutions that cut across a range of industries, delivered strong double-digit local-currency growth in 2006. Traffic Safety Systems also posted solid local-currency growth. Operating income declined by 9.0%. Operating income included \$39 million in restructuring expenses, primarily comprised of asset impairments and severance and related benefits, which negatively impacted operating income growth by 3.4%. These asset impairments relate to decisions the Company made in the fourth quarter of 2006 to exit certain marginal product lines in the Touch Systems and Optical Systems businesses. In optical film, selling price declines, the sales mix shift towards larger LCD displays, and operational challenges related to the Company's new optical film manufacturing production line penalized operating income in 2006.

Consumer and Office Business (13.9% of consolidated sales):

	2007	2006	2005
Sales (millions)	\$ 3,403	\$ 3,164	\$ 2,926
Sales change analysis:			
Local currency (volume and price)	5.0%	7.4%	6.1%
Translation	2.6	0.7	1.0
Total sales change	7.6%	8.1%	7.1%
Operating income (millions)	\$ 688	\$ 629	\$ 609
Percent change	9.3%	3.4%	9.4%
Percent of sales	20.2%	19.9%	20.8%

Edgar Filing: 3M CO - Form 10-K

The Consumer and Office segment serves markets that include consumer retail, office retail, home improvement, building maintenance and other markets. Products in this segment include office supply products, stationery products, construction and home improvement products, home care products, protective material products and consumer health care products.

In 2007, Consumer and Office experienced broad-based local-currency sales growth of 5.0%, led by the construction and home improvement and home cleaning businesses. In construction and home improvement, products such as Scotch Blue Painter's Tape, Filtrete home furnace filters and Command mounting and fastening products, helped drive results. Geographically, international growth is gaining traction, while a slowdown in the United States was driven by soft

overall U.S. retail sales and a soft residential housing environment. Approximately 60% of global sales for this segment are in the United States. Operating income increased 9.3% and now exceeds 20% of sales.

In 2006, Consumer and Office local-currency sales growth of 7.4% was broad-based across the portfolio, led by the construction and home improvement division, which serves the do-it-yourself retail channel. 3M also posted very good sales growth in the mass retail channel and continued to penetrate large key accounts, primarily in the United States, with an array of unique, highly functional products featuring customer-inspired designs. Operating income was \$629 million, up 3.4% year on year. 3M experienced slower sales growth in the construction and home improvement market in the fourth quarter of 2006, impacted by a housing slowdown in the United States.

Safety, Security and Protection Services Business (12.6% of consolidated sales):

	2007	2006	2005
Sales (millions)	\$ 3,070	\$ 2,663	\$ 2,320
Sales change analysis:			
Local currency (volume and price)	10.8%	13.7%	6.8%
Translation	4.5	1.1	1.0
Total sales change	15.3%	14.8%	7.8%
Operating income (millions)	\$ 611	\$ 549	\$ 513
Percent change	11.3%	7.1%	14.3%
Percent of sales	19.9%	20.6%	22.1%

The Safety, Security and Protection Services segment serves a broad range of markets that increase the safety, security and productivity of workers, facilities and systems. Major product offerings include personal protection products, safety and security products, energy control products, cleaning and protection products for commercial establishments, roofing granules for asphalt shingles, and supply chain execution software solutions. In August 2006, 3M completed the acquisition of Security Printing and Systems Limited, a producer of finished, personalized passports and secure cards, which expands the 3M product line related to border and civil security solutions. 3M's new emerging business opportunity in its Track and Trace initiative within 3M's Safety, Security and Protection Services segment resulted in the merging of a number of formerly separate efforts into one concerted effort for future growth. Track and Trace has a growing array of applications from tracking packages to managing medical and legal records.

In 2007, local-currency sales in the Safety, Security and Protection Services segment were up 10.8%. Acquisitions contributed 7.4 percentage points of this growth, including a carry-over benefit from the August 2006 acquisition of Security Printing and Systems Limited. In addition, during 2007 3M closed two small, but strategic, gap-filling acquisitions. These included E. Wood, a U.K.-based provider of corrosion protection products and Rochford Thompson, a manufacturer of optical character recognition passport readers used by airlines and immigration authorities. Sales growth was led by the respiratory protection business, followed by the security systems, corrosion protection and building and commercial services businesses. 2007 sales growth was held back by market softness in the U.S. residential construction market, which negatively impacted the roofing granules business. The decline in the roofing granules business reduced Safety, Security and Protection Services 2007 sales growth by approximately 1.5%. Geographically, sales growth was led by Europe and the combined Latin America and Canada area. This segment recorded a restructuring charge of \$29 million in the second quarter of 2007 related to the phase-out of operations at its New Jersey roofing granule facility. This included fixed asset impairments and employee-related restructuring liabilities. Including this charge, operating income margins were approximately 20% for total year 2007.

Edgar Filing: 3M CO - Form 10-K

In 2006, local-currency sales in the Safety, Security and Protection Services business were up 13.7%. Growth in the business was driven by strong global demand for personal safety products, especially respiratory protection. Acquisitions contributed 4.1% of growth, primarily due to the Security Printing and Systems Limited acquisition in August 2006. 3M continued to invest in additional respirator capacity, such as a new respirator manufacturing facility in Korea, which will serve the Asia Pacific region. 3M also posted outstanding growth in corrosion protection, a smaller but growing business, which supplies coatings for all types of commercial and industrial applications in a variety of industries. 3M's roofing granules business experienced a challenging fourth quarter, with a sales decline of nearly 50%, resulting in sales in this business declining nearly 10% when comparing total year 2006 with 2005. Geographically, local-currency growth was positive across all regions of the world, led by Europe and the United States. Operating income increased 7.1% to \$549 million in 2006. Operating income includes \$10 million in restructuring expenses, primarily severance and related benefits, which negatively impacted operating income growth by 1.9%.

Electro and Communications Business (11.3% of consolidated sales):

	2007	2006	2005
Sales (millions)	\$ 2,775	\$ 2,631	\$ 2,509
Sales change analysis:			
Local currency (volume and price)	2.3%	4.0%	1.5%
Translation	3.2	0.8	0.7
Total sales change	5.5%	4.8%	2.2%
Operating income (millions)	\$ 481	\$ 411	\$ 422
Percent change	17.0%	(2.6)%	40.7%
Percent of sales	17.3%	15.6%	16.8%

The Electro and Communications segment serves the electrical, electronics and communications industries, including electrical utilities; electrical construction, maintenance and repair; OEM electrical and electronics; computers and peripherals; consumer electronics; telecommunications central office, outside plant and enterprise; as well as aerospace, military, automotive and medical markets; with products that enable the efficient transmission of electrical power and speed the delivery of information and ideas. Products include electronic and interconnect solutions, micro interconnect systems, high-performance fluids, high-temperature and display tapes, telecommunications products, electrical products, and visual systems products.

In 2007, the Electro and Communications segment local-currency sales increased 2.3%, including 1.5 percentage points from acquisitions. Strong sales growth in the communications and electrical markets businesses was partially offset by the flexible circuits business, which supplies components primarily to the ink jet printer market. This business continues to penalize segment results as the ink jet market has become commoditized and as a number of applications go end-of-life. Softness in this business held back overall Electro and Communications sales and operating income growth by 2.5 percent and 9.3 percent, respectively. Operating income increased 17% as this segment has driven productivity improvements and taken actions to improve its competitiveness. Operating income in 2007 was penalized by a \$23 million charge related to consolidating its global flexible circuits manufacturing operations and \$18 million in restructuring expenses, primarily for asset impairment charges related to the Company's decision to close a facility in Wisconsin. Combined, these two items negatively impacted 2007 operating income by \$41 million and operating income margins by 1.5 percentage points.

In 2006, the Electro and Communications business organic local-currency growth of 2.7% was attributable to the electrical and electronics markets. Acquisitions contributed 1.3 percentage points to sales growth. 3M generated good top-line growth in its electrical markets division, which sells a number of insulating, testing and connecting products and solutions to both power utilities and manufacturing OEMs. 3M saw good growth from its electronics markets business, driven by double-digit growth in its semi-conductor and assemblies business. Partially offsetting this was some sales softness in 3M's U.S. communications markets business due to higher copper costs and a decline in 3M's visual systems business, which traditionally offered analog overhead and electronic projectors and film. Operating income declined by 2.6% to \$411 million. Operating income included \$46 million in restructuring expenses, primarily comprised of asset impairments and severance and related benefits, which negatively impacted operating income growth by 10.9%. Operating margins were impacted by rising raw material costs, specifically copper costs, in 3M's electrical and telecommunications markets businesses.

PERFORMANCE BY GEOGRAPHIC AREA

Financial information related to 3M operations in various geographic areas is provided in Note 17. Operating income results by geographic area were significantly impacted by the gain on sale businesses and other items as discussed in Note A at the end of the preceding overview section. A summary of key information and discussion related to 3M's geographic areas follow:

Geographic Area Net Sales and Operating Income (Dollars in millions)	2007		2007 vs. 2006 % Change					
	Sales	% of Total	Oper. Income	Local Currency	Divesti- tures	Trans- lation	Total Sales Change	Oper. Income
United States	\$ 8,987	36.7%	\$ 1,692	5.7%	(4.2)%		1.5%	(11.3)%
Asia Pacific	6,601	27.0%	2,136	4.9%	(1.3)%	2.0%	5.6%	1.8%
Europe, Middle East and Africa	6,503	26.6%	1,705	11.7%	(6.6)%	8.5%	13.6%	56.1%
Latin America and Canada	2,365	9.7%	665	10.6%	(2.8)%	5.9%	13.7%	5.8%
Other Unallocated	6		(5)					
Total Company	\$ 24,462	100%	\$ 6,193	7.3%	(3.8)%	3.2%	6.7%	8.7%

While 3M manages its businesses globally and believes its business segment results are the most relevant measure of performance, the Company also utilizes geographic area data as a secondary performance measure. Export sales are reported within the geographic area where the final sales to 3M customers are made. A portion of the products or components sold by 3M's operations to its customers are exported by these customers to different geographic areas. As customers move their operations from one geographic area to another, 3M's results will follow. Thus, net sales in a particular geographic area are not indicative of end-user consumption in that geographic area.

U.S. local-currency sales increased 5.7%, with acquisitions contributing 3.1 percentage points. U.S. local-currency sales growth was led by Health Care (without Pharmaceuticals) and Industrial and Transportation, which was partially offset by softness in the electronic solutions business and weakness in a few businesses that are impacted by the slowdown in the U.S. housing, road construction and mass retail markets, primarily roofing granules, protective materials, traffic safety and office supply businesses. Asia Pacific local-currency sales increased 4.9%, with all six business segments contributing to this increase. Sales in Japan totaled approximately \$2 billion, with local-currency sales up 2% from 2006. European local-currency sales increased 11.7%, with good growth across all segments, especially Safety, Security and Protection Services and Health Care (without Pharmaceuticals). In the combined Latin America and Canada area, local-currency sales increases of 10.6% were led by Industrial and Transportation; Safety, Security and Protection Services; and Health Care (without Pharmaceuticals). Foreign currency translation positively impacted European area sales by 8.5%, the combined Latin America and Canada area sales by 5.9%, and the Asia Pacific area by 2%, as the U.S. dollar weakened against these currencies. For 2007, international operations represented approximately 63% of 3M's sales.

Since 3M sold its global branded pharmaceuticals business in December 2006 and January 2007, both sales growth and operating income were negatively impacted when comparing 2007 to 2006. Sales in 2006 for pharmaceuticals totaled \$332 million in the United States, \$315 million in the Europe, Middle East and Africa area, \$77 million in the Asia Pacific area, and \$50 million in the Latin America and Canada area. In 2007, the gain on sale of businesses and a gain on sale of real estate, net of restructuring and other items, increased worldwide operating income by \$681 million, with the largest impact in the Europe, Middle East and Africa area. In 2006, the gain on sale, restructuring and other items increased worldwide operating income by \$523 million, with the largest impact in the United States. These items are discussed in more detail in the preceding overview section.

Geographic Area Supplemental Information

(Millions, except Employees)	Employees as of December 31,			Capital Spending			Property, Plant and Equipment net		
	2007	2006	2005	2007	2006	2005	2007	2006	2005
United States	34,138	34,553	33,033	\$ 841	\$ 692	\$ 532	\$ 3,668	\$ 3,382	\$ 3,291
Asia Pacific	12,970	12,487	11,574	299	252	228	1,116	959	865
Europe, Middle East and Africa	17,675	17,416	16,722	203	134	120	1,308	1,162	1,076

Total Company	76,239	75,333	71,227	\$ 1,422	\$ 1,168	\$ 943	\$ 6,582	\$ 5,907	\$ 5,593

Employment:

Employment increased by approximately 900 people since year-end 2006, with acquisitions adding approximately 2,500 employees, while restructuring and the pharmaceuticals divestiture reduced employment. Employment increased by approximately 4,100 people in 2006 compared with 2005, partially due to acquisitions, with more than 750 people added by 3M's three largest 2006 acquisitions alone. In addition, 3M has increased employees in faster-growing areas of the world, such as Brazil, India, Russia, China and Poland, where on a local-currency basis sales increased more than 15% in both 2007 and 2006.

Capital Spending/Net Property, Plant and Equipment:

The bulk of 3M capital spending historically has been in the United States, resulting in higher net property, plant and equipment balances in the United States. The Company is striving to more closely align its manufacturing and sourcing with geographic market sales, and because approximately 63% of sales are outside the United States, this would increase production outside the United States, helping to improve customer service and reduce working capital requirements. Capital expenditures were \$1.422 billion in 2007 and are expected to total \$1.3 billion to \$1.4 billion in 2008.

CRITICAL ACCOUNTING ESTIMATES

Information regarding significant accounting policies is included in Note 1. As stated in Note 1, the preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. Management bases its estimates on historical experience and on various assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The Company believes its most critical accounting estimates relate to legal proceedings, the Company's pension and postretirement obligations, asset impairments and income taxes. Senior management has discussed the development, selection and disclosure of its critical accounting estimates with the Audit Committee of 3M's Board of Directors.

Legal Proceedings:

The categories of claims for which the Company has estimated its probable liability, the amount of its liability accruals, and the estimates of its related insurance receivables are critical accounting estimates related to legal proceedings. Please refer to the section entitled *Accrued Liabilities and Insurance Receivables Related to Legal Proceedings* (contained in *Legal Proceedings* in Note 13) for additional information about such estimates.

Pension and Postretirement Obligations:

3M has various company-sponsored retirement plans covering substantially all U.S. employees and many employees outside the United States. The Company accounts for its defined benefit pension and postretirement health care and life insurance benefit plans in accordance with Statement of Financial Accounting Standards (SFAS) No. 87, *Employers' Accounting for Pensions*, SFAS No. 106, *Employer's Accounting for Postretirement Benefits Other than Pensions*, in measuring plan assets and benefit obligations and in determining the amount of net periodic benefit cost, and SFAS No. 158, *Employer's Accounting for Defined Benefit Pension and Other Postretirement Benefit Plans* an amendment of FASB Statements No. 87, 88, 106 and 132(R), which was issued in September 2006 and effective as of December 31, 2006. SFAS No. 158 requires employers to recognize the underfunded or overfunded status of a defined benefit postretirement plan as an asset or liability in its statement of financial position and recognize changes in the funded status in the year in which the changes occur through accumulated other comprehensive income, which is a component of stockholders' equity.

Pension benefits associated with these plans are generally based primarily on each participant's years of service, compensation, and age at retirement or termination. Two critical assumptions, the discount rate and the expected return on plan assets, are important elements of expense and liability measurement. The assumed health care trend rate is the most significant postretirement health care assumption. See Note 11 for additional discussion of actuarial assumptions used in determining pension and postretirement health care liabilities and expenses.

The Company determines the discount rate used to measure plan liabilities as of the December 31 measurement date for the U.S. pension and postretirement benefit plans. The discount rate reflects the current rate at which the associated liabilities could be effectively settled at the end of the year. In estimating this rate, the Company looks at rates of return on fixed-income investments of similar duration to the liabilities in the plan that receive high, investment grade ratings by recognized ratings agencies. Using this methodology, the Company determined a discount rate of 6.00% to be appropriate as of December 31, 2007, which is an increase of 0.25 of a percentage point from the rate used as of December 31, 2006.

A significant element in determining the Company's pension expense in accordance with SFAS No. 87 is the expected return on plan assets, which is based on historical results for similar allocations among asset classes. For the U.S. pension plan, the Company's assumption for the expected return on plan assets was 8.75% for 2007 and will be reduced to 8.50% for 2008. Refer to Note 11 for information on how this rate is determined.

For the year ended December 31, 2007, the Company recognized total consolidated pre-tax pension expense (after settlements, curtailments and special termination benefits) of \$190 million, down from \$347 million in 2006. Pension expense (before settlements, curtailments and special termination benefits) is anticipated to decrease to approximately \$90 million in 2008. For the pension plans, holding all other factors constant, an increase/decrease in the expected long-term rate of return on plan assets of 0.25 of a percentage point would decrease/increase 2008 pension expense by approximately \$26 million for U.S. pension plans and approximately \$11 million for international pension plans. Also, holding all other factors constant, an increase/decrease in the discount rate used to measure plan liabilities of 0.25 of a percentage point would decrease/increase 2008 pension expense by approximately \$32 million for U.S. pension plans and approximately \$21 million for international pension plans. See Note 11 for details of the impact of a one percentage point change in assumed health care trend rates on the postretirement health care benefit expense and obligation.

Asset Impairments:

3M net property, plant and equipment totaled \$6.6 billion as of December 31, 2007. Management makes estimates and assumptions in preparing the consolidated financial statements for which actual results will emerge over long periods of time. This includes the recoverability of long-lived assets employed in the business, including assets of acquired businesses. These estimates and assumptions are closely monitored by management and periodically adjusted as circumstances warrant. For instance, expected asset lives may be shortened or an impairment recorded based on a change in the expected use of the asset or performance of the related business reporting unit. Impairments recorded in 2007 and 2006 related to restructuring actions and other exit activities are discussed in Note 4.

3M goodwill totaled approximately \$4.6 billion as of December 31, 2007, which, based on impairment testing, is not impaired. Impairment testing for goodwill is done at a reporting unit level. Reporting units are one level below the business segment level, but can be combined when reporting units within the same segment have similar economic characteristics. The majority of goodwill relates to and is assigned directly to a specific reporting unit. An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using earnings for the reporting unit multiplied by a price/earnings ratio for comparable industry groups, or by using a discounted cash flow analysis.

Income Taxes:

Legal Proceedings:

Edgar Filing: 3M CO - Form 10-K

The extent of 3M's operations involves dealing with uncertainties and judgments in the application of complex tax regulations in a multitude of jurisdictions. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions and resolution of disputes arising from federal, state, and international tax audits. The Company recognizes potential liabilities and records tax liabilities for anticipated tax audit issues in the U.S. and other tax jurisdictions based on its estimate of whether, and the extent to which, additional taxes will be due. As of January 1, 2007, the Company follows FIN 48 guidance to record these liabilities (refer to Note 8 for additional information). The Company adjusts these reserves in light of changing facts and circumstances; however, due to the complexity of some of these uncertainties, the ultimate resolution may result in a payment that is materially different from the Company's current estimate of the tax liabilities. If the Company's estimate of tax liabilities proves to be less than the ultimate assessment, an additional charge to expense would result. If payment of these amounts ultimately proves to be less than the recorded amounts, the reversal of the liabilities would result in tax benefits being recognized in the period when the Company determines the liabilities are no longer necessary.

NEW ACCOUNTING PRONOUNCEMENTS

Information regarding new accounting pronouncements is included in Note 1 to the Consolidated Financial Statements.

FINANCIAL CONDITION AND LIQUIDITY

The Company generates significant ongoing cash flow. Increases in long-term debt have been used, in part, to fund share repurchase activities and acquisitions. On November 15, 2007, 3M (Safety, Security and Protection Services Business) announced that it had entered into a definitive agreement for 3M's acquisition of 100 percent of the outstanding shares of Aearo Holding Corp., a global leader in the personal protection industry that manufactures and markets personal protection and energy absorbing products for approximately \$1.2 billion. The sale is expected to close towards the end of the first quarter of 2008.

At December 31 (Millions)	2007	2006	2005
Total Debt	\$ 4,920	\$ 3,553	\$ 2,381
Less: Cash, cash equivalents and marketable securities	2,955	2,084	1,072
Net Debt	\$ 1,965	\$ 1,469	\$ 1,309

Cash, cash equivalents and marketable securities at December 31, 2007 totaled approximately \$3 billion, helped by strong cash flow generation and by the timing of debt issuances. At December 31, 2006, cash balances were higher due to the significant pharmaceuticals sales proceeds received in December 2006. 3M believes its ongoing cash flows provide ample cash to fund expected investments and capital expenditures. The Company has sufficient access to capital markets to meet currently anticipated growth and acquisition investment funding needs. The Company does not utilize derivative instruments linked to the Company's stock. However, the Company does have contingently convertible debt that, if conditions for conversion are met, is convertible into shares of 3M common stock (refer to Note 10 in this document).

The Company's financial condition and liquidity are strong. Various assets and liabilities, including cash and short-term debt, can fluctuate significantly from month to month depending on short-term liquidity needs. Working capital (defined as current assets minus current liabilities) totaled \$4.476 billion at December 31, 2007, compared with \$1.623 billion at December 31, 2006. Working capital was higher primarily due to increases in cash and cash equivalents, short-term marketable securities, receivables and inventories and decreases in short-term debt and accrued income taxes.

The Company's liquidity remains strong, with cash, cash equivalents and marketable securities at December 31, 2007 totaling approximately \$3 billion. Primary short-term liquidity needs are provided through U.S. commercial paper and euro commercial paper issuances. As of December 31, 2007, outstanding total commercial paper issued totaled \$349 million and averaged \$1.249 billion during 2007. The Company believes it unlikely that its access to the commercial paper market will be restricted. In June 2007, the Company established a medium-term notes program through which up to \$3 billion of medium-term notes may be offered, with remaining shelf borrowing capacity of \$2.5 billion as of December 31, 2007. On April 30, 2007, the Company replaced its \$565-million credit facility with a new \$1.5-billion five-year credit facility, which has provisions for the Company to request an increase of the facility up to \$2 billion (at the lenders' discretion), and providing for up to \$150 million in letters of credit. As of December 31, 2007, there are \$110 million in letters of credit drawn against the facility. At December 31, 2007, available short-term committed lines of credit internationally totaled approximately \$67 million, of which \$13 million was utilized. Debt covenants do not restrict the payment of dividends. The Company has a well-known seasoned issuer shelf registration statement, effective February 24, 2006, to register an indeterminate amount of debt or equity securities for future sales. The Company intends to use the proceeds from future securities sales off this shelf for general corporate purposes.

Edgar Filing: 3M CO - Form 10-K

At December 31, 2007, certain debt agreements (\$350 million of dealer remarketable securities and \$87 million of ESOP debt) had ratings triggers (BBB-/Baa3 or lower) that would require repayment of debt. The Company has an AA credit rating, with a stable outlook, from Standard & Poor's and an Aa1 credit rating, with a negative outlook, from Moody's Investors Service. In addition, under the \$1.5-billion five-year credit facility agreement, 3M is required to maintain its EBITDA to Interest Ratio as of the end of each fiscal quarter at not less than 3.0 to 1. This is calculated (as defined in the agreement) as the ratio of consolidated total EBITDA for the four consecutive quarters then ended to total interest expense on all funded debt for the same period. At December 31, 2007, this ratio was approximately 35 to 1.

3M's cash and cash equivalents balance at December 31, 2007 totaled \$1.896 billion, with an additional \$1.059 billion in current and long-term marketable securities. 3M's strong balance sheet and liquidity provide the Company with significant flexibility to take advantage of numerous opportunities going forward. The Company will continue to invest in its operations to drive growth, including continual review of acquisition opportunities. As previously discussed, 3M expects to complete

the acquisition of Aearo Holding Corp. for approximately \$1.2 billion in 2008. 3M paid dividends of \$1.380 billion in 2007, and has a long history of dividend increases. In February 2008, the Board of Directors increased the quarterly dividend on 3M common stock by 4.2% to 50 cents per share, equivalent to an annual dividend of \$2.00 per share. In February 2007, 3M's Board of Directors authorized a two-year share repurchase of up to \$7.0 billion for the period from February 12, 2007 to February 28, 2009. At December 31, 2007, the Company has \$4.1 billion remaining under this authorization, which the Company does not currently expect to fully utilize by February 28, 2009.

In 2008, the Company expects to contribute an amount in the range of \$100 million to \$400 million to its U.S. and international pension plans. The Company does not have a required minimum pension contribution obligation for its U.S. plans in 2008. Therefore, the amount of the anticipated discretionary contribution could vary significantly depending on the U.S. plans funding status as of the 2008 measurement date and the anticipated tax deductibility of the contribution. Future contributions will also depend on market conditions, interest rates and other factors. 3M believes its strong cash flow and balance sheet will allow it to fund future pension needs without compromising growth opportunities.

The Company uses various working capital measures that place emphasis and focus on certain working capital assets and liabilities. These measures are not defined under U.S. generally accepted accounting principles and may not be computed the same as similarly titled measures used by other companies. One of the primary working capital measures 3M uses is a combined index, which includes accounts receivable, inventory and accounts payable. This combined index (defined as quarterly net sales fourth quarter at year-end multiplied by four, divided by ending net accounts receivable plus inventory less accounts payable) was 5.3 at December 31, 2007, down from 5.4 at December 31, 2006. Receivables increased \$260 million, or 8.4%, compared with December 31, 2006. Currency translation increased accounts receivable by \$159 million year-on-year, as the U.S. dollar weakened in aggregate against a multitude of currencies. Inventories increased \$251 million, or 9.7%, compared with December 31, 2006. Currency translation increased inventories by \$132 million year-on-year. Accounts payable increased \$103 million compared with December 31, 2006, with \$65 million of this year-on-year increase related to currency translation.

Cash flows from operating, investing and financing activities are provided in the tables that follow. Individual amounts in the Consolidated Statement of Cash Flows exclude the effects of acquisitions, divestitures and exchange rate impacts, which are presented separately in the cash flows. Thus, the amounts presented in the following operating, investing and financing activities tables reflect changes in balances from period to period adjusted for these effects.

Cash Flows from Operating Activities:

Years ended December 31 (Millions)	2007	2006	2005
Net income	\$ 4,096	\$ 3,851	\$ 3,111
Depreciation and amortization	1,072	1,079	986
Company pension contributions	(376)	(348)	(654)
Company postretirement contributions	(3)	(37)	(134)
Company pension expense	190	347	331
Company postretirement expense	65	93	106
Stock-based compensation expense	228	200	155
Gain from sale of businesses	(849)	(1,074)	
Income taxes (deferred and accrued income taxes)	(34)	(178)	402
Excess tax benefits from stock-based compensation	(74)	(60)	(54)

Other net		(105)		252		198
Net cash provided by operating activities	\$	4,275	\$	3,839	\$	4,204

Cash flows from operating activities can fluctuate significantly from period to period, as pension funding decisions, tax timing differences and other items can significantly impact cash flows. In both 2007 and 2006, the Company made discretionary contributions of \$200 million to its U.S. qualified pension plan, and in 2005 made discretionary contributions totaling \$500 million.

In 2007, cash flows provided by operating activities increased \$436 million, including an increase in net income of \$245 million. Since the gain from sale of businesses is included in and increases net income, the pre-tax gain from the sale of the businesses must be subtracted, as shown above, to properly reflect operating cash flows. The cash proceeds from the sale of the pharmaceuticals business are shown as part of cash from investing activities; however, when the related taxes are paid they are required to be shown as part of cash provided by operating activities. Thus, operating cash flows for 2007 were penalized due to cash income tax payments of approximately \$630 million in 2007 that related to the sale of the global branded pharmaceuticals business. Non-pharmaceutical related cash income tax payments were approximately \$475 million lower than 2006 due to normal timing differences in tax payments, which benefited cash flows. Accounts receivable and inventory increases reduced cash flows in 2007, but decreased cash flow less than in 2006, resulting in a year-on-year benefit to cash flows of \$323 million. The category *Other-net* in the preceding table reflects changes in other asset and liability accounts, including the impact of cash payments made in connection with 3M's restructuring actions (Note 4).

In 2006, cash flows provided by operating activities decreased \$365 million. This decrease was due in large part to an increase of approximately \$600 million in tax payments in 2006 compared with 2005. The higher tax payments in 2006 primarily related to the Company's repatriation of \$1.7 billion of foreign earnings in the United States pursuant to the provisions of the American Jobs Creation Act of 2004. The category *Other-net* in the preceding table reflects changes in other asset and liability accounts, including outstanding liabilities at December 31, 2006, related to 3M's restructuring actions (Note 4).

Cash Flows from Investing Activities:

Years ended December 31 (Millions)	2007	2006	2005
Purchases of property, plant and equipment (PP&E)	\$ (1,422)	\$ (1,168)	\$ (943)
Proceeds from sale of PP&E and other assets	103	49	41
Acquisitions, net of cash acquired	(539)	(888)	(1,293)
Proceeds from sale of businesses	897	1,209	
Purchases and proceeds from sale or maturities of marketable securities and investments net	(406)	(662)	(46)
Net cash used in investing activities	\$ (1,367)	\$ (1,460)	\$ (2,241)

Investments in property, plant and equipment enable growth in diverse markets, helping to meet product demand and increasing manufacturing efficiency. In 2007, numerous plants were opened or expanded internationally. This included two facilities in Korea (respirator manufacturing facility and optical plant), an optical plant in Poland, industrial adhesives/tapes facilities in both Brazil and the Philippines, a plant in Russia (corrosion protection, industrial adhesive and tapes, and respirators), a plant in China (optical systems, industrial adhesives and tapes, and personal care), an expansion in Canada (construction and home improvement business), in addition to investments in India, Mexico and other countries. In addition, 3M expanded manufacturing capabilities in the U.S., including investments in industrial adhesives/tapes and optical. 3M also exited several high-cost underutilized manufacturing facilities and streamlined several supply chains by relocating equipment from one facility to another. The streamlining work has primarily occurred inside the U.S. and is in addition to the streamlining achieved through plant construction. As a result of this increased activity, capital expenditures were \$1.422 billion in 2007, an increase of \$254 million when compared to 2006. The Company expects capital expenditures to total approximately \$1.3 billion to \$1.4 billion in 2008. Refer to the preceding *Capital Spending/Net Property, Plant and Equipment* section for more detail.

Refer to Note 2 for information on 2007, 2006 and 2005 acquisitions. Note 2 also provides information on the proceeds from the sale of businesses. The Company is actively considering additional acquisitions, investments and strategic alliances, and from time to time may also divest certain businesses.

Edgar Filing: 3M CO - Form 10-K

Purchases of marketable securities and investments and proceeds from sale (or maturities) of marketable securities and investments are primarily attributable to asset-backed securities, agency securities, corporate medium-term note securities, auction rate securities and other securities, which are classified as available-for-sale. Refer to Note 9 for more details about 3M's diversified marketable securities portfolio, which totaled \$1.059 billion as of December 31, 2007. Purchases of marketable securities, net of sales and maturities, totaled \$429 million for 2007 and \$637 million for 2006. Purchases of investments in 2005 include the purchase of 19% of TI&M Beteiligungsgesellschaft mbH for approximately \$55 million, which is reported as Investments in the Consolidated Balance Sheet and as Purchases of marketable securities and investments in the Consolidated Statement of Cash Flows. The recovery of approximately \$25 million of this investment in 2007 reduced Investments and is shown in cash flows within Proceeds from sale of marketable securities and investments. This investment is discussed in more detail under the preceding section

entitled Industrial and Transportation Business. Additional purchases of investments include additional survivor benefit insurance and equity investments.

Cash Flows from Financing Activities:

Years ended December 31 (Millions)	2007	2006	2005
Change in short-term debt net	\$ (1,222)	\$ 882	\$ (258)
Repayment of debt (maturities greater than 90 days)	(1,580)	(440)	(656)
Proceeds from debt (maturities greater than 90 days)	4,024	693	429
Total cash change in debt	\$ 1,222	\$ 1,135	\$ (485)
Purchases of treasury stock	(3,239)	(2,351)	(2,377)
Reissuances of treasury stock	796	523	545
Dividends paid to stockholders	(1,380)	(1,376)	(1,286)
Excess tax benefits from stock-based compensation	74	60	54
Distributions to minority interests and other net	(20)	(52)	(76)
Net cash used in financing activities	\$ (2,547)	\$ (2,061)	\$ (3,625)

Total debt at December 31, 2007, was \$4.920 billion, up from \$3.553 billion at year-end 2006. The net change in short-term debt is primarily due to commercial paper activity. In 2007, the repayment of debt for maturities greater than 90 days is primarily comprised of commercial paper repayments of approximately \$1.15 billion and the November 2007 redemption of approximately \$322 million in Convertible Notes. In 2007, proceeds from debt included long-term debt and commercial paper issuances totaling approximately \$4 billion. This was comprised of Eurobond issuances in December 2007 and July 2007 totaling approximately \$1.5 billion in U.S. dollars, a March 2007 long-term debt issuance of \$750 million and a December 2007 fixed rate note issuance of \$500 million, plus commercial paper issuances (maturities greater than 90 days) of approximately \$1.25 billion. Increases in long-term debt have been used, in part, to fund share repurchase activities. The Company accelerated purchases of treasury stock when compared to prior years, buying back \$3.2 billion in shares in 2007. Total debt was 30% of total capital (total capital is defined as debt plus equity), compared with 26% at year-end 2006.

Debt securities, including 2007 debt issuances, the Company's shelf registration, dealer remarketable securities and Convertible Notes, are all discussed in more detail in Note 10. The Company has a well-known seasoned issuer shelf registration statement, effective February 24, 2006, to register an indeterminate amount of debt or equity securities for future sales. On June 15, 2007, the Company registered 150,718 shares of the Company's common stock under this shelf on behalf of and for the sole benefit of the selling stockholders in connection with the Company's acquisition of assets of Diamond Productions, Inc. The Company intends to use the proceeds from future securities sales off this shelf for general corporate purposes. In connection with this shelf registration, in June 2007 the Company established a medium-term notes program through which up to \$3 billion of medium-term notes may be offered. In December 2007, 3M issued a five-year, \$500 million, fixed rate note with a coupon rate of 4.65% under this medium-term notes program. This program has a remaining capacity of \$2.5 billion as of December 31, 2007.

The Company's \$350 million of dealer remarketable securities (classified as current portion of long-term debt) were remarketed for one year in December 2007. At December 31, 2007, \$350 million of dealer remarketable securities (final maturity 2010) and \$62 million of floating rate notes (final maturity 2044) are classified as current portion of long-term debt as the result of put provisions associated with these debt instruments. The Company has Convertible Notes with a book value of \$222 million at December 31, 2007. The next put option date for these Convertible Notes is November 2012. In November 2007, 364,598 outstanding bonds were redeemed resulting in a payout from 3M of approximately \$322 million.

Edgar Filing: 3M CO - Form 10-K

Repurchases of common stock are made to support the Company's stock-based employee compensation plans and for other corporate purposes. In February 2007, 3M's Board of Directors authorized a two-year share repurchase of up to \$7.0 billion for the period from February 12, 2007 to February 28, 2009. As of December 31, 2007, approximately \$4.1 billion remained available for repurchase. Refer to the table titled "Issuer Purchases of Equity Securities" in Part II, Item 5, for more information.

Cash dividends paid to stockholders totaled \$1.380 billion (\$1.92 per share) in 2007, \$1.376 billion (\$1.84 per share) in 2006 and \$1.286 billion (\$1.68 per share) in 2005. 3M has paid dividends since 1916. In February 2008, the Board of Directors increased the quarterly dividend on 3M common stock by 4.2% to 50 cents per share, equivalent to an annual dividend of \$2.00 per share. This marked the 50th consecutive year of dividend increases. Other cash flows from

financing activities primarily include distributions to minority interests, excess tax benefits from stock-based compensation, changes in cash overdraft balances, and principal payments for capital leases.

Off-Balance Sheet Arrangements and Contractual Obligations:

As of December 31, 2007, the Company has not utilized special purpose entities to facilitate off-balance sheet financing arrangements. 3M's accrued product warranty liabilities, recorded on the Consolidated Balance Sheet as part of current and long-term liabilities, are estimated at approximately \$21 million. 3M does not consider this amount to be material. The fair value of 3M guarantees of loans with third parties and other guarantee arrangements are not material.

In addition to guarantees, 3M, in the normal course of business, periodically enters into agreements that require the Company to indemnify either major customers or suppliers for specific risks, such as claims for injury or property damage arising out of the use of 3M products or the negligence of 3M personnel, or claims alleging that 3M products infringe third-party patents or other intellectual property. While 3M's maximum exposure under these indemnification provisions cannot be estimated, these indemnifications are not expected to have a material impact on the Company's consolidated results of operations or financial condition.

A summary of the Company's significant contractual obligations as of December 31, 2007, follows:

Contractual Obligations

(Millions)	Payments due by year						
	Total	2008	2009	2010	2011	2012	After 2012
Long-term debt, including current portion (Note 10)	\$ 4,559	\$ 540	\$ 477	\$ 24	\$	\$ 500	\$ 3,018
Interest on long-term debt	2,671	211	185	170	169	169	1,767
Operating leases (Note 13)	441	98	79	58	35	30	141
Capital leases (Note 13)	84	7	6	6	6	5	54
Unconditional purchase obligations and other	787	626	120	33	5	2	1
Total contractual cash obligations	\$ 8,542	\$ 1,482	\$ 867	\$ 291	\$ 215	\$ 706	\$ 4,981

Long-term debt payments due in 2008 include \$350 million of dealer remarketable securities (final maturity 2010) and \$62 million of floating rate notes (final maturity 2044). These securities are classified as the current portion of long-term debt as the result of put provisions associated with these debt instruments.

Unconditional purchase obligations are defined as an agreement to purchase goods or services that is enforceable and legally binding on the Company. Included in the unconditional purchase obligations category above are certain obligations related to take or pay contracts, capital commitments, service agreements and utilities. These estimates include both unconditional purchase obligations with terms in excess of one year and normal ongoing purchase obligations with terms of less than one year. Many of these commitments relate to take or pay contracts, in which 3M guarantees payment to ensure availability of products or services that are sold to customers. The Company expects to receive consideration (products or services) for these unconditional purchase obligations. Contractual capital commitments are included in the preceding table, but these commitments represent a small part of the Company's expected capital spending in 2008 and beyond. The purchase obligation amounts do not represent the entire anticipated purchases in the future, but represent only those items for which the Company is contractually obligated. The majority of 3M's products and services are purchased as needed, with no unconditional commitment. For this reason, these amounts will not provide a reliable indicator of the Company's expected future cash outflows on a stand-alone basis.

Other obligations, included in the preceding table within the caption entitled Unconditional purchase obligations and other, include the current portion of the liability for uncertain tax positions under FIN 48. The Company is not able to reasonably estimate the timing of the long-term payments or the amount by which the liability will increase or decrease over time; therefore, the long-term portion of the liability of \$304 million is excluded from the preceding table. Refer to Note 8 for further details.

As discussed in Note 11, the Company does not have a required minimum pension contribution obligation for its U.S. plans in 2008 and Company contributions to its U.S. and international pension plans are expected to be largely discretionary in 2008 and future years; therefore, amounts related to these plans are not included in the preceding table.

FINANCIAL INSTRUMENTS

The Company enters into contractual derivative arrangements in the ordinary course of business to manage foreign currency exposure, interest rate risks and commodity price risks. A financial risk management committee, composed of senior management, provides oversight for risk management and derivative activities. This committee determines the Company's financial risk policies and objectives, and provides guidelines for derivative instrument utilization. This committee also establishes procedures for control and valuation, risk analysis, counterparty credit approval, and ongoing monitoring and reporting.

The Company enters into foreign exchange forward contracts, options and swaps to hedge against the effect of exchange rate fluctuations on cash flows denominated in foreign currencies and certain intercompany financing transactions. The Company manages interest rate risks using a mix of fixed and floating rate debt. To help manage borrowing costs, the Company may enter into interest rate swaps. Under these arrangements, the Company agrees to exchange, at specified intervals, the difference between fixed and floating interest amounts calculated by reference to an agreed-upon notional principal amount. The Company manages commodity price risks through negotiated supply contracts, price protection agreements and forward physical contracts.

A Monte Carlo simulation technique was used to test the Company's exposure to changes in currency and interest rates and assess the risk of loss or benefit in after-tax earnings of financial instruments, derivatives and underlying exposures outstanding at December 31, 2007. The model (third-party bank dataset) used a 95% confidence level over a 12-month time horizon. The model used analyzed 17 currencies, interest rates related to three currencies, and five commodities, but does not purport to represent what actually will be experienced by the Company. This model does not include certain hedge transactions, because the Company believes their inclusion would not materially impact the results. The following table summarizes the possible adverse and positive impacts to after-tax earnings related to these exposures.

(Millions)	Adverse impact on after-tax earnings		Positive impact on after-tax earnings	
	2007	2006	2007	2006
Foreign exchange rates	\$ (54)	\$ (56)	\$ 57	\$ 61
Interest rates	(13)	(15)	15	17
Commodity rates	(3)	(6)	2	5

The global exposures related to purchased components and materials are such that a 1% price change would result in a pre-tax cost or savings of approximately \$60 million per year. The global energy exposure is such that a 10% price change would result in a pre-tax cost or savings of approximately \$38 million per year. Derivative instruments are used to hedge approximately 1% of the purchased components and materials exposure and are used to hedge approximately 10% of this energy exposure.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K, including Management's Discussion and Analysis of Financial Condition and Results of Operations in Item 7, contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Company may also make forward-looking statements in other reports filed with the Securities and Exchange Commission, in materials delivered to stockholders and in press releases. In addition, the Company's representatives may from time to time make oral forward-looking statements.

Forward-looking statements relate to future events and typically address the Company's expected future business and financial performance. Words such as plan, expect, aim, believe, project, target, anticipate, intend, estimate, will, should, could and other words

Edgar Filing: 3M CO - Form 10-K

meaning, typically identify such forward-looking statements. In particular, these include statements about the Company's strategy for growth, product development, market position, future performance or results of current or anticipated products, interest rates, foreign exchange rates, financial results, and the outcome of contingencies, such as legal proceedings. The Company assumes no obligation to update or revise any forward-looking statements.

Forward-looking statements are based on certain assumptions and expectations of future events and trends that are subject to risks and uncertainties. Actual future results and trends may differ materially from historical results or those reflected in any such forward-looking statements depending on a variety of factors. Discussion of these factors is incorporated by reference from Part I, Item 1A, Risk Factors, of this document, and should be considered an integral part of Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

In the context of Item 7A, market risk refers to the risk of loss arising from adverse changes in financial and derivative instrument market rates and prices, such as fluctuations in interest rates and foreign currency exchange rates. The Company discusses risk management in various places throughout this document, including discussions in Item 7 concerning Financial Condition and Liquidity, and Financial Instruments, and in the Notes to Consolidated Financial Statements (Long-Term Debt and Short-Term Borrowings, Derivatives and Other Financial Instruments, and the Derivatives and Hedging Activities accounting policy). All derivative activity is governed by written policies, and a value-at-risk analysis is provided for these derivatives. The Company does not have leveraged derivative positions. However, the Company does have contingently convertible debt that, if conditions for conversion are met, is convertible into shares of 3M common stock (refer to Note 10 in this document).

Management's Responsibility for Financial Reporting

Management is responsible for the integrity and objectivity of the financial information included in this report. The financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America. Where necessary, the financial statements reflect estimates based on management's judgment.

Management has established and maintains a system of internal accounting and other controls for the Company and its subsidiaries. This system and its established accounting procedures and related controls are designed to provide reasonable assurance that assets are safeguarded, that the books and records properly reflect all transactions, that policies and procedures are implemented by qualified personnel, and that published financial statements are properly prepared and fairly presented. The Company's system of internal control is supported by widely communicated written policies, including business conduct policies, which are designed to require all employees to maintain high ethical standards in the conduct of Company affairs. Internal auditors continually review the accounting and control system.

3M Company

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Management conducted an assessment of the Company's internal control over financial reporting based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control - Integrated Framework*. Based on the assessment, management concluded that, as of December 31, 2007, the Company's internal control over financial reporting is effective.

The Company's internal control over financial reporting as of December 31, 2007 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein, which expresses an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2007.

3M Company

Report of Independent Registered Public Accounting Firm

To the Stockholders and Board of Directors of 3M Company:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of 3M Company and its subsidiaries (the Company) at December 31, 2007 and 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control Over Financial Reporting in the accompanying index. Our responsibility is to express opinions on these financial statements and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 1 to the consolidated financial statements, the Company changed the manner in which it accounts for conditional asset retirement obligations in 2005, the manner in which it accounts for defined benefit pension and other post-retirement plans in 2006, and the manner in which it accounts for uncertain tax positions in 2007.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The accompanying Notes to Consolidated Financial Statements are an integral part of this statement.

Notes to Consolidated Financial Statements

NOTE 1. Significant Accounting Policies

Consolidation: 3M is a diversified global manufacturer, technology innovator and marketer of a wide variety of products. All significant subsidiaries are consolidated. All significant intercompany transactions are eliminated. As used herein, the term 3M or Company refers to 3M Company and subsidiaries unless the context indicates otherwise.

Foreign currency translation: Local currencies generally are considered the functional currencies outside the United States. Assets and liabilities for operations in local-currency environments are translated at year-end exchange rates. Income and expense items are translated at average rates of exchange prevailing during the year. Cumulative translation adjustments are recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity.

Reclassifications: Certain amounts in the prior years' consolidated financial statements have been reclassified to conform to the current year presentation.

Use of estimates: The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

Cash and cash equivalents: Cash and cash equivalents consist of cash and temporary investments with maturities of three months or less when purchased.

Investments: Investments primarily include the cash surrender value of life insurance policies, real estate not used in the business, venture capital and equity-method investments. Unrealized gains and losses relating to investments classified as available-for-sale are recorded as a component of accumulated other comprehensive income (loss) in stockholders' equity.

Inventories: Inventories are stated at the lower of cost or market, with cost generally determined on a first-in, first-out basis.

Property, plant and equipment: Property, plant and equipment, including capitalized interest and internal engineering costs, are recorded at cost. Depreciation of property, plant and equipment generally is computed using the straight-line method based on the estimated useful lives of the assets. The estimated useful lives of buildings and improvements primarily range from 10 to 40 years, with the majority in the range of 20 to 40 years. The estimated useful lives of machinery and equipment primarily range from three to 15 years, with the majority in the range of five to 10 years. Fully depreciated assets are retained in property and accumulated depreciation accounts until disposal. Upon disposal, assets and related accumulated depreciation are removed from the accounts and the net amount, less proceeds from disposal, is charged or credited to operations. Property, plant and equipment amounts are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (asset group) may not be recoverable. An impairment loss would be recognized when the carrying amount of an asset exceeds the estimated undiscounted future cash flows expected to result from the use of the asset and its eventual disposition. The amount of the

impairment loss to be recorded is calculated by the excess of the asset's carrying value over its fair value. Fair value is generally determined using a discounted cash flow analysis.

Goodwill: Goodwill is the excess of cost of an acquired entity over the amounts assigned to assets acquired and liabilities assumed in a business combination. Goodwill is not amortized. Goodwill is tested for impairment annually, and will be tested for impairment between annual tests if an event occurs or circumstances change that would indicate the carrying amount may be impaired. Impairment testing for goodwill is done at a reporting unit level. Reporting units are one level below the business segment level, but can be combined when reporting units within the same segment have similar economic characteristics. The majority of goodwill relates to and is assigned directly to specific reporting units. An impairment loss generally would be recognized when the carrying amount of the reporting unit's net assets exceeds the estimated fair value of the reporting unit. The estimated fair value of a reporting unit is determined using earnings for the reporting unit multiplied by a price/earnings ratio for comparable industry groups, or by using a discounted cash flow analysis. The Company completed its annual goodwill impairment test in the fourth quarter of 2007 and determined that no goodwill was impaired.

Intangible assets: Intangible assets include patents, tradenames and other intangible assets acquired from an independent party. Intangible assets with an indefinite life, namely certain tradenames, are not amortized. Intangible assets with a definite life are amortized on a straight-line basis, with estimated useful lives ranging from one to 20 years. Indefinite-lived intangible assets are tested for impairment annually, and will be tested for impairment between annual tests if an event occurs or circumstances change that would indicate that the carrying amount may be impaired. Intangible assets with a definite life are tested for impairment whenever events or circumstances indicate that the

carrying amount of an asset (asset group) may not be recoverable. An impairment loss is recognized when the carrying amount of an asset exceeds the estimated undiscounted cash flows used in determining the fair value of the asset. The amount of the impairment loss to be recorded is calculated by the excess of the asset's carrying value over its fair value. Fair value is generally determined using a discounted cash flow analysis. Costs related to internally developed intangible assets, such as patents, are expensed as incurred, primarily in Research, development and related expenses.

Revenue (sales) recognition: The Company sells a wide range of products to a diversified base of customers around the world and has no material concentration of credit risk. Revenue is recognized when the risks and rewards of ownership have substantively transferred to customers. This condition normally is met when the product has been delivered or upon performance of services. The Company records estimated reductions to revenue for customer and distributor incentives, such as rebates, at the time of the initial sale. The estimated reductions are based on the sales terms, historical experience, trend analysis and projected market conditions in the various markets served. Sales, use, value-added and other excise taxes are not recognized in revenue.

The majority of 3M's sales agreements are for standard products and services with customer acceptance occurring upon delivery of the product or performance of the service. 3M also enters into agreements that contain multiple elements (such as equipment, installation and service) or non-standard terms and conditions. For multiple-element arrangements, 3M recognizes revenue for delivered elements when it has stand-alone value to the customer, the fair values of undelivered elements are known, customer acceptance of the delivered elements has occurred, and there are only customary refund or return rights related to the delivered elements. In addition to the preceding conditions, equipment revenue is not recorded until the installation has been completed if equipment acceptance is dependent upon installation, or if installation is essential to the functionality of the equipment. Installation revenues are not recorded until installation has been completed. For prepaid service contracts, sales revenue is recognized on a straight-line basis over the term of the contract, unless historical evidence indicates the costs are incurred on other than a straight-line basis. License fee revenue is recognized as earned, and no revenue is recognized until the inception of the license term. On occasion, agreements will contain milestones, or 3M will recognize revenue based on proportional performance. For these agreements, and depending on the specifics, 3M may recognize revenue upon completion of a substantive milestone, or in proportion to costs incurred to date compared with the estimate of total costs to be incurred.

Accounts Receivable and Allowances: Trade accounts receivable are recorded at the invoiced amount and do not bear interest. The Company maintains allowances for bad debts, cash discounts, product returns and various other items. The allowance for doubtful accounts and product returns is based on the best estimate of the amount of probable credit losses in existing accounts receivable and anticipated sales returns. The Company determines the allowances based on historical write-off experience by industry and regional economic data and historical sales returns. The Company reviews the allowance for doubtful accounts monthly. The Company does not have any significant off-balance-sheet credit exposure related to its customers.

Advertising and merchandising: These costs are charged to operations in the year incurred, and totaled \$469 million in 2007, \$471 million in 2006 and \$457 million in 2005.

Research, development and related expenses: These costs are charged to operations in the year incurred and are shown on a separate line of the Consolidated Statement of Income. Research, development and related expenses totaled \$1.368 billion in 2007, \$1.522 billion in 2006 and \$1.274 billion in 2005. In 2006, this included a \$95 million in-process research and development charge (discussed in Note 2) and \$75 million in restructuring actions (Note 4). Research and development expenses, covering basic scientific research and the application of scientific advances in the development of new and improved products and their uses, totaled \$788 million in 2007 compared to \$943 million in 2006, decreasing due to the \$95 million for purchased in-process research and development discussed above and also due to the pharmaceuticals business divestiture (Note 2). Research and development expenses totaled \$818 million in 2005. Related expenses primarily include technical support provided by 3M to customers who are using existing 3M products, and internally developed patent costs, which include costs and fees incurred to prepare, file, secure and maintain patents.

Internal-use software: The Company capitalizes direct costs of materials and services used in the development of internal-use software. Amounts capitalized are amortized on a straight-line basis over a period of three to five years and are reported as a component of machinery and equipment within property, plant and equipment.

Environmental: Environmental expenditures relating to existing conditions caused by past operations that do not contribute to current or future revenues are expensed. Reserves for liabilities for anticipated remediation costs are recorded on an undiscounted basis when they are probable and reasonably estimable, generally no later than the completion of feasibility studies or the Company's commitment to a plan of action. Environmental expenditures for capital projects that contribute to current or future operations generally are capitalized and depreciated over their estimated useful lives.

Edgar Filing: 3M CO - Form 10-K

Income taxes: The provision for income taxes is determined using the asset and liability approach. Under this approach, deferred income taxes represent the expected future tax consequences of temporary differences between the carrying amounts and tax basis of assets and liabilities. The Company records a valuation allowance to reduce its deferred tax assets when uncertainty regarding their reliability exists. As of December 31, 2007, no significant valuation allowances were recorded.

Earnings per share: The difference in the weighted average shares outstanding for calculating basic and diluted earnings per share is attributable to the dilution associated with the Company's stock-based compensation plans. Certain Management Stock Ownership Program average options outstanding during the years 2007, 2006 and 2005 were not included in the computation of diluted earnings per share because they would not have had a dilutive effect (21.6 million average options for 2007, 31.5 million average options for 2006, and 15.4 million average options for 2005). As discussed in Note 10, the conditions for conversion related to the Company's Convertible Notes have never been met. If the conditions for conversion are met, 3M may choose to pay in cash and/or common stock; however, if this occurs, the Company has the intent and ability to settle this debt security in cash. Accordingly, there was no impact on 3M's diluted earnings per share. The computations for basic and diluted earnings per share for the years ended December 31 follow:

Earnings Per Share Computations				
(Amounts in millions, except per share amounts)				
	2007	2006	2005	
Numerator:				
Net income	\$ 4,096	\$ 3,851	\$	3,111
Denominator:				
Denominator for weighted average common shares outstanding basic	718.3	747.5		764.9
Dilution associated with the Company's stock-based compensation plans	13.7	13.5		16.4
Denominator for weighted average common shares outstanding diluted	732.0	761.0		781.3
Earnings per share basic	\$ 5.70	\$ 5.15	\$	4.07
Earnings per share diluted	\$ 5.60	\$ 5.06	\$	3.98

Stock-based compensation: In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (revised 2004). SFAS No. 123R supersedes APB Opinion No. 25. Under APB Opinion No. 25, no compensation expense is recognized for employee stock option grants if the exercise price of the Company's stock option grants is at or above the fair market value of the underlying stock on the date of grant. Under SFAS No. 123R, compensation expense is recognized for both the General Employees' Stock Purchase Plan (GESPP) and the Management Stock Ownership Plan (MSOP). SFAS No. 123R requires the determination of the fair value of the share-based compensation at the grant date and the recognition of the related expense over the period in which the share-based compensation vests. The Company adopted SFAS No. 123R effective January 1, 2006. The Company adopted SFAS No. 123R using the modified retrospective method. All prior periods have been restated to give effect to the fair-value-based method of accounting for awards granted in fiscal years beginning on or after January 1, 1995. The Company believes that the modified retrospective application of this standard achieves the highest level of clarity and comparability among the presented periods. On November 10, 2005, the FASB issued FASB Staff Position No. FAS 123(R)-3, Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards (the FSP). The FSP provides that companies may elect to use a specified short-cut method to calculate the historical pool of windfall tax benefits upon adoption of SFAS No. 123R. The Company elected to use the short-cut method when it adopted SFAS No. 123R on January 1, 2006. Refer to Note 15 for additional information.

Comprehensive income: Total comprehensive income and the components of accumulated other comprehensive income (loss) are presented in the Consolidated Statement of Changes in Stockholders' Equity and Comprehensive Income. Accumulated other comprehensive income (loss) is composed of foreign currency translation effects (including hedges of net investments in international companies), defined benefit pension plan adjustments, unrealized gains and losses on available-for-sale debt and equity securities, and unrealized gains and losses on cash flow hedging

instruments.

Derivatives and hedging activities: All derivative instruments are recorded on the balance sheet at fair value. The Company uses interest rate swaps, currency swaps, and forward and option contracts to manage risks generally

associated with foreign exchange rate, interest rate and commodity market volatility. All hedging instruments that qualify for hedge accounting are designated and effective as hedges, in accordance with U.S. generally accepted accounting principles. If the underlying hedged transaction ceases to exist, all changes in fair value of the related derivatives that have not been settled are recognized in current earnings. Instruments that do not qualify for hedge accounting are marked to market with changes recognized in current earnings. The Company does not hold or issue derivative financial instruments for trading purposes and is not a party to leveraged derivatives. However, the Company does have contingently convertible debt that, if conditions for conversion are met, is convertible into shares of 3M common stock (refer to Note 10 in this document).

New Accounting Pronouncements

As of December 31, 2005, the Company adopted FASB Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations* (FIN 47). This accounting standard applies to the fair value of a liability for an asset retirement obligation associated with the retirement of tangible long-lived assets and where the liability can be reasonably estimated. Conditional asset retirement obligations exist for certain of the Company's long-term assets. The fair value of these obligations is recorded as liabilities on a discounted basis. Over time the liabilities are accreted for the change in the present value and the initial capitalized costs are depreciated over the useful lives of the related assets. The adoption of FIN 47 effective December 31, 2005, resulted in the recognition of an asset retirement obligation liability of \$59 million at December 31, 2005, and an after-tax charge of \$35 million for 2005, which is reflected as a cumulative effect of change in accounting principle in the Consolidated Statement of Income. At December 31, 2007, the asset retirement obligation liability was \$59 million.

In February 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 155, *Hybrid Instruments*. SFAS No. 155 amends SFAS No. 133 and SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. SFAS No. 155 also resolves issues addressed in Statement 133 Implementation Issue No. D1, *Application of Statement 133 to Beneficial Interests in Securitized Financial Assets*. SFAS No. 155: a) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, b) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133, c) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, d) clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives, and e) amends SFAS No. 140 to eliminate the prohibition on a qualifying special purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. The Company adopted SFAS No. 155 effective January 1, 2007; however, there was no material impact.

In June 2006, the FASB issued Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, an interpretation of FASB Statement No. 109. This interpretation was effective as of January 1, 2007. Refer to Note 8 for additional information concerning this standard.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. SFAS No. 157 establishes a single definition of fair value and a framework for measuring fair value, sets out a fair value hierarchy to be used to classify the source of information used in fair value measurements, and requires new disclosures of assets and liabilities measured at fair value based on their level in the hierarchy. SFAS No. 157 is effective for all fiscal years beginning after November 15, 2007 (January 1, 2008 for 3M) and is to be applied prospectively. In February 2008, the FASB issued Staff Positions No. 157-1 and No. 157-2 which partially defer the effective date of SFAS No. 157 for one year for certain nonfinancial assets and liabilities and remove certain leasing transactions from its scope. The Company is currently evaluating the impacts and disclosures of this standard, but would not expect SFAS No. 157 to have a material impact on 3M's consolidated results of operations or financial condition.

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106 and 132(R). Refer to Note 11 for additional information concerning this standard.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS No. 159 permits an entity to choose, at specified election dates, to measure eligible financial instruments and certain other items at fair value that are not currently required to be measured at fair value. An entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. Upfront costs and fees related to items for which the fair value option is elected shall be recognized in earnings as incurred and not deferred. SFAS No. 159 also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that choose different measurement attributes for similar types of assets and liabilities. SFAS No. 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007 (January 1, 2008 for 3M) and interim periods within those fiscal years. At the

effective date, an entity may elect the fair value option for eligible items that exist at that date. The entity shall report the effect of the first remeasurement to fair value as a cumulative-effect adjustment to the opening balance of retained earnings. The Company has not elected the fair value option for eligible items that existed as of January 1, 2008.

In June 2007, the FASB's Emerging Issues Task Force reached a consensus on EITF Issue No. 07-3, *Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities* that would require nonrefundable advance payments made by the Company for future R&D activities to be capitalized and recognized as an expense as the goods or services are received by the Company. EITF Issue No. 07-3 is effective for 3M with respect to new arrangements entered into beginning January 1, 2008. The Company is currently evaluating the impacts and disclosures of this standard, but would not expect EITF Issue No. 07-3 to have a material impact on 3M's consolidated results of operations or financial condition.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*, which changes how business acquisitions are accounted. SFAS No. 141R requires the acquiring entity in a business combination to recognize all (and only) the assets acquired and liabilities assumed in the transaction and establishes the acquisition-date fair value as the measurement objective for all assets acquired and liabilities assumed in a business combination. Certain provisions of this standard will, among other things, impact the determination of acquisition-date fair value of consideration paid in a business combination (including contingent consideration); exclude transaction costs from acquisition accounting; and change accounting practices for acquired contingencies, acquisition-related restructuring costs, in-process research and development, indemnification assets, and tax benefits. For 3M, SFAS No. 141R is effective for business combinations and adjustments to an acquired entity's deferred tax asset and liability balances occurring after December 31, 2008. The Company is currently evaluating the future impacts and disclosures of this standard.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements*, an amendment of ARB No. 51, which establishes new standards governing the accounting for and reporting of noncontrolling interests (NCIs) in partially owned consolidated subsidiaries and the loss of control of subsidiaries. Certain provisions of this standard indicate, among other things, that NCIs (previously referred to as minority interests) be treated as a separate component of equity, not as a liability; that increases and decrease in the parent's ownership interest that leave control intact be treated as equity transactions, rather than as step acquisitions or dilution gains or losses; and that losses of a partially owned consolidated subsidiary be allocated to the NCI even when such allocation might result in a deficit balance. This standard also requires changes to certain presentation and disclosure requirements. For 3M, SFAS No. 160 is effective beginning January 1, 2009. The provisions of the standard are to be applied to all NCIs prospectively, except for the presentation and disclosure requirements, which are to be applied retrospectively to all periods presented. The Company is currently evaluating the future impacts and disclosures of this standard.

In December 2007, the FASB ratified the Emerging Issues Task Force consensus on EITF Issue No. 07-1, *Accounting for Collaborative Arrangements* that discusses how parties to a collaborative arrangement (which does not establish a legal entity within such arrangement) should account for various activities. The consensus indicates that costs incurred and revenues generated from transactions with third parties (i.e. parties outside of the collaborative arrangement) should be reported by the collaborators on the respective line items in their income statements pursuant to EITF Issue No. 99-19, *Reporting Revenue Gross as a Principal Versus Net as an Agent*. Additionally, the consensus provides that income statement characterization of payments between the participants in a collaborative arrangement should be based upon existing authoritative pronouncements; analogy to such pronouncements if not within their scope; or a reasonable, rational, and consistently applied accounting policy election. EITF Issue No. 07-1 is effective for 3M beginning January 1, 2009 and is to be applied retrospectively to all periods presented for collaborative arrangements existing as of the date of adoption. The Company is currently evaluating the impacts and disclosures of this standard, but would not expect EITF Issue No. 07-1 to have a material impact on 3M's consolidated results of operations or financial condition.

NOTE 2. Acquisitions and Divestitures

Divestitures:

In January 2007, 3M completed the sale of its global branded pharmaceuticals business in Europe to Meda AB. 3M received proceeds of \$817 million for this transaction and recognized, net of assets sold, a pre-tax gain of \$781 million (recorded in the Health Care segment) in 2007.

In December 2006, 3M completed the sale of its global branded pharmaceuticals business in the United States, Canada, and Latin America region and the Asia Pacific region, including Australia and South Africa. 3M received proceeds of \$1.209 billion for this transaction and recognized, net of assets sold, a pre-tax gain of \$1.074 billion (recorded in Health Care Business) in 2006.

Buyer and sale price information by region is as follows:

- Meda AB acquired 3M's pharmaceuticals business in Europe for \$817 million in 2007.
- Graceway Pharmaceuticals Inc. acquired 3M's pharmaceutical operations in the United States, Canada, and Latin America for \$860 million in 2006.
- Ironbridge Capital and Archer Capital acquired 3M's pharmaceuticals business in the Asia Pacific region, including Australia and South Africa for \$349 million in 2006.

The agreements are the result of a review of strategic options for the branded pharmaceuticals business and its immune response modifier (IRM) platform that 3M announced in April 2006. Under the agreements, the purchasers acquired regional marketing and intellectual property rights for 3M's well-known branded pharmaceuticals, including Aldara, Difflam, Duromine, Tambocor, Maxair, Metrogel-Vaginal and Minitran. As part of the transaction, Graceway Pharmaceuticals also acquired the rights to certain IRM molecules.

In connection with these transactions, 3M entered into agreements whereby its Drug Delivery Systems Division became a source of supply to the acquiring companies. Because of the extent of 3M cash flows from these agreements in relation to those of the disposed-of businesses, the operations of the branded pharmaceuticals business are not classified as discontinued operations. See Note 4 for further discussion of restructuring actions that resulted from the divestiture of the Company's global branded pharmaceuticals business.

In June 2007, 3M completed the sale of its Opticom Priority Control Systems and Canoga Traffic Detection businesses to TorQuest Partners Inc., a Toronto-based investment firm. 3M received proceeds of \$80 million for this transaction and recognized, net of assets sold, transaction and other costs, a pre-tax gain of \$68 million (recorded in the Display and Graphics segment) in 2007.

Acquisitions:

During 2007, the purchase price paid for business combinations totaled \$539 million, net of cash acquired, plus approximately 150 thousand shares of 3M common stock, which had a market value of approximately \$13 million.

The 16 business combinations completed during 2007 are summarized as follows:

1) In February 2007, 3M (Industrial and Transportation Business) purchased certain assets of Accuspray Application Technologies Inc., a manufacturer of spray paint equipment with a wide array of spray guns for architectural, automotive refinishing, industrial and woodworking applications.

Edgar Filing: 3M CO - Form 10-K

- 2) In February 2007, 3M (Industrial and Transportation Business) purchased Sealed Air Corporation's 50 percent interest in PolyMask Corporation, a joint venture between 3M and Sealed Air that produces protective films. The acquisition of Sealed Air's interest results in 100 percent ownership by 3M.

- 3) In February 2007, 3M (Health Care Business) purchased 100 percent of the outstanding shares of Acolyte Biomedica Ltd., a Salisbury, U.K.-based provider of an automated microbial detection platform that aids in the rapid detection, diagnosis, and treatment of infectious diseases.

- 4) In May 2007, 3M (Safety, Security and Protection Services Business) purchased 100 percent of the outstanding shares of E Wood Holdings PLC, a North Yorkshire, UK-based manufacturer of high performance protective coatings for oil, gas, water, rail and automotive industries.

- 5) In May 2007, 3M (Electro and Communications Business) purchased certain assets of Innovative Paper Technologies LLC, a manufacturer of inorganic-based technical papers, boards and laminates for a wide variety of high temperature applications and Powell LLC, a supplier of non-woven polyester mats for the electrical industry.

- 6) In May 2007, 3M (Health Care Business) purchased certain assets of Articulos de Papel DMS Chile, a Santiago, Chile-based manufacturer of disposable surgical packs, drapes, gowns and kits.

- 7) In June 2007, 3M (Industrial and Transportation Business) purchased certain assets of Diamond Productions Inc., a manufacturer of superabrasive diamond and cubic boron nitride wheels and tools for dimensioning and finishing hard-to-grind materials in metalworking, woodworking and stone fabrication markets in exchange for approximately 150 thousand shares of 3M common stock, which had a market value of \$13 million at the acquisition measurement date and was previously held as 3M treasury stock.

- 8) In July 2007, 3M (Safety, Security and Protection Services Business) purchased 100 percent of the outstanding shares of Rochford Thompson Equipment Ltd., a manufacturer of optical character recognition passport readers used by airlines and immigration authorities, headquartered in Newbury, U.K.

- 9) In August 2007, 3M (Health Care Business) purchased certain assets of Neoplast Co. Ltd., a manufacturer/distributor of surgical tapes and dressings and first aid bandages for both the professional and consumer markets across the Asia Pacific region.

- 10) In October 2007, 3M (Health Care Business) purchased 100 percent of the outstanding shares of Abzil Industria e Comercio Ltda., a manufacturer of orthodontic products based in Sao Jose do Rio Preto, Sao Paulo, Brazil.

- 11) In October 2007, 3M (Industrial and Transportation Business) purchased 100 percent of the outstanding shares of Venture Tape Corp. and certain related entities, a global provider of pressure sensitive adhesive tapes based in Rockland, Mass.

Edgar Filing: 3M CO - Form 10-K

12) In October 2007, 3M (Display and Graphics Business) purchased certain assets of Macroworx Media Pvt Ltd., a software company that specializes in the design and development of digital signage solutions based in Bangalore, India.

13) In October 2007, 3M (Health Care Business) purchased 100 percent of the outstanding shares of Lingualcare Inc., a Dallas-based orthodontic technology and services company offering the iBraces system, a customized, lingual orthodontic solution.

14) In November 2007, 3M (Industrial and Transportation Business) purchased certain assets of Standard Abrasives, a manufacturer of coated abrasive specialties and non-woven abrasive products for the metalworking industry headquartered in Simi Valley, Ca.

15) In November 2007, 3M (Industrial and Transportation Business) purchased 100 percent of the outstanding shares of Unifam Sp. z o.o., a manufacturer of cut-off wheels, depressed center grinding wheels and flap discs based in Poland.

16) In November 2007, 3M (Industrial and Transportation Business) purchased certain assets of Bondo Corp., a manufacturer of auto body repair products for the automotive aftermarket and various other professional and consumer applications based in Atlanta, Ga.

In addition to the business combinations above, 3M periodically acquires certain tangible and/or intangible assets and purchases interests in certain enterprises that do not otherwise qualify for accounting as business combinations. These transactions are largely reflected as additional asset purchase and investment activity.

Purchased identifiable intangible assets for the 16 business combinations closed during the twelve months ended December 31, 2007 totaled \$124 million and will be amortized on a straight-line basis over lives ranging from 2 to 10 years (weighted-average life of six years).

In 2007 and 2006, pro forma information related to acquisitions was not included because the impact on the Company's consolidated results of operations was not considered to be material. There were no material in-process research and development charges associated with 2007, while 2006 included \$95 million in charges for the Brontes Technologies Inc. acquisition. The purchase price allocation of certain 2007 business combinations is considered preliminary. The impact on the Consolidated Balance Sheet of the purchase price allocations related to acquisitions and adjustments relative to other acquisitions within the allocation period follow:

Asset (Liability) (Millions)	2007 Impact	2006 Impact
Accounts receivable	\$ 69	\$ 76
Inventory	79	55
Other current assets	5	8
Property, plant, and equipment net	68	65
Purchased intangible assets	131	282
Purchased goodwill	326	536
In-process R&D	1	95
Accounts payable and other current liabilities, net of other assets	(115)	(152)
Deferred tax liability	(12)	(77)

Edgar Filing: 3M CO - Form 10-K

Net assets acquired	\$	552	\$	888
Supplemental information:				
Cash paid	\$	546	\$	962
Less: Cash acquired		7		74
Cash paid, net of cash acquired	\$	539	\$	888
Non-cash (3M shares at fair value)		13		
Net assets acquired	\$	552	\$	888

Year 2006 acquisitions:

During the 12 months ended December 31, 2006, 3M completed 19 business combinations for a total purchase price of \$888 million, net of cash acquired. Purchased identifiable intangible assets of \$282 million for these acquisitions will be amortized on a straight-line basis over lives ranging from 1 to 17 years (weighted-average life of 9 years). The purchase price of several of these acquisitions is subject to increases, which could be triggered by the achievement of certain milestones.

Edgar Filing: 3M CO - Form 10-K

The largest of these acquisitions was the August 2006 purchase of 100 percent of the outstanding shares of Security Printing and Systems Limited (Safety, Security and Protection Services Business) from authentos GmbH, Germany. The acquired company is a producer of finished, personalized passports and secure cards.

In October 2006, 3M (Health Care Business) purchased 100 percent of the outstanding shares of Brontes Technologies Inc. (Brontes), a Lexington, Massachusetts-based developer of proprietary 3-D imaging technology for dental and orthodontic applications, for \$95 million in cash. Brontes was a development stage enterprise that did not yet have revenues from its principal operations and the technology acquired did not have any alternative future use. This transaction resulted in a 2006 charge of \$95 million, or \$0.13 per diluted share, reflecting the write-off of acquired in-process research and development costs, which are recognized as research, development and related expenses in the Consolidated Statement of Income.

The 17 additional business combinations are summarized as follows:

1) In January 2006, 3M (Consumer and Office Business) purchased 100 percent of the outstanding common shares of Interchemall Dom., a provider of household cleaning products based in Poland.

2) In March 2006, 3M (Industrial and Transportation Business) purchased certain assets of General Industrial Diamond Company Inc., a U.S. operation. The acquired company is a manufacturer of superabrasive grinding wheels, dressing tools and machines used to dimension and finish hard-to-grind materials in the industrial and commercial markets.

3) In April 2006, 3M (Health Care Business) purchased 100 percent of the outstanding shares of OMNII Oral Pharmaceuticals, a provider of differentiated preventive dental products, solutions and support for dental professionals.

4) In April 2006, 3M (Health Care Business) purchased certain assets of ClozeX Medical LLC, a provider of unique skin closure devices to treat lacerations and close surgical incisions. The agreement gives 3M exclusive worldwide rights for the manufacturing and distribution of ClozeX Wound Closures.

5) In June 2006, 3M (Health Care Business) purchased 100 percent of the outstanding shares of SBG (Software und Beratung im Gesundheitswesen) GmbH, a Berlin-based developer of software for managing diagnosis-related information in hospitals.

6) In June 2006, 3M (Safety, Security and Protection Services Business) purchased certain assets of POMP Medical and Occupational Health Products LLC, a Porto Alegre, Brazil-based provider of earplugs, eyewear and hand cream.

7) In July 2006, 3M (Industrial and Transportation Business) purchased certain assets of Pinnacle Distribution Concepts Inc., a leading transportation management system (TMS) provider specializing in the delivery of Web-based, on-demand solutions.

Edgar Filing: 3M CO - Form 10-K

8) In July 2006, 3M (Electro and Communications Business) purchased certain assets of SCC Products Inc. and JJ Converting LLC, both based in Sanford, N.C. SCC Products Inc. is a provider of flexible static control packaging and workstation products for electronic devices. JJ Converting LLC is a producer of films used to make static control bags.

9) In August 2006, 3M (Display and Graphics Business) purchased 100 percent of the outstanding shares of Archon Technologies Inc., a Denver, Colorado-based provider of enterprise software solutions for motor vehicle agencies.

10) In August 2006, 3M (Safety, Security and Protection Services Business) purchased 100 percent of the outstanding shares of Aerion Technologies, a Denver, Colorado-based maker of safety products, including heat stress monitors, thermal cameras and carbon monoxide detectors.

11) In September 2006, 3M (Electro and Communications Business) purchased 100 percent of the outstanding shares of Credence Technologies Inc., a Soquel, California-based provider of instruments and high-end monitoring equipment for electrostatic discharge control and electromagnetic compliance.

12) In October 2006, 3M (Consumer and Office Business) purchased certain assets of Nylonge Corp., a global provider of household cleaning products, including cellulose sponges, scrub sponges and household wipes.

13) In October 2006, 3M (Industrial and Transportation Business) purchased 100 percent of the outstanding shares of NorthStar Chemicals, Inc., a Cartersville, Georgia-based adhesive manufacturer.

14) In November 2006, 3M (Industrial and Transportation Business) purchased 100 percent of the outstanding shares of Global Beverage Group Inc., a Canadian-based provider of delivery management software solutions for the direct-store-delivery of consumer packaged goods.

15) In November 2006, 3M (Health Care Business) purchased 100 percent of the outstanding shares of Biotrace International PLC, a Bridgend, UK-based manufacturer and supplier of industrial microbiology products used in food processing safety, health care, industrial hygiene and defense applications.

16) In December 2006, 3M (Electro and Communications Business) purchased certain assets of Mahindra Engineering and Chemical Products LTD, an India-based manufacturer of cable jointing kits and accessories.

17) In December 2006, 3M (Health Care Business) purchased 100 percent of the outstanding shares of SoftMed Systems Inc., a Maryland-based provider of health information management software and services that improve the workflow and efficiency of health care organizations.

Edgar Filing: 3M CO - Form 10-K

The 2006 impact on the Consolidated Balance Sheet of the purchase price allocations related to the 2006 acquisitions and adjustments relative to other acquisitions within the allocation period were provided in the preceding table.

Year 2005 acquisitions:

The Company acquired CUNO on August 2, 2005. The operating results of CUNO are included in the Industrial and Transportation Business segment. CUNO is engaged in the design, manufacture and marketing of a comprehensive line of filtration products for the separation, clarification and purification of fluids and gases. 3M and CUNO have complementary sets of filtration technologies, creating an opportunity to bring an even wider range of filtration solutions to customers around the world. 3M acquired CUNO for approximately \$1.36 billion, comprised of \$1.27 billion of cash paid (net of cash acquired) and the acquisition of \$80 million of debt, most of which has been repaid.

Purchased identifiable intangible assets of \$268 million for the CUNO acquisition will be amortized on a straight-line basis over lives ranging from 5 to 20 years (weighted-average life of 15 years). In-process research and development charges from the CUNO acquisition were not material. Pro forma information related to this acquisition is not included because its impact on the Company's consolidated results of operations is not considered to be material. The allocation of the purchase price is presented in the table that follows.

2005 CUNO ACQUISITION	
Asset (Liability)	
(Millions)	
Accounts receivable	\$ 96
Inventory	61
Property, plant, and equipment - net	121
Purchased intangible assets	268
Purchased goodwill	992
Other assets	30
Deferred tax liability	(102)
Accounts payable and other current liabilities	(104)
Interest bearing debt	(80)
Other long-term liabilities	(16)
Net assets acquired	\$ 1,266
Supplemental information:	
Cash paid	\$ 1,294
Less: Cash acquired	28
Cash paid, net of cash acquired	\$ 1,266

During the year ended December 31, 2005, 3M entered into two immaterial additional business combinations for a total purchase price of \$27 million, net of cash acquired.

1) 3M (Electro and Communications Business) purchased certain assets of Siemens Ultrasound division's flexible circuit manufacturing line, a U.S. operation. The acquired operation produces flexible interconnect circuits that provide electrical connections between components in electronics systems used primarily in the transducers of ultrasound machines.

2) 3M (Display and Graphics Business) purchased certain assets of Mercury Online Solutions Inc., a U.S. operation. The acquired operation provides hardware and software technologies and network management services for digital signage and interactive kiosk networks.

NOTE 3. Goodwill and Intangible Assets

As discussed in Note 16 to the Consolidated Financial Statements, effective in the first quarter of 2007, 3M made certain product moves between its business segments, which resulted in changes in the goodwill balances by business segment as presented below. For those changes that resulted in reporting unit changes, the Company applied the relative fair value method to determine the impact to reporting units. SFAS No. 142, Goodwill and Other Intangible Assets, requires that goodwill be tested for impairment at least annually and when reporting units are changed.

Purchased goodwill from acquisitions totaled \$326 million in 2007, \$55 million of which is deductible for tax purposes. Purchased goodwill from acquisitions totaled \$536 million in 2006, \$41 million of which is deductible for tax purposes. The sale of 3M's global branded pharmaceuticals business (Health Care) resulted in the write-off of \$54 million in goodwill, which is reflected in the 2006 translation and other column below. Changes in foreign currency exchange rates impacted both 2007 and 2006 goodwill balances. The goodwill balance by business segment follows:

Goodwill

(Millions)	Dec. 31, 2005 Balance	2006 acquisition activity	2006 translation and other	Dec. 31, 2006 Balance	2007 acquisition activity	2007 translation and other	Dec. 31, 2007 Balance
Industrial and Transportation	\$ 1,283	\$ 26	\$ (7)	\$ 1,302	\$ 155	\$ 67	\$ 1,524
Health Care	559	191	(37)	713	73	53	839
Display and Graphics	871	12	3	886		8	894
Consumer and Office	71	11	7	89		5	94
Safety, Security and Protection Services	234	264	27	525	70	16	611
Electro and Communications	512	32	23	567	28	32	627
Total Company	\$ 3,530	\$ 536	\$ 16	\$ 4,082	\$ 326	\$ 181	\$ 4,589

Acquired Intangible Assets

The carrying amount and accumulated amortization of acquired intangible assets as of December 31 follow:

(Millions)	2007	2006
Patents	\$ 446	\$ 419
Other amortizable intangible assets (primarily tradenames and customer-related intangibles)	801	641
Non-amortizable intangible assets (tradenames)	75	68
Total gross carrying amount	\$ 1,322	\$ 1,128
Accumulated amortization patents	(305)	(266)
Accumulated amortization other	(216)	(154)
Total accumulated amortization	(521)	(420)
Total intangible assets net	\$ 801	\$ 708

Amortization expense for acquired intangible assets for the years ended December 31 follows:

(Millions)	2007	2006	2005
Amortization expense	\$ 87	\$ 89	\$ 48

Expected amortization expense for acquired intangible assets recorded as of December 31, 2007 follows:

(Millions)	2008	2009	2010	2011	2012	After 2012
Amortization expense	\$ 100	\$ 98	\$ 89	\$ 81	\$ 72	\$ 286

The preceding expected amortization expense is an estimate. Actual amounts of amortization expense may differ from estimated amounts due to additional intangible asset acquisitions, changes in foreign currency exchange rates, impairment of intangible assets, accelerated amortization of intangible assets and other events.

NOTE 4. Restructuring Actions and Other Exit Activities

Restructuring Actions:

During the fourth quarter of 2006 and the first six months of 2007, management approved and committed to undertake the following restructuring actions:

- Pharmaceuticals business actions - employee-related, asset impairment and other costs pertaining to the Company's exit of its branded pharmaceuticals operations. These costs included severance and benefits for pharmaceuticals business employees who are not obtaining employment with the buyers as well as impairment charges associated with certain assets not transferred to the buyers.
- Overhead reduction actions - employee-related costs for severance and benefits, costs associated with actions to reduce the Company's cost structure.
- Business-specific actions - employee-related costs for severance and benefits, fixed and intangible asset impairments, certain contractual obligations, and expenses from the exit of certain product lines.

Components of these restructuring actions include:

Restructuring Actions

(Millions)	Employee- Related Items And Benefits	Contract Terminations and Other	Asset Impairments	Total
Expense incurred in 2006:				
Pharmaceuticals business actions	\$ 97	\$ 8	\$ 61	\$ 166
Overhead reduction actions	112			112
Business-specific actions	34	8	83	125
Total 2006 expense	\$ 243	\$ 16	\$ 144	\$ 403
Non-cash changes in 2006:

Pharmaceuticals business actions	\$ 5	\$	\$	\$ 5
Overhead reduction actions	10			10
Business-specific actions	5			5

Edgar Filing: 3M CO - Form 10-K

Total accrued liability balance	\$	20	\$	\$	\$	20
---------------------------------	----	----	----	----	----	----

Income statement line in which the preceding 2007 and 2006 expenses (credits) are reflected:

(Millions)	2007	2006
Cost of sales	\$ 40	\$ 130
Selling, general and administrative expenses	5	198
Research, development and related expenses	(7)	75
Total	\$ 38	\$ 403

The amount of expenses (credits) incurred in 2007 and 2006 associated with the preceding are reflected in the Company's business segments as follows:

(Millions)	2007	2006
Industrial and Transportation	\$ 2	\$ 15
Health Care	(11)	293
Display and Graphics	3	39
Safety, Security and Protection Services	28	10
Electro and Communications	18	46
Corporate and Unallocated	(2)	
Total	\$ 38	\$ 403

Actions with respect to the above activities were substantially completed in 2007 and additional charges and adjustments are not expected to be material.

In connection with this targeted restructuring plan, the Company eliminated a total of approximately 1,900 positions from various functions within the Company. Approximately 390 positions were pharmaceuticals business employees, approximately 960 positions related primarily to corporate staff overhead reductions, and approximately 550 positions were business-specific reduction actions. Of the 1,900 employment reductions, about 58% are in the United States, 21% in Europe, 12% in Latin America and Canada, and 9% in the Asia Pacific area. As a result of the second-quarter 2007 phase-out of operations at a New Jersey roofing granule facility and the sale of the Company's Opticom Priority Control Systems and Canoga Traffic Detection businesses, the Company eliminated approximately 100 additional positions.

Employee-related severance charges are largely based upon distributed employment policies and substantive severance plans and were reflected in the quarter in which management approved the restructuring actions. Severance amounts for which affected employees were required to render service in order to receive benefits at their termination dates were measured at the date such benefits were communicated to the applicable employees and recognized as expense over the employees' remaining service periods.

Non-cash employee-related changes in 2007 and 2006 primarily relate to special termination pension and medical benefits granted to certain U.S. eligible employees. These pension and medical benefits were reflected as a component of the benefit obligation of the Company's pension and medical plans as of December 31, 2007 and 2006. In addition, these changes also reflect non-cash stock option expense due to the reclassification of certain employees age 50 and older to retiree status, resulting in a modification of their original stock option awards for accounting purposes.

Edgar Filing: 3M CO - Form 10-K

Contract termination and other charges primarily reflect costs to terminate a contract before the end of its term (measured at fair value at the time the Company provided notice to the counterparty) or costs that will continue to be incurred under the contract for its remaining term without economic benefit to the Company.

Business-specific asset impairment charges for 2007 totaled \$35 million. This included charges of \$24 million related to property, plant and equipment associated with the Company's decision to phase-out operations at a New Jersey roofing granule facility (Safety, Security and Protection Services segment) and charges of \$11 million (\$10 million related to property, plant and equipment and \$1 million related to intangible assets) related to the Company's decision to close an Electro and Communications facility in Wisconsin. Asset impairment charges related to intangible assets and property, plant and equipment reflect the excess of the assets' carrying values over their fair values.

Asset impairment charges in 2006 associated with the pharmaceuticals business and business-specific actions include \$109 million relative to property, plant and equipment; \$30 million relative to intangible assets; and \$5 million relative to other assets. Impairment charges relative to intangible assets and property, plant and equipment reflect the excess of the assets' carrying values over their fair values as discussed in Note 1. The pharmaceuticals business asset impairment charges are for certain assets not transferred to the buyers and primarily relate to the write-down of the assets to salvage value. The business-specific asset impairment charges primarily relate to decisions the Company made in the fourth quarter of 2006 to exit certain marginal product lines in the Display and Graphics segment and Electro and Communications segment.

Other Exit Activities:

During the second half of 2007, the Company recorded net pre-tax charges of \$45 million related to exit activities. These charges related to employee reductions and fixed asset impairments, including the consolidation of certain flexible circuit manufacturing operations (\$23 million recorded in the Electro and Communications segment) and other actions, primarily in the Display and Graphics segment and Industrial and Transportation segment. These charges were recorded in cost of sales and selling, general and administrative expenses and research, development and related expenses.

NOTE 5. Supplemental Balance Sheet Information

NOTE 6. Supplemental Stockholders Equity and Accumulated Other Comprehensive Income Information

Common stock (\$.01 par value per share) of 3.0 billion shares is authorized, with 944,033,056 shares issued. Treasury stock is reported at cost, with 234,877,025 shares at December 31, 2007, 209,670,254 shares at December 31, 2006, and 189,494,669 shares at December 31, 2005. Preferred stock, without par value, of 10 million shares is authorized but unissued.

The components of the ending balances of accumulated other comprehensive income (loss) as of December 31 follow:

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106 and 132(R). This standard eliminated the requirement for a minimum pension liability adjustment that was previously required under SFAS No. 87 and required employers to recognize the underfunded or overfunded status of a defined benefit plan as an asset or liability in its statement of financial position. In 2006, as a result of the implementation of SFAS No. 158, the Company recognized an after-tax decrease in accumulated other comprehensive income of \$1.187 billion and \$513 million for the U.S. and International pension benefit plans, respectively, and \$218 million for the postretirement health care and life insurance benefit plan. See Note 11 for additional detail.

Reclassification adjustments are made to avoid double counting in comprehensive income items that are also recorded as part of net income. In 2007, as disclosed in the net periodic benefit cost table in Note 11, \$198 million pre-tax (\$123 million after-tax) were reclassified to earnings from accumulated other comprehensive income to pension and postretirement expense in the income statement. These pension and postretirement expense amounts are shown in the table in Note 11 as amortization of transition (asset) obligation, amortization of prior service cost (benefit) and amortization of net actuarial (gain) loss. Other reclassification adjustments (except for cash flow hedging instruments adjustments provided in Note 12) were not material. No tax provision has been made for the translation of foreign currency financial statements into U.S. dollars.

NOTE 7. Supplemental Cash Flow Information

(Millions)	2007	2006	2005
Cash income tax payments	\$ 1,999	\$ 1,842	\$ 1,277
Cash interest payments	162	119	79
Capitalized interest	25	16	12

Individual amounts in the Consolidated Statement of Cash Flows exclude the impacts of acquisitions, divestitures and exchange rate impacts, which are presented separately. Other net in the Consolidated Statement of Cash Flows within operating activities in 2007 and 2006 includes changes in liabilities related to 3M's restructuring actions (Note 4) and in 2005 includes the non-cash impact of adopting FIN 47 (\$35 million cumulative effect of accounting change).

Transactions related to investing and financing activities with significant non-cash components are as follows: In 2007, 3M purchased certain assets of Diamond Productions, Inc. for approximately 150 thousand shares of 3M common stock, which has a market value of approximately \$13 million at the acquisition's measurement date. Liabilities assumed from acquisitions are provided in the tables in Note 2.

The Company files income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 1999. It is anticipated that its examination for the Company's U.S. income tax returns for the years 2002 through 2004 will be completed by the end of first quarter 2008. As of December 31, 2007, the IRS has proposed adjustments to the Company's tax positions for which the Company is fully reserved. Payments relating to any proposed assessments arising from the 2002 through 2004 audit may not be made until a final agreement is reached between the Company and the IRS on such assessments or upon a final resolution resulting from the administrative appeals process or judicial action. In addition to the U.S. federal examination, there is also limited audit activity in several U.S. state and foreign jurisdictions. Currently, the Company expects the liability for unrecognized tax benefits to change by an insignificant amount during the next 12 months.

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. As a result of the implementation of Interpretation 48, the Company recognized an immaterial increase in the liability for unrecognized tax benefits, which was accounted for as a reduction to the January 1, 2007, balance of retained earnings. A reconciliation of the beginning and ending amount of gross unrecognized tax benefits (UTB) is as follows:

(Millions)	Federal, State, and Foreign Tax	
Gross UTB Balance at January 1, 2007	\$	691
Additions based on tax positions related to the current year		79
Additions for tax positions of prior years		143
Reductions for tax positions of prior years		(189)
Settlements		(24)
Reductions due to lapse of applicable statute of limitations		(20)
Gross UTB Balance at December 31, 2007	\$	680
Net UTB impacting the effective tax rate at December 31, 2007	\$	334

The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate as of January 1, 2007 and December 31, 2007, respectively, are \$261 million and \$334 million. The ending net UTB results from adjusting the gross balance at December 31, 2007 for items such as Federal, State, and non-U.S. deferred items, interest and penalties, and deductible taxes. The net UTB is included as components of Accrued Income Taxes and Other Liabilities within the Consolidated Balance Sheet.

The Company recognizes interest and penalties accrued related to unrecognized tax benefits in tax expense. At January 1, 2007 and December 31, 2007, accrued interest and penalties on a gross basis were \$65 million and \$69 million, respectively. Included in these interest and penalty amounts is interest and penalties related to tax positions for which the ultimate deductibility is highly certain but for which there is uncertainty about the timing of such deductibility. Because of the impact of deferred tax accounting, other than interest and penalties, the disallowance of the shorter deductibility period would not affect the annual effective tax rate but would accelerate the payment of cash to the taxing authority to an earlier period.

In 2007, the Company completed the preparation and filing of its 2006 U.S. federal and state income tax returns, which did not result in any material changes to the Company's financial position. In 2006, an audit of the Company's U.S. tax returns for years through 2001 was completed. The Company and the Internal Revenue Service reached a final settlement for these years, including an agreement on the amount of a refund claim to be filed by the Company. The Company also substantially resolved audits in certain European countries. In addition, the Company completed the preparation and filing of its 2005 U.S. federal income tax return and the corresponding 2005 state income tax returns. The adjustments from amounts previously estimated in the U.S. federal and state income tax returns (both positive and negative) included lower U.S. taxes on dividends received from the Company's foreign subsidiaries. The Company also made quarterly adjustments (both positive and negative) to its reserves for tax contingencies. Considering the developments noted above and other factors, including the impact on open audit

Edgar Filing: 3M CO - Form 10-K

years of the recent resolution of issues in various audits, these reassessments resulted in a reduction of the reserves in 2006 by \$149 million, inclusive of the expected amount of certain refund claims.

In 2005, the Company announced its intent to reinvest \$1.7 billion of foreign earnings in the United States pursuant to the provisions of the American Jobs Creation Act of 2004. This Act provided the Company the opportunity to tax-

efficiently repatriate foreign earnings for U.S. qualifying investments specified in its domestic reinvestment plan. As a consequence, in 2005, 3M recorded a charge of \$75 million.

The Company made discretionary contributions to its U.S. qualified pension plan of \$200 million in 2007, \$200 million in 2006, and \$500 million in 2005. The current income tax provision includes a benefit for the pension contributions; the deferred tax provision includes a cost for the related temporary difference.

As a result of certain employment commitments and capital investments made by 3M, income from manufacturing activities in certain countries is subject to reduced tax rates or, in some cases, is exempt from tax for years through 2014. The income tax benefits attributable to the tax status of these subsidiaries are estimated to be \$47 million (6 cents per diluted share) in 2007, \$20 million (3 cents per diluted share) in 2006, and \$23 million (3 cents per diluted share) in 2005.

The Company has not provided deferred taxes on unremitted earnings attributable to international companies that have been considered to be reinvested indefinitely. These earnings relate to ongoing operations and were approximately \$5.7 billion as of December 31, 2007. Because of the availability of U.S. foreign tax credits, it is not practicable to determine the income tax liability that would be payable if such earnings were not indefinitely reinvested.

NOTE 9. Marketable Securities

The Company invests in asset-backed securities, agency securities, corporate medium-term note securities, auction rate securities and other securities. The following is a summary of amounts recorded on the Consolidated Balance Sheet for marketable securities (current and non-current) at December 31, 2007.

(Millions)	Dec. 31, 2007
Agency securities	\$ 260
Asset-backed securities	186
Other securities	133
Current marketable securities	579
Asset-backed securities	267
Corporate medium-term notes securities	112
Agency securities	56
Auction rate securities	16
Other securities	29
Non-current marketable securities	480
Total marketable securities	\$ 1,059

Classification of marketable securities as current or non-current is dependent upon management's intended holding period, the security's maturity date and liquidity considerations based on market conditions. If management intends to hold the securities for longer than one year as of the balance sheet date, they are classified as non-current. The fair value of marketable securities approximates cost, except for certain auction rate

Edgar Filing: 3M CO - Form 10-K

securities discussed in the next paragraph. Gross unrealized gains and losses for marketable securities were not material as of December 31, 2007 and 2006; however, in 2007 the Company did have both realized and unrealized losses associated with auction rate securities as discussed below. Gross realized gains and losses on sales of marketable securities were not material for 2007, 2006 or 2005, but in 2007 pre-tax gains totaled approximately \$7 million. Cost of securities sold or reclassified use the first in, first out (FIFO) method. Since these marketable securities are classified as available-for-sale securities, changes in fair value will flow through other comprehensive income, with amounts reclassified out of other comprehensive income into earnings upon sale or other-than-temporary impairment (as discussed below).

3M has a diversified marketable securities portfolio of \$1.059 billion as of December 31, 2007. Within this portfolio, current and long-term asset-backed securities (estimated fair value of \$453 million) are primarily comprised of interests in automobile loans and credit cards, with only \$27 million invested in interests in mortgage-backed securities or home equity loans. 3M's marketable securities portfolio also includes auction rate securities (estimated fair value of \$16 million) that represent interests in collateralized debt obligations, which are collateralized by pools of residential and commercial mortgages, and interests in investment grade credit default swaps. During the second half of 2007, these auction rate securities failed to auction due to sell orders exceeding buy orders. Liquidity for these auction-rate securities is typically provided by an auction process that resets the applicable interest rate at pre-determined intervals,

usually every 7, 28, 35, or 90 days. The funds associated with failed auctions will not be accessible until a successful auction occurs or a buyer is found outside of the auction process. Based on broker-dealer valuation models and an analysis of other-than-temporary impairment factors, auction rate securities with an original par value of approximately \$34 million were written-down to an estimated fair value of \$16 million as of December 31, 2007. This write-down resulted in an other-than-temporary impairment charge of approximately \$8 million (pre-tax) included in net income and a temporary impairment charge of \$10 million (pre-tax) reflected as an unrealized loss within other comprehensive income for 2007. As of December 31, 2007, these investments in auction rate securities have been in a loss position for less than six months. These auction rate securities are classified as non-current marketable securities as of December 31, 2007 as indicated in the preceding table.

3M reviews impairments associated with the above in accordance with Emerging Issues Task Force (EITF) 03-1 and FSP SFAS 115-1 and 124-1, The Meaning of Other-Than-Temporary-Impairment and Its Application to Certain Investments, to determine the classification of the impairment as temporary or other-than-temporary. A temporary impairment charge results in an unrealized loss being recorded in the other comprehensive income component of stockholders' equity. Such an unrealized loss does not reduce net income for the applicable accounting period because the loss is not viewed as other-than-temporary. The company believes that a portion of the impairment of its auction rate securities investments is temporary and a portion is other-than-temporary. The factors evaluated to differentiate between temporary and other-than-temporary include the projected future cash flows, credit ratings actions, and assessment of the credit quality of the underlying collateral.

The balance at December 31, 2007 for marketable securities and short-term investments by contractual maturity are shown below. Actual maturities may differ from contractual maturities because the issuers of the securities may have the right to prepay obligations without prepayment penalties.

(Millions)	Dec. 31, 2007	
Due in one year or less	\$	231
Due after one year through three years		545
Due after three years through five years		221
Due after five years		62
Total marketable securities	\$	1,059

NOTE 10. Long-Term Debt and Short-Term Borrowings

Long-term debt and short-term borrowings as of December 31 consisted of the following (with interest rates as of December 31, 2007):

Long-Term Debt (Millions)	Currency/ Fixed vs. Floating*	Effective Interest Rate*	Maturity Date	2007	2006
Description / Principal Amount					
Eurobond (625 million Euros)	Euro Fixed	4.98%	2014	919

Floating rate note (\$62 million)	USD Floating	4.64%	2044	62	62
Other borrowings	Various	4.27%	2008-2040	223	226
Total long-term debt				\$ 4,559	\$ 2,161
Less: current portion of long-term debt				540	1,114
Long-term debt (excluding current portion)				\$ 4,019	\$ 1,047

Short-Term Borrowings and Current Portion of Long-Term Debt (Millions)	Effective Interest Rate*	2007	2006
Current portion of long-term debt	5.37%	\$ 540	\$ 1,114
Non-U.S. dollar commercial paper	4.60%	349	314
U.S. dollar commercial paper			1,035
Other borrowings	7.57%	12	43
Total short-term borrowings and current portion of long-term debt		\$ 901	\$ 2,506

Weighted-Average Effective Interest Rate*

At December 31	2007	Total	2006	2007	Excluding ESOP Debt	2006
Short-term	5.10%		4.65%	5.07%		4.63%
Long-term	4.48%		3.67%	4.47%		3.49%

* Debt tables reflect the effects of interest rate swaps at December 31; weighted-average effective interest rate table reflects the combined effects of interest rate and currency swaps at December 31.

Maturities of long-term debt for the five years subsequent to December 31, 2007 are as follows (in millions):

2008	2009	2010	2011	2012	Thereafter	Total
\$ 540	\$ 477	\$ 24	\$	\$ 500	\$ 3,018	\$ 4,559

Long-term debt payments due in 2008 include \$350 million of dealer remarketable securities (final maturity 2010) and \$62 million of floating rate notes (final maturity 2044). These securities are classified as current portion of long-term debt as the result of put provisions associated with these debt instruments.

The ESOP debt is serviced by dividends on stock held by the ESOP and by Company contributions. These contributions are not reported as interest expense, but are reported as an employee benefit expense in the Consolidated Statement of Income. Other borrowings includes debt held by 3M's international companies and floating

rate notes in the United States, with the long-term portion of this debt primarily composed of U.S. dollar floating rate debt.

At December 31, 2007, certain debt agreements (\$350 million of dealer remarketable securities and \$87 million of ESOP debt) had ratings triggers (BBB-/Baa3 or lower) that would require repayment of debt. The Company has an AA credit rating from Standard & Poor's, with a stable outlook, and an Aa1 credit rating from Moody's Investors Service, with a negative outlook. On April 30, 2007, the Company replaced its \$565 million credit facility with a new \$1.5 billion five-year credit facility, which has provisions for the Company to request an increase of the facility up to \$2 billion (at the lenders' discretion), and providing for up to \$150 million in letters of credit. As of December 31, 2007, there are \$110 million in letters of credit drawn against the facility. Under the new credit agreement, 3M is required to maintain its EBITDA to Interest Ratio as of the end of each fiscal quarter at not less than 3.0 to 1. This is calculated (as defined in the agreement) as the ratio of consolidated total EBITDA for the four consecutive quarters then ended to total interest expense on all funded debt for the same period. At December 31, 2007, this ratio was approximately 35 to 1. At December 31, 2007, available short-term committed lines of credit internationally totaled approximately \$67 million, of which approximately \$13 million was utilized. Debt covenants do not restrict the payment of dividends.

The Company has a well-known seasoned issuer shelf registration statement, effective February 24, 2006, to register an indeterminate amount of debt or equity securities for future sales. On June 15, 2007, the Company registered 150,718 shares of the Company's common stock under this shelf on behalf of and for the sole benefit of the selling stockholders in connection with the Company's acquisition of assets of Diamond Productions, Inc. The Company intends to use the proceeds from future securities sales off this shelf for general corporate purposes. In connection with this shelf registration, in June 2007 the Company established a medium-term notes program through which up to \$3 billion of medium-term notes may be offered. In December 2007, 3M issued a five-year, \$500 million, fixed rate note with a coupon rate of 4.65% under this medium-term notes program. This program has a remaining capacity of \$2.5 billion as of December 31, 2007.

In September 2003, the Company filed a shelf registration statement with the Securities and Exchange Commission relating to the potential offering of debt securities of up to \$1.5 billion. This shelf registration became effective in October 2003. In December 2003, the Company established under the shelf a medium-term notes program through which up to \$1.5 billion of medium-term notes may be offered. In March 2007, the Company issued a 30-year, \$750 million, fixed rate note with a coupon rate of 5.70%. In November 2006, 3M issued a three-year, \$400 million, fixed rate note. The Company entered into an interest rate swap to convert this to a rate based on a floating LIBOR index. In December 2004, 3M issued a 40-year, \$62 million, floating rate note, with the rate based on a floating LIBOR index. This \$1.5 billion medium term notes program was replaced by the \$3 billion program established in June 2007.

In July 2007, 3M issued a seven year 5.0% fixed rate Eurobond for an amount of 750 million Euros (approximately \$1.102 billion in U.S. Dollars at December 31, 2007). Upon debt issuance in July 2007, 3M completed a fixed-to-floating interest rate swap on a notional amount of 400 million Euros as a fair value hedge of a portion of the fixed interest rate Eurobond obligation. In December 2007, 3M reopened the existing seven year 5.0% fixed rate Eurobond for an additional amount of 275 million Euros (approximately \$404 million in U.S. Dollars at December 31, 2007). This security was issued at a premium and was subsequently consolidated with the original security on January 15, 2008.

3M may redeem its 30-year zero-coupon senior notes (the Convertible Notes) at any time in whole or in part, beginning November 21, 2007, at the accreted conversion price; however, bondholders may convert upon notification of redemption each of the notes into 9.4602 shares of 3M common stock. Holders of the 30-year zero-coupon senior notes have the option to require 3M to purchase their notes at accreted value on November 21 in the years 2005, 2007, 2012, 2017, 2022 and 2027. In November 2005, 22,506 of the 639,000 in outstanding bonds were redeemed, resulting in a payout from 3M of approximately \$20 million. In November 2007, an additional 364,598 outstanding bonds were redeemed resulting in a payout from 3M of approximately \$322 million. These payouts reduced the Convertible Notes' face value at maturity to \$252 million, which equates to a book value of approximately \$222 million at December 31, 2007. As disclosed in a Form 8-K in November 2005, 3M amended the terms of these securities to pay cash at a rate of 2.40% per annum of the principal amount at maturity of the Company's Convertible Notes, which equates to 2.75% per annum of the notes' accreted value on November 21, 2005. The cash interest payments were made semiannually in arrears on May 22, 2006, November 22, 2006, May 22, 2007 and November 22, 2007 to holders of record on the 15th calendar day preceding each such interest payment date. Effective November 22, 2007, the effective interest rate reverted back to the

original yield of 0.50%.

3M originally sold \$639 million in aggregate face amount of these Convertible Notes on November 15, 2002, which are convertible into shares of 3M common stock. The gross proceeds from the offering, to be used for general corporate purposes, were \$550 million (\$540 million net of issuance costs). Debt issuance costs were amortized on a straight-line basis over a three-year period beginning in November 2002. On February 14, 2003, 3M registered these Convertible Notes in a registration statement filed with the Securities and Exchange Commission. The terms of the

Convertible Notes include a yield to maturity of .50% and an initial conversion premium of 40% over the \$65.00 (split-adjusted) closing price of 3M common stock on November 14, 2002. If certain conditions for conversion (relating to the closing common stock prices of 3M exceeding the conversion trigger price for specified periods) are met, holders may convert each of the 30-year zero-coupon senior notes into 9.4602 shares of 3M common stock in any calendar quarter commencing after March 31, 2003. The conversion trigger price for the fourth quarter of 2007 was \$121.21 per share. If the conditions for conversion are met, and 3M elects not to settle in cash, the 30-year zero-coupon senior notes will be convertible in the aggregate into approximately 2.4 million shares of 3M common stock. The conditions for conversion related to the Company's Convertible Notes have never been met. If the conditions for conversion are met, 3M may choose to pay in cash and/or common stock; however, if this occurs, the Company has the intent and ability to settle this debt security in cash. Accordingly, there was no impact on 3M's diluted earnings per share.

In December 2007, the Company's \$350 million of dealer remarketable securities were remarketed for one year. They were reissued with a fixed coupon rate of 5.83%. These securities, which are classified as current portion of long-term debt, were issued in December 2000. The remarketable securities can be remarketed annually, at the option of the dealer, for a year each time, with a final maturity date of December 2010. In the second quarter of 2007, 3M repurchased \$42 million in floating rate notes due in 2037 at par as the bondholder exercised put provisions associated with this debt instrument.

NOTE 11. Pension and Postretirement Benefit Plans

3M has various company-sponsored retirement plans covering substantially all U.S. employees and many employees outside the United States. Pension benefits associated with these plans generally are based on each participant's years of service, compensation, and age at retirement or termination. In addition to providing pension benefits, the Company provides certain postretirement health care and life insurance benefits for substantially all of its U.S. employees who reach retirement age while employed by the Company. Most international employees and retirees are covered by government health care programs. The cost of company-provided postretirement health care plans for international employees is not material and is combined with U.S. amounts.

The Company's pension funding policy is to deposit with independent trustees amounts allowable by law. Trust funds and deposits with insurance companies are maintained to provide pension benefits to plan participants and their beneficiaries. There are no plan assets in the non-qualified plan due to its nature. For its U.S. postretirement health care and life insurance benefit plans, the Company has set aside amounts at least equal to annual benefit payments with an independent trustee.

In August 2006, the Pension Protection Act (PPA) was signed into law in the U.S. The PPA increases the funding target for defined benefit pension plans to 100% of the target liability. The PPA transition rules require a funding liability target of 92% in 2008, reaching 100% by 2011. 3M's U.S. qualified defined benefit plans are funded in excess of the applicable transition funding liability target for 2008; therefore, the Company expects that the plans will not be subject to the minimum required contribution of the PPA and its transition rules will not have a material impact on expected future contributions.

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106 and 132(R). This standard requires employers to recognize the underfunded or overfunded status of defined benefit pension and postretirement plans as an asset or liability in its statement of financial position, and recognize changes in the funded status in the year in which the changes occur through accumulated other comprehensive income, which is a component of stockholders' equity. This standard also eliminates the requirement for Additional Minimum Pension Liability (AML) required under SFAS No. 87. As a result of the application of SFAS No. 158 as of December 31, 2006, 3M reversed assets of \$2.515 billion and increased liabilities by \$703 million. These liabilities were offset to accumulated other comprehensive income and deferred taxes. In 2006, as a result of the implementation of SFAS No. 158, the Company recognized an after-tax decrease in accumulated other comprehensive income of \$1.187 billion.

and \$513 million for the U.S. and International pension benefit plans, respectively, and \$218 million for the postretirement health care and life insurance benefit plan.

Edgar Filing: 3M CO - Form 10-K

The following illustrates the adjustments to the Balance Sheet to record the initial adoption of the SFAS No. 158 funded status as of December 31, 2006:

(Millions)	With AML from 2005	AML adjustment	Pre-SFAS No. 158 with AML adjustments	SFAS No.158 adoption adjustments	Post SFAS No. 158
Prepaid Pension/(accrued pension liability)	\$ 2,111	\$ 15	\$ 2,126	\$ (3,199)	\$ (1,073)
Intangible asset	24	(5)	19	(19)	
Deferred tax asset	98	(3)	95	1,300	1,395
Accumulated other comprehensive income, net of tax	156	(7)	149	1,918	2,067
Accumulated other comprehensive income, pre-tax	254	(10)	244	3,218	3,462

Following is a reconciliation of the beginning and ending balances of the benefit obligation and the fair value of plan assets as of December 31:

The accumulated benefit obligation of the U.S. pension plans was \$9.643 billion and \$9.560 billion at December 31, 2007 and 2006, respectively. The accumulated benefit obligation of the international pension plans was \$4.421 billion and \$3.756 billion at December 2007 and 2006, respectively.

The U.S. nonqualified pension plan had a projected benefit obligation of \$360 million and \$354 million, respectively, as of December 31, 2007 and 2006, and has no plan assets due to the nature of the plan. The accumulated benefit obligation of the nonqualified pension plan is equal to the projected benefit obligation.

The following amounts relate to international pension plans with projected benefit obligations in excess of plan assets as of December 31:

(Millions)	2007	2006
Projected benefit obligation	\$ 4,346	\$ 3,680
Accumulated benefit obligation	3,989	3,049
Fair value of plan assets	3,782	3,073

The following amounts relate to international pension plans with accumulated benefit obligations in excess of plan assets as of December 31:

(Millions)	2007	2006
Projected benefit obligation	\$ 3,497	\$ 1,020
Accumulated benefit obligation	3,271	854
Fair value of plan assets	2,984	578

Edgar Filing: 3M CO - Form 10-K
